Ms. Willa Turner Office of Affordable Housing Georgia Department of Community Affairs 60 Executive Park South Northeast, 2nd Floor Atlanta, Georgia 30329

Dear Ms. Turner:

Following is a market study which was completed for Royal Point Apartments according to the guidelines set forth by the Georgia Department of Community Affairs as authorized by The Office of Affordable Housing. The subject is located at 301 North Gross Road, Kingsland, Georgia. The site is improved with nine two- and three-story walk-up buildings containing 144 Low Income Housing Tax Credit units designed for families. The subject also contains asphalt parking with approximately 294 parking spaces. The total site size is approximately 11.83 acres, or 515,315 square feet.

The purpose of the following market study is to determine if the community has a need for the subject units. To do so, the analyst utilized data from the U.S. Census Bureau, Nielsen Claritas; Ribbon Demographics, and various other demographic resources. Community information and opinion was also utilized. This information was collected during a field survey conducted by David Warren while visiting the site. The site was inspected on April 18, 2016, by David Warren. An attempt was made to survey 100 percent of all housing in the area. The intended users of the report are Georgia Department of Community Affairs, Investors Management Company and Churchill Stateside Group, LLC and its affiliates or assigns.

I certify that there is not now, nor will there, be an identity of interest between or among the applicant, contractor, architect, engineer, attorney, interim lender, subcontractors, material suppliers, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Georgia Department of Community Affairs and written consent to such identity of interest by Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

The document is assignable to other lenders that are parties to the DCA loan transaction. In addition to this market study, Gill Group, Inc., has also completed an appraisal report.

CERTIFICATION

This is to certify that a field visit was made by the market analyst or one of his associates and information was obtained from publications of Federal, State and Local agencies. Interviews were held with apartment owners or managers, local officials and others as appropriate who may be knowledgeable of the housing market in Kingsland.

In accordance with Georgia Department of Community Affairs, I hereby certify that the information provided in this Market Study was written according to Georgia Department of Community Affairs' market study requirements and is truthful and accurate to the best of my knowledge and belief. The estimates of demand for family housing made by this report are based on the assumption of a free market situation, unencumbered by local mores, affirmative fair housing marketing or prejudice toward the site location.

This is to affirm that I will receive no fees which are contingent upon approval of the project by Georgia Department of Community Affairs, before or after the fact, and that I will have no interest in the housing project.

IDENTITY OF INTEREST

I understand and agree that Georgia Department of Community Affairs will consider an identity of interest to exist between the loan applicant as the party of the first part and general contractors, architects, engineers, attorneys, interim lenders, subcontractors, material suppliers or equipment lessors as parties of the second part under any of the following conditions:

1. When there is any financial interest of the party of the first part in the party of the second part;

2. When one or more of the officers, directors, stockholders or partners of the party of the first part is also an officer, director, stockholder or partner of the party of the second part;

3. When any officer, director, stockholder or partner of the party of the first part has any financial interest whatsoever in the party of the second part;

4. When the party of the second part advances any funds to the party of the first part other than an interim lender advancing funds to enable the applicant to pay for construction and other authorized and legally eligible expenses during the construction period;

5. When the party of the second part provides and pays on behalf of the party of the first part the cost of any legal services, architectural services or interim financing other than those of the survey, general superintendent or engineer employed by a general contractor in connection with obligations under the construction contract;

6. When the party of the second part takes stock or any interest in the party of the first part as part of the consideration to be paid them; and

7. When there exists or comes into being any side deals, agreements, contracts or undertakings entered into thereby altering, amending or canceling any of the required closing documents or approval conditions as approved by Georgia Department of Community Affairs.

I certify that there is not now, nor will there be, an identity of interest between or among the applicant, contractor, architect, interim lender, subcontractors, material supplies, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Georgia Department of Community Affairs and written consent to such identity of interest by Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

There is no identity of interest between the loan applicant and the Market Analyst or Gill Group.

<u>PART I:</u>

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

It is the opinion of the analyst that a market does exist for the 144-unit development designed for families. The existing development designed for families is viable within the market area. The report was prepared assuming that the project will be rehabilitated as detailed in this report.

Project Description

The subject, Royal Point Apartments, is an existing 144-unit development designed for families. The site is located at 301 North Gross Road, Kingsland, Camden County, Georgia, 31548. North Gross Road is located east of Interstate 95.

The existing development contains nine two- and three-story walk-up buildings. The property is 95 percent occupied. The property contains 60 two-bedroom/two-bath units with 990 square feet for a total of 71,280 square feet and 72 three-bedroom/two-bath units with 1,189 square feet for a total of 85,608 square feet. The total net rentable area is 156,888 square feet.

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

	MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES									
Unit Type	# of Units	Avg. Square Feet	% of Median Income	Maximum LIHTC	Gross Rent	Utility Allowance	Net Rent			
				Rent						
2/2 (50%)	30	990	50%	\$702	\$700	\$90	\$610			
2/2 (60%)	42	990	60%	\$843	\$834	\$90	\$744			
3/2 (50%)	30	1,189	50%	\$811	\$806	\$106	\$700			
3/2 (60%)	42	1,189	60%	\$973	\$906	\$106	\$800			

The subject is currently a Low Income Housing Tax Credit, with Rental Assistance for 28 units. It will continue to be Low Income Housing Tax Credit with all units set at 50 and 60 percent of the area median income. Additionally, the property will accept vouchers as needed. Unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, washer/dryer hook-ups, carpet and tile floor coverings, blinds, ceiling fans, vaulted ceilings (in select units), walk-in closets and safety bars. Project amenities include community room, meeting room, swimming pool, fitness center, picnic area, playground, tot lot, basketball court, business center, laundry facility, on-site management, on-site maintenance, perimeter fencing and open parking spaces. The subject's unit mix and project amenities are similar to superior to most surveyed comparables.

The subject's unit mix of two- and three-bedroom units is suitable in the market. The subject's unit sizes are larger than the average unit size of the comparables surveyed; therefore, the unit sizes will do not appear to have a negative impact on the marketability of the units.

The subject property's proposed net rents are lower than the market rents of \$920 for the two-bedroom units and \$1,045 for the three-bedroom units.

Site Description/Evaluation

The subject is located at 301 North Gross Road, and contains approximately 11.83 acres. The subject property is currently zoned R-3, Medium and High Density Multi-Family. The subject is a legal, conforming use. North Gross Road is located east of Interstate 95. Due to the subject's location on a secondary road, it is the opinion of the analyst that there is average visibility/access to the site.

The subject neighborhood is comprised primarily of single-family residences and multifamily dwellings and is 95 percent built up. Approximately 50 percent of the land use is made up of single-family residences. About 30 percent is comprised of multifamily dwellings. Another 15 percent of the land use is made up of industrial and commercial properties. The remaining 5 percent is vacant land. The area is mostly suburban.

The site is located near a major thoroughfare which provides it with average visibility and access. The crime rate for the area is relatively low. The subject is located in close proximity to most major services. There are multiple pharmacies, convenience stores, department stores, banks and restaurants within two miles of the site. In addition schools and health care facilities are located within a reasonable distance from the subject. The subject is an existing development designed for families. The subject will be 100 percent Low Income Housing Tax Credit, with 100 percent set at 50 and 60 percent of the area median income, which will provide affordable housing to residents in the area. The site has no apparent weaknesses.

Market Area Definition

The market area for the subject consists of Census Tracts 0103.01, 0103.02, 0104.01, 0104.02 and 0104.03. The primary market area has the following boundaries: North – Satilla River, State Highway 110 and Colesburg Tompkins Road; East – U.S. Highway 17, Harrietts Bluff Road, Interstate 95, Cumberland River, State Highway 40, Coalrain Road and Burrells Creek; South – St. Mary's River/State of Florida; and West – Charlton County. The northern boundary is approximately 7.7 to 16.8 miles from the subject, and the southern boundary is approximately 5.4 miles from the subject. The western boundary is approximately 17.9 miles from the subject, and the eastern boundary is approximately 4.9 miles from the subject.

Community Demographic Data

In 2000, this geographic market area contained an estimated population of 24,721. By 2010, population in this market area had increased by 29.9 percent to 32,113. In 2016, the population in this market area had increased by 6.4 percent to 34,159. It is projected that between 2016 and 2018, population in the market

area will increase 2.3 percent to 34,953. It is projected that between 2018 and 2021, population in the market area will increase 5.7 percent to 36,143.

Between 2000 and 2010, the market area gained approximately 136 households per year. The market area is projected to gain 276 households between 2016 and 2018. The market area is projected to continue to gain households through 2021. The households in the market area are predominantly owner-occupied. The percentage of owner-occupied is projected to remain stable through 2021.

Of the surveyed comparables, two-bedroom units range from \$433 to \$1,065 per month and threebedroom units range from \$453 to \$1,175 per month. These rental rates have remained similar within the past few years.

Households who have between one and three persons and annual incomes between \$24,000 and \$28,000 are potential tenants for the two-bedroom units at 50 percent of the area median income. Approximately 2.9 percent of the primary market area tenants are within this range.

Households who have between one and three persons and annual incomes between \$28,594 and \$33,600 are potential tenants for the two-bedroom units at 60 percent of the area median income. Approximately 4.7 percent of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$27,634 and \$33,600 are potential tenants for the three-bedroom units at 50 percent of the area median income. Approximately 5.4 percent of the primary market area tenants are within this range.

Households who have three to five persons and annual incomes between \$31,063 and \$40,320 are potential tenants for the three-bedroom units at 60 percent of the area median income. Approximately 9.4 percent of the primary market area tenants are within this range.

According to www.realtytrac.com, there are currently 65 properties for sale that are foreclosures within the subject's zip code. This ratio is in the mid-range for the City of Kingsland. In March, the number of properties that received a foreclosure filing in 31548 was 30 percent higher than the previous month and 160 percent higher than the prior year. The City of Kingsland foreclosure rate is 1 in every 637 housing units. Camden County foreclosure rate is 1 in 778. Therefore, it appears that the foreclosure rate in the city has been increasing. There are no known properties within the vicinity of the property that have been foreclosed upon. In addition, there are no known negative factors impacting the occupancy of the subject within the market area.

Economic Data

The economy of the market area is based on retail trade; education, health, and social services; and entertainment and recreation services sectors. Each of these categories has experienced reasonable growth within the past few years.

Employment in Camden County has been increasing an average of 1.5 percent per year since 2000. Employment in the State of Georgia has been increasing an average of 0.6 percent per year since 2000. The unemployment rate for Camden County has fluctuated from 4.0 percent to 9.9 percent over the past 10 years. These fluctuations are in line with the unemployment rates for Camden County and the State of Georgia.

There have not any business closures within the past two years in Kingsland and Camden County. Recently, Camden County commissioners agreed to put a purchase option on about 4,000 acres to develop a site where spacecraft would be tested and launched. The county is advancing on a plan to develop the first fully commercial spaceport on the East Coast, a project that could create more than 2,000 jobs and make Georgia a player in the \$300 billion space industry. Overall, it is believed that the economy of Kingsland will remain stable.

Project-Specific Affordability and Demand Analysis

The following table uses a 35 percent lease rent-to-income to determine the minimum target income required for each unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists the number of households within the required target income for each unit type.

	INCOME ELIGIBLE HOUSEHOLDS								
Unit Type	Gross Rent	Lower Range	Upper Range	Percent Renter	Renter Households				
2/2 (50%)	\$700	\$24,000	\$28,000	2.9%	122				
2/2 (60%)	\$834	\$28,594	\$33,600	4.7%	199				
3/2 (50%)	\$806	\$27,634	\$33,600	5.4%	228				
3/2 (60%)	\$906	\$31,063	\$40,320	9.4%	401				
Total Units		\$24,000	\$40,320	14.8%	631

The following chart indicates the net demand and the capture rates:

The subject is applying for tax credits at 50 and 60 percent of the area median income. There are no tax credit comparables located in the market area constructed within the past two years that compete with the subject. If the subject were vacant, it would need to capture 79.4 percent of the demand in the market area for units at 50 and 60 percent of the area median income. However, the subject is an existing property that is currently 95 percent occupied. Therefore, the capture rate considering only the vacant units is determined to be a more accurate indication of the capture rate for the subject. The subject contains no tenants who are considered rent burdened as determined under the LIHTC program. It is unlikely that the tenants could find comparable housing with rents low enough to meet the affordability requirements even if there were any tenants that were rent overburdened. Therefore, it is probable that these tenants would chose to remain at the subject. Furthermore, it is not likely that the tenants will be displaced because they meet the maximum allowable income requirements. The subject is currently 100 percent Low Income Housing Tax Credit. Consequently, it was considered appropriate to determine the capture rate estimates considering only the seven vacant units at the property. The capture rate for the subject's two-bedroom units at 50 percent of the area median income is 2.7 percent; for the subject's two-bedroom units at 60 percent of the area median income is 4.3 percent; for the subject's three-bedroom units at 50 percent of the area median income is 5.6 percent; and for the subject's three-bedroom units at 60 percent of the area median income is 6.1 percent. The capture rate for all units at 50 percent of the area median income is 2.1 percent and the capture rate for all units at 60 percent is 3.0 percent. The capture rate for all vacant twobedroom units is well below the 30 percent threshold requirements, and the capture rate for all vacant three-bedroom units is well below the 40 percent threshold requirement. The overall capture rate for all vacant tax credit units is 3.9 percent and does not exceed the 35 percent threshold requirement for rural areas. As a result, the analyst feels there is a need for affordable housing, and the subject will help fill the need by continuing to offer affordable units to the market area.

Competitive Rental Analysis

There were a total of 12 confirmed market-rate and restricted apartment complexes in and surrounding the market area. There were 41 vacant units at the time of the survey out of 1,307 surveyed, for an overall vacancy rate of 3.1 percent. The amenities of these comparables are relatively similar to inferior to the subject's proposed amenities. Therefore, it is believed the subject will be competitive within the market area.

Market rental rate grids were completed for the subject. The subject property's proposed net rents are lower than the market rents of \$920 for the two-bedroom units and \$1,045 for the three-bedroom units. The analyst was able to locate and verify nine market-rate complex within the subject's market area. It is believed that the comparables used in the rent grid analysis were the best available. The proposed tax credit rents are lower than the adjusted market rental rates. Therefore, it is believed that the proposed tax credit rents will be competitive with existing properties.

Absorption/Stabilization Estimate

The subject is an existing multifamily development that contains 144 two- and three-bedroom units. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units. The rehabilitation will not displace any tenants, and the existing tenants are expected to remain income-qualified. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units.

Conclusion

The overall capture rate for the proposed development is reasonable for the tax credit units. The property is currently applying for Low Income Housing Tax Credits. The capture rate was figured by unit size. The capture rates for the vacant units are within the acceptable range. It is believed that the subject is a viable development.

<u>PART II:</u>

PROJECT DESCRIPTION

PROJECT DESCRIPTION

Project Name:	Royal Point Apartments
Location:	301 North Gross Road
	Kingsland, Camden County, Georgia 31548
Project Type:	Family
Construction Type:	Existing Rehab Development
Developer:	Picerne Development Corporation of Florida

The existing development contains nine two- and three-story walk-up buildings containing 144 units with brick and vinyl siding exterior. The property contains 72 two-bedroom/two-bath units containing 990 square feet for a total of 71,280 square feet and 72 three-bedroom/two-bath units containing 1,189 square feet for a total of 85,608 square feet. The total net rentable area is 156,888 square feet.

Project Design

The subject contains nine two- and three-story walk-up buildings containing 144 units with brick and vinyl siding exterior and one accessory building.

Unit Features, Project Amenities and Services

Unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, washer/dryer hook-ups, carpet and tile floor coverings, ceiling fans, blinds, walk-in closet and vaulted ceilings (in-select units). Project amenities include clubhouse, community room, swimming pool, fitness center, playground, basketball court, business center, computer room, laundry facility, on-site management, on-site maintenance, perimeter fencing and open parking spaces.

Parking

The subject contains open parking areas with approximately 294 parking spaces. The parking ratio is 2.04 spaces per unit.

Utilities

The following table describes the project's utility combination.

UTILITY SCHEDULE							
Utility	Туре	Who Pays					
Heat	Central Electric	Tenant					
Air Conditioning	Central Electric	Tenant					
Hot Water	Electric	Tenant					
Cooking	Electric	Tenant					
Other Electric	N/A	Tenant					
Cold Water/Sewer	N/A	Landlord					
Trash Collection	N/A	Landlord					

Unit Mix, Size and Rent Structure

The subject currently contains 144 total units and is 95 percent occupied, with seven vacant units. The following chart lists the subject's existing unit distribution by unit type, size, income restriction and rent structure.

Unit Type	# of Units	Avg. Square	Contract Rent	Utility Allowance
2/2 (50%)	30	990	\$646	\$90
2/2 (60%)	42	990	\$700	\$90
3/2 (50%)	30	1,189	\$744	\$106
3/2 (60%)	42	1,189	\$800	\$106
	144			

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

	MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES										
Unit Type	# of Units	Avg. Square Feet	% of Median Income	Maximum LIHTC Rent	Gross Rent	Utility Allowance	Net Rent

3/2 (60%)	42	1,189	60%	\$973	\$906	\$106	\$800				

The subject is currently Low Income Housing Tax Credit, with Rental Assistance for 28 units. It will continue to be Low Income Housing Tax Credit, with all units set at 50 and 60 percent of the area median income.

Eligibility

Households who have between one and three persons and annual incomes between \$24,000 and \$28,000 are potential tenants for the two-bedroom units at 50 percent of the area median income. 2.9 percent of the primary market area tenants are within this range.

Households who have between one and three persons and annual incomes between \$28,594 and \$33,600 are potential tenants for the two-bedroom units at 60 percent of the area median income. 4.7 percent of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$27,634 and \$33,600 are potential tenants for the three-bedroom units Assistance at 50 percent of the area median income. 5.4 percent of the primary market area tenants are within this range.

Households who have three to five persons and annual incomes between \$31,063 and \$40,320 are potential tenants for the three-bedroom units at 60 percent of the area median income. 9.4 percent of the primary market area tenants are within this range.

Rehabilitation

The rehabilitation is anticipated to begin December 2016 and end in December 2017.

PART III:

SITE EVALUATION

SITE EVALUATION

Date of Inspection: April 18, 2016

Site Inspector: David Warren

Project Location

The subject is located at 301 North Gross Road in the east central portion of the City of Kingsland, Georgia. North Gross Road is located east of Interstate 95.

Site Characteristics

The subject neighborhood is comprised primarily of single-family residences and multi-family dwellings and is approximately 95 percent built up. Approximately 50 percent of the land use is made up of single-family residences. About 30 percent is comprised of multifamily dwellings. Another 15 percent of the land use is made up of commercial and industrial properties. The remaining 5 percent is vacant land. The area is mostly suburban.

Zoning

According to the City of Kingsland, the subject is zoned R-3, Medium and High Density Multi-Family. The subject is a legal, conforming use Therefore, it is unlikely that a zoning change will occur. The subject appears to meet site and setback requirements and appears to conform to the current zoning restrictions. The subject could be re-built if it were destroyed. Since there are no obvious conflicts between the subject property and the zoning of the property, there is no negative impact on the market value by the zoning classification.

Surrounding Land Uses

Vacant wooded land is located north and east of the site. Vacant wooded land and the Camden Way Apartments are located south of the site. Lake Crest Homes are located west of the site.

Developments

Existing developments within the market area include Hilltop Phase II, Reserve at Sugar Mill Apartments and Kings Grant Apartments. Hilltop Phase II is a Section 8 property and would not directly compete with the subject. Reserve at Sugar Mill Apartments and Kings Grant Apartments are Low Income Housing Tax Credit developments targeted towards families and would directly compete with the subject.

Schools

According to **www.neighborhoodscout.com**, the subject is served by the Camden County School District. The district has 12 schools for grades pre-kindergarten through high school. There are 9,179 students enrolled in the district. Schools in the district include Camden County High School; Camden Middle School; Crooked River Elementary School; David L Rainer Elementary School; Kingsland Elementary School; Mamie Lou Gross Elementary School; Mary Lee Clark Elementary School; Matilda Harris Elementary School; Saint Mary's Elementary School; Saint Mary's Middle School; Sugarmill Elementary; and Woodbine Elementary School.

Transportation

Major highways in the County of Camden include Interstate 95, U.S. Route 17, State Routes 25, 40, 110, 252, and 405. Jacksonville International Airport located in Jacksonville, Florida, is approximately 26 miles from Kingsland.

Health Services

Amelia Medical care is a health care facility located in Kingsland that serves the residents of the city and the surrounding area. Additional health care and medical facilities nearby include Southeast GA Health System Camden, approximately 10 miles from Kingsland, Charlton Memorial Hospital in Folkston, approximately 20 miles from the city, and Baptist Medical Center Nassau, approximately 26 miles away in Fernandina Beach, Florida.

Parks and Recreational Opportunities

Kingsland and Camden County offer several recreational opportunities, including Howard Peeples Park; Kingsland Lions Park; Camden County Recreation Center; Camden County Phase II Baseball Complex; Chris Gilman Football Stadium; Camden County PSA Track; Little Catfish Creek; Browntown Wilderness Park; Temple Landing Boat Ramp; Harriett's Bluff Boat Ramp; Harriett's Bluff Community Park; Mary B. Smart Park; Maple Ford Park; Spring Bluff Boat Ramp; Camden County Senior Center; and St. Mary's Pool.

Crime

According to **www.neighborhoodscout.com**, the crime index for the subject neighborhood is 32. There were 386 total crimes annually in the City of Kingsland, 28 of which are violent crimes and 358 of which are property crimes. The annual violent crime rate is 2.65 per 1,000 residents, while the property crime rate is 33.89 per 1,000 residents. The total annual crime rate is 36.54 per 1,000 residents. The chances of becoming a victim of a violent crime are 1 in 377 which is lower than the rate for the state which is 1 in 265. The chances of becoming a victim of a property crime are 1 in 30 which is the same as the rate for the state.

Visibility/Access

The subject property is located at 301 North Gross Road which connects to East Kings Avenue. East Kings Avenue then connects to Interstate 95. Due to the subject's location near a major thoroughfare, it is the opinion of the analyst that there is average visibility/access to the site.

Planned Road & Infrastructure Improvements

At the time of the physical inspection, there were no planned road or infrastructure improvements in the area surrounding the subject property.

Environmental

A copy of a Phase I Environmental Site Assessment was provided to the analyst with this assignment. According to the report completed on June 4, 2015 by LCS, Inc., the assessment has revealed no evidence of recognized environmental conditions or controlled recognized environmental conditions in connection with the subject property. No environmental hazards were observed on the site on the date of the inspection.

Community and Site Strengths and Weaknesses

Strengths – The site is located near a major thoroughfare which provides it with average visibility and access. The family development provides affordable housing to residents in the area. Crime rates are low within the subject's neighborhood. Additionally, the subject is located near all major services.

Weaknesses – The site has no apparent weaknesses.

PART IV:

MARKET AREA

MARKET AREA

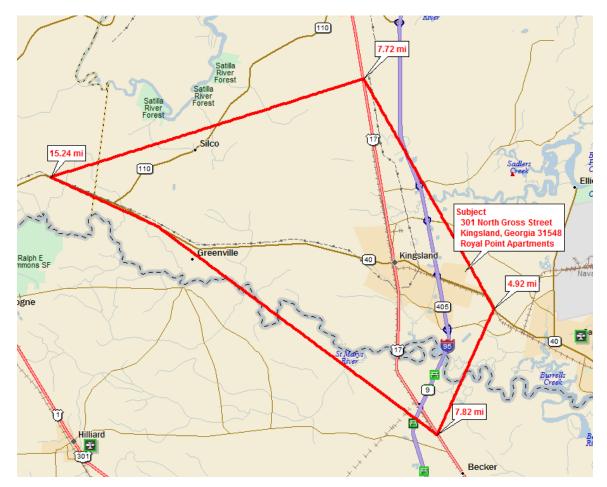

Following is a list of considerations used when determining the market area:

- Population and Households Counts: The number of households in a market area is directly proportionate to its geographic size within an individual market. Total householders residing in a market area can greatly influence demand calculations.
- General Demographics: The socio-economic composition of a market area including income, household size and tenure can be largely influenced by the erroneous inclusion or exclusions of non-comparable areas.
- Demand: Too large of a market may result in overstating demand for a proposed development. Conversely, too conservative of a market area may discount the demand for new product, especially if a lack of quality housing currently exists.
- Supply Analysis: While a larger market area generally includes higher household totals, it likewise may include a higher number of directly comparable units. If using demand methodologies that net out recently constructed and comparable rental units from the demand estimate, the increase in the number of comparable units can outweigh the increase in demand.
- Competitive Stock: The existing rental stock surveyed for a market study is dependent on the number of rental properties in a given market and therefore the boundaries of a primary market area. If existing developments are going to be used as "comparables", they should be located in the primary market area, if possible.
- Attainable Rents: If the market area includes non-comparable areas, the analysis may use comparables projects that suggest that a project can achieve rents that area significantly higher or lower than the rents its micro location will support.
- Location of Competitive Properties: A primary consideration in defining a market area is identifying those locations that offer alternative opportunities to a potential renter for a subject site. The managers of existing comparable properties near the site are excellent sources in determining those competitive locations.
- Accessibility: Available transportation linkages including both traffic arteries and mass transit options can influence the size of the market. Mass transit can have a significant impact on projects addressing very low income households for which transportation options may be limited.
- Natural Boundaries: Natural boundaries including rivers and mountains can restrict the mover-ship within a market due to a lack of accessibility.
- Housing Project Characteristics: The availability of a unique structure type such as a high rise may alter the typical draw of a potential project.
- Market Perceptions: Whether grounded in reality or not, market perceptions can be a significant determinant of market area boundaries. Social stigmas often exist within sub-

markets, with residents from one side of a submarket may not move to a close by neighborhood, regardless of housing opportunities. The construction of a new, attractive rental community may not necessarily relieve this perception.

- Commuting Patterns: The time spent commuting and employment destination could often reveal distinct patterns. High percentages of workers with long commutes or working in neighboring counties are often indicators of a lack of affordable housing options near employment centers.
- Target Market: Proposed developments targeting a special needs population such as seniors generally draw from a larger geographic region. Given the smaller pool of qualified householders, the location and quantity of comparable stock is of additional importance. An acceptable market area for a family oriented rental community will often be too conservative for a rental community targeting senior rental householders.
- Jurisdictional Boundaries: Differences in the quality and services provided by school districts, municipalities, or counties often influence consumer location choices.
- Local Agency Service Boundaries: The geographic areas covered by local agencies, such as housing authorities, senior citizen centers, community-based organizations, or churches can be a strong indicator of market area boundaries, especially when the project has a community-based sponsor or co-sponsor.
- Non-Geographic Factors: Employees who might be expected to reside in a development as a result of planned or existing job opportunities and special needs households who are served by a multi-jurisdictional agency that covers communities that are clearly distinct market areas.

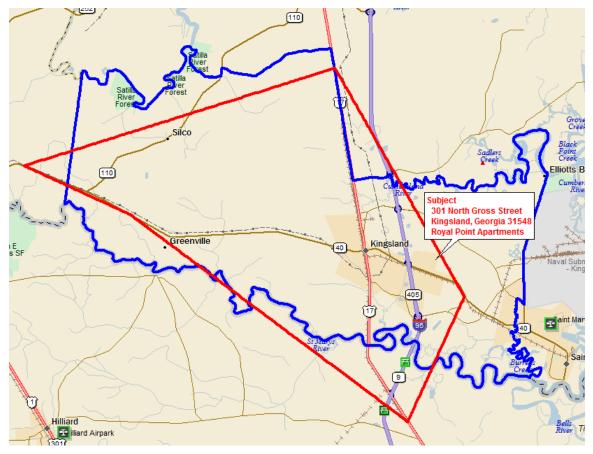

The National Council of Housing Market Analysts (NCHMA) Standards Committee also published a white paper called Best Practices for Rural Market Studies. In that paper, NCHMA discusses using the gravity model to determine market area boundaries in rural areas. The gravity model concept as it relates to housing market studies in rural areas is based on the concept that each town has some pull on the population in between the two towns. The pull is proportional to population and inversely proportional to distance. Market areas typically should not overlap for adjacent towns because the people who live between the two towns can only move to one town or the other. Overlapping market areas can result in overstated demand. Therefore, the gravity model allows for calculation of the population between the towns without overlapping the market areas. The subject's City of Kingsland is adjacent to Woodlawn to the north, St. Mary's to the East, Yulee, Florida, to the south, and Folkston to the west. Kingsland is located in the southern portion of the county; therefore, it was necessary to incorporate the gravity model to determine a market area. According to the gravity model, the population of each adjacent city or town should be added to Kingsland. Then the population of the subject city should be divided by the sum of the population of each city or town in order to determine the percentage of the distance to the adjacent city or town that the subject's city will pull population. For example, according to the U.S. Census Bureau, the subject's city had a 2014 population of 16,147. The population of St. Mary's is 17,555. These two populations are added together to reach a sum of 33,702. Next, Kingsland's population of 16,147 is divided by 33,702. The result is 47.9 percent ((16,147/(17,555 + 16,147)) = 47.9 percent)). St. Mary's is approximately 10 miles from Kingsland. This distance is multiplied by 47.9 percent. The result is 4.92 miles. Therefore, based on the gravity model, the pull for Kingsland is 4.92 miles beyond the city limits when heading northeast toward St. Mary's. The same calculations were then applied to the distance between Kingsland and Folkston; Kingsland and Woodbine; and Kingsland and Yulee. The population of Folkston is 5,233, and the city is approximately 20 miles from Kingsland. Therefore, the calculations for distance are as follows: $((16.147/(5.233+16.147) = 75.5\% \times 20.18 = 15.24 \text{ miles}))$. The population of Woodbine is 7.889. and the CCD is approximately 11 miles from Kingsland. Therefore, the calculations for distance are as follows: ((16,147/(7,889+16,147) = 67.2% x 11.49 = 7.72 miles)). The population of Yulee is 11,609, and the CDP is approximately 13 miles from Kingsland. Therefore, the calculations for distance are as follows: ((16,147/(11,609+16,147) = 58.2% x 13.44 = 7.82 miles)).

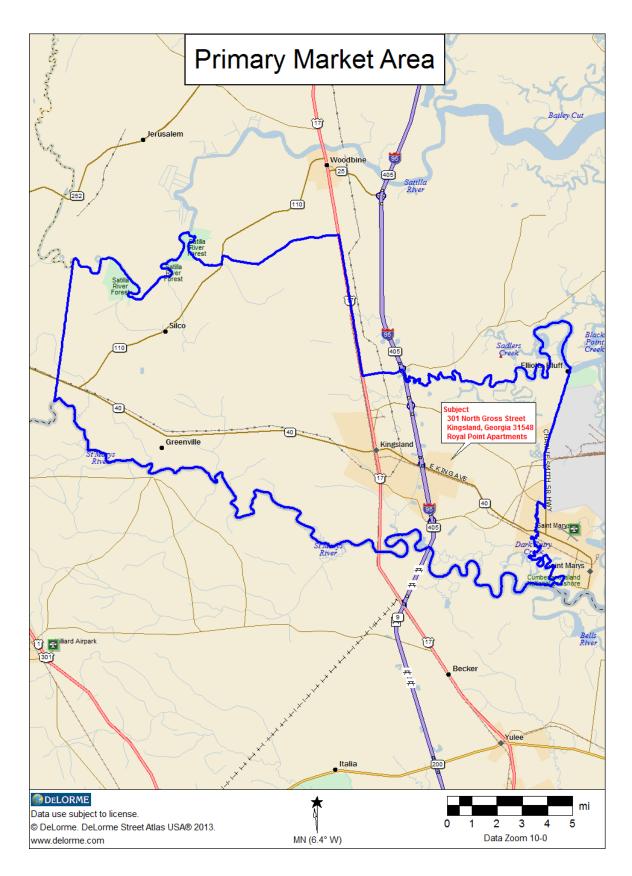

The following map shows what the market area would be if the gravity model based only on the data mentioned above:

The basic market area shown in the map must be modified slightly, however, because projected demographic data is available based on political boundaries and cannot be quantified based on the map shown above.

The gravity model map encompasses portions of five census tracts 0103.01, 0103.02, 0104.01, 0104.02 and 0104.03. The following map shows the census tract boundaries as well as the gravity model overlay.

Because demographic data is available for the census tracts, but is not available for the area defined solely through the gravity model, the primary market area was expanded to include these five census tracts. In addition, the census tracts help provide a more homogenous area from which the tenants may come. The primary market area has the following boundaries: North – Satilla River, State Highway 110 and Colesburg Tompkins Road; East – U.S. Highway 17, Harrietts Bluff Road, Interstate 95, Cumberland River, State Highway 40, Coalrain Road and Burrells Creek; South – St. Mary's River/State of Florida; and West – Charlton County. The northern boundary is approximately 7.7 to 16.8 miles from the subject, and the southern boundary is approximately 17.9 miles from the subject. The western boundary is approximately 17.9 miles from the subject, and the eastern boundary is approximately 4.9 miles from the subject.

PART V:

COMMUNITY DEMOGRAPHIC DATA

COMMUNITY DEMOGRAPHIC DATA

Population Trends

The subject is located in the City of Kingsland, Georgia. The primary market area consists of the following census tracts: #0103.01, 0103.02, 0104.01, 0104.02 and 0104.03. The primary market area has the following boundaries: North – Satilla River, State Highway 110 and Colesburg Tompkins Road; East – U.S. Highway 17, Harrietts Bluff Road, Interstate 95, Cumberland River, State Highway 40, Coalrain Road and Burrells Creek; South – St. Mary's River/State of Florida; and West – Charlton County. The northern boundary is approximately 7.7 to 16.8 miles from the subject, and the southern boundary is approximately 5.4 miles from the subject. The western boundary is approximately 4.9 miles from the subject.

In 2000, this geographic market area contained an estimated population of 24,721. By 2010, population in this market area had increased by 29.9 percent to 32,113. In 2016, the population in this market area had increased by 6.4 percent to 34,159. It is projected that between 2016 and 2018, population in the market area will increase 2.3 percent to 34,953 It is projected that between 2018 and 2021, population in the market area will increase 5.7 percent to 36,143.

Household Trends

The demand for additional housing in a market area is a function of population growth, household formations, and also a replacement of units lost through demolition and extreme obsolescence. In the case of housing for the elderly, the demand for rental housing is sometimes caused by the inability of the elderly to properly maintain their present ownership housing. Also, within the overall demand are segments of the market asking for more or less expense (related to income) and for ownership or rental.

Some of the demand has been, or will be, satisfied by units which have been built, or will be, by the time the project is renting. The difference between demand and supply, the residual, is the total market of which the project's market will be a share.

The "tenure" of existing housing will be examined first as a guide to the future proportion of ownership and rentals, and then characteristics of the housing stock will be noted.

The most important analysis is that of demand, supply and residual demand which follows. Its product is the number of rental units which will be demanded.

Tenure

The percentage of renters in Camden County in 2016 was 34.7 percent; the percentage for Kingsland was 35.4 percent; and the percentage for the market area was 34.3 percent. According to the U.S. Census Bureau, the national rental percentage is 35.6 percent. This percentage is utilized to segment the number of existing households in the demand section of this report.

Source: U.S. Census Bureau

The above chart shows the number of people employed in different sectors of the Camden County, Kingsland and market area economy in 2010. According to interviews conducted by the analyst, employers in the area indicate that the area economy should remain stable in the next two to five years.

There have not any business closures within the past two years in Kingsland and Camden County. Recently, Camden County commissioners agreed to put a purchase option on about 4,000 acres to develop a site where spacecraft would be tested and launched. The county is advancing on a plan to develop the first fully commercial spaceport on the East Coast, a project that could create more than 2,000 jobs and make Georgia a player in the \$300 billion space industry. Overall, it is believed that the economy of Kingsland will remain stable.

Wages

The average annual wage of Camden County employees was \$37,201 in 2014. Wages have been increasing 2.9 percent per year. Wages in agriculture, forestry, and fisheries; transportation and warehousing; retail trade; leisure and hospitality; education, and health services; financial activities; information; and public administration sectors are within the income limits of the rehabilitated development.

AVERAGE ANNUAL WAGE BY SECTOR

Employment Outside the County

For residents employed in the market area, the travel time to work from the site will be less than 19 minutes. For the majority of those employed in other parts of the county, the travel time would be within 35 minutes. According to the chart below, 56.1 percent in the market area have a travel time of less than 19 minutes; 24.3 percent have a travel time of 20 to 34 minutes; and 19.7 percent have a travel time of over 35 minutes. This relatively low travel time indicates that the subject site is in an area in close proximity to employment centers.

Household Income Trends and Analysis

Income is a key characteristic in analyzing housing markets. Renters within the target incomes from \$24,000 to \$28,000, or 2.9 percent, qualify for two-bedroom units at 50 percent of the area median income; renters with incomes from \$28,594 to \$33,600, or 4.7 percent, qualify for twobedroom units at 60 percent of the area median income; renters with incomes from \$27,634 to \$33,600, or 5.4 percent, qualify for the three-bedroom units at 50 percent of the area median income; and renters with incomes from \$31,063 to \$40,320, or 9.4 percent, qualify for the threebedroom units at 60 percent of the area median income. Target incomes for the different unit types are derived by the analyst. For the low end of the range, the lowest gross rent charged in an income limit (i.e. 60% AMI) for a unit is divided by 35 percent. The resulting number is then multiplied by 12 to derive an annual income ($$700 / 35\% = $2,000.00 \times 12 = $24,000$). This process is based on the premise that a tenant should not pay more than 35 percent of his annual income on rent. For the high end of the range, the analyst consults the income limits set by the state housing authority. For example, if the largest unit in an income limit (i.e. 60% AMI) is a twobedroom unit, the analyst multiplies this number by 1.5 (this is due to the Low Income Housing Tax Credit (LIHTC) program being based on the premise that 1.5 persons per bedroom will occupy rental units) to find how many people could reside in that unit. The analyst then consults the state income limits to set the high end of the range (2 bedroom x = 3 people/unit; therefore, the 60% 3-person maximum income would be used).

Sources of Demand

The potential tenants for the existing development include households who now live within the market area. It will appeal to potential tenants who have adequate incomes to pay the proposed rents and find the development more attractive in terms of price, unit features and project amenities than other available rental units. The market area is gaining approximately 138 households per year.

Required Unit Mix

The LIHTC program is based on the premise that 1.5 persons per bedroom will occupy rental units. We expect that 10 percent of one person households and 25 percent of two person households will occupy studio and one-bedroom units. We expect 90 percent of one person households, 75 percent of two person households and 20 percent of three person households will occupy two-bedroom units. We expect 20 percent of three person households, 100 percent of four person households and 90 percent of five person households will inhabit three-bedroom dwellings. We expect the remaining 10 percent of five person households and 100 percent of six and seven person households to occupy four-bedroom dwellings.

The following tables illustrate the ratio of units required by each household size. These occupancy patterns suggest that studios and one-bedroom units should account for 9.0 percent of the renter housing demand, two-bedroom units account for 52.3 percent, three-bedroom units should account for 33.8 percent of the renter housing demand and units with four or more bedrooms account for 4.9 percent of the renter housing demand in the primary market area.

Eligible Households

The following table uses a 35 percent lease rent-to-income to determine the minimum target income required for each unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists the number of households within the required target income for each unit type.

INCOME ELIGIBLE HOUSEHOLDS							
Unit Type	Gross Rent	Lower Range	Upper Range	Percent Renter	Renter Households		
2/2 (50%)	\$700	\$24,000	\$28,000	2.9%	122

	Total Units	\$24,000 to \$40,320	7	186	5	181	3.9%	2-3/Month	\$940-\$1,060	N/A	\$700-\$906

The subject is applying for tax credits at 50 and 60 percent of the area median income. There are no tax credit comparables located in the market area constructed within the past two years that compete with the subject. If the subject were vacant, it would need to capture 79.4 percent of the demand in the market area for units at 50 and 60 percent of the area median income. However, the subject is an existing property that is currently 95 percent occupied. Therefore, the capture rate considering only the vacant units is determined to be a more accurate indication of the capture rate for the subject. The subject contains no tenants who are considered rent burdened as determined under the LIHTC program. It is unlikely that the tenants could find comparable housing with rents low enough to meet the affordability requirements even if there were any tenants that were rent overburdened. Therefore, it is probable that these tenants would chose to remain at the subject. Furthermore, it is not likely that the tenants will be displaced because they meet the maximum allowable income requirements. The subject is currently 100 percent Low Income Housing Tax Credit. Consequently, it was considered appropriate to determine the capture rate estimates considering only the seven vacant units at the property. The capture rate

for the subject's two-bedroom units at 50 percent of the area median income is 2.7 percent; for the subject's two-bedroom units at 60 percent of the area median income is 4.3 percent; for the subject's three-bedroom units at 50 percent of the area median income is 5.6 percent; and for the subject's three-bedroom units at 60 percent of the area median income is 6.1 percent. The capture rate for all units at 50 percent of the area median income is 2.1 percent and the capture rate for all units at 60 percent of the area median income is 3.0 percent. The capture rate for all units is well below the 30 percent threshold requirements, and the capture rate for all vacant three-bedroom units is well below the 40 percent threshold requirement. The overall capture rate for all vacant tax credit units is 3.9 percent and does not exceed the 35 percent threshold requirement for rural areas. As a result, the analyst feels there is a need for affordable housing, and the subject will help fill the need by continuing to offer affordable units to the market area.

Evaluation of the Rehabilitated Development

Location

The subject is in a commercial and residential neighborhood. Its location provides it with average access and visibility. The properties surrounding the site are in average to good condition. The site's access to major arterials, medical facilities and grocery stores is comparable to that of its competitors. Its overall location is comparable to its competitors because the size of the town confers the same locational attributes to all projects.

Project Design

The subject is improved with nine two- and three-story walk-up buildings containing 144 Low Income Housing Tax Credit units designed for families.

Project Amenities

Project amenities include community room, meeting room, swimming pool, fitness center, picnic area, playground, tot lot, basketball court, business center, laundry facility, on-site management, on-site maintenance, perimeter fencing and open parking spaces.

Unit Amenities

Unit amenities include a refrigerator, range/oven, garbage disposal, dishwasher, washer/dryer hook-ups, carpet and tile floor coverings, blinds, ceiling fans, vaulted ceilings (in select units), walk-in closets and safety bars.

Tenant Services

The subject does not provide any additional services. All comparables will be similar to the subject in terms of tenant services.

Parking

The subject contains open parking areas with approximately 249 parking spaces. This arrangement is comparable to other developments in the market area.

Unit Mix

The subject's unit mix of two- and three-bedroom units is suitable in a market area.

Utilities

Heating and cooling are central electric. Cooking and hot water are also electric. The tenants pay electricity. Water, sewer and trash are provided by the landlord. This arrangement is similar to superior to most apartment units in the market area.

Unit Size

The average size of the units in the surveyed developments is 981 square feet for two-bedroom units and 1,165 square feet for three-bedroom units. The average unit size of the comparables is smaller than the subject's unit size. Therefore, the subject's unit sizes will be competitive to the comparables in the market area.

AVERAGE APARTMENT SIZE OF COMPARABLE APARTMENTS											
	COMPARABLES										
Unit Type	Minimum (SF)	Maximum (SF)	Average (SF)	Subject (SF)	Subject's Advantage						
2 BR	700	1,350	981	990	0.9%						
3 BR	900	1,570	1,165	1,189	2.1%						

Source: Gill Group Field Survey

Vacancy Rates/Rental Trends

The overall vacancy rate for the market area is 3.1 percent. Of the 1,307 market and rent restricted units surveyed, 41 units were vacant. The overall occupancy rate for the market area is 96.9 percent. The vacancy appears to be stable and typical for the market area.

According to property managers in the area, rental rates have remained stable within the past few years with only small rent increases each year.

The subject maintains a stabilized occupancy rate and will not displace tenants during the rehabilitation. Therefore, it will not negatively impact on the vacancy rate or rental rates in the market area. Based on the information verified and included within this analysis, it appears that the occupancy rate will remain stable and rental rates will increase slightly within the next two years.

Summary of Developments Strength and Weaknesses

Strengths – The development is located near a major thoroughfare which provides it with average visibility and access. In addition, the subject is an existing development with an established tenant base. The occupancy rate has historically remained above 95 percent. After rehabilitation, the property will be in good condition. The market area has a strong occupancy rate and there are several properties that have waiting list that the subject can draw tenants from. The population and households are growing in the market area, indicating a need for new housing.

Weaknesses – The development has no apparent weaknesses.

Explanation of Adjustments and Market Rent Conclusions – As Complete Royal Point Apartments Primary Unit Types – Two-Bedroom Units (990 SF) and Three-Bedroom Units (1,189 SF)

Please note: Minor adjustments in the \$5 to \$10 range are based on the appraiser's evaluation of the overall market as well as typical responses indicated by existing tenants. In addition, this is standard industry practice when there is insufficient market data present to support adjustments. It is also considered an acceptable practice by HUD as indicated in the Section 8 Renewal Guide Chapter 9-12 (B) (2b) which states: "For minor adjustments (generally in the \$5 to \$10 range), the appraiser may state his/her subjective evaluation of why the observed differences would affect rent."

Rent comparability grids were prepared for the primary unit types with 990 and 1,189 square feet. Comparable apartments used include the following: Park Place Apartments (Comparable 1), Camden Way Apartments (Comparable 2), Greenbriar Townhomes (Comparable 3), Brant Creek Apartments (Comparable 4) and Hammock Cove Apartments (Comparable 5).

Structure/Stories – The subject and Comparable 1 are located in two– and three-story walk-up buildings. Comparable 4 and 5 are located in three-story walk-up buildings. Comparable 2 is located in one-story garden-style buildings and Comparable 3 is located in two-story townhomes. No complex in the market area shows a rent difference based on this particular item. No adjustment was needed.

Project Occupancy – The subject is currently 95 percent occupied. The occupancy rates of the comparables range from 95 to 100 percent. No adjustment was needed.

Concessions – The subject is not currently offering concessions. None of the comparables are currently offering concessions. No adjustment was needed.

Year Built/Year Renovated – The subject was constructed in 2000 and will be rehabilitated. Comparable 1 was built in 1998 and Comparable 2 was built 1985. Comparable 3 was built in 1993 and Comparables 4 and 5 were built in 2009. All comparbles will be inferior when compared to the subject in various degrees. It is difficult to determine adjustment amounts for condition/street appeal as it is difficult to determine rent level fluctuations based on these items. Therefore, it was necessary to rely in large part on opinions of area apartment managers and tenants. In addition, adjusted rents of the comparables were considered as the difference in rents of the comparables after everything else is factored out is assumed to be attributable to condition/street appeal. After considering all factors, the comparables were adjusted upwards as follows: Comparable 1 - \$75; Comparable 2 - \$75; Comparable 3 -\$50; Comparable 4 - \$25; and Comparable 5 - \$25.

SF Area – For the purpose of this report, a range of comparable rents per square foot was derived. To determine this adjustment, each comparable's dollar per square foot rental rate was determined. This number was then multiplied by 25 percent for each comparable to derive an adjusted dollar per square foot rental rate. The median dollar per square foot rental rate is determined. Next, the difference in square footage between the subject and each comparable is determined. The difference is multiplied by the determined adjusted dollar per square foot rate to arrive at the adjustment for each comparable. The selected dollar per square foot for the two-bedroom comparison is \$0.20 and for the three-bedroom comparison is \$0.19. No adjustments were made to comparables within 25 square feet of the subject. The adjustments were rounded to the nearest \$5. These adjustments are reflected on the HUD-Forms 92273, which are attached.

of Bedrooms – The subject contains two- and three-bedroom units. All comparables have similar number of bedroom units. No adjustment was needed.

of Baths – The subject contains two bath in the units. All comparables are similar. No adjustments were needed.

Balcony/Patio – The subject and Comparable 3 do not contain either amenity. Comparables 1, 2, 4 and 5 contain balconies or patios were adjusted downward \$5 per month. Although the comparables do not indicate a rent differential for units with these features versus units without these features, the added amenity is an enhancement. Therefore, a nominal \$5 adjustment was selected for these features.

Parking – The subject and Comparables 1, 2, 3 and 5 contain open parking lots. Comparable 4 contains an open parking lot and garage park for an additional fee of \$85 per month. No adjustment is needed.

AC: Central/Wall – The subject contains central air conditioning as Comparables 1, 3, 4 and 5. No adjustments were needed. Comparable 2 contains through-the-wall air conditioning and was adjusted upwards \$10 per month.

Range/Refrigerator – The subject contains both features in all units. All comparables contain these features in the units. No adjustment was needed.

Garbage Disposal – The subject and Comparables 1, 2, 4 and 5 contain a garbage disposal in the units. Comparable 3 does not contain garbage disposals. Since there is no market data concerning units with this feature, no adjustment was given.

Microwave/Dishwasher – The subject and Comparable 1, 3 and 4 contain dishwashers in the units. Comparable 2 does not contain either feature. Comparable 5 contains microwaves and dishwashers. Although there is little market data available concerning units with these features versus those without these features, the added amenity is an enhancement to the unit. Therefore, Comparable 2 was adjusted upward \$10 per month, and Comparable 5 was adjusted downward \$5 per month.

Washer/Dryer – The subject and all comparables contain washers/dryer hook-ups in the units. No adjustment was needed.

Carpet – The subject and all comparables contain carpet floor coverings. No adjustment was needed.

Drapes - The subject and all comparables contain window coverings. No adjustment was needed.

Pool/Recreation Areas – The subject contains a swimming pool, fitness center, basketball court and playground. Comparable 1 contains a swimming pool, fitness center, picnic area, playground and volleyball court. Comparable 3 contains a swimming pool and playground. Comparables 4 contains a swimming pool, fitness center, picnic area and playground. Comparable 5 contains a swimming pool and picnic area. Comparable 2 does not contain either feature. No complex in the market area shows a rent differential based on this particular item; however, the added amenity is an enhancement. The comparable without either feature was adjusted upward \$20 per month.

Heat – The subject does not have this utility provided. None of the comparables have this utility provided. No adjustment was needed.

Cooling – The subject does not have this utility provided. None of the comparables have this utility provided. No adjustment was needed.

Cooking – The subject does not have this utility provided. None of the comparables have this utility provided. No adjustment was needed.

Electricity – The subject does not have this utility provided. None of the comparables have this utility provided. No adjustment was needed.

Hot Water – The subject does not have this utility provided. None of the comparables have this utility provided. No adjustment was needed.

Cold Water/Sewer – The subject and Comparable 2 have this utility provided. Comparables 1, 3, 4 and 5 do not have cold water or sewer provided and were each adjusted upward \$53 per month for the twobedroom units and \$64 per month for the three-bedroom units. The adjustment was determined using the Utility Allowances Chart provided by Georgia Department of Community Affairs for the Southern Region. **Trash** – The subject and Comparables 1, 2 and 3 have this utility provided. Comparables 4 and 5 do not have trash provided and were each adjusted upward \$15 per month. The adjustment was determined using the Utility Allowances Chart provided by Georgia Department of Community Affairs for the Southern Region.

Extra Storage – The subject does not contain this feature. All comparables are similar to the subject. No adjustment was needed.

Location – The subject's location is good. All comparables are located in similar areas as the subject. No adjustment was needed.

Security – The subject and Comparable 4 contain perimeter fencing. Comparable 1 and 5 contain a security patrol. Comparable 2 and 3 do not contain any form of security. No complex in the market area shows a rent differential based on this particular item; however, the added amenity is an enhancement, particularly security that limits access to the property. Therefore, Comparables 2 and 3 were adjusted upward \$10 per month.

Clubhouse/Meeting Room – The subject contains a meeting room and clubhouse. Comparables 2 and 4 contain a clubhouse. Comparable 1, 3 and 5 do not contain either feature. No complex in the market area shows a rent differential based on this particular item; however, the added amenity is an enhancement. Therefore, Comparable 2 and 4 were adjusted upward \$5 per month as it contains only one amenity. Comparables 1, 3 and 5 were adjusted upward \$10 per month as it does not contain either amenity.

Special Features – The subject and Comparable 1 contain vaulted ceilings. No complex in the market area shows a rent differential based on this particular item; however, the added amenity is an enhancement. The remaining comparables do not contain special features in the units and were adjusted upward \$5 per month.

Business Center/Neighborhood Network – The subject contains a business center. All comparables do not contain either feature. No complex in the market area shows a rent differential based on this particular item; however, the added amenity is an enhancement. Therefore, all comparables were adjusted upward \$5 per month.

Conclusion of Market Rents – As Complete

The adjusted rents range from \$783 to \$1,048 for the two-bedroom comparison and from \$834 to \$1,219 for the three-bedroom comparison. All comparables were given consideration. The appraiser concluded the market rent for the units at the subject as follows:

- 990 SF Two-Bedroom Units \$920
- 1,189 SF Three-Bedroom Units \$1,045

The developer is proposing the affordable rents as follows. These rents are below the achievable rents determined on the rent grids. Therefore, the subject's proposed rents were utilized in the restricted analysis.

- 990 SF Two-Bedroom Units \$646 and \$700
- 1,189 SF Three-Bedroom Units \$744 and \$800

HOUSING PROFILE

Market Area Overview

The rental housing stock in the market area is comprised of market-rate and restricted apartment complexes. The majority of the housing stock was built in the 1980s and 2000s. The market-rate complexes were built between 1985 and 2009. The restricted apartment complexes were built between 1980 and 2009. The market area's rental units have average occupancy rates.

Housing Inventory

Number of Units

A building permit survey was unavailable from the U.S. Census Bureau. According to Camden County there have been no multi-family building permits issued within the last five years.

Projects Under Construction

According to the City of Kingsland, there are currently no multifamily projects under construction in the market area that would directly compete with the subject.

Planned Projects

According to the City of Kingsland, there are currently no multifamily planned projects in the market area that would directly compete with the subject. According to the Georgia Department of Community Affairs, there have been no projects awarded tax credits in the market area within the past couple of years.

Age of Rental Units

Rental housing construction in the market area has decreased considerably since the 1990s.

	AGE OF RENTAL UNITS	
YEAR BUILT	NUMBER	PERCENT
2005 or later	281	8.1%
2000-2004	516	14.9%
1990-1999	1,149	33.1%
1980-1989	691	19.9%
1970-1979	607	17.5%
1960-1969	160	4.6%
1950-1959	50	1.4%
1940-1949	13	0.4%
1939 or earlier	0	0.0%
TOTAL	3,467	100.0%

Source: U.S. Census Bureau

Unit Condition

The market area's rental housing stock is in varying condition. Overall, the market-rate developments are of average age and are well maintained.

Bedroom Distribution

In 2010, 12.5 percent of the market area's rental units were efficiency or one-bedroom units, and 35.9 percent were two-bedroom units. Dwellings with three bedrooms accounted for 45.8 percent of the market area's rental housing and dwellings with four or more bedrooms accounted for 5.7 of the market area's rental housing.

BEDRO	BEDROOMS IN OCCUPIED RENTAL UNITS									
ТҮРЕ	NUMBER	PERCENT								
No Bedrooms	94	2.7%								
One-Bedrooms	341	9.8%								
Two-Bedrooms	1,245	35.9%								
Three-Bedrooms	1,588	45.8%								
Four-Bedrooms	156	4.5%								
Five or More Bedrooms	43	1.2%								
TOTAL	3,467	100.0%								

Source: U.S. Census Bureau

Rental Vacancy Rates

According to the U.S. Census Bureau, the national vacancy rate for the third quarter in 2015 was 7.0 percent in rental housing. The rental vacancy rate of 7.0 percent was virtually unchanged from the rate in the fourth quarter of 2014 and 0.3 percent lower than the rate last quarter.

For rental housing by area, the fourth quarter 2015 vacancy rates were highest outside Metropolitan Statistical Areas (MSAs) (9.0 percent). The rates inside principal cities and the suburbs were 6.7 percent each. The rental vacancy rates inside principal cities, in the suburbs and outside MSAs were not statistically different from the fourth quarter 2014 rates.

For the fourth quarter 2015, the rental vacancy rates were highest in the South (9.2 percent), followed by the Midwest (7.0 percent). The rates were lowest in the Northeast (5.5 percent) and West (4.9 percent), though these rates were not statistically different from each other. The rental vacancy rates in all four regions were not statistically different from the corresponding fourth quarter 2014 rates.

RESIDENTIAL VACANCY RATES							
QUARTER	4th Quarter 2015	4th Quarter 2014	% of 2015 Rate	% of Difference			
United States	7.0%	7.0%	0.1%	0.1%			
Inside MSAs	6.7%	6.8%	0.1%	0.2%			
Outside MSAs	9.0%	8.3%	0.3%	0.4%			
In Principal Cities	6.7%	6.9%	0.3%	0.3%			
Not In Principal Cities	6.7%	6.8%	0.1%	0.2%			
4th QUARTER 2015 VACANCY RATES BY REGION							
NORTHEAST	MIDWEST	SOUTH	WEST				
5.5%	7.0%	9.2%	4.8%				

Source: U.S. Census Bureau

Lease Terms and Concessions

The typical lease term is 12 months. At the time of the writing of this report, none of the surveyed comparables were offering concessions.

Turnover Rates

An estimated turnover rate of 20 percent was deemed reasonable for the market area. This was based on the Institute of Real Estate Management (IREM) and comparables in the market area. The table below shows the turnover rates of the comparables verified:

TURNOVER RATES				
Property Name	Avg. Annual			
Park Place Apartments	16.0%			
Hammock Cove Apartments	20.0%			
Willow Way Apartments	25.0%			
Pelican Point Apartments	27.0%			
King Grant Apartments	25.0%			
Hilltop Terrace Phase II	15.0%			
Reservce at Sugar Mill Apartments	18.0%			
Average Annual Turnover	20.9%			

Likely Impact of Rehabilitated Development on Rental Occupancy Rates

The rehabilitated development will not have an adverse impact on the market area. The subject is an existing development with a stabilized occupancy rate. All of the restricted properties in the market area maintain stabilized occupancy rates and have waiting lists. The subject's two- and three-bedroom units are suitable in the market area.

Foreclosure/Abandoned/Vacant Housing

According to **www.realtytrac.com**, there are currently 65 properties for sale that are foreclosures within the subject's zip code. This ratio is in the mid-range for the City of Kingsland. In March, the number of properties that received a foreclosure filing in 31548 was 30 percent higher than the previous month and 160 percent higher than the prior year. The City of Kingsland foreclosure rate is 1 in every 637 housing units. Camden County foreclosure rate is 1 in 778. Therefore, it appears that the foreclosure rate in the city has been increasing. There are no known properties within the vicinity of the property that have been foreclosed upon. In addition, there are no known negative factors impacting the occupancy of the subject within the market area.

Primary Housing Voids

There are no significant housing voids in the market area. There is a demand for housing in the market area as can be seen in the demand portion of this report.

PART IX:

ABSORPTION & STABILIZATION RATES

Absorption Rates

The subject is an existing multifamily development that contains 144 two- and three-bedroom units with seven vacant units. After researching the vacancy rates of the existing units in the area, it is firmly believed that the rehabilitated development will satisfy a portion of the continued demand for the units within the market. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units. The rehabilitation will not displace any tenants, and the existing tenants are expected to remain income-qualified.

PART X:

INTERVIEWS

INTERVIEWS

Housing Interview

The analyst attempted several times to contact the Southeast Georgia Consolidated Housing Authority, however none were successful. The phone number for the Southeast Georgia Housing is (912) 729-5452.

PART XI:

RECOMMENDATIONS AND CONCLUSIONS

RECOMMENDATIONS AND CONCLUSIONS

Project Evaluation

It is the opinion of the analyst that the improvements, the unit mix of two- and three-bedroom units, unit size, unit/project amenities and services are well suited for the primary market area.

Site Evaluation

The site's location is considered average. It is located near a major thoroughfare to the city which provides the site with average visibility and access. It is located in relatively close proximity to medical facilities, schools, shopping, employment, local government facilities and recreational facilities. The site and it improvements are similar to those in the area.

Economic and Demographic Profile

The following describes the demographic and economic profile of the primary market area and the surrounding area:

In 2000, this geographic market area contained an estimated population of 24,721. By 2010, population in this market area had increased by 29.9 percent to 32,113. In 2016, the population in this market area had increased by 6.4 percent to 34,159. It is projected that between 2016 and 2018, population in the market area will increase 2.3 percent to 34,953. It is projected that between 2018 and 2021, population in the market area will increase 5.7 percent to 36,143.

Between 2000 and 2010, the market area gained approximately 136 households per year. The market area is projected to gain 276 households between 2016 and 2018. The market area is projected to continue to gain households through 2021. The households in the market area are predominantly owner-occupied. The percentage of owner-occupied is projected to remain stable through 2021.

Employment in Camden County has been increasing an average of 1.5 percent per year since 2000. Employment in the State of Georgia has been increasing an average of 0.6 percent per year since 2000.

Existing Housing

There were a total of 12 confirmed apartment complexes in and surrounding the market area. There were 41 vacant units at the time of the survey out of 1,307 surveyed, for an overall vacancy rate of 3.1 percent. The amenities of these comparables are relatively similar to inferior to the subject's proposed amenities. Therefore, it is believed the subject will be competitive within the market area.

Adjusted Market Rental Rates

Market rental rate grids were completed for the subject. The subject property's proposed net rents are lower than the market rents of \$920 for the two-bedroom units and \$1,045 for the threebedroom units. The analyst was able to locate any market-rate complexes within the subject's market area. It is believed that the comparables used in the rent grid analysis were the best available. The proposed tax credit rents are lower than the adjusted market rental rates. Therefore, it is believed that the proposed tax credit rents will be competitive with existing properties.

Demand & Capture Rates

AMI	Unit Size	Income Limits	Units Vacant	Total Demand	Supply	Net Demand	NetCapture Rate	Absorption	Average Market Rent	Market Rents Band	Proposed Rents
										Min - Max	
50% AMI	2 BR/ 2 BA	\$24,000 to \$28,000	1	38	1	37	2.7%	2-3/Month	\$940	N/A	\$700
	3 BR/ 2 BA	\$28,594 to \$33,600	2	38	2	36	5.6%	2-3/Month	\$1,060	N/A	\$806
	All Units @ 50%	\$24,000 to \$33,600	3	147	3	144	2.1%	2-3/Month	\$940-\$1,060	N/A	\$700-\$806
60% AMI	2 BR/ 2 BA	\$27,634 to \$33,600	2	48	1	47	4.3%	2-3/Month	\$940	N/A	\$834
	3 BR/ 2 BA	\$31,063 to \$40,320	2	34	1	31	6.1%	2-3/Month	\$1,060	N/A	\$906
	All Units @ 60%	\$27,634 to \$40,320	4	135	2	133	3.0%	2-3/Month	\$940-\$1,060	N/A	\$834-\$906
	Total Units	\$24,000 to \$40,320	7	186	5	181	3.9%	2-3/Month	\$940-\$1,060	N/A	\$700-\$906

The following chart indicates the net demand and the capture rates:

The subject is applying for tax credits at 50 and 60 percent of the area median income. There are no tax credit comparables located in the market area constructed within the past two years that compete with the subject. If the subject were vacant, it would need to capture 79.4 percent of the demand in the market area for units at 50 and 60 percent of the area median income. However, the subject is an existing property that is currently 95 percent occupied. Therefore, the capture rate considering only the vacant units is determined to be a more accurate indication of the capture rate for the subject. The subject contains no tenants who are considered rent burdened as determined under the LIHTC program. It is unlikely that the tenants could find comparable housing with rents low enough to meet the affordability requirements even if there were any tenants that were rent overburdened. Therefore, it is probable that these tenants would chose to remain at the subject. Furthermore, it is not likely that the tenants will be displaced because they meet the maximum allowable income requirements. The subject is currently 100 percent Low Income Housing Tax Credit. Consequently, it was considered appropriate to determine the capture rate estimates considering only the seven vacant units at the property. The capture rate for the subject's two-bedroom units at 50 percent of the area median income is 2.7 percent; for the subject's two-bedroom units at 60 percent of the area median income is 4.3 percent; for the subject's three-bedroom units at 50 percent of the area median income is 5.6 percent; and for the subject's three-bedroom units at 60 percent of the area median income is 6.1 percent. The capture rate for all units at 50 percent of the area median income is 2.1 percent and the capture rate for all units at 60 percent of the area median income is 3.0 percent. The capture rate for all

vacant two-bedroom units is well below the 30 percent threshold requirements, and the capture rate for all vacant three-bedroom units is well below the 40 percent threshold requirement. The overall capture rate for all vacant tax credit units is 3.9 percent and does not exceed the 35 percent threshold requirement for rural areas. As a result, the analyst feels there is a need for affordable housing, and the subject will help fill the need by continuing to offer affordable units to the market area.

Absorption Rates

The subject is an existing multifamily development that contains 60 two-bedroom units and 84 three-bedroom units. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units. The rehabilitation will not displace any tenants, and the existing tenants are expected to remain income-qualified. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units.

Conclusion

The overall capture rate for the proposed development is high. The subject would need to capture 79.4 percent of the total units in the market area if the units were vacant. However, the subject is currently 95 percent occupied. It is believed that the net capture rate considering only vacant units is a more accurate reflection of the subject property. The property is currently applying for Low Income Housing Tax Credits. The capture rate was figured by bedroom type and percent of area median income. The capture rates for the units are within the acceptable range considering only the vacant units. It is believed that the subject is a viable development.

Data Sources

Information used in the market study was obtained from various sources including; the U.S. Census Bureau, Nielsen Claritas; Ribbon Demographics, U.S. Bureau of Labor Statistics, interviews with local town and government officials and interview with local property owners or managers.

I affirm that I have made a physical inspection of the market area and the subject property and that information has been used in the full study of the need and demand for the proposed units. The report was written according to DCA's market study requirements, the information included is accurate and the report can be relied up by DCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

ADDENDUM B

MARKET STUDY TERMINOLOGY

Absorption Period

The period of time necessary for a newly constructed or renovated property to achieve the Stabilized Level of Occupancy. The Absorption Period begins when the first certificate of occupancy is issued and ends when the last unit to reach the Stabilized Level of Occupancy has a signed lease. Assumes a typical pre-marketing period, prior to the issuance of the certificate of occupancy, of about three to six months. The month that leasing is assumed to begin should accompany all absorption estimates.

Absorption Rate

The average number of units rented each month during the Absorption Period.

Acceptable Rent Burden

The rent-to-income ratio used to qualify tenants for both income restricted and non-income restricted units. The Acceptable Rent Burden varies depending on the requirements of funding sources, government funding sources, target markets, and local conditions.

Affordable Housing

Housing where the tenant household pays no more than 30 percent of its annual income on Gross Rent.

Amenity

Tangible or intangible benefits offered to a tenant at no fee, typically on-site recreational facilities or planned programs, services and activities.

Annual Demand

The total estimated demand present in the market in any one year for the type of units proposed.

Area Median Income (AMI)

One-hundred percent of the gross median household income for a specific metropolitan statistical area, county or non-metropolitan area established annually by HUD.

Assisted Housing

Housing where the monthly costs to the tenants are subsidized by federal, state or other programs.

Attached Housing

Two or more dwelling units connected with party walls (e.g. townhouses or flats).

Basic Rent

The minimum monthly rent that tenants who do not have rental assistance pay to lease units developed through the USDA-RD Section 515 Program, the HUD Section 236 Program and HUD Section 223 (d)(3) Below Market Interest Rate Program. The Basic Rent is calculated on the rent as the amount of rent required to operate the property, maintain debt service on a subsidized mortgage with a below-market interest rate, and provide a return on equity to the developer in accordance with the regulatory documents governing the property.

Below Market Interest Rate Program (BMIR)

Program targeted to renters with income not exceeding 80 percent of area median income by limiting rents based on HUD's BMIR Program requirements and through the provision of an interest reduction contract to subsidize the market interest rate to a below-market rate. Interest rates are typically subsidized to effective rates of one percent or three percent.

Capture Rate

The percentage of age, size, and income qualified renter households in the Primary Market Area that the property must capture to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. The Capture Rate is calculated by dividing the total number of units at the property by the total number of age, size and income qualified renter households in the Primary Market Area. See Penetration Rate for rate for entire market area.

Census Tract

A small, relatively permanent statistical subdivision delineated by a local committee of census data users for the purpose of presenting data. Census tract boundaries normally follow visible features, but may follow governmental unit boundaries and other non-visible features; they always nest within counties. They are designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions at the time of establishment. Census tracts average about 4,000 inhabitants.

Central Business District (CBD)

The center of commercial activity within a town or city; usually the largest and oldest concentration of such activity.

Community Development Corporation (CDC)

Entrepreneurial institution combining public and private resources to aid in the development of socio-economically disadvantaged areas.

Comparable Property

A property that is representative of the rental housing choices of the subject's Primary Market Area and that is similar in construction, size, amenities, or age. These Comparables and Competitives are generally used to derive market rent.

Competitive Property

A property that is comparable to the subject and that competes at nearly the same rent levels and tenant profile, such as age, family or income.

Concession

Discount given to a prospective tenant to induce the tenant to sign a lease. Concessions typically are in the form of reduced rent or free rent for a specified lease term or for free amenities which are normally charged separately (i.e. washer/dryer, parking).

Condominium

A form of joint ownership and control of property in which specified volumes of space (for example, apartments) are owned individually while the common elements of the property (for example, outside walls) are owned jointly.

Contract Rent

- 1. The actual monthly rent payable by the tenant, including any rent subsidy paid on behalf of the tenants, to the owner, inclusive of all terms of the lease (HUD & RD).
- 2. The monthly rent agreed to between a tenant and a landlord (Census).

Demand

The total number of households in a defined market area that would potentially move into proposed new or renovated housing units. These households must be of the appropriate age, income, tenure and size for a specific proposed development. Components of demand vary and can include household growth; turnover, those living in substandard conditions, rent overburdened households, and demolished housing units. Demand is project specific.

Difficult Development Area (DDA)

An area designated by HUD as an area that has high construction, land, and utility costs relative to the Area Median Gross Income. A project located in a DDA and utilizing the Low Income Housing Tax Credit may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Detached Housing

A freestanding dwelling unit, typically single-family, situated on its own lot.

Effective Rents

Contract Rent less concessions.

Elderly or Senior Housing

Housing where (1) all the units in the property are restricted for occupancy by persons 62 years of age or older or (2) at least 80 percent of the units in each building are restricted for occupancy by households where at least one household member is 55 years of age or older and the housing is designed with amenities and facilities designed to meet the needs of senior citizens.

Extremely Low Income

Person or household with income below 30 percent of Area Median Income adjusted for household size.

Fair Market Rent (FMR)

The estimates established by HUD of the Gross Rents (Contract Rent plus Tenant Paid Utilities) needed to obtain modest rental units in acceptable condition in a specific county or metropolitan statistical area. HUD generally sets FMR so that 40 percent of the rental units have rents below the FMR. In rental markets with a shortage of lower priced rental units HUD may approve the use of Fair Market Rents that are as high as the 50th percentile of rents.

Garden Apartments

Apartments in low-rise buildings (typically two to four stories) that feature low density, ample open-space around the buildings, and on-site parking.

Gross Rent

The monthly housing cost to a tenant which equals the Contract Rent provided for in the lease plus the estimated cost of all Tenant Paid Utilities.

High-rise

A residential building having more than ten stories.

Household

One or more people who occupy a housing unit as their usual place of residence.

Household Trends

Changes in the number of households for a particular area over a specific period of time, which is a function of new household formations (e.g. at marriage or separation) and in average household size.

Housing Unit

House, apartment, mobile home, or group of rooms used as a separate living quarters by a single household.

Housing Choice Voucher (Section 8 Program)

Federal rent subsidy program under Section 8 of the U.S. Housing Act which issues rent vouchers to eligible households to use in the housing of their choice. The voucher payment subsidizes the difference between the Gross Rent and the tenant's contribution of 30 percent of adjusted income (or 10 percent of gross income, whichever is greater). In cases where 30 percent of the tenants' income is less than the utility allowance, the tenant will receive an assistance payment. In other cases, the tenant is responsible for paying his share of the rent each month.

Housing Finance Agency (HFA)

State or local agencies responsible for financing housing and administering Assisted Housing programs.

HUD Section 8 Program

Federal program that provides project based rental assistance. Under the program HUD contracts directly with the owner for the payment of the difference between the Contract Rent and a specified percentage of tenants adjusted income.

HUD Section 202 Program

Federal program, which provides direct capital assistance (i.e. grant) and operating or rental assistance to finance housing designed for occupancy by elderly households who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization. Units receive HUD project based rental assistance that enables tenants to occupy units at rents based on 30 percent of tenant income.

HUD Section 811 Program

Federal program, which provides direct capital assistance and operating or rental assistance to finance housing designed for occupancy by persons with disabilities who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization.

HUD Section 236 Program

Federal program which provides interest reduction payments for loans which finance housing targeted to households with income not exceeding 80 percent of area median income who pay rent equal to the greater of Basic Rent of 30 percent of their adjusted income. All rents are capped at a HUD approved market rent.

Income Band

The range of incomes of households that can pay a specific rent but do not have more income than is allowed by the Income Limits of a particular housing program. The minimum household income typically is based on a defined Acceptable Rent Burden percentage and the maximum typically is pre-defined by specific programmatic requirements or by general market parameters.

Income Limits

Maximum household income by county or Metropolitan Statistical Area, adjusted for household size and expressed as a percentage of the Area Median Income for the purpose of establishing an upper limit for eligibility for a specific housing program. Income Limits for federal, state and local rental housing programs typically are established at 30, 50, 60 or 80 percent of AMI. HUD publishes Income Limits each year for 30 percent median, Very Low Income (50%), and Low-Income (80%), for households with 1 through 8 people.

Infrastructure

Services and facilities including roads, highways, water, sewerage, emergency services, parks and recreation, etc. Infrastructure includes both public and private facilities.

Low Income

Person or household with gross household income below 80 percent of Area Median Income adjusted for household size.

Low Income Housing Tax Credit

A program to generate equity for investment in affordable rental housing authorized pursuant to Section 42 of the Internal Revenue Code, as amended. The program requires that a certain percentage of units built by restricted for occupancy to households earning 60 percent of less of Area Median Income, and that the rents on these units be restricted accordingly.

Low Rise Building

A building with one to three stories.

Market Advantage

The difference, expressed as a percentage, between the estimated market rent for an apartment property without income restrictions and the lesser of (a) the owner's proposed rents or (b) the maximum rents permitted by the financing program for the same apartment property.

Market Analysis

A study of real estate market conditions for a specific type of property.

Market Area or Primary Market Area

A geographic area from which a property is expected to draw the majority of its residents.

Market Demand

The total number of households in a defined market area that would potentially move into new or renovated housing units. Market demand is not project specific and refers to the universe of tenure appropriate households, independent of income. The components of market demand are similar to those used in determining demand.

Market Rent

The rent that an apartment, without rent or income restrictions or rent subsidies, would command in the open market considering its location, features, amenities. Market rent should be adjusted for concessions and owner paid utilities included in the rent.

Market Study

A comprehensive review of the housing market in a defined market area. A market study can be used to determine the demand for specific proposed development or to examine the overall condition of an area's housing market. Project specific market studies are often used by developers, syndicators, and government entities to determine the appropriateness of a proposed development, whereas market specific market studies are used to determine what housing needs, if any, exist within a specific geography. At a minimum, market studies include a review of location, economic conditions, demographics, and existing and proposed housing stock.

Marketability

The manner in which the subject fits into the market; the relative desirability of a property (for sale or lease) in comparison with similar or competing properties in the area.

Market Vacancy Rate – Physical

Average number of apartment units in any market which are unoccupied divided by the total number of apartment units in the same Market Area, excluding units in properties which are in the lease-up stage.

Market Vacancy Rate – Economic

Percentage of rent loss due to concessions and vacancies.

Metropolitan Statistical Area (MSA)

A geographic entity defined by the federal Office of Management and Budget, for use by federal statistical agencies, based on the concept of a core area with a large population nucleus, plus adjacent communities having a high degree of economic and social integration with that core. Qualification of an MSA requires the presence of a city with 50,000 or more inhabitants, or the presence of an Urbanized Area (UA) and a total population of at least 100,000 (75,000 in New England). The county or counties containing the largest city and surrounding densely settled territory are central counties of the MSA. Additional outlying counties qualify to be included in the MSA by meeting certain other criteria of metropolitan character, such as a specified minimum population density or percentage of the population that is urban.

Mid-rise

A building with four to ten stories.

Mixed Income Property

An apartment property containing (1) both income restricted and unrestricted units or (2) units restricted at two or more Income Limits (i.e. Low Income Tax Credit property with income limits of 30, 50 and 60 percent).

Mobility

The ease with which people move from one location to another.

Moderate Income

Person or household with gross household income between 80 and 120 percent of Area Median Income adjusted for household size.

Move-up Demand

An estimate of how many consumers are able and willing to relocate to more expensive or desirable units, such as tenants who move up from Class C properties to Class B; and Class B tenants that move up to Class A properties; and tenants that move from Class C and B properties to a new superior Low Income Tax Credit property.

Multi-family

Structures that contain more than two or more housing units.

Neighborhood

An area of a city or town with common demographic and economic features that distinguish it from adjoining areas.

Net Rent (also referred to as Contract or Lease Rent)

Gross Rent less Tenant Paid Utilities.

Penetration Rate

The percentage of age and income qualified renter households in the Primary Market Area that live in all existing and proposed properties, to be completed within six months of the subject, and which are competitively priced to the subject that must be captured to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. See Capture Rate for property specific rate.

Pent-up Demand

A market in which there is a scarcity of supply and vacancy rates are very low.

Population Trends

Changes in population levels for a particular area over a specific period of time – which is a function of the levels of births, deaths, and net migration.

Primary Market Area

See Market Area

Programmatic Rents

The proposed rents for a Tax Credit or other income restricted property relative to comparable market rate properties and rents being achieved at another Low Income Housing Tax Credit or other income restricted properties in the market. Can be no greater than maximum rents permitted by the Low Income Housing Tax Credit or other program regulations.

Project Based Rent Assistance

Rental assistance from a federal, state or local program that is allocated to the property or a specific number of units in the property and is available to each income eligible tenant of the property or an assisted unit.

Public Housing or Low Income Conventional Public Housing

HUD program administered by local (or regional) Housing Authorities which serves Low- and Very-Low Income Households with rent based on the same formula used for HUD Section 8 assistance.

Qualified Census Tract (QCT)

Any census tract (or equivalent geographic area defined by the Bureau of the Census) in which at least 50 percent of households have an income less than 60 percent of Area Median Income or where the poverty rate is at least 25 percent. A project located in a QCT and receiving Low Income Housing Tax Credits may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Rural Development (RD) Market Rent

A monthly rent that can be charged for an apartment under a specific USDA-RD housing program, that reflects the agency's estimate of the rent required to operate the property, maintain debt service on a un-subsidized mortgage and provide an adequate return to the property owner. This rent is the maximum rent that a tenant can pay at an RD property.

Rural Development (RD) Program

Federal program which provides low interest loans to finance housing which serves low- and moderate-income persons in rural areas who pay 30 percent of their adjusted income on rent or the basic rent, whichever is the higher (but not exceeding the market rent). The Program may include property based rental assistance and interest reduction contracts to write down the interest on the loan to as low as one percent.

Redevelopment

The redesign or rehabilitation of existing properties.

Rent Burden

Gross rent divided by gross monthly household income.

Rent Burdened Households

Households with Rent Burden above the level determined by the lender, investor, or public program to be an acceptable rent-to-income ratio.

Restricted Rent

The rent charged under the restrictions of a specific housing program or subsidy.

Saturation

The point at which there is no longer demand to support additional units.

Secondary Market Area

The portion of a market area that supplies additional support to an apartment property beyond that provided by the Primary Market Area.

Single-Family Housing

A dwelling unit, either attached or detached, designed for use by one household and with direct access to a street. It does not share heating facilities or other essential building facilities with any other dwelling.

Special Needs Population

Specific market niche that is typically not catered to in a conventional apartment property. This population should exhibit certain criteria, which can be well defined, in order, for example, to assess the need and demand from this source. Examples of special needs populations include: substance abusers, visually impaired person or persons with mobility limitations.

Stabilized Level of Occupancy

The underwritten or actual number of occupied units that a property is expected to maintain after the initial rent-up period, expressed as a percentage of the total units.

State Date Center (SDC)

A state agency or university facility identified by the governor of each state to participate in the Census Bureau's cooperative network for the dissemination of the census data.

Subsidy

Monthly income received by a tenant or by an owner on behalf of a tenant to pay the difference between the apartment's Contract Rent and the amount paid by the tenant toward rent.

Substandard Conditions

Housing conditions that are conventionally considered unacceptable which may be defined in terms of lacking plumbing facilities, one or more major systems not functioning properly, or overcrowded conditions.

Target Income Band

The Income Band from which the subject property will draw tenants.

Target Population

Market niche a development will appeal or cater to. State agencies often use Target Population to refer to various income set asides, elderly v. family, etc.

Tenant

One who rents real property from another.

Tenant Paid Utilities

The cost of utilities necessary for the habitation of a dwelling unit, which are paid by the tenant. Tenant Paid Utilities do not include costs for telephone or cable service.

Tenure

The distinction between owner-occupied and renter-occupied housing units.

Townhouse (or Row House)

Single-family attached residence separated from another by party walls, usually on a narrow lot offering small front and back-yards; also called a row house.

Turnover

- An estimate of the number of housing units in a Market Area as a percentage of total housing units in the Market Area that will likely change occupants in any one year. See Vacancy Period.
- Turnover Period The percent of occupants in a given apartment complex that move in one year.

Unmet Housing Need

New units required in the Market Area to accommodate household growth, homeless households, and housing in substandard conditions.

Unrestricted Rents

The recommended rents for the market rate units at a Mixed-Income Property.

Vacancy Period

The amount of time that an apartment remains vacant and available for rent.

Vacancy Rate – Economic

Maximum potential revenue less actual rent revenue divided by maximum potential rent revenue.

Vacancy Rate – Physical

The number of total habitable units that are vacant divided by the total number of units in the property.

Very Low Income

Person or household whose gross household income does not exceed 50 percent of Area Median Income adjusted for household size.

Zoning

Classification and regulation of land by local governments according to use categories (zones); often also includes density designations.

Office of Housing Finance

Nathan Deal Governor

Camila Knowles Commissioner

October 15, 2015

Via Facsimile: or E-MAIL: dcooley@picernefl.com Debra Cooley Compliance Director Picerne Management Corp. Royal Point Apartments 301 N. Gross Road Kingsland, GA 31548

RE: Royal Point 98-022

Dear Ms. Cooley:

We have completed our review of your request for approval use of an alternative utility allowance for the above referenced project.

The request has been approved as submitted unless otherwise noted in accordance to Section 1.42-10(b) (4) and to the Utility Allowance Announcement for Georgia HOME and Tax Credit projects dated July 29, 2008. The allowance should apply to all eligible residents. This request has been approved with the implementation date of 1/1/16.

Important notice, new properties must maintain 90 percent occupancy for a period of 90 consecutive days or by the end of the first year of the credit period, whichever is earlier. For existing properties, changes of methods cannot be instituted until approved by DCA. The Notification process begins "upon written notification of intent to change methodology to tenants and a request to the state agency. The IRS takes this 90-day notification period very seriously.

In future requests for continuing the above method, the notification process may begin a 12-month period ending no earlier than 60 days prior to the date the utility allowance will change. Actual utility allowances must be based on an average of actual costs incurred for at least 50% of each bedroom type unit of the project or portfolio over a period of 12 consecutive months. Projects that have not obtained at least 50% occupancy in each of the bedroom types for a period of 12 consecutive months, must continue to use the PHA or RHS utility allowances.

You may reach me at 404-679-0601 with any questions.

Sincerely,

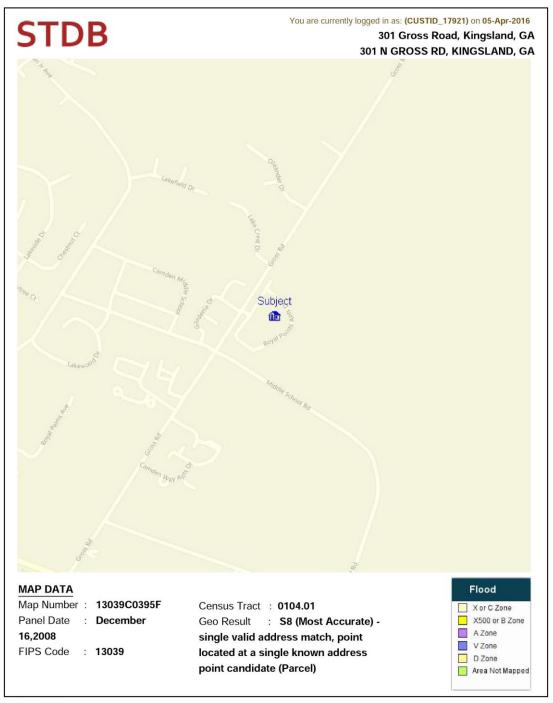

Thophering Duris Thaphony Dumas Compliance Officer
