## Environmental Review Form

At a minimum, the Historic Preservation Division (HPD), Georgia State Historic Preservation Office (SHPO), may require the following information in order to review projects in accordance with applicable federal or state laws (Section 106 of the National Historic Preservation Act or the Georgia Environmental Policy Act, etc). Please note that responsibility for preparing documentation, including the identification of historic resources and the assessment of potential effects resulting from an undertaking, rests with the federal or state agency or its designated applicant. If insufficient information is provided, we may request additional materials. The role of the SHPO is to review, comment, and consult with federal/state agencies, applicants, and consultants. *Please note that the US Corps of Engineers (USACE) does not delegate compliance to applicants and all information prepared for permits through this agency should be coordinated directly with USACE. Also, if you are submitting a cell tower project do not use this form. Please submit all cellular projects on either the Form 620 or 621.*

**II. Information Defining the Area of Potential Effect (APE)**

A. The APE varies with project types, and can be direct or indirect (**physical or visual**). The APE is defined as “the geographic area or areas within which an undertaking may cause changes in the character or use of historic properties, if any such properties exist.” Factors considered when determining the APE include topography, vegetation, existing development, orientation of an existing resource to the project, physical siting of a resource, and existing and planned future development. For example:

1. Rehabilitation, renovation, and/or demolition of an historic building or structure, or new construction: the APE might include the building itself and the adjacent setting.
2. Streetscapes: the APE might include the viewshed from the street.
3. Pedestrian/bicycle facilities: the APE might extend the length of the corridor and for some distance on both sides of the corridor.
4. Underground utilities: the APE would usually be limited to the area of ground disturbance.

Based on this information, **describe the Area of Potential Effect** for your project:

B. **Attach a map or site plan and project plans (as applicable)**, which indicate the boundaries of the APE and provide information about project scope of work (this may be the same map used above to show project location), please see the examples on our website.

<sup>1</sup> Please note, this is not a complete list of websites with topographic map information. This website is not controlled by HPD and HPD bears no responsibility for its content.

C. **Provide high-resolution color photographs**, which illustrate the project area and the entire APE as defined above. Photography should document not only the project area, but also any adjacent properties that are within the APE. If the APE includes buildings or structures, please include clear views of each. All photography should be keyed to a site map and project plans (as applicable), please see our examples. Photographs should be individually numbered, and corresponding numbers should be placed on the map or site plan, showing location and direction of view. Should your project entail the alteration of existing historic structures, please provide photographs of existing conditions of sites, buildings and interior areas to be impacted.

### III. Site Information

A. To your knowledge, has a cultural resources assessment or a historic resources survey been conducted in the project area? YES \_\_\_\_\_ NO \_\_\_\_\_ DO NOT KNOW \_\_\_\_\_  
If yes, provide the title of the report, author, date and principal investigator:

For questions, please call 706-542-8737.) **Please note that as part of the review process, HPD may request an archaeological survey.**
