Jason Maddox Executive Vice President MACO Development Co. 111 N. Main Street Clarkton, Missouri 63837

Re: Application Market Study for Oak Landing, located in Bainbridge, Decatur County, Georgia

Dear Mr. Maddox:

At your request, Novogradac & Company LLP performed a study of the multifamily rental market in the Bainbridge, Decatur County, Georgia area relative to the above-referenced Low-Income Housing Tax Credit (LIHTC) project.

The purpose of this market study is to assess the viability of the proposed 48-unit senior LIHTC project. It will be a newly constructed affordable LIHTC project, with 48 revenue generating units, restricted to senior households ages 55 and older earning 50 and 60 percent of the Area Median Income (AMI) or less. The following report provides support for the findings of the study and outlines the sources of information and the methodologies used to arrive at these conclusions.

The scope of this report meets the requirements of Georgia Department of Community Affairs (DCA), including the following:

- Inspecting the site of the proposed Subject and the general location.
- Analyzing appropriateness of the proposed unit mix, rent levels, available amenities and site.
- Estimating market rent, absorption and stabilized occupancy level for the market area.
- Investigating the health and conditions of the multifamily market.
- Calculating income bands, given the proposed Subject rents.
- Estimating the number of income eligible households.
- Reviewing relevant public records and contacting appropriate public agencies.
- Analyzing the economic and social conditions in the market area in relation to the proposed project.
- Establishing the Subject Primary and Secondary Market Area(s) if applicable.
- Surveying competing projects, Low-Income Housing Tax Credit (LIHTC) and market rate.

Novogradac & Company LLP adheres to the market study guidelines promulgated by the National Council of Housing Market Analysts (NCHMA).

This report contains, to the fullest extent possible and practical, explanations of the data, reasoning, and analyses that were used to develop the opinions contained herein. The report also includes a thorough analysis of the scope of the study, regional and local demographic and economic studies, and market analyses including conclusions. The depth of discussion contained in the report is specific to the needs of the client. Information included in this report is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market. This report is completed in accordance with DCA

A. EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

1. Project Description

Oak Landing will be a newly constructed senior property located on S Russ Street in Bainbridge, Decatur County, Georgia, which will consist of six, one-story, residential buildings in addition to one community building.

The following table illustrates the proposed unit mix.

| | | | PROPOSE | D RENTS | | | |
|-----------|-------------------|--------------------|-------------|-----------------------------|---------------|---|----------------------------------|
| Unit Type | Unit Size (SF) | Number of Units | Asking Rent | Utility Allowance (1) | Gross Rent | 2018 LIHTC Maximum Allowable Gross Rent | 2019 HUD Fair Market Rents |

Notes (1) Source of Utility Allowance provided by the Developer.

The Subject's proposed rents at the 50 and 60 percent of AMI levels are below the maximum allowable levels. The Subject's location is considered a rural area as determined by USDA. Therefore, the Subject is eligible to use the national non-metropolitan rent and income limits, which are higher than the published rent and income limits for Decatur County. The Subject will offer generally superior in-unit amenities in comparison to the LIHTC and market rate comparable properties as all of these developments lack in-unit washers and dryers. The Subject's community amenity package will be similar to the community amenities offered by the LIHTC properties but superior to the market rate property offerings, as these developments lack business centers and exercise facilities, although they offer swimming pools. Overall we believe that the proposed amenities will allow the Subject to effectively compete in the LIHTC market.

2. Site Description/Evaluation

The Subject site is located on the west side of Russ Street. The Subject site is currently vacant wooded land and improved with one single-family home. Adjacent north, east and south of the Subject site are singlefamily homes exhibiting average condition. Farther north, there are single-family homes and commercial uses including a Family Dollar and Winn-Dixie exhibiting average condition. Several blocks northeast is downtown Bainbridge including commercial uses and local governmental offices. East of the Subject site there are single-family homes exhibiting average condition, and a house of worship. Several blocks east is Bainbridge Mall and Bainbridge Middle School. South of the Subject site are single-family homes exhibiting average condition. West of the Subject site are several commercial uses consisting of a Domino's Pizza, Grocery Outlet, a Salvation Army and a funeral home. The commercial uses are in average to good condition. West, beyond the commercial uses are single-family homes exhibiting average condition. Based on our inspection of the neighborhood, retail appeared to be 80 percent occupied. Crime risk indices in the PMA are well below national levels. Visibility of the Subject site is average, with frontage along Russ Street and Green Street. The Subject site is located on the west side of Russ Street. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 69 out of 100, indicating some errands can be accomplished by foot. The uses surrounding the Subject are in average condition and the site has excellent proximity to locational amenities, which are all within 1.3 miles of the Subject site. The Subject is located one mile from Memorial Hospital and Manor, which is one of the largest employers in the community. The Subject site is considered a desirable building site for rental housing.

NOVOGRADAC & COMPANY ILP

3. Market Area Definition

The PMA is defined by the Georgia-Florida state line to the south; the Georgia-Alabama state line and State Highway 91 to the west; State Highway 65 to the north; and State Highways 112 and 111 to the east. This area includes the county of Decatur as well as portions of Grady, Mitchell, Baker, Miller and Seminole Counties. Portions of the communities of Donalsonville, Colquitt and Cairo are included in the PMA. The distances from the Subject to the farthest boundaries of the PMA in each direction are listed as follows:

North: 21 miles East: 28 miles South: 22 miles West: 27 miles

The PMA is defined based on interviews with the local housing authority and property managers at comparable properties. Property managers reported that tenants, particularly senior tenants, originate from Decatur and neighboring counties. Many tenants are reported to be from Florida and Alabama. While we do believe the Subject will experience leakage from outside the PMA boundaries, per the 2019 market study guidelines, we do not account for leakage in our demand analysis found later in this report. The farthest PMA boundary from the Subject is approximately 28 miles. The SMA is defined as the Bainbridge, GA Micropolitan Statistical Area (SMA), which is coterminous with Decatur County and encompasses 623 square miles.

4. Community Demographic Data

The population in the PMA decreased by 6.0 percent between 2000 and 2018, compared to the 4.3 percent decrease in the SMA and 17.5 percent increase across the nation. The population in the PMA is 45,902 and is projected to be 44,745 in September 2021. However, the senior population in the PMA is currently 14,499 and is projected to be 14,885 by September 2021. The percentage of senior renter households in the PMA increased between 2000 and 2018, and is estimated to be 26.1 percent as of 2018. This is well above the estimated 15 percent of senior renter households across the nation. The large percentage of senior renter households in the PMA bodes well for the Subject's development.

According to *RealtyTrac* statistics, one in every 2,312 housing units nationwide was in some stage of foreclosure as of March 2019. Foreclosure data was not immediately available for Bainbridge, while Decatur County is experiencing foreclosure rate of one in every 940 homes and Georgia experienced one foreclosure in every 2,091 housing units. Overall, Decatur is experiencing a higher foreclosure relative rate to the state of Georgia and nation. The Subject's neighborhood does not have a significant amount of abandoned or vacant structures that would impact the marketability of the Subject.

5. Economic Data

The PMA and Decatur County are economically reliant on healthcare/social assistance, retail trade, manufacturing and educational services, which compose 46.1 percent of total employment in the PMA. Of these four industries, healthcare and educational services are historically less susceptible to job losses during recessionary conditions. However, the manufacturing and retail trade industries typically experience losses of employment during economic contractions.

Total employment in the SMA contracted in the years preceding the national recession, with annual job growth lagging the overall nation in all but two years between 2003 and 2007. The effects of the recessionary periods as well as the great recession were particularly pronounced in the SMA, which suffered a 9.3 percent contraction in employment growth (2003-2009), well above the 4.8 percent contraction reported by the nation as a whole during the great recession (2007-2010). Since 2012, average employment growth in the SMA trailed the nation in all but two years. As of February 2019, employment in

the SMA is below record levels; and is declining at an annualized rate of 1.2 percent, compared to a 1.1 percent increase across the nation. In part due to the declining population, the local economy has not fully recovered from the national recession. Nonetheless, the Subject is well-positioned to serve a lower income population of seniors in the PMA, many of whom may no longer be in the workforce.

6. Project-Specific Affordability and Demand Analysis

The following table illustrates the demand and capture rates for the Subject's proposed units.

| Unit Type | Minimum Income | Maximum Income | Units Proposed | Total Demand | Supply | Net Demand | Capture Rate | Proposed Rents |
|--------------|-------------------|-------------------|-------------------|-----------------|--------|---------------|-----------------|-------------------|
| 1BR @50% | \$16,110 | \$23,350 | 2 | 29 | 0 | 29 | 6.9% | \$441 |
| 1BR @60% | \$16,710 | \$24,540 | 10 | 38 | 0 | 38 | 26.4% | \$461 |
| 1BR Overall | \$16,110 | \$24,540 | 12 | 41 | 0 | 41 | 29.2% | - |
| 2BR @50% | \$19,410 | \$23,350 | 8 | 79 | 0 | 79 | 10.2% | \$525 |
| 2BR @60% | \$20,670 | \$28,020 | 28 | 103 | 0 | 103 | 27.3% | \$567 |
| 2BR Overall | \$19,410 | \$28,020 | 36 | 111 | 0 | 111 | 32.4% | - |
| @50% Overall | \$16,110 | \$23,350 | 10 | 108 | 0 | 108 | 9.3% | - |
| @60% Overall | \$16,710 | \$28,020 | 38 | 140 | 0 | 140 | 27.0% | - |
| Overall | \$16,110 | \$28,020 | 48 | 152 | 0 | 152 | 31.6% | - |

CAPTURE RATE ANALYSIS CHART

We believe these calculated capture rates are reasonable, particularly as these calculations do not consider demand from outside the PMA or standard rental household turnover. These capture rates are all below DCA thresholds.

7. Competitive Rental Analysis

Comparable properties are examined on the basis of physical characteristics, i.e. building type, age/quality, level of common amenities, absorption, as well as similarity in rent. We attempted to compare the Subject to complexes from the competing market to provide a broader picture of the health and available supply in the market. Our competitive survey includes nine "true" comparable properties containing 673 units.

The availability of LIHTC data is considered average. There are only five unsubsidized LIHTC properties in the PMA. We included two of these properties. We were unable to contact Friendship Crossing, a family LIHTC property in Donalsonville, or The Village at Wedgewood, a senior LIHTC property in Cairo, despite numerous attempts. Ridgefield Place was also excluded as this property offers only three and four-bedroom single-family homes and is not considered competitive with the Subject. We included two LIHTC properties in Bainbridge as well as three LIHTC properties located in Camilla, approximately 31 miles from the Subject site, two of which target seniors. Senior tenants were also reported at the surveyed family LIHTC properties. The comparable LIHTC properties are all located between 1.2 and 31.8 miles of the proposed Subject.

The availability of market rate data is also considered average. There are few market rate housing developments in the PMA and almost none that were recently constructed. We excluded a number of market rate properties located in Bainbridge as we were unable to contact management. We included one market rate property in Bainbridge and three properties in Thomasville, approximately 35 miles away. The comparable market rate properties are all located between 1.6 and 36.8 miles of the proposed Subject.

When comparing the Subject's rents to the average comparable rent, we do not include surveyed rents at lower AMI levels given that this artificially lowers the average surveyed rent. Including rents at lower AMI levels does not reflect an accurate average rent for rents at higher income levels. For example, if the Subject

offers rents at the 50 and 60 percent of AMI levels, and there is a distinct difference at comparable properties between rents at the two AMI levels, we do not include the 50 percent of AMI rents in the average comparable rent for the 60 percent of AMI comparison.

The overall average and the maximum and minimum adjusted rents for the comparable properties surveyed are illustrated in the table below in comparison with net rents for the Subject.

| | 5 | | 10 001 | | 15 | |
|-----------|-------|-------------|----------|----------|----------|--------------|
| Unit Type | Rent | Subject Pro | Surveyed | Surveyed | Surveyed | Subject Rent |
| onicipe | Level | Forma Rent | Min | Max | Average | Advantage |
| 1BR / 1BA | @50% | \$441 | \$306 | \$825 | \$526 | 19% |
| 1BR / 1BA | @60% | \$461 | \$336 | \$825 | \$580 | 26% |
| 2BR / 2BA | @50% | \$525 | \$394 | \$925 | \$587 | 12% |
| 2BR / 2BA | @60% | \$567 | \$440 | \$925 | \$646 | 14% |

SUBJECT COMPARISON TO COMPARABLE RENTS

As illustrated the Subject's proposed 50 and 60 percent rents as well as the Subject's unrestricted rents are below the surveyed average when compared to the comparables, both LIHTC and market rate. The Subject's proposed rents have an advantage of 12 to 26 percent over the surveyed average of the comparable rents. All of the Subject's proposed LIHTC rents are below the surveyed range of market rents at the unrestricted properties.

Only one of the surveyed unrestricted properties is located in Bainbridge. College Plaza Apartments is a 34unit, development located 1.6 miles east of the Subject site, in a neighborhood considered similar relative to the Subject's location. The property was built in 2007, and currently exhibits slightly inferior condition relative to the Subject, which will be new construction. The manager at College Plaza Apartments reported the property as fully occupied, indicating the current rents are well accepted in the market. College Plaza Apartments offers no notable amenities not planned for the proposed Subject. However, the Subject will offer in-unit washer/dryers, garbage disposals, a business center, a community room, and a fitness center, none of which are provided by College Plaza Apartments. The Subject's proposed rents will offer an advantage of 13 to 22 percent over the rents at this property, which is reasonable given the Subject's proposed superiority.

Ashley Park Apartments is achieving the highest unrestricted rents of the surveyed properties. This development is an 84-unit, midrise development located 33.9 miles east of the Subject site, in a neighborhood considered slightly superior relative to the Subject's location based on its greater access to commercial amenities and employment centers. The property was built in 2013, and currently exhibits similar condition relative to the Subject, which will be new construction. The manager at Ashley Park Apartments reported the property as fully occupied, indicating the current rents are well accepted in the market. Ashley Park Apartments offers walk-in closets, a playground, a swimming pool, and garages, all of which the proposed Subject will lack. However, the Subject will offer in-unit washer/dryers, a business center, and a fitness center, none of which are provided by Ashley Park Apartments. The in-unit and property amenity packages offered by Ashley Park Apartments are both considered slightly inferior relative to the Subject's amenities. The Subject's proposed rents will offer a significant advantage of 63 to 76 percent over the rents at this property, which we believe is reasonable and indicates the Subject's rents will offer a significant advantage in the market.

8. Absorption/Stabilization Estimate

We were able to obtain information regarding absorption paces from three of the comparable properties as well as two excluded properties in the region in for the past 12 years. This information is illustrated in the following table.

NOVOGRADAC & COMPANY LLP

| | | ABSORPTIO | N | | |
|---------------------------|-----------------|-----------|------|-------------|-----------------------------|
| Property Name | Rent Program | Tenancy | Year | Total Units | Units Absorbed Per Month |
| Campbell Place Apartments | LIHTC | Family | 2016 | 52 | 6 |
| Pine Ridge Estates | LIHTC | Family | 2008 | 38 | 11 |
| Courtes De Emerald II | LIHTC | Family | 2008 | 32 | 5 |
| Kirby Creek Apartments | LIHTC | Family | 2007 | 56 | 14 |
| Cottonwood Pointe | LIHTC | Senior | 2007 | 48 | 6 |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed, new construction, age-restricted building. Only one LIHTC property that opened in the last decade was able to reported absorption information. Campbell Place Apartments, located in Camilla, reported an absorption pace of six units per month. The remaining LIHTC properties reported absorption paces of five to 14 units per month. We anticipate the Subject would operate with an absorption pace most similar to Campbell Place Apartments. We believe an estimated absorption pace of five units per month in reasonable, particularly given the rapid leasing of down units reported by Courtes de Emerald I and II. This would indicate an absorption period of nine months for the proposed Subject.

9. Overall Conclusion

Based upon our market research, demographic calculations and analysis, we believe there is adequate demand for the Subject property as proposed. The LIHTC comparables are experiencing a weighted average vacancy rate of 7.8 percent, which is considered elevated. However, the majority of the vacancies at Campbell Place Apartments, Cottonwood Pointe and Pine Ridge Estates are pre-leased. The majority of the vacancies in the market are at Courtes de Emerald I and II, which recently came under new management and has been rapidly leasing units that were vacant under previous management. The contact at this property expects to maintain a waiting list in the near future and the remaining LIHTC properties reported waiting lists of up to 50 households. These factors indicate demand for affordable housing, particularly new construction senior housing. The Subject will offer generally similar to superior in-unit amenities in comparison to the LIHTC and market rate comparable properties and slightly superior property amenities. The Subject will offer in-unit washers and dryers, balconies/patios, a business center, community room and exercise facility, which several of the comparable properties lack. Overall, we believe that the proposed amenities will allow the Subject to effectively compete in the senior LIHTC market. As new construction, the Subject will be in excellent condition upon completion and will be considered similar to superior in terms of condition to the majority of the comparable properties. There are no age-restricted LIHTC properties in Bainbridge and the senior properties in Camilla reported strong demand for age-restricted affordable housing and reported tenants originating from the Bainbridge area. Additionally, senior tenants were reported at the family properties surveyed in Bainbridge. Therefore, we believe the Subject will fill a void of age-restricted housing in the market. In general, the Subject will be slightly superior to superior to the comparable properties. The Subject's proposed rents are at the top of the surveyed LIHTC market but we believe these rents are reasonable based on outsized demand reported by the comparable properties. Given the Subject's anticipated superior condition relative to the competition and the demand for affordable housing evidenced by waiting lists and low vacancy at some of the LIHTC comparable properties, we believe that the Subject is feasible as proposed. We believe that it will fill a void in the market and will perform well.

.....

| 10. Scope of Renovations: | The Subject will be new construction. |
|-----------------------------|--|
| 11. Placed in Service Date: | Construction on the Subject is expected to begin in September 2020 and be completed in September 2021. We will utilize 2021 as the market entry year for demographic purposes according to the DCA Market Study Manual. |
| Conclusion: | The Subject will be an excellent-quality one-story development, superior to most of the inventory in the area. As new construction, the Subject will not suffer from deferred maintenance, functional obsolescence, or physical deterioration. |

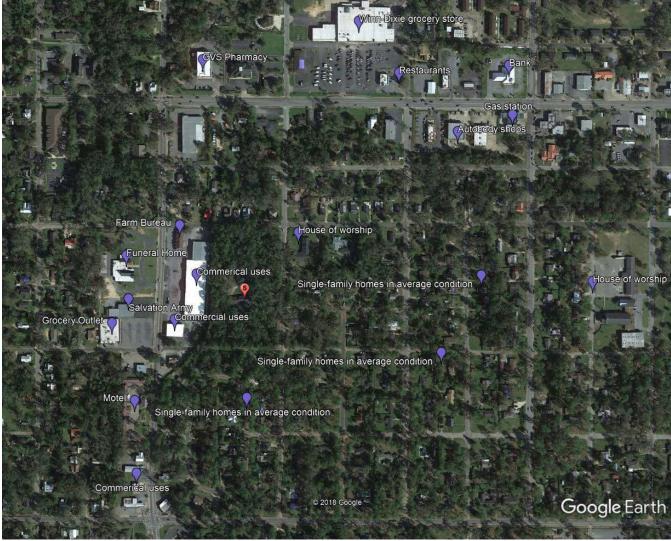

C. SITE EVALUATION

- **1.** Date of Site Visit and Name of Molly Carpenter visited the site on April 23, 2019. Inspector:
- 2. Physical Features of the Site: The following illustrates the physical features of the site.

Frontage:The Subject site has frontage along the south side of Evans Street,
the west side of Russ Street and the north side of Green Street.

Visibility/Views: The Subject will be located on the west side of Russ Street. Visibility and views from the site will be good and include single-family homes in average condition, a house of worship, and the rear of commercial buildings exhibiting average condition. The Subject site offers good frontage along three streets, but visibility will be average due to light traffic flows on the adjacent streets.

Surrounding Uses: The following map illustrates the surrounding land uses.

Source: Google Earth, April 2019.

The Subject site is located on the west side of Russ Street. The Subject site is currently vacant wooded land and improved with one single-family home. Adjacent north, east and south of the Subject site are single-family homes exhibiting average condition. East of the Subject site there is also a house of worship. West of the Subject site are several commercial uses consisting of a Domino's Pizza, Grocery Outlet, a Salvation Army and a funeral home. The commercial uses are in average to good condition. Based on our inspection of the neighborhood, retail appeared to be 80 percent occupied. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 69 out of 100, indicating some errands can be accomplished by foot. The uses surrounding the Subject are in average condition and the site has excellent proximity to locational amenities, which are all within 1.3 miles of the Subject site. The Subject site is considered a desirable building site for rental housing.

Positive/Negative Attributes of Site: The Subject's excellent proximity to retail and other locational amenities is considered a positive attribute. The Subject site is located 0.1 miles from Scott Street, which turns into Tallahassee Parkway going south. Tallahassee Parkway provides access to the City of Tallahassee, approximately 40 miles south of the Subject site.

- **3.** Physical Proximity to Locational Amenities: The Subject is located within 1.3 miles of all locational amenities. Additionally, it is one mile from Memorial Hospital and Manor, which is a nearby major employer.
- 4. Pictures of Site and Adjacent Uses:

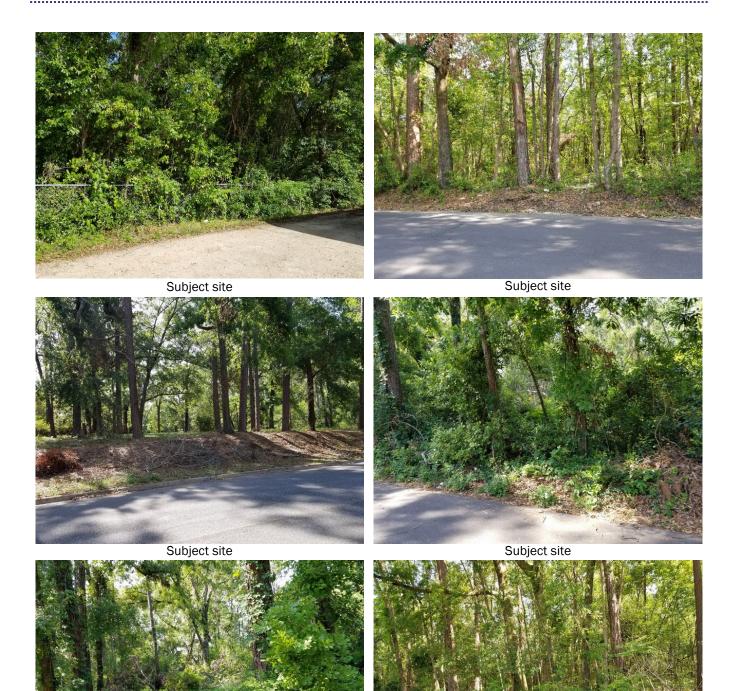

The following are pictures of the Subject site and adjacent uses.

| 12 | Decatur County Senior Center | 1.2 miles |
| 13 | Walmart Supercenter | 1.3 miles |

- 6. Description of Land Uses The Subject site is located on the west side of Russ Street. The Subject site is currently vacant wooded land and improved with one single-family home. Adjacent north, east and south of the Subject site are single-family homes exhibiting average condition. Farther north, there are single-family homes and commercial uses including a Family Dollar and Winn-Dixie exhibiting average condition. Several blocks northeast is downtown Bainbridge including commercial uses and local governmental offices. East of the Subject site there are single-family homes exhibiting average condition, and a house of worship. Several blocks east is Bainbridge Mall and Bainbridge Middle School. South of the Subject site are single-family homes exhibiting average condition. West of the Subject site are several commercial uses consisting of a Domino's Pizza, Grocery Outlet, a Salvation Army and a funeral home. The commercial uses are in average to good condition. West, beyond these commercial uses, there are single-family homes exhibiting average condition. Based on our inspection of the neighborhood, retail appeared to be 80 percent occupied. There are a limited number of retail/commercial uses in the Subject's immediate neighborhood. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 69 out of 100, indicating some errands can be accomplished by foot. The uses surrounding the Subject are in average condition and the site has excellent proximity to locational amenities, which are all within 1.3 miles of the Subject site. The Subject is located one mile from Memorial Hospital and Manor, which is one of the largest employers in the community. The Subject site is considered a desirable building site for rental housing.
- 7. Crime:

The following table illustrates crime statistics in the Subject's PMA compared to the SMA.

| | РМА | Bainbridge, GA Micropolitan Statistical Area |
|---------------------|-----|---|
| Total Crime* | 76 | 116 |
| Personal Crime* | 87 | 120 |
| Murder | 92 | 116 |
| Rape | 65 | 58 |
| Robbery | 49 | 76 |
| Assault | 109 | 148 |
| Property Crime* | 75 | 115 |
| Burglary | 100 | 144 |
| Larceny | 70 | 114 |
| Motor Vehicle Theft | 42 | 48 |

2018 CRIME INDICES

Source: Esri Demographics 2018, Novogradac & Company LLP, April 2019

*Unweighted aggregations

The total crime indices in the PMA are well below the national average. Personal crime in the PMA below national personal crime

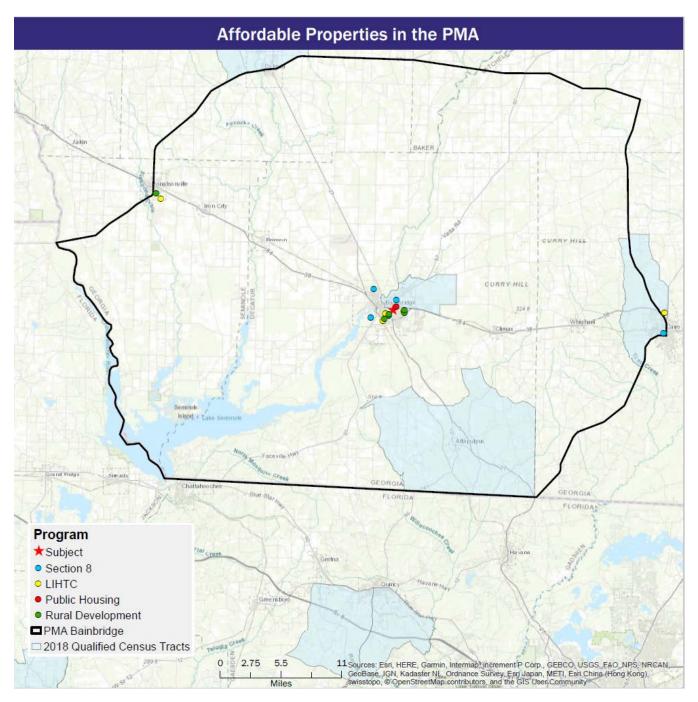

levels, and property crime is substantially below national levels. The Subject will offer limited access in terms of security features. Only six of the eight comparable properties offer security features and two of these properties offer only perimeter fencing and two offer only security patrols. Additionally, the two properties that offer no security features are located in Bainbridge. Therefore, we believe the Subject's security features are market-oriented and reasonable.

- 8. Existing Assisted Rental Housing Property Map:
- The following map and list identifies all assisted rental housing properties in the PMA.

| Property Name | Program | Location | Tenancy | # of Units | Distance from Subject | Map Color |

AFFORDABLE PROPERTIES IN THE PMA

- 9. Road, Infrastructure or Proposed Improvements:
- 10. Access, Ingress-Egress and Visibility of Site:

We did not witness any road, infrastructure or proposed improvements during our field work.

The Subject site will be accessible from Russ Street, which is a twolane residential road with light traffic patterns. As such, access and visibility will be limited.

11. Conclusion:

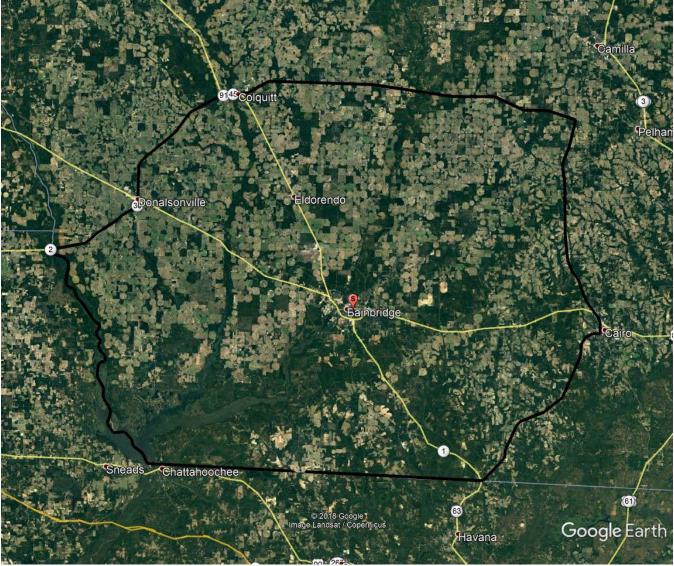

The Subject site is located on the west side of Russ Street. The Subject site is currently vacant wooded land and improved with one single-family home. Adjacent north, east and south of the Subject site are single-family homes exhibiting average condition. Farther north, there are single-family homes and commercial uses including a Family Dollar and Winn-Dixie exhibiting average condition. Several blocks northeast is downtown Bainbridge including commercial uses and local governmental offices. East of the Subject site there are single-family homes exhibiting average condition, and a house of worship. Several blocks east is Bainbridge Mall and Bainbridge Middle School. South of the Subject site are single-family homes exhibiting average condition. West of the Subject site are several commercial uses consisting of a Domino's Pizza, Grocery Outlet, a Salvation Army and a funeral home. The commercial uses are in average to good condition. West, beyond the commercial uses are single-family homes exhibiting average condition. Based on our inspection of the neighborhood, retail appeared to be 80 percent occupied. Crime risk indices in the PMA are well below national levels. Visibility of the Subject site is average, with frontage along Russ Street and Green Street. The Subject site is located on the west side of Russ Street. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 69 out of 100, indicating some errands can be accomplished by foot. The uses surrounding the Subject are in average condition and the site has excellent proximity to locational amenities, which are all within 1.3 miles of the Subject site. The Subject is located one mile from Memorial Hospital and Manor, which is one of the largest employers in the community. The Subject site is considered a desirable building site for rental housing.

D. MARKET AREA

PRIMARY MARKET AREA

For the purpose of this study, it is necessary to define the market area, or the area from which potential tenants for the project are likely to be drawn. In some areas, residents are very much "neighborhood oriented" and are generally very reluctant to move from the area where they have grown up. In other areas, residents are much more mobile and will relocate to a completely new area, especially if there is an attraction such as affordable housing at below market rents.

Primary Market Area Map

Source: Google Earth, April 2019.

The following sections will provide an analysis of the demographic characteristics within the market area. Data such as population, households and growth patterns will be studied, to determine if the Primary Market Area (PMA) and Decatur County are areas of growth or contraction.

The PMA is defined by the Georgia-Florida state line to the south; the Georgia-Alabama state line and State Highway 91 to the west; State Highway 65 to the north; and State Highways 112 and 111 to the east. This

area includes the county of Decatur as well as portions of Grady, Mitchell, Baker, Miller and Seminole Counties. Portions of the communities of Donalsonville, Colquitt and Cairo are included in the PMA. The distances from the Subject to the farthest boundaries of the PMA in each direction are listed as follows:

North: 21 miles East: 28 miles South: 22 miles West: 27 miles

The PMA is defined based on interviews with the local housing authority and property managers at comparable properties. Property managers reported that tenants, particularly senior tenants, originate from Decatur and neighboring counties. Many tenants are reported to be from Florida and Alabama. While we do believe the Subject will experience leakage from outside the PMA boundaries, per the 2019 market study guidelines, we do not account for leakage in our demand analysis found later in this report. The farthest PMA boundary from the Subject is approximately 28 miles. The SMA is defined as the Bainbridge, GA Micropolitan Statistical Area (SMA), which is coterminous with Decatur County and encompasses 623 square miles.

E. COMMUNITY DEMOGRAPHIC DATA

COMMUNITY DEMOGRAPHIC DATA

The following sections will provide an analysis of the demographic characteristics within the market area. Data such as population, households and growth patterns will be studied to determine if the Primary Market Area (PMA) and Decatur County are areas of growth or contraction. The discussions will also describe typical household size and will provide a picture of the health of the community and the economy. The following demographic tables are specific to the populations of the PMA and Decatur County. We utilized September 2021 as the estimated market entry time in this section of the report according to DCA guidelines.

1. Population Trends

The following tables illustrate (a) Total Population, (b) Population by Age Group, and (c) Number of Elderly and Non-Elderly within the population in the SMA, the PMA and nationally from 2000 through 2023.

1a. Total Population

The following table illustrates the total population within the PMA, SMA and nation from 2000 through 2023.

| | | P | OPULATION | | | | |
|---------------------------------------|--------|---------------|-----------|--------------------------------|-------------|---------------|--|
| Year | 1 | PMA | <u> </u> | GA Micropolitan stical Area | USA | | |
| | Number | Annual Change | Number | Annual Change | Number | Annual Change | |
| 2000 | 47,581 | - | 28,240 | - | 281,038,168 | - | |
| 2010 | 45,902 | -0.4% | 27,842 | -0.1% | 308,745,538 | 1.0% | |
| 2018 | 44,745 | -0.3% | 27,015 | -0.4% | 330,088,686 | 0.8% | |
| Projected Mkt Entry September 2021 | 44,120 | -0.4% | 26,659 | -0.4% | 338,870,484 | 0.8% | |
| 2023 | 43,758 | -0.4% | 26,453 | -0.4% | 343,954,683 | 0.8% | |

Source: Esri Demographics 2018, Novogradac & Company LLP, April 2019

Between 2010 and 2018 there was a 0.3 percent and 0.4 percent annual decline in population in the PMA and SMA, respectively, which substantially lagged national growth. Through 2023, population decline in the PMA and SMA is expected to remain relatively steady decreasing at 0.4 percent annually.

1b. Total Population by Age Group

The following table illustrates the total population within the PMA and SMA and nation from 2000 to 2023.

AVERAGE HOUSEHOLD SIZE

Source: Esri Demographics 2018, Novogradac & Company LLP, April 2019

Between 2010 and 2018 there was a 0.3 percent and 0.4 percent annual decline in households in the PMA and SMA, respectively, which substantially lagged national household growth. Through 2023, household decline in the PMA and SMA is expected to accelerate slightly to decreasing 0.5 percent annually. The average household size in the PMA is slightly smaller than the national average at 2.54 persons in 2018. Through 2023, the average household size is projected to remain constant.

2b. Households by Tenure

The table below depicts household growth by tenure from 2000 through 2023.

| TENURE PATTERNS PMA | | | | | |
|---------------------------------------|----------------|----------------|----------------|-----------------|--|
| N | Owner- | Percentage | Renter- | Percentage | |
| Year | Occupied Units | Owner-Occupied | Occupied Units | Renter-Occupied | |
| 2000 | 13,154 | 74.3% | 4,549 | 25.7% | |
| 2018 | 11,059 | 64.4% | 6,113 | 35.6% | |
| Projected Mkt Entry September 2021 | 11,046 | 65.5% | 5,828 | 34.5% | |
| 2023 | 11,039 | 66.1% | 5,663 | 33.9% | |

PMA TENURE PATTERNS OF SENIORS 55+

| No ov | Owner- | Percentage | Renter- | Percentage |
|---------------------------------------|----------------|----------------|----------------|-----------------|
| Year | Occupied Units | Owner-Occupied | Occupied Units | Renter-Occupied |
| 2000 | 5,847 | 84.9% | 1,039 | 15.1% |
| 2018 | 6,312 | 72.9% | 2,347 | 27.1% |
| Projected Mkt Entry September 2021 | 6,469 | 73.9% | 2,290 | 26.1% |
| 2023 | 6,560 | 74.4% | 2,257 | 25.6% |

Source: Esri Demographics 2018, Novogradac & Company LLP, April 2019

As the table illustrates, households within the PMA reside in predominately owner-occupied residences. Nationally, approximately two-thirds of the population resides in owner-occupied housing units, and one-third resides in renter-occupied housing units. For senior households, approximately 85 percent of seniors nationwide reside in owner-occupied housing, compared to 15 percent in renter-occupied housing. Therefore, there is a larger percentage of renters in the PMA than the nation, particularly among the senior population. This percentage is projected to remain relatively stable over the next five years.

2c. Household Income

The following table depicts renter household income in the PMA in 2018, market entry, and 2023.

| RENTER HOUSEHOLD INCOME DISTRIBUTION - PMA, 55+ | | | | | | |

The Subject will target tenants earning between \$16,110 and \$28,020. As the table above depicts, approximately 36.5 percent of renter households in the PMA are earning incomes between \$10,000 and \$29,999, which is comparable to the 37.4 percent of renter households in the SMA in 2018. For the projected market entry date of September 2021, these percentages are projected to slightly decrease to 35.7 percent and 36.4 percent for the PMA and SMA, respectively.

2d. Renter Households by Number of Persons in the Household

The following table illustrates household size for all households in 2018, 2021 and 2023. To determine the number of renter households by number of persons per household, the total number of households is adjusted by the percentage of renter households.

| | | OUSEHOLDS DI | | | A, 00 · | |

RENTER HOUSEHOLDS BY NUMBER OF PERSONS - PMA, 55+

Source: HISTA Data / Ribbon Demographics 2018, Novogradac & Company LLP, April 2019

The majority of senior renter households in the PMA are one to two-person households.

Conclusion

The population in the PMA decreased by 6.0 percent between 2000 and 2018, compared to the 4.3 percent decrease in the SMA and 17.5 percent increase across the nation. The population in the PMA is 45,902 and is projected to be 44,745 in September 2021. However, the senior population in the PMA is currently 14,499 and is projected to be 14,885 by September 2021. The percentage of senior renter households in the PMA increased between 2000 and 2018, and is estimated to be 26.1 percent as of 2018. This is well above the estimated 15 percent of senior renter households across the nation. The large percentage of senior renter households in the PMA bodes well for the Subject's development.

F. EMPLOYMENT TRENDS

Employment Trends

The PMA and Decatur County are economically reliant on healthcare/social assistance, retail trade, manufacturing and educational services, which compose 46.1 percent of total employment in the PMA. Of these four industries, healthcare and educational services are historically less susceptible to job losses during recessionary conditions. However, the manufacturing and retail trade industries typically experience losses of employment during economic contractions. Some of the major employers in Bainbridge are pillars of the community such as Bainbridge State College, Memorial Hospital and Manor, Decatur County School System and Walmart. Although total employment has not reached post-recessionary highs, employment growth has been modest to strong since 2015, adding several hundred jobs in the county.

1. Covered Employment

The following table illustrates the total jobs (also known as "covered employment") in Decatur County, Georgia. Note that the data below is the most recent data available.

COVERED EMPLOYMENT

Source: U.S. Bureau of Labor Statistics

YTD as of Mar 2019

As illustrated in the table above, Decatur County experienced a fluctuation of employment in the years during the recession. Employment growth fell during the national recession and in 2013 and 2014. Since 2015, Decatur County has experience modest to strong employment growth. However, total employment is still below the pre-recessionary employment levels of 2008.

2018 EMPLOYMENT BY INDUSTRY

Source: Esri Demographics 2018, Novogradac & Company LLP, April 2019

Employment in the PMA is concentrated in the healthcare/social assistance, retail trade, and manufacturing industries, which collectively comprise 36 percent of local employment. The large share of employment in retail trade and manufacturing in the PMA is notable as both industries are historically volatile, and prone to contraction during recessionary periods. However, the PMA also has a significant share of employment in the healthcare industry, which historically exhibits greater stability during recessionary periods. Relative to the nation, the PMA features comparatively greater employment in the agriculture/forestry/fishing/hunting, other services, and retail trade industries. Conversely, the PMA is underrepresented in the professional/ scientific/technological services, accommodation/food services, and arts/entertainment/recreation industries.

3. Major Employers

MAJOR EMPLOYERS DECATUR COUNTY

Source: Development Authority of Bainbridge and Decatur County, retrieved April 2019

Some of the major employers in Bainbridge are pillars of the community such as Bainbridge State College, Memorial Hospital and Manor, Decatur County School System and Walmart. As evidenced in the employment by industry table, the major employers in Decatur County are concentrated in retail trade, education and healthcare industries. The diverse industries operating in Bainbridge should provide a stable employment base for the local economy.

Expansions/Contractions

The layoffs and closures of significance that occurred or were announced since January 1, 2014 in Decatur County according to the Georgia Department of Labor's listings of WARN notices are detailed below.

• In October of 2015, one WARN notice was filed for Shaw Industries Group, Inc, a carpet manufacturer in Bainbridge, for 267 employees, which is a significant contraction of employment.

We attempted to contact the Development Authority of Bainbridge and Decatur County regarding recent business expansions in the area. As of the date of this report, our calls have not been returned. Therefore, we conducted additional research regarding business expansion in the region.

- In March 2019, Advantage Capital announced a \$6,500,000 investment in Danimer Scientific, a biotechnology company manufacturing biodegradable polymers located in Bainbridge. The investment will allow Danimer Scientific to more than double their capacity, hire new employees and continue their rapid growth. There were no detailed employment figures immediately available.
- In November 2018, Decatur County received a Community Development Block Grant (CBDG) in the form
 of \$538,301 from the Georgia Department of Community Affairs, and the county will utilize the funds for
 street/drainage improvements. In total, the Georgia Department of Community Affairs awarded over
 \$38,000,000 in CBDG grants throughout Georgia, which are expected to create over 345 new jobs and
 generate \$50,200,000 in additional private investment.
- In April 2018, the governor of Georgia announced that Taurus USA, a Brazilian firearms manufacturer would make a substantial investment in Georgia to construct and operate a manufacturing plant. Taurus is investing \$22,500,000 to build and manage a 200,000 square foot manufacturing facility in Bainbridge. Plans call for the facility to be completed by the end of August 2019. The company intends to hire 300 full-time employees in Bainbridge.

4. Employment and Unemployment Trends

Source: U.S. Bureau of Labor Statistics, April 2019

Total employment in the SMA contracted in the years preceding the national recession, with annual job growth lagging the overall nation in all but two years between 2003 and 2007. The effects of the recessionary periods as well as the great recession were particularly pronounced in the SMA, which suffered a 9.3 percent contraction in employment growth (2003-2009), well above the 4.8 percent contraction reported by the nation as a whole during the great recession (2007-2010). Since 2012, average employment growth in the SMA trailed the nation in all but two years. As of February 2019, employment in the SMA is below record levels; and is declining at an annualized rate of 1.2 percent, compared to a 1.1 percent increase across the nation. However, limited first quarter growth has been typical in recent years.

The SMA experienced a higher average unemployment rate relative to the nation during the years preceding the recession. The effects of the recession were more pronounced in the SMA, which experienced a 5.0 percentage point increase in unemployment, compared to only a 3.8 percentage point increase across the overall nation. Since 2012, the SMA generally experienced a higher unemployment rate compared to the overall nation. According to the most recent labor statistics, the unemployment rate in the SMA is 4.3 percent, 20 basis points higher than the current national unemployment rate of 4.1 percent.

5. Map of Site and Major Employment Concentrations

The following map and table details the largest employers in Decatur County, Georgia.

Source: Google Earth, April 2019.

MAJOR EMPLOYERS DECATUR COUNTY

| | Employer Name | Industry |
|----|--------------------------------------|-----------------------|
| 1 | Bainbridge State College | Education |
| 2 | Bainbridge Memorial Hospital & Manor | Healthcare |
| 3 | Flint River Mills | Agriculture |

6. Conclusion

The PMA and Decatur County are economically reliant on healthcare/social assistance, retail trade, manufacturing and educational services, which compose 46.1 percent of total employment in the PMA. Of these four industries, healthcare and educational services are historically less susceptible to job losses during recessionary conditions. However, the manufacturing and retail trade industries typically experience losses of employment during economic contractions.

Total employment in the SMA contracted in the years preceding the national recession, with annual job growth lagging the overall nation in all but two years between 2003 and 2007. The effects of the recessionary periods as well as the great recession were particularly pronounced in the SMA, which suffered a 9.3 percent contraction in employment growth (2003-2009), well above the 4.8 percent contraction reported by the nation as a whole during the great recession (2007-2010). Since 2012, average employment growth in the SMA trailed the nation in all but two years. As of February 2019, employment in the SMA is below record levels; and is declining at an annualized rate of 1.2 percent, compared to a 1.1 percent increase across the nation. In part due to the declining population, the local economy has not fully recovered from the national recession. Nonetheless, the Subject is well-positioned to serve a lower income population of seniors in the PMA, many of whom may no longer be in the workforce.

G. PROJECT-SPECIFIC AFFORDABILITY AND DEMAND ANALYSIS The following demand analysis evaluates the potential amount of qualified households, which the Subject would have a fair chance at capturing. The structure of the analysis is based on the guidelines provided by DCA.

1. Income Restrictions

LIHTC rents are based upon a percentage of the Area Median Gross Income ("AMI"), adjusted for household size and utilities. The Georgia Department of Community Affairs ("DCA") will estimate the relevant income levels, with annual updates. The rents are calculated assuming that the maximum net rent a household will pay is 35 percent of its household income at the appropriate AMI level.

According to DCA, household size is assumed to be 1.5 persons per bedroom for LIHTC rent calculation purposes. For example, the maximum rent for a four-person household in a two-bedroom unit is based on an assumed household size of three persons (1.5 per bedroom). For income determination purposes, the maximum income is assumed to be 1.5 persons per bedroom rounded up to the nearest whole number. For example, maximum income for a one-bedroom unit is based on an assumed household size of two persons (1.5 persons per bedroom, rounded up). However, very few senior households have more than two persons. Therefore, we assume a maximum household size of two persons in our analysis.

To assess the likely number of tenants in the market area eligible to live in the Subject, we use Census information as provided by ESRI Information Systems, to estimate the number of potential tenants who would qualify to occupy the Subject as a LIHTC project.

The maximum income levels are based upon information obtained from the Rent and Income Limits Guidelines Table as accessed from the DCA website. The Subject's location is considered a rural area as determined by USDA. Therefore, the Subject is eligible to use the national non-metropolitan rent and income limits, which are higher than the published rent and income limits for Decatur County.

2. Affordability

As discussed above, the maximum income is set by DCA while the minimum is based upon the minimum income needed to support affordability. This is based upon a standard of 35 percent. Lower and moderateincome families typically spend greater than 30 percent of their income on housing. These expenditure amounts can range higher than 50 percent depending upon market area. However, the 30 to 40 percent range is generally considered a reasonable range of affordability. DCA guidelines utilize 35 percent for families and 40 percent for seniors. We will use these guidelines to set the minimum income levels for the demand analysis.

| 55+ INCOME LIMITS | | | | | | | |
|-------------------|-----------|-----------|-----------|-----------|--|--|--|
| | Minimum | Maximum | Minimum | Maximum | | | |
| Unit Type | Allowable | Allowable | Allowable | Allowable | | | |
| | Income | Income | Income | Income | | | |
| | @5 | 0% | @6 | 60% | | | |
| 1BR | \$16,110 | \$23,350 | \$16,710 | \$28,020 | | | |
| 2BR | \$19,410 | \$23,350 | \$20,670 | \$28,020 | | | |

3. Demand

The demand for the Subject will be derived from three sources: new households, existing households and elderly homeowners likely to convert to rentership. These calculations are illustrated in the following tables.

Demand from New Households

The number of new households entering the market is the first level of demand calculated. We utilized 2021, the anticipated date of market entry, as the base year for the analysis. Therefore, 2018 household

NOVOGRADAC & COMPANY LLP

population estimates are inflated to 2021 by interpolation of the difference between 2018 estimates and 2023 projections. This change in households is considered the gross potential demand for the Subject property. This number is adjusted for income eligibility and renter tenure. This is calculated as an annual demand number. In other words, this calculates the anticipated new households in 2021. This number takes the overall growth from 2018 to 2021 and applies it to its respective income cohorts by percentage. This number does not reflect lower income households losing population, as this may be a result of simple dollar value inflation.

Demand from Existing Households

Demand for existing households is estimated by summing two sources of potential tenants. The first source is tenants who are rent overburdened. These are households who are paying over 35 percent for family households and 40 percent for senior households of their income in housing costs. This data is interpolated using ACS data based on appropriate income levels.

The second source is households living in substandard housing. We will utilize this data to determine the number of current residents that are income eligible, renter tenure, overburdened and/or living in substandard housing and likely to consider the Subject. In general, we will utilize this data to determine the number of current residents that are income eligible, renter tenure, overburdened and/or living in substandard housing and likely to consider the Subject.

Demand from Elderly Homeowners likely to Convert to Rentership

An additional source of demand is also seniors likely to move from their own homes into rental housing. This source is only appropriate when evaluating senior properties and is determined by interviews with property managers in the PMA. It should be noted that per DCA guidelines, we lower demand from seniors who convert to homeownership to be at or below 2.0 percent of total demand.

3d. Other

Per the 2019 GA DCA Qualified Allocation Plan (QAP) and Market Study Manual, GA DCA does not consider demand from outside the Primary Market Area (PMA), including the Secondary Market Area (SMA). Therefore, we do not account for leakage from outside the PMA boundaries in our demand analysis.

DCA does not consider household turnover to be a source of market demand. Therefore, we do not account for household turnover in our demand analysis.

We calculated all of our capture rates based on household size. DCA guidelines indicate that properties with over 20 percent of their proposed units in three and four-bedroom units need to be adjusted to considered larger household sizes. Our capture rates incorporate household size adjustments for all of the Subject's units.

Net Demand

The following pages will outline the overall demand components added together (3(a), 3(b) and 3(c)) less the supply of competitive developments awarded and/or constructed or placed in service from 2016 to the present.

Additions to Supply

Additions to supply will lower the number of potential qualified households. Pursuant to our understanding of DCA guidelines, we deduct the following units from the demand analysis.

• Comparable/competitive LIHTC and bond units (vacant or occupied) that were funded, are under construction, or are in properties that have not yet reached stabilized occupancy

NOVOGRADAC & COMPANY LLP

• Comparable/competitive conventional or market rate units that are proposed, are under construction, or are in properties that have not yet reached stabilized occupancy. As the following discussion will demonstrate, competitive market rate units are those with rent levels that are comparable to the proposed rents at the Subject.

Per GA DCA guidelines, competitive units are defined as those units that are of similar size and configuration and provide alternative housing to a similar tenant population, at rent levels comparative to those proposed for the Subject development.

We identified no competitive proposed, under construction or recently completed developments in the PMA. There have been no allocations or awards of financing in the PMA since 2009.

Rehab Developments and PBRA

For any properties that are rehab developments, the capture rates will be based on those units that are vacant, or whose tenants will be rent burdened or over income as listed on the Tenant Relocation Spreadsheet.

Units that are subsidized with PBRA or whose rents are more than 20 percent lower than the rent for other units of the same bedroom size in the same AMI band and comprise less than 10 percent of total units in the same AMI band will not be used in determining project demand. In addition, any units, if priced 30 percent lower than the average market rent for the bedroom type in any income segment, will be assumed to be leasable in the market and deducted from the total number of units in the project for determining capture rates.

Capture Rates

The above calculations and derived capture rates are illustrated in the following tables. Note that the demographic data used in the following tables, including tenure patterns, household size and income distribution through the projected market entry date of 2021 are illustrated in the previous section of this report.

| Income Cohort | 2018 | | Projected Mkt Entry September 2021 | | 2023 | |

4. Capture Rate Analysis Chart

Our demand analysis is used to determine a base of demand for the Subject as a tax credit property. Several factors affect the indicated capture rates and are discussed following.

- The number of senior households in the PMA is expected to increase 1.8 percent between 2018 and 2021.
- This demand analysis does not measure the PMA's or Subject's ability to attract additional or latent demand into the market from elsewhere by offering an affordable option. We believe this to be moderate and therefore the demand analysis is somewhat conservative in its conclusions because this demand is not included.

The following table illustrates demand and net demand for the Subject's units. Note that these capture rates are not based on appropriate bedroom types, as calculated previously.

| | DEMAND AND NET DEMAND | | | | | | | | |
|--|--|--|---------------------------|--|--|--|--|--|--|
| DCA Conclusion Tables | HH at @50% AMI (\$16,110 to \$23,350) | HH at @60% AMI (\$16,710 to \$28,020) | All Tax Credit Households | | | | | | |

CAPTURE RATE ANALYSIS CHART

As the analysis illustrates, the Subject's capture rates at the 50 percent AMI level will range from 6.9 to 10.2 percent, with an overall capture rate of 9.3 percent. The Subject's 60 percent AMI capture rates range from 26.4 to 27.3 percent, with an overall capture rate of 27.0 percent. The overall capture rate for the project's 50 and 60 percent units is 31.6 percent. Therefore, we believe there is adequate demand for the Subject. All capture rates are within Georgia DCA thresholds.

H. COMPETITIVE RENTAL ANALYSIS

Survey of Comparable Projects

Comparable properties are examined on the basis of physical characteristics, i.e. building type, age/quality, level of common amenities, absorption, as well as similarity in rent. We attempted to compare the Subject to complexes from the competing market to provide a broader picture of the health and available supply in the market. Our competitive survey includes nine "true" comparable properties containing 673 units.

The availability of LIHTC data is considered average. There are only five unsubsidized LIHTC properties in the PMA. We included two of these properties. We were unable to contact Friendship Crossing, a family LIHTC property in Donalsonville, or The Village at Wedgewood, a senior LIHTC property in Cairo, despite numerous attempts. Ridgefield Place was also excluded as this property offers only three and four-bedroom single-family homes and is not considered competitive with the Subject. We included two LIHTC properties in Bainbridge as well as three LIHTC properties located in Camilla, approximately 31 miles from the Subject site, two of which target seniors. Senior tenants were also reported at the surveyed family LIHTC properties. The comparable LIHTC properties are all located between 1.2 and 31.8 miles of the proposed Subject.

The availability of market rate data is also considered average. There are few market rate housing developments in the PMA and almost none that were recently constructed. We excluded a number of market rate properties located in Bainbridge as we were unable to contact management. We included one market rate property in Bainbridge and three properties in Thomasville, approximately 35 miles away. The comparable market rate properties are all located between 1.6 and 36.8 miles of the proposed Subject.

A detailed matrix describing the individual competitive properties as well as the proposed Subject is provided on the following pages. A map illustrating the location of the Subject in relation to comparable properties is also provided on the following pages. The properties are further profiled in the following write-ups. The property descriptions include information on vacancy, turnover, absorption, age, competition, and the general health of the rental market, when available.

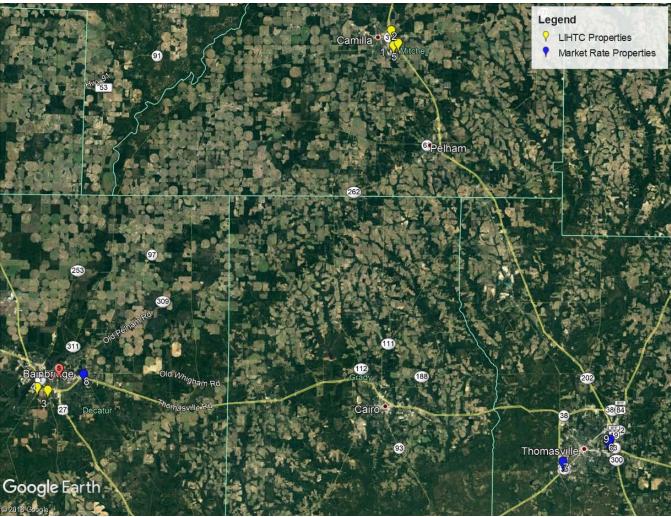

Excluded Properties

The following table illustrates properties within the PMA that are excluded from our analysis along with their reason for exclusion.

Comments

Of the four vacancies at the property, two are currently pre-leased and the remaining two units are expected to be leased from the property's waiting list. The contact stated that there is strong demand in the area for senior affordable housing and many tenants come from outside of Mitchell County. The contact believes the property is capable of achieving higher rents.

Trend: Comments

2Q14 This is a proposed new construction age-restricted development. The property will consist of one three-story, elevator-serviced building and one to two additional single-story buildings. The utility allowances for the property's units are \$47 for one-bedrooms and \$62 for two-bedroom.

1Q17 This is a brand new development that began leasing in September 2016 and is currently 50 percent leased. The contact stated that management projects the property will be fully-leased by May 2017. There is no rent special being offered to lease out the units; however, management is waiving the application fee. Due to the fact that the property is still in leasing period the contact was unable to provide information regarding annual turnover or leasing pace. The contact stated that there is strong demand in the area for senior affordable housing.

2Q17 N/A

2Q19 Of the four vacancies at the property, two are currently pre-leased and the remaining two units are expected to be leased from the property's waiting list. The contact stated that there is strong demand in the area for senior affordable housing and many tenants come from outside of Mitchell County. The contact believes the property is capable of achieving higher rents.

Trend: Comments

- 1Q15 The property is maintaining a waiting list of fifteen households. The waiting list operates on a first come, first serve basis. The manager believes that the market has improved over the past few years. The property manager said slight to moderate rent increases would be possible at 60 percent AMI, but does not believe maximum allowable rents would be achievable.
- 1Q17 According to the contact, management maintains a waiting list that is approximately two months in length. The utility allowance is \$110 for the onebedroom units and \$119 for the two-bedroom units.
- 2017 Management maintains a waiting list that is approximately two months in length. The vacant unit is pre-leased and will be occupied by a resident soon. The contact stated that there is strong demand for affordable senior housing in the local area.
- 2Q19 The one vacancy at this property is pre-leased from the waiting list. The contact stated that there is strong demand for affordable senior housing in the local area.

Comments

The property recently came under new management as the prior management company failed to fill vacancies at the property. New management has been in place for less than two weeks but has leased 20 vacancies and five additional applications are pending for the remaining 13 vacancies. Management believes there is strong demand for additional affordable housing in the market given the rapid leasing pace and the high level of inquiries and that the property will maintain a waiting list once the existing vacancies are filled.

Trend: Comments

- 2007 The property opened in 2005 and applied for a second phase in 2006 application round. However, the second phase did not recieve tax credits.
- 1008 The property opened in 2005 and applied for a second phase in 2006 application round. However, the second phase did not recieve tax credits. According to the leasing agent, it is still planned, but there was no updated information available at the time of this interview. Rents at the 30 percent AMI level decreased an average of seven percent. Rents at the 50 percent AMI level for the two-bedroom units increased seven percent, while the rent for the three- and four-bedroom units decreased an average of three percent. Rents for both the 60 percent AMI and the market units increased between five and six percent. The leasing agent was unable to explain why the rents for all of the units at 30 percent AMI and some of the units at 50 percent AMI decreased. She believes all rents are at the maximum allowable levels.
- 2009 The contact reported that management is currently processing six applications for two-bedroom units set at 50 percent AMI. If all are approved then the six households will fill the six two-bedroom 50 percent AMI vacancies at both phases. The rent for the two-bedroom unit at 60 percent is estimated. The contact reported that there is a short waiting list. Courtes de Emerald has two phases, the second of which opened in February 2009.
- 2Q19 The property recently came under new management as the prior management company failed to fill vacancies at the property. New management has been in place for less than two weeks but has leased 20 vacancies and five additional applications are pending for the remaining 13 vacancies. Management believes there is strong demand for additional affordable housing in the market given the rapid leasing pace and the high level of inquiries and that the property will maintain a waiting list once the existing vacancies are filled.

Trend: Comments

2009 The contact reported that management began accepting applications in September 2008 and the first move in was on October 2, 2008. The property leased up on December 12, 2008, yielding an absorption pace of approximately 11 units per month. The contact reported that rents are not set at the maximum allowable and that tenants in the 50 and 60 percent units can afford higher rents. The contact estimates that tenants in the three-bedroom units can likely afford a rent of \$420 to \$480. The contact also indicated that there is significant over-income qualified traffic in the area such as nurses, policemen, and city employees. The property also receiveds tenants who are under income-qualified because they rely on SSI. Overall, the contact indicated there is more demand for LIHTC housing in the area. The contact confirmed that the square footage for the two- and three-bedroom units are the same.

2Q19 Of the two vacant units, both are pre-leased. The contact reported strong demand for affordable housing.

Comments

The contact reported strong demand for affordable housing in the area. According to the contact, this property underwent new management as of December 2017, which caused a temporary increase in move-outs at the property (and consequently higher vacancy). The property has since stabilized. Tenants are primarily from Camilla or surrounding towns such as Albany and Thomasville.

| 1019 | N/A |

Quail Rise Apartments, continued

1. Housing Choice Vouchers

We spoke with David Samloff, Director of Operations for the Georgia Department of Community Affairs. According to Mr. Samloff, DCA is authorized to issue 16,500 Housing Choice Vouchers for all of the counties under overseen by DCA throughout the state. Of those vouchers, approximately 14,000 of the authorized Housing Choice Vouchers are currently in use. The waiting list is closed with approximately 9,000 to 10,000 households on the list. There are no plans to reopen the waiting list in the near future. The Department of Community of Affairs does not give preference for the elderly, disabled persons, or military veterans. The following table illustrates voucher usage at the comparables.

| TENANTS WITH VOUCHERS | | | | | | | | |
|-----------------------------|----------------|---------|--------------------------------|--|--|--|--|--|
| Property Name | Rent Structure | Tenancy | Housing Choice Voucher Tenants | | | | | |
| Campbell Place Apartments | LIHTC | Senior | 0% | | | | | |
| Cottonwood Pointe | LIHTC | Senior | 4% | | | | | |
| Courtes De Emerald I And II | LIHTC/ Market | Family | 3% | | | | | |
| Pine Ridge Estates | LIHTC | Family | 3% | | | | | |
| Southfork Apartments | LIHTC | Family | 6% | | | | | |
| Abbey Lake Apartments | Market | Family | 0% | | | | | |
| Ashley Park Apartments | Market | Family | 0% | | | | | |
| College Plaza Apartments | Market | Family | 0% | | | | | |
| Quail Rise Apartments | Market | Family | 0% | | | | | |

The comparable properties reported voucher usage ranging from zero to six percent. None of the market rate properties reported voucher usage. Four of the LIHTC properties reported voucher usage, with an average utilization of three percent. Based on the performance of the LIHTC comparables, we expect the Subject will operate with voucher usage of approximately five percent.

2. Phased Developments

The Subject is not part of a multi-phase development.

Lease Up History

We were able to obtain information regarding absorption paces from three of the comparable properties as well as two excluded properties in the region in for the past 12 years. This information is illustrated in the following table.

| ABSORPTION | | | | | | | | |
|---------------------------|-----------------|---------|------|-------------|-----------------------------|--|--|--|
| Property Name | Rent Program | Tenancy | Year | Total Units | Units Absorbed Per Month | | | |
| Campbell Place Apartments | LIHTC | Family | 2016 | 52 | 6 | | | |
| Pine Ridge Estates | LIHTC | Family | 2008 | 38 | 11 | | | |
| Courtes De Emerald II | LIHTC | Family | 2008 | 32 | 5 | | | |
| Kirby Creek Apartments | LIHTC | Family | 2007 | 56 | 14 | | | |
| Cottonwood Pointe | LIHTC | Senior | 2007 | 48 | 6 | | | |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed, new construction, age-restricted building. Only one LIHTC property that opened in the last decade was able to reported absorption information. Campbell Place Apartments, located in Camilla, reported an absorption pace of six units per month. The remaining LIHTC properties reported absorption paces of five to 14 units per month. We anticipate the Subject would operate with an absorption pace most similar to Campbell Place Apartments. We believe an estimated absorption pace of five units per month in reasonable, particularly

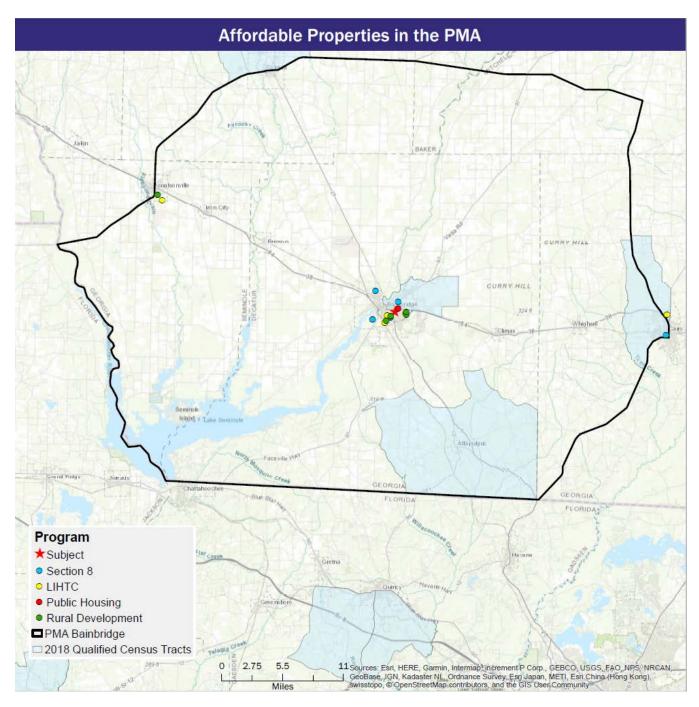

given the rapid leasing of down units reported by Courtes de Emerald I and II. This would indicate an absorption period of nine months for the proposed Subject.

3. Competitive Project Map

4. Amenities

A detailed description of amenities included in both the Subject and the comparable properties can be found in the amenity matrix below.

| | | | | AMENITY | MATRIX | | | | | |

.....

The Subject will offer generally superior in-unit amenities in comparison to the LIHTC and market rate comparable properties as nearly all of these developments lack in-unit washers and dryers. The Subject's community amenity package will be similar to the community amenities offered by the LIHTC properties but superior to the market rate property offerings, as these developments lack business centers and exercise facilities, although they offer swimming pools. Overall we believe that the proposed amenities will allow the Subject to effectively compete in the LIHTC market.

5. Comparable Tenancy

The Subject will target seniors ages 55 and older. Only two of the LIHTC comparable properties target a similar population. The remaining LIHTC properties target families. Management at these properties reported some of their tenants are seniors but were unable to quantify the number of senior tenants. We believe there is a dearth of senior affordable housing in the market. All of the market rate properties target families. Age-restricted market rate properties that do not offer additional independent living services including meals and housekeeping are rare. Therefore, we believe the comparable properties surveyed are an accurate depiction of housing options for seniors in the market.

Vacancy

The following table illustrates the vacancy rates in the market.

| | OVERALL VACANCY | | | | | | | | |
|-----------------------------|-----------------|---------|-------------|--------------|--------------|--|--|--|--|
| Property Name | Rent Structure | Tenancy | Total Units | Vacant Units | Vacancy Rate | | | | |
| Campbell Place Apartments | LIHTC | Senior | 52 | 4 | 7.7% | | | | |
| Cottonwood Pointe | LIHTC | Senior | 48 | 1 | 2.1% | | | | |
| Courtes De Emerald I And II | LIHTC/ Market | Family | 60 | 13 | 21.7% | | | | |
| Pine Ridge Estates | LIHTC | Family | 38 | 2 | 5.3% | | | | |
| Southfork Apartments | LIHTC | Family | 96 | 3 | 3.1% | | | | |
| Abbey Lake Apartments | Market | Family | 152 | 0 | 0.0% | | | | |
| Ashley Park Apartments | Market | Family | 84 | 0 | 0.0% | | | | |
| College Plaza Apartments | Market | Family | 34 | 0 | 0.0% | | | | |
| Quail Rise Apartments | Market | Family | 109 | 0 | 0.0% | | | | |
| Total LIHTC | | | 294 | 23 | 7.8% | | | | |
| Total Market Rate | | | 379 | 0 | 0.0% | | | | |
| Overall Total | | | 673 | 23 | 3.4% | | | | |

Overall vacancy in the market is moderate at 3.1 percent. Total LIHTC vacancy is higher, at 7.8 percent. One of the comparable properties, Courtes de Emerald I and II, reported a significantly elevated vacancy rate of 21.7 percent. However, the contact at this property reported that is it under new management since the beginning of May. The previous management company let vacant units go unleased. The new manager has leased 20 vacant units since taking over the property and there are five applications pending for the remaining 13 units at this time. However, management believes all of the vacant units will be leased shortly and the property will begin to maintain a waiting list, based on the strong interest at the property. The majority of recently leased vacancies were tenants who visited the property by phone but plan to tour the property in the coming days. The manager at this property reported there appears to be significant demand for affordable housing in the market based on the volume of calls and inquiries received since she has taken over. Therefore, we do not believe the elevated vacancy rate at this property is indicative of limited demand for affordable housing in the market, rather it is due to property specific issues.

The remaining comparable LIHTC properties reported few vacancies. Additionally, all of the current vacancies at Cottonwood Pointe and Pine Ridge Estates are pre-leased at this time, as well as two of the vacancies at

Campbell Place. Cottonwood Pointe maintains a waiting list of six households at this time and Pine Ridge Estates, which is located in Bainbridge, maintains a waiting list of 45 households. Campbell Place, which is the newest senior property surveyed, maintains a waiting list of 50 households. Therefore, we believe there is significant demand for additional affordable housing in the market, particularly in Bainbridge and among senior tenants.

The market rate properties reported no vacancies at this time. Two of these properties also maintain waiting lists. Ashely Park Apartments reported maintaining a waiting list of 200 households. This indicates there is strong demand in the market for accessible, new construction housing. Based on these factors, we believe that there is sufficient demand for additional affordable housing in the market. We do not believe that the Subject will impact the performance of the existing LIHTC properties if allocated.

6. Properties Under Construction and Proposed

There are no properties currently planned, proposed or under construction in the PMA.

7. Rental Advantage

The following table illustrates the Subject's similarity to the comparable properties. We inform the reader that other users of this document may underwrite the LIHTC rents to a different standard than contained in this report.

| | SIMILARITY MATRIX | | | | | | | | |

SIMILARITY MATRIX

*Inferior=-10, slightly inferior=-5, similar=0, slightly superior=5, superior=10.

The Subject's location is considered a rural area as determined by USDA. Therefore, the Subject is eligible to use the national non-metropolitan rent and income limits, which are higher than the published rent and income limits for Decatur County. The rental rates at the LIHTC properties are compared to the Subject's proposed 50 and 60 percent AMI rents in the following table.

| | | 150N @50% | 0 | | |
|---|---------|-----------|-------|-------|---------------|
| Property Name | Tenancy | 1BR | 2BR | 3BR | Rents at Max? |
| Oak Landing | Senior | \$441 | \$525 | - | No |

| Cottonwood Pointe | Senior | \$390 | \$425 | - | No |
| Courtes De Emerald I And II | Family | - | \$397 | \$442 | No |
| Pine Ridge Estates | Family | - | \$405 | \$444 | No |
| Southfork Apartments | Family | \$453 | \$436 | \$497 | No |
| Average | | \$383 | \$411 | \$461 | |

LINTO DENT COMPADISON @50%

| | Tenancy | 1BR | 2BR | 3BR | Rents at Max? |
|---|---------|-------|-------|-------|---------------|
| Oak Landing | Senior | \$461 | \$567 | - | No |
| LIHTC Maximum Rent (Net) - National Non-Metro | | \$561 | \$667 | \$911 | |
| Campbell Place Apartments | Senior | \$379 | \$482 | - | No |
| Cottonwood Pointe | Senior | \$415 | \$440 | - | No |
| Courtes De Emerald I And II | Family | - | \$462 | \$487 | No |
| Pine Ridge Estates | Family | - | \$457 | \$533 | No |
| Southfork Apartments | Family | \$563 | \$489 | \$615 | No |
| Average | | \$452 | \$466 | \$545 | |

The Subject's proposed rents are below the maximum allowable levels at the 50 and 60 percent of AMI level. None of the comparable properties reported achieving the maximum allowable rents. The Subject's proposed one-bedroom unit rents are within the surveyed range of the comparable LIHTC properties. However, the Subject's proposed two-bedroom unit rents are above the surveyed range of comparable LIHTC properties.

Southfork Apartments is achieving the highest rents of the comparable LIHTC properties. This property was built in 1999 and renovated in 2015, exhibiting a slightly inferior condition based on the anticipated condition of the Subject. Southfork Apartments offers inferior in-unit amenities compared to the Subject based on a lack of in-unit washer/dryers and balconies/patios. Southfork Apartments also offers slightly inferior community amenities, as it lacks an exercise facility. The property currently maintains a low vacancy rate of 3.1 percent and the contact reported strong demand for affordable housing in the market. It appears that Southfork Apartments one-bedroom units are achieving higher rents compared to the two-bedroom units. However, management explained that the two and three-bedroom units operate under the HOME program where rent increases are capped and can sometimes lag behind traditional LIHTC units. The onebedroom unit rents at the 60 percent of AMI level at this property are similar to the Subject's proposed rents for its two-bedroom unit rents at the same AMI level. Therefore, we believe the Subject's proposed rents are reasonable in comparison to Southfork Apartments, as this property would likely be charging higher rents for its two and three-bedroom units if it did not operate under HOME restrictions.

Courtes de Emerald I and II reported the highest two-bedroom rents at the 60 percent of AMI level of the surveyed comparable properties. The Subject is expected to be considered superior to this property upon completion. Courtes de Emerald I and II is located in Bainbridge, similar to the proposed Subject. This property offers and inferior in-unit amenity package as it lacks in-unit washers and dryers. Additionally, this property was built in 2005 and 2008 and exhibits good condition, slightly inferior to the Subject's anticipated condition upon completion. The unit sizes at Courtes de Emerald I and II are similar to the Subject's proposed unit sizes. The contact at this property reported there is significant demand for affordable housing in the market and she has been rapidly leasing vacant units and expects to maintain a waiting list in the near future. This indicates that the rents at this property are achievable. Additionally, some

NOVOGRADAC & COMPANY

senior tenants are present at this property, indicating that seniors are capable of paying these rents. Given the Subject's superior condition and amenities, we believe the Subject could achieve rents above this property. The Subject's proposed two-bedroom rents at the 60 percent of AMI level are \$105 above the current rents at this property. However, based on the outsized reported demand and superior of the Subject, we believe this is reasonable.

The Subject will be most similar to Campbell Place and Cottonwood Pointe upon completion. Both of these properties are age-restricted developments located in Camilla, approximately 30 miles from the Subject site. The property managers at these developments reported strong demand for affordable senior housing in the market. Campbell Place is a new construction development that is considered superior to Cottonwood Pointe. However, Cottonwood Pointe is achieving higher rents for the majority of its unit types than Campbell Place. The contact at Campbell Place indicated the property could achieve higher rents based on the property's waiting list of 50 households. Cottonwood Pointe also maintains a waiting list of six households, indicating that both properties could likely achieve higher rents. Campbell Place's two-bedroom rents at the 60 percent of AMI level are among the highest in the market. Based on the outsized demand reported by this property and the Subject's superior in-unit amenity package, we believe the Subject's proposed rents above this property are reasonable.

The Subject's two-bedroom rents are at the top of the market. However, the Subject's proposed LIHTC rents are still below all of the unrestricted rents in the market. Upon completion, the Subject will be the only new construction property in Bainbridge. The property managers at the surveyed LIHTC properties reported that higher rents are likely achievable in the market based on strong reported demand. The Subject's two-bedroom rents will be highest in the market. Based on these factors, we believe the Subject's proposed rents are achievable. Additionally, the Subject's proposed two-bedroom unit rents are similar to the one-bedroom unit rents at Southfork Apartments, indicating that these rents are achievable. As the Subject's rents will be at the top of the surveyed LIHTC property, its development will likely not impact any existing LIHTC property by undercutting their rents. Any tenants at an existing LIHTC property that relocates to the proposed Subject would then leave behind a vacant unit will lower rents for a lower income household. Therefore, we believe the Subject's proposed rents are reasonable and achievable.

Analysis of "Market Rents"

Per DCA's market study guidelines, "average market rent is to be a reflection of rents that are achieved in the market. In other words, the rents the competitive properties are currently receiving. Average market rent is not 'Achievable unrestricted market rent.'" In an urban market with many tax credit comps, the average market rent might be the weighted average of those tax credit comps. In cases where there are few tax credit comps, but many market-rate comps with similar unit designs and amenity packages, then the average market rent might be the weighted average of those market-rate comps. In a small rural market there may be neither tax credit comps nor market-rate comps with similar positioning as the subject. In a case like that the average market rent would be a weighted average of whatever rents were present in the market.

When comparing the Subject's rents to the average comparable rent, we do not include surveyed rents at lower AMI levels given that this artificially lowers the average surveyed rent. Including rents at lower AMI levels does not reflect an accurate average rent for rents at higher income levels. For example, if the Subject offers rents at the 50 and 60 percent of AMI levels, and there is a distinct difference at comparable properties between rents at the two AMI levels, we do not include the 50 percent of AMI rents in the average comparable rent for the 60 percent of AMI comparison.

The overall average and the maximum and minimum adjusted rents for the comparable properties surveyed are illustrated in the table below in comparison with net rents for the Subject.

| | 0 | | | | 10 | |
|-----------|-------|-------------|----------|----------|----------|--------------|
| Unit Type | Rent | Subject Pro | Surveyed | Surveyed | Surveyed | Subject Rent |
| onic type | Level | Forma Rent | Min | Max | Average | Advantage |
| 1BR / 1BA | @50% | \$441 | \$306 | \$825 | \$526 | 19% |
| 1BR/1BA | @60% | \$461 | \$336 | \$825 | \$580 | 26% |
| 2BR / 1BA | @50% | \$525 | \$394 | \$925 | \$587 | 12% |
| 2BR / 1BA | @60% | \$567 | \$440 | \$925 | \$646 | 14% |

SUBJECT COMPARISON TO COMPARABLE RENTS

As illustrated the Subject's proposed 50 and 60 percent rents as well as the Subject's unrestricted rents are below the surveyed average when compared to the comparables, both LIHTC and market rate. The Subject's proposed rents have an advantage of 12 to 26 percent over the surveyed average of the comparable rents. All of the Subject's proposed LIHTC rents are below the surveyed range of market rents at the unrestricted properties.

Only one of the surveyed unrestricted properties is located in Bainbridge. College Plaza Apartments is a 34unit, development located 1.6 miles east of the Subject site, in a neighborhood considered similar relative to the Subject's location. The property was built in 2007, and currently exhibits slightly inferior condition relative to the Subject, which will be new construction. The manager at College Plaza Apartments reported the property as fully occupied, indicating the current rents are well accepted in the market. College Plaza Apartments offers no notable amenities not planned for the proposed Subject. However, the Subject will offer in-unit washer/dryers, garbage disposals, a business center, a community room, and a fitness center, none of which are provided by College Plaza Apartments. The Subject's proposed rents will offer an advantage of 13 to 22 percent over the rents at this property, which is reasonable given the Subject's proposed superiority.

Ashley Park Apartments is achieving the highest unrestricted rents of the surveyed properties. This development is an 84-unit, midrise development located 33.9 miles east of the Subject site, in a neighborhood considered slightly superior relative to the Subject's location based on its greater access to commercial amenities and employment centers. The property was built in 2013, and currently exhibits similar condition relative to the Subject, which will be new construction. The manager at Ashley Park Apartments reported the property as fully occupied, indicating the current rents are well accepted in the market. Ashley Park Apartments offers walk-in closets, a playground, a swimming pool, and garages, all of which the proposed Subject will lack. However, the Subject will offer in-unit washer/dryers, a business center, and a fitness center, none of which are provided by Ashley Park Apartments. The in-unit and property amenity packages offered by Ashley Park Apartments are both considered slightly inferior relative to the Subject's amenities. The Subject's proposed rents will offer a significant advantage of 63 to 76 percent over the rents at this property, which we believe is reasonable and indicates the Subject's rents will offer a significant advantage in the market.

8. LIHTC Competition – DCA Funded Properties within the PMA

The Subject's capture rates are considered moderate and indicate demand for additional affordable senior housing in the market. Property managers also report that many tenants, particularly senior tenants, relocate from outside of the PMA, indicating these capture rates are likely understated. The Subject will be considered superior to the existing LIHTC properties in terms of condition and it will offer in-unit washers and dryers, which are not offered by the properties in the PMA. The LIHTC developments reported strong demand for affordable housing, although capture rates appear slightly elevated at this time. The two LIHTC properties in the PMA reported strong demand; one of these properties maintains a waiting list of 45 households. There are no proposed or under construction properties in the PMA at this time that would be competitive with the proposed Subject. The Subject's proposed rents are also at the top of the surveyed LIHTC market, indicating it will likely not negatively impact the older LIHTC properties that offer lower rents.

The Subject property is more heavily weighted towards two-bedroom units than the surveyed senior LIHTC properties in the market. However, there appears to be strong demand for both one and two-bedroom units for senior tenants in the market. Nearly half of senior households in the market consist of two or more persons. Therefore, we believe there is adequate demand for a higher concentration of two-bedroom units for seniors in the market, as larger bedroom types are generally considered more desirable at reasonable rents. The Subject's proposed LIHTC rents for its two-bedroom units are reasonable and similar to the one-bedroom unit rents at Southfork Apartments, which are reported to be in high demand. Therefore, we believe the Subject's two-bedroom units will be well accepted in the senior market.

9. Rental Trends in the PMA

The table below depicts household growth by tenure from 2000 through 2023.

| TENURE PATTERNS PMA | | | | | | | | |
|---------------------------------------|----------------|----------------|----------------|-----------------|--|--|--|--|
| Year | Owner- | Percentage | Renter- | Percentage | | | | |
| rear | Occupied Units | Owner-Occupied | Occupied Units | Renter-Occupied | | | | |
| 2000 | 13,154 | 74.3% | 4,549 | 25.7% | | | | |
| 2018 | 11,059 | 64.4% | 6,113 | 35.6% | | | | |
| Projected Mkt Entry September 2021 | 11,046 | 65.5% | 5,828 | 34.5% | | | | |
| 2023 | 11,039 | 66.1% | 5,663 | 33.9% | | | | |

Source: Esri Demographics 2018, Novogradac & Company LLP, April 2019

PMA TENURE PATTERNS OF SENIORS 55+

| Year | Owner- | Percentage | Renter- | Percentage |
|---------------------------------------|----------------|----------------|----------------|-----------------|
| Tear | Occupied Units | Owner-Occupied | Occupied Units | Renter-Occupied |
| 2000 | 5,847 | 84.9% | 1,039 | 15.1% |
| 2018 | 6,312 | 72.9% | 2,347 | 27.1% |
| Projected Mkt Entry September 2021 | 6,469 | 73.9% | 2,290 | 26.1% |
| 2023 | 6,560 | 74.4% | 2,257 | 25.6% |

Source: Esri Demographics 2018, Novogradac & Company LLP, April 2019

As the table illustrates, households within the PMA reside in predominately owner-occupied residences. Nationally, approximately two-thirds of the population resides in owner-occupied housing units, and one-third resides in renter-occupied housing units. For senior households, approximately 85 percent of seniors nationwide reside in owner-occupied housing, compared to 15 percent in renter-occupied housing. Therefore, there is a larger percentage of renters in the PMA than the nation, particularly among the senior population. This percentage is projected to remain relatively stable over the next five years.

Historical Vacancy

We were unable to compile historical vacancy information for the comparable properties. However, a number of property managers reported their vacancy rates are typically less than five percent and there is strong demand for housing in the market.

Change in Rental Rates

The following table illustrates rental rate increases as reported by the comparable properties.

| | RENT GROWTH | | | | | | | | |
|-----------------------------|----------------|---------|---------------------------------|--|--|--|--|--|--|
| Property Name | Rent Structure | Tenancy | Rent Growth | | | | | | |
| Campbell Place Apartments | LIHTC | Senior | None | | | | | | |
| Cottonwood Pointe | LIHTC | Senior | Increased up to four percent | | | | | | |
| Courtes De Emerald I And II | LIHTC/ Market | Family | N/A | | | | | | |
| Pine Ridge Estates | LIHTC | Family | Increased three to four percent | | | | | | |
| Southfork Apartments | LIHTC | Family | Increased up to two percent | | | | | | |
| Abbey Lake Apartments | Market | Family | Increased up to seven percent | | | | | | |
| Ashley Park Apartments | Market | Family | None | | | | | | |
| College Plaza Apartments | Market | Family | Increased less than one percent | | | | | | |
| Quail Rise Apartments | Market | Family | Increased one percent | | | | | | |

The LIHTC properties report growth of up to four percent in the past year. The market rate properties reported ret growth of up to seven percent in the past year. We anticipate that the Subject will be able to achieve moderate rent growth in the future as a LIHTC property.

10. Impact of Foreclosed, Abandoned and Vacant Structures

According to *RealtyTrac* statistics, one in every 2,312 housing units nationwide was in some stage of foreclosure as of March 2019. Foreclosure data was not immediately available for Bainbridge, while Decatur County is experiencing foreclosure rate of one in every 940 homes and Georgia experienced one foreclosure in every 2,091 housing units. Overall, Decatur is experiencing a higher foreclosure relative rate to the state of Georgia and nation. The Subject's neighborhood does not have a significant amount of abandoned or vacant structures that would impact the marketability of the Subject.

11. Effect of Subject on Other Affordable Units in Market

There are no proposed LIHTC developments in the PMA. While the LIHTC vacancy rate appears slightly elevated, this is mostly attributable to Courtes de Emerald I and II, which recently came under new management and is rapidly leasing units that remained vacant for extended periods of time. The majority of the remaining vacancies in the LIHTC market are pre-leased. Additionally, the surveyed senior LIHTC properties and the other family LIHTC property in Bainbridge maintain waiting lists at this time. Therefore, there appears to be strong demand for additional affordable housing in the market at this time. The Subject's proposed rents are also at the top of the surveyed market, indicating it will likely not negatively impact the older LIHTC properties that offer lower rents.

Conclusions

Based upon our market research, demographic calculations and analysis, we believe there is adequate demand for the Subject property as proposed. The LIHTC comparables are experiencing a weighted average vacancy rate of 7.8 percent, which is considered elevated. However, the majority of the vacancies at Campbell Place Apartments, Cottonwood Pointe and Pine Ridge Estates are pre-leased. The majority of the vacancies in the market are at Courtes de Emerald I and II, which recently came under new management and has been rapidly leasing units that were vacant under previous management. The contact at this property expects to maintain a waiting list in the near future and the remaining LIHTC properties reported waiting lists of up to 50 households. These factors indicate demand for affordable housing, particularly new construction senior housing. The Subject will offer generally similar to superior in-unit amenities in comparison to the LIHTC and market rate comparable properties and slightly superior property amenities. The Subject will offer in-unit washers and dryers, balconies/patios, a business center, community room and exercise facility, which several of the comparable properties lack. Overall, we believe that the proposed amenities will allow the Subject to effectively compete in the senior LIHTC market. As new construction, the Subject will be in excellent condition upon completion and will be considered similar to superior in terms of condition to the majority of the comparable properties. There are no age-restricted LIHTC properties in

Bainbridge and the senior properties in Camilla reported strong demand for age-restricted affordable housing and reported tenants originating from the Bainbridge area. Additionally, senior tenants were reported at the family properties surveyed in Bainbridge. Therefore, we believe the Subject will fill a void of age-restricted housing in the market. In general, the Subject will be slightly superior to superior to the comparable properties. The Subject's proposed rents are at the top of the surveyed LIHTC market but we believe these rents are reasonable based on outsized demand reported by the comparable properties. Given the Subject's anticipated superior condition relative to the competition and the demand for affordable housing evidenced by waiting lists and low vacancy at some of the LIHTC comparable properties, we believe that the Subject is feasible as proposed. We believe that it will fill a void in the market and will perform well.

I. ABSORPTION AND STABILIZATION RATES

ABSORPTION AND STABILIZATION RATES

We were able to obtain information regarding absorption paces from three of the comparable properties as well as two excluded properties in the region in for the past 12 years. This information is illustrated in the following table.

| | | ABSORPTIO | N | | |
|---------------------------|-----------------|-----------|------|-------------|-----------------------------|
| Property Name | Rent Program | Tenancy | Year | Total Units | Units Absorbed Per Month |
| Campbell Place Apartments | LIHTC | Family | 2016 | 52 | 6 |
| Pine Ridge Estates | LIHTC | Family | 2008 | 38 | 11 |
| Courtes De Emerald II | LIHTC | Family | 2008 | 32 | 5 |
| Kirby Creek Apartments | LIHTC | Family | 2007 | 56 | 14 |
| Cottonwood Pointe | LIHTC | Senior | 2007 | 48 | 6 |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed, new construction, age-restricted building. Only one LIHTC property that opened in the last decade was able to reported absorption information. Campbell Place Apartments, located in Camilla, reported an absorption pace of six units per month. The remaining LIHTC properties reported absorption paces of five to 14 units per month. We anticipate the Subject would operate with an absorption pace most similar to Campbell Place Apartments. We believe an estimated absorption pace of five units per month in reasonable, particularly given the rapid leasing of down units reported by Courtes de Emerald I and II. This would indicate an absorption period of nine months for the proposed Subject.

J. INTERVIEWS

Georgia Department of Community Affairs

We spoke with David Samloff, Director of Operations for the Georgia Department of Community Affairs. According to Mr. Samloff, DCA is authorized to issue 16,500 Housing Choice Vouchers for all of the counties under overseen by DCA throughout the state. Of those vouchers, approximately 14,000 of the authorized Housing Choice Vouchers are currently in use. The waiting list is closed with approximately 9,000 to 10,000 households on the list. There are no plans to reopen the waiting list in the near future. The Department of Community of Affairs does not give preference for the elderly, disabled persons, or military veterans. The payment standards for one, two, and three-bedroom units are illustrated in the proceeding table.

| PAYMENT STANDARDS | | | | | |
|-------------------|--|--|--|--|--|
| Standard | | | | | |
| \$966 | | | | | |
| \$1,083 | | | | | |
| \$1,412 | | | | | |
| | | | | | |

Source: Georgia Department of Community Affairs, effective 1/1/2019

The Subject's proposed rents are set below the current payment standards. Therefore, tenants with Housing Choice Vouchers will not pay out of pocket for rent.

Planning

We reviewed recent lists published by the Georgia Department of Community Affairs of tax credit allocations and tax exempt bond financing awards and identified no affordable properties proposed, under construction or recently completed within the PMA. We also consulted an April 2019 CoStar report for proposed and under construction properties in the PMA; no proposed or under construction properties were identified.

Development Authority of Bainbridge and Decatur County

We attempted to contact the Development Authority of Bainbridge and Decatur County regarding recent business expansions in the area. As of the date of this report, our calls have not been returned. Therefore, we conducted additional research regarding business expansion in the region.

- In March 2019, Advantage Capital announced a \$6,500,000 investment in Danimer Scientific, a biotechnology company manufacturing biodegradable polymers located in Bainbridge. The investment will allow Danimer Scientific to more than double their capacity, hire new employees and continue their rapid growth. There were no detailed employment figures immediately available.
- In November 2018, Decatur County received a Community Development Block Grant (CBDG) in the form of \$538,301 from the Georgia Department of Community Affairs, and the county will utilize the funds for street/drainage improvements. In total, the Georgia Department of Community Affairs awarded over \$38,000,000 in CBDG grants throughout Georgia, which are expected to create over 345 new jobs and generate \$50,200,000 in additional private investment.
- In April 2018, the governor of Georgia announced that Taurus USA, a Brazilian firearms manufacturer would make a substantial investment in Georgia to construct and operate a manufacturing plant. Taurus is investing \$22,500,000 to build and manage a 200,000 square foot manufacturing facility in Bainbridge. Plans call for the facility to be completed by the end of August 2019. The company intends to hire 300 full-time employees in Bainbridge.

Additional interviews can be found in the comments section of the property profiles.

NOVOGRADAC & COMPANY ILP

K. CONCLUSIONS AND RECOMMENDATIONS

CONCLUSIONS

Demographics

The population in the PMA decreased by 6.0 percent between 2000 and 2018, compared to the 4.3 percent decrease in the SMA and 17.5 percent increase across the nation. The population in the PMA is 45,902 and is projected to be 44,745 in September 2021. However, the senior population in the PMA is currently 14,499 and is projected to be 14,885 by September 2021. The percentage of senior renter households in the PMA increased between 2000 and 2018, and is estimated to be 26.1 percent as of 2018. This is well above the estimated 15 percent of senior renter households across the nation. The large percentage of senior renter households in the PMA bodes well for the Subject's development.

Employment Trends

The PMA and Decatur County are economically reliant on healthcare/social assistance, retail trade, manufacturing and educational services, which compose 46.1 percent of total employment in the PMA. Of these four industries, healthcare and educational services are historically less susceptible to job losses during recessionary conditions. However, the manufacturing and retail trade industries typically experience losses of employment during economic contractions.

Total employment in the SMA contracted in the years preceding the national recession, with annual job growth lagging the overall nation in all but two years between 2003 and 2007. The effects of the recessionary periods as well as the great recession were particularly pronounced in the SMA, which suffered a 9.3 percent contraction in employment growth (2003-2009), well above the 4.8 percent contraction reported by the nation as a whole during the great recession (2007-2010). Since 2012, average employment growth in the SMA trailed the nation in all but two years. As of February 2019, employment in the SMA is below record levels; and is declining at an annualized rate of 1.2 percent, compared to a 1.1 percent increase across the nation. In part due to the declining population, the local economy has not fully recovered from the national recession. Nonetheless, the Subject is well-positioned to serve a lower income population of seniors in the PMA, many of whom may no longer be in the workforce.

Capture Rates

The following table illustrates the demand and capture rates for the Subject's proposed units.

| | | CAP | IURE RAI | E ANALIS | IS CHAP | (1 | | |
|--------------|-------------------|-------------------|-------------------|-----------------|---------|---------------|-----------------|-------------------|
| Unit Type | Minimum Income | Maximum Income | Units Proposed | Total Demand | Supply | Net Demand | Capture Rate | Proposed Rents |
| 1BR @50% | \$16,110 | \$23,350 | 2 | 29 | 0 | 29 | 6.9% | \$441 |
| 1BR @60% | \$16,710 | \$24,540 | 10 | 38 | 0 | 38 | 26.4% | \$461 |
| 1BR Overall | \$16,110 | \$24,540 | 12 | 41 | 0 | 41 | 29.2% | - |
| 2BR @50% | \$19,410 | \$23,350 | 8 | 79 | 0 | 79 | 10.2% | \$525 |
| 2BR @60% | \$20,670 | \$28,020 | 28 | 103 | 0 | 103 | 27.3% | \$567 |
| 2BR Overall | \$19,410 | \$28,020 | 36 | 111 | 0 | 111 | 32.4% | - |
| @50% Overall | \$16,110 | \$23,350 | 10 | 108 | 0 | 108 | 9.3% | - |
| @60% Overall | \$16,710 | \$28,020 | 38 | 140 | 0 | 140 | 27.0% | - |
| Overall | \$16,110 | \$28,020 | 48 | 152 | 0 | 152 | 31.6% | - |

CAPTURE RATE ANALYSIS CHART

We believe these calculated capture rates are reasonable, particularly as these calculations do not consider demand from outside the PMA or standard rental household turnover. These capture rates are all below DCA thresholds.

Absorption

We were able to obtain information regarding absorption paces from three of the comparable properties as well as two excluded properties in the region in for the past 12 years. This information is illustrated in the following table.

| ABSORPTION | | | | | | | | | | |
|---------------------------|-------------------------|--------|------|-------------|-----------------------------|--|--|--|--|--|
| Property Name | Rent Tenancy Program | | Year | Total Units | Units Absorbed Per Month | | | | | |
| Campbell Place Apartments | LIHTC | Family | 2016 | 52 | 6 | | | | | |
| Pine Ridge Estates | LIHTC | Family | 2008 | 38 | 11 | | | | | |
| Courtes De Emerald II | LIHTC | Family | 2008 | 32 | 5 | | | | | |
| Kirby Creek Apartments | LIHTC | Family | 2007 | 56 | 14 | | | | | |
| Cottonwood Pointe | LIHTC | Senior | 2007 | 48 | 6 | | | | | |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed, new construction, age-restricted building. Only one LIHTC property that opened in the last decade was able to reported absorption information. Campbell Place Apartments, located in Camilla, reported an absorption pace of six units per month. The remaining LIHTC properties reported absorption paces of five to 14 units per month. We anticipate the Subject would operate with an absorption pace most similar to Campbell Place Apartments. We believe an estimated absorption pace of five units per month in reasonable, particularly given the rapid leasing of down units reported by Courtes de Emerald I and II. This would indicate an absorption period of nine months for the proposed Subject.

Vacancy Trends

The following table illustrates the vacancy rates in the market.

| OVERALL VACANCY | | | | | | | | | | |
|-----------------------------|----------------|---------|-------------|--------------|--------------|--|--|--|--|--|
| Property Name | Rent Structure | Tenancy | Total Units | Vacant Units | Vacancy Rate | | | | | |
| Campbell Place Apartments | LIHTC | Senior | 52 | 4 | 7.7% | | | | | |
| Cottonwood Pointe | LIHTC | Senior | 48 | 1 | 2.1% | | | | | |
| Courtes De Emerald I And II | LIHTC/ Market | Family | 60 | 13 | 21.7% | | | | | |
| Pine Ridge Estates | LIHTC | Family | 38 | 2 | 5.3% | | | | | |
| Southfork Apartments | LIHTC | Family | 96 | 3 | 3.1% | | | | | |
| Abbey Lake Apartments | Market | Family | 152 | 0 | 0.0% | | | | | |
| Ashley Park Apartments | Market | Family | 84 | 0 | 0.0% | | | | | |
| College Plaza Apartments | Market | Family | 34 | 0 | 0.0% | | | | | |
| Quail Rise Apartments | Market | Family | 109 | 0 | 0.0% | | | | | |
| Total LIHTC | | | 294 | 23 | 7.8% | | | | | |
| Total Market Rate | | | 379 | 0 | 0.0% | | | | | |
| Overall Total | | | 673 | 23 | 3.4% | | | | | |

Overall vacancy in the market is moderate at 3.1 percent. Total LIHTC vacancy is higher, at 7.8 percent. One of the comparable properties, Courtes de Emerald I and II, reported a significantly elevated vacancy rate of 21.7 percent. However, the contact at this property reported that is it under new management since the beginning of May. The previous management company let vacant units go unleased. The new manager has leased 20 vacant units since taking over the property and there are five applications pending for the remaining 13 units at this time. However, management believes all of the vacant units will be leased shortly and the property will begin to maintain a waiting list, based on the strong interest at the property. The majority of recently leased vacancies were tenants who visited the property in person and management has not yet begun to lease units to tenants who have only contacted the property by phone but plan to tour the

property in the coming days. The manager at this property reported there appears to be significant demand for affordable housing in the market based on the volume of calls and inquiries received since she has taken over. Therefore, we do not believe the elevated vacancy rate at this property is indicative of limited demand for affordable housing in the market, rather it is due to property specific issues.

The remaining comparable LIHTC properties reported few vacancies. Additionally, all of the current vacancies at Cottonwood Pointe and Pine Ridge Estates are pre-leased at this time, as well as two of the vacancies at Campbell Place. Cottonwood Pointe maintains a waiting list of six households at this time and Pine Ridge Estates, which is located in Bainbridge, maintains a waiting list of 45 households. Campbell Place, which is the newest senior property surveyed, maintains a waiting list of 50 households. Therefore, we believe there is significant demand for additional affordable housing in the market, particularly in Bainbridge and among senior tenants.

The market rate properties reported no vacancies at this time. Two of these properties also maintain waiting lists. Ashely Park Apartments reported maintaining a waiting list of 200 households. This indicates there is strong demand in the market for accessible, new construction housing. Based on these factors, we believe that there is sufficient demand for additional affordable housing in the market. We do not believe that the Subject will impact the performance of the existing LIHTC properties if allocated.

Strengths of the Subject

The Subject will offer a superior in-unit amenity package to nearly all of the comparable properties as all but one lack in-unit washers and dryers, which the Subject will offer. The Subject will also offer superior community amenities to the existing surveyed developments as it will offer an exercise facility, business center and community room, but lack a swimming pool. The Subject will also be new construction, which is superior to all of the surveyed housing in Bainbridge. The newest of the surveyed comparable properties, Campbell Place Apartments, also reported the longest waiting list. The Subject's proposed rents also offer discount to all of the surveyed unrestricted properties in the market. As the demand analysis in this report indicates, there is adequate demand for the Subject based on our calculations for the 50 and 60 percent AMI units

Conclusion

Based upon our market research, demographic calculations and analysis, we believe there is adequate demand for the Subject property as proposed. The LIHTC comparables are experiencing a weighted average vacancy rate of 7.8 percent, which is considered elevated. However, the majority of the vacancies at Campbell Place Apartments, Cottonwood Pointe and Pine Ridge Estates are pre-leased. The majority of the vacancies in the market are at Courtes de Emerald I and II, which recently came under new management and has been rapidly leasing units that were vacant under previous management. The contact at this property expects to maintain a waiting list in the near future and the remaining LIHTC properties reported waiting lists of up to 50 households. These factors indicate demand for affordable housing, particularly new construction senior housing. The Subject will offer generally similar to superior in-unit amenities in comparison to the LIHTC and market rate comparable properties and slightly superior property amenities. The Subject will offer in-unit washers and dryers, balconies/patios, a business center, community room and exercise facility, which several of the comparable properties lack. Overall, we believe that the proposed amenities will allow the Subject to effectively compete in the senior LIHTC market. As new construction, the Subject will be in excellent condition upon completion and will be considered similar to superior in terms of condition to the majority of the comparable properties. There are no age-restricted LIHTC properties in Bainbridge and the senior properties in Camilla reported strong demand for age-restricted affordable housing and reported tenants originating from the Bainbridge area. Additionally, senior tenants were reported at the family properties surveyed in Bainbridge. Therefore, we believe the Subject will fill a void of age-restricted housing in the market. In general, the Subject will be slightly superior to superior to the comparable properties. The Subject's proposed rents are at the top of the surveyed LIHTC market but we

believe these rents are reasonable based on outsized demand reported by the comparable properties. Given the Subject's anticipated superior condition relative to the competition and the demand for affordable housing evidenced by waiting lists and low vacancy at some of the LIHTC comparable properties, we believe that the Subject is feasible as proposed. We believe that it will fill a void in the market and will perform well.

Recommendations

We recommend the Subject as proposed.

NOVOGRADAC & COMPANY LLP

L. SIGNED STATEMENT REQUIREMENTS

I affirm that I (or one of the persons signing below) made a physical inspection of the market area and the Subject property and that information has been used in the full study of the need and demand for the proposed units. The report is written according to DCA's market study requirements, the information included is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

DCA may rely on the representation made in the market study. The document is assignable to other lenders.

ADDENDUM A Assumptions and Limiting Conditions

ASSUMPTIONS AND LIMITING CONDITIONS

- 1. In the event that the client provided a legal description, building plans, title policy and/or survey, etc., the market analyst has relied extensively upon such data in the formulation of all analyses.
- 2. The legal description as supplied by the client is assumed to be correct and the author assumes no responsibility for legal matters, and renders no opinion of property title, which is assumed to be good and merchantable.
- 3. All encumbrances, including mortgages, liens, leases, and servitudes, were disregarded in this valuation unless specified in the report. It was recognized, however, that the typical purchaser would likely take advantage of the best available financing, and the effects of such financing on property value were considered.
- 4. All information contained in the report, which others furnished, was assumed to be true, correct, and reliable. A reasonable effort was made to verify such information, but the author assumes no responsibility for its accuracy.
- 5. The report was made assuming responsible ownership and capable management of the property.
- 6. The sketches, photographs, and other exhibits in this report are solely for the purpose of assisting the reader in visualizing the property. The author made no property survey, and assumes no liability in connection with such matters. It was also assumed there is no property encroachment or trespass unless noted in the report.
- 7. The author of this report assumes no responsibility for hidden or unapparent conditions of the property, subsoil or structures, or the correction of any defects now existing or that may develop in the future. Equipment components were assumed in good working condition unless otherwise stated in this report.
- 8. It is assumed that there are no hidden or unapparent conditions for the property, subsoil, or structures, which would render it more or less valuable. No responsibility is assumed for such conditions or for engineering, which may be required to discover such factors.
- 9. The investigation made it reasonable to assume, for report purposes, that no insulation or other product banned by the Consumer Product Safety Commission has been introduced into the Subject premises. Visual inspection by the market analyst did not indicate the presence of any hazardous waste. It is suggested the client obtain a professional environmental hazard survey to further define the condition of the Subject soil if they deem necessary.
- 10. Any distribution of total property value between land and improvements applies only under the existing or specified program of property utilization. Separate valuations for land and buildings must not be used in conjunction with any other study or market study and are invalid if so used.
- 11. Possession of the report, or a copy thereof, does not carry with it the right of publication, nor may it be reproduced in whole or in part, in any manner, by any person, without the prior written consent of the author particularly as to value conclusions, the identity of the author or the firm with which he or she is connected. Neither all nor any part of the report, or copy thereof shall be disseminated to the general public by the use of advertising, public relations, news, sales, or other media for public communication without the prior written consent and approval of the market analyst. Nor shall the market analyst,

firm, or professional organizations of which the market analyst is a member be identified without written consent of the market analyst.

- 12. Disclosure of the contents of this report is governed by the Bylaws and Regulations of the professional organization with which the market analyst is affiliated.
- 13. The author of this report is not required to give testimony or attendance in legal or other proceedings relative to this report or to the Subject property unless satisfactory additional arrangements are made prior to the need for such services.
- 14. The opinions contained in this report are those of the author and no responsibility is accepted by the author for the results of actions taken by others based on information contained herein.
- 15. Opinions of value contained herein are estimates. There is no guarantee, written or implied, that the Subject property will sell or lease for the indicated amounts.
- 16. All applicable zoning and use regulations and restrictions are assumed to have been complied with, unless nonconformity has been stated, defined, and considered in the market study report.
- 17. It is assumed that all required licenses, permits, covenants or other legislative or administrative authority from any local, state, or national governmental or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this report is based.
- 18. On all studies, Subject to satisfactory completion, repairs, or alterations, the report and conclusions are contingent upon completion of the improvements in a workmanlike manner and in a reasonable period of time.
- 19. All general codes, ordinances, regulations or statutes affecting the property have been and will be enforced and the property is not Subject to flood plain or utility restrictions or moratoriums, except as reported to the market analyst and contained in this report.
- 20. The party for whom this report is prepared has reported to the market analyst there are no original existing condition or development plans that would Subject this property to the regulations of the Securities and Exchange Commission or similar agencies on the state or local level.
- 21. Unless stated otherwise, no percolation tests have been performed on this property. In making the market study, it has been assumed the property is capable of passing such tests so as to be developable to its highest and best use.
- 22. No in-depth inspection was made of existing plumbing (including well and septic), electrical, or heating systems. The market analyst does not warrant the condition or adequacy of such systems.
- 23. No in-depth inspection of existing insulation was made. It is specifically assumed no Urea Formaldehyde Foam Insulation (UFFI), or any other product banned or discouraged by the Consumer Product Safety Commission has been introduced into the property. The market analyst reserves the right to review and/or modify this market study if said insulation exists on the Subject property.
- 24. Estimates presented in this report are assignable to parties to the development's financial structure.

IV. Professional Training

Have presented at and attended various industry conferences regarding the HTC, RETC, NMTC and LIHTC and various market analysis and valuation issues.

Obtained the MAI designation in 1998, maintaining continuing education requirements since. Registered as completing additional professional development programs administered by the Appraisal Institute in the following topic areas:

- 1) Valuation of the Components of a Business Enterprise
- 2) Valuation of Sustainable Buildings: Commercial
- 3) Valuation of Sustainable Buildings: Residential

V. Real Estate Assignments – Examples

In general, have managed and conducted numerous market analyses and appraisals for all types of commercial real estate since 1988.

- Performed numerous appraisals for the US Army Corps of Engineers US Geological Survey and the GSA. Property types included Office, Hotel, Residential, Land, Gymnasium, warehouse space, border patrol office. Properties located in varied locations such as the Washington, DC area, Yuma, AZ, Moscow, ID, Blaine, WA, Lakewood, CO, Seattle, WA
- Performed appraisals of commercial properties such as hotels, retail strip centers, grocery stores, shopping centers etc for properties in various locations throughout Pennsylvania, New Jersey, Maryland, New York for Holiday, Fenoglio, Fowler, LP and Three Rivers Bank.
- Have managed and conducted numerous market and feasibility studies for affordable housing. Properties are generally Section 42 Low Income Housing Tax Credit Properties. Local housing authorities, developers, syndicators and lenders have used these studies to assist in the financial underwriting and design of LIHTC properties. Analysis typically includes; unit mix determination, demand projections, rental rate analysis, competitive property surveying and overall market analysis. An area of special concentration has been the category of Senior Independent living properties. Work has been national in scope.
- Provided appraisal and market studies for a large portfolio of properties located throughout the United States. The reports provided included a variety of property types including vacant land, office buildings, multifamily rental properties, gas stations, hotels, retail buildings, industrial and warehouse space, country clubs and golf courses, etc. The portfolio included more than 150 assets and the work was performed for the SBA through Metec Asset Management LLP.
- Have managed and conducted numerous appraisals of affordable housing (primarily LIHTC developments). Appraisal assignments typically involved determining the as is, as if complete and the as if complete and stabilized values. Additionally, encumbered

(LIHTC) and unencumbered values were typically derived. The three traditional approaches to value are developed with special methodologies included to value tax credit equity, below market financing and Pilot agreements.

- Performed numerous appraisals in 17 states of proposed new construction and existing properties under the HUD Multifamily Accelerated Processing program. These appraisals meet the requirements outlined in HUD Handbook 4465.1 and Chapter 7 of the HUD MAP Guide.
- Performed numerous market study/appraisals assignments for USDA RD properties in several states in conjunction with acquisition rehabilitation redevelopments. Documents are used by states, FannieMae, USDA and the developer in the underwriting process. Market studies are compliant to State, FannieMae and USDA requirements. Appraisals are compliant to FannieMae and USDA HB-1-3560 Chapter 7 and Attachments.
- Completed numerous FannieMae appraisals of affordable and market rate multi-family properties for Fannie DUS Lenders. Currently have ongoing assignment relationships with several DUS Lenders.
- In accordance with HUD's Section 8 Renewal Policy and Chapter 9, Mr. Kincer has completed numerous Rent Comparability Studies for various property owners and local housing authorities. The properties were typically undergoing recertification under HUD's Mark to Market Program.
- Completed Fair Market Value analyses for solar panel installations, wind turbine installations, and other renewable energy assets in connection with financing and structuring analyses performed by various clients. The clients include lenders, investors, and developers. The reports are used by clients and their advisors to evaluate certain tax consequences applicable to ownership. Additionally, the reports have been used in the ITC funding process and in connection with the application for the federal grant identified as Section 1603 American Recovery & Reinvestment Act of 2009.

STATEMENT OF PROFESSIONAL QUALIFICATIONS ABBY M. COHEN

I. Education

The Pennsylvania State University, University Park, PA Bachelor of Arts

II. Licensing and Professional Affiliation

Certified General Appraiser, MD License #40032823 Certified General Appraiser, NC License #A8127 Certified General Appraiser, NJ License #42RG00255000 Certified General Appraiser, SC License #7487

Candidate for Designation in the Appraisal Institute Designated Member of the National Council of Housing Market Analysts (NCHMA) Member of Commercial Real Estate Women (CREW) Network

III. Professional Experience

Novogradac & Company LLP, Principal Novogradac & Company LLP, Manager Novogradac & Company LLP, Senior Real Estate Analyst

IV. Professional Training

V. Publications

Co-authored "Post Rev. Proc. 2014-12 Trend Emerges: Developer Fee Reasonableness Opinions," Novogradac Journal of Tax Credits, March 2016

VI. Real Estate Assignments

A representative sample of Asset Management, Due Diligence, and Valuation Engagements includes:

- Performed a variety of asset management services for a lender including monitoring and reporting property performance on a monthly basis. Data points monitored include economic vacancy, levels of concessions, income and expense levels, NOI and status of capital projects. Data used to determine these effects on the project's ability to meet its incomedependent obligations.
- Performed asset management services for lenders and syndicators on underperforming assets to identify significant issues facing the property and recommend solutions. Scope of work included analysis of deferred maintenance and property condition, security issues, signage, marketing strategy, condition of units upon turnover and staffing plan. Performed a physical inspection of the assets, to include interior and exterior of property and assessed how the property compares to competition. Analyzed operating expense results.
- Prepared market studies for proposed Low-Income Housing Tax Credit, market rate, HOME financed, USDA Rural Development, and HUD subsidized properties, on a national basis. Analysis includes property screenings, market analysis, comparable rent surveys, demand analysis based on the number of income qualified renters in each market, supply analysis, and operating expenses analysis. Property types include proposed multifamily, senior independent living, large family, and acquisition with rehabilitation. Completed market studies in all states.
- Assisted in appraisals of proposed new construction, rehabilitation, and existing Low-Income Housing Tax Credit properties, USDA Rural Development, and market rate multifamily developments. Analysis includes property screenings, valuation analysis, rent comparability studies, expense comparability analysis, determination of market rents, and general market analysis.
- Assisted in appraisal work for retail and commercial properties in various parts of the country for various lenders. The client utilized the study for underwriting purposes.
- Conducted market studies and appraisals for projects under the HUD Multifamily Accelerated Processing program.
- Prepared Rent Comparability Studies for expiring Section 8 contracts for subsidized properties located throughout the United States. Engagements included site visits to the subject property, interviewing and inspecting potentially comparable properties, and the analyses of collected data including adjustments to comparable data to determine appropriate adjusted market rents using HUD form 92273.
- Performed all aspects of data collection and data mining for web-based rent reasonableness systems for use by local housing authorities.
- Completed numerous reasonableness opinions related to Revenue Procedure 2014-12. Transactions analyzed include projects involving the use of Historic Tax Credits, New Markets Tax Credits and Investment Tax Credits. Fees and arrangements tested for reasonableness include developer fees, construction management fees, property management fees, asset management fees, various leasing-related payments and overall master lease terms.

STATEMENT OF PROFESSIONAL QUALIFICATIONS LAUREN E. SMITH

I. Education

Trinity College, Hartford, CT Bachelor of Arts in American Studies and Art History, *cum laude*

II. Professional Experience

Senior Analyst, *Novogradac & Company LLP*, August 2013 – Present Campaign Intern, *John Larson for U.S. Congress,* September 2012- November 2012 Communications Directorate Intern, *U.S. Census Bureau*, June 2011 – August 2011

III. Real Estate Assignments

A representative sample of work on various types of projects:

- Prepared market studies for proposed new construction and existing Low Income Housing Tax Credit, Section 8, and market rate developments for use by real estate developers, governmental entities, and financial institutions. Property types included special needs and age restricted developments. Studies included property screenings, market and demographic analysis, comparable rent surveys, and supply and demand analysis.
- Assisted in appraisals of proposed new construction, rehabilitation, and existing Low-Income Housing Tax Credit properties, and market rate multifamily developments. Analysis includes property screenings, expense comparability analysis, demographic and economic analysis.
- Performed all aspects of data collection and data mining for use in market studies, feasibility studies, and appraisals.
- Completed numerous analyses of overall reasonableness with regard to Revenue Procedure 2014-12. Transactions analyzed include projects involving the use of Historic Tax Credits, New Markets Tax Credits and Investment Tax Credits. Fees and arrangements tested for reasonableness include developer fees, construction management fees, property management fees, asset management fees, various leasingrelated payments and overall master lease terms.
- Performed asset management services for lenders and syndicators on underperforming assets to identify significant issues facing the property and recommend solutions. Scope of work included analysis of deferred maintenance and property condition, security issues, signage, marketing strategy, condition of units upon turnover and staffing plan. Performed a physical inspection of the assets, to include interior and exterior of property and assessed how the property compares to competition. Analyzed operating expense results.

STATEMENT OF PROFESSIONAL QUALIFICATIONS MOLLY CARPENTER

I. Education

University of Maryland, College Park – College Park, MD Master of Community Planning

Iowa State University – Ames, IA Bachelor of Science, Community and Regional Planning

II. Professional Experience

Junior Analyst, Novogradac & Company LLP – March 2018 – Present Research Analyst, Sage Computing – June 2017 – March 2018 Intern, Maryland Department of Housing and Community Development – August 2016 – May 2017

III. Research Assignments

A representative sample of work on various types of projects:

- Assist in performing and writing markets studies of proposed and existing Low-Income Housing Tax Credit (LIHTC) properties.
- Research web-based rent reasonableness systems and contact local housing authorities for utility allowance schedules, payment standards, and Housing Choice Voucher information.
- Assisted numerous market and feasibility studies for family and senior affordable housing. Local housing authorities, developers, syndicators and lenders have used these studies to assist in the financial underwriting and design of market-rate and Low-Income Housing Tax Credit (LIHTC) properties. Analysis typically includes: unit mix determination, demand projections, rental rate analysis, competitive property surveying and overall market analysis.
