

PLANFIRST

## PlanFirst Program Application - May 15, 2016

**Introduction:** The Department of Community Affairs' PlanFirst Program rewards local governments that clearly demonstrate success with implementing their local comprehensive plan. To apply for PlanFirst designation, a local government must have Qualified Local Government certification and be current on required reporting to DCA. (To check status of both, please visit <http://www.georgiaplanning.com/planners/planreview/default.asp>).

A multi-agency review panel will evaluate a number of indicators of community success with plan implementation to select communities for this designation. All of these indicators are equally important, but size of the community is taken into consideration in the evaluation so that communities of various sizes are equally competitive for PlanFirst designation.

**Instructions:** Please answer all the following questions thoroughly, attaching additional pages where necessary, so that the reviewers have sufficient information to measure the success of your comprehensive plan implementation. Supporting documents might include: news articles, legal ads, lists of attendees, letters of support or other evidence of local involvement and commitment to successful plan implementation activities in your community. *Total application length, including supporting information and support letters, must not exceed 20 pages. Text areas will expand as needed.*

Applicant government	Crawford County
Mailing address	P.O. Box 1059 Roberta, GA 31078
Telephone	(478) 836-3782
Email	p.kelly@crawfordcountyga.org
Contact person; title	Pat Kelly, County Manager
Application prepared by	Kimberly Lowe, Middle Georgia Regional Commission

I, the undersigned authorized representative of the applicant, certify that to the best of my knowledge the information in this application is true and correct.

Name of authorized official signing; title	Pat Kelly, County Manager
Date	13 May 2016
Signature	

**PRE-REQUISITES**

**A. (1)** We have a good track record of maintaining our Qualified Local Government status and submitting required reports to DCA, including the current Report of Local Government Finances. (To check status, please visit <http://www.georgiaplanning.com/planners/planreview/default.asp>).

QLG status:  yes                      no  
Local government reports:  yes                      no

**A. (2)** We have attained the Minimum Standard for performance as called for in our regional commission's regional comprehensive plan.

yes                      no

For each of the following indicators, fully explain how your community addresses this indicator; identifying specific examples and resulting local successes. (Each indicator will be scored 1, 3 or 5 points, except indicators j. and t. which may score up to 10 points.) Add exhibits and examples as needed to tell your story.

**INDICATOR: GOALS**

**B.** The Goals (or Vision) section of our comprehensive plan is supported by the community and its leadership.

The Joint Comprehensive Plan for Crawford County and the City of Roberta identified the following Community Vision, "The City of Roberta and Crawford County are dedicated to increasing the quality of life for all citizens while maintaining our friendly, small-town, rural lifestyle. Downtown Roberta will evolve into a vital pedestrian, bicycle, and golf cart-friendly community with a healthy mix of retail, services, restaurants, and residences. We are committed to fostering a spirit of communication and cooperation between the governing bodies to achieve our goals: broadening the tax base with environmentally-friendly business and industry, providing more employment options to allow citizens to both live and work within the community; and increase the educated workforce. We aspire to become a place of unity and total community involvement where all citizens are actively engaged in shaping the community's future."

The small-town lifestyle is still very prevalent in Crawford County and the City of Roberta, but the communities have also progressed, with encouraging communication between the governing bodies, with the recent passing of a unification charter in the Georgia General Assembly. Downtown Roberta has become an increasingly walkable community with the construction of a walking trail in 2012 and the continuation of sidewalks connecting the residential areas to

downtown. Steps have been taken to instill more employment opportunities in Crawford County for the available workforce, resulting in the Industrial Park reaching its maximum capacity, inspiring the building of another one. Relationships are also continuing to grow with Central Georgia Technical College Crawford Campus to foster a well-educated labor force. The opportunities that are available for Crawford County have resulted in a much larger community; impacting businesses coming to the area.

**C. The Goals are both ambitious and achievable for the community.**

All of the goals created by the stakeholders have generated a forward thinking community that strives to improve the quality of life for all citizens, (e.g. the boosting of environmental protection and heritage preservation.) The Crawford County Board of Commissioners, Crawford County Historical Society, and the City of Roberta have inspired the protection of numerous historic sites throughout Crawford County, including the preservation of the Francisville Historic Site, Old Knoxville Courthouse restoration, and construction of a wood fired pottery kiln (as seen in the photo to the right) to promote its heritage as an influential part in the growth of Georgia's economy with the production of pottery for stores, breweries, and hospitals throughout the state. Over 50 percent of the action items identified in the 2012-2016

Short-Term Work Program have been complete or have accomplished substantial milestones to ensure their completion. Each goal the community created has been inspirational yet achievable for Crawford County.

**D. The Goals steer local decision-making on a continuous basis.**

The goals are constantly steering the many decisions made by the city and the county, specifically as it relates to the betterment of the community with the passing of the unification charter by the Georgia General Assembly, and the easing of traffic congestion along major roadways. County Commissioners and City Councilmembers instill the furtherance of the community when making decisions and making the best choice based on input from the current Comprehensive Plan.

**E. Consistent progress is being made at achieving the Goals.**

Crawford County is moving forward with the decisions that are made. The projects are presented in a manner to reflect well on the goals that were previously created. Based on the goals and

action items produced during planning, Crawford County officials were able to achieve more than half of them to better the community. Some goals and action items were designed for longer-term reflection of satisfaction instead of short-term goals; therefore, a wide array of goals with varying achievements standards are identified. During planning sessions, the community is constantly thinking of ways to improve Crawford County now and in the future.

#### **INDICATOR: LEADERSHIP**

**F. We have effective planning staff or another suitable arrangement for handling community planning matters.**

Crawford County employs a County Manager and Planning and Zoning Officer to constantly have individuals on staff to assist with day-to-day planning tasks. The County Manager and P&Z Officer are readily accessible and are instrumental in promoting early coordination and providing consultation expertise on projects. They also participate in numerous training opportunities to stay informed of the upcoming planning process avenues.

Crawford County officials request the assistance of the Middle Georgia Regional Commission to facilitate plan preparation, visioning, and goal setting. The outside guidance allows for thorough representation of the communities needs and the adequate representation of projects Crawford County is capable of completing to have the desired community outlook.

**G. We have an active planning commission or similar body to steer local planning decisions.**

The current planning commission is comprised of the Crawford County Board of Commissioners, Crawford County Development Authority Board of Directors, and the Crawford County Planning and Zoning. Each representative presents concerns and opportunities that are not readily visible. The planning commission meets multiple times a year to evaluate key projects and reflect on community input to encourage development of the community.

**H. We have a regular local plan effectiveness evaluation process (such as annual planning retreats of elected leadership).**

Evaluations are performed annually to ensure all measures are taken to clearly address the needs of the community and projects as it relates to additional funding that may be needed in the budget. Each project or event performed throughout the year is compared to the anticipated outcome developed by the comprehensive plan steering committee. Evaluations are known to encompass multiple days of review in Crawford County with elected and appointed officials on-hand. Since the steering committee involves a large amount of community input, it is the best resource to evaluate the county's ability to present projects that the community would like. One particular project that has resulted in a large amount of pressure from the community is the replacement of the bridge over the Flint River/SR 128. During the yearly evaluations the county realized the large amount of influence needed to ensure Georgia Department of Transportation's

completion of the project. The need for additional force would not have been prevalent if the annual evaluations were not completed.

I. All local officials (both elected and appointed) involved in local planning processes have recently attended training in how to use the plan effectively. Please indicate what trainings and the date(s) attended.

All members of the Crawford County Board of Commissioners, except Commissioner Justin Spillers, have attended a variety of ACCG trainings, which is documented in the attached training documents. Commissioner Spillers will attend ACCG training if re-elected; he is currently fulfilling the remainder of Commissioner Dean Fripps' term for District 3, which is set to expire in 2016.

J. Provide up to ten of your best recent examples where the plan steered a key local decision, with pertinent plan references (attach additional sheets as needed).

- Crawford County has received its Work Ready designation, allowing additional avenues to coordinate with Central Georgia Technical College (CGTC) to promote professional development courses which adequately prepare community residents for jobs within the community. CGTC has developed training courses to efficiently prepare the workforce for the jobs that are available in Crawford County. This has proven to be a tremendous prospect for those industries interested in relocating to Crawford County. (*Short-Term Work Program, Economic Development, Item 1*)
- County of Roberta Ordinance Book- The Comprehensive Land Development Resolution for the Incorporated Area addresses concerns identified in the Community Agenda to maintain the small-town atmosphere as it relates to the existing area and future development, along with instilling environmental protection to limit development. Multiple goals were identified to address the range of possibilities for future development. (*Community Agenda, Future Development Map, Development Patterns and Implementation Measures*)
- Establishment of the Crawford Historical Society was very instrumental in promoting the protection of the historic character and traditional development practices for Crawford County. The goal of the society is to collect, preserve, and interpret the buildings, sites, artifacts, and records significant to the community. Having the additional citizens working towards the preservation of the history in Crawford County is excellent because of their vast knowledge of the area and their ability to obtain any additional information that may not be readily known. (*Community Agenda, Future Development, Implementation Measures*)
- Crawford County's efforts to develop another industrial park off Highway 341 and Zenith Mill Road have been ongoing and have reached a barrier with the establishment of infrastructure, specifically water and sewer. The land has been identified and attempts are already underway with the establishment of two companies in the area. In the near future the additional industrial park will be fully developed. (*Short-Term Work Program, Economic Development, Item 5*)

- Connectivity between the downtown area and surrounding residential neighborhoods has become very prevalent with establishment of sidewalk extensions allowing residents to walk from their homes to downtown. The connections allow for exercise, shopping, and community involvement. *(Community Agenda, Future Development, Implementation Measures)*
- The county and city's efforts to promote community pride and protection have become prevalent with the establishment of Keep Roberta/Crawford Beautiful. This affiliation allows for the promotion of aesthetics for the area. Their mission is to encourage community involvement and create a beautiful, healthy environment for all to enjoy. *(Community Agenda, Future Development, Implementation Measures)*
- The newly created EMA-Ordinance is very beneficial to promoting the coordination and cooperation between governments and organizations as it relates to the response to disasters. Its establishment allows for the legal formality of a more thorough organization of personnel and planning activities that are greatly needed for disaster response. Community organizations are able to extend their assistance and services to the Crawford County Emergency Management Agency to quickly address the needs of its citizens. The joint efforts allow Crawford County to become more prepared for situations that could arise. *(Short-Term Work Program, Intergovernmental Coordination, Item 1)*
- In order to accurately address the conservation of open space and encourage the land to be used for parks, trails, and greenways there has been the creation of a walking trail system (as seen in the photo to the right) and memorial park throughout the downtown area of Roberta. The government officials recognized the strong desire of the citizens for a walkable community and the drive to provide recreational opportunities. Many citizens enjoy the walking trail and park on a daily basis. *(Community Agenda, Future Development, Patterns of Development)*
- Crawford County officials recognized the importance of having a strong animal control service with the creation of the Animal Control Ordinance and the forming of partnerships with surrounding counties to provide an animal control task force to respond to situations. The ability to provide animal control for the large number of wild cats and dogs became extremely prevalent in the community and action needed to be taken. *(Community Agenda, Community Issues and Opportunities, Community Facilities and Services)*
- The Community Agenda addressed the underutilization of the 5311 Program (Crawford Transit); Crawford County noticed the need to inspire its use among the community. After the efforts set forth by the county to advertise the 5311 Program it now regularly meets its maximum capacity. There has also become a need for a waiting list for the buses that are available. Along with the growth of the elderly population in Crawford County comes

the need to offer alternative methods of transportation. (*Community Agenda, Community Issues and Opportunities, Transportation System*)

#### INDICATOR: PARTICIPATION

**K.** Our comprehensive plan was prepared with multiple community input opportunities.

The 2006 update was created in a manner to allow for a large amount of community involvement, especially by inviting individuals with very different backgrounds to be a part of the development. Previously, the stakeholder community was comprised of local government officials, private industry partners, educational professionals, and citizens. Multiple meetings were held throughout the process on a monthly basis. Each meeting consisted of information being presented to the community for feedback along with the opportunity to collect any important information they were willing to present. All meetings were open to the public

**L.** The community input received during plan preparation influenced the content of the plan.

All input given throughout the planning process was compiled by the Middle Georgia Regional Commission to formulate the Joint Comprehensive Plan for Crawford County and the City of Roberta. The plan would not exist without the wealth of information provided by the community. Throughout the development process it was constantly emphasized that the plan belongs to the community and only the desired outlook of the community would be constructed.

**M.** Our steering committee that guided development of the plan included local leaders and elected officials.

The Comprehensive Plan steering committee was comprised of local leaders ranging from the County Manager of the Crawford County Board of Commissioners and the City of Roberta Police Department officials to local business owners. It was extremely beneficial to have a broad spectrum of leaders from various community standpoints, along with the public, to influence decisions and present issues in a different light. The Mayor of the City of Roberta and Chairman of the Crawford County Board of Commissioners were able to provide a list of department heads and concerned citizens to include in the planning process and were adamant about the success of the community.

**N.** We have an active, ongoing, outreach process for soliciting input on planning matters from a broad spectrum of the community, including non-traditional populations, and the resulting input is listened to by community leaders.

Crawford County Board of Commissioners are able to easily reach out to the community for reaction and apprehensions to projects needed in the community. The citizens of Crawford County are very passionate about their community and are willing to provide input at any time. Feedback is provided by all age groups, from the elderly population to high school students; results occur when community leaders hear their concerns. Most recently, input was given

relating to extending the hours of the transit system to allow transportation for cancer patients receiving multiple hour-long treatments. Community leaders have heard the concern and are coordinating ways to allow for the extension of hours or to encourage the training of additional drivers to transport the patients. Concerns are expressed during County Commission meetings or any opportunity the Commissioners are available.

**O.** We have active advocates for plan implementation (such as activist citizens, organizations or neighborhood groups) that are listened to by community leaders.

Crawford County has a number of influential citizens that will encourage community leaders to further evaluate situations before deciding on the conclusion to make. The influential citizens are active on many boards like the Development Authority Board of Directors and the Roberta-Crawford County Chamber of Commerce Board. Some are better known for presenting their concerns at Board of Commissioner meetings or simply forwarding pertinent information to their representative. The citizens of Crawford County are very adamant about the community's development.

#### **INDICATOR: IMPLEMENTATION**

**P.** The Work Program section of our comprehensive plan consists primarily of specific action items that make it clear exactly what we intend to do to implement the plan.

The Short-Term Work Program, which was last completed for the 2012-2016 term is very detailed for the types of projects desired to achieve the goals set forth in the 2006 Comprehensive Plan. Any newly elected official would be able to easily understand the outlook for each goal. All action items are specific enough to identify certain tasks, developments, or roads to be implemented or updated like the establishment of a Joint Recreational Facility Board.

**Q.** Our Work Program action items clearly address local needs or goals identified in the plan.

The action items compiled in the Work Program were identified to address a specific topic (like for traffic congestion) by encouraging Georgia Department of Transportation to rebuild major roadway bridges and allow for emergency lanes or resurfacing major highways like U.S Highway 80 that have resulted in extensive road damage due the large amount of traffic. The specific needs of the community are clearly identified in the Work Program.

**R.** We have a good track record of accomplishing most of the action items included in past plan Work Programs.

Out of the action items presented in the 2012-2016 Short-Term Work Program over 50 percent of the projects were completed. Some action items were placed on hold as a result of additional funding required to continue the project or delays out of the community's control, like Georgia Department of Transportation priority. The community also identified action items that would be completed over the course of numerous years to encourage future thinking.

S. Our local capital budget is consistent with, and is designed to implement, the comprehensive plan.

Crawford County's capital budget is consistent with the enactment of the comprehensive plan goals specifically as it relates to special projects that would require the designation of larger than anticipated funding. County funding is set aside for projects like the completion of county-wide water availability along with the possibility of funding from grant opportunities. The additional funds are also designated to act as matching funds for the large projects that could not be completed without the use of grant funds.

T. Provide up to ten of your best recent examples of important projects carried out as a result of the plan, with the specific plan references (attach additional sheets as needed).

1. Replacement of the bridge over Flint River/SR 128 (8 miles north of Reynolds), PI #333205 (State Transportation Improvement Program-STIP). *(Short-Term Work Program, Transportation, Item 2)*
  - *This project is 87 percent complete; a completion date was set by Georgia Department of Transportation for November 29, 2016. Work has been completed to allow normal flow of traffic over the bridge.*
2. Promote the use of Crawford Transit (the 5311 Program) *(Short-Term Work Program, Transportation, Item 1)*
  - *There is constant encouragement and advertisement throughout the community to promote the use of the Crawford Transit system, so much so that the four buses are regularly at maximum capacity.*
3. Promote coordination and cooperation between governments and organizations. *(Short-Term Work Program, Intergovernmental Coordination, Item 1)*
  - *Coordination amongst Crawford County and the City of Roberta to encourage unification efforts have been completed with the Georgia General Assembly passing the unification charter. The ultimate decision of unification will be in the hands of Crawford County citizens in November.*
  - *Coordination efforts have also been established between Crawford County, Fort Valley, Peach County, and the City of Roberta for the development of an Industrial Park along Highway 341. The joining of efforts has increased the willingness of industry to relocate to the area.*
4. Encourage total community involvement *(Short-Term Work Program, Intergovernmental Coordination, Item 2)*
  - *Total community involvement is encouraged by the many cooperative organizations of Crawford County including the Chamber of Commerce, Development Authority, Historical Society, and UGA Cooperative Extension. Most*

*of the efforts include the preservation of the large amount of natural and cultural history along with the rich agricultural influence in the community.*

5. Establish a Joint Recreational Facility Board (*Short-Term Work Program, Community Facilities, Item 1*)

- *The Crawford County Board of Recreation was established in 2013 to assist with the expansion of recreational facilities and allow for an extensive review of potential opportunities.*
- *In 2016, the Board of Recreation requested assistance with the preparation of a Recreation Master Plan. The plan has been drafted and is out for comment from the Board of Recreation Members, local elected officials, and other stakeholders.*

6. Expand County Recreation Facilities at existing complex (i.e. additional baseball fields, youth football field, etc.) (*Short-Term Work Program, Community Facilities, Item 2*)

- *Additional baseball fields were constructed in 2015 (as seen in the photo to the right) and construction of a new football field began in early 2016. These efforts were primarily undertaken with the use of SPLOST funds, labor from the Crawford County Public Works Department, and donations from private sources.*

7. Develop strategies and pursue funding for financing water and wastewater infrastructure in undeveloped areas (*Short-Term Work Program, Community Facilities, Item 3*)

- *Efforts for financing water and wastewater infrastructure have been encouraged with the use of CDBG funds. Crawford County received CDBG funding in 2013 and 2015 to work towards the improvements.*

8. Rehabilitate the Old Knoxville Courthouse to the Secretary of Interiors Standards (*Short-Term Work Program, Natural and Cultural Resources, Item 3*)

- *The joining of many organizations has triggered the greatly needed rehabilitation of the Old Knoxville Courthouse (as seen in the photo to the right). The determination to see the project completed is very prevalent, but extensive work is still needed. The project is on-going as funding becomes available either through county or grant funds.*

9. Develop a strategy for utilizing portions of the Flint River as a venue for recreational use and creation of a 100-acre park (*Short-Term Work Program, Natural and Cultural Resources, Item 6*)
  - *The Crawford County Recreational Master Plan addresses additional uses along the Flint River for recreational and entertainment areas. The plan has been drafted and is out for comment from the Board of Recreation Members, local elected officials, and other stakeholders. It should be in use in the next month.*
10. Advertising home ownership assistance programs, such as Georgia Dream Home Ownership Program, to low-to-moderate income families. (*Short-Term Work Program, Housing, Item 1*)
  - *Programs like the Georgia Dream Homeownership Program are abundantly advertised throughout the community, specifically at the Crawford County Administrative Building, allowing material to be distributed and advertised regularly. Those interested in the program are also encouraged to seek additional information from the Georgia Department of Community Affairs.*

Please attach additional sheets as needed to tell your story. Application should not exceed 20 pages. Application may be electronically transmitted or printed, scanned and emailed to [adriane.wood@dca.ga.gov](mailto:adriane.wood@dca.ga.gov) . For more information, contact Adriane Wood.
