

Short Term Work Program Report of Accomplishments

The best measure of any plan's success is to assess the progress it is making towards its stated goals. The Report of Accomplishments provides a status of each work item identified in the City's 2006-2011 Short Term Work Program, projects identified in the 2008 LCI Five Year Implementation Plan, and several additional projects that the city has completed. For each activity the Report identifies whether it was completed, postponed, dropped, or if it is underway. A brief explanation is given for items that have not been completed as well as their future status as a long or short-term goal or policy.
