Ms. Amy M. Moore The Housing Authority of Columbus, Georgia P. O. Box 630 Columbus, Georgia 31902-0630

Re: BTW-Chapman Phase II

Dear Ms. Amy M. Moore:

The subject property, known as BTW-Chapman Phase II, is a proposed affordable multifamily development to be located at 500 5th Avenue in Columbus, Muscogee County, Georgia. The subject property, which consists of the demolition of existing housing authority units and the construction of 106 new revenue-producing units, is proposed to be financed with a combination of housing tax credits and below-market debt. The subject property is a proposed open age community.

The subject property is proposed to consist of 106 revenue-producing units including 1, 2 and 3-bedroom garden apartment units. A total of 31 units are proposed to be income restricted to 50% of AMI; a total of 60 units are proposed to be income restricted to 60% of AMI; a total of 15 units are proposed to be set aside as market rate units; a total of 91 units are proposed to benefit from AAC subsidies; no units are proposed to benefit from HOME financing.

The scope of this assignment consists of a comprehensive market analysis for the subject property. The market study was completed in accordance with National Council for Affordable Housing Market Analyst (NCAHMA) guidelines and the Uniform Standards of Professional Practice (USPAP). The completion of this report involved a site visit, interviews with local property managers, and the collection of market data through discussions with persons knowledgeable of the local real estate market. This report is presented in a summary report format, of which this section is a part.

The purpose of the report is to evaluate market need for the subject property as of the effective date of this report. The function of this report is to assess the marketability of the subject property for equity financing purposes. This report should not be used for any other purposes without the express written permission of Allen & Associates Consulting.

The report has been generated for the benefit of our client The Housing Authority of Columbus, Georgia. Columbia Residential and Georgia DCA are named as additional users of this report. No other person or entity may use the report for any reason whatsoever without our express written permission.

Allen & Associates has not previously conducted a market study for the subject property.

A summary of our findings and conclusions is found in the following pages. The conclusions reported are based on the conditions that exist as of the effective date of this report. These factors are subject to change and may alter, or otherwise affect the findings and conclusions presented in this report.

To the best of our knowledge, this report presents an accurate evaluation of market conditions for the subject property as of the effective date of this report. While the analysis that follows is based upon information obtained from sources believed to be reliable, no guarantee is made of its accuracy.

Feel free to contact us with any questions or comments.

Respectfully submitted: ALLEN & ASSOCIATES CONSULTING

Jeff Carroll

EXECUTIVE SUMMARY

The following is a summary of our key findings and conclusions with respect to the subject property:

Project Description

The subject property, known as BTW-Chapman Phase II, is a proposed affordable multifamily development to be located at 500 5th Avenue in Columbus, Muscogee County, Georgia. The subject property, which consists of the demolition of existing housing authority units and the construction of 106 new revenue-producing units, is proposed to be financed with a combination of housing tax credits and below-market debt. The subject property is a proposed open age community.

The subject property is proposed to consist of 106 revenue-producing units including 1, 2 and 3-bedroom garden apartment units. A total of 31 units are proposed to be income restricted to 50% of AMI; a total of 60 units are proposed to be income restricted to 60% of AMI; a total of 15 units are proposed to be set aside as market rate units; a total of 91 units are proposed to benefit from AAC subsidies; no units are proposed to benefit from HOME financing.

A table showing a summary of the proposed unit configuration for the subject property is found below:

	Proposed Unit Configuration										
			Unit	Income	Rent	HOME	Subs	Total	Gross	Net	
BR	BA	SF	Туре	Limit	Limit	Units	Units	Units	Rent	Rent	
1	1.0	787	Garden/Flat	50%	50%	No	Yes	6	\$465	\$352	
1	1.0	787	Garden/Flat	60%	60%	No	Yes	12	\$678	\$565	
1	1.0	787	Garden/Flat	Mar	Mar	No	No	3	\$739	\$625	
2	2.0	984	Garden/Flat	50%	50%	No	Yes	19	\$494	\$352	
2	2.0	984	Garden/Flat	60%	60%	No	Yes	36	\$792	\$650	
2	2.0	984	Garden/Flat	Mar	Mar	No	No	8	\$896	\$754	
3	2.0	1,300	Garden/Flat	50%	50%	No	Yes	6	\$540	\$352	
3	2.0	1,300	Garden/Flat	60%	60%	No	Yes	12	\$953	\$765	
3	2.0	1,300	Garden/Flat	Mar	Mar	No	No	4	\$1,017	\$844	
Total/A	verage	1,011						106	\$726	\$581	

The subject property is proposed to include electric heat, electric cooking and electric hot water. All utilities - with the exception of trash - are proposed to be paid by the residents. In the table that follows we compare the subject's proposed utility allowances (also known as tenant paid utilities) to the estimated allowances using the HUD Utility Schedule Model:

				Utility All	owances					
BR	BA	SF	Unit Type	Inc Lmt	Rnt Lmt	HOME	Subs	Units	UA	HUD UA
1	1.0	787	Garden/Flat	50% of AMI	50% of AMI	No	Yes	6	\$ 113	\$101
1	1.0	787	Garden/Flat	60% of AMI	60% of AMI	No	Yes	12	\$ 113	\$101
1	1.0	787	Garden/Flat	Market Rate	Market Rate	No	No	3	\$114	\$101
2	2.0	984	Garden/Flat	50% of AMI	50% of AMI	No	Yes	19	\$142	\$ 135
2	2.0	984	Garden/Flat	60% of AMI	60% of AMI	No	Yes	36	\$142	\$ 135
2	2.0	984	Garden/Flat	Market Rate	Market Rate	No	No	8	\$142	\$ 135

Other than a gasoline wholesale operation immediately east of the subject property, we did not observe any nuisances, hazards, detrimental influences or recognized environmental conditions on our inspection of this property. Consequently, we recommend that the sponsor obtain a comprehensive environmental assessment from a qualified professional.

The subject property is located at the intersection of 5th Street and 5th Avenue, 1 block east of Veterans Parkway, 1 block west of 6th Avenue and 1 block north of 4th Street in Columbus, Muscogee County, Georgia. 5th Avenue is a lightly-travelled north-south road carrying a limited volume of traffic and providing access to the subject property; Veterans Parkway is a heavily-travelled north-south road carrying 3,652 vehicles per day; 4th Street is a heavily-travelled east-west road carrying 34,334 vehicles per day. We are not aware of any planned road or infrastructure improvements in the immediate vicinity of the subject property. In our opinion, therefore, accessibility is very good by virtue of the location of the subject property relative to existing streets and thoroughfares.

The subject property is clearly visible from Veterans Parkway as well as 4th Street and is exposed to a significant volume of traffic. Consequently, in our opinion visibility is very good by virtue of the exposure of the subject property to existing driveby traffic volumes.

The subject property is located in downtown Columbus, Goergia. The immediate area consists of a mixture of land uses.

Multifamily in fair condition is located to the north and south of the subject property; a gasoline distribution facility is located to the east; retail in fair condition is located to the west of the subject property. In our opinion, all neighboring land uses - with the exception of the gasoline distribution facility - appear to be complimentary to the proposed use of the subject property. The condition of the neighboring properties appears to be inferior to the subject property.

The subject property has a good location with respect to amenities and services. Columbus Bank and Trust, Piggly Wiggly and Columbus Uptown Pharmacy are all located less than 2 miles away from the subject property; Dollar General is located 2.2 miles away; Saint Francis Hospital is located 3.8 miles away. Public transportation is not located in the immediate area.

A listing of area amenities is summarized in the table found below:

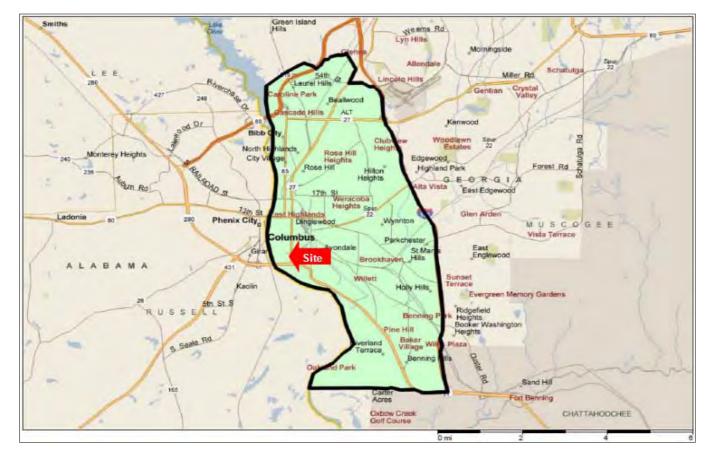

Proximity to Area Amenities										
Name	Amenity	Address	City, State	Miles						
Columbus Bank and Trust	Bank	1000 Veterans Pkwy	Columbus, GA	0.6 mi N						
Dollar General	Shopping	1707 Crawford Rd	Columbus, GA	2.2 mi NW						
Piggly Wiggly	Grocery	910 Brown Ave	Columbus, GA	1.6 mi E						
Saint Francis Hospital	Hospital	2122 Manchester Expy	Columbus, GA	3.8 mi NE						
Columbus Uptown Pharmacy	Pharmacy	1110 13th St # 200	Columbus, GA	1.1 mi NE						

Source: Allen & Associates

Market Area

We defined the primary market area by generating a drive time zone around the subject property and analyzing median rents and average household income levels in the area. We also considered population densities, existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

A map depicting our market area follows:

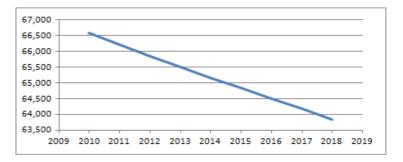

The primary market area includes a population of 65,833 persons and covers a total of 25.3 square miles, making it 5.7 miles across on average.

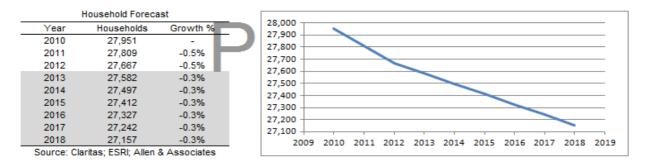

Community Demographic Data

The following table gives population data for the market area since 2010, including a forecast through 2018:

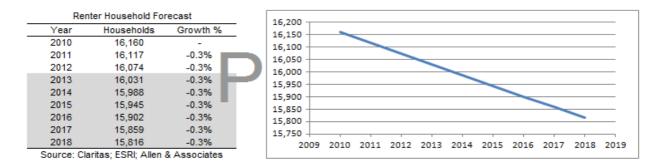

Population Forecast										
Year	Population	Growth %								
2010	66,580	-								
2011	66,206	-0.6%								
2012	65,833	-0.6%								
2013	65,501	-0.5%								
2014	65,170	-0.5%								
2015	64,839	-0.5%								
2016	64,507	-0.5%								
2017	64,176	-0.5%								
2018	63,844	-0.5%								
Source: Cla	ritas: ESRI: Allen	& Associates								

The following table gives household data for the market area since 2010, including a forecast through 2018:

The following table gives renter household data for the market area since 2010, including a forecast through 2018:

The following table gives average household income data for the Market Area since 2000. The data set, which comes from the U.S. Census Bureau and Claritas, includes a forecast through 2017.

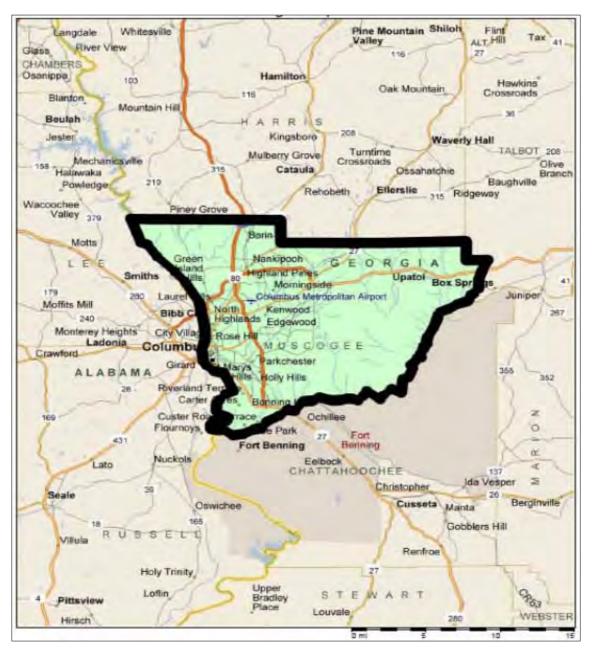

Household Income						
\$35,930						
\$43,496						
\$7,566						
1.6%						
\$43,496						
\$46,181						
\$2,685						
1.2%						

Source: U.S. Census Bureau; Claritas

In our opinion, foreclosed, abandoned and vacant single and multifamily homes are not competitive with the subject property units. Consequently, we do not anticipate an adverse impact from these property types.

Economic Data

In this section we conduct an analysis of the national, state and regional economy. A map depicting the region is found below.

The following table summarizes our economic outlook for this region:

		I	Base Projection				
	2012	2013	2014	2015	2016	2017	2018
Basic Employment	84,813	85,295	85,116	86,313	87,550	88,812	90,099
Establishment Employment	126,925	127,367	127,215	128,259	129,309	130,380	131,473

Unemployment Rate %	9.1%	8.6%	8.1%	7.6%	7.0%	6.5%	6.0%
Vacancy Rate %	11.6%	11.5%	11.4%	11.3%	11.2%	11.1%	11.0%

Source: W&P Economics, Texas A&M Real Estate Center, US Census, Claritas; Allen & Associates

Our base projection assumes Real GDP growth of 1.4% in 2013, 1.7% in 2014 and 2.0% thereafter. Given this projection, we anticipate Establishment Employment for the Region to increase from 127,367 in 2013 to 131,473 in 2018. Over this same time period we anticipate Civilian Employment for the Region to increase from 78,481 to 79,291. The projection would result in an Unemployment Rate for the Region of 8.6% in 2013 and 6.0% in 2018. The projection would result in a Vacancy Rate for the Region of 11.5% in 2013 and 11.0% in 2018.

Project-Specific Affordability and Demand Analysis

In the following tables we present our concluded demand and capture rate estimates for the subject property using the DCA demand methodology:

Unit Type / Rent Type / Income Limit	Tot Units at Market Entry	Vac Units at Market Entry	Gross Demand	Competing Supply	Net Demand	Capture Rate	Absorption Pd (Mos)	
1-Bedroom / Subsidized / 60% of AMI	18	18	2,032	0	2,032	0.9%	1	
1-Bedroom / Market Rate	3	3	1,714	31	1,683	0.2%	1	
2-Bedroom / Subsidized / 60% of AMI	55	55	2,381	1	2,380	2.3%	3	
2-Bedroom / Market Rate	8	8	1,754	92	1,662	0.5%	3	
3-Bedroom / Subsidized / 60% of AMI	18	18	2,616	0	2,616	0.7%	<1	
3-Bedroom / Market Rate	4	4	2,072	7	2,065	0.2%	1	
Project-Wide	Capture Rate - S	Subsidized Units	i	3.1%				
Project-Wide	Capture Rate - I	LIHTC Units			0.0%			
Project-Wide	Capture Rate - I	Market Units		0.6%				
Project-Wide	Project-Wide Capture Rate - All Units							
Project-Wide		3 months						

Competitive Rental Analysis

In conducting our analysis, we obtained information on multifamily properties with 20 or more units in the market area. Our research included conventionally financed multifamily communities as well as properties financed by the local housing authority and the state housing finance agency. Our analysis also included properties financed by and/or subsidized by USDA and/or HUD. Finally, our analysis included properties that are either proposed or currently under construction. The result was a listing of projects with 20 or more units - whether existing, under construction, or proposed - for this area.

After accounting for any unconfirmed properties and any properties that are located outside the defined market area, we arrived at a list of confirmed market area properties. This is the listing of properties upon which our analysis is based. In

our opinion, these properties give a credible picture of market conditions as of the effective date of this report.

Our analysis includes a total of 46 confirmed market area properties consisting of 4,503 units. The occupancy rate for these units currently stands at 91 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

Our research suggests the following occupancy levels for the 724 stabilized elderly units in this market area:

- Subsidized, 96 percent (689 units in survey)
- Restricted, 93 percent (14 units in survey)
- Market Rate, 100 percent (21 units in survey)
- 0-Bedroom, 100 percent (223 units in survey)
- 1-Bedroom, 94 percent (490 units in survey)
- 2-Bedroom, 100 percent (11 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 3,469 stabilized family units in this market area:

- Subsidized, 100 percent (364 units in survey)
- Restricted, 93 percent (1665 units in survey)
- Market Rate, 95 percent (1440 units in survey)
- 0-Bedroom, 80 percent (5 units in survey)
- 1-Bedroom, 96 percent (731 units in survey)
- 2-Bedroom, 95 percent (2086 units in survey)
- 3-Bedroom, 91 percent (586 units in survey)
- 4-Bedroom, 90 percent (61 units in survey)

Our research suggests the following average rent levels for confirmed restricted rent units:

- 0-Bedroom, not applicable
- 1-Bedroom, \$0.64 per square foot
- 2-Bedroom, \$0.50 per square foot
- 3-Bedroom, \$0.46 per square foot
- 4-Bedroom, \$0.53 per square foot

Our research suggests the following average rent levels for confirmed market rate units:

- 0-Bedroom, \$1.40 per square foot
- 1-Bedroom, \$0.74 per square foot
- 2-Bedroom, \$0.63 per square foot
- 3-Bedroom, \$0.63 per square foot
- 4-Bedroom, not applicable

In the following table we present our concluded achievable rents and rent advantage for the subject property:

Achievable Rents										
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Achievable	Proposed	Advantage				
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	Yes	6	\$650	\$352	45.8%				
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	Yes	12	\$650	\$565	13.1%				
1BR-1BA-787sf / Market Rate / Market Rate	No	No	3	\$650	\$625	3.8%				
2BR-2BA-984sf / 50% of AMI / 50% of AMI	No	Yes	19	\$775	\$352	54.6%				
2BR-2BA-984sf / 60% of AMI / 60% of AMI	No	Yes	36	\$775	\$650	16.1%				

2BR-2BA-984sf / Market Rate / Market Rate	No	No	8	\$775	\$754	2.7%
3BR-2BA-1300sf / 50% of AMI / 50% of AMI	No	Yes	6	\$950	\$352	62.9%
3BR-2BA-1300sf / 60% of AMI / 60% of AMI	No	Yes	12	\$950	\$765	19.5%
3BR-2BA-1300sf / Market Rate / Market Rate	No	No	4	\$950	\$844	11.2%
Total / Average			106	\$787	\$581	26.2%

Our analysis suggests an average achievable rent of \$787 for the subject property. This is compared with an average proposed rent of \$581, yielding an achievable rent advantage of 26.2 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

NCAHMA Demand Analysis, Absorption & Stabilization Estimate

In the following tables we present our concluded demand, capture rate, penetration rate and absorption period estimates for the subject property using the NCAHMA demand methodology:

Unit Type / Rent Type / Income Limit	Vac Units at Market Entry	Gross Demand	Vacant & Pipeline Units	Capture Rate Gross	Capture Rate Net	Penetration Rate	Absorption Pd (Mos)
1-Bedroom / Subsidized / 60% of AMI	18	4,600	0	0.4%	0.4%	0.4%	1
1-Bedroom / Market Rate	3	3,880	31	0.1%	0.1%	0.9%	1
2-Bedroom / Subsidized / 60% of AMI	55	5,391	1	1.0%	1.0%	1.0%	3
2-Bedroom / Market Rate	8	3,971	92	0.2%	0.2%	2.5%	3
3-Bedroom / Subsidized / 60% of AMI	18	5,923	0	0.3%	0.3%	0.3%	<1
3-Bedroom / Market Rate	4	4,690	7	0.1%	0.1%	0.2%	1
	Project-Wide Gross Capture Rate			0.8%			
	Project-Wide No	et Capture Ra	ate	0.8%			
	Project-Wide Pe	enetration Ra	ite	1.7%			
	Stabilized Occupancy Project-Wide Absorption Period			96%			
				3 mos			

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Our analysis suggests that the subject property will stabilize at 96 percent occupancy. We estimate 3 months of absorption and an average absorption rate of 34.8 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

Absorption rates for multifamily properties depend on a variety of factors: (1) The competitive environment in which the property resides; (2) The pricing of the subject property units relative to competing units, (3) The presence of rent or income restrictions at the subject property; and (4) The availability of any rent concessions or rental assistance at the subject property. Subsidized properties normally lease up at a rate of 15-20 units per month. Unsubsidized properties with rent and income restrictions tyically fill at a rate of 5-10 units per month. Market rate properties normally lease up at a rate of 10-15 units per month.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

Overall Conclusion

In conclusion, the subject property appears to be feasible from a market standpoint. Because of the demonstrated depth of demand in this area, we do not believe the construction of this property will have an adverse impact on existing projects in the market area. The units appears to be priced appropriately and we anticipate a rapid lease-up after construction.

Key risks and market factors that may impact the construction, lease up and operation of the subject property are associated with the continued uncertainty in the US economy.

PROJECT OVERVIEW

Project Description

The subject property, known as BTW-Chapman Phase II, is a proposed affordable multifamily development to be located at 500 5th Avenue in Columbus, Muscogee County, Georgia. The subject property, which consists of the demolition of existing housing authority units and the construction of 106 new revenue-producing units, is proposed to be financed with a combination of housing tax credits and below-market debt. The subject property is a proposed open age community.

Construction and Lease-Up Schedule

We anticipate a 12-month construction period for this project. Assuming a December 1, 2014 closing, this yields a date of completion of December 1, 2015. Our demand analysis (found later in this report) suggests a 3-month absorption period. This yields a date of stabilization of March 1, 2016.

Unit Configuration

The subject property is proposed to consist of 106 revenue-producing units including 1, 2 and 3-bedroom garden apartment units. A total of 31 units are proposed to be income restricted to 50% of AMI; a total of 60 units are proposed to be income restricted to 60% of AMI; a total of 15 units are proposed to be set aside as market rate units; a total of 91 units are proposed to benefit from AAC subsidies; no units are proposed to benefit from HOME financing.

Site Plan

IMPROVEMENT DESCRIPTION & ANALYSIS

Our improvement analysis includes an evaluation of the following factors with respect to the subject property: (1) Building Features; (2) Unit Features; (3) Project Amenities, (4) Utility Configuration; and (5) Useful Life Analysis.

Building Features

Building plans were not provided to the analyst for review. Building plans are necessary to identify existing and/or proposed improvements and to analyze the functional utility of the subject property. Instead, we interviewed the sponsor to better understand the proposed building features. A discussion of the development's building features is found below.

Building Configuration

The development is proposed to consist of 106 units in 19 two-story residential buildings and 1 non residential building. The development is proposed to include approximately 107,119 square feet of net rentable area and 123,187 square feet of gross building area.

Foundation

The development is proposed to include slab on grade foundations.

Construction / Exterior Walls / Floor & Ceiling Assemblies / Roof Assemblies

The subject property is proposed to consist of wood frame construction surfaced with plywood & insulation. Exterior walls are proposed to consist of brick and cementitous siding. Floor & ceiling assmeblies are preoposed to consist of wood joists & plywood subfloors. Roof assemblies are proposed to consist of wood trusses & plywood sheathing.

Windows & Exterior Doors

Double hung vinyl double pane windows and steel clad insulated 6-panel doors are proposed for the subject property.

Roof Covering / Roof Type

The subject property is proposed to include gabled roofs covered with asphalt shingles.

Domestic Water / Wastewater / Hot Water

Domestic water piping is proposed to be constructed of PVC piping, fittings, couplings and joints. Wastewater lines are proposed to consist of PVC piping, fittings, couplings and joints. Potable hot water is proposed to be supplied via individual electric hot water heaters.

Electrical Service / Wiring / Lighting

The buildings are proposed to receive electrical power from exterior pad-mounted transformers. Electrical service to units is proposed to consist of 120V/240V AC with 100 amps available via copper wiring for each panel. Properly grounded, three-prong outlets are proposed in each dwelling unit. Outlets located in the wet areas are proposed to include Ground Fault Circuit Interrupter (GFCI) outlets. Surface-mounted fluorescent and incandescent lighting fixtures are proposed in the living areas and the bathrooms.

Fire Suppression

The subject property is proposed to be equipped with an NFPA-13 fully automatic fire suppression (sprinkler) system. Hard-wired smoke detectors with battery backup are proposed in each bedroom area.

Unit Features

Unit plans for the subject property were not provided to the analyst for review. Unit plans are necessary to identify existing and/or proposed improvements and to analyze the functional utility of the subject property units. Instead, we interviewed the sponsor to better understand the proposed unit features . A discussion of the development's unit features is found below.

Walls / Ceilings / Interior Doors

Subject property units are proposed to include 9' ceilings, painted gypsum wallboard and ceilings, and six panel molded doors.

Floor Covering

Floor covering is proposed to consist of engineered hardwood in the entryways, kitchens and living areas. Bathrooms are proposed to consist of ceramic tile. Bedrooms are proposed to include wall-to-wall carpeting.

Kitchens

Composite wood cabinets and laminated countertops are proposed in the kitchens, along with stainless steel sinks.

Bathrooms

Composite wood vanities and laminated countertops are proposed in the bathrooms, along with porcelain sinks and toilets. Fiberglas tubs & surrounds, together with bathroom exhaust fans, are proposed in the bathrooms.

Project Amenities

A discussion of the development's project amenities is found below.

Site & Common Area Amenities

The subject property is proposed to include a BBQ area, business/computer center, community center, fitness center, gazebo/patio, herb garden, picnic area and playground.

Unit Amenities

The subject property is proposed to include blinds, ceiling fans, carpeting, patio/balconies and extra storage.

Kitchen Amenities

The subject property is proposed to include stoves, refrigerators, disposals, dishwashers and microwaves.

Air Conditioning

Individual exterior-mounted compressors & closet-mounted air handlers are proposed for the subject property.

Heat

Individual interior-mounted electric heat & closet-mounted air handlers are proposed for the subject property.

Parking

Open parking is found at the subject property.

Laundry

The subject property is proposed to include a central laundry and washer/dryer hookups in each unit.

Security

The subject property is proposed to include monitoring.

Services

No additional services are proposed for the subject property.

Tables comparing the subject property's amenities to that of the most comparable properties are found at the end of this section.

Utility Configuration

The subject property is proposed to include electric heat, electric cooking and electric hot water. All utilities - with the exception of trash - are proposed to be paid by the residents. In the table that follows we compare the subject's proposed utility allowances (also known as tenant paid utilities) to the estimated allowances using the HUD Utility Schedule Model:

				Utility Al	lowances					
BR	BA	SF	Unit Type	Inc Lmt	Rnt Lmt	HOME	Subs	Units	UA	HUD UA
1	1.0	787	Garden/Flat	50% of AMI	50% of AMI	No	Yes	6	\$113	\$101

3	2.0	1,300	Garden/Flat	60% of AMI	60% of AMI	No	Yes	12	\$188	\$166
3	2.0	1,300	Garden/Flat	Market Rate	Market Rate	No	No	4	\$173	\$166
tal/Ave	rade							106	\$145	\$135

Current federal regulations require that USDA-RD or the local housing authority approve proposed utility allowances for specific properties. Federal regulations permit the use of the HUD Utility Schedule model for purposes of establishing utility allowances for other properties. The HUD utility allowances are a good measure of the anticipated energy costs for a given property. Our analysis suggests that the proposed utility allowances are higher than those established using the HUD model.

Tables comparing the subject property's utility configuration to that of the most comparable properties are found at the end of this section. Outputs from the HUD Utility Schedule Model are also found there.

Useful Life Analysis

We were provided with a development budget suggesting \$15,702,330 or \$148,135 per unit for the subject property. We normally see development budgets of \$100,000 to \$150,000 per unit for projects such as this.

We anticipate a useful life of 45-50 years for this development, assuming that appropriate replacement reserves are established for this property.

In the course of completing this study, we rated the condition of the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). We also evaluated the actual and effective ages of the subject and select comparables. A table summarizing our findings is found below:

	Actual Age Effective Age Condition

SITE DESCRIPTION & ANALYSIS

Our assessment of the site included an evaluation of the following factors with respect to the subject property: (1) Survey; (2) Site Plan; (3) Nuisances, Hazards, Detrimental Influences & Environmental; (4) Topography; (5) Flood Zone; (6) Difficult to Develop Area Status; (7) Qualified Census Tract Status; and (8) Traffic Patterns, Access & Visibility.

Survey

A survey for the subject property was provided to the analyst for review. Current surveys should be evaluated to ascertain whether there are any easements encumbering the subject property. Our review/inspection suggested that the site is currently encumbered by standard utility easements that do not adversely affect its marketability and that the site is serviced by municipal utilities.

Site Plan

A site plan for the subject property was provided to the analyst for review. Site plans are necessary to analyze the site improvements, parking configuration, internal traffic flow, location of building improvements and landscaping improvements for the subject property. Our review did not identify any problem areas with respect to the subject property. A summary of the development's site features is found below.

Acres / Lot Shape / Frontage

The subject property includes a rectangular-shaped parcel including approximately 8.03 acres and approximately 3500 feet of road frontage.

<u>Zoning</u>

According to the local zoning administrator, the subject property is zoned RMF2 Multifamily. The subject property is an approved, legal, conforming use under this classification.

Parking / Streets / Curbs / Sidewalks

A total of 212 parking spaces are proposed for this development (202 regular / 10 accessible / 2.00 spaces per unit). Privately-owned asphalt parking areas along with privately-owned concrete curbs and sidewalks are proposed for the subject property. We normally see 1.5 to 2.0 spaces per unit for projects like this. Given the fact that public transportation is located in the immediate area, parking appears adequate for the subject property.

Dumpsters / Dumpster Enclosures

Two publicly-owned compactors along with privately-owned wood enclosures are proposed for the subject property.

Landscaping / Perimeter Fence / Retaining Walls / Entry Sign

Landscaping is proposed to include trees, shrubs and lawns. Perimeter fences are not proposed for this development. Retaining walls are not proposed for the subject property. One lighted entry sign is proposed for this development.

Stormwater Management / Site Lighting / Water Service / Wastewater Service

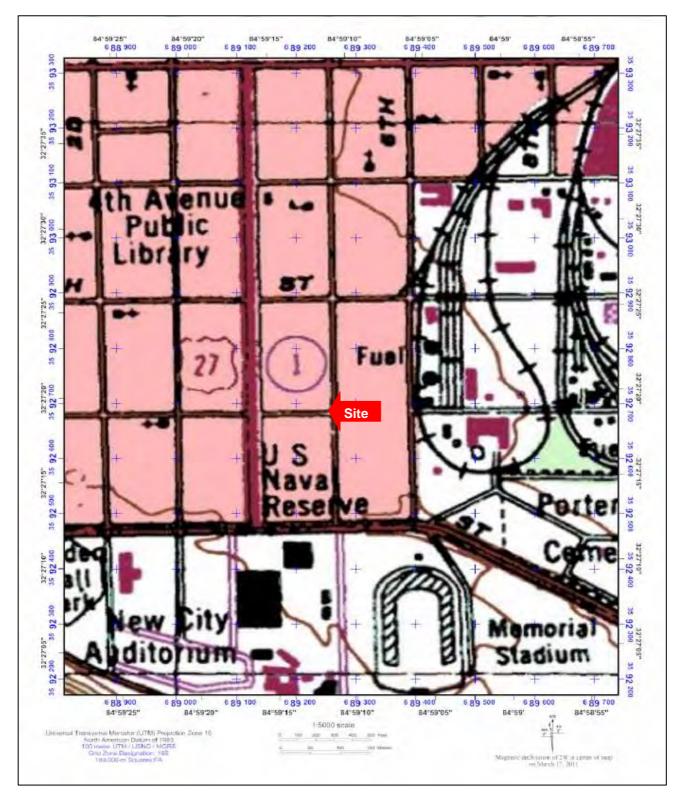

Stormwater management is proposed to consist of catch basins and concrete pipe connecting to a public system. Site lighting is proposed to consist of publicly-owned HID poles. Domestic water service to buildings is proposed to consist of ductile iron pipe connecting to a public system. Wastewater service to buildings is proposed to consist of PVC pipe connecting to a public system.

Nuisances, Hazards, Detrimental Influences & Environmental

Other than a gasoline wholesale operation immediately east of the subject property, we did not observe any nuisances, hazards, detrimental influences or recognized environmental conditions on our inspection of this property. Consequently, we recommend that the sponsor obtain a comprehensive environmental assessment from a qualified professional.

Topography

The USGS map showing the topography of the subject property and surrounding area is found below:

The topographic map shows that the site is relatively flat and drains to adjacent properties to the north. In our opinion, there do not appear to be any topographic issues with respect to the subject property.

Flood Zone

The FEMA map showing the location of the subject property relative to nearby areas prone to flooding (the 100-year flood plain is identified in yellow) is found below:

FloodIn				CoreLo	3.0
Orig	FloodInsights Latitude: 32,455836 L inal Input Address: Latitude:	ongitude:	-84.986283	83

Colorent Designer Colorent Col	and pilling and				
The second secon	An A Provide P				

According to FEMA map number 1351580055F dated September 05, 2007, the subject property is located in Zone X500. This is an area that is identified as being located outside - but near - the 100-year flood zone.

Difficult to Develop Area Status

The federal government has produced a listing of Difficult to Develop Areas throughout the United States that qualify for special funding under various state and federal programs. A DDA listing follows:

Ben Hill County	Gilmer County	Glascock County	Gordon County
Grady County	Hancock County	Lumpkin County	Mitchell County
Polk County	Rabun County	Stephens County	Sumter County
Talbot County	Troup County	White County	

The subject proprterty is located in the Muscogee County, suggesting that it is not located in a Difficult to Develop Area. Consequently, the subject property does not appear to qualify for special DDA funding under state and federal programs.

Qualified Census Tract Status

The federal government has identified census tracts throughout the United States that include high concentrations of low-income households and substandard housing units. These areas, known as Qualified Census Tracts, qualify for special funding under various state and federal programs. A listing of Qualified Census Tracts in the immediate vicinity of the subject property follows:

TRACT	TRACT	TRACT	TRACT	TRACT	TRACT	TRACT	TRACT	TRACT	TRACT	TRACT	TRACT
3.00	14.00	16.00	20.00	22.00	24.00	25.00	27.00	28.00	30.00	32.00	33.01
33.02	34.00	111,00	112.00	114.00	115.00						

The subject property is located in Census Tract 25.00, suggesting that it is located in a Qualified Census Tract. Consequently, the subject property does appear to qualify for special QCT funding under state and federal programs.

Traffic Patterns, Access & Visibility

A traffic map identifying the subject property is found below:

Access

The subject property is located at the intersection of 5th Street and 5th Avenue, 1 block east of Veterans Parkway, 1 block west of 6th Avenue and 1 block north of 4th Street in Columbus, Muscogee County, Georgia. 5th Avenue is a lightly-travelled north-south road carrying a limited volume of traffic and providing access to the subject property; Veterans Parkway is a heavily-travelled north-south road carrying 17,548 vehicles per day; 6th Avenue is a moderately-travelled north-south road carrying 3,652 vehicles per day; 4th Street is a heavily-travelled east-west road carrying 34,334 vehicles per day. We are not aware of any planned road or infrastructure improvements in the immediate vicinity of the subject property. In our opinion, therefore, accessibility is very good by virtue of the location of the subject property relative to existing streets and thoroughfares.

Visibility

The subject property is clearly visible from Veterans Parkway as well as 4th Street and is exposed to a significant volume of traffic. Consequently, in our opinion visibility is very good by virtue of the exposure of the subject property to existing driveby traffic volumes.

In the course of completing this study, we rated the access and visibility for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). A table summarizing our findings is found below:

	Access & Visibility

NEIGHBORHOOD DESCRIPTION & ANALYSIS

Neighborhood

Our assessment of the neighborhood includes an evaluation of the following factors with respect to the subject property: (1) Life Cycle; (2) Surrounding Properties; (3) Crime; (4) Schools; and (5) Proximity to Employment.

Life Cycle

Neighborhoods are sometimes thought to evolve through four distinct stages:

- Growth A period during which the area gains public favor and acceptance.
- Stability A period of equilibrium without marked gains or loses.
- Decline A period of diminishing demand.
- Revitalization A period of renewal, redevelopment, modernization, and increasing demand.

Based on our evaluation of the neighborhood, the subject property is located in an urban area that appears to be in the stability stage of its life cycle. Modest population declines (0.5%) are anticipated for the next several years.

Surrounding Properties

The subject property is located in downtown Columbus, Goergia. The immediate area consists of a mixture of land uses.

Multifamily in fair condition is located to the north and south of the subject property; a gasoline distribution facility is located to the east; retail in fair condition is located to the west of the subject property. In our opinion, all neighboring land uses - with the exception of the gasoline distribution facility - appear to be complimentary to the proposed use of the subject property. The condition of the neighboring properties appears to be inferior to the subject property.

Surrounding property uses are summarized in the table found below:

Surrounding Properties				
Direction	Use	Condition		
North	Multifamily	Fair		
South	Multifamily	Fair		
East	Gasoline Distribution Facility	Fair		
West	Retail	Fair		

Source: Allen & Associates

Multifamily to the North

Multifamily to the South

Retail to the West

<u>Crime</u>

Claritas maintains crime rate data at the census tract level throughout the United States. A table showing crime rates for the area is found below:

Crime Rates					
	Nation	State	Region	Market	Nhood
Personal Crime Rate	2.4%	2.0%	3.0%	4.8%	6.9%
Property Crime Rate	2.4%	2.4%	4.6%	8.8%	9.5%
	Source: Claritas				

Personal crimes include offenses such as rape, murder, robbery and assault. According to Claritas, the personal crime rate in the vicinity of the subject property is 6.9 percent. This is compared with market area, regional, state and national personal crime rates of 4.8, 3.0, 2.0 and 2.4 percent, respectively.

Property crimes include offenses such as burglary, larceny and theft. According to Claritas, the property crime rate in the vicinity of the subject property is 9.5 percent. This is compared with market area, regional, state and national property crime rates of 8.8, 4.6, 2.4 and 2.4 percent, respectively.

Please note: The crime statistics presented above are historical area-wide figures. These statistics make no consideration for changing demographics or the implementation of an affirmative crime prevention program at the subject property.

Schools

Claritas maintains educational attainment data at the census tract level throughout the United States. A table showing educational attainment data for the area is found below:

Educational Attainment					
	Nation	State	Region	Market	Nhood
Completed less than 9th grade	7.6%	7.6%	7.1%	11.5%	21.7%
Completed grades 9-12, no diploma	12.0%	13.8%	14.2%	21.4%	32.0%
Completed high school	28.6%	28.7%	28.1%	29.7%	22.6%
Completed some college	21.1%	20.4%	24.0%	19.3%	14.9%
Associate's degree	6.3%	5.2%	6.4%	4.4%	2.8%
Bachelor's degree	15.5%	16.0%	12.3%	8.7%	5.2%
Graduate or professional degree	8.9%	8.3%	8.0%	5.1%	0.8%
Total	100.0%	100.0%	100.0%	100.0%	100.0%
Less than high school	19.6%	21.4%	21.3%	32.9%	53.7%
High school or more	80.4%	78.6%	78.7%	67.1%	46.3%
Bachelor's degree or more	24.4%	24.3%	20.3%	13.8%	6.0%

Source: Claritas

According to Claritas, educational attainment in the vicinity of the subject property is 46.3 percent. This is compared with market area, regional, state and national high school graduation rates of 67.1, 78.7, 78.6 and 80.4 percent, respectively.

Proximity to Employment

The U.S. Census Bureau carries commuting pattern data at the census tract level throughout the United States. A table showing typical commute times for the area is found below:

	Commute to Work				
	Nation	State	Region	Market	Nhood
Less than 5 minutes	3.3%	2.4%	3.5%	2.9%	2.1%
Less than 15 minutes	28.4%	24.5%	34.8%	36.3%	33.6%
Less than 30 minutes	63.4%	58.8%	82.5%	81.0%	72.7%
Less than 45 minutes	81.9%	79.0%	91.8%	90.3%	80.8%
More than 45 minutes	14.9%	18.1%	6.4%	8.0%	12.6%
Worked at home	3.3%	2.8%	1.8%	1.7%	6.6%
Average Commute Time	23.7	25.3	19.9	20.1	20.3
Vehicles per household	1.70	1.80	1.58	1.26	0.46
	Source: U.S. Census				

According to the U.S. Census Bureau, the typical commute time for employees in the vicinity of the subject property is 20.3 minutes. This is compared with market area, region, state and national commute times of 20.1, 19.9, 25.3, and 23.7 minutes, respectively.

Our research also suggests that the average number of vehicles per household in the vicinity of the subject property is 0.46. This is compared with market area, region, state and national figures of 1.26, 1.58, 1.80, and 1.70, respectively.

Tables comparing select demographics for the subject property's neighborhood to that of the most comparable properties are found at the end of this section.

Proximity to Area Amenities

The subject property has a good location with respect to amenities and services. Columbus Bank and Trust, Piggly Wiggly and Columbus Uptown Pharmacy are all located less than 2 miles away from the subject property; Dollar General is located 2.2 miles away; Saint Francis Hospital is located 3.8 miles away. Public transportation is not located in the immediate area.

A listing of area amenities is summarized in the table found below:

Proximity to Area Amenities				
Name	Amenity	Address	City, State	Miles
Columbus Bank and Trust	Bank	1000 Veterans Pkwy	Columbus, GA	0.6 mi N
Dollar General	Shopping	1707 Crawford Rd	Columbus, GA	2.2 mi NW
Piggly Wiggly	Grocery	910 Brown Ave	Columbus, GA	1.6 mi E
Saint Francis Hospital	Hospital	2122 Manchester Expy	Columbus, GA	3.8 mi NE
Columbus Uptown Pharmacy	Pharmacy	1110 13th St # 200	Columbus, GA	1.1 mi NE

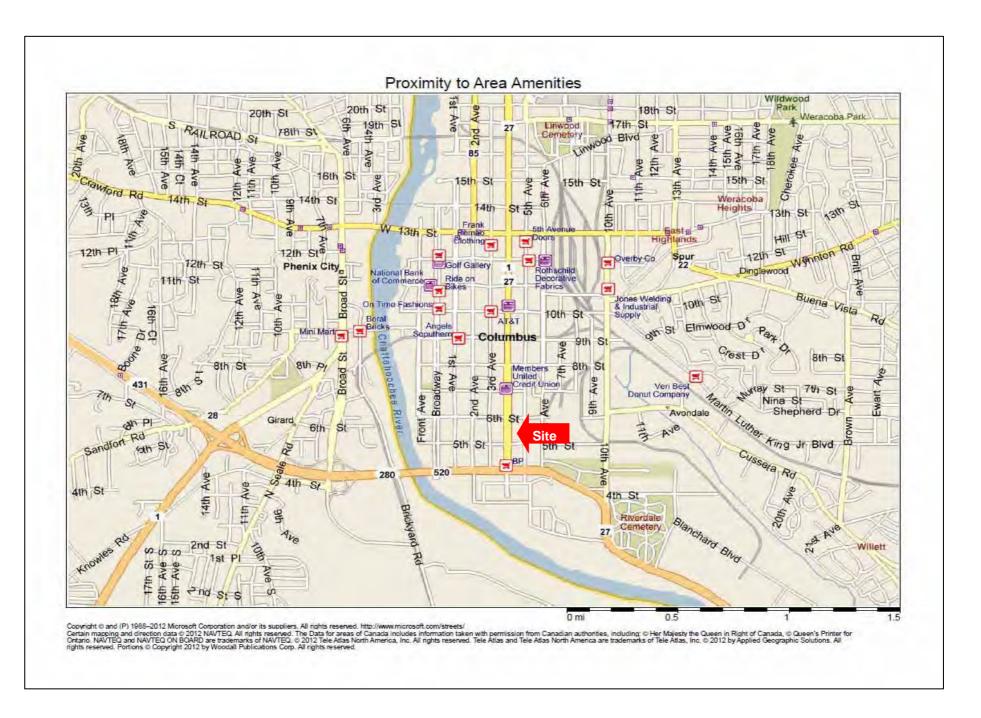

Source: Allen & Associates

The map found in the following pages gives a summary of the site's location relative to banks, shopping, grocery stores, hospitals, and pharmacies.

In the course of completing this study, we rated the proximity to area amenities for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). The following table summarizes our findings:

Proximity to Area Amenities					
Key	Project Name	Rating	Rank

MARKET AREA

Overview

Market areas are influenced by a variety of interrelated factors. These factors include site location, economic, and demographic characteristics (tenure, income, rent levels, etc.), local transportation patterns, physical boundaries (rivers, streams, topography, etc.), census geographies, and the location of comparable and/or potentially competing communities.

In areas where the county seat is the largest city, centrally located, and draws from the entire county, the county may be the market area. In the case where there are potentially competing communities in one county, the market area may be part of the county. In fact, the market area could include portions of adjacent counties. In this case, a combination of county subdivisions may be used to define the market area. In urban or suburban areas, the market area will be adjacent to the site extending to all locations of similar character with residents or potential residents likely to be interested in the project. In this case, county subdivisions, townships, or a combination of census tracts may be used to define the market area.

Allen & Associates recently conducted a series of property management interviews to better understand market areas and resident moving patterns for multifamily properties. Our study suggested that markets may be classified into the following general categories: urban, suburban and rural. Renters in urban markets are typically willing to move 5 to 10 minutes when looking for a new apartment. Our research also shows that renters in suburban markets are normally willing to move 10 to 15 minutes when looking for a new place to live. Renters in rural markets are typically willing to move 15 to 20 minutes when looking for a new apartment. We considered these general guidelines in our evaluation of the subject property.

Our study suggested that secondary market areas were generally a function of whether the proposed development was family or elderly. Our research suggested that secondary market demand for family properties ranged from 10 to 30 percent. Secondary market demand for elderly properties ranged from 10 to 50 percent. Although seniors move less frequently than younger renters, they are often willing to move longer distances when looking for housing. We considered these general secondary market guidelines in our evaluation of the subject property.

Our primary and secondary market area definitions are found below.

Primary Market Area

We defined the primary market area by generating a drive time zone around the subject property and analyzing median rents and average household income levels in the area. We also considered population densities, existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

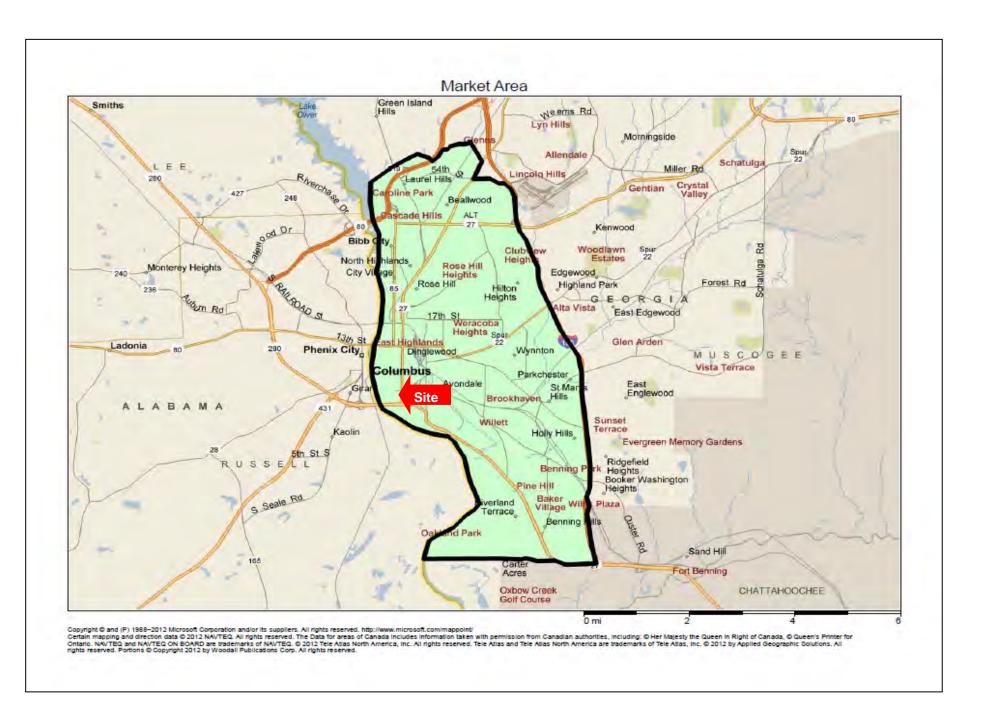

The primary market area includes a population of 65,833 persons and covers a total of 25.3 square miles, making it 5.7 miles across on average.

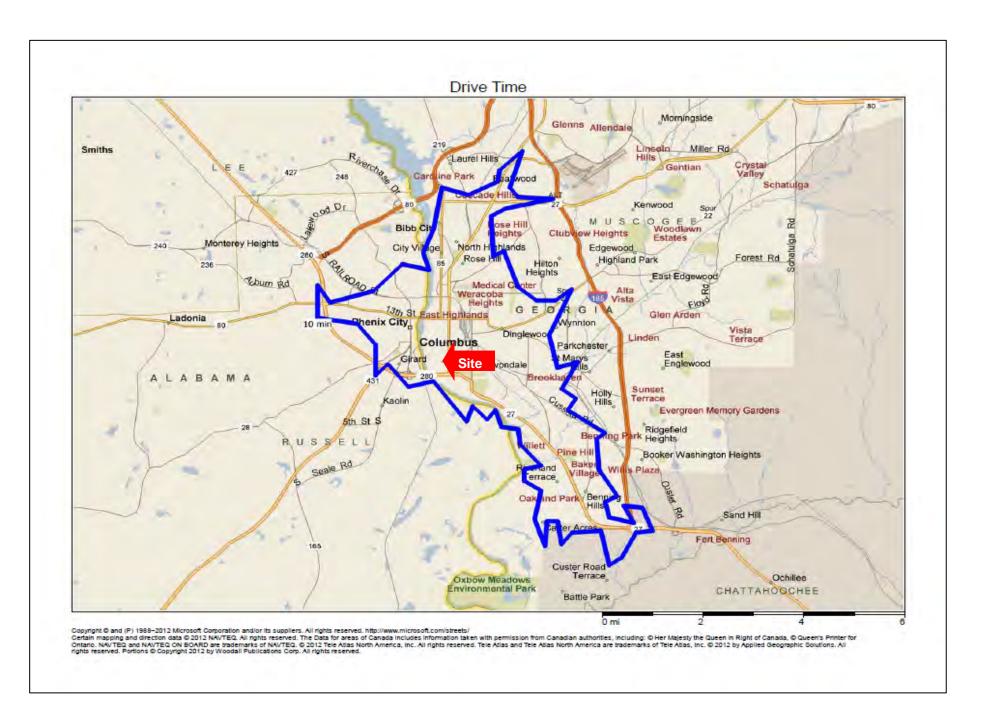

Secondary Market Area

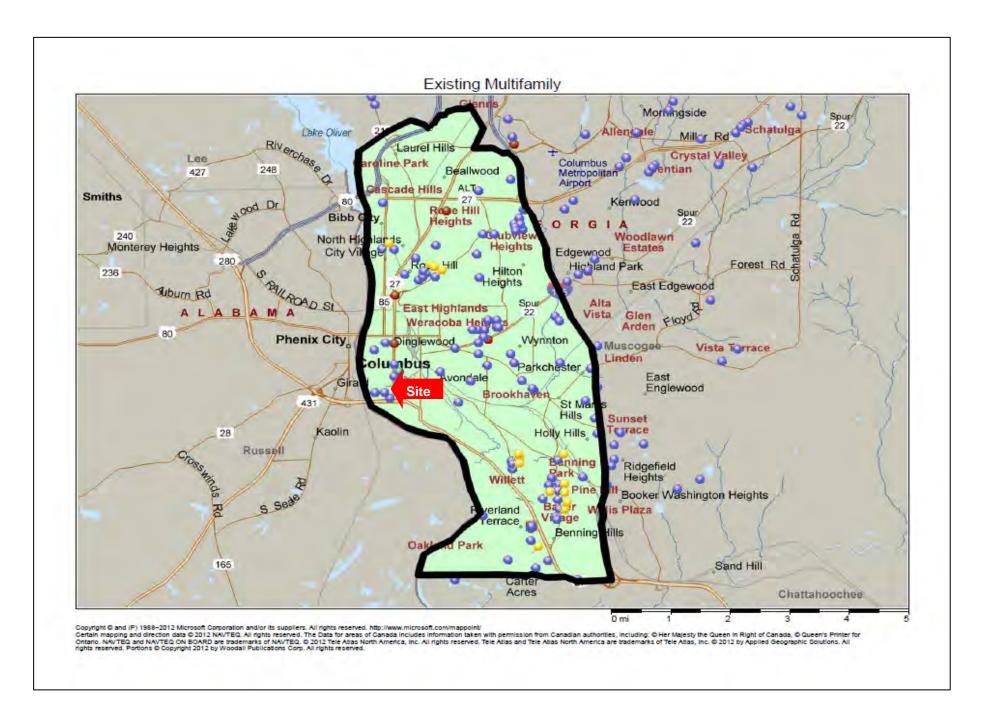

We also estimate that up to 20 percent of multifamily demand will come from areas outside of the primary market area.

Market Area Map

Market area, drive time and existing multifamily maps depicting the location of the subject property are presented in the following pages.

ECONOMIC OUTLOOK

In this section we conduct an overview of the local and national economy. We begin our outlook for the US economy.

US Economic Outlook

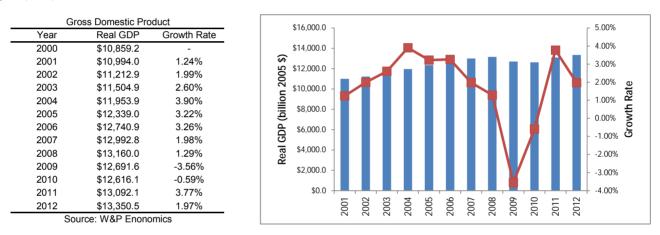

We anticipate sluggish economic growth for the United States the next several years. Although robust growth does not appear to be on the horizon, we do not anticipate a recession in the immediate future, either. In the discussion below we develop a forecast of the US Economy through 2018.

Our evaluation begins with a Real Gross Domestic Product (Real GDP) forecast for the nation. We use this projection, in turn, to drive employment and unemployment forecasts for the United States.

Real Gross Domestic Product

Real GDP is a measure of economic output in constant dollars. Increases in Real GDP reflect growth in the economic base as well as increases in productivity.

The table and graph below show Real GDP for the United States since 2000. The data set comes from the Bureau of Economic Analysis (BEA) via Woods & Pool Economics.

Real GDP grew from \$10.859 trillion in 2000 to \$13.160 trillion in 2008, before dropping 3.56% to \$12.692 trillion in 2009. Real GDP dipped another 0.59% to \$12.616 trillion in 2010. Since then Real GDP has grown to \$13.351 trillion.

Forecasts for Real GDP growth vary. Woods & Poole Economics (W&P) projects 1.97% growth through 2018. The Congressional Budget Office (CBO) projects 1.40% growth in 2013, followed by 3.4% percent growth in 2014, dropping off to 2.25% growth in 2017. Finally, eForecasts (eFC) projects 1.40% growth in 2013, followed by 1.00% percent growth in 2014, increasing to 2.00% growth in 2015 as shown below.

	Real GDP Growth Forecasts									
Year	W&P	CBO	eFC	Concluded						
2012	1.97%	1.97%	1.97%	1.97%						
2013	1.97%	1.40%	1.40%	1.40%						
2014	1.97%	3.40%	1.00%	1.70%						
2015	1.97%	3.02%	2.00%	2.00%						
2016	1.97%	2.64%	2.00%	2.00%						
2017	1.97%	2.25%	2.00%	2.00%						
2018	1.97%	2.25%	2.00%	2.00%						

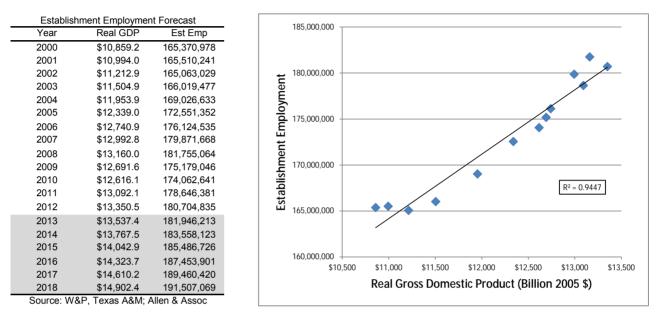

Source: W&P Economics, Congressional Budget Office; eForecasts

The CBO has a history of underestimating the cost of government programs and overestimating tax revenues. Consequently, we discount their projection. W&P appears to overestimate the 2013 growth forecast, flat lining it thereafter. Consequently, we discount their projection. The eFC forecast is more conservative than the other two, but seems to reflect what we are seeing in the news. Taking all of this into consideration, we conclude 1.40% growth in 2013, followed by 1.70% percent growth in 2014, increasing to 2.00% growth in 2015 and thereafter. We refer to this as our "base projection" in the discussion that follows.

Establishment Employment

The Bureau of Labor Statistics (BLS) tracks employment two different ways: (1) Establishment Employment (sometimes referred to as At-Place Employment) which consists of a survey of employers in a specific geographic area, regardless of where the employees at the surveyed establishment actually live; and (2) Civilian Employment (sometimes referred to as Resident Employment) which consists of a survey of households in a specific geographic area, regardless of where the surveyed participants actually work. We begin our analysis with Establishment Employment.

The table and graph below show Establishment Employment and Real GDP for the United States since 2000. The data set comes from the Bureau of Economic Analysis (BEA) and the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Establishment Employment grew from 165.4 million in 2000 to 181.8 million in 2008, before dropping 3.62% to 175.2 million in 2009. Establishment Employment dipped another 0.62% to 174.1 million in 2010. Since then it has grown to 180.7 million.

The accompanying graph illustrates the relationship between Establishment Employment and Real GDP. The two measures are highly correlated; increases in Real GDP result in proportional increases in Establishment Employment. We used historic data to develop a statistical relationship between the two variables. Applying our base projection to Real GDP (discussed previously) and utilizing the statistical relationship between GDP and employment yielded our base projection for Establishment Employment. Our base projection shows Real GDP growing from \$13.351 trillion in 2012 to \$14.902 trillion in 2018, or 11.61 percent. This, in turn, will result in Establishment Employment growing from 180.7 million to 191.5 million, or 5.98 percent over this time period.

Employment by Industry

The Bureau of Labor Statistics (BLS) tracks Establishment Employment by major industry. In the table below we present the breakdown for 2000 and 2012. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Establishment Employment									
Industry	2007	% Growth	2012	% of Total	Rank				
Farm Employment	2,663,000	-0.3%	2,655,485	1.5%	18

Source: W&P Economics

The data suggests that Health Care and Social Assistance is the largest employment category accounting for 11.7% of total US employment. State and Local Government is the second largest category accounting for 11.5% of total employment. Retail Trade is the third largest category accounting for 10.3% of total employment. Accommodation and Food Services is the fourth largest category accounting for 7.0% of total employment. Professional and Technical Services is the fifth largest category accounting for 6.9% of total employment.

The data also suggests that while Establishment Employment grew 0.5% between 2007 and 2012, Manufacturing Employment decreased 14.3% from 14.5 million to 12.4 million. This troubling trend has been underway for the past couple of decades and is driven by globalization as well as US corporate tax rates and regulations imposed on US manufacturers. This is a trend worth watching: Manufacturing Employment is the backbone of any nation's economy.

Earnings by Industry

The Bureau of Labor Statistics (BLS) tracks Average Earnings by major industry. In the table below we present the breakdown for 2012. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Average Earnings							
Industry	Earnings	Rank					
Farm Employment	\$27,123	19					
Forestry, Fishing, Related Activities And Other Employment	\$27,024	20					
Mining Employment	\$93,727	4					
Utilities Employment	\$113,512	1					
Construction Employment	\$47,411	12					
Manufacturing Employment	\$66,231	9					
Wholesale Trade Employment	\$68,739	8					
Retail Trade Employment	\$27,754	18					
Transportation And Warehousing Employment	\$46,149	13					
Information Employment	\$79,342	6					
Finance And Insurance Employment	\$70,257	7					
Real Estate And Rental And Lease Employment	\$17,249	23					
Professional And Technical Services Employment	\$64,680	10					
Management Of Companies And Enterprises Employment	\$100,313	3					
Administrative And Waste Services Employment	\$29,462	17					
Educational Services Employment	\$31,869	15					
Health Care And Social Assistance Employment	\$45,303	14					
Arts, Entertainment, And Recreation Employment	\$24,113	21					
Accommodation And Food Services Employment	\$20,352	22					
Other Services, Except Public Administration Employment	\$29,885	16					
Federal Civilian Government Employment	\$103,342	2					
Federal Military Employment	\$80,125	5					
State And Local Government Employment	\$50,743	11					
Average Earnings	\$46,232	> <					

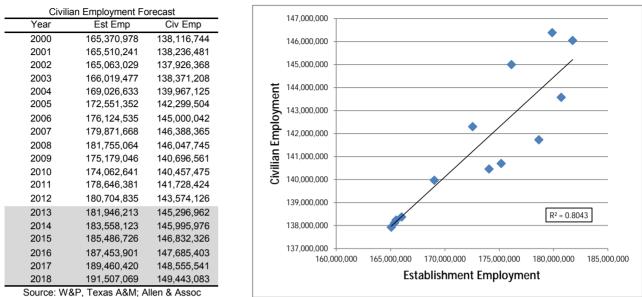

Source: W&P Economics

The data suggests that Utilities is the highest paid industry averaging \$113,512 per employee. Federal Civilian Government is the second highest paid industry averaging \$103,342 per employee. Management is the third highest paid profession averaging \$100,313 per employee. Mining is the fourth highest paid industry averaging \$93,727 per employee. Federal Military is the fifth highest paid category averaging \$80,125 per employee. These figures are compared with US Average Earnings of \$46,232 per employee.

Civilian Employment

In this section we take a look at Civilian Employment. The table and graph below show Civilian Employment and Establishment Employment for the United States since 2000. The data set comes from the Bureau of Economic Analysis (BEA) and the Bureau of Labor Statistics (BLS) via Texas A&M Real Estate Center and Woods & Pool Economics.

Civilian Employment grew from 138.1 million in 2000 to 146.4 million in 2007, before dropping 3.89% to 140.7 million in 2009. Civilian Employment dipped another 0.14% to 140.5 million in 2010. Since then it has grown to 143.6 million.

The accompanying graph illustrates the relationship between Civilian Employment and Establishment Employment. The two measures are highly correlated; increases in Establishment Employment result in proportional increases in Civilian Employment. We used historic data to develop a statistical relationship between the two variables. Utilizing the statistical relationship between the two measures and our forecast for Establishment Employment yielded our base projection for Civilian Employment. Our base projection shows Establishment Employment growing from 180.7 million in 2012 to 191.5 million in 2018, or 5.98 percent. This, in turn, will result in Civilian Employment growing from 143.6 million to 149.4 million, or 4.04 percent over this time period.

Labor Force and Unemployment

In this section we take a look at Labor Force and Unemployment. The table below shows Civilian Employment, Unemployment and Labor Force statistics for the United States since 2000. The data set comes from the Bureau of Labor Statistics (BLS) via Texas A&M Real Estate Center and Woods & Pool Economics.

	Labor Force & Unemployment Rate Forecast										
Year	Civ Emp	Unemp	Lab Force	Unemp Rate							
2000	138,116,744	5,754,864	143,871,608	4.0%							
2001	138,236,481	6,969,907	145,206,388	4.8%							
2002	137,926,368	8,492,282	146,418,650	5.8%							
2003	138,371,208	8,832,205	147,203,413	6.0%							
2004	139,967,125	8,303,135	148,270,260	5.6%							
2005	142,299,504	7,805,458	150,104,962	5.2%							
2006	145,000,042	7,151,104	152,151,146	4.7%							
2007	146,388,365	7,219,573	153,607,938	4.7%							
2008	146,047,745	8,992,324	155,040,069	5.8%							
2009	140,696,561	14,426,439	155,123,000	9.3%							
2010	140,457,475	15,087,902	155,545,377	9.7%							
2011	141,728,424	14,017,097	155,745,521	9.0%							
2012	143,574,126	12,654,520	156,228,646	8.1%							
2013	145,296,962	10,931,685	156,228,646	7.0%							
2014	145,995,976	10,232,670	156,228,646	6.5%							
2015	146,832,326	9,396,320	156,228,646	6.0%							
2016	147,685,403	8,543,243	156,228,646	5.5%							
2017	148,555,541	7,673,105	156,228,646	4.9%							
2018	149,443,083	6,785,564	156,228,646	4.3%							

Source: Texas A&M Real Estate Center; Allen & Associates

Unemployment grew from 5.8 million in 2000 to 7.2 million in 2007 before increasing twofold to 14.4 million in 2009. Unemployment peaked at 15.1 million in 2010 before falling to 12.7 million in 2012. The Unemployment Rate grew from 4.0% in 2000 to 4.7% in 2007 before increasing to 9.3% in 2009. Unemployment peaked at 9.7% in 2010 before falling to 8.1% in 2012. The Labor Force grew from 143.9 million in 2000 to 155.0 million in 2008. Thereafter, it has remained relatively constant as unemployed and underemployed workers - frustrated with the difficult job market - have left the labor force. This is evidenced by the Labor Force Participation Rate (the percentage of the population in the labor force), which (according to Woods & Poole Economics) eroded from 51.0% in 2000 to 49.4% in 2012.

For projection purposes, we decreased Unemployment from year to year as Civilian Employment grew, holding Labor Force constant. Once the Unemployment Rate decreased to frictional levels (assumed to be 4.0%), we began to grow the Labor Force. Our base projection shows Civilian Employment growing from 143.6 million in 2012 to 149.4 million in 2018. This, in turn, will result in Unemployment decreasing from 12.7 million in 2012 to 6.8 million in 2018. The Labor Force will remain constant at 156.2 million, as the Unemployment Rate drops from 8.1% to 4.3% over this time period approaching frictional levels.

Conclusion

Our findings for the base projection are summarized below.

Base Projection										
	2012	2013	2014	2015	2016	2017	2018			
Real GDP (billion 2005 \$)	\$13,350.5	\$13,537.4	\$13,767.5	\$14,042.9	\$14,323.7	\$14,610.2	\$14,902.4			
Establishment Employment	180,704,835	181,946,213	183,558,123	185,486,726	187,453,901	189,460,420	191,507,069			
Civilian Employment	143,574,126	145,296,962	145,995,976	146,832,326	147,685,403	148,555,541	149,443,083			
Unemployment	12,654,520	10,931,685	10,232,670	9,396,320	8,543,243	7,673,105	6,785,564			
Labor Force	156,228,646	156,228,646	156,228,646	156,228,646	156,228,646	156,228,646	156,228,646			
Real GDP Growth %	1.97%	1.40%	1.70%	2.00%	2.00%	2.00%	2.00%

Civilian Employment Growth %	1.30%	1.20%	0.48%	0.57%	0.58%	0.59%	0.60%			
Unemployment Rate %	8.1%	7.0%	6.5%	6.0%	5.5%	4.9%	4.3%			

Source: W&P Economics, Texas A&M Real Estate Center; Allen & Associates

Our base projection assumes Real GDP growth of 1.4% in 2013, 1.7% in 2014 and 2.0% thereafter. Given this projection, we anticipate Establishment Employment to grow from 181.9 million in 2013 to 191.5 million in 2018. Over this same time period we anticipate Civilian Employment to grow from 145.3 million to 149.4 million. Finally, the base projection would result in an Unemployment Rate of 7.0% in 2013 decreasing to 4.3% in 2018. In other words, we anticipate modest economic growth for the next several years.

We also evaluated an optimistic growth scenario. Our findings are summarized below.

Growth Scenario										
	2012	2013	2014	2015	2016	2017	2018			
Real GDP (billion 2005 \$)	\$13,350.5	\$13,537.4	\$14,078.9	\$14,501.2	\$14,863.8	\$15,235.4	\$15,616.3			
Establishment Employment	180,704,835	181,946,213	185,738,943	188,697,272	191,236,504	193,839,218	196,506,999			
Civilian Employment	143,574,126	145,296,962	146,941,701	148,224,598	149,325,751	150,454,433	151,611,331			
Unemployment	12,654,520	10,931,685	9,286,945	8,004,049	6,902,896	6,268,935	6,317,139			
Labor Force	156,228,646	156,228,646	156,228,646	156,228,646	156,228,646	156,723,367	157,928,470			
Real GDP Growth %	1.97%	1.40%	4.00%	3.00%	2.50%	2.50%	2.50%			
Est Employment Growth %	1.15%	0.69%	2.08%	1.59%	1.35%	1.36%	1.38%			
Civilian Employment Growth %	1.30%	1.20%	1.13%	0.87%	0.74%	0.76%	0.77%			
Unemployment Rate %	8.1%	7.0%	5.9%	5.1%	4.4%	4.0%	4.0%			

Source: W&P Economics, Texas A&M Real Estate Center; Allen & Associates

Our optimistic growth scenario assumes Real GDP growth of 1.4% in 2013, 4.0% in 2014, 3.0% in 2015, and 2.5% thereafter. Given this projection, we anticipate Establishment Employment to grow from 181.9 million in 2013 to 196.5 million in 2018. Over this same time period we anticipate Civilian Employment to grow from 145.3 million to 151.6 million. Finally, this projection would result in an Unemployment Rate of 7.0% in 2013 decreasing to 4.0% in 2017. In our opinion, the growth scenario is unlikely. Very few economists anticipate anything other than modest growth the next several years.

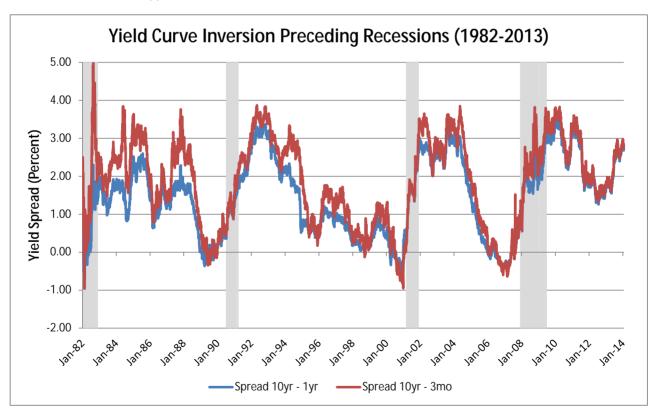

Finally, we evaluated a pessimistic recession scenario. Our findings are summarized below.

	Recession Scenario										
	2012	2013	2014	2015	2016	2017	2018				
Real GDP (billion 2005 \$)	\$13,350.5	\$13,537.4	\$12,995.9	\$12,736.0	\$12,863.3	\$13,056.3	\$13,317.4				
Establishment Employment	180,704,835	181,946,213	178,153,483	176,332,973	177,225,023	178,576,479	180,405,449				
Civilian Employment	143,574,126	145,296,962	143,652,223	142,862,748	143,249,590	143,835,657	144,628,801				
Unemployment	12,654,520	10,931,685	12,576,424	13,365,899	12,979,056	12,392,989	11,599,846				
Labor Force	156,228,646	156,228,646	156,228,646	156,228,646	156,228,646	156,228,646	156,228,646				
Real GDP Growth %	1.97%	1.40%	-4.00%	-2.00%	1.00%	1.50%	2.00%				
Est Employment Growth %	1.15%	0.69%	-2.08%	-1.02%	0.51%	0.76%	1.02%				
Civilian Employment Growth %	1.30%	1.20%	-1.13%	-0.55%	0.27%	0.41%	0.55%				
Unemployment Rate %	8.1%	7.0%	8.1%	8.6%	8.3%	7.9%	7.4%				

Source: W&P Economics, Texas A&M Real Estate Center; Allen & Associates

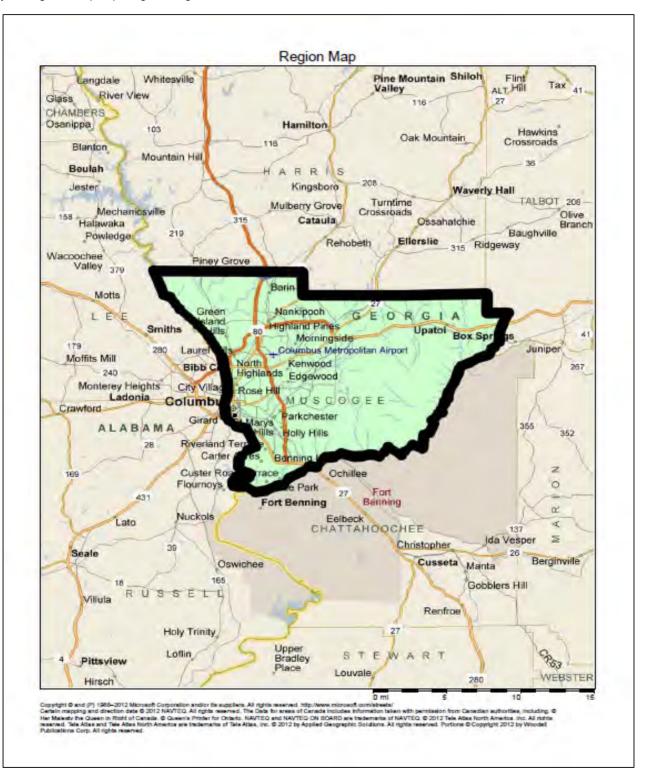

Our pessimistic recession scenario assumes Real GDP growth of 1.4% in 2013, -4.0% in 2014, -2.0% in 2015, 1.0% in 2016, 1.5% in 2017 and 2.0% in 2018. Given this projection, we anticipate Establishment Employment to decrease from 181.9 million in 2013 to 176.3 million in 2015, rebounding to 180.5 million in 2018. In addition, we anticipate Civilian Employment to decrease from 145.3 million in 2013 to 142.9 million in 2015, increasing to 144.6 million in 2018. Finally, the recession scenario would result in an Unemployment Rate of 7.0% in 2013, peaking at 8.6% in 2015 and decreasing to 7.4% in 2018.

In our opinion, the recession scenario is unlikely. Recessions are almost always preceded by several months of an inverted yield curve (short term interest rates are higher than long term rates) as depicted in the graph below. Long term rates exceed short term rates by over 2.5% today. This suggests that we are not facing a recession in the immediate future. Although growth is slow now, an economic contraction does not appear to be on the horizon.

Regional Economic Outlook

In this section we conduct an analysis of the regional economy. For purposes of this analysis, we define the Region as Muscogee County, Georgia. A map depicting the Region is found below.

We anticipate moderate economic growth accompanied by modest population and household growth for the Region over the next several years. The employment base is anticipated to increase over this time period as well. In the discussion below we develop a forecast of the regional economy through 2018.

Our evaluation utilized the base projection for the US economy (developed in the previous section) to drive a base regional economic forecast. Our analysis is found below.

Employment by Industry

The Bureau of Labor Statistics (BLS) tracks Establishment Employment by major industry. In the table below we present the breakdown for 2012 and compare the regional percent distribution to the US percent distribution. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Establishment Emplo	oyment		
Industry	2012	Reg %	US %
Farm Employment	38	0.0%	1.5%
Forestry, Fishing, Related Activities And Other Employment	155	0.1%	0.5%
Mining Employment	148	0.1%	0.7%
Utilities Employment	687	0.5%	0.3%
Construction Employment	4,772	3.8%	4.9%
Manufacturing Employment	6,212	4.9%	6.9%
Wholesale Trade Employment	3,153	2.5%	3.4%
Retail Trade Employment	13,090	10.3%	10.3%
Transportation And Warehousing Employment	1,818	1.4%	3.2%
Information Employment	6,450	5.1%	1.9%
Finance And Insurance Employment	8,395	6.6%	4.9%
Real Estate And Rental And Lease Employment	3,552	2.8%	4.4%
Professional And Technical Services Employment	5,791	4.6%	6.9%
Management Of Companies And Enterprises Employment	1,602	1.3%	1.1%
Administrative And Waste Services Employment	8,500	6.7%	5.8%
Educational Services Employment	976	0.8%	2.5%
Health Care And Social Assistance Employment	15,796	12.4%	11.7%
Arts, Entertainment, And Recreation Employment	1,705	1.3%	2.2%
Accommodation And Food Services Employment	11,636	9.2%	7.0%
Other Services, Except Public Administration Employment	7,639	6.0%	5.8%
Federal Civilian Government Employment	5,584	4.4%	1.6%
Federal Military Employment	5,434	4.3%	1.1%
State And Local Government Employment	13,792	10.9%	11.5%
Establishment Employment	126,925	100.0%	100.0%

Source: W&P Economics

Regional Establishment Employment stood at 126,925 in 2012. The data suggests that Health Care and Social Assistance is the largest employment category accounting for 12.4% of total regional employment. State and Local Government is the second largest category accounting for 10.9% of total employment. Retail Trade is the third largest category accounting for 10.3% of total employment. Accommodation and Food Services is the fourth largest category accounting for 9.2% of total employment. Administrative and Waste Services is the fifth largest category accounting for 6.7% of total employment.

Economists generally classify employment two ways: basic and non-basic. Basic employment, which is considered to be the engine of a local economy, includes industries that rely on external factors to fuel demand. For instance, mining, logging and manufacturers are frequently considered basic employers. Goods for these industries are shipped outside the location where they are produced. Non-basic employers depend largely on local demand and usually employ local workers. For example, grocery stores and restaurants are sometimes considered non-basic employers.

The Location Quotient (LQ) technique is the most common method of identifying basic industries for a given economy. The LQ technique compares the share of workers in each industry of a given economy with that of a larger reference economy. If the number of workers in the given economy is greater than that of the reference economy, these are considered to be basic industries because they fill needs beyond those of the reference community.

In the table above we highlight the basic industries for the Region. The distribution of employment in these industries exceeds that for the United States. These basic industries represent about 84,813 employees or about 66.8% of total regional employment. These are the industries that drive the regional economy.

Earnings by Industry

The Bureau of Labor Statistics (BLS) tracks Average Earnings by major industry. In the table below we present the breakdown for 2012. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Average Earnings							
Industry	Earnings	Rank					
Farm Employment	\$105	23					
Forestry, Fishing, Related Activities And Other Employment	\$27,845	15					
Mining Employment	\$62,412	5					
Utilities Employment	\$78,371	3					
Construction Employment	\$32,789	13					
Manufacturing Employment	\$57,058	7					
Wholesale Trade Employment	\$42,613	11					
Retail Trade Employment	\$22,224	18					
Transportation And Warehousing Employment	\$30,348	14					
Information Employment	\$53,111	9					
Finance And Insurance Employment	\$54,278	8					
Real Estate And Rental And Lease Employment	\$25,711	16					
Professional And Technical Services Employment	\$58,199	6					
Management Of Companies And Enterprises Employment	\$97,964	1					
Administrative And Waste Services Employment	\$22,375	17					
Educational Services Employment	\$20,478	20					
Health Care And Social Assistance Employment	\$44,996	10					
Arts, Entertainment, And Recreation Employment	\$16,042	22					
Accommodation And Food Services Employment	\$17,375	21					
Other Services, Except Public Administration Employment	\$21,848	19					
Federal Civilian Government Employment	\$73,035	4					
Federal Military Employment	\$97,366	2					
State And Local Government Employment	\$39,101	12					
Average Earnings	\$41,251	$>\!\!\!\!\!\!\!\!\!\!\!\!\!\!$					

Source: W&P Economics

The data suggests that Management of Companies is the highest paid industry averaging \$97,964 per employee. Federal Military is the second highest paid industry averaging \$97,366 per employee. Utilities is the third highest paid profession averaging \$78,371 per employee. Federal Civilian Government is the fourth highest paid industry averaging \$73,035 per employee. Mining is the fifth highest paid category averaging \$62,412 per employee. These figures are compared with regional Average Earnings of \$41,251 per employee.

The highlighted industries represent basic industries for the Region. Average Earnings for these basic industries comes to \$52,995 or 28.5% higher than average for the Region.

Top Employers

The table below gives a listing of the Region's top employers. The data comes from InfoUSA and includes a primary industry description for each employer.

Top Employers									
Name	Employees	SIC Code	Industry Description	Location Type					
Fort Benning	32,000	9711-09	Military Bases	-					
Aflac Inc	4,000	6411-12	Insurance	Headquarter

Source: InfoUSA

We contacted the largest employers to find out about their staffing plans for the next few years. This is what we were told:

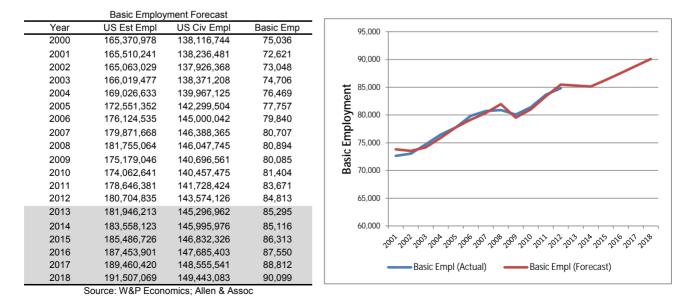

- > Our employment data source list 4500 people employed by New Hanover Regional Medical Ctr. (910) 343-7000) in New Hanover County making them the largest employer. We reached a recording in the HR Dept. that stated that they are currently accepting applications for employment through their company website.
- > Our employment data source list 4000 people employed by All Pro Movers (910) 232-6052) in New Hanover County

making them the second largest employer. After multiple attempts, we were not able to get a person on the line to confirm our information

- > Our employment data source list 1700 people employed by Corning Inc. (910) 784-7200) in New Hanover County making them the third largest employer. We reached a recording in the HR Dept. that stated that they are currently accepting applications for employment through their company website.
- > Our employment data source list 1500 people employed by Pharmaceutical Product Devmnt (910) 251-0081) in New Hanover County making them the fourth largest employer. After multiple attempts, we were not able to get a person on the line to confirm our information.
- > Our employment data source list 1400 people employed by University Of North Carolina (910) 962-3442) in New Hanover County making them tied for the fifth largest employer. After multiple attempts, we were not able to get a person on the line to confirm our information.
- > Our employment data source list 1400 people employed by Guilford Performance Textiles (910) 794-5800) in New Hanover County making them tied for the fifth largest employer. We reached a recording in the HR Dept. that stated that they are currently accepting applications for employment through their company website.
- > Our employment data source list 1300 people employed by Verizon Wireless (910) 202-0002) in New Hanover County making them the seventh largest employer. After multiple attempts, we were not able to get a person on the line to confirm our information.
- > Our employment data source list 800 people employed by Chemtex International Inc. (910) 509-4400) in New Hanover County making them the eighth largest employer. After multiple attempts, we were not able to get a person on the line to confirm our information.
- > Our employment data source list 700 people employed by DAK Americas LLC (910) 371-4000) in New Hanover County making them the ninth largest employer. We reached a recording in the HR Dept. that stated that they are currently accepting applications for employment through their company website.
- > Our employment data source list 660 people employed by Bio Duro LLC (910) 251-0081) in New Hanover County making them the tenth largest employer. After multiple attempts, we were not able to get a person on the line to confirm our information.

Basic Employment

In this section we generate a Basic Employment forecast for the Region using base US Establishment Employment and Civilian Employment forecasts. The table and graph below show employment for the Region and the United States since 2000. The data set comes from the Bureau of Economic Analysis (BEA) and the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

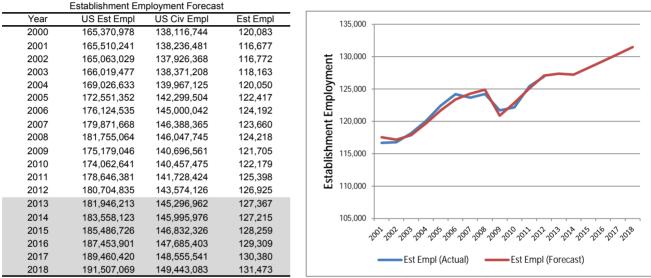

Basic Employment increased from 72,621 in 2001 to 80,894 in 2008. Basic Employment decreased to 80,085 in 2009 and increased to

84,813 in 2012.

The accompanying graph illustrates the relationship between Basic Employment for the Region and US Establishment and US Civilian Employment. We used historic data to develop a statistical relationship between the variables. Utilizing this statistical relationship and our base projections for US Establishment and US Civilian Employment yielded our base projection for Basic Employment for the Region. Our projection shows US Establishment Employment growing from 180.7 million in 2012 to 191.5 million in 2018; US Civilian Employment is projected to grow from 143.6 million in 2012 to 149.4 million in 2018. This, in turn, will result in Basic Employment for the Region increasing from 84,813 to 90,099 over this time period.

Establishment Employment

In this section we generate an Establishment Employment forecast for the Region using base US Establishment Employment and Civilian Employment forecasts. The table and graph below show employment for the Region and the United States since 2000. The data set comes from the Bureau of Economic Analysis (BEA) and the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

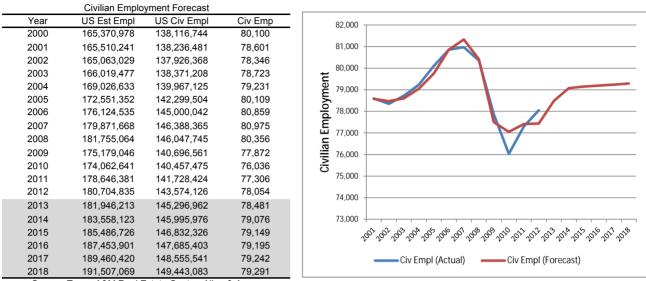

Source: W&P Economics; Allen & Assoc

Establishment Employment increased from 116,677 in 2001 to 124,218 in 2008. Establishment Employment decreased to 121,705 in 2009 and increased to 126,925 in 2012.

The accompanying graph illustrates the relationship between Establishment Employment for the Region and US Establishment and US Civilian Employment. We used historic data to develop a statistical relationship between the variables. Utilizing this statistical relationship and our base projections for US Establishment and US Civilian Employment yielded our base projection for Establishment Employment for the Region. Our projection shows US Establishment Employment growing from 180.7 million in 2012 to 191.5 million in 2018; US Civilian Employment is projected to grow from 143.6 million in 2012 to 149.4 million in 2018. This, in turn, will result in Establishment Employment for the Region increasing from 126,925 to 131,473 over this time period.

Civilian Employment

In this section we generate a Civilian Employment forecast for the Region using base US Establishment Employment and Civilian Employment forecasts. The table and graph below show employment for the Region and the United States since 2000. The data set comes from the Bureau of Labor Statistics (BLS) via the Texas A&M Real Estate Center.

Source: Texas A&M Real Estate Center; Allen & Assoc

Civilian Employment increased from 78,346 in 2002 to 80,975 in 2007. Civilian Employment decreased to 76,036 in 2010 and increased to 78,054 in 2012.

The accompanying graph illustrates the relationship between Civilian Employment for the Region and US Establishment and US Civilian Employment. We used historic data to develop a statistical relationship between the variables. Utilizing this statistical relationship and our base projections for US Establishment and US Civilian Employment yielded our base projection for Civilian Employment for the Region. Our projection shows US Establishment Employment growing from 180.7 million in 2012 to 191.5 million in 2018; US Civilian Employment is projected to grow from 143.6 million in 2012 to 149.4 million in 2018. This, in turn, will result in Civilian Employment for the Region increasing from 78,054 to 79,291 over this time period.

Labor Force and Unemployment

In this section we take a look at Labor Force and Unemployment. The table below shows Civilian Employment, Unemployment and Labor Force statistics for the Region since 2000. The data set comes from the Bureau of Labor Statistics (BLS) via the Texas A&M Real Estate Center.

	Labor Force &	Unemployment	Rate Forecast	
Year	Civ Emp	Unemp	Lab Force	Unemp Rate
2000	80,100	3,950	84,050	4.7%
2001	78,601	4,050	82,651	4.9%
2002	78,346	4,385	82,731	5.3%
2003	78,723	4,406	83,129	5.3%
2004	79,231	4,611	83,842	5.5%
2005	80,109	5,113	85,222	6.0%
2006	80,859	4,706	85,565	5.5%
2007	80,975	4,532	85,507	5.3%
2008	80,356	5,311	85,667	6.2%
2009	77,872	7,608	85,480	8.9%
2010	76,036	8,168	84,204	9.7%
2011	77,306	8,115	85,421	9.5%
2012	78,054	7,814	85,868	9.1%
2013	78,481	7,369	85,850	8.6%
2014	79,076	6,938	86,014	8.1%
2015	79,149	6,464	85,612	7.6%
2016	79,195	5,991	85,187	7.0%
2017	79,242	5,524	84,766	6.5%
2018	79,291	5,061	84,352	6.0%

Source: Texas A&M Real Estate Center; Allen & Associates

Unemployment increased from 4,385 in 2002 to 4,532 in 2007. Unemployment increased to 8,168 in 2010 and decreased to 7,814 in 2012. The Unemployment Rate increased from 5.3% in 2002 to 5.3% in 2007. The Unemployment Rate increased to 9.7% in 2010 and decreased to 9.1% in 2012.

For projection purposes, we decreased the Unemployment Rate from 9.1% in 2012 to 6.0% in 2018. Our base projection shows Civilian Employment increasing from 78,054 in 2012 to 79,291 in 2018. This, in turn, will result in Unemployment decreasing from 7,814 in 2012 to 5,061 in 2018.

The table and graph below show the Unemployment Rate for the Region for the past 12 months.

The Unemployment Rate for the Region came in at 9.3% in February 2013 and 8.1% in February 2014.

Population

In this section we generate a Population forecast for the Region using our base Civilian Employment forecast. The table and graph below show Civilian Employment and Population for the Region since 2000. The data set comes from the Bureau of Labor Statistics (BLS) via the Texas A&M Real Estate Center and the US Census Bureau.

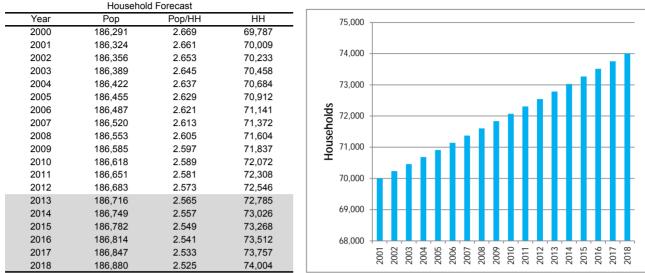

Source: TAMU US Census; Allen & Assoc

Population increased from 186,291 in 2000 to 186,553 in 2008. Population increased to 186,618 in 2010 and increased to 186,683 in 2012.

The accompanying graph illustrates the change in Regional Population over time. We used the historic data to develop a statistical relationship between Civilian Employment and Population. Utilizing the statistical relationship and our base Regional Civilian Employment projection yielded our base Regional Population forecast. Our projection shows Regional Population increasing from 186,683 in 2012 to 186,880 in 2018.

Households

In this section we generate a Regional Household forecast using our base Regional Population projection. The table and graph below show Regional Households since 2000. The data set comes from the US Census Bureau via Woods & Pool Economics.

Source: W&P Economics; Allen & Assoc

Households increased from 69,787 in 2000 to 71,604 in 2008. Households increased to 72,072 in 2010 and increased to 72,546 in 2012. Population per Household decreased from 2.669 in 2000 to 2.605 in 2008. Population per Household decreased to 2.589 in 2010 and decreased to 2.573 in 2012.

For projection purposes, we decreased Population per Household from 2.573 in 2012 to 2.525 in 2018. Our base projection shows Population increasing from 186,683 in 2012 to 186,880 in 2018. This, in turn, will result in Households increasing from 72,546 in 2012 to 74,004 in 2018.

Housing Units

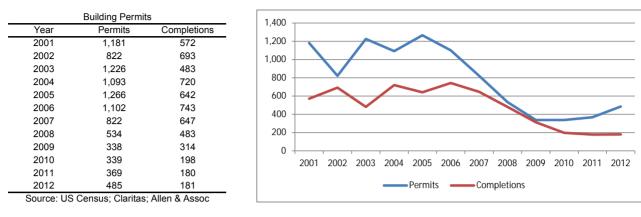

Every 10 years the US Census Bureau collects Housing Unit information by structure type. In the table below we present the breakdown for 2000 and 2010.

	Housing Units		
Unit Type	2000	2010	% of Total
Housing Units, 1, detached	49,954	55,711	68.2%
Housing Units, 1, attached	2,356	1,369	1.7%
Housing Units, 2	2,609	2,482	3.0%
Housing Units, 3 to 19	13,902	15,336	18.8%
Housing Units, 20 to 49	1,734	1,579	1.9%
Housing Units, 50 or more	2,764	3,385	4.1%
Housing Units, Mobile home	2,863	1,813	2.2%
Housing Units, Other	0	2	0.0%
Housing Units	76,182	81,677	100.0%
	Source: US Census		

In 2000, there were 76,182 Housing Units in the Region; in 2010 there were 81,677 units. The 2010 total included 55,711 single family detached units (68.2% of total). The 2010 total also included 4,964 multifamily units (20+ units / 6.1% of total).

Housing Permits and Completions

In this section we look at Building Permits and Completions. The table and graph below show historical data for the Region since 2001. The data set comes from the US Census.

Building Permits for the Region increased from 822 in 2002 to 1,266 in 2005, before decreasing to 338 in 2009 and increasing to 485 in 2012. Housing Completions (net of Demolitions) for the Region increased from 483 in 2003 to 720 in 2004, before decreasing to 180 in 2011 and increasing to 181 in 2012.

Housing Stock and Vacancy Rate Forecast

In this section we develop a base Housing Stock projection. The table below shows Housing Stock and Vacancy statistics for the Region since 2000. The data set comes from the US Census and Claritas.

	Housing Stoc	k & Vacancy Ra	ate Forecast	
Year	Households	Vac Units	Hsng Units	Vac Rate
2000	69,787	6,395	76,182	8.4%
2001	70,009	6,745	76,754	8.8%
2002	70,233	7,215	77,448	9.3%
2003	70,458	7,473	77,930	9.6%
2004	70,684	7,966	78,650	10.1%
2005	70,912	8,380	79,292	10.6%
2006	71,141	8,894	80,035	11.1%
2007	71,372	9,311	80,682	11.5%
2008	71,604	9,561	81,165	11.8%
2009	71,837	9,641	81,479	11.8%
2010	72,072	9,605	81,677	11.8%
2011	72,308	9,548	81,857	11.7%
2012	72,546	9,492	82,038	11.6%
2013	72,785	9,435	82,220	11.5%
2014	73,026	9,377	82,403	11.4%
2015	73,268	9,320	82,588	11.3%
2016	73,512	9,262	82,775	11.2%
2017	73,757	9,205	82,962	11.1%
2018	74,004	9,147	83,151	11.0%

Source: US Census; Claritas; Allen & Associates

Vacant Units increased from 6,395 in 2000 to 9,561 in 2008. Vacant Units increased to 9,605 in 2010 and decreased to 9,492 in 2012. The Vacancy Rate increased from 8.4% in 2000 to 11.8% in 2008. The Vacancy Rate decreased to 11.8% in 2010 and decreased to 11.6% in 2012.

For projection purposes, we decreased the Vacancy Rate from 11.6% in 2012 to 11.0% in 2018. Our base projection shows Households increasing from 72,546 in 2012 to 74,004 in 2018. This, in turn, will result in Vacant Units decreasing from 9,492 in 2012 to 9,147 in 2018.

Conclusion

Our findings for the base projection are summarized below.

			Base Projection				
	2012	2013	2014	2015	2016	2017	2018
Basic Employment	84,813	85,295	85,116	86,313	87,550	88,812	90,099
Establishment Employment	126,925	127,367	127,215	128,259	129,309	130,380	131,473
Civilian Employment	78,054	78,481	79,076	79,149	79,195	79,242	79,291
Unemployment	7,814	7,369	6,938	6,464	5,991	5,524	5,061
Labor Force	85,868	85,850	86,014	85,612	85,187	84,766	84,352
Population	186,683	186,716	186,749	186,782	186,814	186,847	186,880
Households	72,546	72,785	73,026	73,268	73,512	73,757	74,004
Vacant Housing Units	9,492	9,435	9,377	9,320	9,262	9,205	9,147
Housing Units	82,038	82,220	82,403	82,588	82,775	82,962	83,151
Basic Employment Growth %	1.4%	0.6%	-0.2%	1.4%	1.4%	1.4%	1.4%
Est Employment Growth %	1.2%	0.3%	-0.1%	0.8%	0.8%	0.8%	0.8%
Civilian Employment Growth %	1.0%	0.5%	0.8%	0.1%	0.1%	0.1%	0.1%
Unemployment Rate %	9.1%	8.6%	8.1%	7.6%	7.0%	6.5%	6.0%
Vacancy Rate %	11.6%	11.5%	11.4%	11.3%	11.2%	11.1%	11.0%

Source: W&P Economics, Texas A&M Real Estate Center, US Census, Claritas; Allen & Associates

Our base projection assumes Real GDP growth of 1.4% in 2013, 1.7% in 2014 and 2.0% thereafter. Given this projection, we anticipate Establishment Employment for the Region to increase from 127,367 in 2013 to 131,473 in 2018. Over this same time period we anticipate Civilian Employment for the Region to increase from 78,481 to 79,291. The projection would result in an Unemployment Rate for the Region of 8.6% in 2013 and 6.0% in 2018. The projection would result in a Vacancy Rate for the Region of 11.5% in 2013 and 11.0% in 2018.

DEMOGRAPHIC CHARACTERISTICS

In this section we conduct an analysis of market area demographic and select housing characteristics. For purposes of this analysis, we define the Market Area as the area depicted in the map found below.

Population

We begin our analysis by comparing population forecasts from widely-used demographic data providers. Claritas includes historic data for 2000 and 2010 and a 2015 forecast. ESRI includes historic data for 2000 and 2010, a 2012 estimate, and a 2017 forecast.

To make the analysis more meaningful, we interpolated/extrapolated the data to provide direct year-by-year comparisons for the two data services. The 2000 ans 2010 data for both services was based on US Census tract-level data. These figures sometimes differ slightly because of the way the data services account for partial census tracts.

		Pop	ulation Forecas	sts		
Year	Claritas	Growth %	ESRI	Growth %	Concluded	Growth %
2000	72,633	-	73,242	-	72,785	-
2010	65,958	-0.9%	68,444	-0.7%	66,580	-0.9%
2012	64,729	-0.9%	69,145	0.5%	65,833	-0.6%
2015	62,885	-0.9%	70,699	0.7%	64,839	-0.5%
2017	61,656	-1.0%	71,735	0.7%	64,176	-0.5%

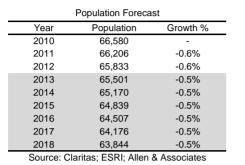

Source: Claritas; ESRI; Allen & Associates

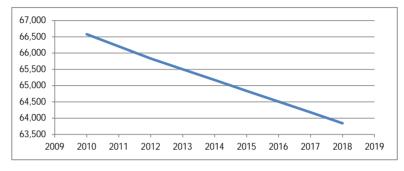

Claritas shows a -0.9 percent annual population change between 2000 and 2010, a -0.9 percent change between 2010 and 2012, a - 0.9 percent change between 2012 and 2015, and a -1.0 percent change between 2015 and 2017. ESRI shows a -0.7 percent annual population change between 2000 and 2010, a 0.5 percent change between 2010 and 2012, a 0.7 percent change between 2012 and

2015, and a 0.7 percent change between 2015 and 2017.

After comparing these two projections and weighting them accordingly, we conclude a -0.9 percent annual population change between 2000 and 2010, a -0.6 percent change between 2010 and 2012, a -0.5 percent change between 2012 and 2015, and a -0.5 percent change between 2015 and 2017.

The table and graph below give our 2010-2018 projection for the Market Area.

We continue our analysis by comparing 55+ population forecasts from Claritas and ESRI.

	55+ Population Forecasts					
Year	Claritas	Growth %	ESRI	Growth %	Concluded	Growth %
2000	16,239	-	16,364	-	16,270	-
2010	16,474	0.1%	15,764	-0.4%	16,297	0.0%
2012	16,496	0.1%	16,550	2.5%	16,509	0.7%
2015	16,528	0.1%	17,795	2.5%	16,845	0.7%
2017	16,550	0.1%	18,625	2.3%	17,068	0.7%

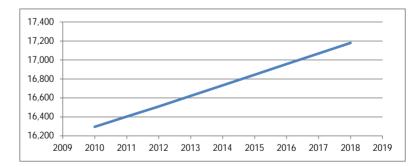

Source: Claritas; ESRI; Allen & Associates

Claritas shows a 0.1 percent annual 55+ population change between 2000 and 2010, a 0.1 percent change between 2010 and 2012, a 0.1 percent change between 2012 and 2015, and a 0.1 percent change between 2015 and 2017. ESRI shows a -0.4 percent annual 55+ population change between 2000 and 2010, a 2.5 percent change between 2010 and 2012, a 2.5 percent change between 2012 and 2015, and a 2.3 percent change between 2015 and 2017.

After comparing these two projections and weighting them accordingly, we conclude a 0.0 percent annual 55+ population change between 2000 and 2010, a 0.7 percent change between 2010 and 2012, a 0.7 percent change between 2012 and 2015, and a 0.7 percent change between 2015 and 2017.

The table and graph below give our 2010-2018 projection for the Market Area.

5	55+ Population Forecast					
Year	Population	Growth %				
2010	16,297	-				
2011	16,403	0.7%				
2012	16,509	0.6%				
2013	16,621	0.7%				
2014	16,733	0.7%				
2015	16,845	0.7%				
2016	16,957	0.7%				
2017	17,068	0.7%				
2018	17,180	0.7%				
Source: Claritas; ESRI; Allen & Associates						

We continue our analysis by comparing 65+ population forecasts from Claritas and ESRI.

	65+ Population Forecasts					
Year	Claritas	Growth %	ESRI	Growth %	Concluded	Growth %
2000	10,550	-	10,627	-	10,569	-
2010	9,522	-1.0%	8,382	-2.1%	9,237	-1.3%
2012	9,498	-0.1%	8,770	2.3%	9,316	0.4%
2015	9,462	-0.1%	9,632	3.3%	9,505	0.7%
2017	9,438	-0.1%	10,207	3.0%	9,630	0.7%

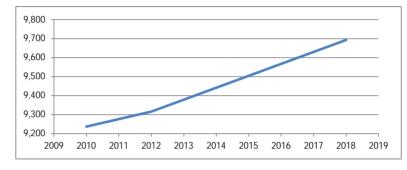

Source: Claritas; ESRI; Allen & Associates

Claritas shows a -1.0 percent annual 65+ population change between 2000 and 2010, a -0.1 percent change between 2010 and 2012, a -0.1 percent change between 2012 and 2015, and a -0.1 percent change between 2015 and 2017. ESRI shows a -2.1 percent annual 65+ population change between 2000 and 2010, a 2.3 percent change between 2010 and 2012, a 3.3 percent change between 2012 and 2015, and a 3.0 percent change between 2015 and 2017.

After comparing these two projections and weighting them accordingly, we conclude a -1.3 percent annual 65+ population change between 2000 and 2010, a 0.4 percent change between 2010 and 2012, a 0.7 percent change between 2012 and 2015, and a 0.7 percent change between 2015 and 2017.

The table and graph below give our 2010-2018 projection for the Market Area.

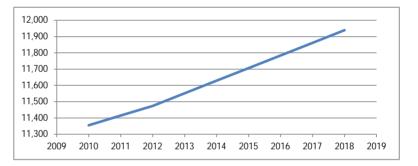

6	65+ Population Forecast				
Year	Population	Growth %			
2010	9,237	-			
2011	9,277	0.4%			
2012	9,316	0.4%			
2013	9,379	0.7%			
2014	9,442	0.7%			
2015	9,505	0.7%			
2016	9,567	0.7%			
2017	9,630	0.7%			
2018	9,693	0.7%			
Source: Claritas; ESRI; Allen & Associates					

Finally, we interpolated the 55+ and 65+ population forecasts to derive a 62+ forecast for the Market Area. The table and graph below give our 2010-2018 projection for the Market Area.

62	62+ Population Forecast					
Year	Population	Growth %				
2010	11,355	-				
2011	11,414	0.5%				
2012	11,474	0.5%				
2013	11,552	0.7%				
2014	11,629	0.7%				
2015	11,707	0.7%				
2016	11,784	0.7%

Renter Households

We continue our analysis by comparing Claritas and ESRI renter household forecasts. Claritas includes historic data for 2000 and 2010 and a 2015 forecast. ESRI includes historic data for 2000 and 2010, a 2012 estimate, and a 2017 forecast.

To make the analysis more meaningful, we interpolated/extrapolated the data to provide direct year-by-year comparisons for the two data services. The 2000 ans 2010 data for both services was based on US Census tract-level data. These figures sometimes differ slightly because of the way the data services account for partial census tracts.

	Renter Household Forecasts									
-	Year	Claritas	Tenure %	ESRI Tenure %		Concluded	Tenure %			
	2000	16,986	56.8%	17,220	56.7%	17,044	56.8%			
	2010	15,809	56.7%	17,223	61.2%	16,160	57.8%			
	2012	15,588	56.8%	17,567	62.1%	16,074	58.1%			
	2015	15,257	56.9%	18,099	62.0%	15,945	58.2%			
	2017	15,036	57.0%	18,454	62.0%	15,859	58.2%			

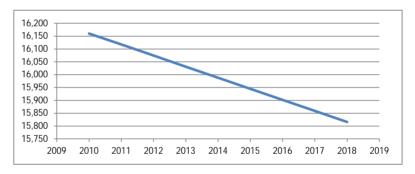

Source: Claritas; ESRI; Allen & Associates

Claritas shows a 56.8 percent renter household tenure in 2000, 56.7 percent in 2010, 56.8 percent in 2012, 56.9 percent in 2015, and 57.0 percent tenure in 2017. ESRI shows a 56.7 percent renter household tenure in 2000, 61.2 percent in 2010, 62.1 percent in 2012, 62.0 percent in 2015, and 62.0 percent tenure in 2017.

After comparing these two projections and weighting them accordingly, we conclude a 56.8 percent renter household tenure in 2000, 57.8 percent in 2010, 58.1 percent in 2012, 58.2 percent in 2015, and 58.2 percent tenure in 2017.

The table and graph below give our 2010-2018 projection for the Market Area.

We continue our analysis by comparing 55+ renter household forecasts from Claritas and ESRI.

	55+ Renter Household Forecasts									
Year	Year Claritas Tenure % ESRI Tenure % Concluded Te									
2000	4,001	36.4%	-	-	4,120	37.5%				
2010	4,299	37.7%	4,552	42.0%	4,367	38.8%				
2012	4,359	38.0%	-	-	4,460	39.0%				
2015	4,450	38.3%	-	-	4,624	39.4%				
2017	4,510	38.6%	-	-	4,734	39.7%				

Source: Claritas; ESRI; Allen & Associates

Claritas shows a 36.4 percent 55+ renter household tenure in 2000, 37.7 percent in 2010, 38.0 percent in 2012, 38.3 percent in 2015, and 38.6 percent tenure in 2017. ESRI shows a 42.0 percent 55+ renter household tenure in 2010.

After comparing these two projections and weighting them accordingly, we conclude a 37.5 percent 55+ renter household tenure in 2000, 38.8 percent in 2010, 39.0 percent in 2012, 39.4 percent in 2015, and 39.7 percent tenure in 2017.

The table and graph below give our 2010-2018 projection for the Market Area.

We continue our analysis by comparing 65+ renter household forecasts from Claritas and ESRI.

	65+ Renter Household Forecasts									
Year	Claritas	Tenure %	ESRI	Tenure %	Concluded	Tenure %				
2000	2,437	32.9%	-	-	2,456	33.1%				
2010	2,209	32.6%	2,032	33.6%	2,166	32.9%				
2012	2,224	32.8%	-	-	2,198	33.0%				
2015	2,247	33.0%	-	-	2,270	33.3%				
2017	2,262	33.2%	-	-	2,318	33.5%				

Source: Claritas; ESRI; Allen & Associates

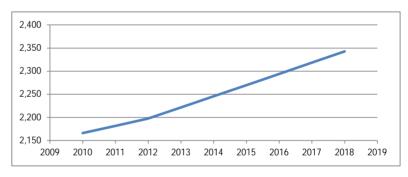

Claritas shows a 32.9 percent 65+ renter household tenure in 2000, 32.6 percent in 2010, 32.8 percent in 2012, 33.0 percent in 2015, and 33.2 percent tenure in 2017. ESRI shows a 33.6 percent 65+ renter household tenure in 2010.

After comparing these two projections and weighting them accordingly, we conclude a 33.1 percent 65+ renter household tenure in 2000, 32.9 percent in 2010, 33.0 percent in 2012, 33.3 percent in 2015, and 33.5 percent tenure in 2017.

The table and graph below give our 2010-2018 projection for the Market Area.

Household Income

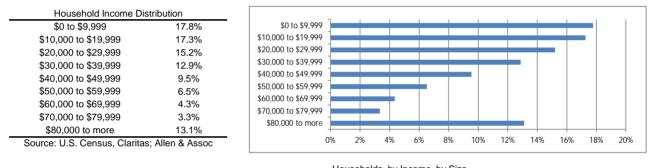

The following table gives average household income data for the Market Area since 2000. The data set, which comes from the U.S. Census Bureau and Claritas, includes a forecast through 2017.

Household Income				
2000 Household Income	\$35,930			
2012 Household Income	\$43,496			
2000-2012 Change	\$7,566			
Annual Change, %	1.6%			
2012 Household Income	\$43,496			
2017 Household Income	\$46,181			
2012-2017 Change	\$2,685			
Annual Change, %	1.2%			

Source: U.S. Census Bureau; Claritas

Average household income for the market area increased from \$35,930 in 2000 to \$43,496 in 2012. Household income is forecasted to increase 1.2 percent annually through 2017.

The following tables and graph show the current distribution of household incomes for the Market Area. The data set comes from the US Census Bureau and Claritas.

		Households, by Income, by Size

Our research suggests an elderly renter movership rate of 8.0 percent.

SUPPLY ANALYSIS

In this section we conduct an analysis of multifamily housing supply for the market area. Our analysis uses the market area definition presented previously in this report.

Overview

In conducting our analysis, we obtained information on multifamily properties with 20 or more units in the market area. Our research included conventionally financed multifamily communities as well as properties financed by the local housing authority and the state housing finance agency. Our analysis also included properties financed by and/or subsidized by USDA and/or HUD. Finally, our analysis included properties that are either proposed or currently under construction. The result was a listing of projects with 20 or more units - whether existing, under construction, or proposed - for this area. Our rental property inventory listing is found in the pages that follow.

A map showing the location of the properties included in the rental property inventory is found in the pages that follow. Properties identified with red pushpins have 100 percent market rate units (market rate properties), properties identified with yellow pushpins have a mixture of market rate / restricted / subsidized units (restricted properties), and properties identified with blue pushpins have 100 percent project-based rental assistance (subsidized properties).

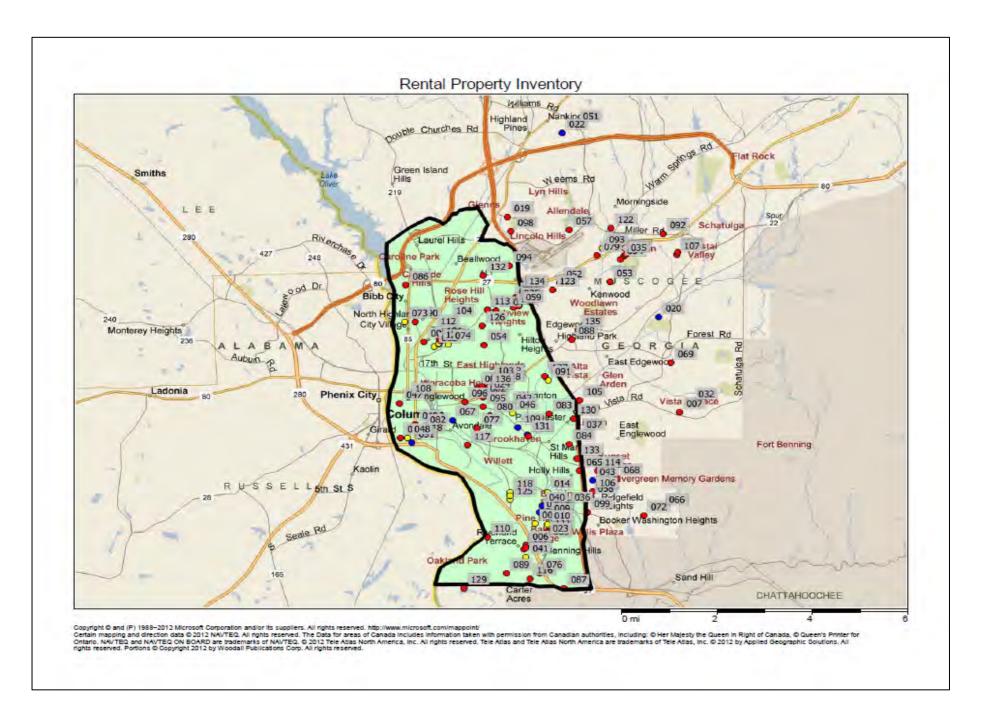

After accounting for any unconfirmed properties and any properties that are located outside the defined market area, we arrived at a list of confirmed market area properties. This is the listing of properties upon which our analysis is based. In our opinion, the properties included on this list give a credible picture of market conditions as of the effective date of this report. This listing is found in the pages that follow.

Our supply analysis includes a breakdown of confirmed market area properties by rent type, project status, year built, and financing source. We also include a rent, unit mix, and amenity summary for confirmed market area properties. Finally, we provide summary of vouchers, concessions, and waiting lists for the properties included in this report. This information is also found in the pages that follow.

Occupancies of stabilized market area properties broken out by occupancy type (elderly or family) and rent type (subsidized, restricted or market rate) are found below:

Our research suggests the following occupancy levels for the 724 stabilized elderly units in this market area:

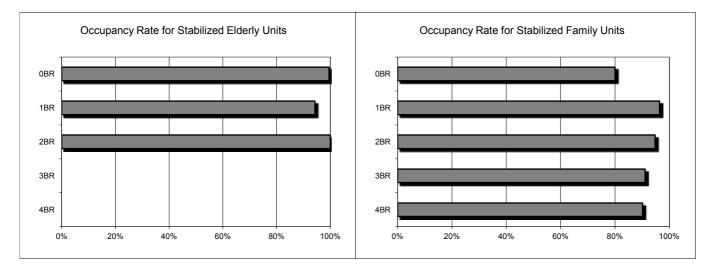

- Subsidized, 96 percent (689 units in survey)
- Restricted, 93 percent (14 units in survey)
- Market Rate, 100 percent (21 units in survey)

Our research suggests the following occupancy levels for the 3,469 stabilized family units in this market area:

- Subsidized, 100 percent (364 units in survey)
- Restricted, 93 percent (1665 units in survey)
- Market Rate, 95 percent (1440 units in survey)

Occupancy rates for stabilized market area properties broken out by occupancy type (elderly or family) and unit type are found below (supporting data is found in the pages that follow):

Allen and Associates Consulting

Our research suggests the following occupancy levels for the 724 stabilized elderly units in this market area:

- 0-Bedroom, 100 percent (223 units in survey)
- 1-Bedroom, 94 percent (490 units in survey)
- 2-Bedroom, 100 percent (11 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 3,469 stabilized family units in this market area:

- 0-Bedroom, 80 percent (5 units in survey)
- 1-Bedroom, 96 percent (731 units in survey)
- 2-Bedroom, 95 percent (2086 units in survey)
- 3-Bedroom, 91 percent (586 units in survey)
- 4-Bedroom, 90 percent (61 units in survey)

Source: Allen & Associates

Our research suggests that 15 percent of confirmed market area properties are 1 story in height, 80 percent are 2-4 stories in height, 4 percent are 5-10 stories in height, and 0 percent are over 10 stories in height. In addition, surveyed properties benefit from the following project amenities: 24 percent have a business/computer center, 28 percent have a community center, 22 percent have a fitness center, 35 percent have a playground, and 15 percent have a sports court.

Our research also suggests that the following unit amenities are present at surveyed properties: 100 percent have blinds, 93 percent have carpeting, 57 percent have patios/balconies, and 15 percent have outside storage. Surveyed properties also include the following kitchen amenities: 98 percent have a stove, 100 percent have a refrigerator, 65 percent have a disposal, 67 percent have a dishwasher, and 41 percent have a microwave.

In addition, 98 percent of confirmed market area properties have central heat while 98 percent have central air. Our research also suggests that 98 percent of surveyed properties have open parking. A total of 63 percent of area properties have central laundry facilities, while 61 percent have washer/dryer hookups, and 2 percent have washer/dryer units in each residential unit.

A total of 2 percent of confirmed market area properties have call buttons, 20 percent have controlled access, and 2 percent have security alarms.

It is also our understanding that the majority of confirmed market area properties provide cable access.

Finally, in the following pages we provide a summary of vouchers, concessions and waiting lists for the confirmed market area properties included in this report. We also include any absorption information we have uncovered as part of our research.

RENT COMPARABILITY ANALYSIS

In this section we develop restricted and unrestricted market rent conclusions for the subject property on an "as if complete & stabilized" basis. Our analysis begins with an evaluation of unrestricted market rents.

Unrestricted Rent Analysis

In this section we develop an unrestricted market rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was an unrestricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized market rate properties as comparables for purposes of our rent comparability analysis.

Comparables with restricted rents are used when a sufficient number of market rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

Rent Comparables, Market Rate, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in an unrestricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

A narrative regarding the selection of our rent comparables, the basis for our rent adjustments, and the development of our rent conclusion for the 1BR/1BA/787sf units is presented in this section.

Selection of Rent Comparables

Our analysis included the evaluation of a total of 22 unit types found at 7 properties in the vicinity of the subject property. We selected the 5 most comparable unit types to utilize as rent comparables for purposes of this analysis. A description of the selected comparables is found below:

Comparable 1

Arbor Pointe Phase 1 is a market rate property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 7 1BR/1BA/758sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$625 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 2

Arbor Pointe Phase 2 is a market rate property located in Columbus, Georgia that was originally constructed in 2010. This property includes a total of 7 1BR/1BA/758sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$625 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 3

Ashley Station, Phase 1 is a market rate property located in Columbus, Georgia that was originally constructed in 2006. This property includes a total of 21 1BR/1BA/721sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$645 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 4

Ashley Station, Phase 2 is a market rate property located in Columbus, Georgia that was originally constructed in 2008. This property includes a total of 6 1BR/1BA/664sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$665 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 5

Ashley Station, Phase 2 is a market rate property located in Columbus, Georgia that was originally constructed in 2008. This property includes a total of 6 2BR/1.5BA/888sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$755 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

As noted earlier, our analysis included a total of 22 unit types found at 7 properties in the vicinity of the subject property. Each comparable was ranked according to the total dollar value of adjustments arrived at in our rent comparability analysis. The 5 comparables with the least adjustments were designated as being most comparable for rent comparability purposes. These comparables are highlighted in the table found below:

Rent Adjustments

The adjustments used in this analysis came from feedback from experienced managers of multifamily properties. We interviewed property management personnel from several national companies to come up with a range of rent adjustments for this analysis. For certain physical features of the subject property, we used the survey average. For location, condition, effective age and other physical features, we identified the adjustments that minimized the sample variance in our data set. This technique, known as statistical extraction, is very similar to the matched-paired approach.

We used the HUD Utility Schedule Model to derive utility adjustments in this analysis. The HUD model - which accounts for building type, building age, and unit size - included a current energy survey for the market area.

Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made.

Indicated Rent

Our analysis suggests a rent of \$650 for the 1BR/1BA/787sf units at the subject property.

In arriving at our rent conclusion we considered the number and sum of adjustments as well as the ratio of the adjusted rent to the unadjusted rent for each comparable. We also considered a variety of statistical measures including the mean, median, range and standard deviation of the adjusted rents. We even evaluated the modified mean - the average adjusted rent with the high and low samples eliminated from the data - in arriving at our rent conclusion.

A narrative regarding the selection of our rent comparables, the basis for our rent adjustments, and the development of our rent conclusion for the 2BR/2BA/984sf units is presented in this section.

Selection of Rent Comparables

Our analysis included the evaluation of a total of 22 unit types found at 7 properties in the vicinity of the subject property. We selected the 5 most comparable unit types to utilize as rent comparables for purposes of this analysis. A description of the selected comparables is found below:

Comparable 1

Arbor Pointe Phase 1 is a market rate property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 9 2BR/2BA/1069sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$754 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 2

Arbor Pointe Phase 1 is a market rate property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 9 2BR/1.5BA/974sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$744 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 3

Arbor Pointe Phase 2 is a market rate property located in Columbus, Georgia that was originally constructed in 2010. This property includes a total of 9 2BR/2BA/1069sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$754 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 4

Arbor Pointe Phase 2 is a market rate property located in Columbus, Georgia that was originally constructed in 2010. This property includes a total of 9 2BR/1.5BA/974sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$744 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 5

Ashley Station, Phase 1 is a market rate property located in Columbus, Georgia that was originally constructed in 2006. This property includes a total of 12 2BR/1.5BA/1074.5sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$795 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

As noted earlier, our analysis included a total of 22 unit types found at 7 properties in the vicinity of the subject property. Each comparable was ranked according to the total dollar value of adjustments arrived at in our rent comparability analysis. The 5 comparables with the least adjustments were designated as being most comparable for rent comparability purposes. These comparables are highlighted in the table found below:

		Identifying the	Best Rent Compara	ables

Rent Adjustments

The adjustments used in this analysis came from feedback from experienced managers of multifamily properties. We interviewed property management personnel from several national companies to come up with a range of rent adjustments for this analysis. For certain physical features of the subject property, we used the survey average. For location, condition, effective age and other physical features, we identified the adjustments that minimized the sample variance in our data set. This technique, known as statistical extraction, is very similar to the matched-paired approach.

We used the HUD Utility Schedule Model to derive utility adjustments in this analysis. The HUD model - which accounts for building type, building age, and unit size - included a current energy survey for the market area.

Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made.

Indicated Rent

Our analysis suggests a rent of \$775 for the 2BR/2BA/984sf units at the subject property.

In arriving at our rent conclusion we considered the number and sum of adjustments as well as the ratio of the adjusted rent to the unadjusted rent for each comparable. We also considered a variety of statistical measures including the mean, median, range and standard deviation of the adjusted rents. We even evaluated the modified mean - the average adjusted rent with the high and low samples eliminated from the data - in arriving at our rent conclusion.

A narrative regarding the selection of our rent comparables, the basis for our rent adjustments, and the development of our rent conclusion for the 3BR/2BA/1300sf units is presented in this section.

Selection of Rent Comparables

Our analysis included the evaluation of a total of 22 unit types found at 7 properties in the vicinity of the subject property. We selected the 5 most comparable unit types to utilize as rent comparables for purposes of this analysis. A description of the selected comparables is found below:

Comparable 1

Arbor Pointe Phase 1 is a market rate property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 6 3BR/2BA/1206sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$844 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 2

Arbor Pointe Phase 2 is a market rate property located in Columbus, Georgia that was originally constructed in 2010. This property includes a total of 6 3BR/2BA/1206sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$844 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 3

Ashley Station, Phase 1 is a market rate property located in Columbus, Georgia that was originally constructed in 2006. This property includes a total of 2 3BR/2.5BA/1250sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$1,055 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 4

Ashley Station, Phase 2 is a market rate property located in Columbus, Georgia that was originally constructed in 2008. This property includes a total of 2 3BR/2.5BA/1250sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$1,055 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 5

Armour Landing Apartments is a market rate property located in Columbus, Georgia that was originally constructed in 2006. This property includes a total of 18 3BR/2BA/1240sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$813 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

As noted earlier, our analysis included a total of 22 unit types found at 7 properties in the vicinity of the subject property. Each comparable was ranked according to the total dollar value of adjustments arrived at in our rent comparability analysis. The 5 comparables with the least adjustments were designated as being most comparable for rent comparability purposes. These comparables are highlighted in the table found below:

		Identifying the	Best Rent Compara	ables		
Property	Property Key	Project Type	Unit Type	Indicated Rent	Adjustments	Rank

Rent Adjustments

The adjustments used in this analysis came from feedback from experienced managers of multifamily properties. We interviewed property management personnel from several national companies to come up with a range of rent adjustments for this analysis. For certain physical features of the subject property, we used the survey average. For location, condition, effective age and other physical features, we identified the adjustments that minimized the sample variance in our data set. This technique, known as statistical extraction, is very similar to the matched-paired approach.

We used the HUD Utility Schedule Model to derive utility adjustments in this analysis. The HUD model - which accounts for building type, building age, and unit size - included a current energy survey for the market area.

Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made.

Indicated Rent

Our analysis suggests a rent of \$950 for the 3BR/2BA/1300sf units at the subject property.

In arriving at our rent conclusion we considered the number and sum of adjustments as well as the ratio of the adjusted rent to the unadjusted rent for each comparable. We also considered a variety of statistical measures including the mean, median, range and standard deviation of the adjusted rents. We even evaluated the modified mean - the average adjusted rent with the high and low samples eliminated from the data - in arriving at our rent conclusion.

Unrestricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were an unrestricted property:

Unrestricted Market Rent Conclusion												
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market	Current	Advantage						
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	Yes	6	\$650	\$352	45.8%						
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	Yes	12	\$650	\$565	13.1%						
1BR-1BA-787sf / Market Rate / Market Rate	No	No	3	\$650	\$625	3.8%						
2BR-2BA-984sf / 50% of AMI / 50% of AMI	No	Yes	19	\$775	\$352	54.6%						
2BR-2BA-984sf / 60% of AMI / 60% of AMI	No	Yes	36	\$775	\$650	16.1%						
2BR-2BA-984sf / Market Rate / Market Rate	No	No	8	\$775	\$754	2.7%						
3BR-2BA-1300sf / 50% of AMI / 50% of AMI	No	Yes	6	\$950	\$352	62.9%						
3BR-2BA-1300sf / 60% of AMI / 60% of AMI	No	Yes	12	\$950	\$765	19.5%						
3BR-2BA-1300sf / Market Rate / Market Rate	No	No	4	\$950	\$844	11.2%						
Total / Average			106	\$787	\$581	26.2%						

Our analysis suggests an average unrestricted market rent of \$787 for the subject property. This is compared with an average current rent of \$581, yielding an unrestricted market rent advantage of 26.2 percent. Overall, the subject property appears to be priced at or below unrestricted market rents for the area.

We selected a total of 7 properties as comparables for purposes of this analysis. The average occupancy at the select rent comparables currently stands at 96 percent.

Occupancy rates for the selected rent comparables are broken out below:

	Occupancy Rate, Select Comparables													
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market						
0-Bedroom														
1-Bedroom	100%				100%	100%		95%						
2-Bedroom	99%				97%	100%		94%						
3-Bedroom	100%				80%	94%		88%						
4-Bedroom														
Total	100%				97%	99%		94%						

Occupancy rates for all stabilized market area properties are broken out below:

	Occupancy Rate, Stabilized Properties													
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market						
0-Bedroom	100%							80%						
1-Bedroom	95%				98%	97%		95%						
2-Bedroom	100%				99%	93%		95%						
3-Bedroom	100%				93%	89%		94%						
4-Bedroom						90%								
Total	97%				98%	93%		95%						

Restricted Rent Analysis

In this section we develop a restricted market rent conclusion and an achievable rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was a restricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized restricted rent properties as comparables for purposes of our rent comparability analysis.

Comparables with market rents are used when a sufficient number of restricted rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

Rent Comparables, Restricted Rent, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in a restricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

A narrative regarding the selection of our rent comparables, the basis for our rent adjustments, and the development of our rent conclusion for the 1BR/1BA/787sf units is presented in this section.

Selection of Rent Comparables

Our analysis included the evaluation of a total of 30 unit types found at 9 properties in the vicinity of the subject property. We selected the 5 most comparable unit types to utilize as rent comparables for purposes of this analysis. A description of the selected comparables is found below:

Comparable 1

Arbor Pointe Phase 1 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 6 1BR/1BA/758sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$489 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 2

Arbor Pointe Phase 2 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2010. This property includes a total of 10 1BR/1BA/758sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$489 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 3

Ashley Station, Phase 1 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2006. This property includes a total of 4 1BR/1BA/721sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$509 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 4

Ashley Station, Phase 2 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2008. This property includes a total of 25 1BR/1BA/664sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$509 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 5

Eagles Trace is a restricted rent property located in Columbus, Georgia that was originally constructed in 1958. The property underwent a major renovation in 2002. This property includes a total of 25 1BR/1BA/732.5sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$450 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

As noted earlier, our analysis included a total of 30 unit types found at 9 properties in the vicinity of the subject property. Each comparable was ranked according to the total dollar value of adjustments arrived at in our rent comparability analysis. The 5 comparables with the least adjustments were designated as being most comparable for rent comparability purposes. These comparables are highlighted in the table found below:

		Identifying the I	Best Rent Compara	ables

Rent Adjustments

The adjustments used in this analysis came from feedback from experienced managers of multifamily properties. We interviewed property management personnel from several national companies to come up with a range of rent adjustments for this analysis. For certain physical features of the subject property, we used the survey average. For location, condition, effective age and other physical features, we identified the adjustments that minimized the sample variance in our data set. This technique, known as statistical extraction, is very similar to the matched-paired approach.

We used the HUD Utility Schedule Model to derive utility adjustments in this analysis. The HUD model - which accounts for building type, building age, and unit size - included a current energy survey for the market area.

Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made.

Indicated Rent

Our analysis suggests a rent of \$500 for the 1BR/1BA/787sf units at the subject property.

In arriving at our rent conclusion we considered the number and sum of adjustments as well as the ratio of the adjusted rent to the unadjusted rent for each comparable. We also considered a variety of statistical measures including the mean, median, range and standard deviation of the adjusted rents. We even evaluated the modified mean - the average adjusted rent with the high and low samples eliminated from the data - in arriving at our rent conclusion.

A narrative regarding the selection of our rent comparables, the basis for our rent adjustments, and the development of our rent conclusion for the 2BR/2BA/984sf units is presented in this section.

Selection of Rent Comparables

Our analysis included the evaluation of a total of 30 unit types found at 9 properties in the vicinity of the subject property. We selected the 5 most comparable unit types to utilize as rent comparables for purposes of this analysis. A description of the selected comparables is found below:

Comparable 1

Arbor Pointe Phase 1 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 15 2BR/2BA/1069sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$585 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 2

Arbor Pointe Phase 2 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2010. This property includes a total of 25 2BR/2BA/1069sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$585 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 3

Lumpkin Park is a restricted rent property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 126 2BR/2BA/1157sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$590 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 4

Midtown Square is a restricted rent property located in Columbus, Georgia that was originally constructed in 2002. This property includes a total of 86 2BR/1BA/1175sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$545 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 5

Victory Crossing Apartments is a restricted rent property located in Columbus, Georgia that was originally constructed in 2003. This property includes a total of 96 2BR/2BA/1002sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$570 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

As noted earlier, our analysis included a total of 30 unit types found at 9 properties in the vicinity of the subject property. Each comparable was ranked according to the total dollar value of adjustments arrived at in our rent comparability analysis. The 5 comparables with the least adjustments were designated as being most comparable for rent comparability purposes. These comparables are highlighted in the table found below:

Identifying the Best Rent Comparables										
Property	Property Key	Project Type	Unit Type	Indicated Rent	Adjustments	Rank				
Arbor Pointe Phase 1	008	Family	1BR/1BA/758sf	\$578	\$249	25				
Arbor Pointe Phase 1	008	Family	2BR/2BA/1069sf	\$550	\$105	4

Rent Adjustments

The adjustments used in this analysis came from feedback from experienced managers of multifamily properties. We interviewed property management personnel from several national companies to come up with a range of rent adjustments for this analysis. For certain physical features of the subject property, we used the survey average. For location, condition, effective age and other physical features, we identified the adjustments that minimized the sample variance in our data set. This technique, known as statistical extraction, is very similar to the matched-paired approach.

We used the HUD Utility Schedule Model to derive utility adjustments in this analysis. The HUD model - which accounts for building type, building age, and unit size - included a current energy survey for the market area.

Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made.

Indicated Rent

Our analysis suggests a rent of \$550 for the 2BR/2BA/984sf units at the subject property.

In arriving at our rent conclusion we considered the number and sum of adjustments as well as the ratio of the adjusted rent to the unadjusted rent for each comparable. We also considered a variety of statistical measures including the mean, median, range and standard deviation of the adjusted rents. We even evaluated the modified mean - the average adjusted rent with the high and low samples eliminated from the data - in arriving at our rent conclusion.

A narrative regarding the selection of our rent comparables, the basis for our rent adjustments, and the development of our rent conclusion for the 3BR/2BA/1300sf units is presented in this section.

Selection of Rent Comparables

Our analysis included the evaluation of a total of 30 unit types found at 9 properties in the vicinity of the subject property. We selected the 5 most comparable unit types to utilize as rent comparables for purposes of this analysis. A description of the selected comparables is found below:

Comparable 1

Arbor Pointe Phase 1 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 4 3BR/2BA/1206sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$662 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 2

Arbor Pointe Phase 2 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2010. This property includes a total of 7 3BR/2BA/1206sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$662 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 3

Ashley Station, Phase 1 is a restricted rent property located in Columbus, Georgia that was originally constructed in 2006. This property includes a total of 4 3BR/2.5BA/1250sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$680 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 4

Lumpkin Park is a restricted rent property located in Columbus, Georgia that was originally constructed in 2009. This property includes a total of 66 3BR/2BA/1384sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$670 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

Comparable 5

Victory Crossing Apartments is a restricted rent property located in Columbus, Georgia that was originally constructed in 2003. This property includes a total of 76 3BR/2BA/1209.5sf units that were selected for purposes of this rent comparability analysis. Management is currently charging \$647 (net of concessions) for this unit type. Further details regarding the utility configuration and amenities associated with this unit type are found in the Appendix to this report.

As noted earlier, our analysis included a total of 30 unit types found at 9 properties in the vicinity of the subject property. Each comparable was ranked according to the total dollar value of adjustments arrived at in our rent comparability analysis. The 5 comparables with the least adjustments were designated as being most comparable for rent comparability purposes. These comparables are highlighted in the table found below:

Identifying the Best Rent Comparables										
Property	Property Key	Project Type	Unit Type	Indicated Rent	Adjustments	Rank				
Arbor Pointe Phase 1	008	Family	1BR/1BA/758sf	\$644	\$377	25				
Arbor Pointe Phase 1	008	Family	2BR/2BA/1069sf	\$617	\$208	17

Rent Adjustments

The adjustments used in this analysis came from feedback from experienced managers of multifamily properties. We interviewed property management personnel from several national companies to come up with a range of rent adjustments for this analysis. For certain physical features of the subject property, we used the survey average. For location, condition, effective age and other physical features, we identified the adjustments that minimized the sample variance in our data set. This technique, known as statistical extraction, is very similar to the matched-paired approach.

We used the HUD Utility Schedule Model to derive utility adjustments in this analysis. The HUD model - which accounts for building type, building age, and unit size - included a current energy survey for the market area.

Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made.

Indicated Rent

Our analysis suggests a rent of \$650 for the 3BR/2BA/1300sf units at the subject property.

In arriving at our rent conclusion we considered the number and sum of adjustments as well as the ratio of the adjusted rent to the unadjusted rent for each comparable. We also considered a variety of statistical measures including the mean, median, range and standard deviation of the adjusted rents. We even evaluated the modified mean - the average adjusted rent with the high and low samples eliminated from the data - in arriving at our rent conclusion.

Restricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were a restricted property:

Restricted Market Rent Conclusion										
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market						
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	Yes	6	\$500						
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	Yes	12	\$500						
1BR-1BA-787sf / Market Rate / Market Rate	No	No	3	\$500						
2BR-2BA-984sf / 50% of AMI / 50% of AMI	No	Yes	19	\$550						
2BR-2BA-984sf / 60% of AMI / 60% of AMI	No	Yes	36	\$550						
2BR-2BA-984sf / Market Rate / Market Rate	No	No	8	\$550						
3BR-2BA-1300sf / 50% of AMI / 50% of AMI	No	Yes	6	\$650						
3BR-2BA-1300sf / 60% of AMI / 60% of AMI	No	Yes	12	\$650						
3BR-2BA-1300sf / Market Rate / Market Rate	No	No	4	\$650						
Total / Average			106	\$561						

Our analysis suggests an average restricted market rent of \$561 for the subject property.

We selected a total of 9 properties as comparables for purposes of this analysis. The average occupancy at the select rent comparables currently stands at 94 percent.

The occupancy rate of the selected rent compatrables is broken out in the tables below:

	Occupancy Rate, Select Comparables											
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market				
0-Bedroom												
1-Bedroom	100%				100%	94%		95%				
2-Bedroom	99%				97%	95%		90%				
3-Bedroom	100%				80%	92%		75%				
4-Bedroom												
Total	100%				97%	94%		90%				

Occupancy rates for all stabilized market area properties are broken out below:

	Occupancy Rate, Stabilized Properties											
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market				
0-Bedroom	100%							80%				
1-Bedroom	95%				98%	97%		95%				
2-Bedroom	100%				99%	93%		95%				
3-Bedroom	100%				93%	89%		94%				
4-Bedroom						90%						
Total	97%				98%	93%		95%				

Achievable Rent Conclusion

The next step in our analysis is to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering market rents, program rent limits, and any other applicable rent restrictions on the subject property.

Our analysis begins by establishing the applicable program rent limits for the subject property. Program rent limits include any applicable LIHTC and FMR rent limits. LIHTC rent limits typically apply to units benefitting from tax credit and/or bond financing. The LIHTC rent limits for applicable units at the subject property follow:

	LIHTC Rent Limits											
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent						
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	Yes	6	\$478	\$113	\$365						
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	Yes	12	\$573	\$113	\$460						
1BR-1BA-787sf / Market Rate / Market Rate	No	No	-	-	-	-						
2BR-2BA-984sf / 50% of AMI / 50% of AMI	No	Yes	19	\$573	\$142	\$431						
2BR-2BA-984sf / 60% of AMI / 60% of AMI	No	Yes	36	\$688	\$142	\$546						
2BR-2BA-984sf / Market Rate / Market Rate	No	No	-	-	-	-						
3BR-2BA-1300sf / 50% of AMI / 50% of AMI	No	Yes	6	\$663	\$188	\$475						
3BR-2BA-1300sf / 60% of AMI / 60% of AMI	No	Yes	12	\$795	\$188	\$607						
3BR-2BA-1300sf / Market Rate / Market Rate	No	No	-	-	-	-						
Total / Average			91	\$647	\$145	\$502						

Our analysis suggests an average net LIHTC rent limit of \$502 for 91 applicable units at the subject property.

FMR rent limits typically apply to units benefitting from HOME funds. The FMR rent limits for applicable units at the subject property follow:

	FMR Rent Limits											
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent						
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	Yes	-	-	-	-						
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	Yes	-	-	-	-

Total / Average			-	-	-	-						

HOME funding is not proposed for the subject property.

Units benefitting exclusively from tax credits and/or bond financing are subject to LIHTC rent limits. Units benefitting from HOME funds in addition to tax credit and/or bond financing are subject to the lesser of LIHTC rent limits or FMR rent limits. Units benefitting from project-based rental assistance are normally limited to unrestricted market rent. With these parameters in mind, the following table sets forth the concluded program rent limits for applicable units at the subject property:

Program Rent Limits										
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	LIHTC	FMR	Market	Program			
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	Yes	6	\$365	-	\$650	\$650			
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	Yes	12	\$460	-	\$650	\$650			
1BR-1BA-787sf / Market Rate / Market Rate	No	No	-	-	-	-	-			
2BR-2BA-984sf / 50% of AMI / 50% of AMI	No	Yes	19	\$431	-	\$775	\$775			
2BR-2BA-984sf / 60% of AMI / 60% of AMI	No	Yes	36	\$546	-	\$775	\$775			
2BR-2BA-984sf / Market Rate / Market Rate	No	No	-	-	-	-	-			
3BR-2BA-1300sf / 50% of AMI / 50% of AMI	No	Yes	6	\$475	-	\$950	\$950			
3BR-2BA-1300sf / 60% of AMI / 60% of AMI	No	Yes	12	\$607	-	\$950	\$950			
3BR-2BA-1300sf / Market Rate / Market Rate	No	No	-	-	-	-	-			
Total / Average			91	\$502	-	\$785	\$785			

Our analysis suggests an average program rent limit of \$785 for 91 applicable units at the subject property.

Now that we have established program rent limits, we are in a position to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering unrestricted and restricted market rents, program rent limits, and any other applicable rent restrictions on the subject property. The following table summarizes our findings:

Achievable Rents										
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Program	Unrestricted	Restricted	Achievable	Proposed	Advantage	
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	Yes	6	\$650	\$650	\$500	\$650	\$352	45.8%	
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	Yes	12	\$650	\$650	\$500	\$650	\$565	13.1%	
1BR-1BA-787sf / Market Rate / Market Rate	No	No	3	-	\$650	\$500	\$650	\$625	3.8%	
2BR-2BA-984sf / 50% of AMI / 50% of AMI	No	Yes	19	\$775	\$775	\$550	\$775	\$352	54.6%	
2BR-2BA-984sf / 60% of AMI / 60% of AMI	No	Yes	36	\$775	\$775	\$550	\$775	\$650	16.1%	
2BR-2BA-984sf / Market Rate / Market Rate	No	No	8	-	\$775	\$550	\$775	\$754	2.7%	
3BR-2BA-1300sf / 50% of AMI / 50% of AMI	No	Yes	6	\$950	\$950	\$650	\$950	\$352	62.9%	
3BR-2BA-1300sf / 60% of AMI / 60% of AMI	No	Yes	12	\$950	\$950	\$650	\$950	\$765	19.5%	
3BR-2BA-1300sf / Market Rate / Market Rate	No	No	4	-	\$950	\$650	\$950	\$844	11.2%	
Total / Average			106	\$785	\$787	\$561	\$787	\$581	26.2%	

Our analysis suggests an average achievable rent of \$787 for the subject property. This is compared with an average proposed rent of \$581, yielding an achievable rent advantage of 26.2 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

Finally, assuming no rent subsidies, we arrive at the following achievable rents for units at this property:

Achievable Rents, No Rent Subsidies									
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Program	Unrestricted	Restricted	Achievable	Proposed	Advantage
1BR-1BA-787sf / 50% of AMI / 50% of AMI	No	No	6	\$365	\$650	\$500	\$365	\$352	3.6%
1BR-1BA-787sf / 60% of AMI / 60% of AMI	No	No	12	\$460	\$650	\$500	\$460	\$565	-22.8%
1BR-1BA-787sf / Market Rate / Market Rate	No	No	3	-	\$650	\$500	\$650	\$625	3.8%
2BR-2BA-984sf / 50% of AMI / 50% of AMI	No	No	19	\$431	\$775	\$550	\$431	\$352	18.3%
2BR-2BA-984sf / 60% of AMI / 60% of AMI	No	No	36	\$546	\$775	\$550	\$546	\$650	-19.0%
2BR-2BA-984sf / Market Rate / Market Rate	No	No	8	-	\$775	\$550	\$775	\$754	2.7%
3BR-2BA-1300sf / 50% of AMI / 50% of AMI	No	No	6	\$475	\$950	\$650	\$475	\$352	25.9%
3BR-2BA-1300sf / 60% of AMI / 60% of AMI	No	No	12	\$607	\$950	\$650	\$607	\$765	-26.0%
3BR-2BA-1300sf / Market Rate / Market Rate	No	No	4	-	\$950	\$650	\$950	\$844	11.2%
Total / Average			106	\$431	\$787	\$561	\$544	\$581	-6.8%

DEMAND ANALYSIS

Overview

In this section we evaluate demand for the subject property using the recommended demand methodology promulgated by the National Council of Affordable Housing Market Analysts (NCAHMA). For purposes of this analysis, we define demand as the number of income-qualified renter households (by household size and unit type) that would qualify to live at the subject property at the lesser of the developer's proposed rents or achievable rents.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

			Re	nter Househo	lds, by Incom	e, by Size						
	2014	\$		2015								
Min		Max	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7+ Person			
\$0	to	\$9,999	2,397	686	419	302	131	51	35			
\$0	to	\$19,999	3,902	1,416	968	629	259	101	69			
\$0	to	\$29,999	5,002	2,042	1,395	866	389	151	104			
\$0	to	\$39,999	5,555	2,595	1,722	1,141	550	214	147			
\$0	to	\$49,999	5,784	2,964	1,916	1,419	741	288	198			
\$0	to	\$59,999	5,911	3,185	2,068	1,583	826	321	221			
\$0	to	\$69,999	6,078	3,317	2,177	1,676	866	337	232			
\$0	to	\$79,999	6,175	3,393	2,240	1,729	889	346	238			
\$0	or	more	6,450	3,611	2,420	1,882	955	371	255			
0	Grand To	tal				15,945						

Source: U.S. Census, Claritas, ESRI; Allen & Associates

Our analysis includes an estimate of demand along with capture rate and penetration rate estimates. Capture rates were computed two ways: (1) On a gross basis (the number of proposed units divided by qualified demand) and (2) On a <u>net</u> basis (the number of proposed units divided by qualified demand minus competing & pipeline units). Penetration rates are defined as the number of proposed units plus competing & pipeline units divided by incomequalified demand. In the following pages we provide detailed listings of competing & pipeline units in the market area broken by unit type.

			Demand E	stimate		13,791			

Our analysis suggests project-level demand for a total of 13,791 size- and income-qualified units in the market area.

Capture Rates

In this section, we summarize our demand conclusions and estimate the capture rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

			Sı	bject Prope	rty Units (To	tal)			
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR	18							3	21
2BR	55							8	63
3BR	18							4	22
4BR									
Tot	91							15	106

	Subject Property Units (Vacant at Market Entry)									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot	
0BR										
1BR	18							3	21	
2BR	55							8	63	
3BR	18							4	22	
4BR										
Tot	91							15	106	

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

	Gross Demand								
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR	4,600							3,880	8,480
2BR	5,391							3,971	9,362
3BR	5,923							4,690	10,613
4BR									
Tot	6,757							6,253	13,791

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by gross demand. Underwriters often utilize capture rate limits of 10 to 25 percent using this methodology. Our estimates are presented below:

	Capture Rates (Subject Property Onits / Gross Demand)									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot	
0BR										
1BR	0.4%							0.1%	0.2%	
2BR	1.0%							0.2%	0.7%	
3BR	0.3%							0.1%	0.2%	
4BR										
Tot	1.3%							0.2%	0.8%	

Capture Rates (Subject Property Units / Gross Demand)

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by

unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

vacant competing & Fipeline Onits									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR								31	31
2BR	1							92	93
3BR								7	7
4BR									
Tot	1							130	131

Vacant Competing & Pipeline Units

The next step in our analysis is to subtract the number of vacant competing & pipeline units from gross demand to arrive at a net demand estimate for the subject property units. As described earlier, unit-level net demand estimates are found in the body of the chart found below; project-level net demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level net demand may not add up to project-level net demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level net demand.

Net Demand (Cross Demand - Vacant Competing & Expense Onits)									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR	4,600							3,849	8,449
2BR	5,390							3,879	9,269
3BR	5,923							4,683	10,606
4BR									
Tot	6,756							6,123	13,660

Net Demand	(Gross Demand - Vacant Competing & Pipeline Units)	
Not Domana	(Cross Demand Vacant Competing & Penne Onits)	

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by net demand. Underwriters often utilize capture rate limits of 10 to 20 percent using this methodology. Our estimates are presented below:

	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR	0.4%							0.1%	0.2%
2BR	1.0%							0.2%	0.7%
3BR	0.3%							0.1%	0.2%
4BR									
Tot	1.3%							0.2%	0.8%

Capture Rates (Subject Property Units / Net Dema	and)
--	------

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

Penetration Rates

In this section, we summarize our demand conclusions and estimate the penetration rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

	Subject Property Units (Total)											
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot			
0BR												
1BR	18							3	21			
2BR	55							8	63			
3BR	18							4	22			
4BR												
Tot	91							15	106			

Subject Property Units (Vacant at Market Entry)											
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot		
0BR											
1BR	18							3	21		
2BR	55							8	63		
3BR	18							4	22		
4BR											
Tot	91							15	106		

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

_	Gross Demand											
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot			
0BR												
1BR	4,600							3,880	8,480			
2BR	5,391							3,971	9,362			
3BR	5,923							4,690	10,613			
4BR												
Tot	6,757							6,253	13,791			

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by unit/income type. This information will be used to derive our penetration rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

	Vacant Competing & Pipeline Units											
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot			
0BR												
1BR								31	31			
2BR	1							92	93			
3BR								7	7			
4BR												
Tot	1							130	131			

The next step in our analysis is to compute inclusive supply for the market area by unit/income type. Inclusive

supply will be taken into account in our penetration rate estimate for the subject property. For purposes of this estimate, inclusive supply consists of vacant subject property units plus vacant competing & pipeline units.

	inclusive oupping (oubject i roperty onits i vacant competing of i perine onits)									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot	
0BR										
1BR	18							34	52	
2BR	56							100	156	
3BR	18							11	29	
4BR										
Tot	92							145	237	

Inclusive Supply (Subject Property Units + Vacant Competing & Pipeline Units)

The next step in our analysis is to compute the penetration rate for the project. For purposes of this computation, penetration rate is defined as inclusive supply divided by gross demand. Underwriters often utilize penetration rate limits of 10 to 20 percent using this methodology. Our estimates are presented below:

	Tenetration Mates (inclusive Supply 7 Gross Demand)									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot	
0BR										
1BR	0.4%							0.9%	0.6%	
2BR	1.0%							2.5%	1.7%	
3BR	0.3%							0.2%	0.3%	
4BR										
Tot	1.4%							2.3%	1.7%	

Penetration Rates (Inclusive Supply / Gross Demand)

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Absorption Period

In this section, we estimate the absorption period for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

			Oubject	i roperty onit	3 (10(a))			
	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								
1BR	18							3
2BR	55							8
3BR	18							4
4BR								

Subject Property Units (Total)

	Subject Property Units (Vacant at Market Entry)											
	Sub	20%	30%	40%	50%	60%	80%	Mkt				
0BR												
1BR	18							3				
2BR	55							8				
3BR	18							4				
4BR												

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Our analysis uses the unit-level demand estimates derived previously.

	Gross Demand											
	Sub	20%	30%	40%	50%	60%	80%	Mkt				
0BR												
1BR	4,600							3,880				
2BR	5,391							3,971				
3BR	5,923							4,690				
4BR												

The next step in our analysis is to apply an annual growth & movership rate to derive an annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

Annual Growth & Movership Rate						
Growth	-0.3%					
Movership	32.6%					
Total	32.3%					

Growth & Movership Estimate

	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								
1BR	1,486							1,253
2BR	1,741							1,283
3BR	1,913							1,515
4BR								

The next step in our analysis is to account for secondary market area migration in our annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

> Secondary Market Area 20%

	Growth & Movership Estimate										
	Sub	20%	30%	40%	50%	60%	80%	Mkt			
0BR											
1BR	1,857							1,567			
2BR	2,177							1,603			
3BR	2,391							1,894			
4BR											

The next step in our analysis is to estimate fair share, or the proportion of growth and movership that we would expect the subject property to capture. The fair share analysis is used extensively in single-family, multifamily, commercial, and retail market studies. The books entitled <u>Market Analysis for Valuation Appraisals</u> (1994, Appraisal Institute) and <u>Market Analysis and Highest & Best Use</u> (2005, Appraisal institute) provide a good overview of this technique and its application to a variety of property types.

Based on our review of the subject and competing properties, along with their relative conditions/locations, we arrive at the following fair share estimates for the various unit/income types at the subject property.

Competing Properties								
	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								3
1BR	4				2	7		20
2BR	5				4	12		29
3BR	4				4	12		17
4BR						2		

			Fair Share				
Sub	20%	30%	40%	50%	60%	80%	Mkt
10.0%							2.0%
10.0%							2.0%
10.0%							2.0%
	10.0% 10.0%	10.0% 10.0%	10.0% 10.0%	Sub 20% 30% 40% 10.0%	Sub 20% 30% 40% 50% 10.0%	Sub 20% 30% 40% 50% 60% 10.0% 10.0% Image: Constraint of the second s	Sub 20% 30% 40% 50% 60% 80% 10.0% 10.0% Image: Constraint of the second s

Applying the concluded fair share estimates to annual growth & movership and dividing by twelve yields the following monthly absorption rate estimates for the various unit/income types at the subject property.

Monthly	Ahsor	ntion	Rate	Estimate	
WORLIN		puon	I Vale	Loundle	

	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								
1BR	15.5							2.6
2BR	18.1							2.7
3BR	19.9							3.2
4BR								

The next step in our analysis is to estimate stabilized occupancy by unit/income type for the subject property. These estimates, which were based on data previously presented in the supply analysis and rent comparability analysis sections of this report, are found below.

Rental Property Inventory, Confirmed, Inside Mar	rket Area, Family, Stabilized Occupanc	у
--	--	---

	Rental I	Toperty invent	ory, comme		a Alea, I alling		cupancy	
	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								80%
1BR	100%				100%	97%		95%
2BR	100%				99%	93%		95%
3BR	100%				93%	89%		94%
4BR						90%		

	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								
1BR	100%				100%	94%		95%
2BR	99%				97%	95%		94%
3BR	100%				80%	92%		88%
4BR								

Concluded Stabilized Occupancy Rate

	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								
1BR	97%							93%
2BR	97%							93%
3BR	97%							93%
4BR								

Applying the stabilized occupancy rate estimates to the number of vacant subject property units at market entry, yields the number of occupied units by unit/income type at stabilization as set forth below.

Occupied Units at Stabilization

	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								
1BR	17							3
2BR	53							7
3BR	17							4
4BR								

Dividing the number of occupied units at stabilization by the monthly absorption rate yields an absorption period estimate by unit/income type for the various units at the subject property. Underwriters often utilize absorption period limits of 12 to 18 months for projects similar to the subject property. Our absorption period estimates are found below.

Absorption Period (Months to Stabilization)

					e etablization)			
	Sub	20%	30%	40%	50%	60%	80%	Mkt
0BR								
1BR	1							1
2BR	3							3
3BR	<1							1
4BR								

Our analysis suggests that the subject property will stabilize at 96 percent occupancy. We estimate 3 months of absorption and an average absorption rate of 34.8 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

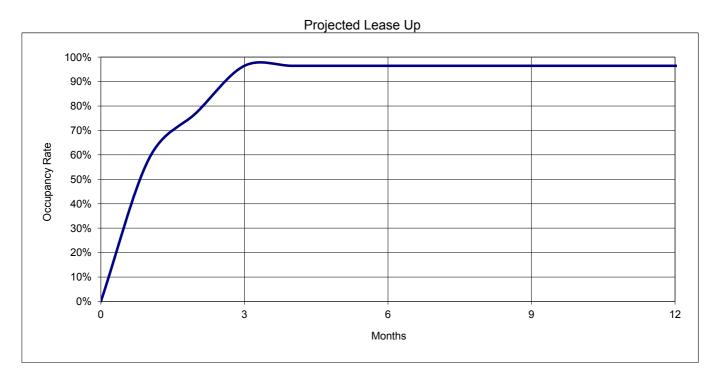

Absorption rates for multifamily properties depend on a variety of factors: (1) The competitive environment in which the property resides; (2) The pricing of the subject property units relative to competing units, (3) The presence of rent or income restrictions at the subject property; and (4) The availability of any rent concessions or rental assistance at the subject property. Subsidized properties normally lease up at a rate of 15-20 units per month. Unsubsidized properties with rent and income restrictions tyically fill at a rate of 5-10 units per month. Market rate properties normally lease up at a rate of 10-15 units per month.

As part of our analysis, we inquired about the absorption history for every property we surveyed. The following list summarizes our findings:

Key	Project	Built	Renovated	Rent Type	Осс Туре	Status	Tot Units	Abs
008	Arbor Pointe Phase 1	2009	na	Restricted	Family	Stabilized	148	13.5
009	Arbor Pointe Phase 2	2010	na	Restricted	Family	Stabilized	148	14.8
010	Arbor Pointe Phase 3	2012	na	Restricted	Elderly	Stabilized	120	80.0
014	Avalon Apartments	2009	na	Restricted	Family	Stabilized	232	13.7
060	Hardaway Townhouses	2009	na	Market Rate	Family	Stabilized	41	4.1
085	Lumpkin Park	2009	na	Restricted	Family	Stabilized	192	32.0

Absorption Analysis

In this section, we analyze the anticipated lease up for the subject property. We begin our analysis by taking the the absorption period conclusions from the previous section and restating them graphically as illustrated below.

Our analysis suggests that the subject property will achieve 70 percent occupancy in 1 months, 80 percent occupancy in 2 months, and 90 percent occupancy in 2 months. We anticipate that the subject property will stabilize at 96 percent occupancy in 3 months.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

Sensitivity Analysis

We also explored the relationship between rent level, capture rates, penetration rates, and absorption period. For purposes of this analysis, we forecasted demand and fill rates at 75%, 80%, 85%, 90%, 95% and 100% of achievable rent (derived earlier in this report). Our analysis is summarized below:

Sensitivity Analysis									
Scenario	Capture Rate	Penetration Rate	Absorption						
Developer's Proposed Rent	0.8%	1.7%	3 months						
100% of Achievable Rent	0.8%	1.7%	3 months						
95% of Achievable Rent	0.8%	1.7%	3 months						
90% of Achievable Rent	0.8%	1.7%	3 months						
85% of Achievable Rent	0.8%	1.7%	3 months						
80% of Achievable Rent	0.8%	1.7%	3 months						
75% of Achievable Rent	0.8%	1.7%	3 months						

Our analysis suggests the following relationship between rent levels and fill rates: At the developer's proposed rent we anticipate a 3-month absorption period; at 100% of achievable rent we anticipate a 3-month absorption period; at 75% of achievable rent we anticipate a 3-month absorption period.

DEMAND ANALYSIS (STATE HOUSING FINANCE AGENCY)

Overview

In this section we evaluate demand for the subject property using the DCA demand methodology. For purposes of this analysis, we define DCA demand as the number of new income-qualified and existing income-qualified overburdened and substandard renter households that would qualify to live at the subject property at the lesser of achievable rents or the sponsor's proposed rents.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

			Re	nter Househo	lds, by Incom	ie, by Size						
	2014	\$		2014								
Min		Max	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7+ Person

Demand Estimate

5,939

\$6,446

Our analysis suggests demand for a total of 5,939 size- and income-qualified units in the market area.

Demand Estimate, 3-Bedroom, Market Rate

In this section we estimate demand for the 3-Bedroom / Market Rate units at the subject property. Our analysis assumes a total of 4 units, 4 of which are anticipated to be vacant on market entry. This demand estimate utilizes the basic assumptions and data found below:

Unit Details								
Target Population	Family Households							
Unit Type	3-Bedroom							
Rent Type	Market Rate							
Income Limit	Market Rate							
Total Units	4							
Vacant Units at Market	Entry 4							
Minimum Qualified Income								
Net Rent	\$844							
Utilities	\$188							

Utilities	\$188
Gross Rent	\$1,032
Income Qualification Ratio	35%
Minimum Qualified Income	\$2,949
Months/Year	12
Minimum Qualified Income	\$35,383

Renter Households, by Income, by Size

Subtotal			5,626	3,380	2,238	1,706	879	-	-
			Demand E	stimate		13,828			

Our analysis suggests project-level demand for a total of 13,828 size- and income-qualified units in the market area.

Demand & Capture Rate Estimate

In this section, we derive our DCA demand and capture rate estimates for the subject property. Our analysis, which begins with the income-qualified renter household estimates developed above, is found below.

	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot	
0BR										
1BR	4,612							3,890	8,502	
2BR	5,406							3,981	9,387	
3BR	5,939							4,703	10,642	
4BR										
Tot	6,775							6,270	13,828	

Income Qualified Renter Households

The next step in our analysis is to account for 2 years of growth to estimate the demand stemming from new income gualified rental households. Our estimates are found below.

Annual Renter Household Growth Rate

-0.3%	

New Rental Households									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR	-25							-21	-46
2BR	-29							-21	-51
3BR	-32							-25	-57
4BR									
Tot	-37							-34	-75

The next step in our analysis is to estimate existing demand stemming from income-qualified overburdened renter households in this market area. Our estimates are found below.

Overburdened Renter Households

35.0%

	Existing Households - Rent Overburdened									
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot	
0BR										
1BR	1,615							1,362	2,977	
2BR	1,893							1,394	3,287	
3BR	2,080							1,647	3,727	
4BR										
Tot	2,373							2,196	4,842	

Existing Households - Rent Overburdened

The next step in our analysis is to estimate existing demand stemming from income-qualified substandard renter households in this market area. Our estimates are found below.

Substandard Renter Households

9.6%

	Existing Households - Substandard										
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot		
0BR											
1BR	441							372	814		
2BR	517							381	898		
3BR	568							450	1,018		
4BR											
Tot	648							600	1,323		

.

The next step in our analysis is to account for elderly homeowners likely to convert to rental housing. This component may not comprise more than 2 percent of total demand. Our estimates are found below.

			,	,			0		
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR									
2BR									
3BR									
4BR									
Tot									

Elderly Homeowners Likely to Convert to Rental Housing

The next step in our analysis is to tally up gross demand for the subject property. Our estimates are found below.

Gross Demand										
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot	
0BR										
1BR	2,032							1,714	3,745	
2BR	2,381							1,754	4,135	
3BR	2,616							2,072	4,688	
4BR										
Tot	2,984							2,762	6,091	

The next step in our analysis is to tabulate the number of vacant competing, pipeline & newly-constructed units in the market area by unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing, pipeline & newly-constructed units is found below.

		Vac	cant Compet	ing, Pipeline	e & Newly-C	onstructed L	Inits		
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR								31	31
2BR	1							92	93
3BR								7	7
4BR									
Tot	1							130	131

Vacant Competing, Pipeline & Newly-Constructed Units

The next step in our analysis is to subtract the number of vacant competing, pipeline & newly-constructed units from gross demand to arrive at a net demand estimate for the subject property units. As described earlier, unit-level net demand estimates are found in the body of the chart found below; project-level net demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level net demand may not add up to project-level net demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level net demand.

	Net Demand (Gross Demand - Vacant Competing, Pipeline & Newly-Constructed Units)										
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot		
0BR											
1BR	2,032							1,683	3,714		
2BR	2,380							1,662	4,042		
3BR	2,616							2,065	4,681		
4BR											
Tot	2,983							2,632	5,960		

Net Demand (Gross Demand - Vacant Competing, Pipeline & Newly-Constructed Units)

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by net demand. Our estimates are presented below:

Subject Property Units (Vac	ant at Market Entry)
-----------------------------	----------------------

				perif enne	(······································			
	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR	18							3	21
2BR	55							8	63
3BR	18							4	22
4BR									
Tot	91							15	106

Capture Rates (Subject Property Units / Net Dem

	Sub	20%	30%	40%	50%	60%	80%	Mkt	Tot
0BR									
1BR	0.9%							0.2%	0.6%
2BR	2.3%							0.5%	1.6%
3BR	0.7%							0.2%	0.5%
4BR									
Tot	3.1%							0.6%	1.8%

Our findings are summarized below.

Project-Wide Capture Rate - Subsidized Units	3.1%
Project-Wide Capture Rate - LIHTC Units	
Project-Wide Capture Rate - Market Units	0.6%
Project-Wide Capture Rate - All Units	1.8%
Project-Wide Absorption Period (Months)	3 months

INTERVIEWS

Housing Authority

Our analysis included an interview with the local housing authority to identify any competing projects in the market area. All such projects have been accounted for in the supply analysis section of this report.

Planning & Zoning

Our analysis included an inerview with the local planning and zoning office to identify any approved projects in the pipeline at this time. All such projects have been accounted for in the supply analysis section of this report.

Property Management

Our research also included an interview with management at each property included in this report to inquire about the local economy and housing market. Select notes from these interviews follow:

Property Name: Arbor Pointe Phase 1Property Key: 008Person Interviewed: Ms. Kasey, ManagementPhone Number: (706) 685-0777Notes: 2007 TC's awarded for construction of this property with 74 units of project based rental assistance and18 public housing subsidized units available to tenants.Property shares amenities with Phase 2 and 3.

Property Name: Arbor Pointe Phase 2Property Key: 009Person Interviewed: Ms. Kasey, ManagementPhone Number: (706) 685-0777Notes: 2008 TC's awarded for construction of this property with 75 units of project based rental assistance or
public housing subsidized units available to tenants. Property shares amenities with Phase 1 and 3.

Property Name: Armour Landing ApartmentsProperty Key: 011Person Interviewed: Ms. Teresa, ManagementPhone Number: (706) 322-8270Notes: Upstairs units with fireplaces are at the higher rent rates. Sister property to The Cloister. There are no
new apartments or businesses nearby. Contact advised that businesses in the area are not closing or laying
off employees.

Property Name: Ashley Station, Phase 1Property Key: 012Person Interviewed: Ms. Kimberly, Asst ManagerPhone Number: (706) 576-6831Notes: 2004 TC's awarded for construction of this property with 72 units of project based rental assistanceavailable to tenants. There are no new apartments or businesses nearby. Contact advised that businesses inthe area are not closing or laying off employees.

Property Name: Ashley Station, Phase 2Property Key: 013Person Interviewed: Ms. Kimberly, Asst ManagerPhone Number: (706) 576-6831Notes: 2006 TC's awarded for construction of this HOPE VI property with 73 units of operational subsidies,
through HA of Columbus, available to tenants. One 4-story building, with 62+ year head of household age
requirements, has additional amenities suitable for older residents, including controlled access and elevator.
There are no new apartments or businesses nearby. Contact advised that businesses in the area are not
closing or laying off employees.

Property Name: Avalon ApartmentsProperty Key: 014Person Interviewed: Ms. Kasey, ManagementPhone Number: (706) 689-7883Notes: 2007 TCs awarded for construction of this property without units of project based rental assistanceavailable to tenants. Rent reflects special pricing of 1BR @ \$414 2BR @ \$515 and 3BR @ \$599. There are nonew apartments or businesses nearby. Contact advised that businesses in the area are not closing or layingoff employees.

Property Name: Eagles TraceProperty Key: 041Person Interviewed: Ms. Johneine, ManagementPhone Number: (706) 689-6618Notes: 2002 TC's awarded for construction of this property without project based rental assistance. 5 units areemployee/non-rental units. Rents reflect special pricing of 2BR for \$429.

Property Name: Hardaway TownhousesProperty Key: 060Person Interviewed: Ms. Crystle, ManagementPhone Number: (706) 561-3754Notes: There are no new apartments or businesses nearby. Contact advised that businesses in the area arenot closing or laying off employees.

Property Name: Lumpkin ParkProperty Key: 085Person Interviewed: Ms. Tiffany, ManagementPhone Number: (706) 507-7666Notes: 2007 TCs awarded for construction of this property without units of project based rental assistanceavailable to tenants. There are no new apartments or businesses nearby. Contact advised that businesses inthe area are not closing or laying off employees.

Property Name: Midtown SquareProperty Key: 091Person Interviewed: Ms. Ericka, ManagementPhone Number: (706) 561-1083Notes: Management reported Property as Tax Credit, property without project based rental assistance. There
are no new apartments or businesses nearby. Contact advised that businesses in the area are not closing or
laying off employees.

Property Name: Trace TownhomesProperty Key: 121Person Interviewed: Ms. Ashley, ManagementPhone Number: (706) 563-9693Notes: Units at higher rent have new carpet and vinyl. Property is managed from Spring Cove Apartments.Contact advised that businesses in the area are not closing or laying off employees.

Property Name: Victory Crossing ApartmentsProperty Key: 125Person Interviewed: Ms. Vernia, ManagementPhone Number: (706) 689-8971Notes: 2002 Bonds awarded for construction of this property without project based rental assistance. There
are no new apartments or businesses nearby. Contact advised that businesses in the area are not closing or
laying off employees.

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The title to the subject property is merchantable, and the property is free and clear of all liens and encumbrances, except as noted.
- No liability is assumed for matters legal in nature.
- Ownership and management are assumed to be in competent and responsible hands.
- No survey has been made by the appraiser. Dimensions are as supplied by others and are assumed to be correct.
- The report was prepared for the purpose so stated and should not be used for any other reason.
- All direct and indirect information supplied by the owner and their representatives concerning the subject property is assumed to be true and accurate.
- No responsibility is assumed for information supplied by others and such information is believed to be reliable and correct. This includes zoning and tax information provided by Municipal officials.
- The signatories shall not be required to give testimony or attend court or be at any governmental hearing with respect to the subject property unless prior arrangements have been made with the client.
- Disclosure of the contents of this report is governed by the By-Laws and Regulations of the Appraisal Institute.
- The legal description is assumed to be accurate.
- This report specifically assumes that there are no site, subsoil, or building contaminates present resulting from residual substances or construction materials, such as asbestos, radon gas, PCB, etc. Should any of these factors exist, the appraiser reserves the right to review these findings, review the value estimates, and change the estimates, if deemed necessary.
- The Americans with Disabilities Act (ADA) became effective January 26, 1992. We have not made a specific compliance survey and analysis of this property to determine whether or not it is in conformity with
- This analysis specifically assumes that the subject property is operated as described in this report.
- This analysis specifically assumes that the subject property is constructed/rehabilitated as described in this report.
- This analysis specifically assumes that the subject property is financed as described in this report.
- This analysis specifically assumes the timing set forth in this report.

CERTIFICATION

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of the appraisal.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Uniform Standards of Professional Appraisal Practice.
- The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- Jeff Carroll (Allen & Associates Consulting) made a personal inspection of the property that is the subject of this report.
- No one provided significant real property appraisal assistance to the person signing this certification. Debbie Rucker and Frank Victory (Allen & Associates Consulting) assisted in compiling the data used in this report.
- As of the date of this report, Jeff Carroll (Allen & Associates Consulting) has completed the continuing education program of the Appraisal Institute.
- Jeffrey B. Carroll is presently licensed in good standing as a Certified General Real Estate Appraiser in the states of Alabama, Delaware, Georgia, Kentucky, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia, allowing him to appraise all types of real estate.

Respectfully submitted: ALLEN & ASSOCIATES CONSULTING, INC.

Jeff Carroll

DCA CERTIFICATION

I affirm that I have made a physical inspection of the market area and the subject property and that information has been used in the full study of the need and demand for the proposed units. The report was written according to DCA's market study requirements, the information included is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market. In addition, the document is assignable to other lenders that are parties to the DCA loan transaction, subject to prior written authorization by Allen & Associates Consulting.

To the best of my knowledge, the market can support the demand shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

Jeff Carroll

DEFINED TERMS

Term	Definition
Absorption Period	The period of time necessary for a newly constructed or renovated property to achieve the Stabilized Level of Occupancy. The Absorption Period begins when the first certificate of occupancy is issued and ends when the last unit to reach the Stabilized Level of Occupancy has a signed lease. Assumes a typical pre-marketing period, prior to the issuance of the certificate of occupancy, of about three to six months. The month that leasing is assumed to begin should accompany all absorption estimates.
Absorption Rate	The average number of units rented each month during the Absorption Period.
Acceptable Rent Burden	The rent-to-income ratio used to qualify tenants for both income-restricted and non-income restricted units. The Acceptable Rent Burden varies depending on the requirements of funding sources, government funding sources, target markets, and local conditions.
Affordable Housing	Housing where the tenant Household pays no more than 30 percent of its annual income on Gross Rent.
Amenity	Tangible or intangible benefits offered to a tenant at no fee, typically on-site recreational facilities or planned programs, services and activities.
Annual Demand	The total estimated demand present in the market in any one year for the type of units proposed.
Area Median Income (AMI)	100% of the gross median Household income for a specific Metropolitan Statistical Area, county or non-metropolitan area established annually by HUD.
Assisted Housing	Housing where the monthly costs to the tenants are subsidized by federal, state or other programs.
Attached Housing	Two or more dwelling units connected with party walls (e.g. townhouses or flats).
Basic Rent	The minimum monthly rent that tenants who do not have rental assistance pay to lease units developed through the USDA-RD Section 515 Program, the HUD Section 236 Program and HUD Section 223(d)(3) Below Market Interest Rate Program. The Basic Rent is calculated as the amount of rent required to operate the property, maintain debt service on a subsidized mortgage with a below-market interest rate, and provide a return on equity to the developer in accordance with the regulatory documents governing the property.
Below Market Interest Rate Program (BMIR)	Program targeted to renters with income not exceeding 80% of area median income by limiting rents based on HUD's BMIR Program requirements and through the provision of an interest reduction contract to subsidize the market interest rate to a below-market rate. Interest rates are typically subsidized to effective rates of one percent or three percent.
Capture Rate	The percentage of age, size, and income qualified renter Households in the Primary Market Area that the property must capture to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified Households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. The Capture Rate is calculated by dividing the total number of units at the property by the total number of age, size and income qualified renter Households in the Primary Market Area. See Penetration Rate for rate for entire market area.

	la mana a construction construction of the second sec
Census Tract	A small, relatively permanent statistical subdivision delineated by a local
	committee of census data users for the purpose of presenting data.
	Census tract boundaries normally follow visible features, but may follow
	governmental unit boundaries and other non-visible features; they always
	nest within counties. They are designed to be relatively homogeneous units
	with respect to population characteristics, economic status, and living
	conditions at the time of establishment. Census tracts average about 4,000
	inhabitants.
Central Business District	The center of commercial activity within a town or city; usually the largest
(CBD)	and oldest concentration of such activity.
Community Development	Entrepreneurial institution combining public and private resources to aid in
Corporation (CDC)	the development of socio-economically disadvantaged areas.
Comparable Property	A property that is representative of the rental housing choices of the
	subject's Primary Market Area and that is similar in construction, size,
	amenities, or age. These Comparables and Competitives are generally
	used to derive market rent.
Competitive Property	A property that is comparable to the subject and that competes at nearly
	the same rent levels, and tenant profile, such as age, family or income.
Concession	Discount given to a prospective tenant to induce the tenant to sign a lease.
	Concessions typically are in the form of reduced rent or free rent for a
	specific lease term, or for free amenities which are normally charged
<u> </u>	separately (i.e. washer/dryer, parking).
Condominium	A form of joint ownership and control of property in which specified
	volumes of space (for example, apartments) are owned individually while
	the common elements of the property (for example, outside walls) are
	owned jointly.
Contract Rent	1. The actual monthly rent payable by the tenant, including any rent subsidy
	paid on behalf of the tenant, to the owner, inclusive of all terms of the
	lease. (HUD & RD) 2. The monthly rent agreed to between a tenant and a
	landlord (Census).
Demand	The total number of households in a defined market area that would
Domana	potentially move into proposed new or renovated housing units. These
	households must be of the appropriate age, income, tenure and size for a
	specific proposed development. Components of demand vary and can
	include household growth; turnover, those living in substandard conditions,
	rent over-burdened households, and demolished housing units. Demand is
	project specific.
Difficult Development Area	An area designated by HUD as an area that has high construction, land,
(DDA)	and utility costs relative to the Area Median Gross Income. A project
	located in a DDA and utilizing the Low Income Housing Tax Credit may
	qualify for up to 130% of eligible basis for the purpose of calculating the
	Tax Credit allocation.
Detached Housing	A freestanding dwelling unit, typically single-family, situated on its own lot.
Detaelled Hedellig	
Effective Rents	Contract Rent less concessions.
	Housing where (1) all the units in the property are restricted for occupancy
Elderly or Senior Housing	
	by persons 62 years of age or older or (2) at least 80% of the units in each
	building are restricted for occupancy by Households where at least one
	Household member is 55 years of age or older and the housing is designed
	with amenities and facilities designed to meet the needs of senior citizens.
Extremely Low Income	Person or Household with income below 30% of Area Median Income
	adjusted for Household size.

Fair Market Rent (FMR)	The estimates established by HUD of the Gross Rents (Contact Rent plus
	Tenant Paid Utilities) needed to obtain modest rental units in acceptable
	condition in a specific county or metropolitan statistical area. HUD
	generally sets FMR so that 40% of the rental units have rents below the
	FMR. In rental markets with a shortage of lower priced rental units HUD
	may approve the use of Fair Market Rents that are as high as the 50 th
	percentile of rents.
Garden Apartments	Apartments in low-rise buildings (typically two to four stories) that feature
	low density, ample open-space around buildings, and on-site parking.
Gross Rent	The monthly housing cost to a tenant which equals the Contract Rent
	provided for in the lease plus the estimated cost of all Tenant Paid Utilities.
High-rise	A residential building having more than ten stories.
Household	One or more people who occupy a housing unit as their usual place of residence.
Household Trends	Changes in the number of Households for a particular area over a specific
	period of time, which is a function of new Household formations (e.g. at
	marriage or separation) and changes in average Household size.
Housing Unit	House, apartment, mobile home, or group of rooms used as a separate
	living quarters by a single household.
Housing Choice Voucher	Federal rent subsidy program under Section 8 of the U.S. Housing Act,
(Section 8 Program)	which issues rent vouchers to eligible Households to use in the housing of
	their choice. The voucher payment subsidizes the difference between the
	Gross Rent and the tenant's contribution of 30% of adjusted income, (or
	10% of gross income, whichever is greater). In cases where 30% of the
	tenants' income is less than the utility allowance, the tenant will receive an
	•
	assistance payment. In other cases, the tenant is responsible for paying his share of the rent each month.
Housing Finance Agency	State or local agencies responsible for financing housing and administering
(HFA)	Assisted Housing programs.
HUD Section 8 Program	Federal program that provides project based rental assistance. Under the
5	program HUD contracts directly with the owner for the payment of the
	difference between the Contract Rent and a specified percentage of
	tenants' adjusted income.
HUD Section 202 Program	Federal Program, which provides direct capital assistance (i.e. grant) and
1102 000001 202 1 10gram	operating or rental assistance to finance housing designed for occupancy
	by elderly households who have income not exceeding 50% of Area
	Median Income. The program is limited to housing owned by 501(c)(3)
	nonprofit organizations or by limited partnerships where the sole general
	partner is a 501(c)(3) nonprofit organization. Units receive HUD project
	based rental assistance that enables tenants to occupy units at rents
	based on 30% of tenant income.
HUD Section 811 Program	Federal program, which provides direct capital assistance and operating or
	rental assistance to finance housing designed for occupancy by persons
	with disabilities who have income not exceeding 50% of Area Median
	Income. The program is limited to housing owned by 501(c)(3) nonprofit
	organizations or by limited partnerships where the sole general partner is a
	501(c)(3) nonprofit organization.

HID Section 226 Drogram	Endered program which provides interact reduction neumonts for lagra
HUD Section 236 Program	Federal program which provides interest reduction payments for loans which finance housing targeted to Households with income not exceeding 80% of area median income who pay rent equal to the greater of Basic Rent or 30 percent of their adjusted income. All rents are capped at a HUD approved market rent.
Income Band	The range of incomes of Households that can pay a specific rent but do not have more income than is allowed by the Income Limits of a particular housing program. The minimum household income typically is based on a defined Acceptable Rent Burden percentage and the maximum typically is pre-defined by specific programmatic requirements or by general market parameters.
Income Limits	Maximum Household income by county or Metropolitan Statistical Area , adjusted for Household size and expressed as a percentage of the Area Median Income for the purpose of establishing an upper limit for eligibility for a specific housing program. Income Limits for federal, state and local rental housing programs typically are established at 30%, 50%, 60% or 80% of AMI. HUD publishes Income Limits each year for 30% median, Very Low Income (50%), and Low-Income (80%), for households with 1 through 8 people.
Infrastructure	Services and facilities including roads, highways, water, sewerage, emergency services, parks and recreation, etc. Infrastructure includes both public and private facilities.
Low Income	Person or Household with gross Household income below 80% of Area Median Income adjusted for Household size.
Low Income Housing Tax Credit	A program to generate equity for investment in affordable rental housing authorized pursuant to Section 42 of the Internal Revenue Code, as amended. The program requires that a certain percentage of units built be restricted for occupancy to households earning 60% or less of Area Median Income, and that the rents on these units be restricted accordingly.
Low Rise Building	A building with one to three stories
Market Advantage	The difference, expressed as a percentage, between the estimated market rent for an apartment property without income restrictions and the lesser of (a) the owner's proposed rents or (b) the maximum rents permitted by the financing program for the same apartment property.
Market Analysis	A study of real estate market conditions for a specific type of property.
Market Area or Primary Market Area	A geographic area from which a property is expected to draw the majority of its residents.
Market Demand	The total number of households in a defined market area that would potentially move into new or renovated housing units. Market demand is not project specific and refers to the universe of tenure appropriate households, independent of income. The components of market demand are similar to those used in determining demand.
Market Rent	The rent that an apartment, without rent or income restrictions or rent subsidies, would command in the open market considering its location, features and amenities. Market rent should be adjusted for Concessions and owner paid utilities included in the rent.

Markat Otaria	
Market Study	A comprehensive review of the housing market in a defined market area. A market study can be used to determine the demand for specific proposed development or to examine the overall condition of an area's housing
	market. Project specific market studies are often used by developers,
	syndicators, and government entities to determine the appropriateness of a
	proposed development, whereas market specific market studies are used
	to determine what housing needs, if any, exist within a specific geography.
	At a minimum, market studies include a review of location, economic
	conditions, demographics, and existing and proposed housing stock.
Marketability	The manner in which the subject fits into the market; the relative desirability
-	of a property (for sale or lease) in comparison with similar or competing
	properties in the area.
Market Vacancy Rate	Average number of apartment units in any market which are unoccupied
Physical Market Vacancy	divided by the total number of apartment units in the same Market Area,
Rate Economic	excluding units in properties which are in the lease-up stage. Percentage of
	rent loss due to concessions and vacancies.
Metropolitan Statistical Area	A geographic entity defined by the federal Office of Management and
(MSA)	Budget for use by federal statistical agencies, based on the concept of a
	core area with a large population nucleus, plus adjacent communities
	having a high degree of economic and social integration with that core.
	Qualification of an MSA requires the presence of a city with 50,000 or more
	inhabitants, or the presence of an Urbanized Area (UA) and a total
	population of at least 100,000 (75,000 in New England). The county or
	counties containing the largest city and surrounding densely settled territory
	are central counties of the MSA. Additional outlying counties qualify to be
	included in the MSA by meeting certain other criteria of metropolitan
	character, such as a specified minimum population density or percentage
	of the population that is urban.
Mid-rise	A building with four to ten stories.
Migration	The movement of Households from one location or market area to another.
Mixed Income Property	An apartment property containing (1) both income restricted and
	unrestricted units or (2) units restricted at two or more Income Limits (i.e.
	Low Income Tax Credit property with income limits of 30%, 50% and 60%).
Mobility	The ease with which people move from one location to another.
Moderate Income	Person or Household with gross household income between 80 and 120
	percent of area median income adjusted for Household size.
Move-up Demand	An estimate of how many consumers are able and willing to relocate to
	more expensive or desirable units, such as tenants who move up from
	Class C properties to Class B; and Class B tenants that move up to class A
	properties; and tenants that move from Class C and B properties to a new
	superior Low IncomeTax Credit property.
Multi-family	Structures that contain more than two or more housing units.
Neighborhood	An area of a city or town with common demographic and economic
	features that distinguish it from adjoining areas.
Net Rent (also referred to as	Gross Rent less Tenant Paid Utilities.
Contract or Lease Rent)	

Penetration Rate	The percentage of age and income qualified renter Households in the Primary Market Area that all existing and proposed properties, to be
	completed within six months of the subject, and which are competitively
	priced to the subject that must be captured to achieve the Stabilized Level
	of Occupancy. Funding agencies may require restrictions to the qualified
	Households used in the calculation including age, income, living in
	substandard housing, mover ship and other comparable factors. See
Dept up Demend	Capture Rate for property specific rate.
Pent-up Demand	A market in which there is a scarcity of supply and vacancy rates are very
Deputation Transla	low.
Population Trends	Changes in population levels for a particular area over a specific period of
	time—which is a function of the level of births, deaths, and net migration.
Primary Market Area	See Market Area.
Programmatic Rents	The proposed rents for a Tax Credit or other income restricted property
-	relative to comparable market rate properties and rents being achieved at
	another Low Income Housing Tax Credit or other income restricted
	properties in the market. Can be no greater than maximum rents permitted
	by the Low Income HousingTax Credit or other program regulations.
Project Based Rent	Rental assistance from a federal, state or local program that is allocated to
Assistance	the property or a specific number of units in the property and is available to
	each income eligible tenant of the property or an assisted unit.
Public Housing or Low	HUD program administered by local (or regional) Housing Authorities which
Income Conventional Public	serves Low- and Very-Low Income Households with rent based on the
Housing	same formula used for HUD Section 8 assistance.
Qualified Census Tract (QCT)	Any census tract (or equivalent geographic area defined by the Bureau of
	the Census) in which at least 50% of Households have an income less
	than 60% of Area Median Income or where the poverty rate is at least 25%.
	A project located in a QCT and receiving Low Income Housing Tax Credits
	may qualify for up to 130% of eligible basis for the purpose of calculating
	the Tax Credit allocation.
Rural Development (RD)	A monthly rent that can be charged for an apartment under a specific
Market Rent	USDA-RD housing program, that reflects the agency's estimate of the rent
	required to operate the property, maintain debt service on an un-subsidized
	mortgage and provide an adequate return to the property owner. This rent
	is the maximum rent that a tenant can pay at an RD Property.
Rural Development (RD)	Federal program which provides low interest loans to finance housing
Program (Formerly the	which serves low- and moderate-income persons in rural areas who pay 30
Farmers Home Administration	percent of their adjusted income on rent or the basic rent, whichever is the
Section 515 Rural Rental	higher (but not exceeding the market rent). The Program may include
Housing Program)	property based rental assistance and interest reduction contracts to write
	down the interest on the loan to as low as one percent.
Redevelopment	The redesign or rehabilitation of existing properties.
Rent Burden	Gross Rent divided by gross monthly Household income.
Rent Burdened Households	Households with Rent Burden above the level determined by the lender,
	investor, or public program to be an acceptable rent-to-income ratio.
Restricted Rent	The rent charged under the restrictions of a specific housing program or
	subsidy.
Saturation	The point at which there is no longer demand to support additional units.

Secondary Market Area	The portion of a market area that supplies additional support to an
	apartment property beyond that provided by the Primary Market Area.
Single-Family Housing	A dwelling unit, either attached or detached, designed for use by one
	Household and with direct access to a street. It does not share heating
	facilities or other essential building facilities with any other dwelling.
Special Needs Population	Specific market niche that is typically not catered to in a conventional
	apartment property. This population should exhibit certain criteria, which
	can be well defined, in order, for example, to assess the need and demand
	from this source. Examples of special needs populations include:
	substance abusers, visually impaired person or persons with mobility
	limitations.
Stabilized Level of Occupancy	
	expected to maintain after the initial rent-up period, expressed as a
	percentage of the total units.
State Data Center (SDC)	A state agency or university facility identified by the governor of each state
	to participate in the Census Bureau's cooperative network for the
	dissemination of the census data.
Subsidy	Monthly income received by a tenant or by an owner on behalf of a tenant
	to pay the difference between the apartment's Contract Rent and the
	amount paid by the tenant toward rent.
Substandard Conditions	Housing conditions that are conventionally considered unacceptable which
	may be defined in terms of lacking plumbing facilities, one or more major
	systems not functioning properly, or overcrowded conditions.
Target Income Band	The Income Band from which the subject property will draw tenants.
Target Population	Market niche a development will appeal or cater to. State agencies often
	use Target Population to refer to various income set asides, elderly v.
	family, etc.
Tenant	One who rents real property from another.
Tenant Paid Utilities	The cost of utilities necessary for the habitation of a dwelling unit, which
	are paid by the tenant. Tenant Paid Utilities do not include costs for
	telephone or cable service.
Tenure	The distinction between owner-occupied and renter-occupied housing units.
Townhouse (or Row House)	Single-family attached residence separated from another by party walls,
	usually on a narrow lot offering small front and back-yards; also called a
	row house.
Turnover Turnover Period	1. An estimate of the number of housing units in a Market Area as a
	percentage of total housing units in the Market Area that will likely change
	occupants in any one year. See Vacancy Period 2. The percent of
	occupants in a given apartment complex that move in one year.
Unmet Housing Need	New units required in the Market Area to accommodate Household growth,
	homeless Households, and housing in substandard conditions.
Unrestricted Rents	The recommended rents for the market rate units at a Mixed-Income
	Property .
Unrestricted Units	The units at a Mixed-Income Property that are not subject to any income or
	rent restrictions.
Vacancy Period	The amount of time that an apartment remains vacant and available for
Vacancy Pate Economic	rent. Maximum potential revenue less actual rent revenue divided by maximum
Vacancy Rate- Economic Vacancy Rate - Physical	potential rent revenue. The number of total habitable units that are vacant
vacancy Nate - Filysical	divided by the total number of units in the property.

Very Low Income Person or Household whose gross household income does not exce				
	50% of Area Median Income adjusted for Household size.			
Zoning	Classification and regulation of land by local governments according to use			
categories (zones); often also includes density designations.

Summary

Founder of Allen & Associates Consulting, a development consulting firm specializing in affordable housing. Performed over 2950 assignments in 46 states since 2000.

Founder of Tartan Residential, a firm specializing in the acquisition and development of affordable housing.

Co-founder of Delphin Properties, a firm specializing in the acquisition and development of manufactured home communities.

Wrote articles on affordable housing, development, property management, market feasibility, and financial analysis for <u>Urban Land</u> magazine, <u>The Journal of Property Management</u>, <u>Community</u> <u>Management</u> magazine, <u>Merchandiser</u> magazine, <u>HousingThink</u>, and a publication of the Texas A&M Real Estate Research Center known as <u>Terra Grande</u>.

Conducted seminars on affordable housing, development, property management, market feasibility, and financial analysis for the American Planning Association, Community Management magazine, the Georgia Department of Community Affairs, the Manufactured Housing Institute, the National Association of State and Local Equity Funds, the Virginia Community Development Corporation, and the National Council of Affordable Housing Market Analysts.

Specialties: Specialties include affordable housing, low-income housing tax credits, tax-exempt bond transactions, multifamily, manufactured housing, development, development consulting, market studies, rent comparability studies, appraisals, capital needs assessments, and utility studies.

Experience

President | Allen & Associates Consulting, Inc. | Charlotte, NC | 2000 - present Founder of Allen & Associates Consulting, a development consulting firm specializing in affordable housing. Practice areas include low-income housing tax credits, tax-exempt bond transactions, development consulting, market studies, rent comparability studies, appraisals, capital needs assessments, and utility studies. Performed over 2650 development consulting assignments in 46 states

since 2000. Major projects include:

- Bond-Financed New Construction Retained to manage the development of a 140-unit bond financed townhome community. Responsible for all aspects of the proposed \$15 million development including project design, zoning, site plan approval, and identification of debt and equity sources for the project.
- Low-Income Housing Tax Credit Renovation Handled the disposition of a 134-unit subsidized apartment community. Developed a comprehensive renovation plan and arranged the sale to another party willing to rehabilitate the property with low-income housing tax credits. The owner was initially prepared to sell the property for \$2 million; our efforts brought them \$5.2 million.
- Historic Tax Credit Adaptive Reuse Assisted in putting together the redevelopment plan for a historic school building. The property, originally constructed in 1935, was subsequently renovated into 14 apartment units with a combination of historic and low-income housing tax credits. Our efforts helped breathe new life into the historic building.

President | Tartan Residential, Inc. | Charlotte, NC | 1997 - present

Founder of Tartan Residential, a firm specializing in the acquisition and development of affordable housing. Major projects include:

- Empire Building Adaptive reuse of a historic hotel into 58 apartment units serving seniors in Salisbury, North Carolina. The redevelopment is proposed to be financed with a combination of historic and low-income housing tax credits at an estimated cost of \$10 million. The project was originally built in 1859 and renovated in 1907. The building is currently vacant. This project is currently in the early planning stages.
- Tarheel Building Renovation of a 16-unit historic apartment building and construction of 12 new units serving seniors in Williamston, North Carolina. The redevelopment is proposed to be financed with a combination of historic and low-income housing tax credits at an estimated cost of \$5 million. The project was originally built in 1920 and is currently vacant. Our development plans are being reviewed by the state historical preservation office at this time.
- Buchanan's Crossing Subdivision A proposed 24-unit duplex development serving families in Kansas City. The property is planned to be built at an estimated cost of \$4.4 million. The project, located on the west side of N 65th Street, will be completely accessible with priority given to families with a member who has a mobility impairment. This project is currently in the early planning stages.
- Buchanan's Crossing A proposed 280-unit bond financed townhome development serving families in Kansas City. To be built in 3 phases at an estimated cost of \$30 million. This project is currently in the early planning stages.
- Davidson's Green A proposed 96-unit tax credit financed apartment community serving seniors in Kansas City. To be built in 2 phases at an estimated cost of \$10 million. This project is currently in the early planning stages.

Co-Founder | Delphin Properties LLC | Charlotte, NC | 1998 - present

Co-founder of Delphin Properties, a firm specializing in the acquisition and development of manufactured home communities. Major projects include:

- Crystal Lakes A 338-unit manufactured home community serving seniors in Fort Myers, Florida. Purchased the partially-constructed development, completed construction, and sold it for a \$1 million profit.
- Mahler's Glen A 348-unit development originally planned as a manufactured home community serving families in Garner, North Carolina. Secured zoning and site plan approval, engineered the property (including a private wastewater treatment facility), and sold it to a national homebuilder for a \$2 million profit.
- Beacon Wood A 363-unit development originally planned as a manufactured home community serving families in Crockery Township, Michigan. Secured zoning and site plan approval, engineered the property, and sold it to a regional homebuilder for a \$1 million profit.

Director of Development | Clayton, Williams & Sherwood, Inc. | Austin, TX | 1995 - 1997

Director of Development for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Major projects included:

• Multifamily Development - Managed the construction and lease-up of two apartment communities consisting of 564 units and valued at \$38 million. Each property leased up in excess of 25 units per month.

 Manufactured Home Community Development - Put together development plans for 4 manufactured home communities and 2 manufactured home subdivisions consisting of 2047 units and valued at \$63 million.

<u>Assistant to the President | Southwest Property Trust | Dallas, TX | 1993 - 1995</u> Assistant to the President for Southwest Property Trust, a large apartment REIT. Provided support to management personnel operating a 12,000-unit apartment portfolio.

Investment Analyst/Manager | GE Capital | Dallas, TX | 1991 - 1993

Investment Analyst/Manager for GE Capital's Residential Construction Lending business. Assisted in the management of a \$500 million investment portfolio including 30 single family residential land development investments and 70 single family construction lines of credit.

Regional Manager | Clayton, Williams & Sherwood, Inc. | Newport Beach, CA | 1989 - 1991 Regional Manager for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Major projects included:

- Multifamily Management Management of a 1200-unit apartment portfolio valued at over \$72 million. Implemented a portfolio-wide 10 percent rent increase while cutting operating expenses 3 percent resulting in a \$7 million increase in portfolio value.
- Manufactured Home Community Management Management of a 1200-unit manufactured home community portfolio valued at over \$36 million. Implemented a 15 percent rent increase in a 500unit community resulting in a \$4 million increase in property value.

Education

Harvard Business School | MBA, General Management, Real Estate, Economics | 1986 - 1988 Graduated in 1988 with an MBA from Harvard Business School. Emphasis in General Management and Real Estate with a minor concentration in Economics.

Clemson University | BS, Engineering, Economics | 1978 - 1983

Graduated in 1983 with a BC in Engineering from Clemson University. Minor concentration in Economics. Honors included Dean's List and Alpha Lambda Delta honorary. Elected officer for Phi Delta Theta social fraternity. Awarded scholarship on Clemson's varsity wrestling team. ALLEN & ASSOCIATES CONSULTING Real Estate Advisory Services

QUALIFICATIONS

Allen & Associates Consulting is a development consulting firm specializing in affordable housing. Practice areas include low-income housing tax credits, tax-exempt bond transactions, development consulting, market studies, rent comparability studies, appraisals, capital needs assessments, and utility studies.

Allen & Associates Consulting and its sister organization Allen & Associates Appraisal maintain offices in Charlotte, North Carolina and Detroit, Michigan, respectively. Allen & Associates is approved to provide its services throughout the United States.

The following is a listing of key personnel for Allen & Associates Consulting:

Jeffrey B. Carroll

Jeffrey B. Carroll is President of Allen & Associates Consulting. Since 2000, Mr. Carroll has completed over 2950 development consulting assignments in 46 states. Major projects include:

Development Consulting: Bond-Financed New Construction - Retained to manage the development of a 140-unit bond financed townhome community. Responsible for all aspects of the proposed \$15 million development including project design, zoning, site plan approval, and identification of debt and equity sources for the project.

Disposition Study: Tax Credit Renovation - Handled the disposition of a 134-unit subsidized apartment community. Developed a comprehensive renovation plan and arranged the sale to another party willing to rehabilitate the property with low-income housing tax credits. The owner was initially prepared to sell the property for \$2 million; our efforts brought them \$5.2 million.

Development Consulting: Historic Tax Credit Adaptive Reuse - Assisted in putting together the redevelopment plan for a historic school building. The property, originally constructed in 1935, was subsequently renovated into 14 apartment units with a combination of historic and low-income housing tax credits. Our efforts helped breathe new life into the historic building.

Disposition Study: Year 15 Portfolio Review - Provided disposition studies for a variety of property types including tax credit developments, rural development properties, and HUD subsidized properties. Recently retained to evaluate a large portfolio of Year 15 LIHTC properties on behalf of a national tax credit syndicator.

Mr. Carroll is a certified general appraiser, licensed to appraise real estate in the states of Alabama, Delaware, Georgia, Kentucky, North Carolina, South Carolina, Tennessee,

Texas, Virginia and West Virginia. Mr. Carroll, an associate member of the Appraisal Institute, is currently a Candidate for Designation in the Appraisal Institute.

Mr. Carroll served on the Executive Committee and chaired the Data and Ethics Committees for the National Council of Affordable Housing Market Analysts, where he successfully completed the peer-review process.

In addition, Mr. Carroll has also served as a market study reviewer for the Georgia and Michigan housing finance agencies.

Mr. Carroll has written articles on affordable housing, development, property management, market feasibility, and financial analysis for <u>Urban Land</u> magazine, <u>The Journal of Property Management, Community Management</u> magazine, <u>Merchandiser</u> magazine, <u>HousingThink</u>, and a publication of the Texas A&M Real Estate Research Center known as <u>Terra Grande</u>.

Mr. Carroll has conducted seminars on affordable housing, development, property management, market feasibility, and financial analysis for the American Planning Association, <u>Community Management</u> magazine, the Georgia Department of Community Affairs, the Manufactured Housing Institute, the National Association of State and Local Equity Funds, the Virginia Community Development Corporation, and the National Council of Affordable Housing Market Analysts.

Mr. Carroll is also an experienced developer and property manager. His experience includes the development of tax credit apartment communities, conventional market rate apartments, manufactured home communities, and single family subdivisions. He has also managed a portfolio of apartment complexes and manufactured home communities.

Mr. Carroll, who was awarded a scholarship on the Clemson University varsity wrestling team, has served as an assistant coach for a local high school wrestling team. Mr. Carroll resides in Charlotte, North Carolina with his wife Becky and his two children, Luke and Brittany.

Debbie Rucker

....

Debbie Rucker is an analyst with Allen & Associates Consulting, coordinating market research for the company. Mrs. Rucker has worked on over 2000 assignments and has conducted over 40,000 rent surveys.

Mrs. Rucker was also responsible for compiling the database of detailed information on of every tax credit and tax-exempt bond transaction in Virginia, North Carolina, South Carolina, Georgia, Florida, and Texas since 1999.

The following is a summary of Mrs. Rucker's relevant educational background:

National Council of Affordable Housing Market Analysts	
Semi-Annual Meeting & Continuing Education	September 2005
Semi-Annual Meeting & Continuing Education	October 2006
Carolinas Council for Affordable Housing	
Spectrum C ³ P Certification	October 2008

Mrs. Rucker is active in her church and helps run a local judo club. Mrs. Rucker is the mother of three and resides in Weddington, North Carolina.

Frank Victory

Frank Victory is an analyst with Allen & Associates Consulting, assisting in field work and coordinating data collection for the company. Mr. Victory has worked on over 2000 assignments, and has compiled over 200 gigabytes of economic and demographic data.

Mr. Victory was also responsible for compiling the data for a national census-tract level affordable housing demand model.

The following is a summary of Mr. Victory's relevant educational background:

National Council of Affordable Housing Market Analysts Semi-Annual Meeting & Continuing Education	September 2005	
ASTM International Property Condition Assessments E2018.01	November 2006	

USDA Rural Development

Capital Needs Assessment Provider Training Accessibility Standards Training September 2007 September 2007

Mr. Victory is active in his church and the community. He was recently named "Charlotte's Hometown Hero" for his charitable work by one of the largest radio and television stations in North Carolina. Mr. Victory is the father of two and resides in Monroe, North Carolina.

Joyce Riggsbee

Joyce Riggsbee is a research specialist for Allen & Associates and has completed almost 6000 apartment surveys. Mrs. Riggsbee specializes in identifying and obtaining information on market rate and subsidized properties.

Mrs. Riggsbee played a vital part in compiling a database of tax credit and tax-exempt bond transactions on behalf of the company.

Mrs. Riggsbee is a very active volunteer in Charlotte's New Heart Association, Charlotte Amateur Astronomers Club and the Matthews Help Center. Mrs. Riggsbee is also a national dog show steward.

Jeannine Szrejter

Jeannine Szrejter is a research specialist with Allen & Associates and has assisted on over 500 assignments throughout the United States.

Mrs. Szrejter, the mother of two grown children, is a grandmother and volunteers her services at a local judo club.

Patrick Szrejter

Patrick Szrejter is a research specialist with Allen & Associates and has assisted on over 2000 assignments throughout the United States.

Mr. Szrejter, who recently retired after 20 years in law enforcement, is also a Desert Storm Veteran.

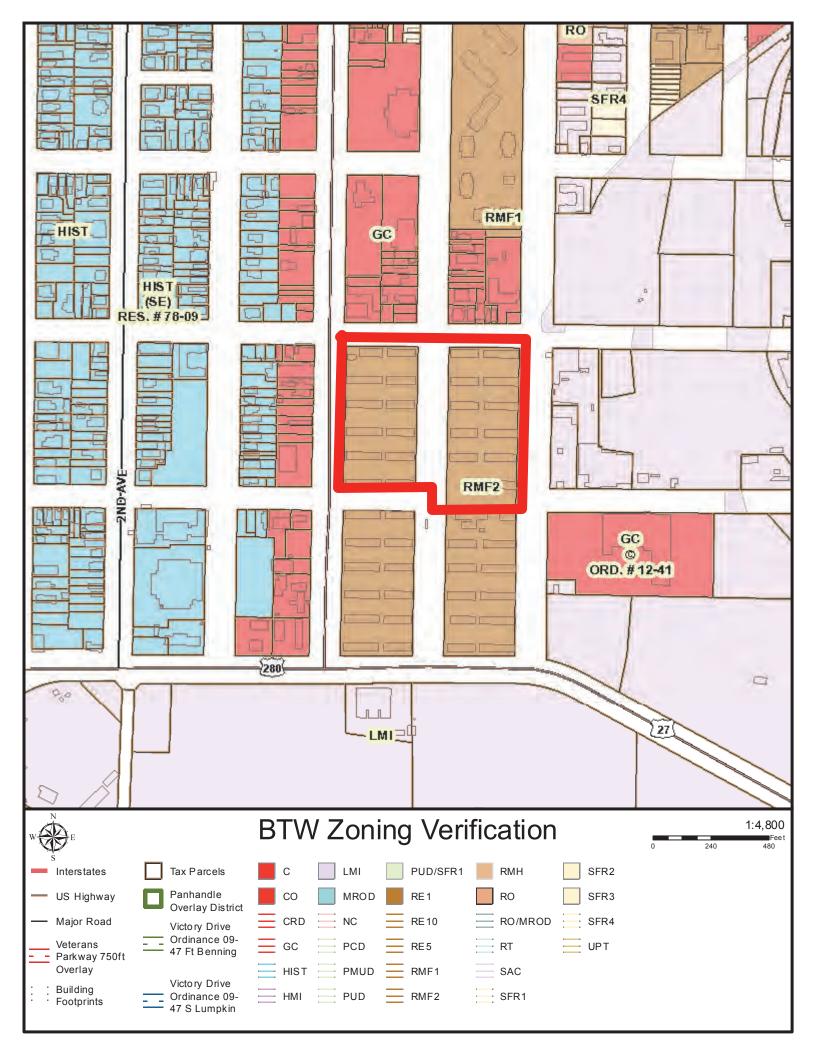

Mr. Szrejter, the father of two grown children, is a grandfather and serves as head instructor for a local judo club. His hobbies include woodworking and remodeling.

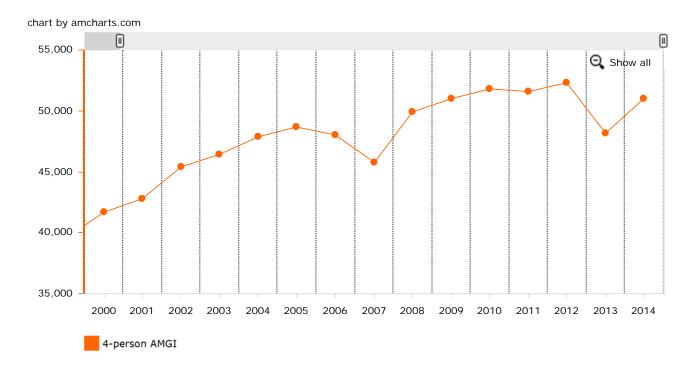

Michael W. Lash

Michael W. Lash is President of Lash Engineering, an engineering firm located in Charlotte, North Carolina that works closely with Allen & Associates Consulting on utility allowance studies and other specific engagements. Since 1981, Mr. Lash has completed hundreds of assignments including the design of industrial, commercial, multifamily, and single family developments. Mr. Lash is an expert in the design of utility systems, including wastewater and storm water treatment facilities.

Mr. Lash is a certified professional engineer, licensed in the states of Louisiana, North Carolina, South Carolina, and Virginia. Mr. Lash graduated from Louisiana Tech University in Civil Engineering in 1981 and has conducted seminars on advanced wastewater treatment, storm water quality treatment and automated engineering drafting and design with Eagle Point Software.

Mr. Lash is active in his church and volunteers his time teaching karate at a local martial arts academy. Mr. Lash resides in Charlotte, North Carolina with his wife and three children.

LIHTC Rent Limits for 2014

(Based on 2014 MTSP/VLI Income Limits)

Bedrooms (People)	Charts	60.00%	30.00%	40.00%	50.00%	FMR
1 Bedroom (1.5)		573	286	382	478	595
2 Bedrooms (3.0)	i ()	688	344	459	573	705
3 Bedrooms (4.5)		795	397	530	663	971

The Rent & Income Limit Calculator© does not calculate low-income housing tax credit (LIHTC) limits greater than 50% LIHTC or 60% LIHTC limits, depending on the minimum set-aside elected with the IRS on Form 8609 in accordance with Internal Revenue Code Section 42(i)(3)(A). In other words, if the 20/50 minimum set-aside was elected then 50% LIHTC is the maximum rent calculated and allowed to qualify as a tax credit unit; or if the 40/60 minimum set-aside was elected then 60% LIHTC is the maximum allowed to qualify as a tax credit unit.

⁽¹⁾ The rent and income limits for each year are effective beginning with the effective date shown above. There is a grace period for 45 days to implement the new rent and income limits, which means that the old limits can be relied upon for 45 days after the effective date of the new limits. For example income limits effective 12/04/2012, can be relied on until 1/17/2013. For more information, see Revenue Ruling 94-57, IRS Newsletter #50 and IRS LIHC Newsletter #48.

IRS LIHC Newsletter #48

LIHC Newsletter #48 and IRS Newsletter #50 clarifies that for projects placed in service during the 45-day grace period, the owner may choose the new or the old income limits. For example, if a project was placed in service on 1/8/2013 and the 2012 income limits are higher than the 2013 income limits, an owner may use the higher income limits from 2012 to income qualify tenants and set rents accordingly because the project was placed in service with the 45 day grace period.

Please note the Rent & Income Limit Calculator© does not apply a 45-day grace period, therefore, users who want to apply a 45-day grace period should select that they were placed in service as of the prior year.

For HUD FY2013 HUD originally issued income limits on December 4, 2012 then issued revised income limits on December 11, 2012. In IRS LIHC Newsletter #50, the IRS has stated that the effective date for the revised FY 2013 income limits is December 4, 2012. Based on this guidance the Rent & income limit calculator uses December 4, 2013 for the effective date for the revised FY 2013 limits. Please see IRS Newsletter #50 for more detail.

⁽²⁾ An area may lose its rural area status. There is no clear guidance that a project is held harmless at the national non-metropolitan income limits when an area loses its rural status. The Rent & Income Limit Calculator© assumes that a project that is not indicated as rural in the current year was also not rural in the prior year, and therefore, does not receive hold harmless treatment based on the prior year national non-metro amount. Please consult your state agency and tax advisor for further clarification.

⁽³⁾A project uses HERA Special if income was determined prior to 1/1/2009 and the project is in a HERA Special county. A project's income limits are held harmless at the prior year income limits if income was determined in the prior year or earlier. Please note that the IRS has informally indicated that the definition of "determined" for purposes of the HERA Special and MTSP Hold Harmless income limits means that a project was placed in service. Please see IRS LIHC Newsletter #35 for more information about "determined" and projects with buildings that were places in service before and after HUD income limit effective dates.

IRS LIHC Newsletter #35

⁽⁴⁾ Internal Revenue Code Section 142(d)(2)(i) indicates that the hold harmless applies on a calendar year. The Rent & Income Limit Calculator© assumes that "calendar year" in the hold harmless rule means the HUD Fiscal Year. For example, the 2009 calendar year means the HUD Fiscal Year from 3/19/2009 through 5/13/2010. In other words, the Rent & Income Limit Calculator© assumes that "calendar year" in the hold harmless rule means the highest income level achieved during any HUD Fiscal Year.

The Rent & Income Limit Calculator© assumes that a rural project will receive hold harmless treatment at the national non-metro amount based on the prior year national non-metro amount if the national non-metro median income were to fall from year to year. If a rural project qualifies for HERA Special and the HERA Special is higher than the national non-metro, then the HERA Special amount will be used. Please note that the IRS has not issued guidance that specifically allows hold harmless treatment at the national non-metro amount for rural projects, however, Internal Revenue Code 42(g)(4) by reference to Internal Revenue Code 142(d)(2)(E) implies that hold harmless treatment would apply at the national non-metro amount for rural projects. Please consult your tax advisor for further clarification.

⁽⁵⁾ Please note that for acquisition/rehabilitation projects, the IRS guidance indicates that income and rent limits are determined at the later of the acquisition date or when management begins income-qualifying households in the project. For example, if a project was acquired in 2011, the rehabilitation was placed-in-service in 2012, and management began income-qualifying households in 2011 then the project would be considered placed in service in 2011 for income and rent purposes. If a project was acquired in 2011, the rehabilitation was placed-in-service in 2012, and management began income-qualifying households when the rehabilitation placed-in-service in 2012, then the project would be

considered placed in service in 2012 for income and rent purposes. Please consult your tax advisor for further clarification. IRS LIHC Newsletter #35

⁽⁶⁾ The Rent & Income Limit Calculator© assumes all buildings in a project have a rent floor effective date under Revenue Procedure 94-57 in the same HUD income limit period. However, if your buildings have different a rent floor effective date under Revenue Procedure 94-57 in different HUD income limit periods, then you should run the calculator separately for each group of buildings in a particular HUD income limit period. The Rent & Income Limit Calculator© assumes that different AMGI limits (40%, 35%, 30%, etc.) chosen by the user will also have a rent floor under Revenue Procedure 94-57 from the same HUD income and rent limit period that applies to the federal level of 50% or 60%.

Before using the numbers from the Rent & Income Limit Calculator©, we strongly recommend that you check with the applicable state housing agency to verify that the state agrees with the numbers. The numbers round down to the nearest \$1. Utility allowances are input by the user and are not reviewed or verified by Novogradac & Company LLP. Novogradac & Company LLP provides no assurance of the accuracy of the particular results you may obtain from the Rent & Income Limit Calculator©; which is designed only to be a quick reference tool and is no substitute for professional tax and accounting advice. The Rent & Income Limit Calculator© should not be used for any final financial decisions. IRS guidelines and actual HUD amounts should be used for any final decisions. Novogradac & Company LLP does not guarantee the accuracy of the amounts shown above. As consideration for your use of this tool, free of any requirement to pay any related monetary compensation to Novogradac & Company LLP, you agree to hold Novogradac & Company LLP harmless from any damages and claims related to use of the Rent & Income Limit Calculator©. If you do not agree with the terms of this paragraph, you may not use the Rent & Income Limit Calculator©.
