Mr. Matt Mills Southeast Holdings LLC PO Box 639, 718 West Business Highway 60 Dexter, Missouri 63841

Dear Mr. Mills:

Following is a market study which was completed for Sable Chase according to the guidelines set forth by the Georgia Department of Community Affairs as authorized by Southeast Holdings LLC. The subject is located at 102 Sable Chase Boulevard in McDonough, Georgia. The subject is an existing development which consists of a total of 225 units. It contains 28 two-story walk-up apartment buildings containing 225 units and two accessory buildings housing a clubhouse, fitness center, laundry facility, leasing/management office and maintenance area. The property also contains a swimming pool, picnic area, tot lot, basketball court, tennis court, video surveillance, gazebo and a parking lot. The unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, microwave, washer/dryer hook-ups, carpet and tile floor coverings, blinds, ceiling fans, walk-in closet, coat closet, balcony and patio.

The purpose of the following market study is to determine if the community has a need for the subject units. To do so, the analyst utilized data from the Census Bureau, Nielsen Claritas; Ribbon Demographics, and various other demographic resources. Community information and opinion was also utilized. This information was collected during a field survey conducted by Jon Richmond while visiting the site. An attempt was made to survey 100 percent of all housing in the area.

I certify that there is not now, nor will there, be an identity of interest between or among the applicant, contractor, architect, engineer, attorney, interim lender, subcontractors, material suppliers, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Georgia Department of Community Affairs and written consent to such identity of interest by Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

CERTIFICATION

This is to certify that a field visit was made by the market analyst or one of his associates and information was obtained from publications of Federal, State and Local agencies. Interviews were held with apartment owners or managers, local officials and others as appropriate who may be knowledgeable of the housing market in McDonough.

In accordance with Georgia Department of Community Affairs, I hereby certify that the information provided in this Market Study was written according to Georgia Department of Community Affairs' market study requirements and is truthful and accurate to the best of my knowledge and belief. The estimates of demand for family housing made by this report are based on the assumption of a free market situation, unencumbered by local mores, affirmative fair housing marketing or prejudice toward the site location.

This is to affirm that I will receive no fees which are contingent upon approval of the project by Georgia Department of Community Affairs, before or after the fact, and that I will have no interest in the housing project.

IDENTITY OF INTEREST

I understand and agree that Georgia Department of Community Affairs will consider an identity of interest to exist between the loan applicant as the party of the first part and general contractors, architects, engineers, attorneys, interim lenders, subcontractors, material suppliers or equipment lessors as parties of the second part under any of the following conditions:

1. When there is any financial interest of the party of the first part in the party of the second part;

2. When one or more of the officers, directors, stockholders or partners of the party of the first part is also an officer, director, stockholder or partner of the party of the second part;

3. When any officer, director, stockholder or partner of the party of the first part has any financial interest whatsoever in the party of the second part;

4. When the party of the second part advances any funds to the party of the first part other than an interim lender advancing funds to enable the applicant to pay for construction and other authorized and legally eligible expenses during the construction period;

5. When the party of the second part provides and pays on behalf of the party of the first part the cost of any legal services, architectural services or interim financing other than those of the survey, general superintendent or engineer employed by a general contractor in connection with obligations under the construction contract;

6. When the party of the second part takes stock or any interest in the party of the first part as part of the consideration to be paid them; and

7. When there exists or comes into being any side deals, agreements, contracts or undertakings entered into thereby altering, amending or canceling any of the required closing documents or approval conditions as approved by Georgia Department of Community Affairs.

I certify that there is not now, nor will there be, an identity of interest between or among the applicant, contractor, architect, interim lender, subcontractors, material supplies, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Georgia Department of Community Affairs and written consent to such identity of interest by Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

There is no identity of interest between the loan applicant and the Market Analyst or Gill Group.

<u>PART I:</u>

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

It is the opinion of the analyst that a market does exist for the 225-unit development designed for families. The existing development designed for families would be viable within the market area. The report was prepared assuming that the project will be completed as detailed in this report.

Project Description

The subject, Sable Chase, is an existing 225-unit development designed for families and is located at 102 Sable Chase Boulevard, McDonough, Henry County, Georgia, 30253. Sable Chase Boulevard provides access to State Route 20 and 81.

McDonough is a city in the central portion of Henry County in the central portion of the State of Georgia. It is located approximately eight miles north of Locust Grove; 19 miles east of Fayetteville; 21 miles southwest of Covington; and 30 miles south of Atlanta. Henry County has the following boundaries: North – Dekalb County; East – Rockdale and Newton Counties; South – Butts and Spaiding Counties; and West – Clayton County. According to Nielsen Claritas; Ribbon Demographics, McDonough has an estimated population of 24,376 in 2014.

The existing development contains 28 two-story walk-up buildings of wood-frame construction with stucco and siding exterior. The property also contains two one-story accessory buildings housing a clubhouse, fitness center, laundry facility, leasing/management office and maintenance area. It contains 48 one-bedroom/one-bath units with approximately 781 square feet for a total of 37,488 square feet; 32 two-bedroom/one-bath units with approximately 857 square feet for a total of 27,424 square feet; 73 two-bedroom/two-bath units with approximately 968 square feet for a total of 70,664 square feet; and 24 three-bedroom/two-bath units with 1,180 square feet for a total of 84,960 square feet. The total net rentable area will be approximately 220,536 square feet. According to the Henry County Assessor's Office, the gross building area is approximately 224,678 square feet.

	MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES								
Unit Type	# of	Square	% of	Max.	Gross	Utility	Proposed		
	Units	Feet	Median	Tax	Rent	Allowance	Net Rent		
			Income	Credit					
1/1	32	781	60%	\$747	\$670	\$105	\$565		
1/1	16	781	50%	\$622	\$670	\$105	\$565		
2/1	32	857	50%	\$746	\$660	\$134	\$526		
2/2	73	968	60%	\$895	\$814	\$134	\$680		
3/2	25	1,180	60%	\$1,035	\$922	\$167	\$755		
3/2	47	1,180	50%	\$862	\$707	\$167	\$540		

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

The subject will be 100 percent Low Income Housing Tax Credit, with 100 percent set at 50 and 60 percent of the area median income. Unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, microwave, washer/dryer hook-ups, carpet and tile floor coverings, blinds, ceiling fans, walk-in closet, coat closet, balcony and patio. Project amenities include a clubhouse, swimming pool, fitness center, picnic area, tot lot, basketball court, tennis court, laundry facility, on-site management, on-site maintenance, video surveillance, gazebo and a parking lot. The parking lot contains adequate parking for the property. The subject's unit and project amenities are similar to slightly superior to most surveyed comparables.

The subject's unit mix of one-, two- and three-bedroom units is suitable in the market. The subject's one-bedroom unit sizes are smaller than the average unit size of the comparables surveyed. Although, the subject's one-, two- and three-bedroom unit sizes are slightly smaller it does not appear as though this will have a negative impact on the marketability of the units.

The subject property's proposed net rents are lower than the market rents of \$730 for the onebedroom units, \$830 and \$875 for the two-bedroom units and \$1,030 for the three-bedroom units.

Site Description/Evaluation

The subject is located at 102 Sable Chase Boulevard, containing approximately 24.88 acres, or 1,083,773+/- square feet. The subject property is currently zoned R-M, Multi-family Residential District. The subject is a legal, conforming use.

The subject property is located at Sable Chase Boulevard, which connects to States Routes 20 and 81. Due to the subject's location near a major thoroughfare, it is the opinion of the analyst that there is good visibility/access to the site.

The subject neighborhood is comprised primarily of single-family residences and vacant land with commercial properties and multifamily residences and is 75 percent built up. Approximately 50

percent of the land use is made up of single-family residences. Commercial properties make up approximately 15 percent. Another 10 percent of the land use is multifamily properties, and the remaining 25 percent is vacant land. The area is mostly suburban.

There are a few services within the subject's immediate neighborhood. Restaurants within 1.5 miles of the subject include Grill Parts, Poppa's Country Cooking, Mimi's Good Taste, Family Buffet, Catfish Mahoney's, Pasta Max Café, The Lunch Box, Andre's FWS, Chevys Fresh Mex, China Fu Restaurant, Occasions Restaurant Bar, El Castillo, Pi's Café, Koffee Klutch, Raising Cupcakes, Gritz Family Restaurant, Big Chic, Seafood Chef, IHOP, Sakura Hibald Sushi Buffet, Three Dollar Café, Blossom Island Style Cuisine, Pete's Caribbean Bakery, Subway, Motorheads Bar & Grill, Waffle House H J Wings & Things, Big Chic, Baby Jane's Home Cooking, Domino's, Hardee's, Empire of China II, Taco Bell, Los Avina Mexican Restaurant, Pippins Barbecue, Curley's Q, Chick-Fil-A, Philly Connection, Mo Joe's, Uncle Sam's, Sonic Drive-In, Church's Chicken, McDonald's, Tokyo Japanese Steakhouse, Dre & Ida's Meals To Go, Burger King, Papa John's Pizza, Bo-Jaynes Speciality Foods, Quiznos, Zaxby's, Anthony's Pizza & Pasta, Pizza Hut, Toribios Mexican Bar and Grill, Wendy's, Applebee's, Wendy's, Southside Steve's, Ob's Bar B Q, Arby's, Huddle House, Outlaws Woodfire Steak and Seafood, Cracker Barrel Old Country Store, American Deli, China Express, Thai Time, Marco's Pizza, Ruby Tuesday and Son Of A Greek. Businesses within 1.5 miles of the subject include Shreon Services, Target, Dollar General, Family Dollar, Dollar General Store, Dollar Tree, Walmart Supercenter, Phillips Food Mart, First Choice Grocery, Kangaroo Express, Publix Super Markets, Kroger and Aldi. Henry Healthcare McDonough is located approximately 0.80 from the subject. The County of Henry Police and Henry County Fire Department are located approximately 1.2 miles from the subject.

The site is located off a major thoroughfare which provides it with good visibility and access. The crime rate for the area is relatively low. In addition, the subject is an existing development designed for families. The subject will be 100 percent Low Income Housing Tax Credit, with 100 percent set at 50 and 60 percent of the area median income, which will provide affordable housing to residents in the area. The site has no apparent weaknesses.

Market Area Definition

The primary market area consists of the City of McDonough. The market area is bound by the city limits of McDonough.

Community Demographic Data

In 2000, this geographic market area contained an estimated population of 8,493. By 2010, population in this market area had increased by 160.0 percent to 22,084. In 2014, the population in this market area has increased by 10.4 percent to 24,376. It is projected that between 2014 and 2019, population in the market area will increase 7.6 percent to 26,237.

Between 2000 and 2010, the market area gained 499 households per year. The market area is projected to continue gaining households through 2019.

Of the surveyed comparables, one-bedroom units typically range from \$565 to \$965 per month, two-bedroom units typically range from \$725 to \$1,181 per month, and three-bedroom units range from \$845 to \$1,275 per month. These rental rates have remained similar within the past few years.

Households who have between one and two persons and annual incomes between \$22,971 and \$25,800 are potential tenants for the one-bedroom/one-bath units at 50 percent of the area median income. Over four percent (4.6%) of the primary market area tenants are within this range.

Households who have between one and two persons and annual incomes between \$22,971 and \$30,960 are potential tenants for the one-bedroom/one-bath units at 60 percent of the area median income. Over 13 percent (13.1%) of the primary market area tenants are within this range.

Households who have between two and three persons and annual incomes between \$22,629 and \$29,000 are potential tenants for the two-bedroom/one-bath units at 50 percent of the area median income. Over 10 percent (10.4%) of the primary market area tenants are within this range.

Households who have between two and three persons and annual incomes between \$27,909 and \$34,800 are potential tenants for the two-bedroom/two-bath units at 60 percent of the area median income. Over 11 percent (11.3%) of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$24,240 and \$34,800 are potential tenants for the three-bedroom/two-bath units at 50 percent of the area median income. Over 17 percent (17.3%) of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$31,611 and \$41,760 are potential tenants for the three-bedroom/two-bath units at 60 percent of the area median income. Over 11 percent (11.5%) of the primary market area tenants are within this range.

According to www.realtytrac.com, there are currently 380 properties for sale that are foreclosures within the subject's zip code. This ratio is in the mid-range for the City of McDonough. In March, the number of properties that received a foreclosure filing in McDonough was 36% lower than the previous month and 36% lower than the same time last year. The City of McDonough's foreclosure rate is 0.31 percent which is lower than the state's 0.35 percent rate. The number of foreclosures per month has varied since March 2010. Therefore, it appears that the foreclosure rate in the city has been stabilizing to improving. There are no known properties within the vicinity of the property that have been foreclosed upon. In addition, there are no known negative factors impacting the occupancy of the subject within the market area.

Economic Data

The economy of the market area is based on agriculture, forestry and fisheries; mining; construction; manufacturing; retail trade; leisure and hospitality; professional and business services; financial activities; and other services sectors. Each of these categories has experienced reasonable growth within the past few years.

Employment in Henry County has been increasing an average of 3.2 percent per year since 2000. Employment in the State of Georgia has been increasing an average of 0.5 percent per year since 2000.

The unemployment rate for Henry County has fluctuated from 2.6 percent to 10.4 percent over the past eight years. These fluctuations are in line with the unemployment rates for Henry County and the State of Georgia.

According to Ms. Laura Luker, Director of Tourism with the Chamber of Commerce, there have been a few new industries locating in the area. This has provided a need for additional housing in the area. It is believe that the economy will remain stable.

According to the Laura Luker, Director of Tourism with the McDonough Chamber of Commerce, new jobs were created in the area in the last two years. For these reasons, it is believed that the area will continue to grow and remain stabilized.

According to the Economic Development Commission, new jobs were created in the area in the last two years. Also, **www.realtytrac.com** indicated the rate of foreclosures within the subject's zip code has been stabilizing to improving. For these reasons, it is believed that the area will continue to grow and remain stabilized.

Project-Specific Affordability and Demand Analysis

The following table uses a 35 percent lease rent-to-income to determine the minimum target income required for each unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists how many households are within the required target income for each unit type.

INCOME ELIGIBLE HOUSEHOLDS – PRIMARY MARKET AREA							
Unit Type	Rent	Lower Range	Upper Range	Households			
1/1 BR @ 50% AMI	\$670	\$22,971	\$25,800	148			
1/1 BR @ 60% AMI	\$670	\$22,971	\$30,960	417			
2/1 BR @ 50% AMI	\$660	\$22,629	\$29,000	332			
2/2 BR @ 60% AMI	\$814	\$27,909	\$34,800	359			
3/2 BR @ 50% AMI	\$707	\$24,240	\$34,800	551			
3/2 BR @ 60% AMI	\$922	\$31,611	\$41,760	366			
All Units		\$22,629	\$41,760	834			

The following chart indicates the net demand and the capture rates:

Unit Size	Income Limits	Units Proposed	Total Demand	Supply	Net Demand	Capture Rate	Absorption	Adj. Market Rent	Proposed Rent
1/1 BR	(50% AMI)	16	72	0	72	0.0%	0.0	\$730	\$565
1/1 BR	(60% AMI)	32	203	0	203	1.0%	0.3	\$730	\$565

3/2 BR	(60% AMI)	25	72	0	72	2.8%	0.3	\$1,030	\$755
	All Units	225	762	0	762	3.3%	8.0		-

Project Capture Rate All Vacant Units	3.3%
Project Stabilization Period	8 Months

The subject is applying for tax credits at 50 and 60 percent of the area median income. There are two tax credit comparables located in the market area that will compete with the subject property. As indicated in the chart above the capture rates for all one-bedroom units, two-bedroom units and three-bedroom units are below the 35 percent threshold requirement. In addition, the overall capture rates by segment type (i.e. 30%, 40%, 50%, 60%, etc.) for each bedroom type are below the 70 percent threshold requirement. As a result, the analyst feels there is a need for affordable housing and the subject will help fill the need by offering affordable units to the market area.

The overall capture for the proposed development is reasonable for the tax credit units. The capture rates for the units are within the acceptable range. It is believed that the subject is a viable development.

Competitive Rental Analysis

There were a total of 16 confirmed apartment complexes in and surrounding the market area. There were approximately 88 market rate vacant units of 3,850 surveyed, for an overall vacancy rate of 2.3 percent. There were approximately 35 subsidized/rent-restricted vacant units out of 570 surveyed, for an overall vacancy rate of 6.1 percent. The amenities of these comparables are relatively similar to the subject's proposed amenities. Therefore, it is believed the subject will be competitive within the market area.

Of the surveyed comparables, one-bedroom units typically range from \$565 to \$965 per month, two-bedroom units typically range from \$725 to \$1,181 per month, and three-bedroom units range from \$845 to \$1,275 per month. These rental rates have remained similar within the past few years.

Market rental rate grids were completed for the subject. The adjusted market rental rates were \$730 for one-bedroom units, \$830 and \$875 for the two-bedroom units and \$1,030 for the threebedroom units. It is believed that the comparables used in the rent grid analysis were the best available.

The proposed tax credit rents are lower than the adjusted market rental rates. Therefore, it is believed that the proposed rents will be competitive with existing properties.

Absorption/Stabilization Estimate

The subject is an existing multifamily development that contains 48 one-bedroom units, 105 twobedroom units and 72 three-bedroom units. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. Therefore, it is estimated that a 93+ percent occupancy level can be achieved in five to eight months. The interviews with apartment managers substantiate the absorption rate. It is believed that the proposed development will absorb three to five units per month; therefore, it will reach a stable occupancy level within five months.

Conclusion

The overall capture rate for the proposed development is reasonable for the tax credit units. The property is currently applying for Low Income Housing Tax Credits. The capture rate was figured by unit size. The capture rates for the units are within the acceptable range. It is believed that the subject is a viable development.

PROJECT DESCRIPTION

PROJECT DESCRIPTION

Project Name:	Sable Chase
Location:	102 Sable Chase Boulevard McDonough, Georgia 30253
Project Type:	Family
Construction Type:	Existing Development
Developer:	Southeast Holdings LLC

The existing development contains a total of 225 units. The existing development contains 28 two-story walk-up buildings of wood-frame construction with stucco and siding exterior. The property also contains two one-story accessory buildings housing a clubhouse, fitness center, laundry facility, leasing/management office and maintenance area. It contains 48 one-bedroom/one-bath units with approximately 781 square feet for a total of 37,488 square feet; 32 two-bedroom/one-bath units with approximately 857 square feet for a total of 27,424 square feet; 73 two-bedroom/two-bath units with approximately 968 square feet for a total of 70,664 square feet; and 24 three-bedroom/two-bath units with 1,180 square feet for a total of 84,960 square feet. The total net rentable area will be approximately 220,536 square feet. According to the Henry County Assessor's Office, the gross building area is approximately 224,678 square feet.

Project Design

The existing subject contains 28 two-story walk-up apartment buildings containing 225 units and two one-story accessory buildings housing a clubhouse, fitness center, laundry facility, leasing/management office and maintenance area. Unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, microwave, washer/dryer hook-ups, carpet and tile floor coverings, blinds, ceiling fans, walk-in closet, coat closet, balcony and patio. Project amenities include a clubhouse, swimming pool, fitness center, picnic area, tot lot, basketball court, tennis court, laundry facility, on-site management, on-site maintenance, video surveillance, gazebo and a parking lot. The buildings will be of wood frame construction with stucco and siding exterior.

Unit Features, Project Amenities and Services

Unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, microwave, washer/dryer hook-ups, carpet and tile floor coverings, blinds, ceiling fans, walk-in closet, coat closet, balcony and patio. Project amenities include a clubhouse, swimming pool, fitness center, picnic area, tot lot, basketball court, tennis court, laundry facility, on-site management, on-site maintenance, video surveillance, gazebo and a parking lot.

Common Amenities and Services

The property will also contain a clubhouse, laundry facility, on-site management and on-site maintenance.

Parking

The subject will contain asphalt parking spaces.

Utilities

The following table describes the project's utility combination.

UTILITY SCHEDULE							
Utility	Who Pays						
Heat	Central Electric	Tenant					
Air Conditioning	Central Electric	Tenant					
Hot Water	Electric	Tenant					
Cooking	Electric	Tenant					
Cold Water/Sewer	NA	Landlord					
Trash Collection	NA	Landlord					

The landlord will provide cold water, sewer and trash removal. Tenants will be responsible for electricity for individual units.

Unit Mix, Size and Rent Structure

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

	MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES								
Unit Type	# of Units	Square Feet	% of Median Income	Max. Tax Credit	Gross Rent	Utility Allowance	Proposed Net Rent		
1/1	32	781	60%	\$747	\$670	\$105	\$565		
1/1	16	781	50%	\$622	\$670	\$105	\$565		
2/1	32	857	50%	\$746	\$660	\$134	\$526		
2/2	73	968	60%	\$895	\$814	\$134	\$680		
3/2	25	1,180	60%	\$1,035	\$922	\$167	\$755		
3/2	47	1,180	50%	\$862	\$707	\$167	\$540		

The subject will be 100 percent Low Income Housing Tax Credit, with 100 percent set at 50 and

60 percent of the area median income.

Eligibility

Households who have between one and two persons and annual incomes between \$22,971 and \$25,800 are potential tenants for the one-bedroom/one-bath units at 50 percent of the area median income. Over four percent (4.6%) of the primary market area tenants are within this range.

Households who have between one and two persons and annual incomes between \$22,971 and \$30,960 are potential tenants for the one-bedroom/one-bath units at 60 percent of the area median income. Over 13 percent (13.1%) of the primary market area tenants are within this range.

Households who have between two and three persons and annual incomes between \$22,629 and \$29,000 are potential tenants for the two-bedroom/one-bath units at 50 percent of the area median income. Over 10 percent (10.4%) of the primary market area tenants are within this range.

Households who have between two and three persons and annual incomes between \$27,909 and \$34,800 are potential tenants for the two-bedroom/two-bath units at 60 percent of the area median income. Over 11 percent (11.3%) of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$24,240 and \$34,800 are potential tenants for the three-bedroom/two-bath units at 50 percent of the area median income. Over 17 percent (17.3%) of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$31,611 and \$41,760 are potential tenants for the three-bedroom/two-bath units at 60 percent of the area median income. Over 11 percent (11.5%) of the primary market area tenants are within this range.

LIHTC INCOME LIMITS							
Person in Households	50%	60%					
1	\$22,550	\$27,060					
2	\$25,800	\$30,960					
3	\$29,000	\$34,800					
4	\$32,200	\$38,640					
5	\$34,800	\$41,760					
6	\$37,400	\$44,880					

PART III:

SITE EVALUATION

SITE EVALUATION

Date of Inspection: April 8, 2014

Project Location

The subject is located at 102 Sable Chase Boulevard in the central portion of the City of McDonough, Georgia. Sable Chase Boulevard is a collector street which provides access to State Routes 20 and 81, which provides access to U.S. Highway 23.

Site Characteristics

The subject neighborhood is comprised primarily of single-family residences and vacant land with commercial properties and multifamily residences. Vacant land is located to the north of the property. Vacant land, commercial properties and single-family residences are located to the south of the property. Vacant land is located to the east of the subject. To the west is commercial properties and single-family residences.

Zoning

According to the McDonough Zoning Department, the subject is zoned R-M, Multi-family Residential District. The subject is a legal, conforming use. Permitted uses include the following: single-family detached dwellings, customary residential accessory buildings, multifamily swellings, residential subdivision amenity centers, senior condominium center, churches and cemeteries. It appears there is no conflict between the subject property and the zoning ordinances provided by the City of McDonough Zoning Department. Since there are no obvious conflicts between the subject property and the zoning of the property, there is no negative impact on the market value by the zoning classification.

Surrounding Land Uses

Vacant land is located to the north of the property. Vacant land, commercial properties and single-family residences are located to the south of the property. Vacant land is located to the east of the subject. To the west is commercial properties and single-family residences.

Developments

Existing developments within the market area include Villas at Southpoint, Bridge Mill Vista, Walden Run Apartments, Mandalay Villas, Preston Creek Apartments, Crossing at McDonough, Sundance Creek Apartments, Amber Chase Apartments, Carrington Green Apartments, Meadowlark Apartments, Hadden Place Apartments, Trees of Avalon Apartments, Waterford Landing Apartments, The Estates at McDonough, Woodlawn Park Apartments and The Heritage

at McDonough. Of the aforementioned properties, two listed are subsidized/restricted housing which will compete directly with the subject's units. These two subsidized/restricted housing properties are Woodlawn Park Apartments and The Heritage at McDonough. The subsidized/restricted comparables have an overall vacancy rate of 2.9 percent. The developments have waiting lists. The remaining comparables are market rate properties.

Schools

According to education.com, the subject will be served by the Henry County School District. The district has 51 schools for grades pre-kindergarten through high school. The schools have approximately 40,909 students enrolled and approximately 2,557 teachers.

Transportation

Major roadways in the McDonough area include Interstate 75, U.S. Highway 23, and State Highways 20, 81 and 155. Airports nearby include the William B Hartsfield Atlanta International Airport.

Health Services

Hospitals or clinics near McDonough include the following: Henry Medical Center, Sylvan Grove Hospital and Spalding Regional Medical Center.

Parks and Recreational Opportunities

McDonough and Henry County offer several recreational opportunities including Alexander Park, Avalon Park, Big Springs Park, Franklin Rape Park, Red Hawk Baseball Complex, Heritage Park, North Ola Park, Red Hawk Nature Preserve, Richard Craig Park, Rufus L. Stewart Park, Sandy Ridge Park, Veterans Wall of Honor and Windy Hill Park.

Crime

According to Neighborhood Scout, the City of McDonough has a crime index of 20. There are approximately 2.65 violent crimes per 1,000 residents per year and approximately 31.87 property crimes per 1,000 residents per year. Of the total 783 annual crimes per year, 60 of those were violent crimes while 723 of those were property crimes.

Visibility/Access

The subject property is located at 102 Sable Chase Boulevard which is approximately 0.1 miles from State Routes 20 and 81. Due to the subject's location off a major thoroughfare, it is the opinion of the analyst that there is good visibility/access to the site.

Planned Road & Infrastructure Improvements

At the time of the physical inspection, there were no planned road or infrastructure improvements in the area surrounding the subject property.

Environmental

A copy of a Phase I Environmental Site Assessment was not provided to the analyst with this assignment. No environmental hazards were observed on the site on the date of the inspection.

Community and Site Strengths and Weaknesses

Strengths – The site is located off a major thoroughfare which provides it with good visibility and access. The existing family development will provide affordable housing to residents in the area. The crime rate for the area is relatively low.

Weaknesses - The site has no apparent weaknesses.

PART IV:

MARKET AREA

MARKET AREA

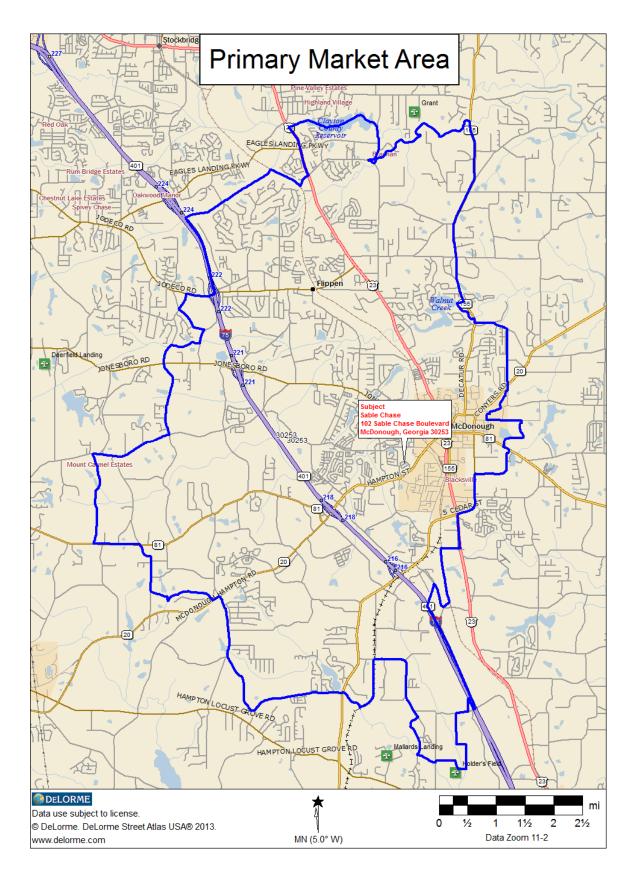

Following is a list of considerations used when determining the market area:

- Population and Households Counts: The number of households in a market area is directly proportionate to its geographic size within an individual market. Total householders residing in a market area can greatly influence demand calculations.
- General Demographics: The socio-economic composition of a market area including income, household size and tenure can be largely influenced by the erroneous inclusion or exclusions of non-comparable areas.
- Demand: Too large of a market may result in overstating demand for a proposed development. Conversely, too conservative of a market area may discount the demand for new product, especially if a lack of quality housing currently exists.
- Supply Analysis: While a larger market area generally includes higher household totals, it likewise may include a higher number of directly comparable units. If using demand methodologies that net out recently constructed and comparable rental units from the demand estimate, the increase in the number of comparable units can outweigh the increase in demand.
- Competitive Stock: The existing rental stock surveyed for a market study is dependent on the number of rental properties in a given market and therefore the boundaries of a primary market area. If existing developments are going to be used as "comparables", they should be located in the primary market area, if possible.
- Attainable Rents: If the market area includes non-comparable areas, the analysis may use comparables projects that suggest that a project can achieve rents that area significantly higher or lower than the rents its micro location will support.
- Location of Competitive Properties: A primary consideration in defining a market area is identifying those locations that offer alternative opportunities to a potential renter for a subject site. The managers of existing comparable properties near the site are excellent sources in determining those competitive locations.
- Accessibility: Available transportation linkages including both traffic arteries and mass transit options can influence the size of the market. Mass transit can have a significant impact on projects addressing very low income households for which transportation options may be limited.
- Natural Boundaries: Natural boundaries including rivers and mountains can restrict the mover-ship within a market due to a lack of accessibility.
- Housing Project Characteristics: The availability of a unique structure type such as a high rise may alter the typical draw of a potential project.
- Market Perceptions: Whether grounded in reality or not, market perceptions can be a significant determinant of market area boundaries. Social stigmas often exist within sub-

markets, with residents from one side of a submarket may not move to a close by neighborhood, regardless of housing opportunities. The construction of a new, attractive rental community may not necessarily relieve this perception.

- Commuting Patterns: The time spent commuting and employment destination could often reveal distinct patterns. High percentages of workers with long commutes or working in neighboring counties are often indicators of a lack of affordable housing options near employment centers.
- Target Market: Proposed developments targeting a special needs population such as seniors generally draw from a larger geographic region. Given the smaller pool of qualified householders, the location and quantity of comparable stock is of additional importance. An acceptable market area for a family oriented rental community will often be too conservative for a rental community targeting senior rental householders.
- Jurisdictional Boundaries: Differences in the quality and services provided by school districts, municipalities, or counties often influence consumer location choices.
- Local Agency Service Boundaries: The geographic areas covered by local agencies, such as housing authorities, senior citizen centers, community-based organizations, or churches can be a strong indicator of market area boundaries, especially when the project has a community-based sponsor or co-sponsor.
- Non-Geographic Factors: Employees who might be expected to reside in a development as a result of planned or existing job opportunities and special needs households who are served by a multi-jurisdictional agency that covers communities that are clearly distinct market areas.

Our determination of the market area is based on the boundaries between governmental units. In such a method, county, division or city boundaries become the boundaries of the market area. The primary market area consists of the City of McDonough. The primary market area is bound by the city limits of McDonough.

PART V:

COMMUNITY DEMOGRAPHIC DATA

COMMUNITY DEMOGRAPHIC DATA

Population Trends

The subject is located in the City of McDonough, Georgia. The primary market area consists of the City of McDonough. The primary market area is bound by the city limits of McDonough.

In 2000, this geographic market area contained an estimated population of 8,493. By 2010, population in this market area had increased by 160.0 percent to 22,084. In 2014, the population in this market area has increased by 10.4 percent to 24,376. It is projected that between 2014 and 2019, population in the market area will increase 7.6 percent to 26,237.

Household Trends

The demand for additional housing in a market area is a function of population growth, household formations, and also a replacement of units lost through demolition and extreme obsolescence. In the case of housing for the elderly, the demand for rental housing is sometimes caused by the inability of the elderly to properly maintain their present ownership housing. Also, within the overall demand are segments of the market asking for more or less expense (related to income) and for ownership or rental.

Some of the demand has been, or will be, satisfied by units which have been built, or will be, by the time the project is renting. The difference between demand and supply, the residual, is the total market of which the project's market will be a share.

The "tenure" of existing housing will be examined first as a guide to the future proportion of ownership and rentals, and then characteristics of the housing stock will be noted.

The most important analysis is that of demand, supply and residual demand which follows. Its product is the number of rental units which will be demanded.

Tenure

The percentage of renters in Henry County in 2010 was 22.9 percent, and the percentage for McDonough was 48.2 percent. According to the U.S. Census Bureau, the national rental percentage is 27 percent. This percentage is utilized to segment the number of existing households in the demand section of this report.

HOUSEHOLDS BY TENURE

Unit Size

The average size of the units in the surveyed developments is 826 square feet for one-bedroom units, 1,166 square feet for two-bedroom units and 1,411 square feet for three-bedroom units. The subject's unit sizes are smaller than the average unit size of the comparables surveyed. Although, the subject's unit sizes are slightly smaller it does not appear as though this will have a negative impact on the marketability of the units.

Rental Vacancy Rates

Historic Trends

According to the U.S. Census Bureau, the national vacancy rates for the fourth quarter in 2013 were 8.2 percent in rental housing. The rental vacancy rate of 8.2 percent was 0.5 percentage points lower than the rate recorded in the fourth quarter 2012 and approximately 0.1 percentage points lower than the rate last quarter.

For rental housing by area, the fourth quarter 2013 vacancy rates inside the principal cities (8.3 percent) was higher than the rates in the suburbs (7.4 percent) and lower than the rate outside Metropolitan Statistical Areas (MSA's) (10.6 percent). The rental vacancy rate in the suburbs was lower than the rate outside MSA's. The rental vacancy rates inside principal cities and in the suburbs were lower than a year ago, while the rate outside MSA's was not statistically different from the fourth quarter 2012 rate.

Among regions, the rental vacancy rate was highest in the South (10.1 percent) and lowest in the West (6.3 percent). The rental vacancy rates in the Northeast, Midwest, South and West were all lower than in the fourth guarter 2012.

RESIDENTIAL VACANCY RATES						
QUARTER	4th Quarter	4th Quarter	% of 2013	% of Difference

4th QUARTER 2013 VACANCY RATES BY REGION						
NORTHEAST	MIDWEST	SOUTH	WEST			
6.7%	8.6%	10.1%	6.3%			

Lease Terms and Concessions

The typical lease term is 12 months. At the time of the writing of this report, none of the surveyed comparables were offering concessions.

Turnover Rates

An estimated turnover rate of 33.0 percent was deemed reasonable for the market area. This was based on the Institute of Real Estate Management (IREM) and comparables in the market area. The table below shows the turnover rates of the comparables verified:

TURNOVER RATES					
	Avg. Annual				
Property Name	Turnover Rate				
Sable Chase (Subject)	40.0%				
Bridge Mill Vista	36.0%				
Preston Creek Apartments	29.0%				
Crossing at McDonough	36.0%				
Amber Chase Apartments	57.0%				
Carrington Green Apartments	20.0%				
Meadowlark Apartments	21.0%				
Woodlawn Park Apartments	25.0%				
Average Annual Turnover	33.0%				

Absorption Rates

The subject is an existing multifamily development that will contain 48 one-bedroom units, 105 two-bedroom units and 72 three-bedroom units. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject has 25 vacant units. Therefore, it is estimated that a 93+ percent occupancy level can be achieved in five to eight months. The interviews with apartment managers substantiate the absorption rate. It is believed that the existing development will absorb three to five units per month; therefore, it will reach a stable occupancy level within eight months.

Likely Impact of Proposed Development on Rental Occupancy Rates

The development will not have an adverse impact on the market area. Its one-, two- and threebedroom units are suitable in the market. PART VI:

EMPLOYMENT TREND

Employment Trends

The economy of the market area is based on agriculture, forestry and fisheries; mining; construction; manufacturing; retail trade; leisure and hospitality; professional and business services; financial activities; and other services sectors. Each of these categories has experienced reasonable growth within the past few years.

Employment in Henry County has been increasing an average of 3.2 percent per year since 2000. Employment in the State of Georgia has been increasing an average of 0.5 percent per year since 2000.

The above chart shows the number of people employed in different sectors of the Henry County and the City of McDonough economy in 2010. According to interviews conducted by the analyst, employers in the area indicate that the area economy should remain stable in the next two to five years.

According to Ms. Laura Luker, Director of Tourism with the Chamber of Commerce, there have been a few new industries locating in the area. This has provided a need for additional housing in the area. It is believe that the economy will remain stable.

Future Employment Trends

According to the McDonough Chamber of Commerce, new jobs were created in the area in the last two years. For these reasons, it is believed that the area will continue to grow and remain stabilized.

Employment Outside the County

For residents employed in the market area, the travel time to work from the site will be less than 19 minutes. For the majority of those employed in other parts of the county, the travel time would be within 35 minutes. According to the chart below, 30.7 percent in the market area have a travel time of less than 19 minutes; 33.2 percent have a travel time of 20 to 34 minutes; and 36.1 percent have a travel time of over 35 minutes. This relatively low travel time indicates that the proposed subject site is in an area in close proximity to employment centers.

ESTIMATED TRAVEL TIME TO WORK FOR MARKET AREA RESIDENTS							
TRAVEL TIME IN MINUTES	NUMBER OF COMMUTERS	PERCENT					
5 or less	129	1.2%					
5-9	633	6.0%					
10-19	2,464	23.4%

PART VII:

PROJECT-SPECIFIC AFFORDABILITY & DEMAND ANALYSIS

PROJECT-SPECIFIC DEMAND ANALYSIS

Household Income Trends and Analysis

Income is a key characteristic in analyzing housing markets. We are primarily concerned with incomes of renters within the target incomes of \$22,971 to \$25,800, or 4.6 percent, for one-bedroom/one-bath units at 50 percent of the area median income; \$22,971 to \$30,960, or 13.1 percent, for one-bedroom/one-bath units at 60 percent of the area median income; \$22,629 to \$29,000, or 10.4 percent, for two-bedroom/one-bath units at 50 percent of the area median income; \$27,909 to \$34,800, or 11.3 percent, for two-bedroom/two-bath units at 60 percent of the area median income; \$27,909 to \$34,800, or 11.3 percent, for two-bedroom/two-bath units at 60 percent of the area median income; \$24,240 to \$34,800 or 17.3 percent for three-bedroom/two-bath units at 50 percent of the area median income; and \$31,611 to \$41,760 or 11.5 percent for three-bedroom/two-bath units at 60 percent of the area median income.

Target incomes for the different unit types are derived by the analyst. For the low end of the range, the lowest rent charged in an income limit (i.e. 30% AMI) for a unit is divided by 35 percent. The resulting number is then multiplied by 12 to derive an annual income (\$670 / 35% = \$1,914.28 x 12 = \$22,971). This process is based on the premise that a tenant should not pay more than 35 percent of his annual income on rent. For the high end of the range, the analyst consults the income limits set by the state housing authority. For example, if the largest unit in an income limit (i.e. 30% AMI) is a two-bedroom unit, the analyst multiplies this number by 1.5 (this is due to the Low Income Housing Tax Credit (LIHTC) program being based on the premise that 1.5 persons per bedroom will occupy rental units) to find how many people could reside in that unit. The analyst then consults the state income limits to set the high end of the range (2 bedroom x 1.5 = 3 people/unit; therefore, the 30% 3-person maximum income would be used).

Sources of Demand

The potential tenants for the existing development include households who now live within the market area. It will appeal to potential tenants who have adequate incomes to pay the proposed rents and find the development more attractive in terms of price, unit features and project amenities than other available rental units. The market area is gaining 499 households per year.

Required Unit Mix

The LIHTC program is based on the premise that 1.5 persons per bedroom will occupy rental units. We expect that 100 percent of one person households and 50 percent of two person households will occupy one-bedroom units. Fifty percent (50%) of two person households and 50 percent of three person households will occupy two-bedroom units and 50 percent will inhabit three-bedroom dwellings. Among four person households, 50 percent will live in three-bedroom units and 50 percent in four-bedroom. Households with five or more persons will occupy units with four or more bedrooms.

The following tables illustrate the ratio of units required by each household size. These occupancy patterns suggest that one-bedroom units should account for 25.3 percent of the renter housing demand, two-bedroom units account for 45.8 percent, three-bedroom units should account for 20.0 percent of the renter housing demand and units with four or more bedrooms account for 8.6 percent of the renter housing demand in the primary market area.

BEDROOMS IN OCCUPIED RENTAL UNITS						
TYPE	NUMBER	PERCENT				
No Bedrooms	9	0.3%				
One-Bedrooms	805	25.3%				
Two-Bedrooms	1,459	45.8%				
Three-Bedrooms	639	20.0%				
Four-Bedrooms	243	7.6%				
Five or More Bedrooms	33	1.0%				
TOTAL	3,188	100.0%				
Source: U.S. Census Bure	Source: U.S. Census Bureau					

Eligible Households

The following table uses a 35 percent lease rent-to-income to determine the minimum target income required for each unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists how many households are within the required target income for each unit type.

INCOME ELIGIBLE HOUSEHOLDS – PRIMARY MARKET AREA								
Unit Type	Rent	Lower Range	Upper Range	Households				
1/1 BR @ 50% AMI	\$670	\$22,971	\$25,800	148				
1/1 BR @ 60% AMI	\$670	\$22,971	\$30,960	417

Required Capture Rate

Project Capture Rate All Vacant Units	3.3%	
Project Stabilization Period	8 Months	

The subject is applying for tax credits at 50 and 60 percent of the area median income. There are two tax credit comparables located in the market area that will compete with the subject property. As indicated in the chart above the capture rates for all one-bedroom units, two-bedroom units and three-bedroom units are below the 35 percent threshold requirement. In addition, the overall capture rates by segment type (i.e. 30%, 40%, 50%, 60%, etc.) for each bedroom type are below the 70 percent threshold requirement. As a result, the analyst feels there is a need for affordable housing and the subject will help fill the need by offering affordable units to the market area.

The overall capture for the existing development is reasonable for the tax credit units. The capture rates for the units are within the acceptable range. It is believed that the subject is a viable development.

Evaluation of the Proposed Development Location

The subject is in a primarily residential neighborhood. Its location provides it with good access and visibility. The properties surrounding the site are in fair to good condition. The site's access to major arterials, medical facilities and grocery stores is comparable to that of its competitors. Its overall location is comparable to its competitors because the size of the town confers the same locational attributes to all projects.

Project Design

The existing subject contains 28 two-story walk-up apartment buildings containing 225 units and two one-story accessory buildings housing a clubhouse, fitness center, laundry facility, leasing/management office and maintenance area. The buildings will be of wood frame construction with stucco and siding exterior.

Project Amenities

Project amenities include a clubhouse, swimming pool, fitness center, picnic area, tot lot, basketball court, tennis court, laundry facility, on-site management, on-site maintenance, video surveillance, gazebo and a parking lot.

Unit Amenities

Unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, microwave, washer/dryer hook-ups, carpet and tile floor coverings, blinds, ceiling fans, walk-in closet, coat closet, balcony and patio.

Tenant Services

The subject will not provide any additional services. All comparables are similar to the subject in terms of tenant services.

Parking

The subject will contain an asphalt parking lot. This arrangement is comparable to other developments in the market area.

Unit Mix

The subject's unit mix of one-, two- and three-bedrooms is suitable in a market area that has above average household sizes.

Unit Size

The average size of the units in the surveyed developments is 826 square feet for one-bedroom units, 1,166 square feet for two-bedroom units and 1,411 square feet for three-bedroom units. The subject's unit sizes are smaller than the average unit size of the comparables surveyed. Although, the subject's unit sizes are slightly smaller it does not appear as though this will have a negative impact on the marketability of the units.

	AVERAGE APARTMENT SIZE OF COMPARABLE APARTMENTS												
		COMPARABLES											
Unit Type	Minimum (SF)	Maximum (SF)	Average (SF)	Subject (SF)	Subject's Advantage

2 BR	951	1,442	1,166	857	-26.5%								
2 BR	951	1,442	1,166	968	-17.0%								
3 BR	1,200	1,639	1,411	1,180	-16.4%								
Source: Gill Grou	p Field Survey												

Vacancy

This market area has an overall vacancy of 2.8 percent for subsidized/rent restricted units. The overall vacancy rate of the market rate units is 2.3 percent. Of the 4,420 market and rent restricted units surveyed, 123 units were vacant. The overall occupancy rate for the market area is 97.2 percent. This vacancy appears to be reasonable.

Utilities

Heating and cooling are central electric. Cooking and hot water are electric. The landlordprovided utilities include water, sewer and trash collection. This arrangement is similar to most apartment units in the market area.

Summary of Developments Strength and Weaknesses

Strengths – The site is located off a major thoroughfare which provides it with good visibility and access. The crime rate for the area is relatively low. In addition, the subject is an existing development that serves family population.

Weaknesses – The site has no apparent weaknesses.

Public reporting burden for thiscollection of information isestimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information is required by the Housing Appropriation Act of 9/28/1994. The information is needed to analyze the reasonableness of the Annual Adjustment Factor formula, and will be used where rent levels for a specific unit type, in a Substantial Rehabilitation or New Construction Contract, exceed the existing FMR rent. The information issonsidered nonsensitive and doesnot require special protection. This agency may not collect this information, and you are not required to complete this form, unless it displays a current ly valid OMB control number.

Explanation of Adjustments and Market Rent Conclusions

Sable Chase Primary Unit Type – One-Bedroom Units (781 SF), Two-Bedroom Units (857 SF) and Three-Bedroom Units (1,180 SF) Secondary Unit Type – Two-Bedroom Units (968 SF)

A rent comparability grid was prepared for the primary unit types with 781, 857 and 1,180 square feet. Comparable apartments used include the following: *Meadowlark (Comparable 1), Walden Run (Comparable 2), Knight Port (Comparable 3), Carrington Green (Comparable 4) and Amber Chase (Comparable 5)*.

Structure/Stories – The subject contains two-story walk-up style buildings. All comparables contain twoor three-story walk-up style buildings. No adjustments were needed.

Project Occupancy - The subject currently has 88 percent occupancy. The comparables' occupancies range from 97 to 100 percent. Therefore, no adjustments were needed.

Year Built/Year Renovated – The subject was constructed in 1994 and will be rehabilitated. *Comparable 1* was built in 1988. *Comparable 2* was built in 1997. *Comparable 3* was built in 1999. *Comparable 4* was built in 2005. *Comparable 5* was built in 1998. The subject will be in good condition.
All comparables will be considered inferior to the subject and were adjusted upward \$50 per month.

SF Area - For the purpose of this report, a range of comparable rents per square foot was derived. To determine this adjustment, each comparable's dollar per square foot rental rate was determined. This number was then multiplied by 33 percent for each comparable to derive an adjusted dollar per square foot rental rate. The median dollar per square foot rental rate is determined. Next, the difference in square footage between the subject and each comparable is determined. The difference is multiplied by the determined adjusted dollar per square foot rate to arrive at the adjustment for each comparable. The selected dollar per square foot is \$0.23 for the one-bedroom comparison, \$0.22 for the two-bedroom comparison and \$0.22 for the three-bedroom comparison. No adjustments were made to comparables within 25 square feet of the subject. These adjustments are reflected on the HUD-Forms 92273, which are attached. The subject also contains two-bedroom units with 968 square feet. These units were considered secondary units and were adjusted as described above. (968 SF – 857 SF = 111 SF x \$0.22 = \$24. Rounded \$25).

of Bedrooms – The subject and all comparables contain similar number of bedrooms. No adjustment was needed.

of Baths – Each complex with a differing number of baths than the subject was adjusted \$20 per full bath. The majority of the difference in number of baths is accounted for in the unit square footage adjustment. However, an adjustment is made here to account for the convenience of additional baths. The extra room(s) will enhance the marketability of a unit even if the square footage remains the same. A paired rental analysis indicated a range of \$0 to \$30 per bath. The paired rental analysis range was determined by comparing comparables with differing numbers of baths and factoring out any other difference (amenities, utilities provided, etc.) The resulting difference is assumed to be attributable to the differing number of baths. The results are grouped together in a range. The adjustment is selected based on where the majority of the results fall within the range. If there is no majority, a conservative adjustment at the low end of the range is selected. As there was no majority in this paired analysis, a \$20 adjustment was selected per full bath.

Balcony/Patio – The subject and all comparables contain this feature. Therefore, no adjustments were needed.

Parking – The subject and all comparables contain parking lots for no fee. **Comparables 2 and 5** also contains garage parking for an additional fee. Since these comparables also contain parking similar to the subject, no adjustment was needed.

AC: Central/Wall – The subject and all comparables contain central air conditioning. Therefore, no adjustments were needed.

Washer/Dryer – The subject will contain washers and dryers within the individual units. All comparables contain washer/dryer hook-ups in the units. Although there is little market data available to support an adjustment for this feature, the amenity is an enhancement to the unit. Therefore, all comparables were adjusted upward \$5 per month.

Pool/Recreation Areas – The subject contains a swimming pool, fitness center, picnic area, tot lot, basketball court, tennis court and gazebo. *Comparables 1, 2, 4 and 5* contain swimming pools. In addition, *Comparable 1* contains a picnic area, playground and basketball court. *Comparable 2* also contains a fitness center, playground and car wash area. *Comparable 4* also contains a fitness center, playground and car wash area. *Comparable 4* also contains a fitness center, playground and basketball court. *Comparable 5* also contains a spa/hot tub, fitness center, picnic area, playground, volleyball court, basketball court, tennis court and car wash area. *Comparable 3* contains a picnic area and was adjusted upward \$10 per month. Apartments with these features can command a higher rent in the market area. Therefore, these adjustments were deemed reasonable after conversations with local apartment managers and tenants.

Heat – Neither the subject, nor any of the comparables have this utility provided. Therefore, no adjustments were needed.

Cooking – Neither the subject, nor any of the comparables have this utility provided. Therefore, no adjustments were needed.

Electric – Neither the subject, nor any of the comparables have this utility provided. Therefore, no adjustments were needed.

Cold/Hot Water – The subject has cold water provided. None of the comparables except **Comparable 3** have either utility provided and were adjusted upward \$60 for the one-bedroom comparison, \$75 for the two-bedroom comparison and \$90 for the three-bedroom comparison. These adjustments were substantiated with local utility companies.

Trash – The subject and **Comparable 3** have this utility provided. None of the remaining comparables have this utility provided and was adjusted upward \$20 for all comparisons.

Extra Storage – The subject does not contain extra storage. **Comparables 1, 3 and 4** are similar to the subject. **Comparable 2** contains extra storage for an additional \$40 per month. **Comparable 5** contains extra storage for no additional fee. Although there is little market data available for units containing these features, tenants in the area indicate a willingness to pay an additional amount for this feature. Therefore, a nominal \$5 adjustment was selected for **Comparable 5**. Since there is a fee charged for the storage at **Comparable 5**, no adjustment was made.

Location – The subject and all comparables are considered similar in project location. Therefore, no adjustment was needed.

Special Features – Neither the subject, nor any of the comparables contain this feature. Therefore, no adjustments were needed.

Security – The subject contains video surveillance. **Comparable 4** contains limited access gate. **Comparable 5** limited access gate and perimeter fencing. **Comparables 1, 2 and 3** do not contain any form of security. Residents in the market area indicated a willingness to pay an additional amount for security, especially security that limits access to the property or units. Therefore, **Comparables 4 and 5** was adjusted downward \$5 per month, and **Comparables 1, 2 and 3** were adjusted upward \$5 per month.

Clubhouse/Community Room – The subject and Comparables 2, 4 and 5 contain clubhouses. Comparables 1 and 3 do not contain either feature. Although there is little market data available concerning units with these features, the added amenity is an enhancement. Therefore, Comparables 1 and 3 were adjusted upward \$5 per month. **Business Center** – The subject does not contain a business center. All comparables except **Comparable 2** are similar to the subject. Although there is little market data available to support an adjustment for this feature, the amenity is an enhancement to the unit. Therefore, **Comparable 2** was adjusted downward \$5 per month.

Conclusion of Market Rent

The adjusted rents range from \$690 to \$835 for the one-bedroom units; from \$769 to \$855 for the twobedroom units; and from \$955 to \$1,050 for the three-bedroom units. All comparables were given consideration. The appraiser concluded the market rent for the units at the subject as follows:

•	781 SF One-Bedroom Unit	-	\$730, or \$0.93 per square foot
•	857 SF Two-Bedroom Unit	-	\$830, or \$0.97 per square foot
•	1,180 SF Three-Bedroom Unit	-	\$1,030, or \$0.87 per square foot

The subject also contains two-bedroom-two-bath units with 968 square feet. These units were adjusted as described in the unit square footage and number of baths explanation. The appraiser concluded the market rent for the units as follow:

968 SF Two-Bedroom Unit
 \$875, or \$0.90 per square foot

PART IX:

ABSORPTION & STABILIZATION RATES

Absorption Rates

The subject is an existing multifamily development that will contain 48 one-bedroom units, 105 two-bedroom units and 72 three-bedroom units. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject has 25 vacant units. Therefore, it is estimated that a 93+ percent occupancy level can be achieved in five to eight months. The interviews with apartment managers substantiate the absorption rate. It is believed that the existing development will absorb three to five units per month; therefore, it will reach a stable occupancy level within eight months.

<u>PART X:</u>

INTERVIEWS

INTERVIEWS

Police Department – Mary Andrews, Manager of Records Division, 770-957-1218 According to Ms. Andrews with the McDonough Police Department, the subject is not located in a high crime area of the city. Ms. Andrews stated that the subject neighborhood is holding steady.

Chamber of Commerce – Laura Luker, Director of Tourism, 770-957-5786

According to Ms. Luker, residents in the neighborhood have expressed approval of the planned development due to the need for additional housing. She stated that the most desirable unit types would be multifamily residences. There have been a few new businesses move to the city in the last two years.

<u>PART XI:</u>

RECOMMENDATIONS AND CONCLUSIONS

RECOMMENDATIONS AND CONCLUSIONS

Project Evaluation

It is the opinion of the analyst that the improvements, the unit mix of one- two- and three-bedroom units, unit size, unit/project amenities and services are well suited for the primary market area.

Site Evaluation

The sites location is considered good. It is located near a major thoroughfare to the city which provides with good visibility and access. It is located in close proximity to medical facilities, schools, shopping, employment, local government facilities and recreational facilities. The site and it improvements are similar to those in the area.

Economic and Demographic Profile

The following describes the demographic and economic profile of the primary market area and the surrounding area:

In 2000, this geographic market area contained an estimated population of 8,493. By 2010, population in this market area had increased by 160.0 percent to 22,084. In 2014, the population in this market area has increased by 10.4 percent to 24,376. It is projected that between 2014 and 2019, population in the market area will increase 7.6 percent to 26,237.

Employment in Henry County has been increasing an average of 3.2 percent per year since 2000. Employment in the State of Georgia has been increasing an average of 0.5 percent per year since 2000.

Existing Housing

There were a total of 16 confirmed apartment complexes in and surrounding the market area. There were approximately 88 market rate vacant units of 3,850 surveyed, for an overall vacancy rate of 2.3 percent. There were approximately 35 subsidized/rent-restricted vacant units out of 570 surveyed, for an overall vacancy rate of 6.1 percent. The amenities of these comparables will be competitive within the market area.

Adjusted Market Rental Rates

Market rental rate grids were completed for the subject. The adjusted market rental rates were \$730 for one-bedroom units, \$830 and \$875 for the two-bedroom units and \$1,030 for the threebedroom units. It is believed that the comparables used in the rent grid analysis were the best available.

Demand & Capture Rates

								Adj.	
Unit	Income	Units	Total		Net	Capture		Market	Proposed
Size	Limits	Proposed	Demand	Supply	Demand	Rate	Absorption	Rent	Rent
1/1 BR	(50% AMI)	16	72	0	72	0.0%	0.0	\$730	\$565
1/1 BR	(60% AMI)	32	203	0	203	1.0%	0.3	\$730	\$565
2/1 BR	(50% AMI)	32	104	0	104	0.0%	0.0	\$830	\$526
2/2 BR	(60% AMI)	73	114	0	114	13.2%	1.9	\$875	\$680
3/2 BR	(50% AMI)	47	138	0	138	4.3%	0.6	\$1,030	\$540
3/2 BR	(60% AMI)	25	72	0	72	2.8%	0.3	\$1,030	\$755
	All Units	225	762	0	762	3.3%	8.0		

The following chart indicates the net demand and the capture rates:

Project Capture Rate All Vacant Units	3.3%
Project Stabilization Period	8 Months

The subject is applying for tax credits at 50 and 60 percent of the area median income. There are two tax credit comparables located in the market area that will compete with the subject property. As indicated in the chart above the capture rates for all one-bedroom units, two-bedroom units and three-bedroom units are below the 35 percent threshold requirement. In addition, the overall capture rates by segment type (i.e. 30%, 40%, 50%, 60%, etc.) for each bedroom type are below the 70 percent threshold requirement. As a result, the analyst feels there is a need for affordable housing and the subject will help fill the need by offering affordable units to the market area.

The overall capture for the proposed development is reasonable for the tax credit units. The capture rates for the units are within the acceptable range. It is believed that the subject is a viable development.

Absorption Rates

The subject is an existing multifamily development that will contain 48 one-bedroom units, 105 two-bedroom units and 72 three-bedroom units. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject has 25 vacant units. Therefore, it is estimated that a 93+ percent occupancy level can be achieved in five to eight months. The interviews with apartment managers substantiate the absorption rate. It is believed that the existing development will absorb three to five units per month; therefore, it will reach a stable occupancy level within eight months.

Data Sources

Information used in the market study was obtained from various sources including; the U.S. Census Bureau, Nielsen Claritas; Ribbon Demographics, U.S. Bureau of Labor Statistics, interviews with local town and government officials and interview with local property owners or managers.

I affirm that I, or an individual employed by my company, have made a physical inspection of the market area and the subject property and that information has been used in the full study of the need and demand for new rental units. To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

ADDENDUM B

MARKET STUDY TERMINOLOGY

Absorption Period

The period of time necessary for a newly constructed or renovated property to achieve the Stabilized Level of Occupancy. The Absorption Period begins when the first certificate of occupancy is issued and ends when the last unit to reach the Stabilized Level of Occupancy has a signed lease. Assumes a typical pre-marketing period, prior to the issuance of the certificate of occupancy, of about three to six months. The month that leasing is assumed to begin should accompany all absorption estimates.

Absorption Rate

The average number of units rented each month during the Absorption Period.

Acceptable Rent Burden

The rent-to-income ratio used to qualify tenants for both income restricted and non-income restricted units. The Acceptable Rent Burden varies depending on the requirements of funding sources, government funding sources, target markets, and local conditions.

Affordable Housing

Housing where the tenant household pays no more than 30 percent of its annual income on Gross Rent.

Amenity

Tangible or intangible benefits offered to a tenant at no fee, typically on-site recreational facilities or planned programs, services and activities.

Annual Demand

The total estimated demand present in the market in any one year for the type of units proposed.

Area Median Income (AMI)

One-hundred percent of the gross median household income for a specific metropolitan statistical area, county or non-metropolitan area established annually by HUD.

Assisted Housing

Housing where the monthly costs to the tenants are subsidized by federal, state or other programs.

Attached Housing

Two or more dwelling units connected with party walls (e.g. townhouses or flats).

Basic Rent

The minimum monthly rent that tenants who do not have rental assistance pay to lease units developed through the USDA-RD Section 515 Program, the HUD Section 236 Program and HUD Section 223 (d)(3) Below Market Interest Rate Program. The Basic Rent is calculated on the rent as the amount of rent required to operate the property, maintain debt service on a subsidized mortgage with a below-market interest rate, and provide a return on equity to the developer in accordance with the regulatory documents governing the property.

Below Market Interest Rate Program (BMIR)

Program targeted to renters with income not exceeding 80 percent of area median income by limiting rents based on HUD's BMIR Program requirements and through the provision of an interest reduction contract to subsidize the market interest rate to a below-market rate. Interest rates are typically subsidized to effective rates of one percent or three percent.

Capture Rate

The percentage of age, size, and income qualified renter households in the Primary Market Area that the property must capture to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. The Capture Rate is calculated by dividing the total number of units at the property by the total number of age, size and income qualified renter households in the Primary Market Area. See Penetration Rate for rate for entire market area.

Census Tract

A small, relatively permanent statistical subdivision delineated by a local committee of census data users for the purpose of presenting data. Census tract boundaries normally follow visible features, but may follow governmental unit boundaries and other non-visible features; they always nest within counties. They are designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions at the time of establishment. Census tracts average about 4,000 inhabitants.

Central Business District (CBD)

The center of commercial activity within a town or city; usually the largest and oldest concentration of such activity.

Community Development Corporation (CDC)

Entrepreneurial institution combining public and private resources to aid in the development of socio-economically disadvantaged areas.

Comparable Property

A property that is representative of the rental housing choices of the subject's Primary Market Area and that is similar in construction, size, amenities, or age. These Comparables and Competitives are generally used to derive market rent.

Competitive Property

A property that is comparable to the subject and that competes at nearly the same rent levels and tenant profile, such as age, family or income.

Concession

Discount given to a prospective tenant to induce the tenant to sign a lease. Concessions typically are in the form of reduced rent or free rent for a specified lease term or for free amenities which are normally charged separately (i.e. washer/dryer, parking).

Condominium

A form of joint ownership and control of property in which specified volumes of space (for example, apartments) are owned individually while the common elements of the property (for example, outside walls) are owned jointly.

Contract Rent

- 1. The actual monthly rent payable by the tenant, including any rent subsidy paid on behalf of the tenants, to the owner, inclusive of all terms of the lease (HUD & RD).
- 2. The monthly rent agreed to between a tenant and a landlord (Census).

Demand

The total number of households in a defined market area that would potentially move into proposed new or renovated housing units. These households must be of the appropriate age, income, tenure and size for a specific proposed development. Components of demand vary and can include household growth; turnover, those living in substandard conditions, rent overburdened households, and demolished housing units. Demand is project specific.

Difficult Development Area (DDA)

An area designated by HUD as an area that has high construction, land, and utility costs relative to the Area Median Gross Income. A project located in a DDA and utilizing the Low Income Housing Tax Credit may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Detached Housing

A freestanding dwelling unit, typically single-family, situated on its own lot.

Effective Rents

Contract Rent less concessions.

Elderly or Senior Housing

Housing where (1) all the units in the property are restricted for occupancy by persons 62 years of age or older or (2) at least 80 percent of the units in each building are restricted for occupancy by households where at least one household member is 55 years of age or older and the housing is designed with amenities and facilities designed to meet the needs of senior citizens.

Extremely Low Income

Person or household with income below 30 percent of Area Median Income adjusted for household size.

Fair Market Rent (FMR)

The estimates established by HUD of the Gross Rents (Contract Rent plus Tenant Paid Utilities) needed to obtain modest rental units in acceptable condition in a specific county or metropolitan statistical area. HUD generally sets FMR so that 40 percent of the rental units have rents below the FMR. In rental markets with a shortage of lower priced rental units HUD may approve the use of Fair Market Rents that are as high as the 50th percentile of rents.

Garden Apartments

Apartments in low-rise buildings (typically two to four stories) that feature low density, ample open-space around the buildings, and on-site parking.

Gross Rent

The monthly housing cost to a tenant which equals the Contract Rent provided for in the lease plus the estimated cost of all Tenant Paid Utilities.

High-rise

A residential building having more than ten stories.

Household

One or more people who occupy a housing unit as their usual place of residence.

Household Trends

Changes in the number of households for a particular area over a specific period of time, which is a function of new household formations (e.g. at marriage or separation) and in average household size.

Housing Unit

House, apartment, mobile home, or group of rooms used as a separate living quarters by a single household.

Housing Choice Voucher (Section 8 Program)

Federal rent subsidy program under Section 8 of the U.S. Housing Act which issues rent vouchers to eligible households to use in the housing of their choice. The voucher payment subsidizes the difference between the Gross Rent and the tenant's contribution of 30 percent of adjusted income (or 10 percent of gross income, whichever is greater). In cases where 30 percent of the tenants' income is less than the utility allowance, the tenant will receive an assistance payment. In other cases, the tenant is responsible for paying his share of the rent each month.

Housing Finance Agency (HFA)

State or local agencies responsible for financing housing and administering Assisted Housing programs.

HUD Section 8 Program

Federal program that provides project based rental assistance. Under the program HUD contracts directly with the owner for the payment of the difference between the Contract Rent and a specified percentage of tenants adjusted income.

HUD Section 202 Program

Federal program, which provides direct capital assistance (i.e. grant) and operating or rental assistance to finance housing designed for occupancy by elderly households who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization. Units receive HUD project based rental assistance that enables tenants to occupy units at rents based on 30 percent of tenant income.

HUD Section 811 Program

Federal program, which provides direct capital assistance and operating or rental assistance to finance housing designed for occupancy by persons with disabilities who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization.

HUD Section 236 Program

Federal program which provides interest reduction payments for loans which finance housing targeted to households with income not exceeding 80 percent of area median income who pay rent equal to the greater of Basic Rent of 30 percent of their adjusted income. All rents are capped at a HUD approved market rent.

Income Band

The range of incomes of households that can pay a specific rent but do not have more income than is allowed by the Income Limits of a particular housing program. The minimum household income typically is based on a defined Acceptable Rent Burden percentage and the maximum typically is pre-defined by specific programmatic requirements or by general market parameters.

Income Limits

Maximum household income by county or Metropolitan Statistical Area, adjusted for household size and expressed as a percentage of the Area Median Income for the purpose of establishing an upper limit for eligibility for a specific housing program. Income Limits for federal, state and local rental housing programs typically are established at 30, 50, 60 or 80 percent of AMI. HUD publishes Income Limits each year for 30 percent median, Very Low Income (50%), and Low-Income (80%), for households with 1 through 8 people.

Infrastructure

Services and facilities including roads, highways, water, sewerage, emergency services, parks and recreation, etc. Infrastructure includes both public and private facilities.

Low Income

Person or household with gross household income below 80 percent of Area Median Income adjusted for household size.

Low Income Housing Tax Credit

A program to generate equity for investment in affordable rental housing authorized pursuant to Section 42 of the Internal Revenue Code, as amended. The program requires that a certain percentage of units built by restricted for occupancy to households earning 60 percent of less of Area Median Income, and that the rents on these units be restricted accordingly.

Low Rise Building

A building with one to three stories.

Market Advantage

The difference, expressed as a percentage, between the estimated market rent for an apartment property without income restrictions and the lesser of (a) the owner's proposed rents or (b) the maximum rents permitted by the financing program for the same apartment property.

Market Analysis

A study of real estate market conditions for a specific type of property.

Market Area or Primary Market Area

A geographic area from which a property is expected to draw the majority of its residents.

Market Demand

The total number of households in a defined market area that would potentially move into new or renovated housing units. Market demand is not project specific and refers to the universe of tenure appropriate households, independent of income. The components of market demand are similar to those used in determining demand.

Market Rent

The rent that an apartment, without rent or income restrictions or rent subsidies, would command in the open market considering its location, features, amenities. Market rent should be adjusted for concessions and owner paid utilities included in the rent.

Market Study

A comprehensive review of the housing market in a defined market area. A market study can be used to determine the demand for specific proposed development or to examine the overall condition of an area's housing market. Project specific market studies are often used by developers, syndicators, and government entities to determine the appropriateness of a proposed development, whereas market specific market studies are used to determine what housing needs, if any, exist within a specific geography. At a minimum, market studies include a review of location, economic conditions, demographics, and existing and proposed housing stock.

Marketability

The manner in which the subject fits into the market; the relative desirability of a property (for sale or lease) in comparison with similar or competing properties in the area.

Market Vacancy Rate – Physical

Average number of apartment units in any market which are unoccupied divided by the total number of apartment units in the same Market Area, excluding units in properties which are in the lease-up stage.

Market Vacancy Rate – Economic

Percentage of rent loss due to concessions and vacancies.

Metropolitan Statistical Area (MSA)

A geographic entity defined by the federal Office of Management and Budget, for use by federal statistical agencies, based on the concept of a core area with a large population nucleus, plus adjacent communities having a high degree of economic and social integration with that core. Qualification of an MSA requires the presence of a city with 50,000 or more inhabitants, or the presence of an Urbanized Area (UA) and a total population of at least 100,000 (75,000 in New England). The county or counties containing the largest city and surrounding densely settled territory are central counties of the MSA. Additional outlying counties qualify to be included in the MSA by meeting certain other criteria of metropolitan character, such as a specified minimum population density or percentage of the population that is urban.

Mid-rise

A building with four to ten stories.

Mixed Income Property

An apartment property containing (1) both income restricted and unrestricted units or (2) units restricted at two or more Income Limits (i.e. Low Income Tax Credit property with income limits of 30, 50 and 60 percent).

Mobility

The ease with which people move from one location to another.

Moderate Income

Person or household with gross household income between 80 and 120 percent of Area Median Income adjusted for household size.

Move-up Demand

An estimate of how many consumers are able and willing to relocate to more expensive or desirable units, such as tenants who move up from Class C properties to Class B; and Class B tenants that move up to Class A properties; and tenants that move from Class C and B properties to a new superior Low Income Tax Credit property.

Multi-family

Structures that contain more than two or more housing units.

Neighborhood

An area of a city or town with common demographic and economic features that distinguish it from adjoining areas.

Net Rent (also referred to as Contract or Lease Rent)

Gross Rent less Tenant Paid Utilities.

Penetration Rate

The percentage of age and income qualified renter households in the Primary Market Area that live in all existing and proposed properties, to be completed within six months of the subject, and which are competitively priced to the subject that must be captured to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. See Capture Rate for property specific rate.

Pent-up Demand

A market in which there is a scarcity of supply and vacancy rates are very low.

Population Trends

Changes in population levels for a particular area over a specific period of time – which is a function of the levels of births, deaths, and net migration.

Primary Market Area

See Market Area

Programmatic Rents

The proposed rents for a Tax Credit or other income restricted property relative to comparable market rate properties and rents being achieved at another Low Income Housing Tax Credit or other income restricted properties in the market. Can be no greater than maximum rents permitted by the Low Income Housing Tax Credit or other program regulations.

Project Based Rent Assistance

Rental assistance from a federal, state or local program that is allocated to the property or a specific number of units in the property and is available to each income eligible tenant of the property or an assisted unit.

Public Housing or Low Income Conventional Public Housing

HUD program administered by local (or regional) Housing Authorities which serves Low- and Very-Low Income Households with rent based on the same formula used for HUD Section 8 assistance.

Qualified Census Tract (QCT)

Any census tract (or equivalent geographic area defined by the Bureau of the Census) in which at least 50 percent of households have an income less than 60 percent of Area Median Income or where the poverty rate is at least 25 percent. A project located in a QCT and receiving Low Income Housing Tax Credits may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Rural Development (RD) Market Rent

A monthly rent that can be charged for an apartment under a specific USDA-RD housing program, that reflects the agency's estimate of the rent required to operate the property, maintain debt service on a un-subsidized mortgage and provide an adequate return to the property owner. This rent is the maximum rent that a tenant can pay at an RD property.

Rural Development (RD) Program

Federal program which provides low interest loans to finance housing which serves low- and moderate-income persons in rural areas who pay 30 percent of their adjusted income on rent or the basic rent, whichever is the higher (but not exceeding the market rent). The Program may include property based rental assistance and interest reduction contracts to write down the interest on the loan to as low as one percent.

Redevelopment

The redesign or rehabilitation of existing properties.

Rent Burden

Gross rent divided by gross monthly household income.

Rent Burdened Households

Households with Rent Burden above the level determined by the lender, investor, or public program to be an acceptable rent-to-income ratio.

Restricted Rent

The rent charged under the restrictions of a specific housing program or subsidy.

Saturation

The point at which there is no longer demand to support additional units.

Secondary Market Area

The portion of a market area that supplies additional support to an apartment property beyond that provided by the Primary Market Area.

Single-Family Housing

A dwelling unit, either attached or detached, designed for use by one household and with direct access to a street. It does not share heating facilities or other essential building facilities with any other dwelling.

Special Needs Population

Specific market niche that is typically not catered to in a conventional apartment property. This population should exhibit certain criteria, which can be well defined, in order, for example, to assess the need and demand from this source. Examples of special needs populations include: substance abusers, visually impaired person or persons with mobility limitations.

Stabilized Level of Occupancy

The underwritten or actual number of occupied units that a property is expected to maintain after the initial rent-up period, expressed as a percentage of the total units.

State Date Center (SDC)

A state agency or university facility identified by the governor of each state to participate in the Census Bureau's cooperative network for the dissemination of the census data.

Subsidy

Monthly income received by a tenant or by an owner on behalf of a tenant to pay the difference between the apartment's Contract Rent and the amount paid by the tenant toward rent.

Substandard Conditions

Housing conditions that are conventionally considered unacceptable which may be defined in terms of lacking plumbing facilities, one or more major systems not functioning properly, or overcrowded conditions.

Target Income Band

The Income Band from which the subject property will draw tenants.

Target Population

Market niche a development will appeal or cater to. State agencies often use Target Population to refer to various income set asides, elderly v. family, etc.

Tenant

One who rents real property from another.

Tenant Paid Utilities

The cost of utilities necessary for the habitation of a dwelling unit, which are paid by the tenant. Tenant Paid Utilities do not include costs for telephone or cable service.

Tenure

The distinction between owner-occupied and renter-occupied housing units.

Townhouse (or Row House)

Single-family attached residence separated from another by party walls, usually on a narrow lot offering small front and back-yards; also called a row house.

Turnover

- An estimate of the number of housing units in a Market Area as a percentage of total housing units in the Market Area that will likely change occupants in any one year. See Vacancy Period.
- Turnover Period The percent of occupants in a given apartment complex that move in one year.

Unmet Housing Need

New units required in the Market Area to accommodate household growth, homeless households, and housing in substandard conditions.

Unrestricted Rents

The recommended rents for the market rate units at a Mixed-Income Property.

Vacancy Period

The amount of time that an apartment remains vacant and available for rent.

Vacancy Rate – Economic

Maximum potential revenue less actual rent revenue divided by maximum potential rent revenue.

Vacancy Rate – Physical

The number of total habitable units that are vacant divided by the total number of units in the property.

Very Low Income

Person or household whose gross household income does not exceed 50 percent of Area Median Income adjusted for household size.

Zoning

Classification and regulation of land by local governments according to use categories (zones); often also includes density designations.
