June 20, 2011

To: Georgia Department of Community Affairs
60 Executive Park South, NE
Atlanta, Georgia 30329-2231

Ladies and Gentlemen:

GEC declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professionals* as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Kevin R. Strumpler, P.G.
Senior Geologist
GA Reg. No.: 1064

Geotechnical & Environmental Consultants, Inc. (GEC) has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of 40 C.F.R. Part 312 and most current ASTM standard (ASTM E 1527-2005, Standard Practice for Environmental Site Assessments) of the Coral Gardens apartment complex located at 1856 Wells Drive SW, Atlanta, Georgia, the subject *property*. Any exceptions to, or deletions from this practice are described in Section 2.0 of this report. GEC certifies that the Phase I was performed by a qualified Environmental Professional meeting the requirement set forth in 40 CFR §312.10(b).

1.0 EXECUTIVE SUMMARY

Mr. Adam Jaffe, with Atlantic Development and Investments, retained Geotechnical & Environmental Consultants, Inc. (GEC), on behalf of Georgia Coral Gardens, L.P. to perform a Georgia Department of Community Affairs (DCA) Phase I Environmental Site Assessment (ESA) on the approximately 4.38-acre Coral Gardens multi-family development located at 1856 Wells Drive in Atlanta, Fulton County, Georgia. GEC is not affiliated with either Mr. Jaffe; Georgia Coral Gardens, LP; Atlantic Development and Investments; or the current owner of the property (1856 Wells Court Partners, LP).

The DCA Phase I ESA was performed in general accordance with the American Society for Testing and Materials (ASTM) E 1527-2005, Standard Practice for Environmental Site Assessments and their updates. The ASTM E 1527-2005 is the most current ASTM standard for this work. The Phase I ESA consisted of a site reconnaissance of the subject property, review of applicable and reasonably ascertainable information about the subject property, and interviews with selected officials knowledgeable about the subject property. The Phase I ESA was intended to provide an overview of environmental conditions at the subject property resulting from current and/or past site activities.

While conducting the Phase I ESA of the subject property, GEC followed the 2011 Georgia DCA Environmental Manual, its ESA standard, which requires that the consultant follow the ASTM standard and provide some additional information that exceeds the ASTM requirements. This information addresses items referred to as "non-scope" items in the ASTM Practice, and includes wetlands, state waters, floodways/floodplains, additional public/historic records review, noise, water leaks/mold/fungi/microbial growth, radon, asbestos containing materials (ACMs), lead-based paint (LBP), lead in drinking water, and including (per DCA guidelines) polychlorinated biphenyls (PCB). Other hazards considered for the DCA ESA report include the presence of existing septic tanks or water wells on the subject property or the absence of the availability of a municipal water or sewer system to the subject site.

Interviews and review of reasonably ascertainable records by GEC during the completion of the DCA Phase I ESA did not indicate past usage or conditions which would likely result in significant environmental concerns. No recognized environmental conditions (RECs), as that term is defined in the referenced ASTM Practice, were identified on the subject property. This report was prepared within 30 days of performing the site reconnaissance and less than 180 days prior to application submittal.

The user of this report is encouraged to read the entire report for detailed descriptions of the property and the observations and judgments made by GEC. The user is ultimately responsible for assessing whether the limitations of the ASTM Practice and this project's scope of work are appropriate to the level of risk the user assumes for the subject property transaction. The following summarizes general information discovered during GEC's Phase I ESA.

- The site reconnaissance and research revealed no evidence of recognized environmental conditions that would indicate an existing release, a past release or a material threat of a release of hazardous substances or petroleum products on the property or into the ground, groundwater or surface water of the property.

- Based on GEC's review of the readily available historical sources, such as chain of ownership records and aerial photographs, the subject property has been, historically, undeveloped wooded, rural residential and/or agriculturally developed land from, if not before, 1938 until the early 1970s, when the current development was constructed. The adjacent property was historically wooded or agriculturally developed land, with some rural residences. Significant development of the surrounding area was first noted in the 1955-1960 aerial photographs. Development of the surrounding area was primarily residential in nature, with some commercial development.

- The Environmental Data Resources, Inc. (EDR) Report did not identify the subject property on any of the Federal, State, or Local databases. The EDR report did identify nine sites on the EDR Historical Cleaners, GA Non-HIS, UST, LUST, Financial Assurance, and/or SHWS databases, however none of the listed database sites are considered to be a potential environmental and/or financial concern to the subject site. Refer to Section 4.1 and Appendix F for detailed information of the noted database sites.

- Wetlands and floodplains were not observed on the subject site.

1.1 Location & Legal Description of the Property

The subject site is approximately 4.38 acres in size and is located at1856 Wells Drive SW in Atlanta, Fulton County, Georgia. The property is legally described as being in Land Lot 199 of the 14th District of Fulton County, Georgia. The subject property is currently developed as the Wells Court apartment complex.

1.2 Environmental Concerns and Conclusions

1.2.1 On-Site

The site reconnaissance and research revealed no evidence of recognized environmental conditions that would indicate an existing release, a past release or a material threat of a release of hazardous substances or petroleum products on the property or into the ground, groundwater or surface water of the property, except as noted below. Therefore, based on the findings presented in this report, GEC found no recognized environmental conditions associated with the subject property. The following, ASTM non-scope items were, however, identified on the subject site:

- Testing for asbestos containing materials (ACM) was performed at the site as part of this assessment. The results of the testing indicate that ACM is present at the site in the form of joint compound, exterior caulk, stair tread (backing) and roofing materials (black tar/flashing).

- Testing of the drinking water for lead was performed as part of this assessment. The results of the laboratory analysis indicate that two of the water samples contained levels of lead that are higher than the currently accepted action level of 15 ppb for lead.

- Testing for Radon was performed at the subject site, which indicated that radon was present in some of the units, but not at levels that exceed the appropriate action level.

1.2.2 Off-Site

The site reconnaissance and research conducted during the course of this project revealed no evidence of recognized environmental conditions that would indicate an existing release, a past release or a material threat of a release of hazardous substances or petroleum products on the property or into the ground, groundwater or surface water of the property from an adjacent property.

1.3 Recommendations

1.3.1 On-Site

Based on the findings presented in this report, GEC found no obvious environmental concerns or risks associated with the subject property, except as noted in Section 1.2.1, above; therefore, we recommend no further environmental study of the site at this time.

GEC recommends replacement of system piping due to high levels of lead found during water sampling at the site. Additionally, care should be taken during any planned renovation or demolition activities to remove or protect from damage (in accordance with State and Federal regulations) all detected and suspect ACM at the site. Renovation of the structures should be performed in accordance with appropriate DCA guidelines regarding radon resistant construction.

1.3.2 Off-Site

Based on the findings presented in this report, GEC found no obvious environmental concerns regarding off-site properties within the ASTM search radii; therefore, we recommend no further study of potential off-site impacts at this time.

2.0 INTRODUCTION

2.1 Background

This report describes a Phase I Environmental Site Assessment, prepared by Geotechnical & Environmental Consultants, Inc. (GEC), for the Coral Gardens site, situated on approximately 4.38 acres of land located at 1856 Wells Drive SW in Atlanta, Fulton County, Georgia. The subject property is currently occupied by a multi-family residential apartment complex. A site location map and a site map are included in Appendix A as Figures 5 and 3, respectively.

2.2 Procedures

The purpose of this Phase I ESA report is to permit the user to satisfy one of the requirements to qualify for the *innocent landowner* defense to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (also known as one of the "landowner liability

protections" or "LLPs"). This practice constitutes the "all appropriate inquiry" (AAI) into the previous ownership and uses of the property consistent with good commercial or customary practice as defined at 42 USC §9601 (35) (B).

This Phase I ESA was conducted in accordance with ASTM E 1527-2005 Standard Practice for Environmental Site Assessments. GEC's scope of work for this Phase I ESA was to identify "recognized environmental conditions" to the extent feasible by the processes outlined in Practice E 1527 and in accordance with good commercial and customary practices for conducting an environmental site assessment of a parcel of land with respect to the range of contaminants within the scope of CERCLA and petroleum products.

GEC's scope of work for this Phase I ESA was to identify "recognized environmental conditions" to the extent feasible by the processes outlined in Practice E 1527 and in accordance with good commercial and customary practices for conducting an environmental site assessment.

Practice E 1527 defines "recognized environmental conditions" (RECs) as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property, even under conditions in compliance with (environmental) laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action, if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

The scope of Practice E 1527-2005 does not include any testing or sampling of materials (i.e., soil, water, air, or building materials). However, the DCA Phase I ESA standard requires additional elements, which exceed the ASTM requirements (referred to as "non-scope" items), namely wetlands, state waters, floodways/floodplains, additional public/historic records review, noise, water leaks/mold/fungi/microbial growth, radon, ACMs, LBP, lead in drinking water, and including (per the 2010 DCA Environmental Guide) polychlorinated biphenyls (PCBs). Other hazards considered for the DCA ESA report include the presence of existing septic tanks or water wells on the subject property. These additional requirements are addressed in the body of this report with sampling as described in the appropriate sections.

GEC's methodology for performing environmental evaluations consists of two phases. Phase I involves four components: a records review, site reconnaissance, interviews, and the report of findings. Phase II consists of drilling operations, soil and groundwater sampling, and laboratory analysis of samples as appropriate, based on the results of the Phase I ESA or in response to the special needs of the client. The site reconnaissance included the subject property's grounds and perimeter and observance of adjacent properties from the subject site.

GEC performed each of the four components of the ASTM E 1527 Phase I ESA in accordance with Sections 6.0 through 11.0 of the Practice. The objective of the records review, site reconnaissance, and interviews is to obtain information used to identify recognized environmental conditions in connection with the property. This report generally follows the recommended ASTM format with the additional consideration given to asbestos, LBP, lead in drinking water, radon, wetlands, and

polychlorinated biphenyls (PCBs), as required by the Georgia Department of Community Affairs.

2.3 Significant Assumptions

No significant assumptions were made or required while conducting this DCA Phase I ESA.

2.4 Qualifications of Personnel/Documentation of Qualifications as an EP

Thomas E. Driver, P.E., is the **President** of GEC and **Managing Senior Engineer** of all offices. Tom graduated from Auburn University with a Bachelor's degree in Civil Engineering in 1983 and has over 27 years of experience in the geotechnical, environmental and construction materials testing fields. Tom is a member of the American Society of Civil Engineers (ASCE), the Georgia Society of Professional Engineers (GSPE), and the Consulting Engineers Council of Georgia (CECG). He is a past State President of GSPE, a past board member of the Macon Economic Development Commission, and a board member of the Consulting Engineers Council of Georgia. He is a Past President of the Macon Chapter of ASCE and a past president of the GSPE Middle Georgia Branch. Tom was named the 1992 Young Engineer of the Year and the 1996 Professional Engineer of the Year in Private Practice by the Georgia Society of Professional Engineers. Tom is a registered Professional Engineer in Alabama, Florida, Georgia, Kentucky, North Carolina, South Carolina, and Tennessee.

Robert T. Hadden serves as the **Environmental Department Manager** for the Macon office. Bob graduated from the University of South Alabama with a bachelor's degree in English in 1981 and has over 30 years of experience in the geotechnical engineering and environmental fields, providing project management, construction quality control, and geotechnical and environmental consulting services. Construction phase services include materials testing, Geotechnical subsurface investigation, construction quality control, and project management. During the last 20 years, Bob's environmental field experience has included Phase I and Phase II environmental site assessments, regulatory assessment and compliance auditing, field sampling and analysis by immuno-assay, subsurface investigations to assess soil and groundwater contamination, construction monitoring for remediation projects, asbestos surveys, and lead based paint sampling. Bob also has experience in underground storage tank removal, site assessment and remediation. Bob is a member of the Macon Chamber of Commerce, the Environmental Information Association, the American Society for Testing & Materials, and the Georgia Water & Pollution Control Association.

Kevin R. Strumpler, P.G. Mr. Strumpler is the **Environmental Services Manager** with the Columbus office. Mr. Strumpler graduated from Columbus State University in 1996 with a Bachelor of Science degree in Geology. Mr. Strumpler has more than twelve years experience in the environmental field, providing project management and environmental/geotechnical consulting services. Mr. Strumpler's experience has included Phase I/II Environmental Site Assessments (including Georgia Environmental Policy Act (GEPA) and Department of Community Affairs (DCA) ESAs); underground storage tank closures and corrective action investigations in Georgia and Alabama; geotechnical investigations; soil and groundwater sampling and remediation; deep foundation installation monitoring; emergency spill response; and consulting for solid waste landfills. Mr. Strumpler's work experience with solid waste landfills includes monitoring the installations of methane and groundwater monitoring wells; sampling of surface water and

groundwater; methane monitoring; methane vent installation monitoring; and data reduction, statistical analysis and report preparation for submittal to regulating agency. Mr. Strumpler is a Registered Professional Geologist in Georgia, Alabama, and Florida. Professional memberships include the National Groundwater Association, Georgia Geological Society, Alabama Geological Society, and the Geological Society of America.

2.5 Assessment of Specialized Knowledge or Experience of User &/or EP

GEC was not provided any specialized knowledge or experience related to recognized environmental conditions in connection with the subject site.

2.6 Limitations & Exceptions

This report is intended for the use of Atlantic Development and Investments on behalf of Georgia Coral Gardens, LP; the said Limited Partnership; and their representatives and/or assigns for their use in evaluating the environmental liability associated with the subject property. Additionally, the Georgia Department of Community Affairs (DCA) and the Georgia Housing and Finance Authority (GHFA) may rely on the information in this report. GEC is not affiliated with Georgia Coral Gardens, LP; Atlantic Development and Investments; or the seller of the subject property.

GEC is not responsible for opinions, conclusions, or recommendations made by others based on the findings in this report. This report and its findings shall not, in whole or in part, be disseminated to any other party, or used by any other party without prior written consent by Geotechnical & Environmental Consultants, Inc. The conclusions of this Phase I Environmental Site Assessment are based on conditions as observed on our site visit and on historical information about the site. Information contained in this report was obtained by means of document review, interviews, and on-site observations. Since no assessment can absolutely deny the existence of hazardous materials, especially surficial environmental assessments with limited or no subsurface sampling, existing hazardous materials can escape detection using the customary methods. Future changes in environmental conditions and site characteristics may occur with the passage of time, in which case, the conclusions of this report may have to be reevaluated.

2.7 Special or Additional Conditions or Contract Terms

There are no special terms and conditions aside from those detailed in the professional services agreement, included with GEC proposal no. CE-11-1232, under which this scope of work was authorized.

3.0 SITE SETTING

3.1 General Description of the Site & Vicinity

The Coral Gardens apartment complex (which is currently known as Wells Court) is approximately 4.38 acres in size and is located at 1856 Wells Drive in Atlanta, Fulton County, Georgia. The subject site is located in Land Lot 199 of the 14th District of Fulton County, Georgia. The subject property is currently occupied by a multi-family residential apartment complex. A site location map is included

in Appendix A as Figure 5, and a site map is presented in Appendix A as Figure 3.

3.1.1 Current Site Use & Description

The subject property is currently occupied by a multi-family residential apartment complex that is comprised of six residential structures that house 62 units, and a community building, along with associated parking and landscaped areas. According to the zoning map obtained from the Fulton County website, the site is zoned RG-2-C which is "residential – multi-family".

3.1.2 Current Uses of Adjoining Properties

During our reconnaissance of the surrounding area on May 11, 2011, GEC observed residential, institutional (senior housing) and undeveloped, wooded properties surrounding the subject property.

3.1.3 Description of Structures, Roads, & Other Improvements

GEC conducted site reconnaissances on May 11 and June 16, 2011 at the subject property, and observed that the site is occupied by six residential and one community structures. Paved parking is available onsite, with access to the site from Wells Drive SW, which borders the subject site to the west. Paved sidewalks connecting the apartments, parking and amenities are also onsite. According to the City of Atlanta, water is available to the site from a 6" main that runs along Wells Drive (see documentation of verification of public water service to the subject property in Appendix G).

3.2 Hydrogeology

3.2.1 Geologic Setting

The site is located in the Piedmont Physiographic Province of Georgia. The Piedmont is composed of igneous and metamorphic rocks, most commonly granites, granitic gneiss, and schists. These rocks have undergone extensive alterations, folding and faulting during the mountain building episodes, which produced the Appalachian Mountains and have since experienced a long period of stability. Chemical and physical weatherings have produced the present topography. The depth of weathering can vary greatly. The general Piedmont subsurface profile consists of clayey soils near the surface, which grade into silty sands and sandy silts with depth. Soils beneath the upper clayey zones often retain and exhibit the relic structure (banding, foliation) of the parent rock and are termed saprolite. A zone of weathered rock often separates saprolite from hard relatively unweathered bedrock. The various rock types resist weathering in different degrees depending on their chemical composition, fracturing, jointing, and bedding, so the depth to bedrock is often quite erratic and can vary over a short distance. Also, it is not unusual to find lenses of partially weathered rock and hard rock boulders within the saprolite. Alluvial, or water deposited, soils are present in association with rivers and streams. These soils consist of interlayered sands silts and clay with varying amounts of organic materials.

Groundwater occurs in the Piedmont Region in surficial unconfined aquifers in the soil/saprolite overburden and within the fractured bedrock (fractured rock aquifer). Due to the relatively low yields of these aquifers, groundwater usage in the Piedmont is usually limited to domestic water supply wells. Specific hydrogeologic information was not available for this assessment, however, based on the

U.S.G.S. Topographic Quadrangle Map and observations made in the field, the groundwater flow direction at the subject property is anticipated to be to the southwest.

3.2.2 Surface Drainage

Based on our review of the U.S.G.S. Topographic Map (Figure 5, Appendix A) and observations made during the site reconnaissance, the surface drainage is generally to the southwest. No surface water is located on the subject property.

3.2.3 Groundwater

Specific hydrogeologic information was not available for this assessment, but based on the U.S.G.S. Topographic Map and observations made in the field, the groundwater flow direction at the subject property is anticipated to be to the southwest.

3.3 Wetlands

GEC reviewed the U.S. Department of the Interior Fish and Wildlife Division National Wetlands Inventory (NWI) Map. The National Wetlands Inventory (NWI) map is a tool used to investigate if wetlands are on a specific property. Wetlands on these maps are usually indicated from the review of aerial photographs, U.S.G.S. Topographic maps, and soils maps. Wetlands are not necessarily field delineated for inclusion on the NWI Map. According to the map, there are no wetlands identified on the subject property. A copy of the NWI Map is presented as Figure 1, Appendix A.

3.4 Flood Plains

GEC went to the Federal Emergency Management Agency (FEMA) Map Service Center (MSC) Flood Map Store website at www.msc.fema.gov/ to review a flood map for the subject site. GEC reviewed a copy of the FEMA Flood Insurance Rate Map (FIRM) for Fulton County, Georgia. The subject property is found on Community Panel 13121C0353E and 13121C0354E, both dated June 22, 1998. According to the maps, the subject property is located in Zone X-white or "areas determined to be outside the 500-year (0.2% annual chance) floodplain," which means that the property is also outside the 100-year (1% annual chance) floodplain. GEC, therefore, does not anticipate that a flooding hazard will deter the development of the subject property. A copy of the FIRM is presented as Figures 2A and 2B, Appendix A.

3.5 State Waters

Neither surface water nor wetlands are located on the site (See Section 3.3). The subject site also lies outside the 100- and 500-year flood plain areas (See Section 3.4).

3.6 Endangered Species

According to the U.S. Fish and Wildlife Services (USFWS) Listed Species for Fulton County (Updated May 2004) www.fws.gov/athens/endangered/counties, there are four federally listed species and eight state listed species (four of which are also federally listed). None of the habitats

listed for these species were observed on the subject property; therefore, the USFWS was not contacted regarding the subject property. GEC does not anticipate that the protected species and critical habitats issues will factor into a project for this area. A copy of the endangered species list is included in Appendix S.

4.0 REGULATORY INFORMATION

4.1 Data Review

GEC contracted with Environmental Data Resources, Inc. (EDR) to conduct a site specific radius search and examination of reasonably ascertainable Federal, State, and Local regulatory files concerning the site and nearby sites which have been targeted for clean-up or investigation, sites and facilities against which complaints have been filed, or sites on which generators of hazardous waste or regulated substances are located. The EDR Report is dated April 27, 2011. The EDR search meets the requirements of the ASTM E 1527-05 standard. The following lists were included, in the records review: (FEDERAL) **NPL, Proposed NPL, Delisted NPL, NPL RECOVERY, CERCLIS, CERC-NFRAP, CORRACTS, RCRA-TSD, RCRA-LQG, RCRA-SQG, ERNS, HMIRS, US ENGINEERING CONTROLS, US INSTITUTIONAL CONTROLS, DOD, FUDS, US BROWNFIELDS, CONSENT, ROD, UMTRA, ODI, TRIS, TSCA, FTTS, SSTS, ICIS, RADINFO, CDL, LUCIS, PADS, MLTS, MINES, FINDS, RAATS,** (STATE) **SHWS** (includes HSI, the state CERCLIS equivalent), **Non-HSI, STATE LANDFILL, HISTORIC LANDFILL, LUST, UST, GA SPILLS, INSTITUTIONAL CONTROL, DRYCLEANERS, BROWNFIELDS, AIRS, and TIER 2.** The EDR Report also includes **TRIBAL RECORDS: INDIAN RESERVATIONS, INDIAN LUST, and INDIAN UST** and an EDR proprietary database record on **MANUFACTURED GAS PLANTS** (see attached EDR report in Appendix F for the list of databases, their currency, their definitions, and sources for these records). The radii used in the search for each of the above records are indicated on Page 4 in the EDR Environmental Database Report, and they were specifically designed by EDR to meet the search requirements of the U.S. EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05). Neither a State Engineering Controls database nor state or tribal voluntary cleanups databases are available in Georgia.

GEC assessed the listed sites for potential environmental impacts to the subject property using the following criteria: (**1**) relative distance between the subject property and the regulated site, (**2**) topographic features and proximity of the subject property to the regulated site; GEC follows the generally accepted premise that shallow groundwater flow direction can be reasonably expected to mimic surface topography, and (**3**) common inferences about the nature and relevance of the regulatory listing with regard to the subject property.

4.1.1 Standard Environmental Record Sources

4.1.1.1 Sites listed in Section 8.2.1 of ASTM E 1527-05 & in Exhibit B1

The Environmental Data Resources, Inc. (EDR) Report did not identify the subject property on any of the Federal, State, or Local databases. The EDR report did identify **Wood S Cleaner, Wood S Cleaners RM 5, A-1 Food Mart Plaza, BP # 24015, Campbellton Amoco Inc, Campbellton**

Plaza Dry Cleaners, New Plaza Cleaners, Shamrock Garden Apartments and **Delowe Garden Apartments** on the EDR Historical Cleaners, GA Non-HSI, UST, LUST, Financial Assurance, and/or SHWS databases. No other Federal, State, or Local database sites were listed within the ASTM E 1527 prescribed radii of the subject property.

Wood S Cleaners and Wood S Cleaners RM 5. According to the EDR report, these facilities are located at 1835 Willis Mill Road and 2343 Campbellton Road SW, respectively, approximately $^1/_8$ to $^1/_4$ mile from the subject property, at a topographically higher elevation. These facilities are the same facility. These facilities appear on the proprietary EDR Historical Cleaners database. No information regarding a release or regulatory action at these facilities was noted in the database report. Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

A-1 Food Mart Plaza. According to the EDR report, this facility is located at 2674 Campbellton Road, approximately ¼ to ½ mile from the subject property, at a topographically higher elevation. This facility appears on the GA Non-HSI database as having a release of cis 1, 2-Dichloroethene, reported in April of 2006. Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

BP #24015. According to the EDR report, this facility is located at 2191 Campbellton Road, within ¼ to ½ mile of the subject property, at a topographically higher elevation. This facility appears on the UST, LUST and Financial Assurance databases. This facility is listed as having four USTs (all listed as "removed from ground") used to contain gas and/or diesel. This facility is listed as having had a confirmed release in 1992 (with an NFA status subsequently issued). Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

Campbellton Amoco Inc. According to the EDR report, this facility is located at 2111 Campbellton Road SW, within ½ to 1 mile of the subject property, at a topographically higher elevation. This facility appears on the UST, LUST and Financial Assurance databases. This facility is listed as having four USTs (all listed as "currently in use") used to contain gas. This facility is listed as having had thirteen suspected releases ranging from 1999 through 2003, all of which had an NFA status subsequently issued. Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

Campbellton Plaza Dry Cleaners. According to the EDR report, this facility is located at 2076 Campbellton Road SW, approximately ½ to 1 mile from the subject property, at a topographically higher elevation. This facility appears on the GA Non-HSI database as having a release of a "not reported" contaminant on a "not reported" date. Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

A-1 Food Mart Plaza. According to the EDR report, this facility is located at 1829 Myrtle Drive SW, approximately ½ to 1 mile from the subject property, at a topographically higher elevation. This facility appears on the SHWS database. According to the database, known contaminants at the site include cis 1,2-dichloroethene, tetrachloroethene, trans 1,2-dichloroethene and trichloroethene. Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

Shamrock Garden Apartments. According to the EDR report, this facility is located at 1988 Plaza Lane, approximately ½ to 1 mile from the subject property, at a topographically higher elevation. This facility appears on the GA Non-HSI database as having a release of tetrachloroethene, reported in July of 1998. Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

Delowe Garden Apartments. According to the EDR report, this facility is located at 2327-2377 Delowe Drive, > 1 mile from the subject property, at a topographically higher elevation. This facility appears on the GA Non-HSI database as having a release of tetrachloroethene, reported in July of 1998. Based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

4.1.1.2 Orphan/Unmappable Sites

GEC reviewed the 20 listed "orphan summary" sites, which were not mapped due to poor or inadequate address information, in the EDR report. GEC found that none of the 20 sites appeared to be located within the ASTM search radii of the subject property. Since these sites are not within the noted ASTM radii, they are not in the vicinity of the subject site and at this distance from the subject site they are not deemed to be RECs.

4.1.2 Additional Environmental Record Sources

4.1.2.1 Local Brownfield Lists

GEC is not aware of any local Brownfield lists. The Georgia Environmental Protection Division (EPD) maintains the only known database for the state, which is provided by EDR in Section 4.1.1.1.

4.1.2.2 Local Lists of Landfill/Solid Waste Disposal Sites

GEC is not aware of any local lists of Landfill/Solid Waste Disposal sites, other than the database maintained by the Georgia EPD, which is provided by EDR in Section 4.1.1.1.

4.1.2.3 Local Lists of Hazardous Waste/Contaminated Sites

GEC is not aware of any local lists of Hazardous Waste/Contaminated sites, other than the database

maintained by the Georgia EPD, which is provided by EDR in Section 4.1.1.1.

4.1.2.4 Local Lists of Registered Storage Tanks

GEC is not aware of any local lists of Registered Storage Tanks, other than the database maintained by the Georgia EPD, which is provided by EDR in Section 4.1.1.1.

4.1.2.5 Local Land Records (for activity and use limitations - AULs)

GEC contracted with a third party abstractor to research and establish a chain of ownership for environmental purposes for the subject property. No AULs, relating to environmental conditions involving the subject site, were found filed in the deed records,.

4.1.2.6 Records of Emergency Release Reports

The EDR Report did not identify the subject property or any adjacent properties on the Georgia Spills databases (see page 5 of the EDR Report), and GEC is not aware of any Records of Emergency Release Reports, other than the database maintained by the Georgia EPD, which is provided by EDR in Section 4.1.1.1.

4.1.2.7 Records of Contaminated Public Wells

GEC reviewed the local/regional water agency records information provided on Pages A-5 through A-8 of the EDR Environmental Database Report (see Appendix F). The EDR Local/Regional Water Agency Records provide water well information to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells. Five wells were identified on the state or Federal databases. The EDR report did not indicate any wells on the subject site, and did not indicate records of any groundwater use permits for the subject site.

4.1.2.8 Planning Department Records

GEC made multiple attempts to contact (via phone and fax) the Atlanta Office of Planning, but has not received a response at the time this report was issued. A copy of the zoning map for Fulton County was viewed at the Fulton County website. According to the map, the subject site is zoned RG-2-C which is "residential – multi-family". A copy of the map is included in Appendix G.

4.1.2.9 Local/Regional Pollution Control Agency Records

GEC is not aware of any local Pollution Control Agency records, other than the state/local databases maintained by the Georgia EPD, which is provided by EDR in Section 4.1.1.1.

4.1.2.10 Local/Regional Water Quality Agency Records

GEC obtained a copy of the 2009 City of Atlanta Annual Water Quality Report (AWQR) which indicated that the City of Atlanta's water supply was in general compliance with drinking water

regulations set forth by EPA and EPD. Total coliform bacteria was present at 1.4% in less than 5% of the monthly samples. Lead was present in 1 of 52 monthly samples at 2.5 ppb. No wells were observed on the subject site, and no records of any groundwater use permits for the subject site were found. A copy of the City of Atlanta's AWQR is included in Appendix R.

GEC also reviewed the state/local databases maintained by the Georgia EPD, which is provided by EDR's report and discussed in Section 4.1.1.1.

4.1.2.11 Local Electric Utility Companies (PCBs)

During the site reconnaissances on May 11, and June 16, 2011, four pole-mounted transformers were observed on the subject property and one was observed in the right-of-way of Wells Drive, south of the subject property. These transformers appeared to be in good condition with no signs of leaks on or around them. The transformers are the property and responsibility of the local electric utility, Georgia Power Company, who has in the past reported to GEC that the transformers they use are mineral oil units and they will handle any leaking transformers on site as per 40 CFR 761.125 and the State of Georgia Oil and Hazardous Substance Release Act of 1991. No other polychlorinated biphenyl (PCB) sources were noted on the subject property.

4.1.2.12 Other

GEC contracted with EDR to conduct a site specific radius search and examination of reasonably ascertainable Federal, State, and Local regulatory files concerning the site and nearby sites which have been targeted for clean-up or investigation, sites and facilities against which complaints have been filed, or sites on which generators of hazardous waste or regulated substances are located. The additional environmental record sources (Section 8.2.2 of the ASTM E 1527-05 standard) are included in the "State and Local Records" section of the EDR Report (see page 5 & 6 of the EDR Report in Appendix F). These additional environmental record sources include local Brownfields, local landfill/solid waste disposal sites, local hazardous waste/contaminated sites, local registered storage tanks, local land records for activity and use limitations (AULs), emergency release reports (Georgia spills), and contaminated public wells. No other environmental records are believed available, and no additional environmental record sources were deemed necessary.

Vapor Encroachment

GEC also contracted with Environmental Data Resources, Inc. (EDR) to conduct a site specific radius search and examination of reasonably ascertainable Federal, State, and Local regulatory files concerning the site and nearby sites regarding vapor encroachment. The following lists were included, in the records review: (FEDERAL) **NPL, CERCLIS, RCRA-CORRACTS, RCRA-TSD, RCRA generators, and INSTITUTION CONTROLS / ENGINEERING CONTROLS,** (STATE and TRIBAL) **CERCLIS, LANDFILL / SOLID WASTE DISPOSAL, LUST, UST, INSTITUTION CONTROLS / ENGINEERING CONTROLS, VOLUNTARY CLEANUP, BROWNFIELDS, and OTHER STANDARD ENVIRONMENTAL RECORDS.** The report includes **HISTORICAL USE RECORDS: FORMER MANUFACTURED GAS PLANTS** (see attached EDR report for the list of databases, their currency, their definitions, and sources for these records). The radii used in the search for each of the above records are indicated on Page 3 in the

EDR Environmental Database Report, and they were specifically designed by EDR to meet the search requirements of the ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (E 2600). Neither a State Engineering Controls database, nor state or tribal voluntary cleanups database is available in Georgia.

GEC's methodology for performing this vapor encroachment screening consisted of assessing all the information collected in the Phase I investigation, including information collected in site reconnaissance, interviews, and actual or probable chemical usage on the target property or nearby property.

Tier 1 of the *ASTM E 2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* in accordance with Sections 8.1.3.1 through 8.1.3.9 of the Practice was performed during this assessment.

The EDR Vapor Encroachment Screen report identified two sites within the area of concern (AOC) of the subject site. Based on the site recon, the location of one of the sites is misplaced on the EDR report/map. Location number 1, as marked on the EDR map, is actually closer to number 2 (as marked on the EDR map), as both of these sites are actually the same site.

The reviewed listed sites (above) within the AOC are discussed in more detail below.

> **Wood S Cleaners and Wood S Cleaners RM 5.** According to the EDR report, these facilities are located at 1835 Willis Mill Road and 2343 Campbellton Road SW, respectively, approximately $^1/_8$ to $^1/_4$ mile from the subject property, at a topographically higher elevation. These facilities are the same facility. These facilities appear on the proprietary EDR Historical Cleaners database. No information regarding a release or regulatory action at these facilities was noted in the database report. Based on the distance from this site to the subject property, subsurface soil properties and/or presumed groundwater flow direction, a vapor encroachment condition on the subject property from these facilities is not anticipated.

Topographic features, distance from the subject site and presumed groundwater flow direction suggest that vapors would not migrate from the source to the target property. Therefore, vapor encroachment is unlikely to be an issue of concern in connection with existing or planned structures on the target property.

GEC is of the opinion that vapor encroachment is unlikely to be an issue of concern in connection with planned structures on the target property.

4.2 Agency Contacts/Records

GEC contacted or attempted to contact the following local agencies for information pertaining to the subject site and the immediate vicinity.

4.2.1 Local Fire Department Official

On June 2, 2011, Ms. Elaine Jones, with the City of Atlanta Fire Rescue Department, responded to

an email request for information regarding the subject property. In response to a request for any records the department may have related to tanks, spills, hazmat incidents, etc. at the site, Ms. Jones indicated that the Atlanta Fire Rescue Department does not have any information on the property. A copy of the fire department's email response is presented in Appendix G.

4.2.2 State, Local, or Regional Health or Environmental Agency

GEC made multiple attempts (via phone, email and fax) to the Fulton County Health Department regarding their knowledge of the subject site. At the time this report was issued a response to our inquiries had not been received from this agency. While significant information, not available elsewhere, is not anticipated, if a response is received from this agency that would alter our conclusions for this report, the client will be contacted immediately.

4.2.3 Local Building Permit Agency Official

GEC made multiple attempts to contact (via phone and fax) the Atlanta Office of Planning, but has not received a response at the time this report was issued. A copy of the zoning map for Fulton County was viewed at the Fulton County website. According to the map, the subject site is zoned RG-2-C which is "residential – multi-family". A copy of the zoning map is presented in Appendix G.

4.2.4 Local Groundwater Use Permit Agency Official

GEC is not aware of any local Groundwater Use Permit Agency, other than the state/local databases maintained by the Georgia EPD, which is provided by EDR. See Section 4.1.2.7.

4.3 Interviews

4.3.1 Current Key Site Manager, Occupants, or Owners of Property

GEC received a completed DCA version of the ASTM "User" Questionnaire from our Client. Mr. Breen, with 1856 Wells Court Partners, completed the form. Mr. Breen indicated that he is not aware of any environmental liens for the subject property. Mr. Breen noted that he does not have specialized knowledge or experience that is material to any potential recognized environmental conditions in connections with the subject property. Mr. Breen indicated that he is not aware of any commonly known or reasonably ascertainable information with the local community that is material to any potential recognized environmental conditions. Mr. Breen indicated that the reason for having the Phase I site assessment performed is part of a proposal submittal for tax credits for purchase and development of the property. Mr. Breen noted that the purchase price of the property is the same as the fair market value. A copy of the DCA version of the ASTM "User" Questionnaire is presented in Appendix G.

Mark Breen, with 1856 Wells Court Partners, LP, the current property owner, completed the owner environmental questionnaire for the Coral Gardens apartment site. Mr. Breen indicated that the subject property and the adjoining properties are not currently, nor have they been used in the past for industrial and manufacturing purposes. Mr. Breen also indicated that there is not, nor has there been any plastic or metal drums, stained soil or stressed vegetation, storage tanks (above or

underground), vent pipes, fill dirt (brought onto the site), or PCB containing or asbestos containing materials on the subject property. According to Mr. Breen, the subject property has not been evaluated, investigated, or permitted under RCRA, CERCLA, or state equivalent or been investigated, notified, held responsible for, or otherwise involved with any contamination, clean-up, environmental law, or health and safety law, regulation or violation. A copy of the completed owner environmental questionnaire is presented in Appendix L.

4.3.2 Current Owners or Occupants of Neighboring Properties

Since the subject property is not abandoned, no current owners or occupants of neighboring properties were interviewed. The lack of interviews with the neighboring properties is not considered to be a significant data gap, since significant information outside that available from other interviews and the public record is not expected.

4.3.3 Past Owners, Occupants, or Operators of the Property

Since sufficient information was available from the current interviews and public records, no past owners, occupants, or operators of the property were interviewed. In addition, the User did not indicate or provide GEC with any previous owners, occupants, or operators of the property. The lack of interviews with the past owners, occupants, or operators is not considered to be a significant data gap, since significant information outside that available from other interviews and the public record is not expected.

4.3.4 User(s)

The User Responsibility information obtained from the User(s) of this report or from other sources is detailed in the following text. The primary User (Atlantic Development and Investments) contracted with GEC to provide the information, except where specifically requiring a User response to information needs. The users were identified on the User Questionnaire as 1856 Wells Court Partners. Mr. Chris Breen is the designated representative to whom GEC has access and he provided the User information received on behalf of all parties.

4.3.4.1 Title Records

Mr. Frank May, under contract to GEC, provided the deed and title information to GEC. No environmental liens, activity or use limitations, or engineering controls were identified in the deed records, relating to conditions involving the subject site, were identified in the deeds and title information provided. The review of the deed records and the history of ownership did not indicate previous ownership site activities that would be expected to have created environmental concerns on the subject property (see Section 5.5.1).

4.3.4.2 Environmental Liens

The property records reviewed by GEC did not indicate any environmental liens or any activity or use limitations, and the Users and/or local public agency contacts reported none.

4.3.4.3 Specialized Knowledge of the User

GEC was not provided any specialized knowledge or experience related to recognized environmental conditions in connection with the subject site.

4.3.4.4 Commonly Known/Reasonably Ascertainable Information

GEC was not provided any commonly known or other information demonstrating recognized environmental conditions in connection with the subject site.

4.3.4.5 Reason for Performing the Phase I

GEC was asked to perform a Phase I ESA (as part of the proposed submittal for tax credits and property transaction with the subject property) in accordance with the ASTM-E 1527-2005 standard to qualify for the innocent landowner defense to CERCLA liability and to identify RECs that could impact the property's financial liability. The reason for conducting the assessment is to provide information to support an application for tax credits to fund site development for affordable housing.

4.3.4.6 Relationship of Purchase Price to Fair Market Value

The User indicated that there was no property valuation reduction due to environmental issues. The User is purchasing the subject property and applying for tax credits to fund site rehabilitation. No environmental issues were identified while conducting this Phase I ESA, which are deemed to affect the property valuation.

4.3.4.6.1 Purchase Price

According to the User questionnaire, the purchase price reflects the fair market value.

4.3.4.6.2 Differential between Purchase Price & Market Value

There is no known differential between the purchase price and market value of the property.

4.3.4.6.3 Reasons for any Differential

There is no known devaluation of the property for environmental reasons.

5.0 SITE INFORMATION AND USE

5.1 Site Reconnaissance Methodology & Limiting Conditions

GEC's methodology for performing the ESA was in accordance with ASTM E 1527-05. Mr. Bob Hadden and Mr. Todd Peterman are the GEC representatives who conducted the site reconnaissance, and no significant limiting conditions were encountered during the site reconnaissance performed on May 11 and June 16, 2011. The on-site reconnaissance was accomplished by walking readily

accessible areas of the subject property and entering accessible areas (as provided by the client) of the on-site structures.

5.2 General Site Setting

The subject site, which is approximately 4.38-acres in size, is currently developed as a multi-family apartment complex located at 1856 Wells Drive SW in Atlanta, Fulton County, Georgia. The area around the site is predominantly residential with commercial and institutionally properties also present.

5.3 Assessment of Commonly Known/Reasonably Ascertainable Information

GEC's assessment of all commonly known and reasonably ascertainable information about the Coral Gardens site indicates there are no recognized environmental conditions associated with the subject site.

5.4 Current Site Use

GEC conducted the site reconnaissances of the site on May 11 and June 16, 2011, and observed that the subject property is currently occupied by a multi-family apartment complex. There are six residential structures and a single community structure on the site, along with associated parking and landscaping.

5.4.1 Storage Tanks

No storage tanks, nor indicators of the existence of such tanks (pipes protruding from the ground, mounded earth, or concrete islands), were observed on the subject property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.2 Hazardous & Petroleum Products Containers/Drums

No containers/drums of hazardous or petroleum products were observed on the subject property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.3 Heating & Cooling

During the site reconnaissances on May 11 and June 16, 2011, it was noted that individual electric HVAC units serve the subject property apartments.

5.4.4 Solid Waste

Other than some minor litter, no significant uncontrolled solid waste was observed on the subject property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.5 Sewage Disposal/Septic Tanks

It is anticipated that city sewer is available to the subject site, therefore sewage disposal would be offsite at a city operated treatment facility. No onsite sewage disposal/septic tanks are anticipated, and no evidence of any was noted during the site reconnaissances on May 11 and June 16, 2011.

5.4.6 Hydraulic Equipment

No hydraulic equipment was observed during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.7 Contracted Maintenance Services

Contracted maintenance services at the site are typically limited to pest control and landscaping, which are currently handled in-house.

5.4.8 Electrical Equipment/Polychlorinated Biphenyls (PCBs)

During the site reconnaissances on May 11, and June 16, 2011, four pole-mounted transformers were observed on the subject property and one was observed in the right-of-way of Wells Drive, south of the subject property. These transformers appeared to be in good condition with no signs of leaks on or around them. The transformers are the property and responsibility of the local electric utility, Georgia Power Company, who has in the past reported to GEC that the transformers they use are mineral oil units and they will handle any leaking transformers on site as per 40 CFR 761.125 and the State of Georgia Oil and Hazardous Substance Release Act of 1991. No other polychlorinated biphenyl (PCB) sources were noted on the subject property.

5.4.9 Water Supply & Wells

City water is available to the subject site (see documentation of verification of public water service to the subject property in Appendix G).

5.4.10 Drains & Sumps

Other than normal storm drains and curb and gutter water management structures, no drains or sumps were observed on the property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.11 Pits, Ponds, Lagoons, & Surface Waters

No pits, ponds, lagoons, or surface waters were observed on the subject property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.12 Stressed Vegetation

No stressed vegetation was observed on the subject property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.13 Stained Soil or Pavement

Neither stained soil nor pavement was observed on the subject property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.14 Odors

No unusual odors were noted on the subject property during GEC's site reconnaissances on May 11 and June 16, 2011.

5.4.15 Utilities/Roadway Easements

According to the site survey, a storm drain traverses the property from northeast to southwest beneath the site, and typical overhead power lines are routed through the site to serve the various buildings. The right-of-way for Wells Drive forms the property's western boundary and various utility right of ways are associated with it. According to various sources, municipal water is available to the subject site (see documentation of verification of public water service to the subject property in Appendix G).

5.4.16 Chemical Use

Chemical use would be expected to have been limited to minor maintenance-applied paints, cleaners, Freon for the air conditioner units, gasoline and oil usage for the lawn care, and seasonal application of lawn maintenance products, i.e. fertilizers and/or herbicides. However, no significant chemical storage beyond these type of substances, in five-gallon or less capacity, was noted on the site during the site reconnaissances on May 11 and June 16, 2011.

5.4.17 Water Leaks/Mold/Fungi/Microbial Growth

During the site reconnaissances on May 11 and June 16, 2011, no evidence of active mold growth was observed in any of the structures. Additionally, no areas of active water leaks were noted. The subject property maintenance reportedly handles any such observed conditions promptly to minimize its impact to the property.

5.4.18 Asbestos

GEC performed an asbestos survey at the Coral Gardens apartment complex over the two day period of May 13 and 18, 2011, and collected a total of 94 samples during this survey.

The asbestos survey was performed in accordance with currently accepted methods and practices of the environmental consulting profession. The survey was conducted on observed suspect materials located within representative apartments and areas of the facility grounds. The Coral Garden's maintenance staff assisted GEC personnel with a list of representative subject apartments and access. Bulk samples of identified suspect asbestos-containing materials (ACM) were collected and submitted for laboratory analysis in order to identify the presence/absence and percent content in

these suspect materials. GEC used U.S. Environmental Protection Agency guidelines for identification of ACM and an Asbestos Hazard Emergency Response Act (AHERA) accredited asbestos inspector for conducting the survey.

Suspect asbestos materials observed and sampled included sheet flooring, 12" x 12" floor tile, wallboard mud (a.k.a., joint compound), interior caulks; sheetrock/drywall; sink undercoating; exterior caulks; textured ceiling coating; stair tread/pad; and roofing materials. This resulted in 18 homogeneous materials being identified at the subject property with a total of 94 samples being collected during this survey.

While conducting a walk-through of the premises, which included building exteriors, the inspector visually checked for the presence of suspect ACM. Both friable and non-friable suspect materials were considered and sampled. A review of the asbestos bulk sample results, obtained from the selected laboratory (Analytical Environmental Services, Inc.), and using the polarized light microscopy (PLM) method, show the following materials were ACM:

- Joint compound – samples WC-1K, WC-1L, WC-1N, WC-1AD, WC-1AL, WC-1AN, WC-1A, WC-1B, WC-1D, WC-1E, WC-2C, WC-1F, WC-1G, WC-1H and WC-1I contain 2% chrysotile asbestos.

- Exterior caulk – samples WC-16A and WC-16B contain 3% chrysotile asbestos.

- Stair tread (backing) – sample WC-17A contains 30% chrysotile asbestos.

- Black Tar/Flashing – sample WC-8B contains 10% chrysotile asbestos.

GEC identified homogeneous suspect materials throughout various areas of the subject property and took representative samples from each observed material during this asbestos survey. Due to the possibility of the presence of ACM in areas inaccessible to GEC during this survey, care should be taken prior to any planned renovation or demolition activities to identify all suspect ACM and remove or protect from damage in accordance with State and Federal regulations. Any suspect ACM building materials discovered that maybe different from those described in this survey should be presumed to be ACM until assessed by an accredited inspector.

Suspect materials may be located in the buildings beyond the accessible areas surveyed. Suspect materials may also be present that were not visible or not accessible to the inspectors. It is possible that during renovation or demolition, other suspect ACM could be encountered, such as pipe insulation within wall chases. If any untested suspect materials are encountered, then these materials should be assumed to be ACM and treated as such until and unless proven otherwise by future testing. The National Emissions Standards for Hazardous Air Pollutants (NESHAP) regulations require that demolition contractors have an accredited "knowledgeable person" on site during demolition that is capable of identifying any untested suspect materials. The Georgia EPD can assist in any questions on demolition or renovation requirements.

Ten days prior to any demolition activities, the EPD Lead-Based Paint and Asbestos program should be notified under the Georgia Rule 391-3-14 and the Federal NESHAP Rule. The project notification form should be completed by a Georgia licensed abatement contractor or agent. The

abatement project requires a fee paid to the Division at the time notification is made. Notification is required even if no asbestos is present.

Appendix E contains copies of the asbestos sample chain of custody, analytical report, with a summary of the sample results, and the GEC inspector's latest accreditation.

5.4.19 Lead-Based Paint

Since the subject building was constructed prior to 1978, a lead-based paint inspection was performed. The Housing and Urban Development (HUD) protocol was observed, a complete LBP survey was conducted. GEC used a NITON™ XLP-303A X-ray fluorescence gauge to conduct non-destructive sampling of the buildings' coated surfaces. The LBP inspection was conducted on observed painted surfaces in accordance with HUD protocols for selecting a representative portion of the units for XRF screening/sampling. During the LBP inspection one thousand fifty-nine (1059) tests were performed with sixty-one (61) calibrations, while twenty-three (23) units (out of a total of 62 units) were tested. The testing of the buildings' exterior coatings was also accomplished in representative areas using the calibrated NITON™ XRF instrument in accordance with the manufacturer's guidance for testing and calibration. During the inspection on the property, no LBP was discovered on any component tested.

The calibration of the Niton XLP-303A is done in accordance with the Performance Characteristic Sheet (PCS) for this instrument. These XRF instruments are calibrated using the calibration standard block of known 1.0mg/cm^2 lead content. Three calibration readings are taken before and after each days testing and before every four hours of operation to insure manufacturer's standards are met. If for any reason the instrument is not maintaining a consistent calibration reading within the manufacturer's standards for performance on the calibration block supplied by the manufacturer, manufacturer's recommendations are used to bring the instrument into calibration. If the instrument cannot be brought back into calibration, it is taken off the site and sent back to the manufacturer for repair and/or re-calibration.

Note to our Clients

On April 22, 2010 the final EPA rule on Renovation, Repair, and Painting (RRP) went into effect and generally states:

- Firms must be certified.
- Renovators must be trained
- Lead-safe work practices must be followed

Additional information can be found in Appendix VI of this report. The new regulation is found in the Code of Federal Regulations Title 40 Part 745 (40 CFR Part 745) within which, at §745.82 applicability is shown to cover "*.... all renovations performed for compensation in target housing and child-occupied facilities, except for the following:*

> *(1) Renovations in target housing or child-occupied facilities in which a written determination has been made by an inspector or risk assessor (certified pursuant to either Federal regulations at 745.226 or a State or tribal certification program authorized pursuant to §745.324) that the* ***components affected by the renovation*** *are free of paint or other surface coatings that contain*

lead equal to or in excess of 1.0 milligrams/per square centimeter (mg/cm^2) or 0.5% by weight, where the firm performing the renovation has obtained a copy of the determination.

(2) (Notes additional means of testing and certifying that components are free of LBP)

On the basis of the LBP inspection conducted by GEC, no LBP exists in the specific renovation areas. Appendix Q contains a copy of the analytical report.

Because the buildings were constructed prior to 1978, soil samples were collected from the perimeter of the buildings. GEC conducted the soil sampling around the buildings within the estimated drip lines.

GEC conducted the lead in soil sampling in general accordance with U.S. EPA protocol. The following soil sampling procedures were used during the soil sampling performed for this assessment:

- New, disposable nitrile gloves were worn for each sample collected.
- Samples were collected within one foot of the edge of the exterior, or the drip line, of the structure;
- Soil samples were collected using a 5 cc disposable syringe with a clean syringe used for discrete samples;
- Composite samples of up to 10 aliquots were collected from within the noted area;
- Each composite sample was mixed together to achieve a representative sample of the total area;
- The top ½ inch of bare soil was sampled;
- Samples were given identification numbers coinciding with the building number and the specific side of the building;

The collected samples were submitted to an accredited third-party analytical laboratory, Analytical Environmental Services, Inc. (AES) in Atlanta, Georgia under appropriate chain of custody protocol.

A copy of the laboratory results and chain-of custody can be found in Appendix Q. The laboratory's cover sheet for the analytical results report indicates the accreditation certifications for AES.

The lead detected in the area surface soils (upper one-half inch) was below the Georgia Environmental Protection Division action level for lead (400 mg/kg lead) for all of the composite samples from the apartment building perimeters. The soil analytical results do not indicate a condition requiring abatement.

5.4.20 Lead in Drinking Water

GEC performed water sampling as part of this assessment. Based on the age of the plumbing system (the apartment complex was built 1978), a risk of lead in drinking water from the pipes or lead solder in pipes is a possibility. GEC sampled the drinking water at the subject site on May 11, 2011 and submitted the samples to a third party analytical laboratory for analysis for lead. GEC collected two water samples from the kitchen sink in the apartments tested. The first sample was collected on the first flush; and the second sample was collected from the same sample as the first flush sample, after

letting the water continuously run for approximately five minutes.

All of the water samples were collected in laboratory-supplied containers, and shipped to an accredited third-party analytical laboratory. A copy of the laboratory results and chain-of custody can be found in Appendix Q.

The results of the laboratory analyses indicate that two of the six sets of two samples of water contained levels of lead that are higher than the currently accepted US EPA action level of 15 ppb for lead. The lead for the first flush sample WC-1A was 55.4 ug/l, while the lead for the first flush sample WC-3A was 107 ug/l. The corresponding second flush sample for each of the above samples was below the laboratory reporting limit (BRL) for lead.

The following tables lists the results of each of the samples collected at the site.

Sample ID		Lead Content (µg/l)
WC-1A	(1st flush)	55.4
WC-1B	(2nd flush)	BRL
WC-2A	(1st flush)	BRL
WC-2B	(2nd flush)	BRL
WC-3A	(1st flush)	107
WC-3B	(2nd flush)	BRL
WC-4A	(1st flush)	1.32
WC-4B	(2nd flush)	BRL
WC-5A	(1st flush)	7.41
WC-5B	(2nd flush)	BRL
WC-6A	(1st flush)	2.10
WC-6B	(2nd flush)	BRL

BRL = Below Reporting Limit

According to the DCA referenced guidance document *Lead in Drinking Water In Schools and Non-Residential Buildings, EPA 812-B-94-002, dated April 1994*, similar results indicate the source of lead is the faucet or upstream plumbing, not the water main. The EPA document recommends test protocols to more closely identify the source of the lead; however, GEC has been advised that removing the water faucets and or additional plumbing from the buildings, to the water supply main usually mitigates the high lead. Therefore, GEC does believe that the elevated lead concern at the subject property can be properly mitigated with adjustments to the plumbing.

GEC obtained a copy of the 2009 City of Atlanta Annual Water Quality Report (AWQR) which indicated that the City of Atlanta's water supply was in general compliance with drinking water regulations set forth by EPA and EPD. Total coliform bacteria was present at 1.4% in less than 5% of the monthly samples. Lead was present in 1 of 52 monthly samples at 2.5 ppb. No wells were observed on the subject site, and no records of any groundwater use permits for the subject site were found. A copy of the City of Atlanta's AWQR is included in Appendix R.

5.4.21 Radon

GEC consulted EPA Publication 402-R-93-030: EPA's Map of Radon Zones for Georgia dated

September 1993 to determine the EPA classification of the subject area for radon buildup. The U.S. EPA and the U.S. Geological Survey have evaluated the radon potential in the U.S. and have developed a map to assist National, State, and local organizations to target their resources and to assist building code officials in deciding whether radon-resistant features are applicable in new construction. This map should not be used to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones. The map assigns each of the 3,141 counties in the U.S. to one of three zones based on radon potential. Each zone designation reflects the expected average short-term radon measurement that can be measured in a building without the implementation of radon control methods. According to the map, Fulton County, Georgia, is listed in Zone 1, which means "highest potential, greater than 4 pCi/L (picocuries per liter of air)."

According to the radon information provided on page A-9 of the EDR Report presented in Appendix F, 100% of the two sites tested were less than 4 pCi/L. The National Radon Database has been developed by the U.S. Environmental Protection Agency (EPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986-1992, and necessary data has been supplemented by information collected at private sources such as universities and research institutions.

GEC performed radon testing in 20 of the 62 units (31 ground floor units) located in the 6 residential buildings which comprise the Coral Gardens apartment complex. A test kit was also placed in the community building, on the subject site. All of the tested units, except one, were unoccupied. The radon test canisters were exposed for a test period of approximately 48 hours over a two-day period from May 11 through May 13, 2011 for sixteen of the kits and from May 18 through May 20, 2011 for four of the kits. This allocation allowed for a test for every 2,000 square feet of ground floor air space and 10% of upstairs units, with five tests placed on second floor areas. GEC used Alpha Energy Laboratories Radon Detection Kits, which contain activated charcoal to absorb and trap radon. These kits provide a short-term analysis to monitor radon levels over a 48-hour period. A duplicate test was also placed in one of the units tested. After collection, the test kits were sealed in the return mailer envelope included with the kits, and sent via FedEx "Next Day Air" to Alpha Energy Labs in Carrollton, Texas.

A total of 22 test kits were analyzed, including controls. According to the laboratory analytical results, all of the test kits, except for three, exhibited radon levels of < 2.0 pCi/L. Three test kits exhibited radon levels of 2.0 – 4.0 pCi/L. None of the test kits exhibited radon levels in excess of 4.0 pCi/L. Based on the results of the testing, GEC does not anticipate that radon is a concern that would preclude the proposed renovation of the subject property as a DCA-funded project. A copy of the short-term radon test results can be found in Appendix Q.

In accordance with the Georgia DCA Environmental Manual, all new construction of buildings must be in accordance with current EPA requirements for radon resistant construction techniques, including, but not limited to, *Radon Resistant Construction techniques for New Residential Construction: Technical Guidance,* February 1991, EPA 625-291-032 {available from NSCEP by calling (800) 490-9198}, and all new construction *Model Standards and Techniques for Control of Radon in New Residential Buildings,* March 1994, EPA402-R-94-009. Available on line at: http://www.epa.government/iaq/radon/pubs/newconst.thml, and the new building planned north of

the subject old school building must be tested for radon upon completion of construction.

5.4.22 Noise

During GEC's site reconnaissance on May 11, 2011, GEC assessed noise levels at the subject site to determine if noise levels would exceed the HUD limitations for exterior and interior locations. By use of the site reconnaissance and web-based, on-line data and mapping and in accordance with HUD guidance, GEC found a roadway, a civil airport and a military airport to be potential contributors to noise at the subject site. No other major roads were found within 1,000 feet, no railways were found within 3,000 feet, no other civil airports were found within five miles, and no other military airfields were found within 15 miles of the subject site.

Campbellton Road SW is situated approximately 200 feet south of the subject site. Hartsfield/Atlanta airport is located approximately 3.7 miles south/southeast of the subject site. Dobbins ARB is located approximately 13.8 miles north/northwest of the subject site. Completion of the Noise Assessment Guidelines (NAG) worksheets, using the Site DNL Calculator available on the HUD Website for roadway calculations, indicates an Acceptable (per the NAG) exterior day night level (DNL) of < 65 DNL as a result of these potential noise sources

GEC found that the HUD noise limitations for exterior locations at the subject site would not be exceeded by these listed sources, therefore, GEC does not anticipate that noise issues will be a concern that would preclude the development of the subject property as a DCA-funded project. The relevant noise evaluations and other supporting documentation are presented in Appendix J.

5.4.23 Other Site Reconnaissance Issues

GEC is not aware of, and did not identify, any other site reconnaissance issues regarding the subject site.

5.5 Past Site Use

5.5.1 Recorded Land Title Records

Since the "user" did not provide any title record information to review, GEC reviewed ownership information of the subject site provided by the Fulton County Tax Assessor's website on June 17, 2011. Additionally, GEC contracted with a third party abstractor to research title records for the subject property. This data created a record of ownership dating back to 1868. This review seeks to screen the data for evidence of possible environmental impacts to the property and in no way legally binds or limits the scope of the environmental assessment. Copies of the site's property record card, along with selected deed and plat book records, are presented in Appendix D.

Property ownership history sometimes provides an indication of a potential environmental problem at a site. The ownership and deeds reviewed may not include all of the previous owners or occupants that may have or have had an interest in the subject property. The subject site, which is approximately 4.38 acres in size, is located on the eastern side of Wells Drive SW in Atlanta, Fulton County, Georgia. The subject property, which is situated within land lot 199 of the 14th District of

Fulton County, Georgia, is occupied by an apartment complex that is comprised of 6 residential buildings and a community building, with accompanying parking and landscaped areas. The subject property appears on the Fulton County Tax Map as 14-0199-LL-126.

According to the chain of title, the subject site was part of a larger tract of land (160 acres) owned by Joe Herring, who sold it to M. M. M. Wells in March of 1868. The property subsequently passed through the hands of several individuals/families until it was acquired by B.D. Camp in 1970 who subsequently developed it as an apartment complex. The apartment complex was subsequently owned by a number of companies and/or limited partnerships, until it was acquired by the current owner, 1856 Wells Court Partners, LP, in 1995. GEC reviewed the following plat maps: "Survey for Montgomery M. M. Wells Estate" and "Property of B. A. Wells". A listing of the reviewed deed records for the subject property is presented in Appendix D.

The review of the deed records, the plat map(s), and the history of ownership did not indicate previous ownership site activities that would be expected to have created environmental concerns on the subject property. No evidence of environmental liens, activity or use limitations, or engineering controls was found in the reviewed deed records.

5.5.2 Environmental Liens

The property records reviewed by GEC did not indicate any environmental liens, and the Users and/or local public agency contacts reported none.

5.5.3 Activity & Use Limitations

The property records reviewed by GEC did not indicate any activity or use limitations, and the Users and/or local public agency contacts reported none.

5.5.4 Aerial Photographs & Topographic Maps

GEC reviewed readily available aerial photographs of the subject property to assist in developing the historic usage of the site. Based on interviews and readily available historical aerial photographs and U.S.G.S. Topographic Maps, the subject property appears to have been open, agriculturally developed and/or wooded land with a residential type structure, from 1938 to 1968 and occupied by an apartment complex from 1972 through the present. Aerial photographs (1938, 1940, 1955, 1960, 1968, 1972, 1978, 1986, 1989, 1993, 2005 and 2006) were obtained through the commercial database search firm, Environmental Data Resources, Inc. A 1993 and 2002 aerial photograph(s) were obtained off the Internet at the MSR Maps™ Web Page, and a 2010 aerial photograph was obtained off the Internet at the Google Earth™ web page. The additional aerial photographs appear in Appendix C.

The aerial photographs reviewed did not indicate obvious environmental impacts to the site. During the site reconnaissances on May 11 and June 16, 2011, GEC observed that the subject property was occupied by a multi-family residential apartment complex. The aerial photographs reviewed indicate that in 1938 (the earliest aerial photograph reviewed) through 1960, the site was open and/or agriculturally developed land, with a residential type structure on the site. In the 1968 aerial

photograph, the site appears to have reverted to woodlands. In the 1972 through the 2010 aerial photographs, the current development is evident on the site. The adjacent property was primarily open agriculturally developed or wooded land in the 1938 and 1940 aerial photographs. In the 1955 aerial photograph, residential development is noted, in the area around the site. The remainder of the photographs illustrate an increase in residential (with some commercial and institutional) development, through time, until the present.

During our reconnaissance of the surrounding area, GEC observed residential, institutional, commercial and undeveloped, wooded properties within the site vicinity

The subject property can be found on the Southwest Atlanta, Georgia Quadrangle of the U.S.G.S. 7.5-minute series Topographic Map with contour intervals of 20 feet, printed in 1997. A copy of the pertinent portions of this topographic map, showing the subject property and the surrounding area, is presented as Figure 5 in Appendix A. The Environmental Data Resources, Inc. (EDR) Historical Topographic Map Report, which provided additional U.S.G.S. Topographic Maps, is presented in Appendix C. On the 1997 topographic map, the site is shaded grey (indicating "built up area").

The site elevation, as shown on the topographic map, ranges between approximately 880 and 940 feet above mean sea level. Based on the review of the topographic map and observations made during the site reconnaissance, the approximate direction of shallow groundwater flow at the subject property (assuming the flow mimics topography) is anticipated to be to the southwest.

5.5.5 Sanborn Fire Insurance Maps

GEC contacted Environmental Data Resources, Inc. (EDR) to search for Sanborn Fire Insurance Maps, which were devised by insurance adjusters as early as the 1800s to show the use of properties at specified dates for the purpose of determining the risk of fire. The maps also identify businesses and activities, as well as some construction details, for those properties they cover. The Sanborn Maps are helpful in identifying historical environmental concerns that may have otherwise been unrecorded or left no evidence of their existence. No Sanborn Map coverage exists for the target property, which is further evidence for the lack of any significant, early development on the property or nearby. A copy of the no coverage letter can be found in Appendix C.

5.5.6 City Directories

GEC contracted with EDR, Inc. to search for city directories, which have been published for cities and towns across the U.S. since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Twentieth century directories are generally divided into three sections; a business index, a list of resident names and addresses, and a street index. With each address, the directory lists the name of the resident or, if a business is operated from this address, the name and type of business (if unclear from the name). While city directory coverage is comprehensive in major cities, it may be spotty for rural areas and small towns. City directory coverage exists for the target property. According to the abstract, EDR reviewed directories, in approximately 5 year increments, from 1905 through 2005. A copy of the EDR – City Directory Abstract is presented in Appendix C.

The site address appeared in the following directories (as an apartment complex, with individual names listed rather than the name of the complex): 1976, 1981, 1986, 1991, 1994, 1999 and 2005. Adjacent properties appeared in directories ranging from 1957 through 2005. Adjacent and nearby properties appeared to be predominantly residential in nature, with some commercial noted. No obviously environmentally problematic sites were noted in the directories, except for Woods Cleaners, which appeared at 1835 Willis Mill Road SW, in the 1971 directory. As noted in other sections of this report (Section 4.1.1.1), based on the distance from this site to the subject property, topographic orientation and/or presumed groundwater flow direction, an impact to the subject property from this facility is not anticipated.

Examination of the EDR – City Directory Abstract did not reveal any indications of significant environmental concerns for the subject property or the surrounding area.

5.5.7 Previous Environmental Studies

No previous environmental studies were available or reviewed during the course of conducting the Phase I ESA.

5.5.8 Other

No additional environmental historical sources, not designated in Sections 8.3.4.1 through 8.3.4.8 of the ASTM E 1527-05 standard, were sought nor deemed necessary to identify past uses of the subject property.

5.6 Current Surrounding Land Use

5.6.1 North

Residentially developed property borders the site to the north.

5.6.2 East

The site is bordered on the east by a Senior housing complex, wooded land and residential property (in the northeast).

5.6.3 South

Undeveloped wooded land in a natural drainage area borders the subject site to the south, to Campbellton Road SW.

5.6.4 West

Residentially developed land borders the subject site to the west across Wells Drive SW, with wooded property on the southern end of this western boundary.

5.7 Past Surrounding Land Use

5.7.1 North

Historically, the property to the north appears to have been occupied by wooded, rural residential and/or agriculturally developed land in the earliest aerial photograph reviewed (1938), and a similar prior history is anticipated. Significant residential development was first noted in the 1955 aerial photograph, with continued residential development through the present.

5.7.2 East

In the 1938 aerial photograph (the earliest aerial photograph reviewed), the adjacent land to the east of the site appears to have been a mix of wooded, open and/or agriculturally developed property. In subsequent photographs, through 1968, this area appears to revert to wooded land, with some rural residences noted. In the 1972 aerial photograph, the land to the east of the site (beyond the adjacent properties) shows development as commercial (what is currently a restaurant to the east of the site was first evident in this photograph). Development of the adjacent property to the east of the subject site, as senior living, was first noted in the 2010 aerial photograph

5.7.3 South

The land between the subject site and Campbellton Road, to the south, appears to have been open and/or agriculturally developed in the 1938 aerial photograph (the earliest aerial photograph reviewed), with a similar prior use anticipated. The photographs from 1938 to 1968 illustrate this property reverting to wooded land, which it remains until the present.

5.7.4 West

To the west, the site was bordered by Well Drive SW (or its precursor) as early as 1938 (the earliest aerial photograph reviewed). In the 1938 aerial photographs, the land to the west was a mix of wooded and agriculturally developed land (with a couple rural residential properties) until the 1955 aerial photograph, when several residential structures are noted. An additional residence or two were noted in the years since 1955, in this area, but no other significant changes were noted.

5.8 Historic Preservation

In a letter dated May 19, 2011, GEC submitted a request to the Georgia Historic Preservation Division (a.k.a., State Historic Preservation Office (SHPO)), that they provide a consultation in accordance with 36 CFR 800. In a letter from the Georgia HPD, dated June 7, 2011, they indicated that the consultation resulted in a finding of "No Historic Properties Affected". A copy of the request for consultation and the response from HPD is included in Appendix T.

6.0 DATA GAPS

6.1 Identification of Data Gaps

The only data gaps experienced during the course of this DCA Phase I ESA were in intervals between aerial photographs longer than five years (1938, 1940, 1955, 1960, 1968, 1972, 1978, 1986, 1989, 1993, 2002, 2005, 2006 and 2010). However, no significant development took place in the intervals or prior to 1941. Several agency contacts and attempts at interviews did not lead to information, but these sources were not expected to be nor have they been in the past pertinent sources of information on site use, and are thus not considered significant data gaps.

6.2 Sources of Information Consulted to Address Data Gaps

No significant data gaps were experienced during the course of this DCA Phase I ESA.

6.3 Significance of Data Gaps

No significant data gaps were experienced during the course of this DCA Phase I ESA.

7.0 ENVIRONMENTAL CONCERNS

7.1 On-Site

The site reconnaissance and research revealed no evidence of recognized environmental conditions that would indicate an existing release, a past release or a material threat of a release of hazardous substances or petroleum products on the property or into the ground, groundwater or surface water of the property, except as noted below. Therefore, based on the findings presented in this report, GEC found no recognized environmental conditions associated with the subject property. The following, ASTM non-scope items were, however, identified on the subject site:

- Testing for asbestos containing materials (ACM) was performed at the site as part of this assessment. The results of the testing indicate that ACM is present at the site in the form of joint compound, exterior caulk, stair tread (backing) and roofing materials (black tar/flashing).

- Testing of the drinking water for lead was performed as part of this assessment. The results of the laboratory analysis indicate that two of the water samples contained levels of lead that are higher than the currently accepted action level of 15 ppb for lead.

- Testing for Radon was performed at the subject site, which indicated that radon was present in some of the units, but not at levels that exceed the appropriate action level.

7.2 Off-Site

The site reconnaissance and research conducted during the course of this project revealed no evidence of recognized environmental conditions that would indicate an existing release, a past release or a material threat of a release of hazardous substances or petroleum products on the property or into the ground, groundwater or surface water of the property from an adjacent property.

8.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of the Coral Gardens site located at 1856 Wells Drive in Atlanta, Fulton County, Georgia, and legally described as being contained in land lot 199 of the 14th District of Fulton County, Georgia, the *property*. Any exceptions to, or deletions from this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions (RECs)* in connection with the *property.* GEC is not affiliated with Georgia Coral Gardens, LP; Atlantic Development and Investments; or the current owner of the subject property (1856 Wells Court Partners, LP).

The DCA Phase I ESA was performed in accordance with the American Society for Testing and Materials (ASTM) E 1527-2005, Standard Practice for Environmental Site Assessments and their updates. The ASTM E 1527-2005 is the most current ASTM standard for this work. The Phase I ESA consisted of a site reconnaissance of the subject property, review of applicable and reasonably ascertainable information about the subject property, and interviews with selected officials knowledgeable about the subject property. The Phase I ESA was intended to provide an overview of environmental conditions at the subject property resulting from current and/or past site activities.

While conducting the Phase I ESA of the subject property, GEC followed the 2011 Georgia DCA Environmental Manual, its ESA standard, which requires that the consultant follow the ASTM standard and provide some additional information that exceeds the ASTM requirements. This information addresses items referred to as "non-scope" items in the ASTM Practice, and includes wetlands, state waters, floodways/floodplains, additional public/historic records review, noise, water leaks/mold/fungi/microbial growth, radon, asbestos containing materials (ACMs), lead-based paint (LBP), lead in drinking water, and including (per DCA guidelines) polychlorinated biphenyls (PCB). Other hazards considered for the DCA ESA report include the presence of existing septic tanks or water wells on the subject property or the absence of the availability of a municipal water or sewer system to the subject site.

Interviews and review of reasonably ascertainable records by GEC during the completion of the DCA Phase I ESA did not indicate past usage or conditions which would likely result in significant environmental concerns, except as noted in Sections 7.1 or 7.2, above. No recognized environmental conditions (RECs), as that term is defined in the referenced ASTM Practice, were identified on the subject property.

The user of this report is encouraged to read the entire report for detailed descriptions of the property and the observations and judgments made by GEC. The user is ultimately responsible for assessing whether the limitations of the ASTM Practice and this project's scope of work are appropriate to the

level of risk the user assumes for the subject property transaction. The following summarizes general information discovered during GEC's Phase I ESA.

- The site reconnaissance and research revealed no evidence of recognized environmental conditions that would indicate an existing release, a past release or a material threat of a release of hazardous substances or petroleum products on the property or into the ground, groundwater or surface water of the property.

- Based on GEC's review of the readily available historical sources, such as chain of ownership records and aerial photographs, the subject property has been, historically, undeveloped wooded, open, rural residential and/or agriculturally developed land from, if not before, 1938 until the early 1970s, when the current development was constructured. The adjacent property was historically wooded or agriculturally developed land, with some rural residences. Significant development of the surrounding area was first noted in the 1955-1960 aerial photographs. Development of the surrounding area was primarily residential in nature, with some commercial development.

- The Environmental Data Resources, Inc. (EDR) Report did not identify the subject property on any of the Federal, State, or Local databases. The EDR report did identify nine sites on the EDR Historical Cleaners, GA Non-HIS, UST, LUST, Financial Assurance, and/or SHWS databases, however none of the listed database sites are considered to be a potential environmental and/or financial concern to the subject site. Refer to Section 4.1 and Appendix F for detailed information of the noted database sites.

- Wetlands and floodplains were not observed on the subject site.

8.1 On-Site

Based on the findings presented in this report, GEC found no obvious environmental concerns or risks associated with the subject property, other than noted below; therefore, we recommend no further study of the site at this time.

GEC recommends replacement of system piping due to high levels of lead found during water sampling at the site. Additionally, care should be taken during any planned renovation or demolition activities to remove or protect from damage (in accordance with State and Federal regulations) all detected and suspect ACM at the site. Renovation of the structures should be performed in accordance with appropriate DCA guidelines regarding radon resistant construction.

8.2 Off-Site

Based on the findings presented in this report, GEC found no obvious environmental concerns regarding off-site properties within the ASTM search radii; therefore, we recommend no further study of potential off-site impacts at this time.

10.0 VALUATION REDUCTION

10.1 Purchase Price

According to the User questionnaire, forwarded to GEC by Chris Breen with Atlantic Development and Investments, the purchase price of the property is the same as the fair market value. A copy of the User questionnaire is included in Appendix G of this report.

10.2 Interview of Broker regarding Market Value

GEC was not provided access to a broker, by the client, regarding the market value of the subject property.

10.3 Differential between Purchase Price & Market Value

According to the information provided in the User questionnaire, the purchase price reflects the fair market value.

10.4 Environmental Reasons for any Differential

Since no differential between the purchase price and market value of the property exists, there is no known devaluation of the property for environmental reasons.

THIS PLAT HAS BEEN CALCULATED FOR CLOSURE AND WAS FOUND TO HAVE A CLOSURE PRECISION OF ONE IN _____. INITIALS _____.

THIS PROPERTY IS NOT SHOWN TO BE LOCATED WITHIN A 100 YEAR FLOOD HAZARD AREA ACCORDING TO FIRM MAP NO. 130157 0037c DATED march 4, 1987

VICINITY MAP

TITLE EXCEPTIONS:

BASED ON LAWYERS TITLE INSURANCE CORPORATION POLI NO. 956-32.0 (4) (a) (1), DATED FEBRUARY 18, 1996 AT

1. Easement from Bennett A. Wells to City of Atlanta, dated January 11, 1938, recorded in Deed Book 1692, Page 78, public records of Fulton County, Georgia. Surveyor finds no evidence of City of Atlanta sanitary sewer crossing this tract of land. Surveyors opinion is that this easement affects other property owned by Bennett A. Wells in 1938.
2. Easement from J.M. MacBryde to Georgia Power Company, dated April 3, 1969, recorded in Deed Book 4755, page 231, public records of Fulton County, Georgia. Covered by Containment Letter from Georgia Power Company to Stuart M. Neiman, dated January 27, 1995.
3. Easement from D. Don Camp to Georgia Power Company, dated February 9, 1971, recorded in Deed Book 5385, Page 327, public records of Fulton County, Georgia. Covered in Contoinment Letter from Georgia Power Company to Stuart M. Neiman, dated January 27, 1995.

This is to certify that this map or plot and the survey on which it is based were made in accordance with "minimum Standard Detail requirements for ALTA/ACSM land Title Surveys," jointly established and adopted by ALTA and ACSM in 1992, pursuant to accuracy standards (as adopted by ALTA and ACSM and in effect on the date of this certification) of a Urban Survey. Survey based on Lawyers Title Insurance Corporation File No. 956-32.0 (4), dated April 7, 1996 at 8:00 A.M.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1905 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

GENERAL NOTES

THE FIELD DATA UPON WHICH THIS PLAT IS BASED HAS BEEN CALCULATED FOR CLOSURE AND WAS FOUND TO HAVE A CLOSURE PRECISION OF ONE IN 41,037 AND AN ANGULAR ERROR OF 00" PER SETUP AND WAS NOT ADJUSTED.

THIS PLAT HAS BEEN CALCULATED FOR CLOSURE AND WAS FOUND TO HAVE A CLOSURE PRECISION OF ONE IN _____. INITIALS _____

THIS PROPERTY IS NOT SHOWN TO BE LOCATED WITHIN A 100 YEAR FLOOD HAZARD AREA ACCORDING TO FIRM MAP NO. 130157 0037c DATED march 4, 1987

VICINITY MAP

TITLE EXCEPTIONS:

BASED ON LAWYERS TITLE INSURANCE CORPORATION POLI NO. 956-32.0 (4) (a) (1), DATED FEBRUARY 18, 1995 AT

1. Easement from Bennett A. Wells to City of Atlanta, dated January 11, 1938, recorded in Deed Book 1692, Page 78, public records of Fulton County, Georgia. Surveyor finds no evidence of City of Atlanta sanitary sewer crossing this tract of land. Surveyors opinion is that this easement effects other property owned by Bennett A. Wells in 1938.
2. Easement from J.M. MacBryde to Georgia Power Company, dated April 3, 1969, recorded in Deed Book 4755, page 231, public records of Fulton County, Georgia. Covered by Containment Letter from Georgia Power Company to Stuart M. Neiman, dated January 27, 1995.
3. Easement from O. Don Camp to Georgia Power Company, dated February 9, 1971, recorded in Deed Book 5385, Page 327, public records of Fulton County, Georgia. Covered in Containment Letter from Georgia Power Company to Stuart M. Neiman, dated January 27, 1995.

This is to certify that this map or plot and the survey on which it is based were made in accordance with "minimum Standard Detail requirements for ALTA/ACSM land Title Surveys," jointly established and adopted by ALTA and ACSM in 1992, pursuant to accuracy standards (as adopted by ALTA and ACSM and in effect on the date of this certification) of a Urban Survey. Survey based on Lawyers Title Insurance Corporation File No. 956-32.0 (4), dated April 7, 1996 at 8:00 A.M.

Tax Parcel #: 14-0199- LL-126
Owner: 1856 Wells Court Partners, LP
Address: 1856 Wells Drive
Location: Land Lot 199 of the 14th District of Fulton County

++++Assessors records indicate the site is composed of 4.38 acres and is occupied by an apartment complex consisting of 6 building; 4 built in 1971; 1 built in 1977 and 1 built in 1991.

++The deed record indicated the site was part of a larger tract owned by the Wells/MacBryde family from the mid 1800's until the current site was sold for investment/development in 1968. The site was sold to B. D. Camp in 1970 and associated documents indicated he developed the site for apartments.
The site passed through a number of companies until sold to the current owner in 1995.
— Numerous deeds and documents since 1971 indicate the site was/is occupied by an apartment complex(see chin).
— There are a number of agreements to land use restrictions associated with security deeds limiting use for apartments (and low cost housing).
— There are a number of easements, right of ways, agreements, etc. which were reviewed.
— The deed record did not indicate past or present property use on the site.

= No Environmental Liens found in the deed record filed against this property=

=No Activity or Use Limitations or Engineering Controls found filed in the deed record due to conditions related to this site=

DECLARATION OF LAND USE RESTRICTIVE COVENANTS FOR LOW-INCOME HOUSING CREDITS

THIS DECLARATION OF LAND USE RESTRICTIVE COVENANTS (this "AGREEMENT"), dated as of December 18, 1996, by and between 1856 Wells Court Partners, L.P., and its successors and assigns (the "Owner") and the Georgia Housing and Finance Authority, an instrumentality of the State of Georgia and a public corporation (together with any successor to its rights, duties and obligations, the "Authority"), is given as a condition precedent to the allocation of low-income housing credits by the Authority.

WITNESSETH:

WHEREAS, the Owner is or shall be the owner of a 62-unit rental housing development located on lands in the City of Atlanta, County of Fulton, State of Georgia, more particularly described in Exhibit A hereto, known as or to be known as Wells Court Apartments (the "Project"); and

WHEREAS, the Authority has been designated by the Governor of the State of Georgia as the housing credit agency for the State of Georgia for the allocation of low-income housing credit dollars (the "Credit"); and

WHEREAS, the Owner has applied to the Authority for an allocation of Credit to the Project in the approximate amount of Two Hundred Twelve Thousand Fifty-Five low-income housing credit dollars ($212,055); and

WHEREAS, the Owner has represented to the Authority in Owner's Low-Income Housing Credit Application identified as Application # 95-061 , amended from time to time and incorporated herein by reference, (the "Application"), that Owner will make continuously available for occupancy by Low Income Families whose income is 60% or less of the area median income, adjusted for family size, not less than 62 unitsof which at least 25 units shall be made available for occupancy by Very Low Income Families whose income is 50% or less of the area median income, as specified on **Exhibit B** and as determined in accordance with Section 42 of the Internal Revenue Code (the "Code"); and

WHEREAS, the Authority has determined the Project would support a Credit allocation in the amount of $216,369; and

WHEREAS, the Owner has represented to the Authority in Owner's Application that it will impose additional rent restrictions or will covenant to maintain the Section 42 rent and income restrictions for additional period of time (Optional, check if applicable X); and

WHEREAS, the Code requires as a condition precedent to the allocation of the Credit that the Owner execute, deliver and record in the official land deed records of the county in which the Project is located this Agreement to create certain covenants running with the land for the purpose of enforcing the requirements of Section 42 of the Code and the GHFA Occupancy Restrictions found in Section 5 hereof by regulating and restricting the use and occupancy and transfer of the Project as set forth herein; and

WHEREAS, the Owner, under this Agreement, intends, declares and covenants that the regulatory and restrictive covenants set forth herein governing the use, occupancy and transfer of the Project shall be and are covenants running with the Project Land for the term stated herein and binding upon all subsequent owners of the Project Land for such term, and are not merely personal covenants of the Owner.

NOW, THEREFORE, in consideration of the promises and covenants hereinafter set forth, and of other valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner agrees as follows:

SECTION 1 - DEFINITIONS

All words and phrases defined in Section 42 of the Code and by the U. S. Departments of Treasury or Housing and Urban Development (HUD) regulations pertaining thereto shall have the same meanings in this Agreement.

SECTION 2 - RECORDING AND FILING; COVENANTS TO RUN WITH THE LAND

(a) Upon execution and delivery by the Owner, the Owner shall cause this Agreement and all amendments hereto to be recorded and filed in the official public land deed records of the county in which the Project is located, and shall pay all fees and charges incurred in connection therewith. Upon recording, the Owner shall immediately transmit to the Authority an executed original of the recorded Agreement showing the date, deed book and page numbers of record. The Owner agrees that the Authority will not issue the Internal Revenue Service Form 8609 constituting final allocation of the Credit unless and until the Authority has received the recorded executed original of the Agreement.

(b) The Owner intends, declares and covenants, on behalf of itself and all future Owners and operators of the Project Land during the term of this Agreement, that this Agreement and the covenants and restrictions set forth in this Agreement regulating and restricting the use, occupancy and transfer of the Project Land and the Project (i) shall be and are covenants running with the Project Land, encumbering the Project Land for the term of this Agreement, binding upon the Owner's successors in title and all subsequent Owners and Operators of the Project Land, (ii) are not merely personal covenants of the Owner, and (iii) shall bind the Owner (and the benefits shall inure to the Authority and any past, present or prospective tenant of the Project) and its respective successors and assigns during the term of this Agreement. The Owner hereby agrees that any and all requirements of the laws of the State of Georgia to be satisfied in order for the provisions of this Agreement to constitute deed restrictions and covenants running with the land shall be deemed to be satisfied in full, and that any requirements of privileges of estate are intended to be satisfied, or in the alternate, that an equitable servitude has been created to insure that these restrictions run with the land. For the longer of the period this Credit is claimed or the term of this Agreement, each and every contract, deed or other instrument hereafter executed conveying the Project or portion thereof shall expressly provide that such conveyance is subject to this Agreement, provided, however, the covenants contained herein shall survive and be effective regardless of whether such contract, deed or other instrument hereafter executed conveying the Project or portion thereof provides that such conveyance is subject to this Agreement.

SECTION 3 - REPRESENTATIONS, COVENANTS AND WARRANTIES OF THE OWNER

The Owner hereby represents, covenants and warrants as follows:

(a) The Owner (i) is a Limited Partnership duly organized under the laws of the State of Georgia, and is qualified to transact business under the laws of this State, (ii) has the power and authority to own its properties and assets and to carry on its business as now being conducted, and (iii) has the full legal right, power and authority to execute and deliver this Agreement.

(b) The execution and performance of this Agreement by the Owner (i) will not violate or, as applicable, have not violated any provision of law, rule or regulation, or any order of any court or other agency or governmental body, and (ii) will not violate or, as applicable, have not violated any provision of any indenture, agreement, mortgage, mortgage note, or other instrument to which the Owner is a party or by which it or the Project is bound, and (iii) will not result in the creation or imposition of any prohibited encumbrance of any nature.

WARRANTY DEED

THIS INDENTURE made this 27th day of February, 1995, by and between STARBRIGHT, INC., a Georgia corporation (hereinafter referred to as "Grantor"), and 1856 WELLS COURT PARTNERS, L.P., a Georgia limited partnership (hereinafter referred to as "Grantee"). (The words "Grantor" and "Grantee" when used herein shall include their respective heirs, successors or assigns where the context so requires or permits.)

W I T N E S S E T H:

Grantor, for and in consideration of the sum of Ten and No/100 Dollars ($10.00) and other good and valuable consideration, paid by Grantee, the receipt and sufficiency of which is hereby ecknowledged by Grantor, has bargained, sold and conveyed, and by these presents does bargain, sell and convey unto Grantee, all that tract or parcel of land (the "Property") lying and being in Land Lot 199 of the 14th District, Fulton County, Georgia, as more particularly described in Exhibit "A," attached hereto and by this reference incorporated herein.

TO HAVE AND TO HOLD the said bargained premises, together with all and singular the rights, members and appurtenances thereof, to the same being, belonging or in anywise appertaining to the only proper use, benefit and behoof of the said Grantee, forever, IN FEE SIMPLE.

And the said Grantor will warrant and forever defend the right and title to the above-described Property unto said Grantee, against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the undersigned has caused this Warranty Deed to be signed and sealed, on the day and year first above written.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Natural Resources' Hazardous Site Inventory.

A review of the SHWS list, as provided by EDR, and dated 07/01/2010 has revealed that there is 1 SHWS

site within approximately 1.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NEW PLAZA CLEANERS	1829 MYRTLE DRIVE SW	E 1/2 - 1 (0.772 mi.)	7	12

GA NON-HSI: Georgia Non Hazardous Site Inventory Sites.

A review of the GA NON-HSI list, as provided by EDR, and dated 12/31/2010 has revealed that there are 4 GA NON-HSI sites within approximately 1.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
A-1 FOOD MART PLAZA	2674 CAMPBELLTON ROAD	WSW 1/4 - 1/2 (0.435 mi.)	3	7
CAMPBELLTON PLAZA DRY CLEANERS	2076 CAMPBELLTON RD. SW	ENE 1/2 - 1 (0.725 mi.)	6	12
SHAMROCK GARDEN APARTMENTS	1988 PLAZA LANE	ESE 1/2 - 1 (0.926 mi.)	8	13
DELOWE GARDEN APARTMENTS	2327-2377 DELOWE DR.	SE 1 - 2 (1.099 mi.)	9	14

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Natural Resources' Confirmed Release List.

A review of the LUST list, as provided by EDR, and dated 01/04/2011 has revealed that there are 2 LUST sites within approximately 0.625 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 2 EDR Historical Cleaners sites within approximately 0.375 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Last EDR Contact: 03/14/2011
Next Scheduled EDR Contact: 06/27/2011
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011

Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Hazardous Site Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/01/2010
Date Data Arrived at EDR: 07/26/2010

Data Release Frequency: Annually

NON HSI: Non-Hazardous Site Inventory

This list was obtained by EDR in 1998 and contains property listings that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Priority list (Hazardous Site Inventory or HSI) because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment. Disclaimer provided by Rindt-McDuff Associates - the database information has been obtained from publicly available sources produced by other entities. While reasonable steps have been taken to insure the accuracy of the data, RMA does not guarantee the accuracy of the data. No claim is made for the actual existence of pollution at any site. This data does not constitute a legal opinion.

Date of Government Version: 12/31/2010

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009
Date Made Active in Reports: 09/11/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Centers
Source: Department of Human Resources
Telephone: 404-651-5562

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

GEORGIA CORAL GARDENS
1856 WELLS DRIVE SW
ATLANTA, GA 30311

TARGET PROPERTY COORDINATES

Latitude (North):	33.70470 - 33° 42' 16.9"
Longitude (West):	84.4684 - 84° 28' 6.2"
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	734628.4
UTM Y (Meters):	3732098.5
Elevation:	905 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	33084-F4 SOUTHWEST ATLANTA, GA
Most Recent Revision:	1997

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

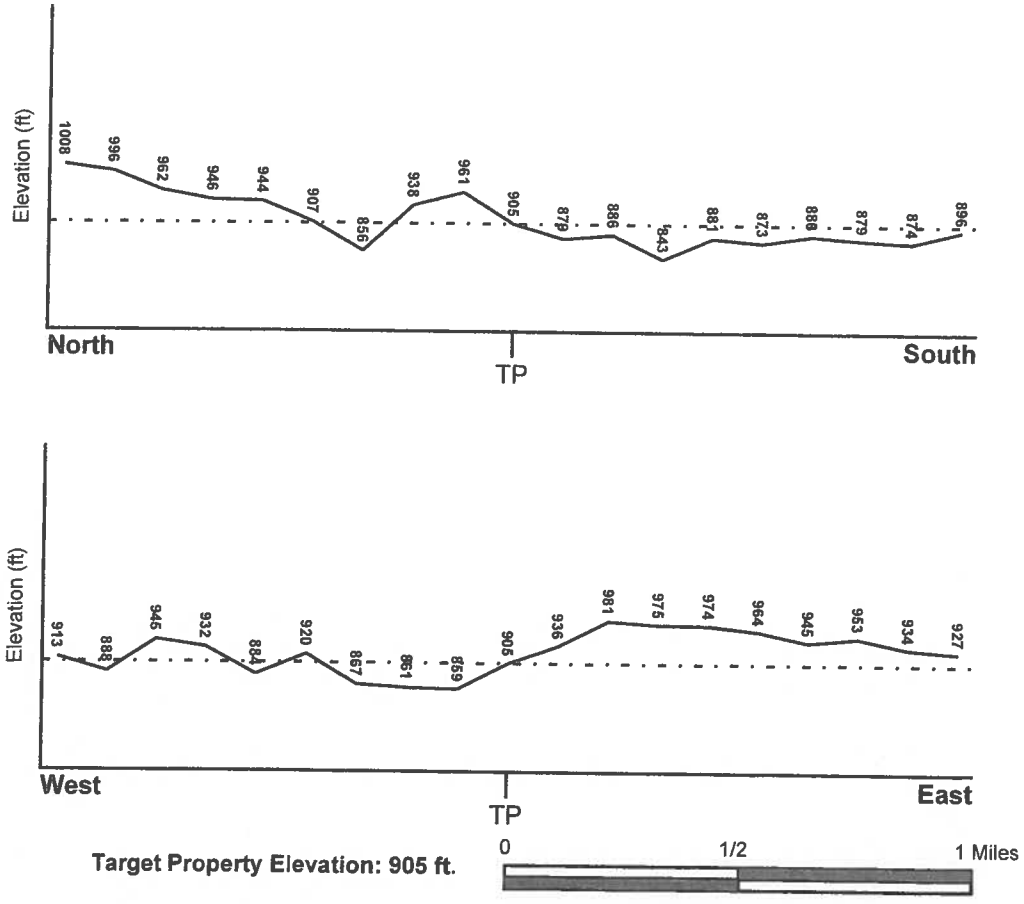
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
FULTON, GA	YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	13121C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SOUTHWEST ATLANTA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile ESE	SW
A3	1/2 - 1 Mile WSW	NE
4	1/2 - 1 Mile ENE	E
5	1/2 - 1 Mile WSW	E, SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Mississippian
Series:	migmatite
Code:	mm3 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Metamorphic Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	CECIL
Soil Surface Texture:	sandy clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	7 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 4.50
2	7 inches	11 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
3	11 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
4	50 inches	75 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
loam
fine sandy loam

Surficial Soil Types: sandy loam
loam
fine sandy loam

Shallow Soil Types: clay
sandy clay
gravelly - loam

Deeper Soil Types: loamy fine sand
sandy loam
weathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Record of Communications and Interviews

GEC

Suggested Format for User Interview Questionnaire

Date: 6/17/2011

Property Name: Wells Court Apartments

Name, Address, and Telephone Number of User:

1856 Wells Court Partners
7689 E. Paradise Ln #6
Scottsdale, AZ 85260
480-289-5715

Name of Interviewer: _____

1. Does the user have in his/her possession or control any title records for the Property?

   (No)

   Yes

   If Yes, please provide information below and attach copies of title records to the User Interview Questionnaire.

2. Is the user aware of any environmental liens?

   (No)

   Yes

   If Yes, please provide information below and attach any copies of evidence of environmental liens to the User Interview Questionnaire.

3. Is the user aware of any deed restrictions, engineering or institutional controls, or other activity and use limitations for the Property?

No

Yes

If Yes, please provide information below and attach any copies of evidence of activity and use limitations to the User Interview Questionnaire.

4. Does the user possess any actual or specialized knowledge or experience that is material to any potential recognized environmental conditions in connection with the Property?

No

Yes

If Yes, please provide information below.

5. Is the user aware of any commonly known or reasonably ascertainable information within the local community that is material to any potential recognized environmental conditions in connection with the Property?

No

Yes

If Yes, please provide information below.

6. What is the user's reason for having the Phase I site assessment performed?

Purchase

Lease

Loan

Pre-sale assessment

Tax credits

Other (please explain below)

7. If the Property is being purchased, is the purchase price of the Property:

Less than the fair market value

More than the fair market value

The same as the fair market value

Relationship to the fair market value is unknown

If the purchase price is *less than* the fair market value, is the user aware of any reason, environmental or otherwise, which would explain the differential?

No

Yes

N/A

If Yes, please provide information below

Subject: RE: Georgia Coral Gardens (aka Wells Court)

Mr. Strumpler, the Atlanta Fire Rescue Department do not have any information on the property listed below. We do not inspect residential housing unless there is a complaint from the Bureau of Housing. If further information is needed, please feel free to contact me at (404) 546-7073 or via email at ejones@atlantaga.gov.

Thanks,
Elaine Jones-Clark

To: Jones, Elaine
Subject: Georgia Coral Gardens (aka Wells Court)

As I mentioned on the phone yesterday, we are performing a Department of Community Affairs Phase I ESA for the above referenced property. If you could, please check and see if you have any records related to tanks, spills, hazmat incidents, etc. for this facility? The address of the site is 1856 Wells Drive SW.

Thank you for your help.

JO ANN MACRINA
Commissioner

June 6, 2011

Mr. Adam Jaffe
Atlantic Development & Investments
7689 E. Paradise Lane, Suite 6
Scottsdale, Arizona. 85260

Subject: Water Availability at 1856 Wells Drive

Dear Mr. Jaffe:

Our records indicate there is an existing 6-inch water main along Wells Drive which is owned and maintained by the City of Atlanta.

To integrate into Atlanta Water System or rearrange water facilities, the developer must submit the following to the City of Atlanta-Bureau of Drinking Water:

1. A set of stamped engineering drawings showing their developmental objectives for review and approval,
2. The enclosed basis of design,
3. A two thousand dollar deposit ($2,000.00). Check must be made payable to City of Atlanta.

Once the plans have been approved, the developer will then receive additional instructions regarding the process and procedures from the Bureau of Drinking Water.

Should you need additional information, please contact me at 404-235-2026.

Sincerely,

Said Abedi
Project Manager

Kevin R. Strumpler, P.G.
Environmental Services Manager

Professional Memberships

The Geological Society of America
Georgia Geological Society
Alabama Geological Society
National Ground Water Association

Professional Registrations

- Alabama #1064
- Georgia #1777
- Florida #2408

Education

- Bachelor of Science, Geology, Columbus State University, 1996

Experience

Mr. Strumpler is employed as the Environmental Services Manager for the Columbus office of GEC, and is generally responsible for project management, fieldwork and managing personnel for environmental projects, conducted through the Columbus branch of the firm. He has performed work and/or provided project management on the following type projects: UST closures, site investigations and corrective action plans; Environmental Site Assessments, including, Phase I ESAs (including DCAs), Phase II ESAs (involving sampling/analysis of physical media), Georgia Environmental Policy Act (GEPA) ESAs, and Environmental Baseline Survey (EBS); soil and groundwater remediation; deep foundation installation monitoring, geotechnical evaluations, hydrogeologic evaluations, emergency spill response, and consulting for solid waste landfills.

Continuing Education

- Environmental Sampling Training Course, Omega Environmental Services, Inc., 1998.
- 40 Hr Hazardous Waste Site Training Course, Condor Geotechnical Services, Inc., 2000.
- Site Analysis for On-Site Sewage Disposal, Mercer University, School of Engineering, 2000.
- 8 Hr Hazardous Waste Site Training Update, 2001 – 2010.
- Lead Inspector: EPA Training Course, The Environmental Institute, 2001.
- Lead Risk Assessor: EPA Training Course, The Environmental Institute, 2001.
- Georgia EPD Certified Qualified Person in NPDES, Georgia Branch of the Associated General Contractors of America, 2001.
- Soils and On-Site Wastewater Management Systems, Department of Crop and Soil Sciences, University of Georgia, 2001.
- Understanding and Implementing ARBCA Process, RAM Group, 2002.

Continuing Education (cont.):

- Hydrogeologic Evaluations Workshop, Tuscaloosa, Alabama, 2003.
- Introduction to Fate and Transport Modeling; 1-D, Bioscreen, AIPG Georgia Section, 2003.
- The Groundwater Pollution and Hydrology Course, Princeton Groundwater, Inc., 2004.
- 8 Hr. Hazardous Waste Manager's Course, Ft. Benning Army Installation, 2006.
- Level 1B NPDES Qualified Personnel, GSWCC, 2009.
- Certification in Radiation Safety and Monitoring, Device Operation and Machine Maintenance – NITON XRF Analyzer, ThermoFisher Scientific, 2007.
- Principles of Soil and Groundwater Geochemistry, Association of Environmental and Engineering Geologists, 2009.
- Asbestos in Buildings: Inspection and Assessment, The Environmental Institute, 2010.
- Vapor Encroachment Screening on Property Involved in Real Estate Transactions, ASTM International, 2010.
- Asbestos in Buildings: Inspector Refresher, The Environmental Institute, 2011.
- OSHA Construction Safety and Health, 2010.

Robert T. Hadden

Environmental Department Manager/Senior Environmental Specialist

Education

- Bachelor of Arts, University of South Alabama, 1981

Continuing Education

- Advanced Asbestos/Lead Seminar, March 24, 2011
- ASTM – Phase I & Phase II ESA's for Commercial Real Estate, June 13-15, 2006
- Annual 8-Hour Update of HAZPOWER Training – 1991-2010
- Asbestos Inspector/Planner Certificate Last Update May 2010
- Hazardous Waste Management: The Complete Course, August 1-2, 2002, Certification No. 71499
- Georgia Institute of Technology – Understanding Environmental
- Compliance Workshop November 12, 2002
- OSHA Hazard Communications Standard Training for Trainers, July 31, 2000, Certification No. 71498
- ISO 14001 Environmental Management Systems Lead Auditing, Course and Exam, September 1999, Certificate No. ET091399-09.
- Environmental Regulations in Georgia Seminar, January, 1997
- Underground Storage Tank Seminar, Georgia EPD, 1992, 1995
- 40-Hour Hazardous Waste Site Training, Certification 1991
- 40-Hour Environmental Site Assessment and Certification, 1993
- 24-Hour AHERA Asbestos Inspector Course and Certification, 1992

Experience

Mr. Hadden has experience in both the geotechnical engineering and environmental fields, providing project management, construction quality control, and geotechnical & environmental consulting services. During the last 20 years, Mr. Hadden's environmental field experience has included Phase I and Phase II environmental site assessments, regulatory assessment and compliance auditing, field sampling and analysis by immunoassay, subsurface investigations to assess soil and groundwater contamination, construction monitoring for remediation projects, and asbestos surveys. He also has experience in underground storage tank removal, site assessment and remediation.

Professional Memberships

- American Society of Testing & Materials (ASTM)
- Environmental Information Association – National
- Environmental Information Association – Georgia
- Georgia Affordable Housing Coalition

Relevant Projects

- **Georgia DNR/EPD; Investigation and Remediation of Soils and Groundwater Contamination at Anderson's Texaco Site; Brunswick, GA; Scientist** - Investigated and remediated soils and groundwater contamination at this site. Investigative methods included the use of soil gas surveys, HydroPunch sampling, temporary and permanent monitor well installation and mobile laboratory analysis. Corrective action included soil vapor extraction using horizontal well galleries and quarterly monitoring. Mr. Hadden was responsible for field sampling.

- **Georgia DNR/EPD; Groundwater Treatment of Golden Isles Marina Site; St. Simon's Island, GA; Scientist** - Continued operation of an existing groundwater treatment unit to re-evaluate the limits of contamination. The site is located on an interior island of the Georgia Coastal Plain area and presented significant impact to coastal fishing and shrimping. Groundwater sampling and immunoassay-based soil sample analysis were used to reevaluate the extent of contamination within the soil and groundwater. Based on these methods, new recovery wells were placed to control groundwater flow to the nearby river. Mr. Hadden served as field coordinator for this project.

- **Georgia DNRIEDP; Investigation and Remediation of Valdosta Village Site; Valdosta, GA; Project Manager** - Investigated and remediated an unknown quantity release of gasoline from the former location of a gasoline station. Used soil gas surveys, HydroPunchTM sampling and permanent monitor wells to define the extent of soil and groundwater contamination.

- **US Postal Service; Phase I ESA - ACM/Lead; Grovetown, GA; Environmental Specialist. Phase I ESA and ACM/Lead** Paint Survey of a residence scheduled for demolition in Grovetown, Georgia.

- **US Postal Service; Phase I ESA; Cairo, GA; Project Manager** - Provided a Phase I Environmental Site Assessment (ESA) in accordance with the American Society for Testing and Materials (AS TM) practice C- *1527-97.* The assessment included a visual inspection of the property, research of readily available public records, a drive-by inspection of accessible adjacent properties, and review of a computer search of Federal and State environmental databases. The investigation sought indications of the presence of hazardous substances of petroleum on the Property or on nearby parcels from which those substances might migrate to the Property. Mr. Hadden served at Project Manager for this project.

- **Cascade Corporation; Environmental Compliance Audit; Warner Robins, GA; Project Manager** - Conducted an environmental compliance audit of this fork lift parts manufacturing plant. Reviewed compliance with federal and state regulations, and provided report of findings. Mr. Hadden was responsible for field research, report writing, and project administration.

- **Waste Management; Phase I and II ESA; Warner Robins, GA; Project Manager** - Conducted a Phase I ESA and a limited Phase II ESA for a 14 acre site being evaluated for development as a waste transfer station. ASTM DI 527 standard procedures were utilized in the assessment. Mr. Hadden was responsible for field research, report preparation, and project administration.

- **Robins AFB; DO 48, 85, 135 – 1997, 98, 99 Basewide Groundwater Sampling; Robins AFB, GA; Field Coordinator -** Performed periodic sampling of 400+ wells across the site in order to monitor the locations and distributions of contaminants of concern which had been introduced to the subsurface as a result of previous work practices. The data objective of the sampling event was to collect groundwater data used to evaluate the distribution of the contaminants of concern. The data was then used by Robins AFB environmental managers to design remedial strategies for each of the areas sampled. Mr. Hadden provided overall site management, client liaison and oversight of field sampling teams (approximately 20 staff).

- **Norfolk Southern Corporation; Southern Industrial Park (Parcel 5); Norcross, GA; Project Manager -** Conducted a limited investigation at the Client's site. The investigation consisted of collecting soil and groundwater samples from three borings along the eastern property boundary using direct push technology (DPT). The samples were analyzed for volatile organic compounds (VOCs) by Environmental Protection Agency (EPA) Method 8260A. An on-site mobile laboratory was used for the analyses. Soil headspace readings of collected samples and water level measurements from existing monitor wells were also performed as part of the scope of work. A report of findings that summarized the site background, previous site investigations, methodology, results and conclusions was issued. Mr. Hadden provided project management for this project.

- **Micro Flo; Environmental Compliance Audit; Sparks, GA; Project Manager -** Conducted a compliance audit of this pesticide formulating facility. Evaluated compliance with federal, state, and local regulations including, but not limited to: CERCLA, RCRA, EPCRA, CWA, TSCA, DOT, SDWA, state hazardous waste management and UST programs, local sewage, building and fire codes. Mr. Hadden was responsible for field research, report writing, and project administration.

- **US Postal Service; Phase I ESE; Milledgeville, GA; Project Manager -** Conducted a Phase I Environmental Site Assessment (ESA) on two undeveloped tracts of land in Milledgeville, Georgia. Mr. Hadden managed the project.

- **Micro Flo; Environ. Documentation Review of Two proposed Vendors; Atlanta, GA; Project Manager -** Acquired database reports from Environmental Data Resources, Inc. of Southport Connecticut. Issued separate letter reports for each vendor. After reports were reviewed, advised the Client of the records review findings. The reports provided an evaluation of the potential for environmental concerns that were apparent in the respective database reports. Mr. Hadden provided project management for this project.

- **GE Capital Corporation; Stalnaker Plastics Warner Robins, GA; Project Manager.** Provided a Phase I Environmental Site Assessment (ESA) in accordance with the American Society for Testing and Materials (ASTM) practice C-I 527-97. The assessment included a visual inspection of the property, research of readily available public records, a drive-by inspection of accessible adjacent properties, and review of a computer search of Federal and State environmental databases. The investigation sought indications of the presence of hazardous substances of petroleum on the Property or on nearby parcels from which those substances might migrate to the Property. Mr. Hadden conducted Phase I ESA

research and authored the report. He also handled project administration. Remediation processes included soil vapor extraction and recovery wells, air sparging, soil vapor extraction using horizontal well galleries, and quarterly monitoring. Contaminant transport and exposure assessment computer modeling were performed to assess the impacts to nearby potable wells and surface waters. Mr. Hadden was responsible for site investigation, monitoring, and report writing.

- **Confidential Client; AST Line Closure; Fairburn, GA; Project Manager** - Provided project management and field coordination of services necessary to close a 2,000-gallon gasoline UST. Associated investigation led to discovery and subsequent remediation of release of diesel fuel from lines associated with a 250,000-gallon AST. Mr. Hadden provided client and project activity coordination, invoicing, overall project administration, and technical services oversight design and implementation.

- **GE Capital Corporation; Phase I Environmental Site Assessments for Three (3) Dixie Tool & Die Manufacturing Plants; Forest Park, GA; Project Manager** - Performed Phase I Environmental Site Assessment on three Dixie Tool & Die Manufacturing Plants. Inspected the property and observe those portions of adjacent parcels which were visible from the property and public roads for obvious and apparent causes for concern, such as the improper storage or use of petroleum products, chemicals or wastes, and the presence of tanks, oil-filled electrical equipment, stains, unusual odors, stressed vegetation, filled areas, and other indications of the potential presence of hazardous substances.

- **Union Carbide; Asbestos Survey of the UCAR Emulsion Systems Plant; Tucker, GA; Project Manager** - Completed an asbestos survey of the UCAR Emulsion System, Tucker, Georgia plant. Identified observed homogeneous areas containing materials suspected to contain asbestos. Collected 100 representative bulk samples from suspect asbestos-containing materials (ACM), which were submitted to an accredited laboratory for polarized light microscopy (PLM) analysis and prepared a final report. Mr. Hadden conducted the asbestos survey and was primary author of the final report.

- **Keefer, Wood, Allen & Rahal; Phase I ESA Update; Harrisburg, PA; Project Manager** - Conducted a Phase 1 ESA in accordance with ASTM E- 1527 standard on a boxboard container manufacturing plant in East Point, Georgia for a property transfer. Mr. Hadden was responsible for the site assessment, report writing, and project management.

- **Southern States; Phase I ESA Browns Galvanizing; Aberdeen, NC; Project Manager** - Identified recognized environmental conditions, which indicate the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release on any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. Mr. Hadden was responsible for the site assessment, report writing, and project management.

- **MST International; Phase I ESA and Subsurface Investigation at Ft. Valley State University; Atlanta, GA; Project Manager** - Provided a Phase I ESA on an approximate eight acre vacant parcel of previously developed property. The ESA included a Special Resources evaluation and due diligence sampling of soil for hazardous waste characterization. Performed an assessment in accordance with

ASTM E-1527 standard and conducted subsurface investigation by excavating test pits to characterize and estimate extent of suspected buried construction debris. Mr. Hadden was responsible for the site assessment, subsurface investigation, report writing, and project management.

- **South Carolina National Bank; Phase I Environmental Site Assessments; Various Sites, SC; Industrial Hygienist** - Phase I environmental audits were conducted and audit reports prepared for several commercial properties.

- **Various locations in the Southeast: Georgia, Florida, Alabama, North Carolina and South Carolina** - Project and site manager for Phase **I and Phase II** environmental site assessments, structural and geotechnical assessments, and underground storage tank projects.

- **Kings Bay Naval Submarine Base, St. Marys, Georgia** - Project manager and site supervisor for quality control and structural assessment services for various government and private contracts for naval base infrastructure.

- **Jaxport 2000, Jacksonville, Florida** - Provided project management and supervision of quality control services for an airport expansion under FAA guidelines.

- **Callaway Nuclear Power Plant, Missouri** - Civil Quality Control Inspector and Laboratory Supervisor responsible for quality assurance of construction activities and materials.

- **Various locations in Atlanta, Georgia** - Coordinated and provided civil quality control services to various governmental and private entities for engineering purposes.

- **Various locations in Alabama, Georgia, Florida and Mississippi** - Performed physical property testing on soils and other building materials for structural purposes.

- **Leamiver Pulp Mill, New Augusta, Mississippi** - Provided civil quality control materials testing for a $540 million plant expansion.

Experience

Mr. Driver has over 27 years of experience in the fields of environmental and geotechnical engineering and construction quality control and assurance testing. Mr. Driver is the founder and President of Geotechnical & Environmental Consultants, Inc. and is responsible for the overall operation of the firm. In addition, Mr. Driver also assumes project duties and acts as Senior Engineer on numerous projects.

Environmental Experience

- Senior Engineer responsible for over 1,000 Phase I/Phase II Environmental Site Assessments in Georgia.
- Project or Senior Engineer responsible for closure testing on over 100 UST removal projects throughout the southeast.
- Project or Senior Engineer responsible for preparation and implementation of Corrective Action Plans on over 50 confirmed UST contamination sites throughout Georgia and Alabama.
- Senior Engineer for design of SPCC and SWPPP plans throughout Georgia.

Geotechnical & Construction Related Experience

- Experienced in geotechnical evaluations for both shallow and deep foundation systems and site development throughout the southeast.
- Experienced in all phases of construction quality assurance and quality control testing for projects ranging from small wood framed structures to multi-story buildings and large industrial facilities throughout the southeast.
- Experienced in all phases of NPDES stormwater sampling and testing for construction sites.

APPENDIX J:

Noise Assessment Documentation

GEC

Worksheet A
Site Evaluation

Noise Assessment Guidelines

Site Location
Atlanta, Georgia

Program

Project Name
Georgia Coral Gardens

Locality

File Number

Sponsor's Name

Phone

Street Address

City, State

	Acceptability Category	DNL	Predicted for Operations in Year
1. Roadway Noise	Acceptable	62.7	2021
2. Aircraft Noise	Acceptable	<55	2012 (Hartsfield) - most current available
3. Railway Noise	Acceptable	<65	2011
Value of DNL for all noise sources: (see page 3 for combination procedure)		62.7	

Final Site Evaluation (circle one)

(Acceptable)

Normally Unacceptable

Unacceptable

All site locations are less than 65DNL, therefore no exterior or interior noise mitigation is required per HUD guidelines (NAG).

Signature _____ Date 6/17/11

Clip this worksheet to the top of a package containing Worksheets B-E and Workcharts 1-7 that are used in the site evaluations

	ROAD		AIR	RAILWAY	
NAL	Dist	DNL	DNL	DNL	Combined
1	290	62.7	<55	<65	62.7
2	555	58.4	<55	<65	58.4
3	660	57.3	<55	<65	57.3

⊙ = Approximate Location of NAL

Roadway Noise

Page 1

Noise Assessment Guidelines

List all major roads within 1000 feet of the site:

1. Campbellton Road SW
2.
3.
4.

Necessary Information	Road 1	Road 2	Road 3	Road 4
1. Distance in feet from the NAL to the edge of the road				
a. nearest lane				
b. farthest lane				
c. average (effective distance)	Varies			
2. Distance to stop sign	NA			
3. Road gradient in percent	0			
4. Average speed in mph				
a. Automobiles	45			
b. heavy trucks - uphill	45			
c. heavy trucks - downhill	45			
5. 24 hour average number of automobiles and medium trucks in both directions (ADT)				
a. automobiles (92%)*	16,422 per GDOT website			
b. medium trucks (4%)*	714			
c. effective ADT (a + (10xb))				
6. 24 hour average number of heavy trucks				
a. uphill				
b. downhill				
c. total (4%)*	714			
7. Fraction of nighttime traffic (10 p.m. to 7 a.m.)	0.15			
8. Traffic projected for what year?	2021 3% per year growth over 2009			

* per DCA

Site DNL Calculator

For more information on using the noise calculator, to access the user guidebook, or send comments, please visit the following page:
Day/Night Noise Level Electronic Assessment Tool

Guidelines:

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

Providing Feedback & Corrections

When using the DNL Assessment Tool, following the directions in the User's Guide, users are encouraged to provide feedback on how the DNL Assessment Tool may be improved. Users are also encouraged to send comments or corrections for the improvement of the tool.

Please send comments or other input to: **ATEC@hud.gov**

APPENDIX K:

Additional HOME Requirements

GEC

This Section Not Applicable For This Report.

APPENDIX L:

Owner Environmental Questionnaire

GEC

OWNER ENVIRONMENTAL QUESTIONNAIRE & DISCLOSURE STATEMENT

The checklist **MUST** be completed and signed by the current property owner, notarized in the spaces indicated and submitted with the application. The Owner must supply and attach evidence of ownership of the property, i.e., a deed. In preparing this document, the property owner must make a good faith effort to correctly answer all questions in this checklist. Care should be taken to check the answers against whatever records are in the owner's possession. If any of the following questions are answered in the affirmative, or if answers are unknown and/or qualified, the Environmental Professional must determine whether further inquiry is warranted. A gap in the Owner's knowledge about any item on the checklist below does not relieve the Environmental Professional from the requirement that the item be fully addressed in the Phase I Report. The property owner must fully document the reason for any affirmative answer, and provide the Environmental Professional with all appropriate supporting information.

Purchaser: Georgia Coin| Gardens LP
(Phone) 602-254-5611
Owner/seller: 1856 Wells Court Partners, LP
(Phone) 480-289-5715
Subject property: 1856 Wells Dr. SW, Atlanta, GA
(Phone) 404-349-2437

QUESTIONNAIRE - PART A:

1. Land use: Is the property, or any adjacent property, used for commercial, industrial or manufacturing purposes including, but not limited to. dry cleaners and gas stations? Adjacent properties include those that border the site and include properties across the street from the site.

X Yes __No __Don't Know Please describe:

Residential community - Senior living

Provide the name and describe the type of business operating at the property:

Providence Manor - Senior living

Name and type of business operating at the adjacent property to the **north:**

south:

east:

west:

2. Has the property or any adjacent property been used in the past for commercial, industrial or manufacturing purposes including, but not limited to, dry cleaners and gasoline stations?

__Yes X No __Don't Know Please describe:

Owner: 1856 Wells Court Partners, LP Date(s)

Current Use of property: Rental Property

Previous use of property: Rental Property

Previous use of property to **north:** Don't Know

south: N/A

east: N/A

west: N/A

3. Are there any pesticides, automotive or industrial batteries, paints or other chemicals stored on the property or at the facility?

__Yes X No __Don't Know (If yes, please describe)

4. Are there currently any plastics or metal industrial drums (ranging from 5 to 55-gallons) located on the property or at the facility, or were there in the past?

__Yes X No __Don't Know (If yes, please describe)

5. How and where were items identified in Questions #3 & #4 disposed of (and if you do not know all the specifics, provide names and present employers of people who might be able to provide additional information)?

6. Has fill dirt ever been brought onto the site?

__Yes X No __Don't Know (If yes, please describe)

7. Have any substances identified as hazardous, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials, including construction debris, been dumped above grade, buried and/or burned on the site (where and what disposal took place)?

__Yes X No __Don't Know (If yes, please describe)

8. Is there any obviously stained soil, or other evidence of past waste disposal on the property (where)?

__Yes X No __Don't Know (If yes, please describe)

9. a) Are there any above or underground storage tanks located on the property now (Identify location)?

__Yes X No __Don't Know (If yes, please describe)

b) Are the existing storage tanks empty, out of service, or closed? (If 'yes' provide information on when, give the name of the contractor used, and provide a copy of any report generated).

__Yes X No __Don't Know (If yes, please describe)

c) Have any tanks been removed? (If 'yes' provide information on when, give the name of the contractor used, and provide a copy of any report generated).

__Yes X No __Don't Know (If yes, please describe)

10. Provide names and addresses and telephone numbers of any prospective buyers in the past that may have conducted an environmental assessment of the subject property. Provide the name, address and telephone number of **your** Lender on this property. Attach any past environmental reports you have, or provide information on how to locate a copy of the report(s) if you do not have them.

None available

11. Does the property discharge waste water (other than storm water) directly to a ditch or stream on or adjacent to the property?

__Yes X No __Don't Know (If yes, please describe)

12. Is the property located near or in an area where conventional fuels (e.g., petroleum products) hazardous gases, (e.g. propane) or chemicals (e.g. benzene or hexane) of a flammable nature are stored?

__Yes X No __Don't Know (If yes, please describe)

13. Have there been any health complaints related to the indoor or outdoor air at the property or any building located on the property?

__Yes X No __Don't Know (If yes, please describe)

14. Does the owner of the property or operator of the facility have any knowledge of environmental liens or governmental notification (including information requests) relating to violations or potential violations of environmental laws with respect to the property or any facility located on the property?

__Yes X No __Don't Know (If yes, please describe)

15. Has the owner of the property or operator of the facility been informed of the presence of hazardous substances or environmental violations with respect to the property or any facility located on the property?

__Yes X No __Don't Know (If yes, please describe)

16. Are you aware of any environmental assessment of the property that indicated the presence of hazardous substances or petroleum products on, in, at, or under the site?

__Yes X No __Don't Know (If yes, please describe)

17. Are you aware of any environmental assessment of the subject property that has recommended further assessment or testing of the property?

__Yes X No __Don't Know (If yes, please describe)

18. Are there any past, current, or pending lawsuits or administrative proceedings for alleged damages related to environmental issues or problems involving the property or any owner or tenant of the property?

__Yes X No __Don't Know (If yes, please describe)

19. Have pesticides, herbicides or other agricultural chemicals ever been stored, mixed on or applied to the property?

__Yes X No __Don't Know (If yes, please describe)

QUESTIONNAIRE - PART B:

1. Are there any structures on the site more than fifty (50) years old, or located in a designated historic district? If yes, please describe & submit photographs of all interior rooms and exterior facades. Include a copy of the proposed rehabilitation work scope and a location map.

__Yes X No __Don't Know

2. Is the site located in a 100-year floodplain?

Copy the portion of floodplain map indicating the site location. Attach a copy of the Flood Plain Map and include panel number on the copy.

__Yes X No __Don't Know (If yes, please describe below.)

3. Does the site have the potential to affect or be affected by?

		Yes	No
a.	Coastal Areas Protection and Management		X
b.	Runway Clear Zones & Accident Potential Zones		X
c.	Endangered Species		X
d.	Farmland Protection		X
e.	Compatibility with Local Codes, Plans and Zoning	?	X
f.	Wetlands Designated land		X
g.	Thermal & Explosive Hazards		X
h.	Toxic Chemicals & Radioactive Materials		X
i.	Solid Waste Management		X
j.	Local Zoning Plans Compatibility	?	X

(If yes, please describe.)

4. Is the site within 1000 feet of a major road/highway/freeway (i.e. a roadway which experiences an average daily traffic count of 10,000 or greater)?
__Yes X No __Don't Know (If yes, the following information must be completed. Much of it can be obtained through the City/County Highway or Transportation Department)

- What is the name of the major road/highway/freeway? _____
- List the distance of any stop sign (not a traffic signal) that is less than 600 feet from the site .2 miles
- What is the average speed of travel on this major road/highway/freeway? _____
- List the average number of automobiles for both directions during a 24-hour day _____
- List the average number of trucks for both directions during a 24-hour day _____

5. Is the site within 3000 feet of a railroad?
__Yes X No __Don't Know (If yes, the following information must be completed. Much of it can be obtained by contacting the Supervisor of Customer Relations and/or the Engineering Department for the railway)

- What is the name of the railway operating on this line? _____
- List the average number of trains for both directions during a 24-hour day _____
- List the average number of diesel locomotives per train _____
- List the average number of railway cars per train _____
- List the average train speed _____
- Is the track welded or bolted? _____
- Is the site near a grade crossing that requires prolonged use of the train's horn? __Yes __No

- If yes, how far from the grade crossing are the whistle posts located?

  _____

6. Is the site within 15 miles of a military airport?

   __Yes __No __Don't Know (If yes, please attach a copy of the airport's current noise contour information. This information is available for almost all military airports and can be obtained by contacting the Military Agency in Charge of Airport Operations. If noise contours are not available, please obtain the following information)

   - List the average number of nighttime jet operations (10 p.m.-7 a.m.)

     _____

   - List the average number of daytime jet operations (7 a.m. – 10 p.m.)

     _____

   - List the flight paths of the major runways

     _____

7. Is the site within 5 miles of a private/commercial airport or airfield?

   _X_Yes __No __Don't Know (If yes, please attach a copy of the airport's current noise contour information. This information is available for almost all private/commercial airports and can be obtained by contacting the FAA Control Tower or Airport Operations. If noise contours are not available, please obtain the following information)

   - List the average number of nighttime jet operations (10 p.m. - 7 a.m.)

     _____

   - List the average number of daytime jet operations (7 a.m. – 10 p.m.)

     _____

   - List the flight paths of the major runways

     _____

QUESTIONNAIRE - PART C:

Valuation Reduction: Relationship of the purchase price to the fair market values of the property if it were not contaminated:

1. Have you identified the type of property transaction (for example-- sale, purchase, ground lease, etc.) to the Environmental Professional?

~~XXX~~ Sale

2. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

yes

- If no, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

N/A

Letters of Reference

GEC

Capital City Bank

March 30, 2011

To Whom It May Concern:

Please allow this letter to serve as a reference for Geotechnical and Environmental Consultants, Inc. (GEC) with whom we enjoy an excellent relationship. We have the highest level of confidence in the work prepared by GEC. Not only do we engage GEC for various bank jobs (including our new office sites) but they are the only provider of geotechnical and environmental services that we recommend here in the Middle Georgia area.

The company always handles its affairs in a professional and timely manner. We are happy to have partnered with GEC on prior and current jobs and look forward to doing so again in the future. If I can be of any assistance answering any questions, please contact me at your convenience.

Sincerely,

CAPITAL CITY BANK

Macon, Georgia 31204

Gentlemen:

This letter is written as a letter of recommendation for Tom Driver and his company, Geotechnical & Environmental Consultants, Inc. I have worked with Tom and other professionals at GEC for a number of years in connection with environmental and real estate projects for which I have provided legal counsel. The work by GEC that I have observed has included environmental assessments of land, soil and groundwater sampling and analysis for various purposes, geotechnical work, contaminated properties assessment and remediation, and other environmental work and advice provided by GEC to our common clients, such as developers, property owners, and lenders. Both my clients and I have found the work of Tom Driver and the other professionals with whom we have worked at GEC to be of high quality in every respect. For this reason, Tom Driver and GEC are the primary environmental consultant I recommend to my clients for the types of environmental work in which GEC is engaged.

If you have any further questions concerning my experience with Tom and GEC, please contact me.

Yours very truly,

ROBERT C. NORMAN, JR.

RCN:fib

WALTHALL

OIL COMPANY

March 30, 2011

To Whom It May Concern:

I am writing to recommend Geotechnical and Environmental Consultants, Inc. for your environmental projects. As the President of Walthall Oil Company, I am charged with the responsibility for engaging environmental work to be performed. We have found that Tom Driver and his firm, Geotechnical and Environmental Consultants are the best in the field.

We often require Phase I and Phase II Environmental Site Assessments in connection with real estate transactions of the petroleum properties we are involved with. Tom and his staff have numerous years experience in environmental work. Some of our projects require quick turnaround. Tom has the manpower necessary to provide us with this level of service.

Our projects, when needed for a quick deadline, have been on time. His work product is of the utmost quality and professionalism. GEC has offices in Macon and Columbus. This allows them to provide quick, efficient and localized customer service throughout the state.

Please call me directly at (478) 781-1234 if I can answer any specific questions you may have.

Sincerely,

Frank W. Walthall, III
President of Walthall Oil Company

APPENDIX P:
Environmental Certification

GEC

ENVIRONMENTAL CERTIFICATION

Project Name: Coral Gardens

Project Location: 1856 Wells Drive SW, Atlanta, Georgia

The undersigned being first duly sworn on oath do certify to the Georgia Department of Community Affairs (DCA)/Georgia Housing and Finance Authority (GHFA) that the statements contained in this certification are true and correct. The undersigned also acknowledge that deviations from the requirements contained in the certification and checklist could result in scoring deductions (Page, Section and/or Appendix numbers must be included for each item).

1. The Phase I Report for the above referenced project has been prepared according to the applicable DCA required format. **Page/Sec./App. 3-5/2.2/-**

2. The Phase I Report and/or update was performed under the supervision of an "Environmental Professional" as defined in 40 C.F.R. § 312.10(b) (hereinafter referred to as an Environmental Professional). Résumés describing the qualifications of all personnel involved with the Phase I environmental site assessment must be included. **Environmental Consultant Signature Page**

3. The Environmental Professional is not affiliated with the Owner/developer or a buyer or seller of the project. **Page/Sec./App. 1/1.0/-**

4. The Phase I Report and/or update was prepared less than 180 days prior to Application submission and within 30 days of the site reconnaissance. In addition, the date of the Report appears of the cover page of the Report. **Page/Sec./App. 1/1.0/-**

5. The Georgia Housing and Finance Authority and DCA have the right to rely upon the Phase I and/or Phase II Report prepared for the property in the same way as the Owner, client and any other authorized users of the Report(s). **Page/Sec./App. 6/2.6/-**

6. The Phase I Report was prepared in accordance with the applicable ASTM and DCA standards. **Page/Sec./App. 1/1.0/-**

7. The Environmental Professional employed by the consulting firm has supervised the performance of the Phase I, reviewed, signed and stamped both the Phase I and Phase II Reports (if applicable) and any amendments, addenda and updates thereto. **Environmental Consultant Signature Page**

8. The Environmental Professional has included a comprehensive historical review of the subject property back to 1940 or the property's first developed use, whichever is earlier. **Page/Sec./App. -/5.5/C, D & F**

9. The Phase I includes the professional opinion of the Environmental Professional as to any potential environmental risks and as to any recognized environmental conditions identified during the comprehensive historical review. **Page/Sec./App. -/8.0/-**

10. The Environmental Professional has:

* Commercial General Liability insurance, total combined single limits of $1,000,000.00 per occurrence and $2,000,000.00 in the aggregate; ***and*** **Page/Sec./App. -/-/N**

* Professional Errors and Omissions Insurance with limits of $2,000,000.00 each claim and $2,000,000.00 in the aggregate with coverage extended to include third party liability for death, bodily injury, diminution of value of property and property damage. **Page/Sec./App. -/-/N**

* Pollution Liability Insurance with limits of $2,000,000.00 each claim and $2,000,000.00 in the aggregate. **Page/Sec./App. -/-/N**

11. The Georgia Housing and Finance Authority and DCA have been named as 1) additional insureds and 2) certificate holders on the Accord 25 form (the required insurance certificate) for the commercial liability insurance policy. **Page/Sec./App. -/-/N**

12. A 30 day cancellation period is included on the insurance certificate. **Page/Sec./App. -/-/N**

13. The Owner Environmental Questionnaire & Disclosure Statement has been completed by the current Owner of the property and included in the Phase I Report. **Page/Sec./App. -/-/L**

14. The completed Phase I Documentation: DCA Property Log and Information Checklist has been completed by the Environmental Professional and included in the Phase I Report. **Page/Sec./App. -/-/M**

15. If required, the HOME and HUD Environmental Questionnaire is completed and included in the Phase I (includes projects applying for HOME funds and projects with other HUD funding sources listed, including PBRA). **Page/Sec./App. -/-/-**

16. If, in accordance with Section II.B.5.b. of the DCA standards, a noise assessment is required, the Report includes a noise assessment which was completed in accordance with the HUD Noise Assessment Guidelines ("NAG") and 24 C.F.R § 51.100 *et seq*. (applies to all projects, whether or not HUD funds are include in the financial structure). **Page/Sec./App. 26/5.4.22/J**

17. In cases of elevated noise levels, the Report includes a noise attentuation plan completed in accordance with the HUD Noise Assessment Guidelines ("NAG") and 24 C.F.R § 51.100 *et seq*. (applies to all projects, whether or not HUD funds are include in the financial structure). **Page/Sec./App. -/-/-**

18. The Environmental Consultant Signature page has been signed by the Environmental Professional, the Principal of the Consultant, and the Professional Engineer or Professional Geologist and has been stamped by the Professional Engineer or Professional Geologist. The Environmental Consultant Signature page is included in the Phase I and/or Phase II Report. **Behind Cover Page**

RE: Wells Court

Dear Todd Peterman: Order No: 1106F47

Analytical Environmental Services, Inc. received 6 samples on 6/17/2011 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/10-06/30/11.
-AIHA Certification ID #100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/11.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Chantelle Kanhai

TEL: (478) 757-1606
FAX: (478) 757-1608

RE: Wells Court

Dear Todd Peterman:

Order No: 1106F44

Analytical Environmental Services, Inc. received 9 samples on 6/17/2011 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/10-06/30/11.
-AIHA Certification ID #100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/11.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

RE: 1856 Wells Court

Dear Bob Hadden: Order No: 1105C58

Analytical Environmental Services, Inc. received 12 samples on 5/13/2011 5:28:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/10-06/30/11.
-AIHA Certification ID #100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/11.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Analytical Environmental Services, Inc

Date: 26-May-11

Client:	GeoTechnical & Env. Consultants, Inc.
Project:	WALLS COURT
Lab ID:	1105G00

Case Narrative

Samples WC-13A and WC-13B had three types of flooring each; sample WC-11B had two types of flooring. The client will be charged for 5 extra samples.

For comments on the samples, see the individual analysis sheets.

ND = None Detected

PLM is not consistently reliable in detecting small concentrations of asbestos in floor tiles and similar nonfriable materials. Quantitative TEM is currently the only method that can be used to determine the conclusive asbestos content.

It is certified by the signatures below that the laboratory identified is accredited by the National Institute of Standards and Technology for Polarized Light Microscopy (PLM) analysis under the EPA Interim Asbestos Bulk Sample Quality Assurance Program, Laboratory ID 102082-0. All percentages given are by visually estimated volume. All analyses are performed in accordance with the EPA "Method for the Determination of Asbestos in Bulk Building Materials, EPA/600/R-93/116, July 1993." This report must not be reproduced except in full without the approval of Analytical Environmental Service, Inc. These test results apply only to the samples actually tested.

ND = None Detected

PLM is not consistently reliable in detecting small concentrations of asbestos in floor tiles and similar nonfriable materials. Quantitative TEM is currently the only method that can be used to determine the conclusive asbestos content.

It is certified by the signatures below that the laboratory identified is accredited by the National Institute of Standards and Technology for Polarized Light Microscopy (PLM) analysis under the EPA Interim Asbestos Bulk Sample Quality Assurance Program, Laboratory ID 102082-0. All percentages given are by visually estimated volume. All analyses are performed in accordance with the EPA "Method for the Determination of Asbestos in Bulk Building Materials, EPA/600/R-93/116, July 1993." This report must not be reproduced except in full without the approval of Analytical Environmental Service, Inc. These test results apply only to the samples actually tested.

For comments on the samples, see the individual analysis sheets.

ND = None Detected

PLM is not consistently reliable in detecting small concentrations of asbestos in floor tiles and similar nonfriable materials. Quantitative TEM is currently the only method that can be used to determine the conclusive asbestos content.

It is certified by the signatures below that the laboratory identified is accredited by the National Institute of Standards and Technology for Polarized Light Microscopy (PLM) analysis under the EPA Interim Asbestos Bulk Sample Quality Assurance Program, Laboratory ID 102082-0. All percentages given are by visually estimated volume. All analyses are performed in accordance with the EPA "Method for the Determination of Asbestos in Bulk Building Materials, EPA/600/R-93/116, July 1993." This report must not be reproduced except in full without the approval of Analytical Environmental Service, Inc. These test results apply only to the samples actually tested.

APPENDIX R:

CONSUMER CONFIDENCE REPORT ON WATER QUALITY

GEC

Drinking Water Quality Table KEY

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbiological contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Nephelometric Turbidity Unit (NTU): A measure of the cloudiness of water. We monitor turbidity because it is a good indicator of the effectiveness of our filtration system.

KEY:	for all units used in table
AL	Action Level
MCL	Maximum Contaminant Level
MCLG	Maximum Contaminant Level Goal
MRDL	Maximum Residual Disinfectant Level
MRDLG	Maximum Residual Disinfectant Level Goal
NA	Not Applicable
ND	Not detected at testing limit
NR	Not regulated
NTU	Nephelometric Turbidity Unit
ppb	Parts per billion or micrograms per liter (one part per billion is equivalent to one penny in 10 million dollars.)
ppm	Parts per million or milligrams per liter (one part per million is equivalent to one penny in 10 thousand dollars.)
TT	Treatment Technique

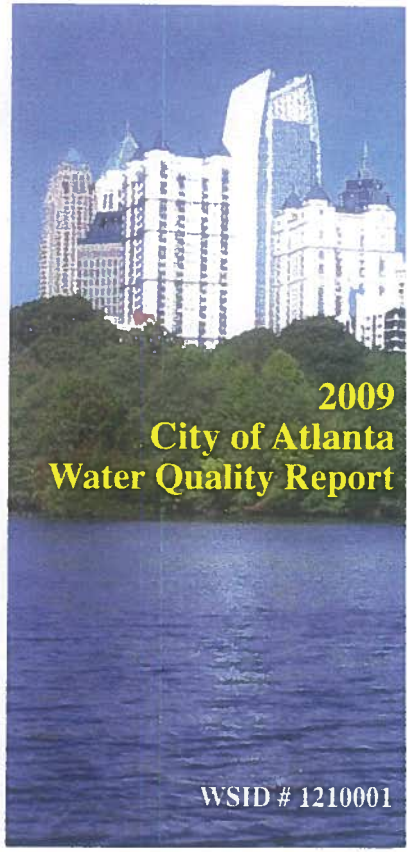
Regulated Contaminants

Sample Date 2009

Parameter (unit)	MCLG/ MRDLG	MCL/MRDL	Detected Level	Range of Detections	Violation	Likely Source
Microbiological						
Total Coliform Bacteria	0	presence of coliform bacteria in < 5.0% of monthly samples	1.4%	NA	No	Naturally present in the environment
Turbidity	NA	TT = 1 NTU	0.3	NA	No	Soil runnoff
Turbidity (% of samples)	NA	TT = 95% of samples < 0.3 NTU	100%	NA	No	
Total Coliform Bacteria: Highest percentage of positive samples collected in one month						
Turbidity: Highest single turbidity measurement, and lowest monthly percentage of samples less than 0.3 NTU						
Inorganic Contaminants						
Fluoride (ppm)	4	4	0.92	0.87 - 1.00	No	Naturally occurring; Water Additive
Chlorine (ppm)	4 (MRDLG)	4 (MRDL)	0.8	< 0.06 - 1.9	No	Water Additive used to control microbes
Nitrate as Nitrogen (ppm)	10	10	0.9	0.35 - 1.2	No	Fertilizer runoff
Copper (ppm)	1.3	AL=1.3	0.12	52 samples, no sites were found above the AL	No	Household plumbing
Lead (ppb)	0	AL=15	2.5	52 samples, 1 site was found above the AL	No	Household plumbing
Lead and Copper: 90th percentile value of samples collected from the most recent round of sampling						
Organic Contaminants						
Total Trihalomethanes [TTHM] (ppb)	NA	80	52	22 - 125	No	By-product of drinking water chlorination
Haloacetic acids [HAA5] (ppb)	NA	60	45	3 - 112	No	
Total Organic Carbon [TOC] (ratio)	NA	TT	1.13	NA	No	Naturally present in the environment
TTHM & HAA5: Reported for compliance as a running annual average; computed quarterly						
TOC: A calculated removal ratio that is reported for compliance as a running annual average; computed quarterly						

About Lead and Copper

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Atlanta Bureau of Drinking Water is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to two minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.



2009 City of Atlanta Water Quality Report

WSID # 1210001

Our Clean Water Commitment

The City of Atlanta Department of Watershed Management (DWM) is pleased to provide the 2009 Water Quality Report (WQR). Compiled and presented by the DWM Bureau of Drinking Water, this WQR supplies information about Atlanta's drinking water system and shows that the City's drinking water continues to meet or exceed standards established by the U.S. Environmental Protection Agency (EPA). Each year, the City conducts more than 50,000 tests to screen for more than 150 potential contaminants in its drinking water. Water is analyzed for hundreds of compounds; however, the table shown in this report lists only regulated substances that were detected during the tests, even if the detected amount was below the highest level allowed by EPA and federal regulations.

Throughout 2009, DWM continued its efforts to rebuild the City's drinking water infrastructure in the most efficient and cost-effective manner possible. DWM completed the three-year project to replace residential meters with new meters that include Automated Meter Reading capability and is in the first year of a three-year Valve & Hydrant Identification Program.

For more information about these or other current Clean Water Atlanta projects, visit www.cleanwateratlanta.org or call (404) 529-9211.

Source Water Assessment

The City of Atlanta Water System and the Atlanta Regional Commission (ARC) have completed a source water assessment itemizing potential sources of surface water pollution to your drinking water supply. The results of this assessment can be found on the Internet at http://www.atlantaregional.com/swap/ or you can request information by mail from the ARC.

Attn: Matthew Harper
Environmental Planning Division
Atlanta Regional Commission
40 Courtland Street, NE
Atlanta GA 30303

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water before we treat it include:

- **Microbial contaminants**, such as viruses and bacteria, which can come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.
- **Inorganic contaminants**, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.
- **Pesticides and herbicides**, which can come from a variety of sources such as agriculture, stormwater runoff and residential uses.
- **Organic chemical contaminants**, including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff and septic systems.
- **Radioactive contaminants**, which can be naturally occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Some people can be more vulnerable than the general population to contaminants in drinking water. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorder, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from EPA's Safe Drinking Water Hotline (1-800-426-4791).

Drinking water, including bottled water, can reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling EPA's Safe Drinking Water Hotline (1-800-426-4791).

Citizen Participation

The Department's Communications & Public Outreach Division educates and informs residents about water quality issues and infrastructure projects that may affect them. The division also includes a public education component designed to encourage and educate community groups, residents, schoolchildren and seniors about water conservation and water resource issues. For information about the Communications & Public Outreach Division, please contact Janet Ward at 404-589-2691.

The Source of Atlanta's Water

Each day, the Atlanta water system provides approximately 120 million gallons of treated drinking water for nearly 1 million residents in the metropolitan Atlanta area. All the water processed is surface water from the Chattahoochee River.

Monthly monitoring results from January 2005 through December 2006 at the Chattahoochee and Hemphill Water Treatment Plants did not detect any Cryptosporidium in our source (raw) water.

Cryptosporidium is a microbial parasite found in surface water throughout the United States. When ingested, it can cause symptoms such as nausea, diarrhea, and abdominal cramps.

Cryptosporidium must be ingested to cause disease, however, it may be spread through means other than drinking water. Most healthy individuals are able to overcome the disease within a few weeks. Immuno-compromised people have more difficulty and are at greater risk of developing severe, life-threatening illnesses and are encouraged to consult their doctor regarding appropriate precautions to prevent infection.

The raw water intake for the Chattahoochee and Hemphill water treatment plants is located on the Chattahoochee River. The Chattahoochee plant receives the water directly from the river. The Hemphill plant processes raw water that has been pumped from the river to a reservoir. The two plants supply about 75 percent of Atlanta's drinking water with the remaining water supplied by the Atlanta-Fulton County Water Treatment Plant, which also processes Chattahoochee River water. This plant, which is owned jointly by the City of Atlanta and Fulton County supplies treated water to the northeast area of the City's distribution system.

Important Information

This report contains very important information about your drinking water. If you do not understand it, have someone explain it to you.

APPENDIX S:

ENDANGERED SPECIES DOCUMENTATION

GEC

Listed Species in Fulton County (updated May 2004)				
Species	Federal Status	State Status	Habitat	Threats
Bird				
Bald eagle *Haliaeetus leucocephalus*	T	E	Inland waterways and estuarine areas in Georgia.	Major factor in initial decline was lowered reproductive success following use of DDT. Current threats include habitat destruction, disturbance at the nest, illegal shooting, electrocution, impact injuries, and lead poisoning.
Invertebrate				
Gulf moccasinshell mussel *Medionidus pencillatus*	E	E	Medium streams to large rivers with slight to moderate current over sand and gravel substrates; may be associated with muddy sand substrates around tree roots	Habitat modification, sedimentation, and water quality degradation
Shiny-rayed pocketbook mussel *Hamiota subangulata*	E	E	Medium creeks to the mainstems of rivers with slow to moderate currents over sandy substrates and associated with rock or clay	Habitat modification, sedimentation, and water quality degradation
Fish				
Bluestripe shiner *Cyprinella callitaenia*	No Federal Status	T	Brownwater streams	
Cherokee darter *Etheostoma scotti*	T	T	Shallow water (0.1-0.5 m) in small to medium warm water creeks (1-15 m wide) with predominantly rocky bottoms. Usually found in sections with reduced current, typically runs above and below riffles and at ecotones of riffles and backwaters.	Habitat loss due to dam and reservoir construction, habitat degradation, and poor water quality
Highscale shiner *Notropis hypsilepis*	No Federal Status	T	Blackwater and brownwater streams	
Plant				
Bay star-vine				

Schisandra glabra	No Federal Status	T	Twining on subcanopy and understory trees/shrubs in rich alluvial woods	
Piedmont barren strawberry *Waldsteinia lobata*	No Federal Status	T	Rocky acedic woods along streams with mountain laurel; rarely in drier upland oak-hickory-pine woods

Historic Preservation Division

RE: Finding of "No Historic Properties Affected"

PROJECT: **Renovate Georgia Coral Gardens Apartments,**
1856 Wells Drive SW, Atlanta
Federal Agency: DCA
HP-110525-003

COUNTY: Fulton

DATE: June 7, 2011

The Historic Preservation Division (HPD) has reviewed the information received concerning the above-referenced project. Our comments are offered to assist federal agencies and their project applicants in complying with the provisions of Section 106 of the National Historic Preservation Act, as amended.

Based on the information submitted, HPD has determined that no historic properties or archaeological resources that are listed in or eligible for listing in the National Register of Historic Places will be affected by this undertaking. Please note that historic and/or archaeological resources may be located within the project's area of potential effect (APE), however, at this time it has been determined that they will not be impacted by the above-referenced project. Furthermore, any changes to this project as proposed will require further review by our office for compliance with Section 106.

If we may be of further assistance, please do not hesitate to contact Erin Parr, Environmental Review Specialist, at (404) 651-6546. Please refer to the project number assigned above in any future correspondence regarding this project.

SUBJECT: 36 CFR 800 SHPO Consultation for a Department of Community Affairs Phase I Environmental Site Assessment
Georgia Coral Gardens
1856 Wells Drive SW
Atlanta, Fulton County, Georgia
GEC Project No.: 110264.340

Dear Dr. Crass:

Geotechnical & Environmental Consultants, Inc. (GEC) is conducting a Phase I Environmental Site Assessment (ESA) for the Department of Community Affairs on property located on the east side of Wells Drive SW, north of its intersection with Campbellton Road SW, in Atlanta, Fulton County, Georgia. This letter is a request for consultation regarding the proposed project in accordance with 36 CFR 800. The subject property is approximately 4.2-acres in size. The subject site is currently developed as a multi-family residential apartment complex. The development is comprised of six residential structures and a single amenities structure. Plans for the site include the renovation of the current structures. Project information is as follows:

Applicant: Atlantic Development & Investments
Mr. Adam Jaffe
7689 E. Paradise Lane, Suite 6
Scottsdale, AZ 85260

Contact: Geotechnical & Environmental Consultants, Inc.
Kevin Strumpler
5031 Milgen Court
Columbus, Georgia 31907

Enclosed are copies of a U.S.G.S. Topographic Quadrangle Map, aerial photographs, street map, site plan and photographs of the subject property and vicinity taken during the site reconnaissance on May 11, 2011. The goal of this inquiry is to determine whether or not the renovation of the subject property will disturb or affect any historical property/ies and/or cultural resources.

Due to the expediency in which DCA needs this information to complete the application, we would appreciate it if you could respond as quickly as possible. If you have any questions or need any further information, please contact our office at 706-569-0008 or email at kstrumpler@geconsultants.com. Thanks for your assistance in this matter.

Sincerely,
GEOTECHNICAL & ENVIRONMENTAL CONSULTANTS, INC.

Kevin R. Strumpler, P.G.
Senior Geologist

THE FIELD DATA UPON WHICH THIS PLAT IS BASED HAS BEEN CALCULATED FOR CLOSURE AND WAS FOUND TO HAVE A CLOSURE PRECISION OF ONE IN 41,037 AND AN ANGULAR ERROR OF 00" PER SETUP AND WAS NOT ADJUSTED.

THIS PLAT HAS BEEN CALCULATED FOR CLOSURE AND WAS FOUND TO HAVE A CLOSURE PRECISION OF ONE IN _____. INITIALS _____

THIS PROPERTY IS NOT SHOWN TO BE LOCATED WITHIN A 100 YEAR FLOOD HAZARD AREA ACCORDING TO FIRM MAP NO. 130157 0037c DATED march 4, 1987

VICINITY MAP

TITLE EXCEPTIONS:

BASED ON LAWYERS TITLE INSURANCE CORPORATION POLI NO. 956-32.0 (4) (a) (1), DATED FEBRUARY 18, 1998 AT

1. Easement from Bennett A. Wells to City of Atlanta, dated January 11, 1938, recorded in Deed Book 1692, Page 78, public records of Fulton County, Georgia. Surveyor finds no evidence of City of Atlanta sanitary sewer crossing this tract of land. Surveyors opinion is that this easement affects other property owned by Bennett A. Wells in 1938.
2. Easement from J.M. MacBryde to Georgia Power Company, dated April 3, 1969, recorded in Deed Book 4755, page 231, public records of Fulton County, Georgia. Covered by Containment Letter from Georgia Power Company to Stuart M. Neiman, dated January 27, 1995.
3. Easement from D. Don Camp to Georgia Power Company, dated February 9, 1971, recorded in Deed Book 5385, Page 327, public records of Fulton County, Georgia. Covered in Containment Letter from Georgia Power Company to Stuart M. Neiman, dated January 27, 1995.

This is to certify that this map or plat and the survey on which it is based were made in accordance with "minimum Standard Detail requirements for ALTA/ACSM land Title Surveys," jointly established and adopted by ALTA and ACSM in 1992, pursuant to accuracy standards (as adopted by ALTA and ACSM and in effect on the date of this certification) of a Urban Survey. Survey based on Lawyers Title Insurance Corporation File No. 956-32.0 (4), dated April 7, 1996 at 8:00 A.M.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	CECIL
Soil Surface Texture:	sandy clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.
Hydric Status:	Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

Soil Layer Information

	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	7 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 4.50

3	11 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
4	50 inches	75 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
loam
fine sandy loam

Surficial Soil Types: sandy loam
loam
fine sandy loam

Shallow Soil Types: clay
sandy clay
gravelly - loam

Deeper Soil Types: loamy fine sand
sandy loam
weathered bedrock

EXECUTIVE SUMMARY

SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

RECORD SOURCES AND CURRENCY

To maintain currency of the following databases, EDR contacts the appropriate agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

AIRS: Permitted Facility & Emissions Lising
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of permitted Air facilities and emissions data.

Date of Government Version: 12/31/2008
Number of Days to Update: 15
Last EDR Contact :02/28/2011

Source: Department of Natural Resources
Telephone: 404-363-7000

AST: Above Ground Storage Tanks
Standard Environmental Record Source: State and tribal registered storage tank lists
Search Distance: 0.25 Mile

A listing of LP gas tank site locations.

Date of Government Version: 03/03/2011
Number of Days to Update: 7
Last EDR Contact :02/28/2011

Source: Office of Insurance & Safety Fire Commissioner
Telephone: 404-656-5875

BROWNFIELDS: Brownfields Public Record List
Standard Environmental Record Source: State and tribal Brownfields sites
Search Distance: 0.5 Mile

The Brownfields Public Record lists properties where response actions under the Georgia Hazardous Site Reuse and Redevelopment Act are planned, ongoing or completed.

Date of Government Version: 12/30/2010
Number of Days to Update: 26
Last EDR Contact :02/14/2011

Source: Department of Natural Resources

DEL SHWS: Delisted Hazardous Site Inventory Listing
Standard Environmental Record Source: State and tribal - equivalent CERCLIS
Search Distance: 1 Mile

A listing of sites delisted from the Hazardous Site Inventory.

Date of Government Version: 07/01/2010
Number of Days to Update: 45

Source: Department of Natural Resources
Telephone: 404-657-8636

RECORD SOURCES AND CURRENCY

Last EDR Contact :04/07/2011

DRYCLEANERS: Drycleaner Database

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

A list of drycleaners in the state. The listing includes drycleaner facilities, that use perchloroethylene, that responded to the Notification of Compliance Status forms. It also includes those businesses that are pick-up stores only and do not conduct dry cleaning on site.

Date of Government Version: 09/18/2009
Number of Days to Update: 21
Last EDR Contact :03/18/2011

Source: Department of Natural Resources
Telephone: 404-363-7000

FINANCIAL ASSURANCE: Financial Assurance Information Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of financial assurance information for underground storage tank facilities.

Date of Government Version: 09/14/2010
Number of Days to Update: 64
Last EDR Contact :03/25/2011

Source: Department of Natural Resources
Telephone: 404-362-4892

HIST LF: Historical Landfills

Standard Environmental Record Source: State and tribal landfill / solid waste disposal

Search Distance: 0.5 Mile

Landfills that were closed many years ago.

Date of Government Version: 01/15/2003
Number of Days to Update: 17
Last EDR Contact :01/20/2004

Source: Department of Natural Resources
Telephone: 404-362-2696

INST CONTROL: Public Record List

Standard Environmental Record Source: State and tribal institutional control / engineering control registries

Search Distance: 0.5 Mile

Sites on the Public Record Listing that have institutional controls or limitations on use are sites with Risk Reduction Standards of 3, 4, and 5.

Date of Government Version: 12/30/2010
Number of Days to Update: 26
Last EDR Contact :02/14/2011

Source: Department of Natural Resources
Telephone: 404-657-8600

LUST: List of Leaking Underground Storage Tanks

Standard Environmental Record Source: State and tribal leaking storage tank lists

Search Distance: 0.5 Mile

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 01/04/2011
Number of Days to Update: 8
Last EDR Contact :03/23/2011

Source: Environmental Protection Division
Telephone: 404-362-2687

NON HSI: Non-Hazardous Site Inventory

RECORD SOURCES AND CURRENCY

Standard Environmental Record Source: State and tribal - equivalent CERCLIS
Search Distance: 1 Mile

This list was obtained by EDR in 1998 and contains property listings that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Priority list (Hazardous Site Inventory or HSI) because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment. Disclaimer provided by Rindt-McDuff Associates - the database information has been obtained from publicly available sources produced by other entities. While reasonable steps have been taken to insure the accuracy of the data, RMA does not guarantee the accuracy of the data. No claim is made for the actual existence of pollution at any site. This data does not constitute a legal opinion.

Date of Government Version: 12/31/2010

Telephone: Not Reported

NPDES: NPDES Wastewater Permit List
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of NPDES wastewater permits issued by the Watershed Protection Branch.

Date of Government Version: 01/27/2011
Number of Days to Update: 8
Last EDR Contact :02/15/2011

Source: Department of Natural Resoruces
Telephone: 404-362-2680

SHWS: Hazardous Site Inventory
Standard Environmental Record Source: State and tribal - equivalent CERCLIS
Search Distance: 1 Mile

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/01/2010
Number of Days to Update: 45
Last EDR Contact :04/07/2011

Source: Department of Environmental Protection
Telephone: 404-657-8600

SPILLS: Spills Information
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

Oil or Hazardous Material Spills or Releases.

Date of Government Version: 12/31/2010
Number of Days to Update: 33
Last EDR Contact :04/18/2011

Source: Department of Natural Resources
Telephone: 404-656-6905

SWF/LF: Solid Waste Disposal Facilities
Standard Environmental Record Source: State and tribal landfill / solid waste disposal
Search Distance: 0.5 Mile

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 03/15/2010
Number of Days to Update: 58

Source: Department of Natural Resources
Telephone: 404-362-2696

Last EDR Contact :02/11/2011

TIER 2: Tier 2 Data Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of facilities which store or manufacture hazardous materials and submit a chemical inventory report.

Date of Government Version: 12/31/2009
Number of Days to Update: 61
Last EDR Contact :03/07/2011

Source: Department of Natural Resources
Telephone: 404-656-4852

UST: Underground Storage Tank Database

Standard Environmental Record Source: State and tribal registered storage tank lists

Search Distance: 0.25 Mile

Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 09/14/2010
Number of Days to Update: 69
Last EDR Contact :03/25/2011

Source: Environmental Protection Division
Telephone: 404-362-2687

VCP: Voluntary Cleanup Program site

Standard Environmental Record Source: State and tribal voluntary cleanup sites

Search Distance: 0.5 Mile

Georgias Voluntary Remediation Program Act was created to encourage voluntary investigation and remediation of contaminated properties.

Date of Government Version: 03/07/2011
Number of Days to Update: 7
Last EDR Contact :03/08/2011

Source: DNR
Telephone: 404-657-8600

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Standard Environmental Record Source: Federal CERCLIS

Search Distance: 0.5 Mile

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010
Number of Days to Update: 57
Last EDR Contact :03/01/2011

Source: EPA
Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.5 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Search Distance: 0.5 Mile

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

US CDL: Clandestine Drug Labs

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US ENG CONTROLS: Engineering Controls Sites List

Standard Environmental Record Source: Federal institutional controls / engineering controls registries

Search Distance: 0.5 Mile

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

US INST CONTROL: Sites with Institutional Controls

Standard Environmental Record Source: Federal institutional controls / engineering controls registries

Search Distance: 0.5 Mile

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

HISTORICAL USE RECORDS

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 1 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
