Ms. Willa Turner
Office of Affordable Housing
Georgia Department of Community Affairs
60 Executive Park South Northeast, 2nd Floor
Atlanta, Georgia 30329

Dear Ms. Turner:

Following is a market study which was completed for Richmond Villas according to the guidelines set forth by the Georgia Department of Community Affairs as authorized by The MACO Companies. The subject is located at 3551 Windsor Spring Road, Hephzibah, Georgia. The site is improved with five two-story walk-up buildings containing 96 Section 8 units designed for families and an accessory building. The subject also contains asphalt parking. The total site size is approximately 9.80 acres, or 426,888 square feet.

The purpose of the following market study is to determine if the community has a need for the subject units. To do so, the analyst utilized data from the U.S. Census Bureau, Nielsen Claritas; Ribbon Demographics, and various other demographic resources. Community information and opinion was also utilized. This information was collected during a field survey conducted by David Warren while visiting the site. The site was inspected on October 27, 2016, by David Warren. An attempt was made to survey 100 percent of all housing in the area. The intended users of the report are Georgia Department of Community Affairs, the Hallmark Companies, Inc., and its affiliates or assigns.

I certify that there is not now, nor will there, be an identity of interest between or among the applicant, contractor, architect, engineer, attorney, interim lender, subcontractors, material suppliers, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Georgia Department of Community Affairs and written consent to such identity of interest by Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

The document is assignable to other lenders that are parties to the DCA loan transaction. In addition to this market study, Gill Group, Inc., has also completed an appraisal report.

CERTIFICATION

This is to certify that a field visit was made by the market analyst or one of his associates and information was obtained from publications of Federal, State and Local agencies. Interviews were held with apartment owners or managers, local officials and others as appropriate who may be knowledgeable of the housing market in Hephzibah.

In accordance with Georgia Department of Community Affairs, I hereby certify that the information provided in this Market Study was written according to Georgia Department of Community Affairs' market study requirements and is truthful and accurate to the best of my knowledge and belief. The estimates of demand for family housing made by this report are based on the assumption of a free market situation, unencumbered by local mores, affirmative fair housing marketing or prejudice toward the site location.

This is to affirm that I will receive no fees which are contingent upon approval of the project by Georgia Department of Community Affairs, before or after the fact, and that I will have no interest in the housing project.

IDENTITY OF INTEREST

I understand and agree that Georgia Department of Community Affairs will consider an identity of interest to exist between the loan applicant as the party of the first part and general contractors, architects, engineers, attorneys, interim lenders, subcontractors, material suppliers or equipment lessors as parties of the second part under any of the following conditions:

- 1. When there is any financial interest of the party of the first part in the party of the second part;
- 2. When one or more of the officers, directors, stockholders or partners of the party of the first part is also an officer, director, stockholder or partner of the party of the second part;
- 3. When any officer, director, stockholder or partner of the party of the first part has any financial interest whatsoever in the party of the second part;
- 4. When the party of the second part advances any funds to the party of the first part other than an interim lender advancing funds to enable the applicant to pay for construction and other authorized and legally eligible expenses during the construction period;
- 5. When the party of the second part provides and pays on behalf of the party of the first part the cost of any legal services, architectural services or interim financing other than those of the survey, general superintendent or engineer employed by a general contractor in connection with obligations under the construction contract;
- 6. When the party of the second part takes stock or any interest in the party of the first part as part of the consideration to be paid them; and
- 7. When there exists or comes into being any side deals, agreements, contracts or undertakings entered into thereby altering, amending or canceling any of the required closing documents or approval conditions as approved by Georgia Department of Community Affairs.

I certify that there is not now, nor will there be, an identity of interest between or among the applicant, contractor, architect, interim lender, subcontractors, material supplies, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Georgia Department of Community Affairs and written consent to such identity of interest by Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

There is no identity of interest between the loan applicant and the Market Analyst or Gill Group.

PART I:

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

It is the opinion of the analyst that a market does exist for the 96-unit development designed for families. The existing development designed for families is viable within the market area. The report was prepared assuming that the project will be rehabilitated as detailed in this report.

Project Description

The subject, Richmond Villas, is an existing 96 unit development designed for families. The site is located at 3551 Windsor Spring Road, Hephzibah, Richmond County, Georgia, 30815. Windsor Spring Road is located east of State Highway 1 and south of Interstate 520.

The existing development contains five two-story walk-up buildings and one accessory building. The property is 100 percent occupied. The property contains 16 one-bedroom/one-bath units with 653 square feet for a total of 10,440 square feet; 64 two-bedroom/one-bath units with 807 square feet for a total of 51,629 square feet; and 16 three-bedroom/one-and-one-half baths with 1,064 square feet for a total of 17,019 square feet. The total net rentable area is 79,088 square feet.

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

| I | MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES | | | | | | | | | | |
|---|--|------------|------------------------|--------------------------|--------------------------|---------------|----------------------|----------|--|--|--|
| | Unit Type | # of Units | Avg. Square Feet | % of Median Income | Maximum LIHTC Rent | Gross Rent | Utility Allowance | Net Rent | | | |
| | 1/1 | 16 | 653 | 60% | \$663 | \$709 | \$109 | \$600 | | | |
| | 2/1 | 64 | 807 | 60% | \$796 | \$936 | \$145 | \$791 | | | |
| | 3/1.5 | 16 | 1,064 | 60% | \$921 | \$1.077 | \$184 | \$893 | | | |

The subject is currently a Section 8 property, with subsidies for all units. After rehabilitation it will also be Low Income Housing Tax Credit with all units set at 60 percent of the area median income. The proposed rents are above the maximum LIHTC rents. However, the property will continue to be a Section 8 property with subsidies for all units. Therefore, residents will never pay more than 30 percent of their income for rent.

Unit amenities include a refrigerator, range/oven, dishwasher, carpet and tile floor coverings, blinds, walk-in closets, coat closets, and safety bars. After rehabilitation, units will also include microwaves. Project amenities include a laundry facility, on-site maintenance and on-site management. After rehabilitation, the subject will also include a meeting room, playground, a covered picnic area with BBQ grills. The subject's unit mix and project amenities will be similar to superior to most surveyed comparables.

The subject's unit mix of one-, two- and three-bedroom units is suitable in the market. The subject's unit sizes are smaller than the average unit size of the comparables surveyed; however, the subject is within the range of the comparables. In addition the subject maintains a stabilized occupancy. Therefore, the subject's unit sizes does not have a negative impact on the unit's marketability.

The subject property's proposed net rents are lower than the market rents of \$720 for the one-bedroom units; \$795 for the two-bedroom units; and \$920 for the three-bedroom units. In addition, the subject is a Section 8 property with subsidies for all units. Therefore, tenants will never pay more than 30 percent of their income towards rents. The analyst was able to locate and verify 12 market-rate complex within the subject's market area. It is believed that the comparables used in the rent grid analysis were the best available. Therefore, it is believed that the proposed tax credit rents will be competitive with existing properties.

Site Description/Evaluation

The subject is located at 3551 Windsor Spring Road, and contains approximately 9.80 acres. The subject property is currently zoned R-3B, Multi-Family Residential. The subject is a legal, conforming use. Windsor Spring Road is located east of State Highway 1 and south of Interstate 520. Due to the subject's location on a secondary road, it is the opinion of the analyst that there is average visibility/access to the site.

The subject neighborhood is comprised primarily of single-family residences and is 70 percent built up. Approximately 40 percent of the land use is made up of single-family residences. About 20 percent is comprised of multifamily dwellings. Another 10 percent of the land use is made up of commercial properties. The remaining 30 percent is vacant land. The area is mostly suburban.

The site is located near a major thoroughfare which provides it with average visibility and access. The subject is located in close proximity to most major services. There are multiple pharmacies, convenience stores, department stores, banks and restaurants within three miles of the site. In addition schools and health care facilities are located within a reasonable distance from the subject. The subject is an existing development designed for families. The subject will be 100 percent Low Income Housing Tax Credit, with 100 percent set at 60 percent of the area median income, which will provide affordable housing to residents in the area. In addition, the property will continue to be a Section 8 property with subsidies for all units. The site has no apparent weaknesses.

Market Area Definition

The primary market area for the subjects consists of the following Census Tracts: 0105.06, 0105.07, 0105.08, 0105.09, 0105.10, 0105.12, 0105.13, 0107.07, 0107.08, 0107.09, 0107.10, 0107.11, 0107.12, 0105.05, 0107.03, 0107.04 and 0107.05. The market has the following boundaries: North – Rocky Creek, Regency Boulevard, Milledgville Road and Old McDuffie Road; South – Ellis Pond, South Prong Creek,

Spirit Creek, Richmond Factory Pond; East – U.S. Highway 25, State Route 121, Butler Creek and Norfolk Southern Railroad; and West – Barton Chapel Road, U.S. Highway 1/State Route 4, Lombard Millpond, Butler Creek and Dean's Bridge Road.

Community Demographic Data

In 2000, this geographic market area contained an estimated population of 61,192. By 2010, population in this market area had increased by 1.2 percent to 61,912. In 2016, the population in this market area had decreased by 0.6 percent to 61,559. It is projected that between 2016 and 2018, population in the market area will increase 0.5 percent to 61,889. It is projected that between 2018 and 2021, population in the market area will increase 1.3 percent to 61,383.

Between 2000 and 2010, the market area gained approximately 108 households per year. The market area is projected to gain 167 households between 2016 and 2018. The market area is projected to continue to gain 251 households between 2018 and 2021. The households in the market area are predominantly owner-occupied. The percentage of owner-occupied is projected to remain stable through 2021.

Of the surveyed comparables, one-bedroom units range from \$378 to \$725; two-bedroom units range from \$485 to \$875; and three-bedroom units range from \$476 to 982 per month. These rental rates have remained similar within the past few years.

Households who have between one and two persons and annual incomes between \$0 and \$28,320 are potential tenants for the one-bedroom units at 60 percent of the area median income. Approximately 56.9 percent of the primary market area tenants are within this range.

Households who have between two and three persons and annual incomes between \$0 and \$31,860 are potential tenants for the two-bedroom units at 60 percent of the area median income. Approximately 62.1 percent of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$0 and \$38,280 are potential tenants for the three-bedroom units at 60 percent of the area median income. Approximately 68.7 percent of the primary market area tenants are within this range.

According to www.realtytrac.com, there are currently 147 properties for sale that are foreclosures within the subject's zip code. In October, the number of properties that received a foreclosure filing in 30815 was 13 percent higher than the previous month and 127 percent higher than the prior year. The City of Hephzibah foreclosure rate is 1 in every 455 housing units. Richmond County foreclosure rate is 1 in 731. Therefore, it appears that the foreclosure rate in the city has been increasing. There are two known properties within the vicinity of the property that have been foreclosed upon. In addition, there are no known negative factors impacting the occupancy of the subject within the market area.

Economic Data

The economy of the market area is based on manufacturing, retail trade, professional and related services and educational, health and social services sectors. Each of these categories has experienced reasonable growth within the past few years.

Employment in Richmond County has been decreasing an average of 0.5 percent per year since 2000. Employment in the State of Georgia has been increasing an average of 0.6 percent per year since 2000. The unemployment rate for Richmond County has fluctuated from 4.5 percent to 11.2 percent over the past 10 years. These fluctuations are slightly higher than the unemployment rates for the State of Georgia.

There have not any business closures within the past two years in Hephzibah and Richmond County. In addition, there have been several new and expanding businesses such as Ellefson Transportation Group, Krispy Crème, Hyatt Hotel, Banjo Cold Brew, and Rita's within Richmond County. Overall, it is believed that the economy of Hephzibah will remain stable.

Project-Specific Affordability and Demand Analysis

The following table uses a 35 percent lease rent-to-income to determine the minimum target income required for each unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists the number of households within the required target income for each unit type.

| INCOME ELIGIBLE HOUSEHOLDS | | | | | | | | | | |
|----------------------------|------------|-------------|-------------|-------------------|----------------------|--|--|--|--|--|
| Unit Type | Gross Rent | Lower Range | Upper Range | Percent Renter | Renter Households | | | | | |
| 1/1 | \$709 | \$0 | \$28,320 | 56.9% | 4,563 | | | | | |
| 2/1 | \$936 | \$0 | \$31,860 | 62.1% | 4,977 | | | | | |
| 3/1.5 | \$1,077 | \$0 | \$38,280 | 68.7% | 5,509 | | | | | |
| Total Units | • | \$0 | \$38,280 | 68.7% | 5,509 | | | | | |

Source: U.S. Census Bureau, Nielsen Claritas and Ribbon Demographics and HUD

The following chart indicates the net demand and the capture rates:

| AMI | Unit | Income | Units | Total | Supply | Net | NetCapture | Absorption | Average | Market Rents | Proposed |
|---------|-------------|-----------------|----------|--------|--------|--------|------------|------------|-------------|--------------|------------------|
| | Size | Limits | Proposed | Demand | | Demand | Rate | | Market Rent | Band | Rents |
| | | | | | | | | | | Min - Max | |
| 60% AMI | 1 BR/ 1 BA | \$0 to \$28,320 | 16 | 936 | 9 | 927 | 1.7% | N/A | \$720 | N/A | \$709 |
| | 2 BR/ 1 BA | \$0 to \$31,860 | 64 | 645 | 1 | 644 | 9.9% | N/A | \$795 | N/A | \$936 |
| | 3 BR/1.5 BA | \$0 to \$38,280 | 14 | 754 | 5 | 749 | 2.1% | N/A | \$920 | N/A | \$1,077 |
| | All Units | \$0 to \$38,280 | 96 | 2,499 | 15 | 2,484 | 3.9% | N/A | \$720-\$920 | N/A | \$709 to \$1,077 |

The subject is applying for tax credits at 60 percent of the area median income. There are no tax credit comparables located in the market area constructed within the past two years that compete with the subject. If the subject were vacant, it would need to capture 3.9 percent of the demand in the market area for units at 60 percent of the area median income. However, the subject is an existing property that is currently 100 percent occupied. Therefore, the capture rate considering only the vacant units is determined to be a more accurate indication of the capture rate for the subject. The subject contains no tenants who are considered rent burdened as determined under the LIHTC program. It is unlikely that the tenants could find comparable housing with rents low enough to meet the affordability requirements even if there were any tenants that were rent overburdened. Therefore, it is probable that these tenants would chose to remain at the subject. Furthermore, it is not likely that the tenants will be displaced because they meet the maximum allowable income requirements. The subject is currently 100 percent Section 8 with subsides for all units. Consequently, it was considered appropriate to determine the capture rate estimates considering only vacant units at the property. The capture rate for all vacant units is well below the 30 and 40 percent threshold requirements, and the capture rate for all vacant three-bedroom units is well below the 40 percent threshold requirement and does not exceed the 35 percent threshold requirement for rural areas. As a result, the analyst feels there is a need for affordable housing, and the subject will help fill the need by continuing to offer affordable units to the market area.

Competitive Rental Analysis

There were a total of 18 confirmed market-rate and restricted apartment complexes in and surrounding the market area. There were 186 vacant units at the time of the survey out of 2,479 surveyed, for an overall vacancy rate of 7.5 percent. However, Oakview Place current has a higher than usual vacancy rate due to several move-out occurring at once; Benson Estates recently opened in October 2015 and is still in the process of leasing up; and Providence Place Apartments recently went under new management and several tenants were evicted due to nonpayment. Therefore, the overall vacancy rate is not an accurate indication of the market area's vacancy rate when considering these properties. Without considering these properties, the overall vacancy rate would be 2.9 percent. The amenities of these comparables are relatively similar to superior to the subject's proposed amenities. Therefore, it is believed the subject will be competitive within the market area.

The subject property's proposed net rents are lower than the market rents of \$720 for the one-bedroom units; \$795 for the two-bedroom units; and \$920 for the three-bedroom units. In addition, the subject is a Section 8 property with subsidies for all units. Therefore, tenants will never pay more than 30 percent of their income towards rents. The analyst was able to locate and verify 12 market-rate complex within the subject's market area. It is believed that the comparables used in the rent grid analysis were the best available. Therefore, it is believed that the proposed tax credit rents will be competitive with existing properties.

Absorption/Stabilization Estimate

The subject is an existing multifamily development that contains 96 one-, two- and three-bedroom units that are currently 100 percent occupied. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units. The rehabilitation will not displace any tenants, and the existing tenants are expected to remain income-qualified. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units.

Conclusion

The overall capture rate for the proposed development is reasonable for the tax credit units. The property is currently applying for Low Income Housing Tax Credits. The capture rate was figured by unit size. The capture rates for the vacant units are within the acceptable range. It is believed that the subject is a viable development.

PART II:

PROJECT DESCRIPTION

PROJECT DESCRIPTION

Project Name: Richmond Villas

Location: 3551 Windsor Spring Road

Hephzibah, Richmond County, Georgia 30815

Project Type: Family

Construction Type: Existing Rehabilitation Development

Developer: The MACO Companies

The existing development contains five two-story walk-up buildings and one accessory building. The property is 100 percent occupied. The property contains 16 one-bedroom/one-bath units with 653 square feet for a total of 10,440 square feet; 64 two-bedroom/one-bath units with 807 square feet for a total of 51,629 square feet; and 16 three-bedroom/one-and-one-half baths with 1,064 square feet for a total of 17,019 square feet. The total net rentable area is 79,088 square feet.

Project Design

The existing development contains five two-story walk-up buildings and one accessory building. The property is 100 percent occupied.

Unit Features, Project Amenities and Services

Unit amenities include a refrigerator, range/oven, dishwasher, carpet and tile floor coverings, blinds, walk-in closets, coat closet and safety bars. After rehabilitation, units will also include microwaves. Project amenities include a laundry facility, on-site maintenance and on-site management. After rehabilitation, the subject will also include a meeting room, playground and a covered picnic area with BBQ grills. The subject's unit mix and project amenities will be similar to superior to most surveyed comparables.

Parking

The subject contains an open asphalt parking lot.

Utilities

The following table describes the project's utility combination.

| UTILITY SCHEDULE | | | | | | | | |
|------------------|------------------|----------|--|--|--|--|--|--|
| Utility | Туре | Who Pays | | | | | | |
| Heat | Central Electric | Tenant | | | | | | |
| Air Conditioning | Central Electric | Tenant | | | | | | |
| Hot Water | Gas | Tenant | | | | | | |
| Cooking | Gas | Tenant | | | | | | |
| Other Electric | N/A | Tenant | | | | | | |
| Cold Water/Sewer | N/A | Landlord | | | | | | |
| Trash Collection | N/A | Landlord | | | | | | |

Unit Mix, Size and Rent Structure

The subject currently contains 96 total units and is 100 percent occupied. The following chart lists the subject's existing unit distribution by unit type, size, income restriction and rent structure.

| Unit Type | # of Units | Square Footage | Total Square Footage |
|-----------|------------|----------------|----------------------|
| 1/1 | 16 | 653 | 10,440 |
| 2/1 | 64 | 807 | 51,629 |
| 3/1.5 | 16 | 1,064 | 17,019 |
| | 96 | | 79,088 |

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

| MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES | | | | | | | | |
|--|------------|------------------------|--------------------------|--------------------------|---------------|----------------------|----------|--|
| Unit Type | # of Units | Avg. Square Feet | % of Median Income | Maximum LIHTC Rent | Gross Rent | Utility Allowance | Net Rent | |
| 1/1 | 16 | 653 | 60% | \$663 | \$709 | \$109 | \$600 | |
| 2/1 | 64 | 807 | 60% | \$796 | \$936 | \$145 | \$791 | |
| 3/1.5 | 16 | 1,064 | 60% | \$921 | \$1,077 | \$184 | \$893 | |

The subject is currently a Section 8 property, with subsidies for all units. After rehabilitation it will also be Low Income Housing Tax Credit with all units set at 60 percent of the area median income. The proposed rents are above the maximum LIHTC rents. However, the property will continue to be a Section 8 property with subsidies for all units. Therefore, residents will never pay more than 30 percent of their income for rent.

Eligibility

Households who have between one and two persons and annual incomes between \$0 and \$28,320 are potential tenants for the one-bedroom units at 60 percent of the area median income. Approximately 56.9 percent of the primary market area tenants are within this range.

Households who have between two and three persons and annual incomes between \$0 and \$31,860 are potential tenants for the two-bedroom units at 60 percent of the area median income. Approximately 62.1 percent of the primary market area tenants are within this range.

Households who have between three and five persons and annual incomes between \$0 and \$38,280 are potential tenants for the three-bedroom units at 60 percent of the area median income. Approximately 68.7 percent of the primary market area tenants are within this range.

| LIHTC INCOME LIMITS | | | | | |
|----------------------|----------|--|--|--|--|
| Person in Households | 60% | | | | |
| 1 | \$24,780 | | | | |
| 2 | \$28,320 | | | | |
| 3 | \$31,860 | | | | |
| 4 | \$35,400 | | | | |
| 5 | \$38,280 | | | | |
| 6 | \$41,100 | | | | |

Source: HUD

Rehabilitation

The rehabilitation is anticipated to begin June 2017 and end in June 2018.

PART III:

SITE EVALUATION

SITE EVALUATION

Site Inspector: David Warren

Project Location

The subject is located at 3551 Windsor Spring Road, 3.44 miles outside the city limits of the

northern portion of the City of Hephzibah, Georgia. Windsor Spring Road is located east of State

Highway 1 and south of Interstate 520.

Site Characteristics

The subject neighborhood is comprised primarily of single-family residences and is 70 percent

built up. Approximately 40 percent of the land use is made up of single-family residences. About

20 percent is comprised of multifamily dwellings. Another 10 percent of the land use is made up

of commercial properties. The remaining 30 percent is vacant land. The area is mostly suburban.

Zoning

The subject property is currently zoned R-3B, Multi-Family Residential. The subject is a legal,

conforming use. Therefore, it is unlikely that a zoning change will occur. The subject appears to

meet site and setback requirements and appears to conform to the current zoning restrictions.

The subject could be re-built if it were destroyed. Since there are no obvious conflicts between

the subject property and the zoning of the property, there is no negative impact on the market

value by the zoning classification.

Surrounding Land Uses

The neighborhood is comprised primarily of single-family residences. Single-family residences

and vacant land are located north of the site. Vacant land are located south of the site. Top Notch

Car Wash, Checkers, Poppin Stop, Windsor Crossing and Sprint Food Store are located east of

the site. Single-family residences are located west of the subject.

Developments

Existing developments within the market area include Mount Zion Apartments, Shadowood

Apartments, Cedarwood Apartments, The Terrace at Edinburgh, Crest at Edinburgh and Trinity

Manor Apartments. Mount Zion Apartments is a Section 8 property that targets families and would

directly compete with the subject. The property was built in 1973 and is currently stabilized;

therefore, will not be negatively impacted by the subject. Shadowood Apartments is a Section 8

property that targets families and would directly compete with the subject. The property was built

in 1980 and is currently stabilized; therefore, will not be negatively impacted by the subject.

Page 22

Cedarwood Apartments is a HOME and LIHTC property that targets families at 30, 40 and 50 percent of the area median income and would directly compete with the subject. The property was constructed in 1973 and is currently stabilized; therefore, will not be negatively impacted by the subject. The Terrace at Edinburgh is a LIHTC property that targets seniors at 50 and 60 percent of the area median income; therefore, will not directly compete with the subject. However, the property was included within the report for comparison purposes. Crest at Edinburgh is a LIHTC development that targets families at 50 and 60 percent of the area median income and would directly compete with the subject. The property was constructed in 2011 and is currently stabilized; therefore, will not be negatively impacted by the subject. Trinity Manor Apartments is a Section 8 property and would directly compete with the subject. The property was constructed in 1971 and is not currently stabilized; however, the contact stated it is due to having eight units that are down for renovations. Therefore, the property will not be negatively impacted by the subject.

Schools

According to www.neighborhoodscout.com, the subject is served by the Richmond County School District. The district has 61 schools for grades pre-kindergarten through high school. There are 31,997 students enrolled in the district. Schools that will serve the subject in the district include Windsor Spring Road Elementary School, Morgan Road Middle School and Butler High School.

Transportation

Major highways in the County of Richmond include Interstates 20 and 520, U.S. Highways 1, 25, 78 and 278, and State Highways 4, 10, 28, 56, 88, 104, 121, 223, 232, 383, 402, 415 and 540. Daniel Field and Augusta Regional Airport at Bush Field are located in Augusta, approximately 16 miles from the city. Public transit is provided by Richmond Rural Transit which services the cities of Hephzibah, McBean and Blythe. This a door-to-door public transit and must be scheduled with a 24-hour advance. Tickets can be purchased for \$3 for a one-way trip and additional stops can be scheduled for an additional \$3.

Health Services

University Hospital, Doctors Hospital, and Trinity Hospital of Augusta are health care and medical facilities located in Augusta, approximately 16 miles from Hephzibah that serve the residents of city and the surrounding area.

Parks and Recreational Opportunities

Richmond County offers several recreational opportunities, including Diamond Lakes Regional Park which is a 286 acre park and includes outdoor walking track, tree wooded picnic areas, two playgrounds, four fully stocked fishing ponds, sand volleyball court, horseshoe pit, five youth

baseball/softball fields, five-field adult complex, a covered pavilion, a campground, a library, tennis courts, indoor fitness center, indoor basketball court, racquetball court, and community center. Additional recreational opportunities include but are not limited to Augusta Aquatic Center which is home to a wide range of aquatic programs, Blythe Area Recreation Center and Park which includes a community room, multipurpose room, outdoor walking track, picnic area, playground and a rental facility; Hickman Park; May Park Community Center, Augusta Riverwalk and Gracewood Park.

Crime

According to www.neighborhoodscout.com, the crime index for the subject neighborhood is 34. There are 179 total crimes annually in the neighborhood, 13 of which are violent crimes and 166 of which are property crimes. The annual violent crime rate is 2.58 per 1,000 residents, while the property crime rate is 32.93 per 1,000 residents. The total annual crime rate is 35.51 per 1,000 residents. The chances of becoming a victim of a violent crime are 1 in 388 which is higher than for the state which is 1 in 265. The chances of becoming a victim of a property crime are 1 in 30, which is the same as the rate for the state.

Visibility/Access

The subject property is located at 3551 Windsor Spring Road which connects to Bobby Jones Expressway/Interstate 520. Due to the subject's location near a major thoroughfare, it is the opinion of the analyst that there is good visibility/access to the site.

Planned Road & Infrastructure Improvements

At the time of the physical inspection, there were no planned road or infrastructure improvements in the area surrounding the subject property.

Environmental

A copy of a Phase I Environmental Site Assessment was not provided to the analyst with this assignment. No environmental hazards were observed on the site on the date of the inspection.

Community and Site Strengths and Weaknesses

Strengths – The site is located near a major thoroughfare which provides it with average visibility and access. The family development provides affordable housing to residents in the area. Additionally, the subject is located near all major services.

Weaknesses – The site has no apparent weaknesses.

PART IV:

MARKET AREA

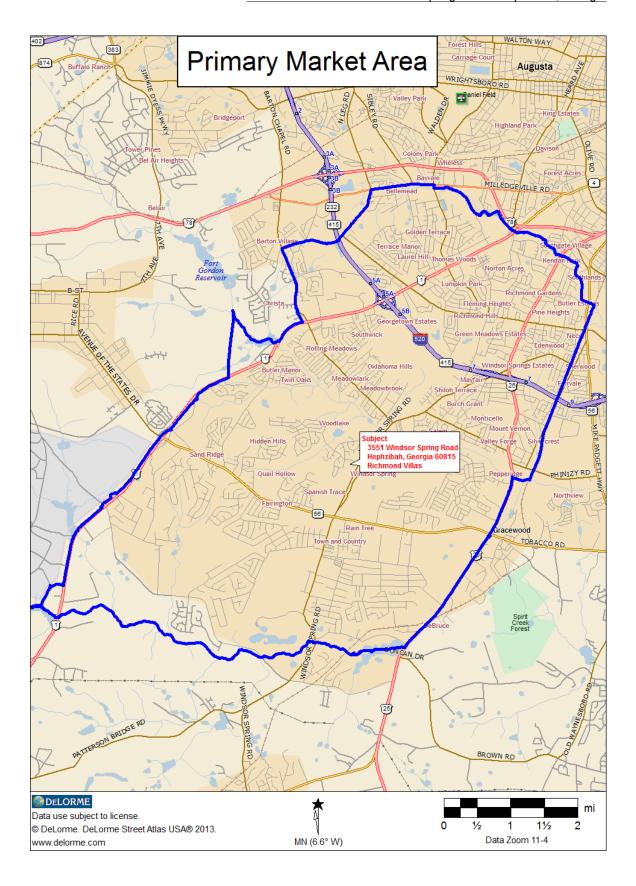

Delineation of Market Area

Following is a list of considerations used when determining the market area:

- Population and Households Counts: The number of households in a market area is directly proportionate to its geographic size within an individual market. Total householders residing in a market area can greatly influence demand calculations.
- General Demographics: The socio-economic composition of a market area including income, household size and tenure can be largely influenced by the erroneous inclusion or exclusions of non-comparable areas.
- Demand: Too large of a market may result in overstating demand for a proposed development. Conversely, too conservative of a market area may discount the demand for new product especially if a lack of quality housing currently exists.
- Supply Analysis: While a larger market area generally includes higher household totals, it
 likewise may include a higher number of directly comparable units. If using demand
 methodologies that net out recently constructed and comparable rental units from the
 demand estimate, the increase in the number of comparable units can outweigh the
 increase in demand.
- Competitive Stock: The existing rental stock surveyed for a market study is dependent on the number of rental properties in a given market and therefore the boundaries of a primary market area. If existing developments are going to be used as "comparables", they should be located in the primary market area, if possible.
- Attainable Rents: If the market area includes non-comparable areas, the analysis may
 use comparables projects that suggest that a project can achieve rents that area
 significantly higher or lower than the rents its micro location will support.
- Location of Competitive Properties: A primary consideration in defining a market area is identifying those locations that offer alternative opportunities to a potential renter for a subject site. The managers of existing comparable properties near the site are excellent sources in determining those competitive locations.
- Accessibility: Available transportation linkages including both traffic arteries and mass transit options can influence the size of the market. Mass transit can have a significant impact on projects addressing very low income households for which transportation options may be limited.
- Natural Boundaries: Natural boundaries including rivers and mountains can restrict the mover-ship within a market due to a lack of accessibility.
- Housing Project Characteristics: The availability of a unique structure type such as a high rise may alter the typical draw of a potential project.
- Market Perceptions: Whether grounded in reality or not, market perceptions can be a significant determinant of market area boundaries. Social stigmas often exist within submarkets, with residents from one side of a submarket may not move to a close by neighborhood, regardless of housing opportunities. The construction of a new, attractive rental community may not necessarily relieve this perception.
- Commuting Patterns: The time spent commuting and employment destination could often
 reveal distinct patterns. High percentages of workers with long commutes or working in
 neighboring counties are often indicators of a lack of affordable housing options near
 employment centers.
- Target Market: Proposed developments targeting a special needs population such as seniors generally draw from a larger geographic region. Given the smaller pool of qualified householders, the location and quantity of comparable stock is of additional importance. An acceptable market area for a senior oriented rental community will often be too conservative for a rental community targeting senior rental householders.
- Jurisdictional Boundaries: Differences in the quality and services provided by school districts, municipalities or counties often influence consumer location choices.
- Local Agency Service Boundaries: The geographic areas covered by local agencies, such as housing authorities, senior citizen centers, community-based organizations or churches can be a strong indicator of market area boundaries especially when the project has a community-based sponsor or co-sponsor.

Non-Geographic Factors: Employees who might be expected to reside in a development
as a result of planned or existing job opportunities and special needs households who are
served by a multi-jurisdictional agency that covers communities that are clearly distinct
market areas.

The determination of the market area is based on the boundaries between governmental units. In such a method, county, division or city boundaries become the boundaries of the market area. The primary market area for the subjects consists of the following Census Tracts: 0105.06, 0105.07, 0105.08, 0105.09, 0105.10, 0105.12, 0105.13, 0107.07, 0107.08, 0107.09, 0107.10, 0107.11, 0107.12, 0105.05, 0107.03, 0107.04 and 0107.05. The market has the following boundaries: North – Rocky Creek, Regency Boulevard, Milledgville Road and Old McDuffie Road; South – Ellis Pond, South Prong Creek, Spirit Creek, Richmond Factory Pond; East – U.S. Highway 25, State Route 121, Butler Creek and Norfolk Southern Railroad; and West – Barton Chapel Road, U.S. Highway 1/State Route 4, Lombard Millpond, Butler Creek and Dean's Bridge Road. The subject's physical address is located in Hephzibah. However, the subject is located adjacent to the City of Augusta. The primary market area does include some census tracts within the City of Augusta; therefore, demographic data for both cities were included in the report.

COMMUNITY DEMOGRAPHIC DATA

Population Trends

The subject is located in the City of Hephzibah, Georgia. The primary market area for the subjects consists of the following Census Tracts: 0105.06, 0105.07, 0105.08, 0105.09, 0105.10, 0105.12, 0105.13, 0107.07, 0107.08, 0107.09, 0107.10, 0107.11, 0107.12, 0105.05, 0107.03, 0107.04 and 0107.05. The market has the following boundaries: North – Rocky Creek, Regency Boulevard, Milledgville Road and Old McDuffie Road; South – Ellis Pond, South Prong Creek, Spirit Creek, Richmond Factory Pond; East – U.S. Highway 25, State Route 121, Butler Creek and Norfolk Southern Railroad; and West – Barton Chapel Road, U.S. Highway 1/State Route 4, Lombard Millpond, Butler Creek and Dean's Bridge Road.

In 2000, this geographic market area contained an estimated population of 61,192. By 2010, population in this market area had increased by 1.2 percent to 61,912. In 2016, the population in this market area had decreased by 0.6 percent to 61,559. It is projected that between 2016 and 2018, population in the market area will increase 0.5 percent to 61,889. It is projected that between 2018 and 2021, population in the market area will increase 1.3 percent to 62,383.

Household Trends

The demand for additional housing in a market area is a function of population growth, household formations, and also a replacement of units lost through demolition and extreme obsolescence. In the case of housing for the elderly, the demand for rental housing is sometimes caused by the inability of the elderly to properly maintain their present ownership housing. Also, within the overall demand are segments of the market asking for more or less expense (related to income) and for ownership or rental.

Some of the demand has been, or will be, satisfied by units which have been built, or will be, by the time the project is renting. The difference between demand and supply, the residual, is the total market of which the project's market will be a share.

The "tenure" of existing housing will be examined first as a guide to the future proportion of ownership and rentals, and then characteristics of the housing stock will be noted.

The most important analysis is that of demand, supply and residual demand which follows. Its product is the number of rental units which will be demanded.

Tenure

In 2016, the percentage of renters in Richmond County was 46.1; 21.1 for the City of Hephzibah; 46.7 for the City of Augusta; and 35.9 for the market area. According to the U.S. Census Bureau, the national rental percentage is 35.6 percent. This percentage is utilized to segment the number of existing households in the demand section of this report.

The above chart shows the number of people employed in different sectors of the Richmond County, Hephzibah, Augusta and market area economy in 2010. According to interviews conducted by the analyst, employers in the area indicate that the area economy should remain stable in the next two to five years.

There have not any business closures within the past two years in Hephzibah and Richmond County. In addition, there have been several new and expanding businesses such as Ellefson Transportation Group, Krispy Crème, Hyatt Hotel, Banjo Cold Brew, and Rita's within Richmond County. Overall, it is believed that the economy of Hephzibah will remain stable.

Wages

The average annual wage of Richmond County employees was \$47,046 in 2015. Wages have been increasing 4.8 percent per year. Wages in transportation and warehousing; retail trade; leisure and hospitality; professional and business services; and other services sectors are within the income limits of the rehabilitated development.

Employment Outside the County

For residents employed in the market area, the travel time to work from the site will be less than 19 minutes. For the majority of those employed in other parts of the county, the travel time would be within 35 minutes. According to the chart below, 46.1 percent in the market area have a travel time of less than 19 minutes; 45.2 percent have a travel time of 20 to 34 minutes; and 8.6 percent have a travel time of over 35 minutes. This relatively low travel time indicates that the subject site is in an area in close proximity to employment centers.

PART VII:

PROJECT-SPECIFIC AFFORDABILITY & DEMAND ANALYSIS

PROJECT-SPECIFIC DEMAND ANALYSIS

Household Income Trends and Analysis

Income is a key characteristic in analyzing housing markets. Renters within the target incomes from \$0 to \$28,320, or 56.9 percent, qualify for one-bedroom units at 60 percent of the area median income; renters with incomes from \$0 to \$31,860, or 62.1 percent, qualify for twobedroom units at 60 percent of the area median income; and renters with incomes from \$0 to \$38,280, or 68.7 percent, qualify for the three-bedroom units at 60 percent of the area median income. Target incomes for the different unit types are derived by the analyst. For the low end of the range, the lowest gross rent charged in an income limit (i.e. 60% AMI) for a unit is divided by 35 percent. The resulting number is then multiplied by 12 to derive an annual income (\$709 / 35% = \$2,025.71 x 12 = \$24,309). This process is based on the premise that a tenant should not pay more than 35 percent of his annual income on rent. However, the subject is a Section 8 property. Due to the Section 8 HAP contract, residents will never pay more than 30 percent of their income for rent. Therefore, no minimum income limit is utilized. For the high end of the range, the analyst consults the income limits set by the state housing authority. For example, if the largest unit in an income limit (i.e. 60% AMI) is a two-bedroom unit, the analyst multiplies this number by 1.5 (this is due to the Low Income Housing Tax Credit (LIHTC) program being based on the premise that 1.5 persons per bedroom will occupy rental units) to find how many people could reside in that unit. The analyst then consults the state income limits to set the high end of the range (2 bedroom x 1.5 = 3 people/unit; therefore, the 50% 3-person maximum income would be used).

Sources of Demand

The potential tenants for the existing development include households who now live within the market area. It will appeal to potential tenants who have adequate incomes to pay the proposed rents and find the development more attractive in terms of price, unit features and project amenities than other available rental units. The market area is gaining approximately 38 households per year.

Required Unit Mix

The LIHTC program is based on the premise that 1.5 persons per bedroom will occupy rental units. We expect that 100 percent of one person households and 50 percent of two person households will occupy one-bedroom units. Fifty percent (50%) of two person households and 50 percent of three person households will occupy two-bedroom units and 50 percent will inhabit three-bedroom dwellings. Among four person households, 50 percent will live in three-bedroom units and 50 percent in four-bedroom. Households with five or more persons will occupy units with four or more bedrooms.

The following tables illustrate the ratio of units required by each household size. These occupancy patterns suggest that studios and one-bedroom units should account for 34.2 percent of the renter housing demand, two-bedroom units account for 21.5 percent, three-bedroom units should account for 23.4 percent of the renter housing demand and units with four or more bedrooms account for 20.9 percent of the renter housing demand in the primary market area.

| RENTAL HOUSING DEMAND BY NUMBER OF BEDROOMS | | | | | | | | |
|---|--------|-------|-------|-------|--------|--|--|--|
| HOUSEHOLD SIZE | 0/1 BR | 2 BR | 3 BR | 4 BR | TOTAL | | | |

| PERCENT | 34.2% | 21.5% | 23.4% | 20.9% | 100.0% | | | |

Eligible Households

The following table uses a 35 percent lease rent-to-income to determine the minimum target income required for each unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists the number of households within the required target income for each unit type.

| INCOME ELIGIBLE HOUSEHOLDS | | | | | | | | |
|----------------------------|------------|-------------|-------------|-------------------|----------------------|--|--|--|
| Unit Type | Gross Rent | Lower Range | Upper Range | Percent Renter | Renter Households | | | |

| | 2 BR/ 1 BA | \$0 to \$31,860 | 64 | 645 | 1 | 644 | 9.9% | N/A | \$795 | N/A | \$936 |
| | 3 BR/1.5 BA | \$0 to \$38,280 | 14 | 754 | 5 | 749 | 2.1% | N/A | \$920 | N/A | \$1,077 |
| | All Units | \$0 to \$38,280 | 96 | 2,499 | 15 | 2,484 | 3.9% | N/A | \$720-\$920 | N/A | \$709 to \$1,077 |

The subject is applying for tax credits at 60 percent of the area median income. There are no tax credit comparables located in the market area constructed within the past two years that compete with the subject. If the subject were vacant, it would need to capture 3.9 percent of the demand in the market area for units at 60 percent of the area median income. However, the subject is an existing property that is currently 100 percent occupied. Therefore, the capture rate considering only the vacant units is determined to be a more accurate indication of the capture rate for the subject. The subject contains no tenants who are considered rent burdened as determined under the LIHTC program. It is unlikely that the tenants could find comparable housing with rents low enough to meet the affordability requirements even if there were any tenants that were rent overburdened. Therefore, it is probable that these tenants would chose to remain at the subject. Furthermore, it is not likely that the tenants will be displaced because they meet the maximum allowable income requirements. The subject is currently 100 percent Section 8 with subsides for all units. Consequently, it was considered appropriate to determine the capture rate estimates considering only vacant units at the property. The capture rate for all vacant units is well below the 30 and 40 percent threshold requirements, and the capture rate for all vacant three-bedroom units is well below the 40 percent threshold requirement and does not exceed the 35 percent

threshold requirement for rural areas. As a result, the analyst feels there is a need for affordable housing, and the subject will help fill the need by continuing to offer affordable units to the market area.

The property does maintain an active waiting list with 150 applicants. The annual turnover rate is 16 percent. The property targets families and 80 of the 100 total units receive subsidies.

Market-Rate Vacancies

The field survey was completed during the fourth week of October 2016. There were 107 vacant units at the time of the survey out of 1,513 surveyed, for an overall vacancy rate of 7.1 percent. The market-rate occupancy is 92.9 percent. However, Oakview Place has a higher than normal vacancy rate due to several eviction that occurred within the same month. Additionally, Benson Estates was placed in service in October 2015 and is still leasing up. Therefore, without taking these comparables into consideration the market-rate vacancy rate would be 2.6 percent.

| MARKET VACANCIES | | | | | | | | | | |

| Totals | 1,513 | 107 | 7.1% | | | | | | | |

Subsidized/Restricted Vacancies

The field survey was completed during the fourth week of October 2016. There were 15 vacant unit at the time of the survey out of 637 surveyed, for an overall vacancy rate of 2.4 percent. The subsidized/restricted occupancy is 97.6 percent. However, Trinity Manor currently has several units down due to current renovations. Therefore, without taking this comparable into consideration, the subsidized/restricted vacancy rate would be 1.3 percent.

| AFFORDABLE HOUSING | VACANCI | ES | |
|--------------------------|------------|--------|---------|
| | | # of | |
| | | Vacant | Vacancy |
| Name of Property | # of Units | Units | Rate |
| Richmond Villas | 96 | 0 | 0.0% |
| Mount Zion Apartments | 67 | 1 | 1.0% |
| Shadowood Apartments | 78 | 4 | 5.0% |
| Cedarwood Apartments | 184 | 2 | 1.0% |
| The Terrace at Edinburgh | 72 | 0 | 0.0% |
| Crest at Edinburgh | 40 | 0 | 0.0% |
| Trinity Manor Apartments | 100 | 8 | 8.0% |
| Totals | 637 | 15 | 2.4% |

Overall Vacancy

There were a total of 18 confirmed market-rate and restricted apartment complexes in and surrounding the market area. There were 122 vacant units at the time of the survey out of 2,150 surveyed, for an overall vacancy rate of 5.7 percent. However, Oakview Place current has a higher than usual vacancy rate due to several move-out occurring at once and Benson Estates recently opened in October 2015 and is still in the process of leasing up. Therefore, the overall vacancy rate is not an accurate indication of the market area's vacancy rate when considering these properties. Without considering these properties, the overall vacancy rate would be 2.5 percent.

Evaluation of the Rehabilitated Development

Location

The subject is in a commercial and residential neighborhood. Its location provides it with average access and visibility. The properties surrounding the site are in average to good condition. The site's access to major arterials, medical facilities and grocery stores is comparable to that of its competitors. Its overall location is comparable to its competitors because the size of the town confers the same locational attributes to all projects.

Project Design

The subject is improved with five two-story walk-up buildings containing 96 Section 8 units designed for families.

Project Amenities

Project amenities include a laundry facility, on-site maintenance and on-site management. After rehabilitation, the subject will also include a meeting room, playground, a covered picnic area with BBQ grills.

Unit Amenities

Unit amenities include a refrigerator, range/oven, dishwasher, carpet and tile floor coverings, blinds, walk-in closets, coat closest and safety bars. After rehabilitation, units will also include microwaves.

Tenant Services

The subject does not provide any additional services. All comparables will be similar to the subject in terms of tenant services.

Parking

The subject contains an open asphalt parking lot.

Unit Mix

The subject's unit mix of one-, two- and three-bedroom units is suitable in a market area.

Utilities

Heating and cooling are central electric. Cooking and hot water are gas. The tenants pay electricity and gas. The landlord provides water, sewer and trash. This arrangement is similar to most apartment units in the market area.

Unit Size

The average size of the units in the surveyed developments is 710 square feet for one-bedroom units; 907 for two-bedroom units; and 1,081 square feet for three-bedroom units. The subject's unit sizes are smaller than the average unit size of the comparables surveyed; however, the subject maintains a stabilized occupancy and is within range of the comparables' unit sizes. Therefore, the subject's unit sizes does not have a negative impact on the unit's marketability.

Source: Gill Group Field Survey

Vacancy Rates/Rental Trends

There were a total of 18 confirmed market-rate and restricted apartment complexes in and surrounding the market area. There were 186 vacant units at the time of the survey out of 2,479 surveyed, for an overall vacancy rate of 7.5 percent. However, Oakview Place current has a higher than usual vacancy rate due to several move-out occurring at once; Benson Estates recently opened in October 2015 and is still in the process of leasing up; and Providence Place Apartments recently went under new management and several tenants were evicted due to nonpayment. Therefore, the overall vacancy rate is not an accurate indication of the market area's vacancy rate when considering these properties. Without considering these properties, the overall vacancy rate would be 2.9 percent.

According to property managers in the area, rental rates have remained stable within the past few years with only small rent increases each year.

The subject maintains a stabilized occupancy rate and will not displace tenants during the rehabilitation. Therefore, it will not negatively impact on the vacancy rate or rental rates in the market area. Based on the information verified and included within this analysis, it appears that the occupancy rate will remain stable and rental rates will increase slightly within the next two years.

Summary of Developments Strength and Weaknesses

Strengths – The development is located near a major thoroughfare which provides it with good visibility and access. In addition, the subject is an existing development with an established tenant base and is currently 100 percent occupied. After rehabilitation, the property will be in good condition and the unit and project amenities will be superior to majority of comparables within the market area. The market area has a strong occupancy rate and there are several properties that have waiting list that the subject can draw tenants from. The population and households are growing in the market area, indicating a need for new housing.

Weaknesses – The development has no apparent weaknesses.

Explanation of Adjustments and Market Rent Conclusions – As Complete Richmond Villas Apartments

Primary Unit Types – One-Bedroom Units (653 SF), Two-Bedroom Units (807 SF) and Three-Bedroom Units (1,064 SF)

Please note: Minor adjustments in the \$5 to \$10 range are based on the appraiser's evaluation of the overall market as well as typical responses indicated by existing tenants. In addition, this is standard industry practice when there is insufficient market data present to support adjustments. It is also considered an acceptable practice by HUD as indicated in the Section 8 Renewal Guide Chapter 9-12 (B) (2b) which states: "For minor adjustments (generally in the \$5 to \$10 range), the appraiser may state his/her subjective evaluation of why the observed differences would affect rent."

Rent comparability grids were prepared for the primary unit types with 653, 807 and 1,064 square feet. Comparable apartments used include the following: Oakview Place (Comparable 1), Pinnacle Place Apartments (Comparable 2), High Point Crossing Apartments (Comparable 3), Fleming Heights Apartments (Comparable 4), Cedar Grove Apartments (Comparable 5), Salem Arms Apartments (Comparable 6), Meadow Wood Place (Comparable 7) and Quail Hollow Apartments (Comparable 8).

Structure/Stories – The subject is located in two-story walk-up buildings. All comparables are located in one- or two-story buildings. No complex in the market area shows a rent difference based on this particular item. No adjustment was needed.

Project Occupancy – The subject is currently 100 percent occupied. The occupancy rates of the comparables range from 86 to 100 percent. The contact for Comparable 1 indicated that the property has recently evicted several tenants resulting in a lower occupancy rate. Since the vacancy does not appear to be the result of the rent level, no adjustment was needed.

Concessions – The subject is not currently offering concessions. None of the comparables are currently offering concessions. No adjustment was needed.

Year Built/Year Renovated - The subject was constructed in 1980 and will undergo a proposed rehabilitation. Comparable 1 was constructed in 1985. Comparable 2 was constructed in 1984. Comparable 3 was built in 1976. Comparable 4 was built in 1963. Comparable 5 was constructed in 1971. Comparable 6 was constructed in 1972 and renovated in 1997. Comparable 7 was built in 1984. Comparable 8 was built in 1985. All comparables will be inferior to the subject upon completion of the proposed rehabilitation. It has been the appraiser's experience that rehabilitated properties can typically command an increase in rents equal to approximately 10 percent of the rent. Therefore, all comparables

were adjusted upward 10 percent in addition to the condition adjustments determined in the "as is" scenario.

SF Area – For the purpose of this report, a range of comparable rents per square foot was derived. To determine this adjustment, each comparable's dollar per square foot rental rate was determined. This number was then multiplied by 25 percent for each comparable to derive an adjusted dollar per square foot rental rate. The median dollar per square foot rental rate is determined. Next, the difference in square footage between the subject and each comparable is determined. The difference is multiplied by the determined adjusted dollar per square foot rate to arrive at the adjustment for each comparable. The selected adjustment factor for the one-bedroom comparison is \$0.22, the selected adjustment factor for the two-bedroom comparison is \$0.19, and the selected adjustment factor for the three-bedroom comparison is \$0.18. No adjustments were made to comparables within 25 square feet of the subject. The adjustments were rounded to the nearest \$5. These adjustments are reflected on the HUD-Forms 92273, which are attached.

Number of Bedrooms – The subject and all comparables contain the same number of bedrooms. No adjustment is needed.

of Baths – Each complex with a differing number of baths than the subject was adjusted \$50 per full bath. The majority of the difference in number of baths is accounted for in the unit square footage adjustment. However, an adjustment is made here to consider the added convenience of additional baths. The extra room(s) will enhance the marketability of a unit even if the square footage remains the same. The amount selected was chosen after a paired rental analysis was used to determine a range of \$0 to \$25 per bath, as can be seen in the table below.

| | Comp 1 | Comp 8 |
|---------------------|--------|--------|
| Small 2 BR Rent | \$805 | \$580 |
| Small 2 BR Size | 1,042 | 850 |
| Large 2 BR Rent | \$795 | \$600 |
| Large 2 BR Size | 888 | 950 |
| Size Adj Factor | \$0.19 | \$0.19 |
| Size Difference | -154 | 100 |
| Indicated Size Adj. | -\$29 | \$19 |
| Adjusted 2 BR Rent | \$824 | \$581 |
| | | |
| Indicated Bath Adj. | \$19 | \$1 |

| | Comp 6 | Comp 6 |
|---------------------|--------|--------|
| Small 3 BR Rent | \$725 | \$725 |
| Small 3 BR Size | 990 | 990 |
| Large 3 BR Rent | \$750 | \$775 |
| Large 3 BR Size | 1,129 | 1,129 |
| Size Adj Factor | \$0.18 | \$0.18 |
| Size Difference | 139 | 139 |
| Indicated Size Adj. | \$25 | \$25 |
| Adjusted 2 BR Rent | \$725 | \$750 |
| | | |
| Indicated Bath Adj. | \$0 | \$25 |

The paired rental analysis range is determined by comparing comparables with differing numbers of baths and factoring out any other differences (amenities, utilities provided, etc.). The resulting difference is assumed to be attributable to the differing number of baths. The results are grouped together in a range. The adjustment is selected based on where the majority of the results fall within the range. If there is no

majority, a conservative adjustment at the low end of the range is selected. After considering the results of the paired analysis, a \$10 adjustment was selected for each half-bath, and a \$20 adjustment was selected for each full bath.

Balcony/Patio – The subject does not contain either amenity. Comparables 2, 4, 5 and 7 are similar to the subject. The comparables with balconies or patios were adjusted downward \$5 per month. Although the comparables do not indicate a rent differential for units with these features versus units without these features, the added amenity is an enhancement. Therefore, a nominal \$5 adjustment was selected for these features.

Parking - The subject and all comparables contain open parking lots. No adjustment is needed.

AC: Central/Wall – The subject contains central air conditioning. All comparables except Comparables 4 and 6 contain central air conditioning. Comparables 4 and 6 contain window air conditioning. Residents in this market indicated a willingness to pay an additional amount for central air conditioning versus through-the-wall air conditioning. Therefore, Comparables 4 and 6 were adjusted upward \$15 per month.

Range/Oven – The subject and all comparables contain this feature. No adjustments were needed.

Refrigerator – The subject and all comparables except Comparable 8 contain this feature. Although no comparable indicates a rent difference based on this feature, the added amenity is an enhancement. Therefore, Comparable 8 was adjusted upward \$25 per month. The adjustment was based on the appraiser's experience as well as data obtained from local rent-to-own facilities.

Microwave – The subject will contain microwaves upon completion of the rehabilitation. None of the comparables contain this feature. Although microwaves are relatively inexpensive, the added amenity is an enhancement. Therefore, all comparables were adjusted upward \$5 per month.

Dishwasher – The subject and all comparables except Comparable 4 contain this feature. Although no comparable indicates a rent difference based on this feature, the added amenity is an enhancement. Therefore, a \$10 adjustment was selected for Comparable 4.

Washer/Dryer – The subject and Comparables 5 and 6 contain laundry facilities. Comparables 2, 4, 7 and 8 contain washer/dryer hook-ups and were adjusted downward \$5 per month. The remaining comparable contains washers and dryers in the individual units and was adjusted downward \$25 per month. These adjustments were based on the experience of the appraiser, the local market area and the cost of amortizing over 12 months the replacement of any parts required for either laundry facility or washers and dryers or hook-ups in individual units.

Carpet/Drapes – The subject and all comparables contain carpet and window coverings. No adjustments were needed.

Pool/Recreation Areas – The subject will contain a playground, covered picnic area and park benches upon completion of the rehabilitation. Comparable 1 contains a swimming pool and playground. Comparable 2 contains a swimming pool, picnic area and playground. Comparable 3 contains a swimming pool, picnic area and playground. Comparable 4 does not contain either feature. Comparable 5 contains a picnic area and playground. Comparable 6 contains a fitness center. Comparables 7 and 8 do not contain either feature. Properties with these features can command a higher rent in the market. Therefore, a \$10 adjustment was selected for comparables without either feature, and a \$10 adjustment was selected for comparables with both features.

Heat – Neither the subject nor any comparable has this utility provided. No adjustments were needed.

Cooking - Neither the subject nor any comparable has this utility provided. No adjustments were needed.

Electricity – Neither the subject nor any comparable has this utility provided. No adjustments were needed.

Cold/Hot Water – The subject has cold water and sewer provided. Comparables 1, 3, 5, 6, 7 and 8 are similar to the subject. Comparable 2 has an additional monthly charge to cover the cost of water and sewer. The charges are as follows: \$45 for one-bedroom units, \$55 for two-bedroom units and \$65 for three-bedroom units. Since a fee is charged at this comparable, Comparable 2 was adjusted upward \$45 for the one-bedroom units, \$55 for the two-bedroom units and \$65 for the three-bedroom units. Comparable 4 does not have either cold water or sewer provided and was adjusted upward \$42 for the one-bedroom units and \$77 for the three-bedroom units. The adjustments were based on the amounts indicated by the Allowances for Tenant-Furnished Utilities and Other Services for Richmond County. The adjustments were supported by conversations with area apartment managers and tenants and local utility companies.

Extra Storage – The subject does not contain this feature. Comparables 6 and 8 contains extra storage. The remaining comparables are similar to the subject. Tenants in the market area indicated a willingness to pay an amount for these amenities. Therefore, a nominal \$5 adjustment was determined.

Location – The subject and all comparables were considered similar in terms of location. No adjustments were needed.

Security – The subject does not contain any form of security. Comparables 1, 2, 3, 7 and 8 are similar to the subject and were not adjusted. Comparable 4 contains security patrol. Comparable 5 contains video surveillance. Comparable 6 contains security patrol. Although there is very little market data available concerning security features, residents indicate a willingness to pay an additional amount per month for security features. Therefore, the comparables with security features were adjusted downward \$5 per month.

Clubhouse/Meeting Room – Upon completion of the proposed rehabilitation, the subject will contain a meeting room. None of the comparables contain either feature. Although no comparable shows a rent difference based on this feature, the added amenity is an enhancement. Therefore, a nominal \$5 adjustment was selected for all comparables.

Conclusion of Market Rents - As Complete

The adjusted rents range from \$610 to \$730 for the one-bedroom comparison; from \$670 to \$825 for the two-bedroom comparison; and from \$857 to \$970 for the three-bedroom comparison. Comparables 1 and 2 were given the most consideration in determining the market rent as they are most similar in condition. The remaining comparables were also given consideration. The appraiser concluded the market rent for the units at the subject as follows:

653 SF One-Bedroom Units - \$720
 807 SF Two-Bedroom Units - \$795
 1,064 SF Three-Bedroom Units - \$920

The following table shows the proposed rents at the subject. The estimated "as complete" market rents are above the proposed rents. Therefore, the proposed rents were considered achievable.

| MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES | | | | | | | | | |
|--|------------|------------------------|--------------------------|--------------------------|---------------|----------------------|----------|--|--|
| Unit Type | # of Units | Avg. Square Feet | % of Median Income | Maximum LIHTC Rent | Gross Rent | Utility Allowance | Net Rent | | |
| 1/1 | 16 | 653 | 60% | \$663 | \$709 | \$109 | \$600 | | |
| 2/1 | 64 | 807 | 60% | \$796 | \$936 | \$145 | \$791 | | |
| 3/1.5 | 16 | 1,064 | 60% | \$921 | \$1,077 | \$184 | \$893 | | |

HOUSING PROFILE

Market Area Overview

The rental housing stock in the market area is comprised of market-rate and restricted apartment complexes. The majority of the housing stock was built in the 1970s and 1980s. The market-rate complexes were built between 1963 and 2016. The restricted apartment complexes were built between 1971 and 2011. The market area's rental units have average occupancy rates.

Housing Inventory

Number of Units

From 2001 through 2015, permit issuing jurisdictions in City of Hephzibah authorized the construction of 215 new single-family and multifamily dwelling units. Multifamily dwelling accounted for approximately zero percent of the permits issued in the city.

| BUILDING PERMITS ISSUED | | | | | | | |
|-------------------------|---------------|-------------|-------|--|--|--|--|
| YEAR | SINGLE-FAMILY | MULTIFAMILY | TOTAL | | | | |
| 2001 | 25 | 0 | 25 | | | | |
| 2002 | 22 | 0 | 22 | | | | |
| 2003 | 7 | 0 | 7 | | | | |
| 2004 | 17 | 0 | 17 | | | | |
| 2005 | 16 | 0 | 16 | | | | |

Projects Under Construction

According to Richmond County, there are currently no multifamily projects under construction in the market area that would directly compete with the subject.

Planned Projects

According to the County of Richmond, there are currently no multifamily planned projects in the market area that would directly compete with the subject. According to the Georgia Department of Community Affairs, there have been no projects awarded tax credits in the market area within the past couple of years.

Age of Rental Units

Rental housing construction in the market area has decreased considerably since the 1970s.

| AGE OF RENTAL UNITS | | | | | | | |
|---------------------|--------|---------|--|--|--|--|--|
| YEAR BUILT | NUMBER | PERCENT | | | | | |
| 2005 or later | 168 | 2.2% | | | | | |
| 2000-2004 | 210 | 2.8% | | | | | |
| 1990-1999 | 1,088 | 14.4% | | | | | |
| 1980-1989 | 1,419 | 18.8% | | | | | |
| 1970-1979 | 2,472 | 32.7% | | | | | |
| 1960-1969 | 1,331 | 17.6% | | | | | |
| 1950-1959 | 565 | 7.5% | | | | | |
| 1940-1949 | 191 | 2.5% | | | | | |

| TOTAL | 7,551 | 100.0% | | | | | |

Source: U.S. Census Bureau

Unit Condition

The market area's rental housing stock is in varying condition. Overall, the market-rate developments are of average age and are well maintained.

Bedroom Distribution

In 2010, 8.2 percent of the market area's rental units were studio or one-bedroom units, and 41.2 percent were two-bedroom units. Dwellings with three bedrooms accounted for 42.7 percent of the market area's rental housing and dwellings with four or more bedrooms accounted for 7.1 of the market area's rental housing.

| BEDROOMS IN OCCUPIED RENTAL UNITS | | | | | | | |
|-----------------------------------|--------|---------|--|--|--|--|--|
| TYPE | NUMBER | PERCENT | | | | | |
| No Bedrooms | 69 | 0.9% | | | | | |
| One-Bedrooms | 552 | 7.3% | | | | | |
| Two-Bedrooms | 3,167 | 41.9% | | | | | |
| Three-Bedrooms | 3,227 | 42.7% | | | | | |
| Four-Bedrooms | 457 | 6.1% | | | | | |
| Five or More Bedrooms | 79 | 1.0% | | | | | |
| TOTAL | 7,551 | 100.0% | | | | | |

Source: U.S. Census Bureau

Rental Vacancy Rates

According to the U.S. Census Bureau, the national vacancy rate for the second quarter in 2016 was 6.7 percent in rental housing. The rental vacancy rate of 6.7 percent was not statically different from the rate in the second quarter of 2015 or the rate in the first quarter 2016.

For rental housing by area, the second quarter 2016 vacancy rates were highest outside Metropolitan Statistical Areas (MSAs) (10.0 percent). The rates inside principal cities (6.4 percent) and the suburbs (6.3 percent) were not statistically different from each other. The rental vacancy rate outside MSAs was higher than the second quarter 2015 rate, while the rate inside principal cities was lower than the second quarter 2015 rate. The rate in the suburbs was not statistically different from the second quarter 2015 rate.

For the second quarter 2016, the rental vacancy rates were highest in the South (8.5 percent), followed by the Midwest (7.3 percent). The rates were lowest in the Northeast (5.2 percent) and West (4.9 percent), though these rates were not statistically different from each other. The rental vacancy rates in all four regions were not statistically different from the corresponding second quarter 2015 rates.

| RESIDENTIAL VACANCY RATES | | | | | | | |
|--|---------------------|---------------------------------|------|--------------------|--|--|--|
| QUARTER | 2nd Quarter 2016 | 2nd Quarter % of 2016 Rate 2015 | | % of Difference | | | |
| United States | 6.7% | 6.8% | 1.7% | 0.1% | | | |

| Outside MSAs | 10.0% | 8.4% | 0.3% | 0.4% | | | |
| In Principal Cities | 6.4% | 7.0% | 0.3% | 0.3% | | | |
| Not In Principal Cities | 6.3% | 6.3% | 0.1% | 0.2% | | | |
| 2nd QUARTER 2016 VACANCY RATES BY REGION | | | | | | | |
| NORTHEAST | MIDWEST | SOUTH | WEST | | | | |
| 5.2% | 7.3% | 8.5% | 4.9% | | | | |

Source: U.S. Census Bureau

Lease Terms and Concessions

The typical lease term is 12 months. At the time of the writing of this report, none of the surveyed comparables were offering concessions.

Turnover Rates

An estimated turnover rate of 15.6 percent was deemed reasonable for the market area. This was based on the Institute of Real Estate Management (IREM) and comparables in the market area. The table below shows the turnover rates of the comparables verified:

| TURNOVER RATES | | | | | |
|--------------------------------|-------------|--|--|--|--|
| Property Name | Avg. Annual | | | | |
| High Point Crossing Apartments | 16.0% | | | | |
| Cedar Grove Apartments | 20.0% | | | | |
| Meadow Wood Place | 14.7% | | | | |
| Forest Ridge | 10.0% | | | | |
| Shadowood Apartments | 18.0% | | | | |
| The Terrace at Edinburgh | 10.0% | | | | |
| Crest at Edinburgh | 20.0% | | | | |
| Trinity Manor Apartments | 16.0% | | | | |
| Average Annual Turnover | 15.6% | | | | |

Likely Impact of Rehabilitated Development on Rental Occupancy Rates

The rehabilitated development will not have an adverse impact on the market area. The subject is an existing development with a stabilized occupancy rate. All of the restricted properties in the market area maintain stabilized occupancy rates. The subject's one-, two- and three-bedroom units are suitable in the market area.

Foreclosure/Abandoned/Vacant Housing

According to www.realtytrac.com, there are currently 147 properties for sale that are foreclosures within the subject's zip code. In October, the number of properties that received a foreclosure filing in 30815 was 13 percent higher than the previous month and 127 percent higher than the prior year. The City of Hephzibah foreclosure rate is 1 in every 455 housing units. Richmond County foreclosure rate is 1 in 731. Therefore, it appears that the foreclosure rate in the city has been increasing. There are two known properties within the vicinity of the property that have been foreclosed upon. In addition, there are no known negative factors impacting the occupancy of the subject within the market area.

Primary Housing Voids

There are no significant housing voids in the market area. There is a demand for housing in the market area as can be seen in the demand portion of this report.

PART IX:

ABSORPTION & STABILIZATION RATES

Absorption Rates

The subject is an existing multifamily development that contains 96 one-, two- and three-bedroom units that is currently 100 percent occupied. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units. The rehabilitation will not displace any tenants, and the existing tenants are expected to remain income-qualified. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units.

PART X:

INTERVIEWS

INTERVIEWS

Housing Interview

The analyst contacted Sirena P. Rogers, Director of Administration with the Augusta Housing Authority on October 19, 2016. According to Ms. Rogers, the Augusta Housing Authority covers the entire Augusta-Richmond County area. Ms. Rogers stated that currently the Augusta Housing Authority has a little over 4,000 vouchers, with several still available. However, she stated that those vouchers are still available due to the budget authority being maximized. She also stated that the housing authority does maintain an active waiting list with over 1,700 people currently, all waiting for Section 8 vouchers only. Ms. Rogers stated that the waiting list is open for a couple project-based housing units and the tenant based housing voucher list is approximately two years or longer. Once an applicant receives a voucher, they have an initial period of 60 days to lease up; however, can apply for an additional two 30 day extension. She stated that there is a need for additional landlord participation and that the current housing stock cannot meet the current demand for affordable housing. She stated that the area is in need of any unit type and that there is a large lack of larger bedroom types, such as four- and five-bedroom units. The phone number for the Sirena P. Rogers with the Augusta Housing Authority is 706-724-5466, extension 3112.

PART XI:

RECOMMENDATIONS AND CONCLUSIONS

RECOMMENDATIONS AND CONCLUSIONS

Project Evaluation

It is the opinion of the analyst that the improvements, the unit mix of one-, two- and three-bedroom units, unit size, unit/project amenities and services are well suited for the primary market area.

Site Evaluation

The site's location is considered average. It is located near a major thoroughfare to the city which provides the site with average visibility and access. It is located in relatively close proximity to medical facilities, schools, shopping, employment, local government facilities and recreational facilities. The site and it improvements are similar to those in the area.

Economic and Demographic Profile

The following describes the demographic and economic profile of the primary market area and the surrounding area:

In 2000, this geographic market area contained an estimated population of 61,192. By 2010, population in this market area had increased by 1.2 percent to 61,912. In 2016, the population in this market area had decreased by 0.6 percent to 61,559. It is projected that between 2016 and 2018, population in the market area will increase 0.5 percent to 61,889. It is projected that between 2018 and 2021, population in the market area will increase 1.3 percent to 62,383.

Between 2000 and 2010, the market area gained approximately 108 households per year. The market area is projected to gain 167 households between 2016 and 2018. The market area is projected to continue to gain households through 2021. The households in the market area are predominantly owner-occupied. The percentage of owner-occupied is projected to remain stable through 2021.

Employment in Richmond County has been decreasing an average of 0.5 percent per year since 2000. Employment in the State of Georgia has been increasing an average of 0.6 percent per year since 2000. The unemployment rate for Richmond County has fluctuated from 4.5 percent to 11.2 percent over the past 10 years. These fluctuations are slightly higher than the unemployment rates for the State of Georgia.

There have not any business closures within the past two years in Hephzibah and Richmond County. In addition, there have been several new and expanding businesses such as Ellefson Transportation Group, Krispy Crème, Hyatt Hotel, Banjo Cold Brew, and Rita's within Richmond County. Overall, it is believed that the economy of Hephzibah will remain stable.

Existing Housing

There were a total of 18 confirmed market-rate and restricted apartment complexes in and surrounding the market area. There were 186 vacant units at the time of the survey out of 2,479 surveyed, for an overall vacancy rate of 7.5 percent. However, Oakview Place current has a higher than usual vacancy rate due to several move-out occurring at once; Benson Estates recently opened in October 2015 and is still in the process of leasing up; and Providence Place Apartments recently went under new management and several tenants were evicted due to nonpayment. Therefore, the overall vacancy rate is not an accurate indication of the market area's vacancy rate when considering these properties. Without considering these properties, the overall vacancy rate would be 2.9 percent.

Adjusted Market Rental Rates

The subject property's proposed net rents are lower than the market rents of \$720 for the one-bedroom units; \$795 for the two-bedroom units; and \$920 for the three-bedroom units. In addition, the subject is a Section 8 property with subsidies for all units. Therefore, tenants will never pay more than 30 percent of their income towards rents. The analyst was able to locate and verify 12 market-rate complex within the subject's market area. It is believed that the comparables used in the rent grid analysis were the best available. Therefore, it is believed that the proposed tax credit rents will be competitive with existing properties.

Demand & Capture Rates

The following chart indicates the net demand and the capture rates:

| AMI | Unit | Income | Units | Total | Supply | Net | NetCapture | Absorption | Average | Market Rents | Proposed |
|---------|-------------|-----------------|----------|--------|--------|--------|------------|------------|-------------|--------------|------------------|
| | Size | Limits | Proposed | Demand | | Demand | Rate | | Market Rent | Band | Rents |
| | | | | | | | | | | Min - Max | |
| 60% AMI | 1 BR/ 1 BA | \$0 to \$28,320 | 16 | 936 | 9 | 927 | 1.7% | N/A | \$720 | N/A | \$709 |
| | 2 BR/ 1 BA | \$0 to \$31,860 | 64 | 645 | 1 | 644 | 9.9% | N/A | \$795 | N/A | \$936 |
| | 3 BR/1.5 BA | \$0 to \$38,280 | 14 | 754 | 5 | 749 | 2.1% | N/A | \$920 | N/A | \$1,077 |
| | All Units | \$0 to \$38,280 | 96 | 2,499 | 15 | 2,484 | 3.9% | N/A | \$720-\$920 | N/A | \$709 to \$1,077 |

The subject is applying for tax credits at 60 percent of the area median income. There are no tax credit comparables located in the market area constructed within the past two years that compete with the subject. If the subject were vacant, it would need to capture 3.9 percent of the demand in the market area for units at 60 percent of the area median income. However, the subject is an existing property that is currently 100 percent occupied. Therefore, the capture rate considering only the vacant units is determined to be a more accurate indication of the capture rate for the subject. The subject contains no tenants who are considered rent burdened as determined under the LIHTC program. It is unlikely that the tenants could find comparable housing with rents low enough to meet the affordability requirements even if there were any tenants that were rent overburdened. Therefore, it is probable that these tenants would chose to remain at the subject. Furthermore, it is not likely that the tenants will be displaced because they meet the maximum

allowable income requirements. The subject is currently 100 percent Section 8 with subsides for all units. Consequently, it was considered appropriate to determine the capture rate estimates considering only vacant units at the property. The capture rate for all vacant units is well below the 30 and 40 percent threshold requirements, and the capture rate for all vacant three-bedroom units is well below the 40 percent threshold requirement and does not exceed the 35 percent threshold requirement for rural areas. As a result, the analyst feels there is a need for affordable housing, and the subject will help fill the need by continuing to offer affordable units to the market area.

Absorption Rates

The subject is an existing multifamily development that contains 96 one-, two- and three-bedroom units that is currently 100 percent occupied. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units. The rehabilitation will not displace any tenants, and the existing tenants are expected to remain income-qualified. The subject maintains a stabilized occupancy rate and does not need to absorb any additional units.

Conclusion

The overall capture rate for the subject if all units were vacant is 3.9 percent. However, the subject is currently 100 percent occupied. It is believed that the net capture rate considering only vacant units is a more accurate reflection of the subject property. The property is currently applying for Low Income Housing Tax Credits. The capture rate was figured by bedroom type and percent of area median income. The capture rates for the units is zero percent considering only the vacant units. It is believed that the subject is a viable development.

Data Sources

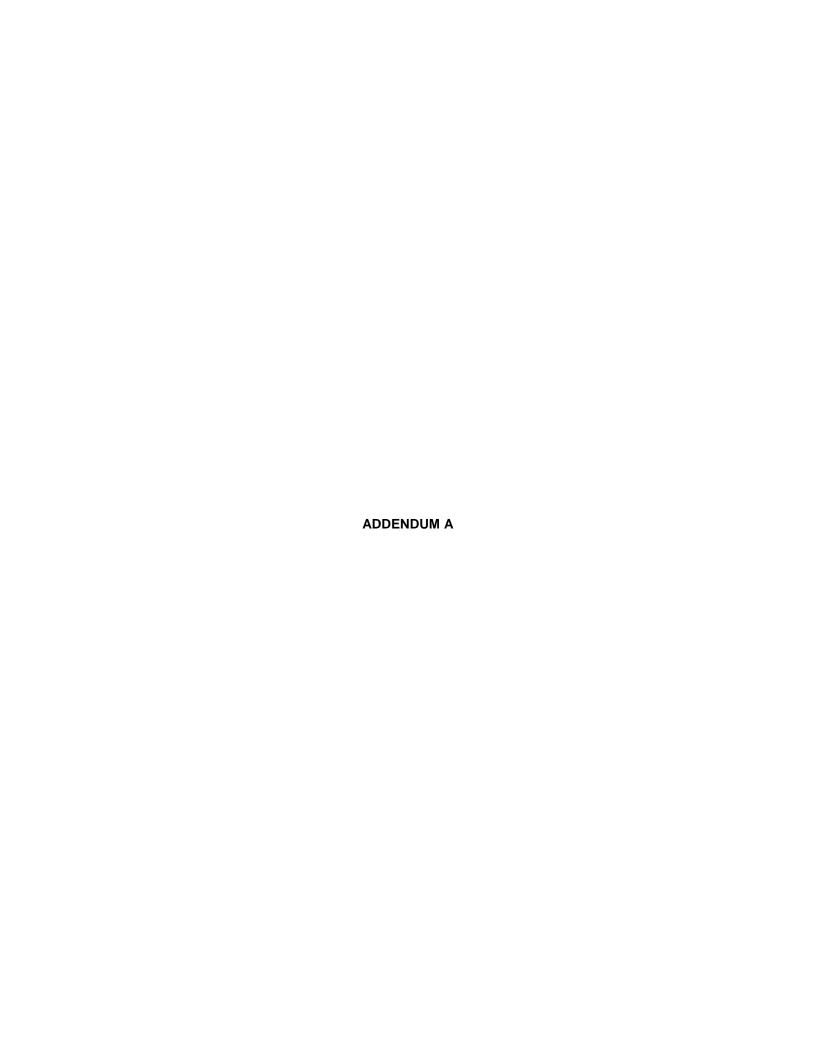

Information used in the market study was obtained from various sources including; the U.S. Census Bureau, Nielsen Claritas; Ribbon Demographics, U.S. Bureau of Labor Statistics, interviews with local town and government officials and interview with local property owners or managers.

I affirm that I have made a physical inspection of the market area and the subject property and that information has been used in the full study of the need and demand for the proposed units. The report was written according to DCA's market study requirements, the information included is accurate and the report can be relied up by DCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

NCHMA Market Study Index

Introduction: Members of the National Council of Housing Market Analysts provide the following checklist referencing various components necessary to conduct a comprehensive market study for rental housing. By completing the following checklist, the NCHMA Analyst certifies that he or she has performed all necessary work to support the conclusions included within the comprehensive market study. By completion of this checklist, the analyst asserts that he/she has completed all required items per section.

MARKET STUDY TERMINOLOGY

Absorption Period

The period of time necessary for a newly constructed or renovated property to achieve the Stabilized Level of Occupancy. The Absorption Period begins when the first certificate of occupancy is issued and ends when the last unit to reach the Stabilized Level of Occupancy has a signed lease. Assumes a typical pre-marketing period, prior to the issuance of the certificate of occupancy, of about three to six months. The month that leasing is assumed to begin should accompany all absorption estimates.

Absorption Rate

The average number of units rented each month during the Absorption Period.

Acceptable Rent Burden

The rent-to-income ratio used to qualify tenants for both income restricted and non-income restricted units. The Acceptable Rent Burden varies depending on the requirements of funding sources, government funding sources, target markets, and local conditions.

Affordable Housing

Housing where the tenant household pays no more than 30 percent of its annual income on Gross Rent.

Amenity

Tangible or intangible benefits offered to a tenant at no fee, typically on-site recreational facilities or planned programs, services and activities.

Annual Demand

The total estimated demand present in the market in any one year for the type of units proposed.

Area Median Income (AMI)

One-hundred percent of the gross median household income for a specific metropolitan statistical area, county or non-metropolitan area established annually by HUD.

Assisted Housing

Housing where the monthly costs to the tenants are subsidized by federal, state or other programs.

Attached Housing

Two or more dwelling units connected with party walls (e.g. townhouses or flats).

Basic Rent

The minimum monthly rent that tenants who do not have rental assistance pay to lease units developed through the USDA-RD Section 515 Program, the HUD Section 236 Program and HUD Section 223 (d)(3) Below Market Interest Rate Program. The Basic Rent is calculated on the rent as the amount of rent required to operate the property, maintain debt service on a subsidized mortgage with a below-market interest rate, and provide a return on equity to the developer in accordance with the regulatory documents governing the property.

Below Market Interest Rate Program (BMIR)

Program targeted to renters with income not exceeding 80 percent of area median income by limiting rents based on HUD's BMIR Program requirements and through the provision of an interest reduction contract to subsidize the market interest rate to a below-market rate. Interest rates are typically subsidized to effective rates of one percent or three percent.

Capture Rate

The percentage of age, size, and income qualified renter households in the Primary Market Area that the property must capture to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. The Capture Rate is calculated by dividing the total number of units at the property by the total number of age, size and income qualified renter households in the Primary Market Area. See Penetration Rate for rate for entire market area.

Census Tract

A small, relatively permanent statistical subdivision delineated by a local committee of census data users for the purpose of presenting data. Census tract boundaries normally follow visible features, but may follow governmental unit boundaries and other non-visible features; they always nest within counties. They are designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions at the time of establishment. Census tracts average about 4,000 inhabitants.

Central Business District (CBD)

The center of commercial activity within a town or city; usually the largest and oldest concentration of such activity.

Community Development Corporation (CDC)

Entrepreneurial institution combining public and private resources to aid in the development of socio-economically disadvantaged areas.

Comparable Property

A property that is representative of the rental housing choices of the subject's Primary Market Area and that is similar in construction, size, amenities, or age. These Comparables and Competitives are generally used to derive market rent.

Competitive Property

A property that is comparable to the subject and that competes at nearly the same rent levels and tenant profile, such as age, family or income.

Concession

Discount given to a prospective tenant to induce the tenant to sign a lease. Concessions typically are in the form of reduced rent or free rent for a specified lease term or for free amenities which are normally charged separately (i.e. washer/dryer, parking).

Condominium

A form of joint ownership and control of property in which specified volumes of space (for example, apartments) are owned individually while the common elements of the property (for example, outside walls) are owned jointly.

Contract Rent

- 1. The actual monthly rent payable by the tenant, including any rent subsidy paid on behalf of the tenants, to the owner, inclusive of all terms of the lease (HUD & RD).
- 2. The monthly rent agreed to between a tenant and a landlord (Census).

Demand

The total number of households in a defined market area that would potentially move into proposed new or renovated housing units. These households must be of the appropriate age, income, tenure and size for a specific proposed development. Components of demand vary and can include household growth; turnover, those living in substandard conditions, rent overburdened households, and demolished housing units. Demand is project specific.

Difficult Development Area (DDA)

An area designated by HUD as an area that has high construction, land, and utility costs relative to the Area Median Gross Income. A project located in a DDA and utilizing the Low Income Housing Tax Credit may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Detached Housing

A freestanding dwelling unit, typically single-family, situated on its own lot.

Effective Rents

Contract Rent less concessions.

Elderly or Senior Housing

Housing where (1) all the units in the property are restricted for occupancy by persons 62 years of age or older or (2) at least 80 percent of the units in each building are restricted for occupancy by households where at least one household member is 55 years of age or older and the housing is designed with amenities and facilities designed to meet the needs of senior citizens.

Extremely Low Income

Person or household with income below 30 percent of Area Median Income adjusted for household size.

Fair Market Rent (FMR)

The estimates established by HUD of the Gross Rents (Contract Rent plus Tenant Paid Utilities) needed to obtain modest rental units in acceptable condition in a specific county or metropolitan statistical area. HUD generally sets FMR so that 40 percent of the rental units have rents below the FMR. In rental markets with a shortage of lower priced rental units HUD may approve the use of Fair Market Rents that are as high as the 50th percentile of rents.

Garden Apartments

Apartments in low-rise buildings (typically two to four stories) that feature low density, ample open-space around the buildings, and on-site parking.

Gross Rent

The monthly housing cost to a tenant which equals the Contract Rent provided for in the lease plus the estimated cost of all Tenant Paid Utilities.

High-rise

A residential building having more than ten stories.

Household

One or more people who occupy a housing unit as their usual place of residence.

Household Trends

Changes in the number of households for a particular area over a specific period of time, which is a function of new household formations (e.g. at marriage or separation) and in average household size.

Housing Unit

House, apartment, mobile home, or group of rooms used as a separate living quarters by a single household.

Housing Choice Voucher (Section 8 Program)

Federal rent subsidy program under Section 8 of the U.S. Housing Act which issues rent vouchers to eligible households to use in the housing of their choice. The voucher payment subsidizes the difference between the Gross Rent and the tenant's contribution of 30 percent of adjusted income (or 10 percent of gross income, whichever is greater). In cases where 30 percent of the tenants' income is less than the utility allowance, the tenant will receive an assistance payment. In other cases, the tenant is responsible for paying his share of the rent each month.

Housing Finance Agency (HFA)

State or local agencies responsible for financing housing and administering Assisted Housing programs.

HUD Section 8 Program

Federal program that provides project based rental assistance. Under the program HUD contracts directly with the owner for the payment of the difference between the Contract Rent and a specified percentage of tenants adjusted income.

HUD Section 202 Program

Federal program, which provides direct capital assistance (i.e. grant) and operating or rental assistance to finance housing designed for occupancy by elderly households who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization. Units receive HUD project based rental assistance that enables tenants to occupy units at rents based on 30 percent of tenant income.

HUD Section 811 Program

Federal program, which provides direct capital assistance and operating or rental assistance to finance housing designed for occupancy by persons with disabilities who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization.

HUD Section 236 Program

Federal program which provides interest reduction payments for loans which finance housing targeted to households with income not exceeding 80 percent of area median income who pay rent equal to the greater of Basic Rent of 30 percent of their adjusted income. All rents are capped at a HUD approved market rent.

Income Band

The range of incomes of households that can pay a specific rent but do not have more income than is allowed by the Income Limits of a particular housing program. The minimum household income typically is based on a defined Acceptable Rent Burden percentage and the maximum typically is pre-defined by specific programmatic requirements or by general market parameters.

Income Limits

Maximum household income by county or Metropolitan Statistical Area, adjusted for household size and expressed as a percentage of the Area Median Income for the purpose of establishing an upper limit for eligibility for a specific housing program. Income Limits for federal, state and local rental housing programs typically are established at 30, 50, 60 or 80 percent of AMI. HUD publishes Income Limits each year for 30 percent median, Very Low Income (50%), and Low-Income (80%), for households with 1 through 8 people.

Infrastructure

Services and facilities including roads, highways, water, sewerage, emergency services, parks and recreation, etc. Infrastructure includes both public and private facilities.

Low Income

Person or household with gross household income below 80 percent of Area Median Income adjusted for household size.

Low Income Housing Tax Credit

A program to generate equity for investment in affordable rental housing authorized pursuant to Section 42 of the Internal Revenue Code, as amended. The program requires that a certain percentage of units built by restricted for occupancy to households earning 60 percent of less of Area Median Income, and that the rents on these units be restricted accordingly.

Low Rise Building

A building with one to three stories.

Market Advantage

The difference, expressed as a percentage, between the estimated market rent for an apartment property without income restrictions and the lesser of (a) the owner's proposed rents or (b) the maximum rents permitted by the financing program for the same apartment property.

Market Analysis

A study of real estate market conditions for a specific type of property.

Market Area or Primary Market Area

A geographic area from which a property is expected to draw the majority of its residents.

Market Demand

The total number of households in a defined market area that would potentially move into new or renovated housing units. Market demand is not project specific and refers to the universe of tenure appropriate households, independent of income. The components of market demand are similar to those used in determining demand.

Market Rent

The rent that an apartment, without rent or income restrictions or rent subsidies, would command in the open market considering its location, features, amenities. Market rent should be adjusted for concessions and owner paid utilities included in the rent.

Market Study

A comprehensive review of the housing market in a defined market area. A market study can be used to determine the demand for specific proposed development or to examine the overall condition of an area's housing market. Project specific market studies are often used by developers, syndicators, and government entities to determine the appropriateness of a proposed development, whereas market specific market studies are used to determine what housing needs, if any, exist within a specific geography. At a minimum, market studies include a review of location, economic conditions, demographics, and existing and proposed housing stock.

Marketability

The manner in which the subject fits into the market; the relative desirability of a property (for sale or lease) in comparison with similar or competing properties in the area.

Market Vacancy Rate - Physical

Average number of apartment units in any market which are unoccupied divided by the total number of apartment units in the same Market Area, excluding units in properties which are in the lease-up stage.

Market Vacancy Rate - Economic

Percentage of rent loss due to concessions and vacancies.

Metropolitan Statistical Area (MSA)

A geographic entity defined by the federal Office of Management and Budget, for use by federal statistical agencies, based on the concept of a core area with a large population nucleus, plus adjacent communities having a high degree of economic and social integration with that core. Qualification of an MSA requires the presence of a city with 50,000 or more inhabitants, or the presence of an Urbanized Area (UA) and a total population of at least 100,000 (75,000 in New England). The county or counties containing the largest city and surrounding densely settled territory are central counties of the MSA. Additional outlying counties qualify to be included in the MSA by meeting certain other criteria of metropolitan character, such as a specified minimum population density or percentage of the population that is urban.

Mid-rise

A building with four to ten stories.

Mixed Income Property

An apartment property containing (1) both income restricted and unrestricted units or (2) units restricted at two or more Income Limits (i.e. Low Income Tax Credit property with income limits of 30, 50 and 60 percent).

Mobility

The ease with which people move from one location to another.

Moderate Income

Person or household with gross household income between 80 and 120 percent of Area Median Income adjusted for household size.

Move-up Demand

An estimate of how many consumers are able and willing to relocate to more expensive or desirable units, such as tenants who move up from Class C properties to Class B; and Class B tenants that move up to Class A properties; and tenants that move from Class C and B properties to a new superior Low Income Tax Credit property.

Multi-family

Structures that contain more than two or more housing units.

Neighborhood

An area of a city or town with common demographic and economic features that distinguish it from adjoining areas.

Net Rent (also referred to as Contract or Lease Rent)

Gross Rent less Tenant Paid Utilities.

Penetration Rate

The percentage of age and income qualified renter households in the Primary Market Area that live in all existing and proposed properties, to be completed within six months of the subject, and which are competitively priced to the subject that must be captured to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. See Capture Rate for property specific rate.

Pent-up Demand

A market in which there is a scarcity of supply and vacancy rates are very low.

Population Trends

Changes in population levels for a particular area over a specific period of time – which is a function of the levels of births, deaths, and net migration.

Primary Market Area

See Market Area

Programmatic Rents

The proposed rents for a Tax Credit or other income restricted property relative to comparable market rate properties and rents being achieved at another Low Income Housing Tax Credit or other income restricted properties in the market. Can be no greater than maximum rents permitted by the Low Income Housing Tax Credit or other program regulations.

Project Based Rent Assistance

Rental assistance from a federal, state or local program that is allocated to the property or a specific number of units in the property and is available to each income eligible tenant of the property or an assisted unit.

Public Housing or Low Income Conventional Public Housing

HUD program administered by local (or regional) Housing Authorities which serves Low- and Very-Low Income Households with rent based on the same formula used for HUD Section 8 assistance.

Qualified Census Tract (QCT)

Any census tract (or equivalent geographic area defined by the Bureau of the Census) in which at least 50 percent of households have an income less than 60 percent of Area Median Income or where the poverty rate is at least 25 percent. A project located in a QCT and receiving Low Income Housing Tax Credits may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Rural Development (RD) Market Rent

A monthly rent that can be charged for an apartment under a specific USDA-RD housing program, that reflects the agency's estimate of the rent required to operate the property, maintain debt service on an un-subsidized mortgage and provide an adequate return to the property owner. This rent is the maximum rent that a tenant can pay at an RD property.

Rural Development (RD) Program

Federal program which provides low interest loans to finance housing which serves low- and moderate-income persons in rural areas who pay 30 percent of their adjusted income on rent or the basic rent, whichever is the higher (but not exceeding the market rent). The Program may include property based rental assistance and interest reduction contracts to write down the interest on the loan to as low as one percent.

Redevelopment

The redesign or rehabilitation of existing properties.

Rent Burden

Gross rent divided by gross monthly household income.

Rent Burdened Households

Households with Rent Burden above the level determined by the lender, investor, or public program to be an acceptable rent-to-income ratio.

Restricted Rent

The rent charged under the restrictions of a specific housing program or subsidy.

Saturation

The point at which there is no longer demand to support additional units.

Secondary Market Area

The portion of a market area that supplies additional support to an apartment property beyond that provided by the Primary Market Area.

Single-Family Housing

A dwelling unit, either attached or detached, designed for use by one household and with direct access to a street. It does not share heating facilities or other essential building facilities with any other dwelling.

Special Needs Population

Specific market niche that is typically not catered to in a conventional apartment property. This population should exhibit certain criteria, which can be well defined, in order, for example, to assess the need and demand from this source. Examples of special needs populations include: substance abusers, visually impaired person or persons with mobility limitations.

Stabilized Level of Occupancy

The underwritten or actual number of occupied units that a property is expected to maintain after the initial rent-up period, expressed as a percentage of the total units.

State Date Center (SDC)

A state agency or university facility identified by the governor of each state to participate in the Census Bureau's cooperative network for the dissemination of the census data.

Subsidy

Monthly income received by a tenant or by an owner on behalf of a tenant to pay the difference between the apartment's Contract Rent and the amount paid by the tenant toward rent.

Substandard Conditions

Housing conditions that are conventionally considered unacceptable which may be defined in terms of lacking plumbing facilities, one or more major systems not functioning properly, or overcrowded conditions.

Target Income Band

The Income Band from which the subject property will draw tenants.

Target Population

Market niche a development will appeal or cater to. State agencies often use Target Population to refer to various income set asides, elderly v. family, etc.

Tenant

One who rents real property from another.

Tenant Paid Utilities

The cost of utilities necessary for the habitation of a dwelling unit, which are paid by the tenant. Tenant Paid Utilities do not include costs for telephone or cable service.

Tenure

The distinction between owner-occupied and renter-occupied housing units.

Townhouse (or Row House)

Single-family attached residence separated from another by party walls, usually on a narrow lot offering small front and back-yards; also called a row house.

Turnover

- An estimate of the number of housing units in a Market Area as a percentage of total housing units in the Market Area that will likely change occupants in any one year. See Vacancy Period.
- 2. **Turnover Period** The percent of occupants in a given apartment complex that move in one year.

Unmet Housing Need

New units required in the Market Area to accommodate household growth, homeless households, and housing in substandard conditions.

Unrestricted Rents

The recommended rents for the market rate units at a Mixed-Income Property.

Vacancy Period

The amount of time that an apartment remains vacant and available for rent.

Vacancy Rate - Economic

Maximum potential revenue less actual rent revenue divided by maximum potential rent revenue.

Vacancy Rate - Physical

The number of total habitable units that are vacant divided by the total number of units in the property.

Very Low Income

Person or household whose gross household income does not exceed 50 percent of Area Median Income adjusted for household size.

Zoning

Classification and regulation of land by local governments according to use categories (zones); often also includes density designations.

DIRECTIONS FOR COMPLETING THIS FORM

- (1) All line items and columns must be complete with either N/A (not applicable) or a description, percentage, quantity, unit, and cost. This form represents the minimum detail of scope that must be reported; additional line items may be added. Quantities and the approximate percentage of demolition or replacement are of utmost importance. These must clearly demonstrate the extent of the proposed work within the context of the entire existing property.
- (2) Contractor Services shall not be included on this form.
- (3) No new construction should be included in this form; the construction of new community buildings and/or additional units should not be included on this form.
- (4) The total costs should tie back to the 'Uses' statement in the Application.
