

## Disposal and Capacity 2009 Report

During Fiscal Year 2009 the amount of waste sent to Georgia landfills decreased, primarily due to decreased disposal attributable to the faltering economy, and perhaps in part to increased recycling efforts. (The possible reasons for this change are explored in the Executive Summary of this report.) Permitted capacity in 2009 is estimated to be approximately 31.5 years of remaining MSW landfill space and 31.5 years of remaining permitted C&D landfill space. However, some areas of the state, particularly Northeast Georgia, are quickly running out of disposal capacity.

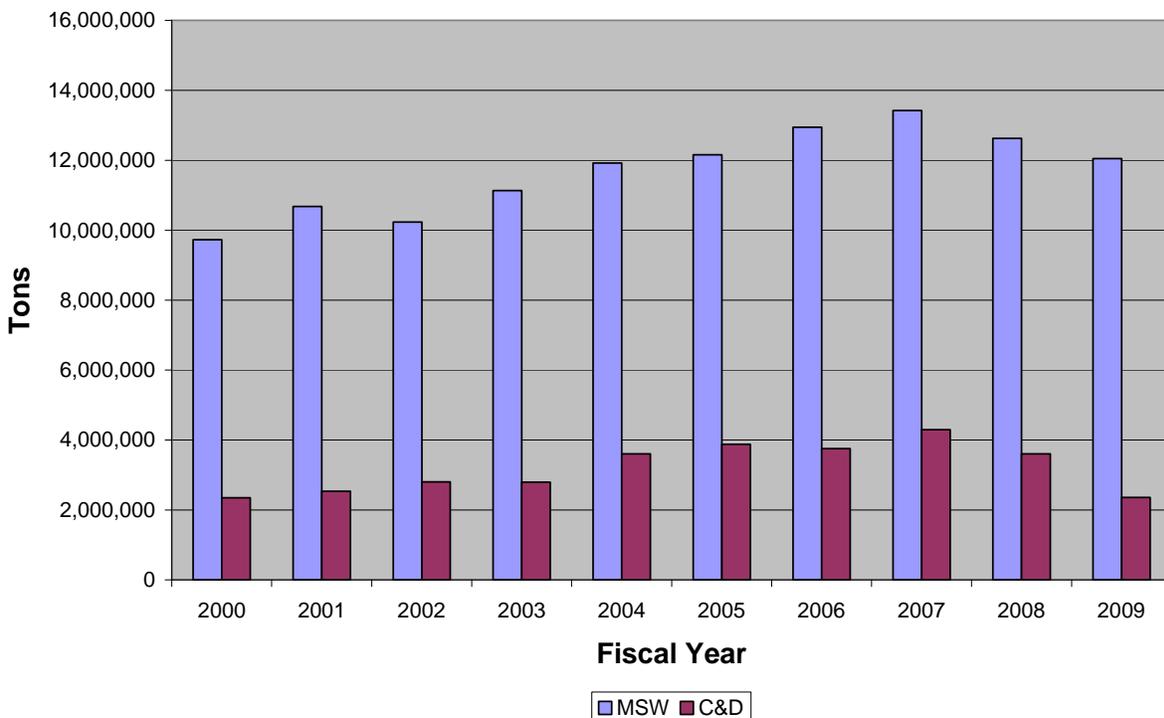

### Where Does the Waste Go?

Much of the waste disposed of in Georgia enters lined, monitored Municipal Solid Waste (MSW) Landfills. Of the 14,568,173 tons of waste disposed in permitted Georgia disposal facilities during FY 2009, 11,889,875 tons, or 81.6%, entered lined, monitored landfills meeting federal Subtitle D requirements. 16.3 percent of the waste (2,358,630 tons) entered unlined Construction and Demolition (C&D) landfills. The remainder was disposed in unlined Municipal Solid Waste landfills (159,834 or 1.1%).

Most of the waste disposed in Georgia enters private landfills. In FY 2009, landfill owners/operators reported 8,413,209 tons of waste entering 16 private MSW landfills, compared with 8,435,506 tons of waste entering 16 private MSW landfills in FY 2008. In FY 2009, 3,636,500 tons of waste entered 47 publicly owned MSW landfills in the state, compared to 4,187,667 tons of waste entering 47 publicly owned MSW landfills the previous year. From FY 1993-2009, the number of MSW landfills operated by cities, counties, and solid waste authorities dropped from 121 to 47; eight of these publicly owned MSW landfills also operate a separate cell within their MSW landfill for C&D materials only.

Landfill Quick Facts FY 2009		
	Private	Public
<b>MSW</b>		
Disposal	8.4 million tons	3.6 million tons
Landfill Ownership	16 facilities	47 facilities

## Disposal and Capacity 2009 Report

### C&D Landfills

Construction and Demolition landfills are permitted disposal facilities that can only accept waste building materials and rubble resulting from construction, remodeling, repair, and demolition operations on pavements, houses, commercial buildings and other structures. Such wastes include, but are not limited to, yard trimmings, asbestos-containing waste, wood, bricks, metal, concrete, wall board, paper, cardboard, inert waste landfill material, and other nonputrescible wastes which have a low potential for groundwater contamination.

In FY 2009, landfill operators reported 1,938,137 tons of waste entering 20 private C&D facilities, while 420,493 tons of waste entered 27 publicly owned facilities.

Permitted Solid Waste Management Facilities FY 2001-2009 <sup>1</sup>									
	2001	2002	2003	2004	2005	2006	2007	2008	2009

Recovered Materials Processing Facilities	5	3	0	1	1	1	1	1	1
Composting Facilities	3	3	3	3	3	3	5	5	2
Waste-to-Energy Facility	1	1	1	1	1	1	1	1	0

1. Operating as of July 2009; some facilities cease operations or are added, so these figures may differ from those used elsewhere in this report.

2. Collection operations are any entity that collects waste from residential or commercial locations.

3. EPD updated its database of these facilities to verify those still in operation; many had ceased operations.

\*EPD counts MSW landfills accepting C&D waste in specially-designated cells as C&D landfills. For the purposes of this report, DCA counts them as MSW. There are nine such facilities, for additional details see table beginning A-8 for details.

### Unlined Landfills

During FY 2009, 159,834 tons of waste was disposed in four unlined MSW landfills. This represents approximately 1.1% of the total waste entering MSW landfills in Georgia. As of July 2009, four unlined MSW facilities were still operating under their original EPD-approved permits, and had not reached their closure capacity. Until they do, they must adhere to the same operating procedures and methane monitoring requirements as their more modern counterparts.

When the unlined facilities close, they will be capped and monitored under federal Subtitle D regulations. There is no time limit for these landfills to meet Subtitle D regulations, but they will not be granted expansion permits. It is likely a small percentage of MSW generated in Georgia will continue to be disposed in unlined landfills for years to come.

Unlined Landfills Accepting MSW FY 2009					
County	Facility Name	Total Tons Disposed	Avg. Daily Tons	Remaining Capacity (CY)	Remaining Capacity (Years)

## Disposal and Capacity 2009 Report

### Other Disposal Facilities

Georgia's only MSW incinerator ceased accepting waste during FY 2008. The Savannah operation had been accepting about 160 tons per day, burning that waste to turn steam turbines generating electricity. There are several other types of incinerators in public and private use that accept only specialized waste, such as wood waste.

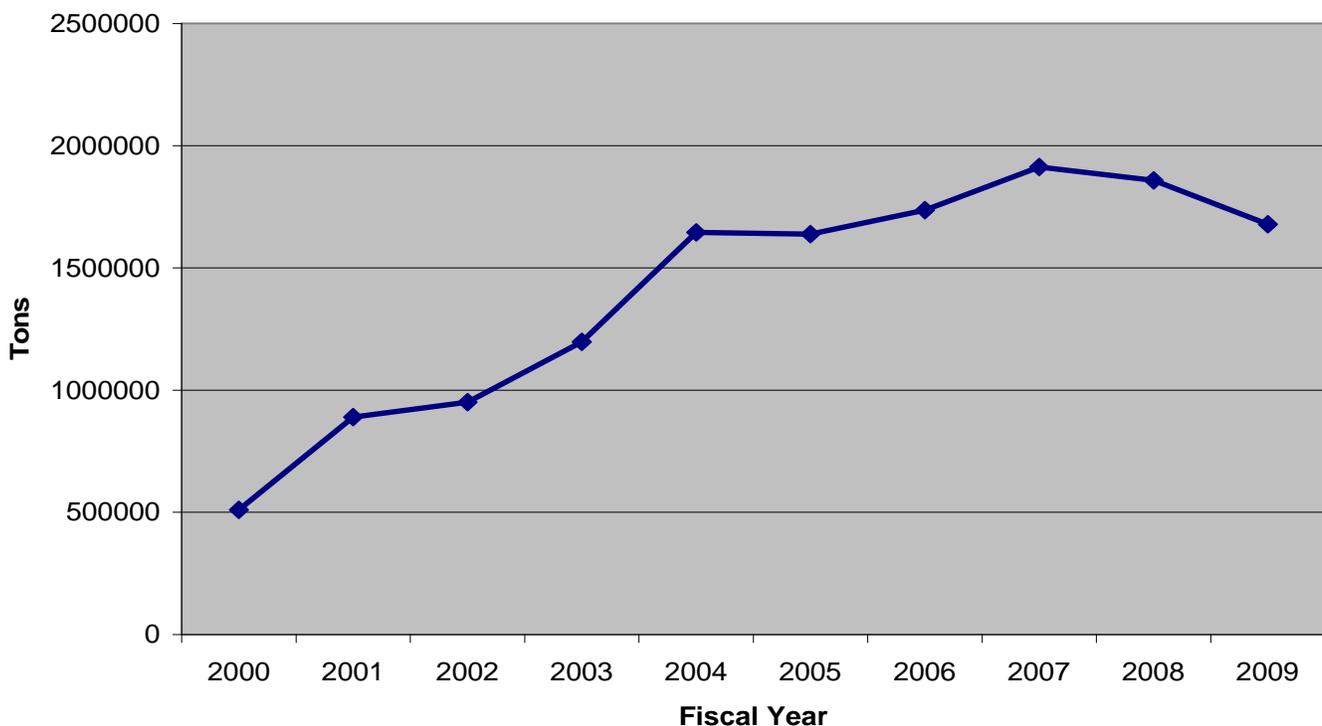

Another unique waste disposal operation that closed its doors in FY 2008 was Cobb County's MSW composting facility. The facility handled about the same amount of MSW as the Savannah Waste-to-Energy plant. Like the Savannah facility, its operational costs were considerably higher than MSW landfills.

Transfer stations are not actual disposal facilities, but they can offer significant collection savings and are becoming more common. There are nearly as many transfer stations as there are landfills, and the largest accept more than 1,000 tons of waste daily. Because these facilities are permit-by-rule, they do not have to pay the \$1 per-ton (minimum) host fee to local governments that MSW and C&D landfills must, per the Act. Nor do they receive the same regulatory oversight from the Environmental Protection Division that landfills do.

### Imported Waste

The amount of waste brought to Georgia from other states for disposal is more than eight times greater than it was in FY 1998. Waste imports fell slightly from 1,857,687 tons in FY 2008 to 1,678,013 in FY 2009. Most of the waste brought to Georgia from other states is MSW (98%), with the remainder entering C&D landfills. Out-of-state waste amounts to 11.5% of the total amount of waste disposed in Georgia or 13.9% of the waste entering MSW landfills in the state. (See Imported Waste FY 1998-2009) It is difficult to track border waste exchange, and it is suspected that in most cases, it travels relatively short distances across state lines. Based on telephone interviews with transfer station operators that ship waste out of state, it is believed that approximately 150,000 tons per year of Georgia-generated waste is sent to neighboring states.

**Imported Waste FY 2000 - 2009**

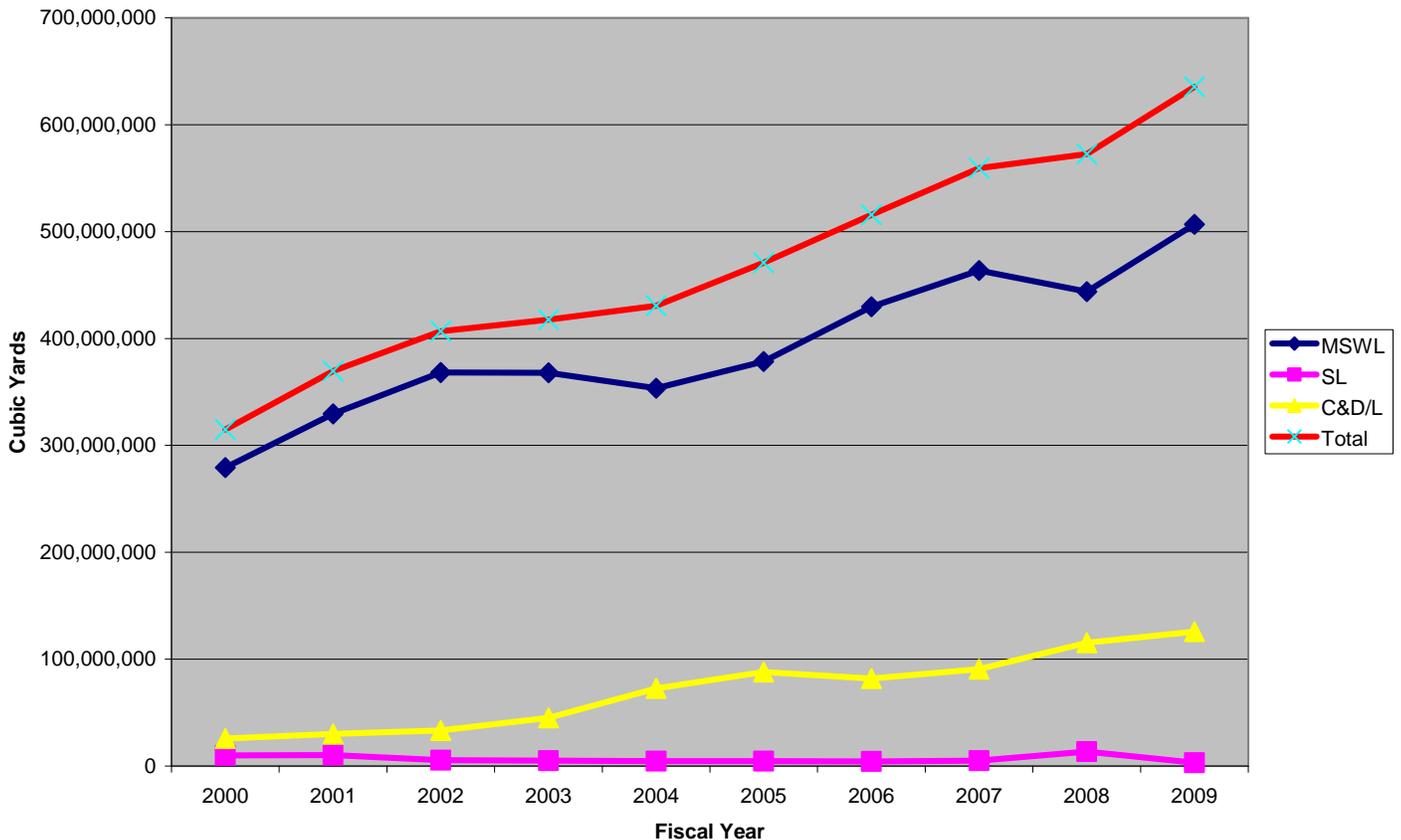

## Disposal and Capacity 2009 Report

Capacity, or the amount of available space in landfills to dispose of tightly compacted waste, fell from 572 million cubic yards in FY 2008 to 506 million cubic yards in FY 2009. Georgia has an estimated 31.5 years of remaining permitted MSW capacity statewide, based upon 2009 disposal rates. A regional breakdown, by Regional Center, can be found on page A-9. The projection of remaining capacity is based upon current disposal rates and disposal capacity permitted by the Georgia EPD, but not necessarily constructed landfill space. Reduced disposal due to the economic recession underscores that years remaining capacity is an estimate based on current disposal rates and remaining physical capacity measured in cubic yards at landfills; the amount of time left in landfills is very much a moving target. Just as recession can increase remaining capacity, economic expansion, storms and other debris-generating disasters can rapidly consume landfill space; these factors serve to underscore the need for sound solid waste planning.

The number of MSW landfills in Georgia has fallen since tighter federal regulations were adopted in the mid-1990s, but the number of C&D landfills increased to 54. In FY 1993, there were 187 public and private landfills in Georgia, and 75% of these were small facilities that only accepted waste generated within the host county. **For FY 2009, more than half the state's permitted disposal capacity sits in just five facilities, although there are 117 active permitted landfills in Georgia.** This shift in remaining disposal capacity has occurred while smaller or older landfills are closed and enter lengthy post-closure monitoring periods. There are 320 landfills across Georgia in post-closure.. The table entitled 'Georgia Landfills with Most Remaining Permitted Disposal Capacity FY 2009' on page A-6 ranks the top five landfills in the state by remaining disposal capacity.

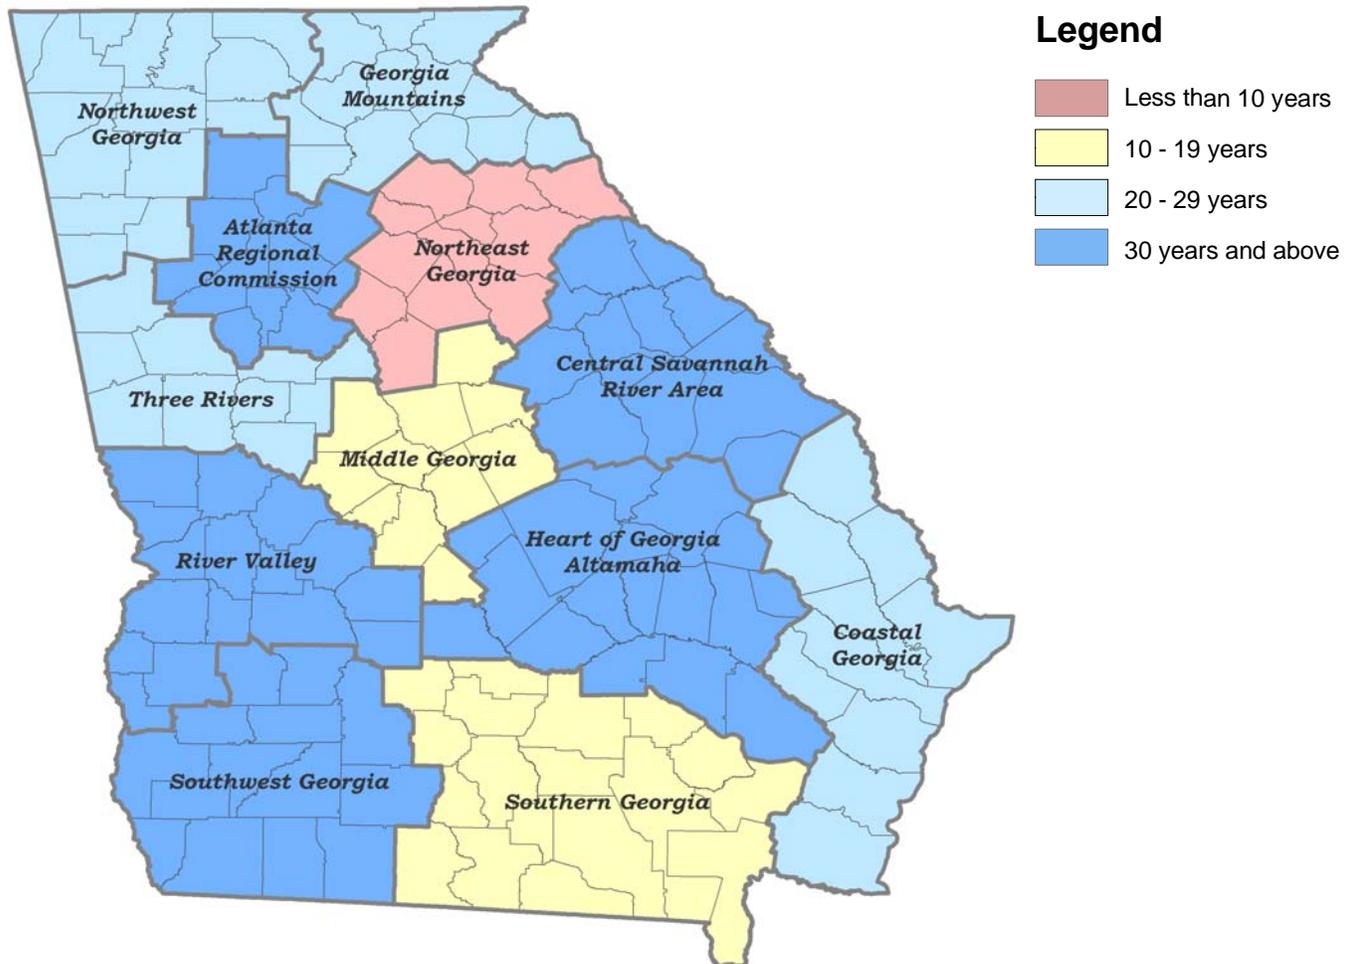

**Landfill Capacity by Type FY 2000- 2009**

# Remaining MSW Landfill Capacity

## FY 2009

Map prepared by: Georgia Department of Community Affairs. Source: Years of remaining capacity by Regional Development Center was calculated using EPD-supplied average rate of fill and cubic yards of remaining capacity, based on 260 operating days per year.
