PART I, TOTAL NUMBER OF EMPLOYEES

Government Name

[[Main Menu](#) | [Part I. Total Numbers of Employees](#) | [Part II. Administrative & General Positions](#) | [Part III. Public Safety Positions](#) | [Part IV. Public Works/Solid Waste Positions](#) | [Part V. Elected Officials](#) | [Part VI. Certification](#)]

Important Guidelines

1. Please enter the amount of compensation for various elected officials, even if zero, in the Elected Officials section (Part V). Please do NOT include Elected Officials in the count of Full-time employees at the bottom of this Part 1 section. Though elected officials are active full-time, they are not considered "employees" for this survey.
2. Your government may not employ individuals in each of the positions. The job descriptions provided furnish general descriptions of the positions' duties and are not intended to be comprehensive. Use your best judgment to match your government's positions with the positions on the survey.
3. Only report each job once. If a person in your government performs the duties of more than one of the survey job titles, then report salary information for the survey job title that accounts for the majority of this employee's time. For example, if an employee spends 60% of their time as a City Clerk and 40% of their time as a Cashier, then report the salary under the "City Clerk" position. If you need assistance determining which job description to use, please call (404) 679-4996.
4. In Sections 2,3 and 4, enter position information for full-time positions only. For the purposes of this survey, "full-time" positions are positions that your government considers as full-time and eligible for benefits. Please do not report position information for part-time employees.
5. Enter either the hourly or annual salary depending upon which is most convenient for you. See the sample entries for guidance on how to enter the data onto the form.
6. If a salary range for a position is entered, and a Zero is entered in the Number of Employees column for that position, it means that the position exists at the range indicated but the position is vacant at the time of this survey, and is likely to remain open for 60 days or more.
7. If your government does not have established salary ranges, enter the current incumbent's salary as the minimum and maximum wage. If there are multiple incumbents for a given job title, enter the lowest incumbent's salary as the minimum wage and the highest incumbent's salary as the maximum wage.
8. If your government uses number designations to indicate increasing levels of proficiency/responsibility in certain positions, enter the lowest salary of the lowest grade as the minimum salary and the highest salary of the highest grade as the maximum salary. For example, a government employing persons in a Mechanic 1, Mechanic 2, Mechanic 3, and Mechanic 4 positions, would report the lowest salary for Auto Mechanic 1 as the minimum salary and the highest salary for Auto Mechanic 4 as the maximum salary.

Part I. Total Number of Employees

Please enter the total number of employees employed by the government on January 31, 2014.

Part-time

(Employees your government considers as part-time workers)

Full-time

(Employees your government considers as full-time workers and eligible for benefits)

Non-paid

(Volunteer or non-paid workers serving as employees)
