Mr. Brandon Kearse City Views Preservation, LO c/o Jonathan Rose Companies 551 Fifth Avenue, 23rd Floor New York, NY 10176

Re: Application Market Study for City Views at Rosa Burney Park, located in Atlanta, Fulton County, Georgia

Dear Mr. Kearse:

At your request, Novogradac Consulting LLP has performed a market study of the multifamily rental market in the Atlanta, Fulton County, Georgia area relative to the above-referenced Low-Income Housing Tax Credit (LIHTC) project.

The purpose of this market study is to assess the feasibility of City Views at Rosa Burney Park (Subject), a proposed acquisition and rehabilitation of an existing 181-unit mixed income, intergenerational multifamily property to be funded with LIHTC equity. Upon completion, the units will be targeted to seniors and families earning 40, 60, and 80 percent of Area Median Income (AMI) or less. Additionally, 154 of the 181 units will continue to receive project-based Section 8 rental assistance, post renovations. The following report provides support for the findings of the study and outlines the sources of information and the methodologies used to arrive at these conclusions.

The scope of this report meets the requirements of Georgia Department of Community Affairs (DCA), including the following:

- Inspecting the site of the proposed Subject and the general location.
- Analyzing appropriateness of the proposed unit mix, rent levels, available amenities and site.
- Estimating market rent, absorption and stabilized occupancy level for the market area.
- Investigating the health and conditions of the multifamily market.
- Calculating income bands, given the proposed Subject rents.
- Estimating the number of income eligible households.
- Reviewing relevant public records and contacting appropriate public agencies.
- Analyzing the economic and social conditions in the market area in relation to the proposed project.
- Establishing the Subject Primary and Secondary Market Area(s) if applicable.
- Surveying competing projects, Low-Income Housing Tax Credit (LIHTC) and market rate.

This report contains, to the fullest extent possible and practical, explanations of the data, reasoning, and analyses that were used to develop the opinions contained herein. The report also includes a thorough analysis of the scope of the study, regional and local demographic and economic studies, and market analyses including conclusions. The depth of discussion contained in the report is specific to the needs of the client. Information included in this report is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market. This report is completed in accordance with DCA market study guidelines. We inform the reader that other users of this document may underwrite the LIHTC rents to a different standard than contained in this report.

CITY VIEWS PRESERVATION, LO C/O JONATHAN ROSE COMPANIES DECEMBER 2019 PAGE 2

The Stated Purpose of this assignment is for tax credit application. You agree not to use the Report other than for the Stated Purpose, and you agree to indemnify us for any claims, damages or losses that we may incur as the result of your use of the Report for other than the Stated Purpose. Without limiting the general applicability of this paragraph, under no circumstances may the Report be used in advertisements, solicitations and/or any form of securities offering.

The authors of this report certify that we are not part of the development team, owner of the Subject property, general contractor, nor are we affiliated with any member of the development team engaged in the development of the Subject property or the development's partners or intended partners. Please do not hesitate to contact us if there are any questions regarding the report or if Novogradac Consulting LLP can be of further assistance. It has been our pleasure to assist you with this project.

Respectfully Submitted,

EXECUTIVE SUMMARY

1. Project Description

City Views at Rosa Burney Park (Subject) is an existing 181-unit mixed-income intergenerational multifamily development that is proposed for LIHTC renovations in 2020. The Subject site is located at 259 Richardson Street SW in Atlanta, Fulton County, Georgia 30312. The Subject site is located at 259 Richardson Street SW in Atlanta, Fulton County, Georgia 30312. The Subject site has frontage along Richardson Street SW, Windsor Street SW, Formwalt Street SW, and Fulton Street SW. The Subject offers 112 one-, 10 two-, 36 three-, 19 four-, and four five-bedroom units. Of the Subject's 112 one-bedroom units, 111 are age-restricted to seniors age 62 and older, and one is a non-rental unit currently utilized as a storage area. A single 10-story highrise building contains all of the one-bedroom units, and the remaining two-through five-bedroom units are distributed amongst 10 townhouse-style residential buildings. The Subject was originally constructed in 1972 and renovated with LIHTC in 2002. The highrise building features brick masonry construction with a flat roof, while the townhouse buildings have brick and vinyl exteriors with pitched asphalt shingle roofs. At the time of inspection, the Subject was in average overall condition. Additionally, the Subject is proposed to be substantially renovated in 2020 with LIHTC equity.

The following table illustrates the proposed unit mix.

		181					

Notes (1) Source of Utility Allowance provided by the HUD Rent Schedule, effective 1/1/2019.

Post renovation, 154 of the Subject's 181 units will continue to operate with project-based rental assistance, and tenants in these units will pay 30 percent of their income towards rent. The proposed Section 8 contract rents for the Subject's units at 40 and 60 percent of AMI are above the maximum allowable levels for each unit type; thus, we have utilized the maximum allowable rents for the purpose of our rental analysis. As proposed, the Subject will be similar to superior to the comparables in terms of condition and property amenities, and inferior to slightly superior in terms of unit amenities. Additionally, the Subject will offer a slightly inferior to slightly superior location and inferior unit sizes relative to the comparables. The adjusted rents at the highest LIHTC and market rate comparables are above the Subject's achievable LIHTC rents for

each unit type, absent subsidy. The Subject's achievable LIHTC rents are above the overall adjusted average of the comparables for one-, two-, and three-bedroom units, and below the average for four- and five-bedroom units. Overall, we believe that the proposed amenities will allow the Subject to effectively compete in the LIHTC market.

2. Site Description/Evaluation

The Subject site is located at 259 Richardson Street SW in Atlanta, Fulton County, Georgia 30312. The Subject site has frontage along Richardson Street SW, Windsor Street SW, Formwalt Street SW, and Fulton Street SW. The Subject has visibility from Windsor Street SW, Fulton Street SW, Richardson Street SW, Crumley Street SW, and Formwalt Street SW. Overall, views and visibility are considered average, and access is considered good. The Subject is located in a mixed-use neighborhood with residential, commercial, public, religious, and educational uses. Residential and commercial improvements in the Subject's location are generally in fair to good condition. It should be noted that vacant single- and multifamily residential uses in poor condition were observed in the Subject's neighborhood. Based on our inspection of the neighborhood, retail and commercial uses appeared to be approximately 80 percent occupied. The Subject site is considered "Very Walkable" by Walk Score with a rating of 71 out of 100, indicating most errands can be accomplished on foot. Total crime risk indices in the PMA are more than triple the national average, and above the surrounding MSA. Both geographic areas feature crime risk indices above the overall nation. The Subject currently offers limited access and intercoms in its one-bedroom highrise units. The two-through five-bedroom townhouse units do not offer security features. All of the comparables offer some form of security. Overall, the Subject is considered similar to inferior terms of security features. The Subject site is considered to be in a desirable location for rental housing, within walking distance to some local amenities. The uses surrounding the Subject are in average to good condition, and the site is within reasonable proximity to locational amenities, the majority of which are within 2.0 miles of the Subject.

3. Market Area Definition

The primary market area (PMA) for the Subject encompasses the central-southern of Atlanta, Georgia. The PMA encompasses approximately 6.8 square miles. The distances from the Subject to the farthest boundaries of the PMA in each direction are listed as follows:

North: .32 mile
East: 1.88 miles
South: 3.15 miles
West: 2.13 miles

The PMA is defined as Interstate 20 to the north, MARTA Gold/Red Rail Line to the west, Arthur B Langford Jr. Parkway/GA-154 to the south, and Boulevard SE, McDonough Boulevard SE/GA-54, and Interstate 85 to the east. This area was defined based on interviews with local market, including property managers at comparable properties and the Subject's property manager. The farthest PMA boundary from the Subject is approximately 3.15 miles. The secondary market area (SMA) for the Subject is the Atlanta-Sandy Springs-Roswell, GA Metropolitan Statistical Area (MSA), which is comprised of Fulton, Gwinnett, Cobb, DeKalb, Clayton, Cherokee, Henry, Forsyth, Paulding, Douglas, Coweta, Carroll, Fayette, Newton, Bartow, Rockdale, Walton, Barrow, Spalding, Pickens, Haralson, Butts, Dawson, Meriwether, Lamar, Morgan, Pike, Jasper, and Heard Counties.

4. Community Demographic Data

The PMA population is projected to increase at a similar rate to the nation and slower than the MSA through market entry and through 2023. The senior population is projected to increase at a faster rate than the general population, faster than the national senior growth rate and below the MSA, through market entry and 2023. The largest age cohorts in the PMA are between 25 to 39. Approximately 10.1 percent of the population is concentrated in age cohorts over 65, which indicates a limited number of senior residents. The number of total households is projected to increase at a similar rate to the nation and slower than the MSA through

market entry and through 2023. The number of senior households is projected to increase at a faster rate than the number of total households, faster than the national senior growth rate and below the MSA, through market entry and 2023. The Subject will target senior households ranging from one to two persons, and family households ranging from two to eight persons; thus, the vast majority of renter households in the PMA will be eligible to reside at the Subject. The percentage of renter households in the PMA is estimated to be 67 percent as of 2018. The percentage of renter households in the PMA is expected to remain relatively stable through market entry and 2023. The majority of senior households in the PMA are renter-occupied, at 58.9 percent in 2018. This figure is also projected to remain relatively stable through market entry and 2023. Absent subsidy, the Subject will target senior households earning between \$17,940 and \$51,040, as well as family households earning between \$36, 926 and \$63,180. Approximately 20.8 percent of senior renter households in the PMA are earning incomes of \$20,000 to \$50,000 annually, and approximately 38.2 percent of total households are earning between \$20,000 and \$75,000 annually, which generally represents the Subject's target tenancy. For the projected market entry date of June 2021, these percentages are expected to remain generally similar, at 21.7 percent and 38.4 percent for the senior and family households, respectively. It should be noted that the Subject is currently operating as a stabilized property with project-based Section 8 rental assistance for 154 of its 181 units. The Subject will continue to operate with project-based Section 8 rental assistance on 154 of its 181 units, post renovations. As proposed, the Subject will target senior households earning between \$0 and \$51,040, and family households earning between \$0 and \$74,000. This income band comprises a significantly larger portion of renter households, with 90.0 percent of senior renter households in the PMA earning less than \$50,000 annually, and 92.3 percent of total households earning under \$75,000 annually. Overall, the increasing population in the PMA coupled with a high concentration of renter households earning qualifying incomes in the PMA indicates significant demand for affordable rental housing in the market.

5. Economic Data

Covered employment has grown in each year since 2011, and surpassed 2008 levels in 2013. Employment in the PMA is concentrated in the accommodation/food services, healthcare/social assistance, and prof/scientific/tech services industries, which collectively comprise 34 percent of local employment. The large share of PMA employment in accommodation/food services is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods. The effects of the recession were more pronounced in the MSA, which suffered a 6.8 percent employment contraction, compared to only 4.8 percent across the overall nation. Employment in the MSA recovered and surpassed pre-recessionary levels in 2015, a year after the overall nation. As of August 2019, total employment in the MSA is at a post-recessionary record and increasing at an annualized rate of 0.9 percent, compared to 1.5 percent across the overall nation. Overall, the local economy appears to have fully recovered from the national recession and entered into an expansionary phase.

6. Project-Specific Affordability and Demand Analysis

The following table illustrates the demand and capture rates for the Subject's proposed units.

				CA	APTURE RA	TE ANALYSIS	CHART					
Unit Type	Minimum Income	Maximum Income	Units Proposed	Total Demand	Supply	Net Demand	Capture Rate	Absorption	Average Market Rents	Minimum Market Rent	Maximum Market Rent	Proposed Rents

Overall	\$17,940	\$74,000	2	1,760	45	1715	0.12%	One Month	N/A	N/A	N/A	N/A

As the analysis illustrates, the Subject's overall capture rate is approximately 0.1 percent, absent subsidy. Assuming all vacant units are to be absorbed at each unique AMI level, The Subject's three-bedroom capture rates by AMI level range from 1.4 to 1.6 percent. The Subject's one-bedroom capture rate at 80 percent of AMI is approximately 1.2 percent. Therefore, we believe there is adequate demand for the Subject. The overall capture rate at the Subject, as well as all applicable AMI and bedroom-type capture rates, are well below the 2019 DCA Market Study capture rate threshold of 30 percent.

7. Competitive Rental Analysis

Comparable properties are examined on the basis of physical characteristics, i.e. building type, age/quality, level of common amenities, absorption, as well as similarity in rent. We attempted to compare the Subject to complexes from the competing market to provide a broader picture of the health and available supply in the market. Our competitive survey includes 12 "true" comparable properties containing 3,826 units.

The availability of LIHTC data is considered good; we have included eight comparable properties which offer LIHTC units, all of which are located within the PMA. It should be noted that seven of the comparable LIHTC properties feature market rate units, which is common in the Subject's market area. We believe these comparables are the most comparable properties in the area and are located in generally similar to inferior areas in terms of access to amenities. Additionally, one LIHTC comparable, Columbia Senior Residences at Mechanicsville, is age-restricted to senior households. Further, it should also be noted that we were unable to identify any affordable rent comparables that offer five-bedroom units, which are rare in the local market.

Finally, it is of note that the Subject's 154 units currently benefit from a Housing Assistance Program (HAP) contract. Following renovation, 154 of the Subject's 181 units will continue to benefit from Section 8 subsidy. As such, qualifying tenants will pay only 30 percent of their household income on rent. The comparable affordable properties are located between 0.4 and 4.9 miles from the Subject, and four of the eight affordable comparables are located in the Subject's PMA.

The availability of market rate data is considered average. It should be noted that there is a lack of market rate senior development in the Subject's immediate area and the PMA; therefore, all of the market rate comparables target the general population. We have included four conventional market rate properties in our analysis of the competitive market. The market rate properties are located between 1.8 and 8.3 miles from the Subject, and one of the five market rate comparables, Brookside Park Apartments, is located in the Subject's PMA. The comparables were built or last renovated between 1971 and 2019. Overall, we believe the market rate properties we have used in our analysis are the most comparable. It should be noted that the

majority of multifamily housing in the Subject's immediate area is either fully or partially income- and rent-restricted housing. Due to the lack of market rate housing in the Subject's immediate area, we have included market rate units from three of the nearby mixed-income comparables in our rent grids. The asking rents for these units are in line with those of the market rate comparables and appear market-oriented. Additionally, due to the relative lack of four-bedroom unit types in the Subject's market area, we extended our search for comparables that offer four-bedroom units beyond the Subject's PMA, and have included two such properties. We were unable to identify any market rate comparables that offer five-bedroom units, which are rare in the local rental market. Other market rate properties were excluded based on condition, design, tenancy, and inability to contact management.

Per DCA's market study guidelines, "average market rent is to be a reflection of rents that are achieved in the market. In other words, the rents the competitive properties are currently receiving. Average market rent is not 'Achievable unrestricted market rent.'" In an urban market with many tax credit comps, the average market rent might be the weighted average of those tax credit comps. In cases where there are few tax credit comps, but many market rate comps with similar unit designs and amenity packages, then the average market rent might be the weighted average of those market-rate comps. In a small rural market there may be neither tax credit comps nor market rate comps with similar positioning as the Subject. In a case like that the average market rent would be a weighted average of whatever rents were present in the market. In the case of the Subject's market area, all of the comparables offer one-, two-, and three-bedroom units at 60 percent of AMI; thus, the average market rent reflects these units. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable market rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison.

When comparing the Subject's rents to the average comparable rent, we have not included surveyed rents at lower AMI levels given that this artificially lowers the average surveyed rent. Including rents at lower AMI levels does not reflect an accurate average rent for rents at higher income levels. For example, if the Subject offers rents at the 50 and 60 percent of AMI levels, and there is a distinct difference at comparable properties between rents at the two AMI levels, we would not include the 50 percent of AMI rents in the average comparable rent for the 60 percent of AMI comparison. In this case, we have utilized the 60 percent of AMI rents for all comparables in comparison to the Subject's 40 and 60 percent of AMI units, as applicable. Adjusted market rents, supported by the rent grids, have been utilized for the Subject's 80 percent of AMI units.

The overall average and the maximum and minimum adjusted rents for the comparable properties surveyed are illustrated in the table below in comparison with the concluded achievable LIHTC rents for the Subject. It should be noted that the rents for LIHTC comparables have been adjusted for utilities and concessions, and that the adjusted rents for the market rate comparables are supported by the rent grids located in the addenda of this report. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable LIHTC rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison. It should also be noted that the achievable LIHTC units utilized for the Subject assume the hypothetical loss of project-based Section 8 rental assistance. Post renovations, the Subject will continue to receive project-based rental assistance for 154 of its 181 units; thus, this analysis is hypothetical.

As illustrated, the Subject's achievable 40 percent of AMI rents are below the range of the comparables. The Subject's one-, two-, and three-bedroom achievable rents at 60 percent of AMI are within the range of the comparables, and similar to below the adjusted average. The Subject's achievable LIHTC rents are within the range of the comparables and below the market average for four-bedroom units at 60 percent of AMI, which includes both LIHTC and market rate units. The Subject's achievable LIHTC rents are below the range of the comparables for five-bedroom units at 60 percent of AMI, which includes only market rate comparables. All of the Subject's achievable rents at 80 percent of AMI are within the adjusted range of the comparables and below the adjusted average. In the case of the Subject's market area, all of the comparables offer one-, two-, and three-bedroom units at 60 percent of AMI; thus, the average market rent reflects these units. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable LIHTC rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison. All of the Subject's 80 percent of AMI units were compared to the market rate comparables due to the lack of units at comparable AMI set asides. As noted above, the indicated Subject rent advantage is based on the surveyed average as defined by Georgia DCA application guidelines and is not consistent with achievable market rent. Our achievable market rents are indicated in the rent grids provided in the addenda of this report. It should also be noted that out concluded achievable LIHTC rents offer a rent advantage ranging from nine to 64 percent relative to the achievable market rent conclusions for one-through four-bedroom units. Our five-bedroom achievable LIHTC rents offer a rent advantage of 32 percent relative to the achievable market rents, which is in line with the one-through four-bedroom units at the same AMI set aside; thus, the five-bedroom achievable LIHTC rents appear reasonable.

As proposed, the Subject will be similar to superior to the comparables in terms of condition and property amenities, and inferior to slightly superior in terms of unit amenities. Additionally, the Subject will offer a slightly inferior to slightly superior location and inferior unit sizes relative to the comparables. The adjusted rents at the highest LIHTC and market rate comparables are above the Subject's achievable LIHTC rents for each unit type, absent subsidy. The Subject's achievable LIHTC rents are above the overall adjusted average of the comparables for one-, two-, and three-bedroom units, and below the average for four- and five-bedroom units. Overall, we believe the Subject's proposed rents, which are at the maximum allowable levels, are achievable in the hypothetical event of a loss of Section 8 subsidies. It should also be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

8. Absorption/Stabilization Estimate

None of the comparables were able to provide absorption data. Further, none of the comparables were constructed within the past ten years. The table below illustrates absorption data obtained in pervious surveyes of LIHTC and market rate properties in the Atlanta area. All properties on the list below were constructed in 2009 or later.

	ABSORPT	ION

Average LIHTC					31
Average Market					23
Overall Average					27

As illustrated above, we obtained data from 25 properties, located between 0.46 and 11.6 miles from the Subject. These properties reported absorption rates ranging from eight to 70 units per month, with an overall average of approximately 27 units per month. Per DCA guidelines, we have calculated absorption to a stabilized occupancy of 93 percent. Overall, if the Subject were to be hypothetically vacated we would expect the Subject to experience an absorption rate of 30 units per month. This equates to an absorption period of approximately six months. Kit should be noted that tenants will continue to reside at the Subject and remain income-qualified, post renovation. Further, 154 of the Subject's 181 units will continue to benefit from project-based Section 8 rental assistance. Thus, this analysis is hypothetical.

9. Overall Conclusion

Based upon our market research, demographic calculations and analysis, we believe the Subject could

achieve the maximum allowable LIHTC rents for all unit types, with the exception of three- and four-bedroom units at 80 percent of AMI, in the hypothetical event of a loss of Section 8 subsidies. Overall vacancy in the market is low at 2.8 percent. The average vacancy rate reported by the affordable comparables was 1.8 percent, below the 6.0 percent average reported by the market rate properties. Further, six of the eight LIHTC comparables reported achieving the maximum allowable rents and four of the eight LIHTC comparables reported waiting lists. The low vacancy rates, achievement of maximum rents, and waiting lists in the market indicate demand for additional rental housing in the Subject's PMA.

The Subject's achievable LIHTC rents are generally below the overall adjusted average, with the exception of one-, two-, and three-bedroom units at 60 percent of AMI. Overall, we believe the Subject's proposed rents, which are at the maximum allowable levels for units at 40 and 60 percent of AMI, are achievable in the hypothetical event of a loss of Section 8 subsidies. The Subject's proposed rents at 80 percent of AMI are based on current in-place rents and are below the maximum allowable LIHTC rents. We have concluded to achievable rents at the maximum allowable levels for the Subject's one- and two-bedroom units at 80 percent of AMI, and below the maximum allowable levels, but above the proposed rents, for three- and four-bedroom units at 80 percent of AMI. It should also be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

Six of the eight LIHTC comparables reported rents at the maximum allowable levels and four reported waiting lists. The average vacancy rate reported by the affordable comparables was 1.8 percent, below the 6.0 percent average reported by the market rate properties. The low vacancy rates and waiting lists reported among all of the LIHTC comparables indicate demand for additional affordable rental housing in the Subject's PMA. Based on the previous demand analysis, performance of the comparable properties, and conversations with local property managers, we believe there is continuing, pent-up demand for affordable rental housing in the local market. As such, we believe the Subject will help fill a void in the market for good quality affordable rental housing. It should be noted that the Subject is a rehabilitation of an existing stabilized property, and the Subject will not add any new units to the market; thus, this analysis is hypothetical. Overall, we believe the Subject would be able to achieve the maximum allowable LIHTC rents for all unit types at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. Additionally, we believe the Subject could achieve rents above the proposed rents provided by the client, at the maximum allowable levels for one- and two-bedroom units and slightly below the maximum allowable levels for three- and four-bedroom units, for units at 80 percent of AMI.

We have concluded to achievable LIHTC rents of \$598, \$474, \$579, and \$622 for the Subject's one-, two-, three-, and four-bedroom units at 40 percent of AMI, respectively. None of the comparables offer units at the 40 percent of AMI set aside, however these conclusions appear reasonable given the demonstrated demand for affordable housing at this income level and the relative lack of competition in the market. We have concluded to achievable LIHTC rents of \$897, \$833, \$993, \$1,084, and \$1,212 for the Subject's one-through five-bedroom units at 60 percent of AMI, respectively. Our conclusions are within the range of the comparables and appear reasonable. It should be noted that none of the LIHTC comparables offer five-bedroom units. The indicated rent advantage for the five-bedroom achievable LIHTC rents is within the range of the indicated rent advantages for the Subject's one-through four-bedroom units; thus, our achievable LIHTC rent conclusion for the Subject's five-bedroom units appears reasonable and market oriented. We believe the Subject's 80 percent of AMI units will need to offer a rent advantage to be competitive in the market and remain affordable for a larger pool of households below the 80 percent of AMI level. We have concluded to achievable LIHTC rents of \$1,196, 1,192, \$1,325, and \$1,500 for the Subject's one-, two-, three-, and four-bedroom units at 80 percent of AMI respectively. The concluded one- and two-bedroom rents are at the maximum allowable levels, and the three- and four-bedroom rents are below the maximum allowable levels. It should also be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

Overall, we believe the Subject could achieve the maximum allowable LIHTC rents at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. Our concluded achievable rents for the Subject's units at 80 percent of AMI are at the maximum allowable levels for one- and two-bedroom units, and below the maximum allowable levels for three- and four-bedroom units. Our concluded achievable LIHTC rents are generally below the overall adjusted average, with the exception of three-bedroom units at 60 percent of AMI, which are in line with the adjusted average. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable LIHTC rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison. It should also be noted that out concluded achievable LIHTC rents offer a rent advantage ranging from nine to 64 percent relative to the achievable market rent conclusions for one- through four-bedroom units. Our five-bedroom achievable LIHTC rents at 60 percent of AMI offer a rent advantage of 32 percent relative to the achievable market rents, which is in line with the one- through four-bedroom units; thus, the five-bedroom achievable LIHTC rents appear reasonable. We believe that the Subject will maintain a vacancy rate of three percent or less as proposed. The capture rates for the Subject are considered low for all unit types. The existing LIHTC properties are reporting low vacancy rates; further, seven of the eight LIHTC comparables reported achieving the maximum allowable rents and four reported waiting lists. As a rehabilitation of an existing stabilized property, the Subject will not add any new units to the market. Based on these factors, we do not believe that the Subject will impact the performance of the existing LIHTC properties, if allocated. The low vacancy rates, presence of waiting lists, and percentage of income-qualified renters in the PMA indicate there is demand for affordable housing in the market that is currently unmet. Overall, based on the performance of the LIHTC comparables, we believe the Subject is feasible, absent subsidy, and that the Subject could achieve the maximum allowable LIHTC rents for units at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. It should be noted that the Subject will continue to operate with project-based Section 8 rental assistance on 154 of its 181 units, post renovations; thus, this analysis is hypothetical.

PROJECT DESCRIPTION

1. Project Address and **Development Location:** The Subject site is located at 259 Richardson Street SW in Atlanta, Fulton County, Georgia 30312. The Subject site has frontage along Richardson Street SW, Windsor Street SW, Formwalt Street SW, and

Fulton Street SW.

2. Construction Type:

The Subject is an existing 181-unit multifamily development that consists of a single 10-story highrise building and 10 townhouse-style residential buildings. The Subject was originally constructed in 1972 and renovated with LIHTC in 2002. The highrise building features brick masonry construction with a flat roof, while the townhouse buildings have brick and vinyl exteriors with pitched asphalt shingle roofs. At the time of inspection, the Subject was in average overall condition. Additionally, the Subject is proposed to be substantially

renovated in 2020 with LIHTC equity.

3. Occupancy Type: Intergenerational.

4. Special Population Target: The Subject's one-bedroom highrise units are age-restricted to

seniors 62 and older. The Subject's two-through five-bedroom

townhouse units are offered to a general family tenancy.

5. Number of Units by Bedroom

Type and AMI Level:

Comments

Rents in this profile reflect the propose asking LIHTC rents, post-renovations. Of the property's 181 units, 154 are covered by a Section 8 HAP contract. The HAP contract rents are effective January 1 2019, and are \$1,105, \$1,130, \$1,298, \$1,400, and \$1,502 for one-, two-, three-, four-, and five-bedroom units, respectively.

The one-bedroom highrise units include all utility expenses. The profile above reflects the utility structure of these units, which comprise a majority of units at the property. The two- through five-bedroom townhouse units offer all-electric utilities and do not include utility costs. HAP contract utility allowances are \$244, \$250, \$303, and \$319 for two-, three-, four-, and five-bedroom units, respectively. Additionally, only townhouse units offer washer/dryer hookups and balcony/patios. The vacant three-bedroom unit is pre-leased. The vacant one-bedroom unit is currently a non-rental unit; according to the client, this unit will operate as a revenue-generating rental unit after closing. Occupancy information in this profile reflects a rent roll dated September 30, 2019.

10. Scope of Renovations:

According to the client, the proposed renovations are budgeted at approximately \$25,000 per unit in hard costs. The scope of renovations includes:

- Replacement of appliances with energy-efficient models;
- New kitchen and bathroom counters:
- · Refinished kitchen cabinets and hardware;
- New kitchen and bathroom flooring;
- New bathroom vanities and medicine cabinets;
- New plumbing and lighting fixtures;
- Updated common areas and amenity spaces.
- Addition of a business center, exercise facility, and commonarea wi-fi:
- Addition of video surveillance and a security patrol.

Post renovation, the Subject will be in good condition. Based on the information from the developer, renovations will occur with limited tenant displacement.

11. Placed in Service Date:

Construction on the Subject is expected to begin upon closing and be placed in service in June 2021. We have utilized this date as the projected date of market entry.

Conclusion:

The Subject will be a good quality multifamily residential development. Post renovations, the Subject will not suffer from deferred maintenance, functional obsolescence, or physical deterioration.

Inspector:

1. Date of Site Visit and Name of The Subject was inspected by Brian Neukam on October 15, 2019.

2. Physical Features of the Site:

The following illustrates the physical features of the site.

Frontage:

The Subject site has frontage along Richardson Street SW, Windsor Street SW, Formwalt Street SW, and Fulton Street SW.

Visibility/Views:

The Subject has visibility from Windsor Street SW, Fulton Street SW, Richardson Street SW, Crumley Street SW, and Formwalt Street SW. Views to the north of the Subject consist commercial/retail uses including; a gas station, Hawk Auto Transport, and 464 Cooper Street. 464 Cooper Street was excluded as a comparable due to its superior condition and an inability to contact management. Views to the east of the Subject consist of vacant land. Views to the south consist of single-family homes in good condition. Views to the west of the Subject consist of Rosa L Burney Park which includes a parking lot and tennis court. Overall, views and visibility are considered average.

Surrounding Uses:

The following map illustrates the surrounding land uses.

Source: Google Earth, March 2019

The Subject site is located at 259 Richardson Street SW in Atlanta, Fulton County, Georgia 30312. The Subject site has frontage along Richardson Street SW, Windsor Street SW, Formwalt Street SW, and

Fulton Street SW. Adjacent uses to the north of the Subject consist of 464 Cooper Street, a small multifamily residential building, as well as a gas station/convenience store and vacant land. 464 Cooper Street was recently constructed and was excluded as a comparable property due to superior condition, as well as inability to contact management. Further north are single-family homes, owner-occupied townhomes, a small, vacant multifamily residential property, a FedEx shipping center, and public uses, including a library, post office, and local government offices. Adjacent to the Subject to the east is vacant land. Further east is a religious use, as well as single-family homes, City Side Lofts, an owner-occupied condominium property, and a small, unnamed garden-style multifamily property. The small unnamed multifamily property was excluded as a comparable property due to inability to contact management. Adjacent uses to the south of the Subject include single-family homes and owner-occupied townhomes. Further south are single-family homes, owner-occupied townhomes, a small, unnamed townhouse-style multifamily property, and vacant land. The small unnamed multifamily property was excluded as a comparable property due to inability to contact management. Adjacent uses to the west of the Subject include a convenience store, Rosa Burney Park, and Dunbar Recreation Center. Further west are single-family homes, Dunbar Elementary School, and vacant land. Residential and commercial improvements in the Subject's location are generally in fair to good condition. It should be noted that vacant single- and multifamily residential uses in poor condition were observed in the Subject's neighborhood. Retail/commercial occupancy appeared to be 85 to 90 percent at the time of our inspection. The Subject site is considered "Very Walkablet" by Walk Score with a rating of 71 out of 100, indicating most errands can be accomplished on foot. Overall, surrounding land uses are considered compatible with the Subject's current multifamily use. The Subject site is considered to be in a desirable location for rental housing, within walking distance to some local amenities. The uses surrounding the Subject are in average to good condition, and the site is within reasonable proximity to locational amenities, the majority of which are within 2.0 miles of the Subject.

Positive/Negative Attributes of Site:

Strengths of the Subject will include its newly renovated units and proximity to local amenities, including public transit. Additionally, the Subject will offer a competitive amenities package, post renovations. However, the Subject's unit sizes are below the surveyed range of the comparables for all unit types, which is considered a weakness.

3. Physical Proximity to Locational Amenities:

The Subject is located within 2.1 miles of all locational amenities.

4. Pictures of Site and Adjacent Uses:

The following are pictures of the Subject site and adjacent uses.

Multifamily use adjacent to the north of the Subject

5. Proximity to Locational Amenities:

The following table details the Subject's distance from key locational amenities.

Source: Google Earth, March 2019

LOCATIONAL AMENITIES

Map #	Service or Amenity	Distance from Subject (Crow)
1	Bus Stop	Adjacent
2	US Post Office	0.2 miles
3	Dunbar Elementary School	0.3 miles
4	Family Dollar General Store	0.3 miles
5	Atlanta Fire-Rescue Station 7	0.9 miles
6	Martin Luther King Jr. Middle School	1.0 miles
7	Wells Fargo Bank	1.0 miles
8	Grady Memorial Hospital	1.1 miles
9	West End Transit Center (MARTA Rail)	1.1 miles
10	Atlanta Police Zone 3 Precinct	1.5 miles
11	Walmart Supercenter	1.5 miles
12	Maynard Jackson Jr. High School	2.0 miles
13	Kroger Supermarket/Pharmacy	2.1 miles

6. Description of Land Uses

The Subject is located in a mixed-use neighborhood with residential, commercial, public, religious, and educational uses. Residential and commercial improvements in the Subject's location are generally in fair to good condition. It should be noted that vacant single- and

multifamily residential uses in poor condition were observed in the Subject's neighborhood.

7. Crime:

The following table illustrates crime statistics in the Subject's PMA compared to the MSA.

2018 CRIME INDICES

	PMA	Atlanta-Sandy Springs- Roswell, GA Metropolitan
Total Crime*	348	139
Personal Crime*	507	130
Murder	670	155
Rape	182	88
Robbery	635	163
Assault	478	118
Property Crime*	326	140
Burglary	337	147
Larceny	298	134
Motor Vehicle Theft	531	178

Source: Esri Demographics 2018, Novogradac & Company LLP, May 2019

Total crime risk indices in the PMA are more than triple the national average, and above the surrounding MSA. Both geographic areas feature crime risk indices above the overall nation. The Subject currently offers limited access and intercoms in its one-bedroom highrise units. The two-through five-bedroom townhouse units do not offer security features. All of the comparables offer some form of security. Overall, the Subject is considered similar to inferior terms of security features.

8. Existing Assisted Rental Housing Property Map:

The following map and list identifies all assisted rental housing properties in the PMA, as well as properties located outside of the PMA that we attempted to survey.

- 9. Road, Infrastructure or Proposed Improvements:
- We did not witness any road, infrastructure or proposed improvements during our field work.
- 10. Access, Ingress-Egress and Visibility of Site:

The Subject has average visibility from Windsor Street SW, Fulton Street SW, Richardson Street SW, Crumley Street SW, and Formwalt Street SW. The Subject is accessible from Richardson Street SW, Windsor Street SW, Formwalt Street SW, and Fulton Street SW. Windsor Street SW, Formwalt Street SW, and Richardson Street SW are lightly trafficked two-lane local roads; the former two run north-

south, and the latter runs east-west. Fulton Street SW is a lightly to moderately trafficked four-lane local road running east-west. Fulton Street SW provides access to northbound Interstate 85 approximately 0.4 miles east of the Subject, as well as westbound and eastbound Interstate 20 approximately 0.4 miles west (via McDaniel Street SW) and one mine east of the Subject, respectively. Additionally, Richardson Street SW provides access to southbound Interstate 85 approximately 0.3 miles southeast of the Subject (via Pulliam Street SW), and the West End Transit Center MARTA station is located approximately one mile west of the Subject. Overall, access is considered good, and traffic flow in the Subject's immediate area is considered light to moderate.

11. Conclusion:

The Subject site is located at 259 Richardson Street SW in Atlanta, Fulton County, Georgia 30312. T The Subject site has frontage along Richardson Street SW, Windsor Street SW, Formwalt Street SW, and Fulton Street SW. The Subject has average visibility from Windsor Street SW, Fulton Street SW, Richardson Street SW, Crumley Street SW, and Formwalt Street SW, and the Subject is accessible from Richardson Street SW, Windsor Street SW, Formwalt Street SW, and Fulton Street SW. Views and visbility are considered average and access is considered good. The Subject is located in a mixed-use neighborhood with residential, commercial, public, religious, and educational uses. Residential and commercial improvements in the Subject's location are generally in fair to good condition. It should be noted that vacant single- and multifamily residential uses in poor condition were observed in the Subject's neighborhood. Based on our inspection of the neighborhood, retail and commercial uses appeared to be approximately 80 percent occupied. The Subject site is considered "Very Walkable" by Walk Score with a rating of 71 out of 100, indicating most errands can be accomplished on foot. Total crime risk indices in the PMA are more than triple the national average, and above the surrounding MSA. Both geographic areas feature crime risk indices above the overall nation. The Subject currently offers limited access and intercoms in its one-bedroom highrise units. The two-through five-bedroom townhouse units do not offer security features. All of the comparables offer some form of security. Based on the performance of the comparables that do not offer security features, we do not believe the lack of security features will have an impact on the performance of the Subject. The Subject site is considered an adequate building site for rental housing. The Subject site has average proximity to locational amenities, which are within 2.1 miles of the Subject site.

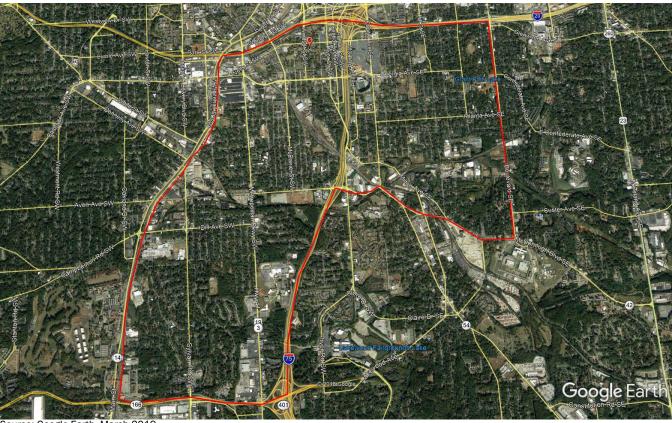

PRIMARY MARKET AREA

For the purpose of this study, it is necessary to define the market area, or the area from which potential tenants for the project are likely to be drawn. In some areas, residents are very much "neighborhood oriented" and are generally very reluctant to move from the area where they have grown up. In other areas, residents are much more mobile and will relocate to a completely new area, especially if there is an attraction such as affordable housing at below market rents.

Primary Market Area Map

Source: Google Earth, March 2019

The following sections will provide an analysis of the demographic characteristics within the market area. Data such as population, households and growth patterns will be studied, to determine if the Primary Market Area (PMA) and the Secondary Market Area (SMA) are areas of growth or contraction.

The primary market area (PMA) for the Subject encompasses the central-southern of Atlanta, Georgia. The PMA encompasses approximately 6.8 square miles. The distances from the Subject to the farthest boundaries of the PMA in each direction are listed as follows:

North: .32 mile East: 1.88 miles South: 3.15 miles West: 2.13 miles

The PMA is defined as Interstate 20 to the north, MARTA Gold/Red Rail Line to the west, Arthur B Langford Jr. Parkway/GA-154 to the south, and Boulevard SE, McDonough Boulevard SE/GA-54, and Interstate 85 to the east. This area was defined based on interviews with local market, including property managers at comparable

properties and the Subject's property manager. The farthest PMA boundary from the Subject is approximately 3.15 miles. The secondary market area (SMA) for the Subject is the Atlanta-Sandy Springs-Roswell, GA Metropolitan Statistical Area (MSA), which is comprised of Fulton, Gwinnett, Cobb, DeKalb, Clayton, Cherokee, Henry, Forsyth, Paulding, Douglas, Coweta, Carroll, Fayette, Newton, Bartow, Rockdale, Walton, Barrow, Spalding, Pickens, Haralson, Butts, Dawson, Meriwether, Lamar, Morgan, Pike, Jasper, and Heard Counties.

E. COMMUNITY DEMOGRAPHIC DATA

COMMUNITY DEMOGRAPHIC DATA

The following sections will provide an analysis of the demographic characteristics within the market area. Data such as population, households and growth patterns will be studied to determine if the Primary Market Area (PMA) and MSA are areas of growth or contraction. The discussions will also describe typical household size and will provide a picture of the health of the community and the economy. The following demographic tables are specific to the populations of the PMA and MSA.

1. Population Trends

The following tables illustrate (a) Total Population, (b) Senior Population, and (c) Population by Age Group within the population in the PMA, MSA, and nation from 2000 through 2023.

1a. Total Population

The tables below illustrate the population and household trends in the PMA, MSA, and nation from 2000 through 2023, including market entry.

POPULATION

Year	РМА		Atlanta-Sandy Springs-Roswell, GA Metropolitan Statistical Area		USA	
	Number	Annual Change	Number	Annual Change	Number	Annual Change
2000	27,446	-	4,261,895	-	281,038,168	-
2010	25,121	-0.8%	5,286,728	2.4%	308,745,538	1.0%
2018	26,736	0.8%	5,891,925	1.4%	330,088,686	0.8%
2023	27,780	0.8%	6,340,010	1.5%	343,954,683	0.8%

Source: Esri Demographics 2018, Novogradac Consulting LLP, October 2019

The PMA experienced declining population growth between 2000 and 2010, and lagged behind the surrounding MSA, which reported positive growth over the same time period. However, population growth in the broader MSA exceeded the nation during the same time period. Population growth in the PMA increased significantly between 2010 and 2018, however, grew by slightly less than the MSA. According to ESRI demographic projections, annualized PMA growth is expected to remain relatively stable at 0.8 percent through 2023, which is below the MSA and similar to the nation.

1b. Senior Population (65+)

SENIOR POPULATION. 65+

Year	РМА		Atlanta-Sandy Springs-Roswell, GA Metropolitan Statistical Area		USA						
	Number	Annual Change	Number	Annual Change	Number	Annual Change					
2000	2,464	-	328,504	-	34,955,411	-					
2010	1,995	-1.9%	474,527	4.4%	40,267,984	1.5%					
2018	2,717	4.4%	706,346	5.9%	52,780,182	3.8%					
2023	3,253	3.9%	878,175	4.9%	62,005,855	3.5%					

Source: Esri Demographics 2018, Novogradac Consulting LLP, October 2019

The PMA experienced declining senior population growth between 2000 and 2010, and lagged behind the surrounding MSA, which reported positive growth over the same time period. However, senior population growth in the broader MSA exceeded the nation during the same time period. Senior population growth in the PMA increased significantly between 2010 and 2018, however, grew by slightly less than the MSA. According to ESRI demographic projections, annualized PMA senior growth is expected to slow to 3.9 percent through 2023, which is below the MSA and above the overall nation.

1c. Total Population by Age Group

The following table illustrates the total population by age group within the PMA and MSA from 2000 through 2023.

POPULATION BY AGE IN 2018

Source: Esri Demographics 2018, Novogradac Consulting LLP, December 2019

The largest age cohorts in the PMA are between 25 to 39. Approximately 10.1 percent of the population is concentrated in age cohorts over 65, which indicates a limited number of senior residents.

2. Household Trends

The following tables illustrate (a) Total Households, Senior Households, and Average Household Size, (b) Household Tenure, (c) Households by Income and (d) Renter Households by Size within the population in the PMA, MSA, and nation from 2000 through 2023.

2a. Total Number of Households, Senior Households, and Average Household Size

The following tables illustrate the total number of households, senior households, and average household size within the PMA, MSA, and nation from 2000 through 2023. It should be noted that average household size data for senior was not available.

HOUSEHOLDS

Year	PMA		· · · · · · · · · · · · · · · · · · ·	prings-Roswell, GA Statistical Area	USA

Source: Esri Demographics 2018, Novogradac Consulting LLP, October 2019

Historical household growth in the PMA trailed the MSA between 2000 and 2010. Although PMA growth also trended below the nation, household growth in the broader MSA exceeded the nation during the same time period. Household growth in the PMA accelerated between 2010 and 2018, however, grew by slightly less than the MSA. According to ESRI demographic projections, annualized PMA growth is expected to remain relatively stable at 0.9 percent through 2023, which is below the MSA and above the overall nation.

HOUSEHOLDS WITH SENIOR HOUSEHOLDER, 65+

Source: Esri Demographics 2018, Novogradac Consulting LLP, October 2019

It should be noted that senior household data was not available for 2000. Senior household growth in the PMA increased significantly between 2010 and 2018, however, grew by slightly less than the MSA. According to ESRI demographic projections, annualized PMA senior household growth is expected to remain relatively stable at 4.2 percent through 2023, which is below the MSA and above the overall nation.

AVERAGE HOUSEHOLD SIZE

Voor	PMA		Atlanta-Sandy S	Springs-Roswell, GA		USA

The preceding table details household tenure patterns in the PMA since 2000. The percentage of renter households in the PMA increased between 2000 and 2018, and is estimated to be 67 percent as of 2018. This is more than the estimated 33 percent of renter households across the overall nation. According to ESRI demographic projections, the percentage of renter households in the PMA is expected to remain relatively stable through market entry and 2023. The majority of senior households in the PMA are renter-occupied, at 58.9 percent in 2018. This figure is also projected to remain relatively stable through market entry and 2023.

2c. Household Income

The following tables depict renter household income and senior renter household income in the PMA in 2018, market entry, and 2023.

Absent subsidy, the Subject will target senior households earning between \$17,940 to \$51,040, as well as family households earning between \$24,617 and \$74,000. As the table above depicts, approximately 20.8 percent of senior renter households in the PMA are earning incomes of \$20,000 to \$50,000 annually, and approximately 38.2 percent of total households are earning between \$20,000 and \$75,000 annually, which generally represents the Subject's target tenancy. For the projected market entry date of June 2021, these percentages are expected to remain generally similar, at 21.7 percent and 38.4 percent for the senior and family households, respectively. It should be noted that the Subject is currently operating as a stabilized property with project-based Section 8 rental assistance for 154 of its 181 units. The Subject will continue to operate with project-based Section 8 rental assistance on 154 of its 181 units, post renovations. As proposed, the Subject will target senior households earning between \$0 and \$51,040, and family households earning between \$0 to \$74,000 This income band comprises a significantly larger portion of renter households, with 90.0 percent of senior renter households in the PMA earning less than \$50,000 annually, and 92.3 percent of total households earning under \$75,000 annually. Through market entry, the proportion of qualified households is projected to decrease slightly, to 89.0 and 91.0 percent for senior renter households and total households, respectively.

2d. Renter Households by Number of Persons in the Household

The following table illustrates household size for all households in 2018, market entry, and 2023. To determine the number of renter households by number of persons per household, the total number of households is adjusted by the percentage of renter households.

RENTER HOUSEHOLDS BY NUMBER OF PERSONS - PMA

Household Size	2	018	Projected Mkt	Entry June 2021	2	023
	Number	Percentage	Number	Percentage	Number	Percentage

Source: HISTA Data / Ribbon Demographics 2018, Novogradac Consulting LLP, December 2019

The majority of renter households in the PMA are one- and two-person households. The percentage of one-person households in the PMA is expected to remain generally stable through market entry and 2023. The vast majority of senior households in the PMA are one- and two-person households, and the percentage of one- and two-person senior households is projected to remain generally stable through market entry and 2023. It should be noted that the Subject will target senior households between one and two persons in size, as well as family households ranging from two to eight persons in size; thus, the vast majority of renter households in the PMA will be eligible to reside at the Subject.

Conclusion

The PMA population is projected to increase at a similar rate to the nation and slower than the MSA through market entry and through 2023. The senior population is projected to increase at a faster rate than the general population, faster than the national senior growth rate and below the MSA, through market entry and 2023. The largest age cohorts in the PMA are between 25 to 39. Approximately 10.1 percent of the population is concentrated in age cohorts over 65, which indicates a limited number of senior residents. The number of total households is projected to increase at a similar rate to the nation and slower than the MSA through market entry and through 2023. The number of senior households is projected to increase at a faster rate than the number of total households, faster than the national senior growth rate and below the MSA, through market entry and 2023. The Subject will target senior households ranging from one to two persons, and family households ranging from two to eight persons; thus, the vast majority of renter households in the PMA will be eligible to reside at the Subject. The percentage of renter households in the PMA is estimated to be 67 percent as of 2018. The percentage of renter households in the PMA are renter-occupied, at 58.9 percent in

2018. This figure is also projected to remain relatively stable through market entry and 2023. Absent subsidy, the Subject will target senior households earning between \$17,940 and \$51,040, as well as family households earning between \$36, 926 and \$63,180. Approximately 20.8 percent of senior renter households in the PMA are earning incomes of \$20,000 to \$50,000 annually, and approximately 38.2 percent of total households are earning between \$20,000 and \$75,000 annually, which generally represents the Subject's target tenancy. For the projected market entry date of June 2021, these percentages are expected to remain generally similar, at 21.7 percent and 38.4 percent for the senior and family households, respectively. It should be noted that the Subject is currently operating as a stabilized property with project-based Section 8 rental assistance for 154 of its 181 units. The Subject will continue to operate with project-based Section 8 rental assistance on 154 of its 181 units, post renovations. As proposed, the Subject will target senior households earning between \$0 and \$51,040, and family households earning between \$0 and \$74,000. This income band comprises a significantly larger portion of renter households, with 90.0 percent of senior renter households in the PMA earning less than \$50,000 annually, and 92.3 percent of total households earning under \$75,000 annually. Overall, the increasing population in the PMA coupled with a high concentration of renter households earning qualifying incomes in the PMA indicates significant demand for affordable rental housing in the market.

EMPLOYMENT TRENDS

1. Total Jobs

The following table illustrates the total jobs (also known as "covered employment") in Fulton County.

COVERED EMPLOYMENT

Fulton County, Georgia

Employment in the PMA is concentrated in the accommodation/food services, healthcare/social assistance, and prof/scientific/tech services industries, which collectively comprise 34 percent of local employment. The large share of PMA employment in accommodation/food services is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods. Relative to the overall nation, the PMA features comparatively greater employment in the accommodation/food services, prof/scientific/tech services, and admin/support/waste mgmt srvcs industries. Conversely, the PMA is underrepresented in the manufacturing, healthcare/social assistance, and construction industries.

3. Major Employers

The chart below shows the largest employers in Fulton County, GA. It should be noted that the data is from 2010 which is the most recent data available.

As illustrated in the above table, there have been 9,057 employees impacted by layoffs or closures since 2017 in the county. Overall, these layoffs are insignificant relative to the size of the local economy and the recent opportunities created through the reported business expansions.

We attempted to contact the Fulton County Development Authority to obtain information about recent business activity in Atlanta and Fulton County, however, as of the date of this report our calls have not been returned. According to Atlanta Journal-Constitution (AJC), Atlanta's major daily newspaper, Fulton County is planning to expand its airport at Charlie Brown Field. The cost of the expansion is currently unknown but the plans include a new administration office, a modernized aircraft rescue and firefighting command center, more hangar space, a restaurant and a center for economic development. AJC also announced UPS recently relocated a regional shipping hub which brought in 3,000 jobs to the county.

4. Employment and Unemployment Trends

The following tables detail employment and unemployment trends for the Atlanta, GA MSA from 2003 to 2019 year-to-date (March).

Source: U.S. Bureau of Labor Statistics, December 2019

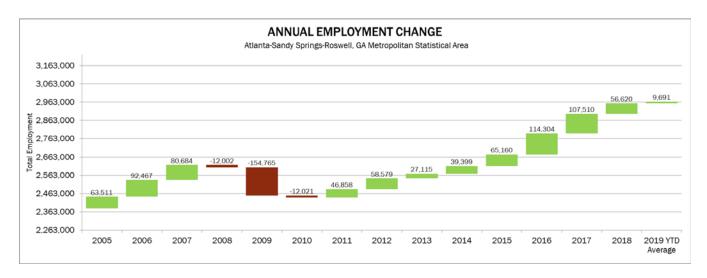

Prior to the national recession, average employment growth in the MSA generally exceeded the nation. Annual job growth in the MSA outpaced the nation in every year between 2003 and 2007. The effects of the recession were particularly pronounced in the MSA, which suffered a 6.8 percent contraction in employment growth (2007-2010), well above the 4.8 percent contraction reported by the nation as a whole (2007-2010). Employment in the MSA recovered and surpassed pre-recessionary levels in 2015, a year after the overall nation. Since 2012, job growth in the MSA generally exceeded the nation. As of August 2019, total employment in the MSA is at a post-recessionary record and increasing at an annualized rate of 0.9 percent, compared to 1.5 percent across the overall nation.

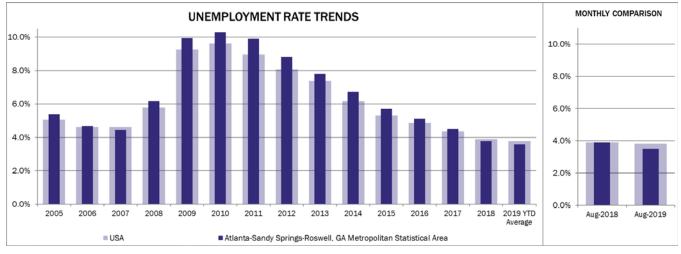

The MSA experienced a lower average unemployment rate relative to the overall nation during the years preceding the recession. The effects of the recession were more pronounced in the MSA, which experienced a 4.1 percentage point increase in unemployment, compared to only a 3.8 percentage point increase across the overall nation. Since 2012, the MSA generally experienced a higher unemployment rate compared to the overall nation. According to the most recent labor statistics, the unemployment rate in the MSA is 3.5 percent, slightly lower than the current national unemployment rate of 3.8 percent. Overall, the local economy appears to have fully recovered from the national recession and entered into an expansionary phase.

^{*2019} data is through August

The tables following provide more illustration of the changes in employment and unemployment rate trends in the MSA.

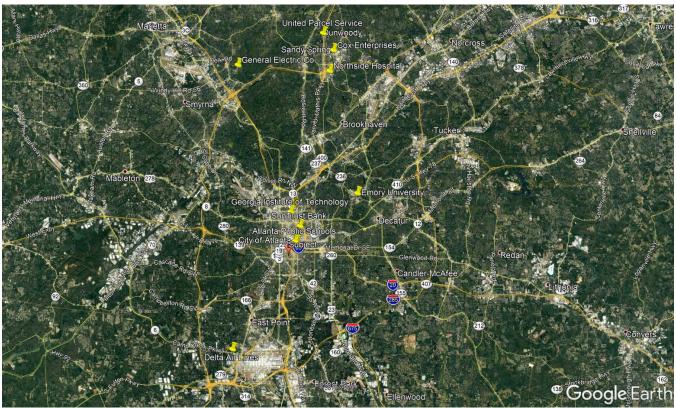

5. Map of Site and Major Employment Concentrations

The following map and table details the largest employers in Fulton County, Georgia. It should be noted that the data is from 2010 which is the most recent data available.

Source: Google Earth, March 2019

MAJOR EMPLOYERS

Fulton County, GA

Employer Name	Industry	# Of Employees
Delta Airlines, Inc.	Airlines	27,000
Wal-Mart Stores, Inc.	Retail	26,000
Emory University	Education	17,994
Georgia Institute of Technology	Education	7,843
City of Atlanta	Government	7,157
Sun Trust Banks	Financial	6,917
Cox Enterprises	Communications	6,746
Turner Broadcasting System, Inc.	Communications	6,702
Atlanta Public Schools	Education	6,500
United Parcel Service, Inc.	Supply Chain Management	6,285
Piedmont Healthcare	Healthcare	6,113
Northside Hospital	Healthcare	5,540
Wells Fargo & Co.	Financial	5,300
General Electric Co.	Energy	<u>4,500</u>
Totals		140,597

Source: Development Authority of Fulton County, May 2019

It should be noted that Wal-Mart, Piedmont Healthcare, and Wells Fargo are all decentralized regional employers with several area locations and are therefore not shown on the previous map.

6. Conclusion

Covered employment has grown in each year since 2011, and surpassed 2008 levels in 2013. Employment in the PMA is concentrated in the accommodation/food services, healthcare/social assistance, and prof/scientific/tech services industries, which collectively comprise 34 percent of local employment. The large share of PMA employment in accommodation/food services is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods. The effects of the recession were more pronounced in the MSA, which suffered a 6.8 percent employment contraction, compared to only 4.8 percent across the overall nation. Employment in the MSA recovered and surpassed pre-recessionary levels in 2015, a year after the overall nation. As of August 2019, total employment in the MSA is at a post-recessionary record and increasing at an annualized rate of 0.9 percent, compared to 1.5 percent across the overall nation. Overall, the local economy appears to have fully recovered from the national recession and entered into an expansionary phase.

G. PROJECT-SPECIFIC AFFORDABILITY AND DEMAND ANALYSIS

The following demand analysis evaluates the potential amount of qualified households, which the Subject would have a fair chance at capturing. The structure of the analysis is based on the guidelines provided by DCA.

1. Income Restrictions

LIHTC rents are based upon a percentage of the Area Median Gross Income ("AMI"), adjusted for household size and utilities. The Georgia Department of Community Affairs ("DCA") will estimate the relevant income levels, with annual updates. The rents are calculated assuming that the maximum net rent a household will pay is 30 percent of its household income at the appropriate AMI level.

According to DCA, household size is assumed to be 1.5 persons per bedroom for LIHTC rent calculation purposes. For example, the maximum rent for a four-person household in a two-bedroom unit is based on an assumed household size of three persons (1.5 per bedroom). It should be noted that senior household size has been capped at two persons for the purpose of this analysis.

To assess the likely number of tenants in the market area eligible to live in the Subject, we use Census information as provided by ESRI Information Systems, to estimate the number of potential tenants who would qualify to occupy the Subject as a LIHTC project.

The maximum income levels are based upon information obtained from the Rent and Income Limits Guidelines Table as accessed from the DCA website.

2. Affordability

As discussed above, the maximum income utilized for this report is set by HUD while the minimum is based upon the minimum income needed to support affordability. This is based upon a standard of 35 percent. Lower and moderate-income families typically spend greater than 30 percent of their income on housing. These expenditure amounts can range higher than 50 percent depending upon market area. However, the 30 to 40 percent range is generally considered a reasonable range of affordability. DCA guidelines utilize 35 percent for families and 40 percent for seniors. It should be noted that, 154 of the Subject's 181 units currently benefit from project-based Section 8 rental assistance, which is expected to continue, post renovations. However, for the purpose of this analysis, we have assumed LIHTC operations, absent subsidy, for all units.

65+ INCOME LIMITS -	ABSENT SUBSIDY
---------------------	----------------

	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum		
Unit Type	Allowable	Allowable	Allowable	Allowable	Allowable	Allowable		
	Income	Income	Income	Income	Income	Income		
	@4	0%	@6	0%	@8	0%		
1BR	\$17,940	\$25,520	\$26,910	\$38,280	\$26,970	\$51,040		

FAMILY INCOME LIMITS - ABSENT SUBSIDY

	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum

	Income	Income	Income	Income	Income	Income
	@4	0%	@6	0%	@8	0%
2BR	\$24,617	\$28,720	\$36,926	\$43,080	\$46,594	\$57,440
3BR	\$28,423	\$34,440	\$42,617	\$51,660	\$51,463	\$68,880
4BR	\$31,714	\$37,000	\$47,554	\$55,500	\$44,331	\$74,000
5BR	-	-	\$52,491	\$63,180	-	-

3. Demand

The demand for the Subject will be derived from two sources: existing households and new households. These calculations are illustrated in the following tables.

3a. Demand from New Households

The number of new households entering the market is the first level of demand calculated. We have utilized January 2021, the anticipated date of market entry, as the base year for the analysis. Therefore, 2018 household population estimates are inflated to 2021 by interpolation of the difference between 2018 estimates and 2023 projections. This change in households is considered the gross potential demand for the Subject property. This number is adjusted for income eligibility and renter tenure. This is calculated as an annual demand number. In other words, this calculates the anticipated new households in 2021. This number takes the overall growth from 2018 to 2021 and applies it to its respective income cohorts by percentage. This number does not reflect lower income households losing population, as this may be a result of simple dollar value inflation.

3b. Demand from Existing Households

Demand for existing households is estimated by summing two sources of potential tenants. The first source is tenants who are rent overburdened. These are households who are paying over 35 percent for family households and 40 percent for senior households of their income in housing costs. This data is interpolated using ACS data based on appropriate income levels.

The second source is households living in substandard housing. We will utilize this data to determine the number of current residents that are income eligible, renter tenure, overburdened and/or living in substandard housing and likely to consider the Subject. In general, we will utilize this data to determine the number of current residents that are income eligible, renter tenure, overburdened and/or living in substandard housing and likely to consider the Subject.

3c. Demand from Elderly Homeowners likely to Convert to Rentership

An additional source of demand is also seniors likely to move from their own homes into rental housing. This source is only appropriate when evaluating senior properties and is determined by interviews with property managers in the PMA. It should be noted that per DCA guidelines, we have lowered demand from seniors who convert to homeownership to be at or below 2.0 percent of total demand.

3d. Other

Per the 2018 GA DCA Qualified Allocation Plan (QAP) and Market Study Manual, GA DCA does not consider demand from outside the Primary Market Area (PMA), including the Secondary Market Area (SMA). Therefore, we have not accounted for leakage from outside the PMA boundaries in our demand analysis.

DCA does not consider household turnover to be a source of market demand. Therefore, we have not accounted for household turnover in our demand analysis.

We have adjusted all of our capture rates based on household size. DCA guidelines indicate that properties with over 20 percent of their proposed units in three and four-bedroom units need to be adjusted to consider larger household sizes. Our capture rates incorporate household size adjustments for all of the Subject's units.

4. Net Demand, Capture Rates and Stabilization Conclusions

The following pages will outline the overall demand components added together (3(a), 3(b) and 3(c)) less the supply of competitive developments awarded and/or constructed or placed in service from 2014 to the present.

Additions to Supply

Additions to supply will lower the number of potential qualified households. Pursuant to our understanding of DCA guidelines, we have deducted the following units from the demand analysis.

- Comparable/competitive LIHTC and bond units (vacant or occupied) that have been funded, are under construction, or placed in service in 2015 through the present.
- Vacancies in projects placed in service prior to 2015 that have not reached stabilized occupancy (i.e. at least 90 percent occupied).
- Comparable/competitive conventional or market rate units that are proposed, are under construction, or have entered the market from 2015 to present. As the following discussion will demonstrate, competitive market rate units are those with rent levels that are comparable to the proposed rents at the Subject.

Per GA DCA guidelines, competitive units are defined as those units that are of similar size and configuration and provide alternative housing to a similar tenant population, at rent levels comparative to those proposed for the Subject development.

We attempted to contact the Atlanta Planning Department regarding proposed, planned, and under construction multifamily developments in the PMA. However, as of the date of this report, our phone calls and emails have not been returned. As an alternative, we researched new construction listings provided by CoStar. The data provided by CoStar is illustrated in the table below.

PLANNED DEVELOPMENT									
Property Name	Rent Structure	Tenancy	Total Units	Competitive Units	LIHTC Allocation Year	Construction Status	Distance to Subject		
72 Milton Ave	Market/Affordable	Family	280	0	N/A	Proposed	1.3 miles		
Aspen Heights	Market	Student	300	0	N/A	Under Construction	0.4 miles		
Broadstone Summerhill	Market	Family	276	0	N/A	Proposed	0.6 miles		
Hartland Station	Market/Affordable	Family	131	0	N/A	Proposed	2.4 miles		
Niche Apartments	Market	Family	40	0	N/A	Proposed	0.7 miles		
Skylark	Market	Family	319	0	N/A	Under Construction	1.9 miles		
Summerhill	Market	Family	310	0	N/A	Proposed	0.6 miles		
Summerhill Apartments Phase II	Market	Family	520	0	N/A	Proposed	0.7 miles		
Totals		-	2,176	0	•	•			

As illustrated above, nine projects comprising a total of 2,176 units have been identified in the development pipeline in the PMA. Seven of the nine projects are market rate developments and are not considered to be directly competitive with the Subject due to their market oriented rents and/or incomparable tenancy. Two proposed mixed income projects were identified; however, as of the effective date of this report, neither project has received a LIHTC allocation. Thus, these two projects are also considered non-competitive with the Subject due to their market oriented rents and lack of affordability funding. It should be noted that if either project were to receive a LIHTC allocation, any two- through five-bedroom family LIHTC units at 60 percent of AMI would be considered directly competitive with the Subject.

According to the Georgia Department of Community Affairs' Tax Credit Awards lists, there has been two properties selected for LIHTC funding in the PMA since 2015. The following table illustrates properties with recent LIHTC allocations in the PMA.

RECENT LIHTC ALLOCATIONS IN PMA

Branarty Nama	Year Rent Toponey Total III	Total Units	Competitive	Distance		
Property Name	Allocated	Structure	Tenancy	Total Utilis	Units	to Subject
Adair Court	2016	LIHTC/Market	Senior	91	45	1.1 miles
Phoenix House	2015	LIHTC	Other	69	0	2.2 miles
				160	45	

- Source: Georgia Department of Community Affairs, May 2019
 - Adair Court- is a 195-unit mixed-income development that will target a senior tenancy and include oneand two-bedroom units. The development will offer 77 LIHTC units and 118 market rate units, including 45 one-bedroom units restricted at 60 percent of AMI that are expected to compete directly with the Subject. The remaining units are not considered competitive with the Subject due to different rent set asides and tenancy. We have deducted 45 units from our annual demand analysis. As of the effective date of this report, Adair Court is under construction and has not been included as a comparable property in this report.
 - Phoenix House- is a 69-unit LIHTC development that will include one-, and four-bedroom units. The
 development's tenancy will be for the formerly homeless persons with disabilities, utilizing City of
 Atlanta's Coordinated Entry program for 19 units. We do not expect it to be competitive with the Subject
 based on its target tenancy. Therefore we have not deducted any units from our demand analysis and
 have excluded the project from our list of comparable properties.

According to a rent roll dated September 30, 2019, the Subject is 99.4 percent occupied with one vacant unit, and 100 percent leased. Additionally, of the Subject's 181 units, 154 will continue to benefit from a Section 8 rental subsidy, post renovation. Further, existing LIHTC and other affordable properties in the PMA maintain high occupancy rates, and six of the eight affordable comparables reported achieving the maximum allowable rents. Given this information, we do not believe that the renovation of the Subject utilizing tax credits will impact the existing LIHTC properties in the area that are in overall good condition and currently performing well. However, it is possible that the Subject will draw tenants from the older LIHTC, or public housing properties that suffer from deferred maintenance and those that are currently underperforming the market.

Overall, we have deducted 45 proposed competitive units from our demand analysis. It should be noted that, due to the unit type and tenancy of the competitive units, these have only been deducted form our analysis of the Subject's one-bedroom age-restricted units. No competitive units have been deducted from our analysis of the Subject's two-through five-bedroom family units.

PMA Occupancy

Per DCA's guidelines, we have determined the average occupancy rate based on all available competitive conventional and LIHTC properties in the PMA. We have provided a combined average occupancy level for the PMA based on the total competitive units in the PMA. It should be noted that we were not able to survey all of the competitive properties in the PMA; thus, where available, we have included data from our most recent surveys dating to 2018 Q1.

AFFORDABLE OCCUPANCY IN THE PMA

Property Name	Program	Tenancy	Location	Number of Units	Occupano
Boynton Village Apartments	Section 8	Family	Atlanta	43	N/Av

The Square at Peoplestown	LIHTC/Market	Family	Atlanta	94	98.9%
Columbia Peoplestown	LIHTC/Market	Family	Atlanta	99	98.0%
Mechanicsville Family	LIHTC	Family	Atlanta	174	98.3%
Columbia Senior Residences at Mechanicscville	LIHTC	Senior	Atlanta	154	97.4%
Average					97.8%

^{*}Denotes most recent survey of project between Q1 2018 and Q3 2019

The average occupancy rate of competitive developments in the PMA is 97.8 percent. The high occupancy rate is indicative of strong demand for affordable housing in the PMA. It should be noted that none of the competitive/comparable projects were placed in service in 2015 or later. Additionally, none of the surveyed projects indicated occupancy below 90 percent; thus, per DCA guidelines, we have not deducted vacant units from competitive/comparable projects in the PMA.

Rehab Developments and PBRA

For any properties that are rehab developments, the capture rates will be based on those units that are vacant, or whose tenants will be rent burdened or over income as listed on the Tenant Relocation Spreadsheet.

Units that are subsidized with PBRA or whose rents are more than 20 percent lower than the rent for other units of the same bedroom size in the same AMI band and comprise less than 10 percent of total units in the same AMI band will not be used in determining project demand. In addition, any units, if priced 30 percent lower than the average market rent for the bedroom type in any income segment, will be assumed to be leasable in the market and deducted from the total number of units in the project for determining capture rates.

Of the Subject's 181 units, 154 will continue to benefit from Section 8 rental assistance. According to the client, all residents will income-qualify post-renovation. However, there is one vacant units and one current non-rental unit that the client will operate as a LIHTC rental unit. The remaining 179 units are presumed leasable, and only the vacant units and units with non-income-qualifying tenants have been accounted for in our capture rate analysis, per specific DCA guidelines.

5. Capture Rates

The above calculations and derived capture rates are illustrated in the following tables. Note that the demographic data used in the following tables, including tenure patterns, household size and income distribution through the projected market entry date of June 2021 were illustrated in the previous section of this report. It should also be noted that, per DCA guidelines, we have only utilized the Subject's existing vacant units in this analysis. The Subject's one vacant unit is a three-bedroom unit; further, the Subject currently operates with one one-bedroom non-rental unit that will be operated as a LIHTC unit at 80 percent of AMI, post renovation. Thus, we have provided capture rates for each of the 40, 60, and 80 percent of AMI set asides assuming one vacant three-bedroom unit, as well as the 80 percent of AMI set aside for one-bedroom units. All other unit types exhibit capture rates of zero, per DCA guidelines.

Conclusions

We have conducted such an analysis to determine a base of demand for the Subject as an intergenerational LIHTC property. Some factors affect the indicated capture rates and are discussed following.

- This Demand Analysis does not measure the PMA's or Subject's ability to attract additional or latent demand into the market from elsewhere by offering an affordable option. We believe this to be moderate, particularly for senior tenants and large families, and therefore the demand analysis is somewhat conservative in its conclusions because this demand is not included.
- Of the Subject's 181 units, 154 currently benefit from project-based Section 8 rental assistance. According to the client, this rental assistance is expected to continue, post-renovation. We have assumed LIHTC operations, absent subsidy, in our analysis, which is a far more conservative approach to estimating the Subject's capture rate, as it narrows the qualifying income bands considerably.
- Per DCA guidelines, as a stabilized property, we have only utilized the Subject's existing vacant units in our capture rate analysis. The Subject currently has one vacant three-bedroom unit. Additionally, the Subject contains one one-bedroom unit that is currently a non-rental unit, but will be converted to a LIHTC rental unit art 80 percent of AMI, post renovation. Thus, we have provided capture rates for

each of the 40, 60, and 80 percent of AMI set asides assuming one vacant three-bedroom unit, as well as the 80 percent of AMI set aside for one-bedroom units. All other unit types exhibit capture rates of zero, per DCA guidelines. Overall, with 1,715 units of net demand and two vacant units, the Subject exhibits a capture rate of approximately 0.1 percent, absent subsidy. Assuming all vacant units are to be absorbed at each unique AMI level, The Subject's one-bedroom capture rates by AMI level range from, 0.2 to 0.4 percent, and the three-bedroom capture rates by AMI level range from 1.4 to 1.6 percent.

The following table illustrates demand and net demand for the Subject's units. Note that these capture rates are not based on appropriate bedroom types, as calculated previously.

As the analysis illustrates, the Subject's overall capture rate is approximately 0.1 percent, absent subsidy. Assuming all vacant units are to be absorbed at each unique AMI level, The Subject's three-bedroom capture rates by AMI level range from 1.4 to 1.6 percent. The Subject's one-bedroom capture rate at 80 percent of AMI is approximately 1.2 percent. Therefore, we believe there is adequate demand for the Subject. The overall capture rate at the Subject, as well as all applicable AMI and bedroom-type capture rates, are well below the 2019 DCA Market Study capture rate threshold of 30 percent.

H. COMPETITIVE RENTAL ANALYSIS

Survey of Comparable Projects

Comparable properties are examined on the basis of physical characteristics, e.g., building type, building age/quality, the level of common amenities, absorption rates, and similarity in rent structure. We attempted to compare the Subject to properties from the competing market, in order to provide a picture of the general economic health and available supply in the market.

Description of Property Types Surveyed/Determination of Number of Units

Comparable properties are examined on the basis of physical characteristics, i.e. building type, age/quality, level of common amenities, absorption, as well as similarity in rent. We attempted to compare the Subject to complexes from the competing market to provide a broader picture of the health and available supply in the market. Our competitive survey includes 12 "true" comparable properties containing 3,826 units. A detailed matrix describing the individual competitive properties as well as the proposed Subject is provided on the following pages. A map illustrating the location of the Subject in relation to comparable properties is also provided on the following pages. The properties are further profiled in the following write-ups. The property descriptions include information on vacancy, turnover, absorption, age, competition, and the general health of the rental market, when available.

The availability of LIHTC data is considered good; we have included eight comparable properties which offer LIHTC units, all of which are located within the PMA. It should be noted that seven of the comparable LIHTC properties feature market rate units, which is common in the Subject's market area. We believe these comparables are the most comparable properties in the area and are located in generally similar to inferior areas in terms of access to amenities. Additionally, one LIHTC comparable, Columbia Senior Residences at Mechanicsville, is age-restricted to senior households. Further, it should also be noted that we were unable to identify any affordable rent comparables that offer five-bedroom units, which are rare in the local market.

Finally, it is of note that the Subject's 154 units currently benefit from a Housing Assistance Program (HAP) contract. Following renovation, 154 of the Subject's 181 units will continue to benefit from Section 8 subsidy. As such, qualifying tenants will pay only 30 percent of their household income on rent. The comparable affordable properties are located between 0.4 and 4.9 miles from the Subject, and four of the eight affordable comparables are located in the Subject's PMA.

The availability of market rate data is considered average. It should be noted that there is a lack of market rate senior development in the Subject's immediate area and the PMA; therefore, all of the market rate comparables target the general population. We have included four conventional market rate properties in our analysis of the competitive market. The market rate properties are located between 1.8 and 8.3 miles from the Subject, and one of the five market rate comparables, Brookside Park Apartments, is located in the Subject's PMA. The comparables were built or last renovated between 1971 and 2019. Overall, we believe the market rate properties we have used in our analysis are the most comparable. It should be noted that the majority of multifamily housing in the Subject's immediate area is either fully or partially income- and rentrestricted housing. Due to the lack of market rate housing in the Subject's immediate area, we have included market rate units from three of the nearby mixed-income comparables in our rent grids. The asking rents for these units are in line with those of the market rate comparables and appear market-oriented. Additionally, due to the relative lack of four-bedroom unit types in the Subject's market area, we extended our search for comparables that offer four-bedroom units beyond the Subject's PMA, and have included two such properties. We were unable to identify any market rate comparables that offer five-bedroom units, which are rare in the local rental market. Other market rate properties were excluded based on condition, design, tenancy, and inability to contact management.

Trend: Comments

- The property accepts Housing Choice Vouchers but the contact was unable to provide the usage numbers at this time. Garages are available in select townhome units. The market rate units are based on an LRO system and change daily. None of the 12 reported vacancies are preleased. The property is preparing to begin its fourth and final phase of renovations on roughly 200 units. The contact reported that there is no difference between the rents in renovated and non-renovated units.
- 2Q19 Garages are available in select townhome units. The market rate units are based on an LRO system and change daily. The contact reported a strong demand for affordable housing in the area.
- 3019 Garages are attached in select townhome units. The market rate units are based on an LRO system and change daily.
- 4Q19 Garages are attached in select townhome units. The contact reported vacancy is elevated due to an entire phase of the property being offline for renovations. The property does not maintain a waiting list and operates on a first come, first serve basis.

Trend: Comments

- The contact reported strong demand for affordable housing in the area and stated that all seven vacant units are pre-leased. The contact stated the property is located in an area consisting of mainly single-family homes and therefore has limited competition in the immediate area. Tax credit rents were increased to 2018 maximum allowable levels over the previous year; the contact was unable to comment on the change of rents in market rate units over the previous year.
- 1Q19 Of the two vacant units, both are pre-leased. The property typically stays above 95 percent occupancy. The contact reported the property receives 25 to 30 inquiries/calls per day from prospective tenants. The contact reported demand for affordable housing is strong.
- 2Q19 The contact stated two of the four vacant units are pre-leased. The property typically stays above 95 to 100 percent occupied. The contact reported the property receives 25 to 30 inquiries/calls per day from prospective tenants. The contact reported demand for affordable housing is strong.
- According to a rent roll dated July 31, 2019, the property has two vacant units. One of the vacant units have been pre-leased. The property is currently operating with 30 percent Housing Choice Voucher Usage and typical turnover is one tenant per month.

3Q16	There is a lengthy waiting list for the Public Housing units. A waiting list is not maintained for the LIHTC or market rate units. Three of the seven
	vacancies have pending applications. The exact unit mix and number of vacancies for each unit type were not available. According to management,
	the market rate rents increased four to six percent and the LIHTC rents did not change.

3Q17 There is a lengthy waiting list for the Public Housing units. A waiting list is not maintained for the LIHTC or market rate units.

The contact was unable to disclose the contract rents for the subsidized units. The property is not currently accepting any additional tenants with Housing Choice Vouchers.

Trend: Comments

- One-bedroom, market-rate units are 718, 725, or 846 square feet, and all rent for \$660 per month. The contact stated that six of the 10 vacant units have been pre-leased. The contact stated that the current rents would be achievable without the current level of voucher usage. The contact stated that there are few veterans who reside at the property.
- 1Q19 This property was formerly known as Preserve At Bent Creek. The contact stated the property accept Housing Choice Vouchers but was unable to provide the number of tenants currently utilizing vouchers.
- 2Q19 N/A
- 4Q19 This property was formerly known as Preserve At Bent Creek. The contact stated the property accept Housing Choice Vouchers but was unable to provide the number of tenants currently utilizing vouchers. The property has strong demand but does not maintain a waiting list and operates on a first come, first served basis.

Trend: Comments

- The contact stated that the rents had not changed in over a year. The contact would not say how many units are vacant or pre-leased. The contact would not break down vacancy by unit type. The property does not accept Housing Choice Vouchers.
- The contact reported renovations on units started in mid 2018 and are expected to continue through 2021. Upgrades include all new appliances, flooring, fixtures, counters, and resurfaced cabinets. The contact stated one-third of units have been upgraded. Renovated market rate units are priced \$100 more than the listed rents and LIHTC units are an additional \$50 over non renovated units.
- The contact reported the property has completed the interior renovations at the property. The contact reported the property is located close to Spelman and Morehouse colleges and majority of tenants in the market rate units are students. Turnover also fluctuates primarily based on the school year. The contact also reported the majority of vacant units are in the market rate units. However, an exact breakdown could not be provided. The contact reported there is a waitlist for a select number of units but was not able to estimate the length. All of the LIHTC units have a waiting list.
- Of the 29 vacant units, 17 units are pre-leased. The property is currently undergoing renovations that consist of new flooring, appliances, fixtures, cabinetry, countertops and paint. The rent ranges reflect the premium for renovated units, as many units have yet to be renovated. The property maintains a waiting lists for the LIHTC one, two and three-bedroom units that are 162, 227, 174 households long, respectively. Management reported the property is located close to Spelman and Morehouse colleges and the majority of tenants in the market rate units are students. Turnover also fluctuates primarily based on the school year. The contact also reported the majority of vacant units are in the market rate units. The property does not accept Housing Choice Vouchers.

Trend: Comments

The contact stated that the reason the two-bedroom units are priced only slightly below the three-bedroom units is the high demand for two-bedroom units with only a limited supply at the property.

The property utilizes an LRO, therefore rents change daily. Tenants pay a flat rate for water, sewer, trash and pest control. The utility fees for the one, two and three-bedroom units are \$56, \$66, and \$86, per month respectively. The contact reported demand for housing is strong.

Trend: Comments

The contact reported a short waiting list for the one-bedroom units. Rents increased recently by \$75 across the board. The contact stated that this is a conventional market rate property. She also noted that despite being conventional, the property is trying to set up on site daycare services in which she said once that is operational, rents are expected to increase.

3Q17 The contact noted the vacancy is typical for the property and that typically over 50 percent of the tenants utilize Housing Choice Vouchers.

1Q19 N/A

The contact reported high number of skip outs and evictions due to delinquent accounts has kept occupancy rates in the 87 to 92 percent range during 2019.

1. Housing Choice Vouchers

We attempted to contact the Atlanta Housing Authority (AHA) who administers Section 8 Housing Choice Vouchers (HCV) in Atlanta but as of the date of this report our calls have not been returned. However, according to their website, the housing authority has temporarily closed their waitlist as of March 27, 2017. The following table illustrates voucher usage at the comparables.

TENANTS WITH VOUCHERS

Property Name	Rent Structure	Tenancy	Housing Choice Voucher Tenants
Centennial Place Apartments	LIHTC/ Market	Family	0%
Columbia Peoplestown	LIHTC/ Market	Family	31%
Columbia Senior Residences At Mechanicsville	LIHTC/ Market	Senior	10%
Mechanicsville Family	LIHTC/ Market	Family	25%
Park At Castleton	LIHTC/ Market	Family	N/A
The Square At Peoplestown	LIHTC	Family	43%
The Villages At Carver	LIHTC/ Market	Family	0%
The Villages At Castleberry Hill	LIHTC/ Market	Family	0%
Audubon Briarcliff	Market	Family	0%
Brookside Park Apartments	Market	Family	10%
Eagles Run Apartments	Market	Family	64%
Point At Westside	Market	Family	0%

Housing Choice Voucher usage in this market ranges from zero to 64 percent. The LIHTC properties reported having Housing Choice Voucher usage of zero to 31 percent, while nthe market rate properties reported voucher usage of zero to 64 percent. Given that 154 of the Subject's 181 units will be subsidized and tenants will pay 30 percent of their income towards rent, it is not necessary that qualifying households have a voucher in order to benefit from subsidized rent for the majority of units. However, for units that operate without subsidy, it is likely that the Subject would maintain a voucher usage of approximately 25 percent, post renovations.

2. Phased Developments

Phased Developments

The Subject is not part of a multi-phase development.

Rural Areas

The Subject is not located in a rural area.

Lease Up History

None of the comparables were able to provide absorption data. Further, none of the comparables were constructed within the past ten years. The table below illustrates absorption data obtained in pervious surveyes of LIHTC and market rate properties in the Atlanta area. All properties on the list below were constructed in 2009 or later.

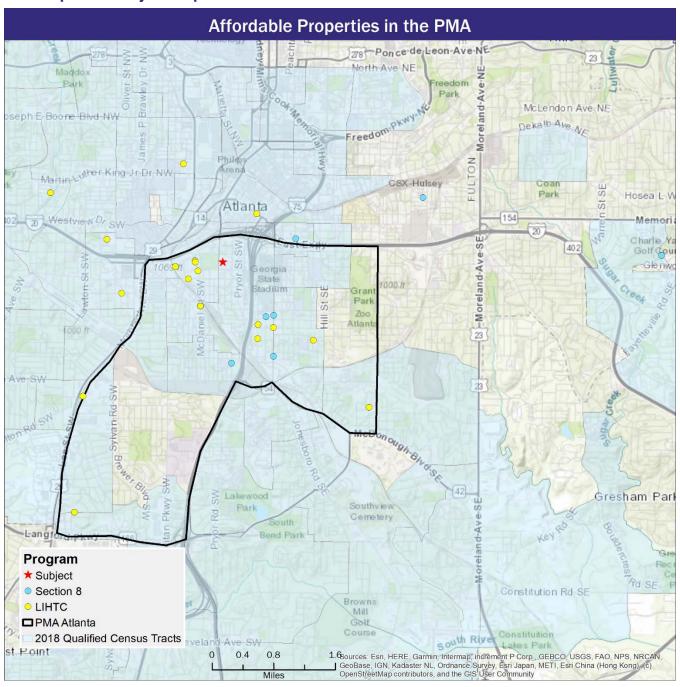

ABSORPTION

Property Name	Rent	Tenancy	Year	Total Units	Absorption (units/month)
The Kirkwood	Market	Family	2018	232	21
Platform Apartments	Market	Family	2018	324	21
The Retreat At Mills Creek	LIHTC	Senior	2017	80	27
Springs At Mcdonough	Market	Family	2017	268	17

Glenwood At Grant Park	Market	Family	2016	216	8
675 Highland	Market	Family	2016	125	16
University House	Market	Family	2015	268	30
The Haynes House	Market	Family	2015	186	12
Square On Fifth	Market	Family	2015	270	45
Mills Creek Crossing	LIHTC	Family	2015	200	17
Steelworks	Market	Family	2014	317	21
Columbia Senior Residences At Forrest Hills	LIHTC	Senior	2014	80	9
Columbia Mill	LIHTC	Family	2014	100	20
Betmar Village Apartments	LIHTC	Senior	2014	47	47
Veranda At Scholars Landing	Market	Senior	2013	100	66
Baptist Gardens	LIHTC	Senior	2013	100	15
Retreat At Edgewood Phase II	LIHTC	Family	2012	40	12
Parkside At Mechanicsville	LIHTC	Family	2012	156	60
Gateway At East Point	LIHTC	Senior	2012	100	25
Antioch Villas And Gardens	LIHTC	Senior	2012	106	35
Retreat At Edgewood	LIHTC	Family	2011	100	20
Ashley Auburn Pointe I	LIHTC	Family	2010	154	26
Allen Wilson Phase I	LIHTC	Family	2010	40	40
Adamsville Green	LIHTC	Senior	2010	90	45
Average LIHTC					31
Average Market					23
Overall Average					27

As illustrated above, we obtained data from 25 properties, located between 0.46 and 11.6 miles from the Subject. These properties reported absorption rates ranging from eight to 70 units per month, with an overall average of approximately 27 units per month. Per DCA guidelines, we have calculated absorption to a stabilized occupancy of 93 percent. Overall, if the Subject were to be hypothetically vacated we would expect the Subject to experience an absorption rate of 30 units per month. This equates to an absorption period of approximately six months. Kit should be noted that tenants will continue to reside at the Subject and remain income-qualified, post renovation. Further, 154 of the Subject's 181 units will continue to benefit from project-based Section 8 rental assistance. Thus, this analysis is hypothetical.

3. Competitive Project Map

^{*}Denotes most recent survey of project between Q1 2018 and Q3 2019

4. Amenities

A detailed description of amenities included in both the Subject and the comparable properties can be found in the amenity matrix. The matrix has been color coded. Those properties that offer an amenity that the Subject does not offer are shaded in pink, while those properties that do not offer an amenity that the Subject does offer are shaded in blue. Thus, the inferior properties can be identified by the blue and the superior properties can be identified by the pink.

*Utilities paid by landle				onsible for all util		ownhouse u		ΦU	ΦU	ΦU	φU	ΦU	ΦU

**Ultilities paid by landlord in 1BR highrise units only. Tenants are responsible for all utilities in 2BR-5BR townhouse units.

**Balcony/patios and washer/dryer equipment offered in 2BR-5BR townhouse units only. Pull cords offered in 1BR highrise units only.

***Security features offered in 1BR highrise units only.

It should be noted that pull cords are only offered in the Subject's age-restricted one-bedroom highrise units, while balcony/patios and washer/dryer hookups are only offered in the Subject's family two- through fivebedroom townhouse units. Overall, the Subject's in-unit amenity package is considered to be similar to inferior relative to both the LIHTC and market rate comparables, as is, and slightly superior to inferior as proposed. In terms of property amenities, the Subject is considered similar to inferior to the LIHTC comparables and generally inferior to the market rate comparables, as is. Post renovations, the Subject will also offer a business center, exercise facility, and common area Wi-Fi. As proposed, the Subject will be considered similar to superior to the LIHTC comparables and generally similar to the market rate comparables in terms of property amenities. Nonetheless, as a subsidized development with a majority of its units age-restricted to senior tenants, we

believe that the amenities package, though limited, will allow the Subject to effectively compete in the market, particularly given the stabilized occupancy levels historically and presence of a waiting list.

5. Comparable Tenancy

The Subject will is an intergenerational property that targets seniors for one-bedroom units, and families for two- through five-bedroom units. One comparable, Columbia Senior Residences at Mechanicsville, is agerestricted to senior tenants. All of the remaining comparables are not age-restricted and target a general family tenancy.

6. Vacancy

The following table summarizes overall weighted vacancy trends at the surveyed properties.

O١	/FR	ΔI	1 \	/Δ	$\Gamma \Delta$	NCY
U	<i>,</i> LR	ML	-L 1	v ⊢	ᇄ	

Property Name	Rent Structure	Tenancy	Total Units	Vacant Units	Vacancy Rate
Centennial Place Apartments*	LIHTC/ Market	Family	738	3	0.4%
Columbia Peoplestown	LIHTC/ Market	Family	99	2	2.0%
Columbia Senior Residences At Mechanicsville	LIHTC/ Market	Senior	154	4	2.6%
Mechanicsville Family	LIHTC/ Market	Family	174	3	1.7%
Park At Castleton*	LIHTC/ Market	Family	324	0	0.0%
The Square At Peoplestown	LIHTC	Family	94	1	1.1%
The Villages At Carver*	LIHTC/ Market	Family	666	13	2.0%
The Villages At Castleberry Hill*	LIHTC/ Market	Family	630	25	4.0%
Audubon Briarcliff*	Market	Family	227	16	7.0%
Brookside Park Apartments	Market	Family	201	10	5.0%
Eagles Run Apartments*	Market	Family	258	33	12.8%
Point At Westside*	Market	Family	267	0	0.0%
Total LIHTC			2,879	51	1.8%
Total Market Rate			953	59	6.2%
Overall Total			3,832	110	2.9%

^{*}Located outside of the PMA

The comparables reported vacancy rates ranging from zero to 12.8 percent, with an overall weighted average of 2.9 percent. The manager at Park at Castleton reported being fully occupied. The average vacancy rate reported by the affordable comparables was 1.8 percent, well below the 6.2 percent average reported by the market rate properties. The average LIHTC vacancy rate of 1.8 percent is considered exceptionally low, and indicative of supply constrained conditions. Additionally, six of the eight affordable comparables reported rents at the maximum allowable levels, and four reported waiting lists. All of the market rate properties reported vacancy rates of 12.8 percent or lower. It should be noted that the contact at Eagles Run Apartments indicated that vacancy was elevated due to recent evictions of delinquent accounts. Excluding this comparable, the market rate comparables reported a weighted average vacancy rate of approximately 3.7 percent. It should also be noted that Columbia Senior Residences at Mechanicsville, the only age-restricted comparable, and The Square at Peoplestown, the only fully restricted affordable comparable, reported vacancy rates of 2.6 and 1.1 percent, respectively. Given that the majority of the Subject's units are age-restricted to senior households and that the Subject will be fully restricted at the 40, 60, and 80 percent of AMI levels, post renovartion, we have place the most weight on these comparables.

As a newly renovated property, we have concluded to a stabilized vacancy rate of three percent for the Subject property under the restricted scenarios and five percent in the unrestricted scenario.

7. Properties Under Construction and Proposed

Additions to supply will lower the number of potential qualified households. Pursuant to our understanding of DCA guidelines, we have deducted the following units from the demand analysis.

- Comparable/competitive LIHTC and bond units (vacant or occupied) that have been funded, are under construction, or placed in service in 2015 through the present.
- Vacancies in projects placed in service prior to 2015 that have not reached stabilized occupancy (i.e. at least 90 percent occupied).
- Comparable/competitive conventional or market rate units that are proposed, are under construction, or have entered the market from 2015 to present. As the following discussion will demonstrate, competitive market rate units are those with rent levels that are comparable to the proposed rents at the Subject.

Per GA DCA guidelines, competitive units are defined as those units that are of similar size and configuration and provide alternative housing to a similar tenant population, at rent levels comparative to those proposed for the Subject development.

We were able to obtain information on new development entering the PMA from CoStar and the Georgia Department of Community Affairs. According to our findings, there are three market rate and two mixed-income developments currently proposed or under construction that target the general population. The mixed-income projects identified by CoStar have not been awarded LIHTC funds by DCA. Further, as shown in the Supply Analysis, the Subject's proposed LIHTC rents are at the maximum allowable levels and offer a significant rent advantage relative to market rent levels; thus, these market rate and mixed-income projects are not considered directly competitive with the Subject and we have not deducted any units from these developments. Further, according to the Georgia Department of Community Affairs' Tax Credit Awards lists, there has been two properties selected for LIHTC funding in the PMA since 2015. The following table illustrates properties with recent LIHTC allocations in the PMA.

RECENT LIHTC ALLOCATIONS IN PMA

Property Name	Year Allocated	Rent Structure	Tenancy	Total Units	Competitive Units	Distance to Subject
Adair Court	2016	LIHTC/Market	Senior	91	45	1.1 miles
Phoenix House	2015	LIHTC	Other	69	0	2.2 miles
				160	45	

Source: Georgia Department of Community Affairs, May 2019

- Adair Court- is a 195-unit mixed-income development that will target a senior tenancy and include oneand two-bedroom units. The development will offer 77 LIHTC units and 118 market rate units, including 45 one-bedroom units restricted at 60 percent of AMI that are expected to compete directly with the Subject. The remaining units are not considered competitive with the Subject due to different rent set asides and tenancy. We have deducted 45 units from our annual demand analysis. As of the effective date of this report, Adair Court is under construction and has not been included as a comparable property in this report.
- **Phoenix House** is a 69-unit LIHTC development that will include one-, and four-bedroom units. The development's tenancy will be for the formerly homeless persons with disabilities, utilizing City of Atlanta's Coordinated Entry program for 19 units. We do not expect it to be competitive with the Subject based on its target tenancy. Therefore we have not deducted any units from our demand analysis and have excluded the project from our list of comparable properties.

Overall, we have deducted 45 units from our demand analysis based on our evaluation of proposed additions to the supply within the Subject's PMA. It should be noted that we have only deducted these units from our analysis of the Subject's age-restricted units.

The Subject property is currently 99.4 percent occupied and 100 percent leased with a waiting list for affordable units, and 154 of the Subject's 181 units will continue to benefit from a Section 8 rental subsidy, post renovation. Additionally, existing LIHTC and other affordable properties in the PMA maintain high occupancy rates, and seven of the eight affordable comparables reported achieving the maximum allowable rents. Given this information, we do not believe that the renovation of the Subject utilizing tax credits will impact the existing LIHTC properties in the area that are in overall good condition and currently performing well. However, it is possible that the Subject will draw tenants from the older LIHTC, or public housing properties that suffer from deferred maintenance and those that are currently underperforming the market.

8. Rental Advantage

The following table illustrates the Subject's similarity to the comparable properties. We inform the reader that other users of this document may underwrite the LIHTC rents to a different standard than contained in this report.

		s	IMILARITY M	ATRIX					
#	Property Name	Program	Tenancy	Property Amenities	Unit Features	Location	Age / Condition	Unit Sizes	Overall Comparison
1	Centennial Place Apartments	LIHTC/ Market	Family	Similar	Similar	Similar	Similar	Superior	10

12	Point At Westside	Market	Family	Similar	Superior	Similar	Similar	Superior	20

^{*}Inferior=-10, slightly inferior=-5, similar=0, slightly superior=5, superior=10.

It should be noted that none of the LIHTC comparables offer units at 40 or 80 percent of AMI. The rental rates at the LIHTC comparable properties are compared to the Subject's proposed 60 percent AMI rents in the following table. It should be noted that all of the Subject's units will operate with project-based Section 8 rental assistance, post renovations, and that the proposed Section 8 contract rents are above the maximum allowable levels for all unit types; thus, we have utilized the maximum allowable rents for the purpose of our rental analysis. It should also be noted that none of the LIHTC comparables offer five-bedroom units. Thus, we have supported our five-bedroom LIHTC rent conclusions with a comparison to unrestricted rents presented later in our analysis of achievable market rents. Further, it should also be noted that the comparables were placed in service prior to 2009 and are eligible for 2019 HERA Special rent and income limits, while the Subject will be eligible for 2019 LIHTC rent and income limits.

			ENT COMPAR					
Property Name	County	Tenancy	1BR	2BR	3BR	4BR	5BR	Rents at Max?
City Views At Rosa Burney Park	Fulton	Family	\$897	\$833	\$993	\$1,084	\$1,212	Yes

LIHTC Maximum Rent (Net) - Held Harmless	Fulton		\$922	\$863	\$1,029	\$1,125	\$1,256	
Centennial Place Apartments	Fulton	Family	\$877-\$903	\$841-\$856	\$915-\$1,069	\$928-\$1171	-	Yes
Columbia Peoplestown	Fulton	Family	-	\$756-\$818	\$921	-	-	No
Columbia Senior Residences At Mechanicsville	Fulton	Senior	\$953	-	-	-	-	Yes
Mechanicsville Family	Fulton	Family	\$917	\$869	\$963	-	-	Yes
Park At Castleton	Fulton	Family	\$913	\$860	\$951	-	-	Yes
The Square At Peoplestown	Fulton	Family	\$835	\$773	\$872	-	-	Yes
The Villages At Carver	Fulton	Family	\$1,085	\$1,107	\$1,279	\$1,428	-	Yes
The Villages At Castleberry Hill	Fulton	Family	\$813	\$708-\$773	\$811	-	-	No
Average			\$915	\$880	\$968	\$1,239	-	
Achievable LIHTC Rent			\$897	\$833	\$993	\$1,084	\$1,212	

As illustrated above, the Subject's proposed rental rates at 60 percent of AMI are set at the 2019 maximum allowable levels. It should be noted that all of the LIHTC comparables were placed in service prior to 2009 and are eligible for 2019 HERA Special rent and income limits, which are slightly higher than the 2019 LIHTC limits. The Subject will be restricted to the 2019 LIHTC rent and income limits, post renovation. It should also be noted that all utility expenses are landlord-paid for the Subject's one-bedroom units, and are tenant paid for two-through-five bedroom units; thus, the maximum allowable rent for the one-bedroom units is higher than that of the two-bedroom units due to the Subject's utility allowances. Six of the eight LIHTC comparables reported achieving rents at maximum allowable levels. It should be noted that the comparable rents reported at the maximum allowable level appearing above or below the limits is attributed to differing property-specific utility allowances. The Manager at Park at Castleton reported being fully occupied. The average occupancy rate reported by the affordable comparables was 98.2 percent. It should also be noted that Columbia Senior Residences at Mechanicsville, the only age-restricted comparable, and The Square at Peoplestown, the only fully restricted affordable comparable, reported occupancy rates of 97.4 and 98.9 percent, respectively. Post renovations, the Subject will be similar to slightly superior to the LIHTC comparables in terms of condition, inferior to slightly superior in terms of unit amenities, and similar to superior in terms of property amenities.

Overall, based on the performance of the Subject and the comparables, we believe that the applicable maximum allowable LIHTC rents would be achievable for the Subject's 60 percent of AMI units. Additionally, based on the demonstrated demand for affordable housing in the PMA and the relative lack of competition at lower AMI set asides, we have concluded to the maximum allowable LIHTC rents for the Subject's units at 40 percent of AMI. The Subject's proposed rents at 80 percent of AMI are based on current in-place rents for the Subject's existing market rate units, and are below the maximum allowable levels. Our concluded as proposed achievable market rents for the Subject are slightly above the 80 percent of AMI rent limits. As illustrated in the demand analysis, a significant portion of the income-qualified households for the Subject's 80 percent of AMI units are middle-income households that may also consider market rate housing options. We believe the Subject's 80 percent of AMI units will need to offer a rent advantage to be competitive in the market and remain affordable for a larger pool of households below the 80 percent of AMI level. We have concluded to achievable LIHTC rents of \$1,196, 1,192, \$1,325, and \$1,500 for the Subject's one-, two-, three-, and fourbedroom units at 80 percent of AMI respectively. The concluded one- and two-bedroom rents are at the maximum allowable levels, and the three- and four-bedroom rents are below the maximum allowable levels. These conclusions offer a rent advantage of approximately nine to 10 percent relative to our achievable market rents.

Analysis of "Market Rents"

Per DCA's market study guidelines, "average market rent is to be a reflection of rents that are achieved in the market. In other words, the rents the competitive properties are currently receiving. Average market rent is not 'Achievable unrestricted market rent.'" In an urban market with many tax credit comps, the average market rent might be the weighted average of those tax credit comps. In cases where there are few tax credit comps, but many market rate comps with similar unit designs and amenity packages, then the average market rent might be the weighted average of those market-rate comps. In a small rural market there may be neither tax

credit comps nor market rate comps with similar positioning as the Subject. In a case like that the average market rent would be a weighted average of whatever rents were present in the market. In the case of the Subject's market area, all of the comparables offer one-, two-, and three-bedroom units at 60 percent of AMI; thus, the average market rent reflects these units. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable market rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison.

When comparing the Subject's rents to the average comparable rent, we have not included surveyed rents at lower AMI levels given that this artificially lowers the average surveyed rent. Including rents at lower AMI levels does not reflect an accurate average rent for rents at higher income levels. For example, if the Subject offers rents at the 50 and 60 percent of AMI levels, and there is a distinct difference at comparable properties between rents at the two AMI levels, we would not include the 50 percent of AMI rents in the average comparable rent for the 60 percent of AMI comparison. In this case, we have utilized the 60 percent of AMI rents for all comparables in comparison to the Subject's 40 and 60 percent of AMI units, as applicable. Adjusted market rents, supported by the rent grids, have been utilized for the Subject's 80 percent of AMI units.

The overall average and the maximum and minimum adjusted rents for the comparable properties surveyed are illustrated in the table below in comparison with the concluded achievable LIHTC rents for the Subject. It should be noted that the rents for LIHTC comparables have been adjusted for utilities and concessions, and that the adjusted rents for the market rate comparables are supported by the rent grids located in the addenda of this report. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable LIHTC rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison. It should also be noted that the achievable LIHTC units utilized for the Subject assume the hypothetical loss of project-based Section 8 rental assistance. Post renovations, the Subject will continue to receive project-based rental assistance for 154 of its 181 units; thus, this analysis is hypothetical.

SUBJECT COMPARISON TO MARKET RENTS

Unit Type	Rent Level	Subject Achievable LIHTC Rent	Adjusted Minimum	Adjusted Maximum	Adjusted Average	Achievable Market Rent	Subject Rent Advantage
1BR / 1BA	@40% (Section 8)	\$598	\$813	\$1,085	\$915	\$1,320	31%
1BR / 1BA	@60% (Section 8)	\$897	\$813	\$1,085	\$915	\$1,320	31%
1BR / 1BA	@80%	\$1,196	\$1,070	\$1,442	\$1,325	\$1,320	0%
2BR / 1BA	@40% (Section 8)	\$474	\$708	\$1,107	\$880	\$1,325	34%
2BR / 1BA	@60% (Section 8)	\$833	\$708	\$1,107	\$880	\$1,325	34%
2BR / 1BA	@80%	\$1,192	\$957	\$1,501	\$1,300	\$1,325	2%
3BR / 2BA	@40% (Section 8)	\$579	\$811	\$1,279	\$993	\$1,475	33%
3BR / 2BA	@60% (Section 8)	\$993	\$811	\$1,279	\$993	\$1,475	33%
3BR / 2BA	@80%	\$1,325	\$1,146	\$1,925	\$1,551	\$1,475	-5%
4BR / 2BA	@40% (Section 8)	\$622	\$928	\$2,051	\$1,605	\$1,675	4%
4BR / 2BA	@60% (Section 8)	\$1,084	\$928	\$2,051	\$1,605	\$1,675	4%
4BR / 2BA	@80%	\$1,500	\$1,255	\$2,051	\$1,752	\$1,675	-5%
5BR / 2BA	@60% (Section 8)	\$1,212	\$1,293	\$2,148	\$1,834	\$1,775	-3%

As illustrated, the Subject's achievable 40 percent of AMI rents are below the range of the comparables. The Subject's one-, two-, and three-bedroom achievable rents at 60 percent of AMI are within the range of the comparables, and similar to below the adjusted average. The Subject's achievable LIHTC rents are within the range of the comparables and below the market average for four-bedroom units at 60 percent of AMI, which includes both LIHTC and market rate units. The Subject's achievable LIHTC rents are below the range of the

comparables for five-bedroom units at 60 percent of AMI, which includes only market rate comparables. All of the Subject's achievable rents at 80 percent of AMI are within the adjusted range of the comparables and below the adjusted average. In the case of the Subject's market area, all of the comparables offer one-, two-, and three-bedroom units at 60 percent of AMI; thus, the average market rent reflects these units. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable LIHTC rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison. All of the Subject's 80 percent of AMI units were compared to the market rate comparables due to the lack of units at comparable AMI set asides. As noted above, the indicated Subject rent advantage is based on the surveyed average as defined by Georgia DCA application guidelines and is not consistent with achievable market rent. Our achievable market rents are indicated in the rent grids provided in the addenda of this report. It should also be noted that out concluded achievable LIHTC rents offer a rent advantage ranging from nine to 64 percent relative to the achievable market rent conclusions for one-through four-bedroom units. Our five-bedroom achievable LIHTC rents offer a rent advantage of 32 percent relative to the achievable market rents, which is in line with the one-through four-bedroom units at the same AMI set aside; thus, the five-bedroom achievable LIHTC rents appear reasonable.

As proposed, the Subject will be similar to superior to the comparables in terms of condition and property amenities, and inferior to slightly superior in terms of unit amenities. Additionally, the Subject will offer a slightly inferior to slightly superior location and inferior unit sizes relative to the comparables. The adjusted rents at the highest LIHTC and market rate comparables are above the Subject's achievable LIHTC rents for each unit type, absent subsidy. The Subject's achievable LIHTC rents are above the overall adjusted average of the comparables for one-, two-, and three-bedroom units, and below the average for four- and five-bedroom units. Overall, we believe the Subject's proposed rents, which are at the maximum allowable levels, are achievable in the hypothetical event of a loss of Section 8 subsidies. It should also be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

9. LIHTC Competition - DCA Funded Properties within the PMA

We attempted to contact the Atlanta Planning Department regarding proposed, planned, and under construction multifamily developments in the PMA. However, as of the date of this report, our phone calls and emails have not been returned. As an alternative, we researched new construction listings provided by CoStar. The data provided by CoStar is illustrated in the table below.

Property Name	Rent	Tenancy	Total	Competitive	LIHTC Allocation	Construction Status	Distance
1 toporty Name	Structure	Teriancy	Units	Units	Year	Construction Status	to Subject
72 Milton Ave	Market/Affordable	Family	280	0	N/A	Proposed	1.3 miles
Aspen Heights	Market	Student	300	0	N/A	Under Construction	0.4 miles
Broadstone Summerhill	Market	Family	276	0	N/A	Proposed	0.6 miles
Hartland Station	Market/Affordable	Family	131	0	N/A	Proposed	2.4 miles
Niche Apartments	Market	Family	40	0	N/A	Proposed	0.7 miles
Skylark	Market	Family	319	0	N/A	Under Construction	1.9 miles
Summerhill	Market	Family	310	0	N/A	Proposed	0.6 miles
Summerhill Apartments Phase II	Market	Family	520	0	N/A	Proposed	0.7 miles
Totals		•	2.176	0		-	

As illustrated above, nine projects comprising a total of 2,176 units have been identified in the development pipeline in the PMA. Seven of the nine projects are market rate developments and are not considered to be directly competitive with the Subject due to their market oriented rents and/or incomparable tenancy. Two proposed mixed income projects were identified; however, as of the effective date of this report, neither project has received a LIHTC allocation. Thus, these two projects are also considered non-competitive with the Subject due to their market oriented rents and lack of affordability funding. It should be noted that if either project were to receive a LIHTC allocation, any two- through five-bedroom family LIHTC units at 60 percent of AMI would be considered directly competitive with the Subject.

According to the Georgia Department of Community Affairs' Tax Credit Awards lists, there has been two properties selected for LIHTC funding in the PMA since 2015. The following table illustrates properties with recent LIHTC allocations in the PMA.

RECENT LIHTC ALLOCATIONS IN PMA

Property Name	Year Allocated	Rent Structure	Tenancy	Total Units	Competitive Units	Distance to Subject
Adair Court	2016	LIHTC/Market	Senior	91	45	1.1 miles
Phoenix House	2015	LIHTC	Other	69	0	2.2 miles
				160	45	

Source: Georgia Department of Community Affairs, May 2019

- Adair Court- is a 195-unit mixed-income development that will target a senior tenancy and include oneand two-bedroom units. The development will offer 77 LIHTC units and 118 market rate units, including 45 one-bedroom units restricted at 60 percent of AMI that are expected to compete directly with the Subject. The remaining units are not considered competitive with the Subject due to different rent set asides and tenancy. We have deducted 45 units from our annual demand analysis. As of the effective date of this report, Adair Court is under construction and has not been included as a comparable property in this report.
- **Phoenix House** is a 69-unit LIHTC development that will include one-, and four-bedroom units. The development's tenancy will be for the formerly homeless persons with disabilities, utilizing City of Atlanta's Coordinated Entry program for 19 units. We do not expect it to be competitive with the Subject based on its target tenancy. Therefore we have not deducted any units from our demand analysis and have excluded the project from our list of comparable properties.

According to a rent roll dated September 30, 2019, the Subject is 99.4 percent occupied with one vacant unit, and 100 percent leased. Additionally, of the Subject's 181 units, 154 will continue to benefit from a Section 8 rental subsidy, post renovation. Further, existing LIHTC and other affordable properties in the PMA maintain high occupancy rates, and six of the eight affordable comparables reported achieving the maximum allowable rents. Given this information, we do not believe that the renovation of the Subject utilizing tax credits will impact the existing LIHTC properties in the area that are in overall good condition and currently performing well. However, it is possible that the Subject will draw tenants from the older LIHTC, or public housing properties that suffer from deferred maintenance and those that are currently underperforming the market.

10. Rental Trends in the PMA

The following tables illustrate the total population tenure patterns of the housing stock in the PMA and MSA, as well as tenure for the senior population.

TENURE PATTERNS - TOTAL POPULATION

		PN	1A		Atlanta-Sandy Springs-Roswell, GA Metropolitan Statistical Area					
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units			
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

Source: Esri Demographics 2018, Novogradac Consulting LLP, December 2019

The preceding table details household tenure patterns in the PMA since 2000. The percentage of renter households in the PMA increased between 2000 and 2018, and is estimated to be 67 percent as of 2018. This is more than the estimated 33 percent of renter households across the overall nation. According to ESRI demographic projections, the percentage of renter households in the PMA is expected to remain relatively stable through market entry and 2023. The majority of senior households in the PMA are renter-occupied, at 58.9 percent in 2018. This figure is also projected to remain relatively stable through market entry and 2023.

Historical Vacancy

The following table details historical vacancy levels for the properties included as comparables.

	HISTORICAL VACANCY											
#	Property Name	Program	Total Units	2016 Q2	2016 Q3	2017 Q1	2017 Q2	2017 Q3	2017 Q4	2018 Q3	2018 Q4	2019 Q1
1	Centennial Place Apartments	LIHTC/ Market	738	N/A	N/A	N/A	1.40%	0.00%	0.70%	0.10%	19.10%	1.60%
2	Columbia Peoplestown	LIHTC/ Market	99	N/A	7.60%	2.00%

	Overall Vacancy*			3.70%	3.50%	3.50%	1.50%	2.00%	0.60%	3.80%	9.30%	3.40%

*Denotes weighted average vacancy rate for comparables reporting vacancy in applicable quarter.

As illustrated in the table, we were able to obtain historical vacancy rates at the majority of the LIHTC and market rate comparable properties over the last three years. The vacancy rates at the LIHTC and market rate comparables have remained relatively low over the last several years. Overall, we believe that the current performance of the LIHTC comparable properties, as well as their historically low to moderate vacancy rates, as well as the presence of waiting lists, indicate demand for affordable rental housing in the Subject's market.

Change in Rental Rates

The following table illustrates rental rate increases as reported by the comparable properties.

RENT GROWTH

TALLET STATE OF THE STATE OF TH									
Property Name	Rent Structure	Tenancy	Rent Growth						
Centennial Place Apartments	LIHTC/ Market	Family	Kept at max; fluct. 6-12%						
Columbia Peoplestown	LIHTC/ Market	Family	N/A						
Columbia Senior Residences At Mechanicsville	LIHTC/ Market	Senior	Kept at max; inc. 10% since 2Q 2019						
Mechanicsville Family	LIHTC/ Market	Family	None						
Park At Castleton	LIHTC/ Market	Family	Increased to max; mkt fluctuates						
The Square At Peoplestown	LIHTC	Family	Increased up to five percent						
The Villages At Carver	LIHTC/ Market	Family	Increased up to eight percent						
The Villages At Castleberry Hill	LIHTC/ Market	Family	Increased up to 13%						
Audubon Briarcliff	Market	Family	Fluctuate weekly						
Brookside Park Apartments	Market	Family	Fluctuate daily-LRO pricing						
Eagles Run Apartments	Market	Family	None						
Point At Westside	Market	Family	Fluct. 0-7% since 2Q 2019						

As illustrated above, all but twp of the LIHTC comprables reported rent increases. One of the market rate comparables reported rent growth and two reported the use of daily pricing software, leading to generally fluctuating rents. Were the Subject to lose its subsidy, we anticipate that the Subject would be able to achieve moderate rent growth in the future as a LIHTC property but would remain limited by growth in the AMI as well as market conditions. However, with project-based Section 8 rental assistance in place at the Subject, rent increases at the Subject should not directly impact tenants, as they will continue to pay 30 percent of their income towards rent.

11. Impact of Foreclosed, Abandoned and Vacant Structures

According to *RealtyTrac* statistics, one in every 2,554 housing units nationwide was in some stage of foreclosure as of August 2019, the most recent data available. The Subject's zip code exhibits a foreclosure rate of one in evert 2,456 units. Further, the city of Atlanta is experiencing a foreclosure rate of one in every 1,245 homes, while Fulton County is experiencing a foreclosure rate of one in every 1,358 homes. Further, Georgia is experiencing one foreclosure in every 2,204 housing units as of May 2019. Overall, the Subject's zip code exhibits a foreclosure rate slightly above that of the nation, and below that of the state of Georgia, Fulton County, and the city of Atlanta, indicating the local housing market generally compares favorably to the larger regional market in terms of foreclosure rates. It should be noted that vacant single- and multifamily residential uses in poor condition were observed in the Subject's neighborhood. Based on our inspection of the neighborhood, retail and commercial uses appeared to be approximately 80 percent occupied. Based on the Subject's current and historical performance, as well as the performance of the comparables and conversations of property managers, the presence of vacant improvements in the neighborhood does not appear to have a detrimental impact on the Subject's marketability.

12.Primary Housing Void

Overall vacancy in the market is low at 2.8 percent. Total LIHTC vacancy is lower at 1.8 percent. The vacancy rates among the LIHTC comparables range from 0.0 to 12.8 percent. The manager at Park at Castleton reported being fully occupied. The average LIHTC vacancy rate of 1.8 percent is considered exceptionally low, and indicative of supply constrained conditions. Additionally, six of the eight affordable comparables reported rents at the maximum allowable levels, and four reported waiting lists. All of the market rate properties reported vacancy rates of 12.8 percent or lower. It should be noted that the contact at Eagles Run Apartments indicated that vacancy was elevated due to recent evictions of delinquent accounts. Excluding this comparable, the market rate comparables reported a weighted average vacancy rate of approximately 3.7 percent. The low vacancy rates and waiting lists reported among all of the LIHTC comparables indicate demand for additional affordable rental housing in the Subject's PMA. Based on the previous demand analysis, performance of the comparable properties, and conversations with local property managers, we believe there is continuing, pent-up demand for affordable rental housing in the local market. As such, we believe the Subject will help fill a void in the market for good quality affordable rental housing. It should be noted that the Subject is a rehabilitation of an existing stabilized property, and the Subject will not add any new units to the market; thus, this analysis is hypothetical.

13. Effect of Subject on Other Affordable Units in Market

Four of the eight LIHTC properties included as comparables in this report are located in the PMA. These LIHTC comparables repoirted a weighted average occupancy rate of approximately 97.9 percent, three of the four four reported achieving the maximum allowable rents, and two reported waiting lists. Further, 45 competitive LIHTC units were identified in the development pipeline in the PMA. The capture rates for the Subject are considered low for all applicable unit types. As a rehabilitation of an existing stabilized property, the Subject will not add any new units to the market. Based on these factors, we do not believe that the Subject will impact the performance of the existing LIHTC properties, if allocated. The low vacancy rates, presence of waiting lists, and percentage of income-qualified renters in the PMA indicate there is demand for affordable housing in the market that is currently unmet.

Conclusions

Based upon our market research, demographic calculations and analysis, we believe the Subject could achieve the maximum allowable LIHTC rents for all unit types, with the exception of three- and four-bedroom units at 80 percent of AMI, in the hypothetical event of a loss of Section 8 subsidies. Overall vacancy in the market is low at 2.8 percent. The average vacancy rate reported by the affordable comparables was 1.8 percent, below the 6.0 percent average reported by the market rate properties. Further, six of the eight LIHTC comparables reported achieving the maximum allowable rents and four of the eight LIHTC comparables reported waiting lists. The low vacancy rates, achievement of maximum rents, and waiting lists in the market indicate demand for additional rental housing in the Subject's PMA.

The Subject's achievable LIHTC rents are generally below the overall adjusted average, with the exception of one-, two-, and three-bedroom units at 60 percent of AMI. Overall, we believe the Subject's proposed rents, which are at the maximum allowable levels for units at 40 and 60 percent of AMI, are achievable in the hypothetical event of a loss of Section 8 subsidies. The Subject's proposed rents at 80 percent of AMI are based on current in-place rents and are below the maximum allowable LIHTC rents. We have concluded to achievable rents at the maximum allowable levels for the Subject's one- and two-bedroom units at 80 percent of AMI, and below the maximum allowable levels, but above the proposed rents, for three- and four-bedroom units at 80 percent of AMI. It should also be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

Six of the eight LIHTC comparables reported rents at the maximum allowable levels and four reported waiting lists. The average vacancy rate reported by the affordable comparables was 1.8 percent, below the 6.0 percent average reported by the market rate properties. The low vacancy rates and waiting lists reported among all of the LIHTC comparables indicate demand for additional affordable rental housing in the Subject's PMA. Based on the previous demand analysis, performance of the comparable properties, and conversations with local property managers, we believe there is continuing, pent-up demand for affordable rental housing in the local market. As such, we believe the Subject will help fill a void in the market for good quality affordable rental housing. It should be noted that the Subject is a rehabilitation of an existing stabilized property, and the Subject will not add any new units to the market; thus, this analysis is hypothetical. Overall, we believe the Subject would be able to achieve the maximum allowable LIHTC rents for all unit types at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. Additionally, we believe the Subject could achieve rents above the proposed rents provided by the client, at the maximum allowable levels for one- and two-bedroom units and slightly below the maximum allowable levels for three- and four-bedroom units, for units at 80 percent of AMI.

We have concluded to achievable LIHTC rents of \$598, \$474, \$579, and \$622 for the Subject's one-, two-, three-, and four-bedroom units at 40 percent of AMI, respectively. None of the comparables offer units at the 40 percent of AMI set aside, however these conclusions appear reasonable given the demonstrated demand for affordable housing at this income level and the relative lack of competition in the market. We have concluded to achievable LIHTC rents of \$897, \$833, \$993, \$1,084, and \$1,212 for the Subject's one- through five-bedroom units at 60 percent of AMI, respectively. Our conclusions are within the range of the comparables and appear reasonable. It should be noted that none of the LIHTC comparables offer five-bedroom units. The indicated rent advantage for the five-bedroom achievable LIHTC rents is within the range of the indicated rent advantages for the Subject's one- through four-bedroom units; thus, our achievable LIHTC rent conclusion for the Subject's five-bedroom units appears reasonable and market oriented. We believe the Subject's 80 percent of AMI units will need to offer a rent advantage to be competitive in the market and remain affordable for a larger pool of households below the 80 percent of AMI level. We have concluded to achievable LIHTC rents of \$1,196, 1,192, \$1,325, and \$1,500 for the Subject's one-, two-, three-, and four-bedroom units at 80 percent of AMI respectively. The concluded one- and two-bedroom rents are at the maximum allowable levels, and the three- and four-bedroom rents are below the maximum allowable levels. It should also be noted

that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

Overall, we believe the Subject could achieve the maximum allowable LIHTC rents at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. Our concluded achievable rents for the Subject's units at 80 percent of AMI are at the maximum allowable levels for one- and two-bedroom units. and below the maximum allowable levels for three- and four-bedroom units. Our concluded achievable LIHTC rents are generally below the overall adjusted average, with the exception of three-bedroom units at 60 percent of AMI, which are in line with the adjusted average. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable LIHTC rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for bedroom-type, have been utilized for the five-bedroom comparison. It should also be noted that out concluded achievable LIHTC rents offer a rent advantage ranging from nine to 64 percent relative to the achievable market rent conclusions for one- through four-bedroom units. Our five-bedroom achievable LIHTC rents at 60 percent of AMI offer a rent advantage of 32 percent relative to the achievable market rents, which is in line with the one- through four-bedroom units; thus, the five-bedroom achievable LIHTC rents appear reasonable. We believe that the Subject will maintain a vacancy rate of three percent or less as proposed. The capture rates for the Subject are considered low for all unit types. The existing LIHTC properties are reporting low vacancy rates; further, seven of the eight LIHTC comparables reported achieving the maximum allowable rents and four reported waiting lists. As a rehabilitation of an existing stabilized property, the Subject will not add any new units to the market. Based on these factors, we do not believe that the Subject will impact the performance of the existing LIHTC properties, if allocated. The low vacancy rates, presence of waiting lists, and percentage of income-qualified renters in the PMA indicate there is demand for affordable housing in the market that is currently unmet. Overall, based on the performance of the LIHTC comparables, we believe the Subject is feasible, absent subsidy, and that the Subject could achieve the maximum allowable LIHTC rents for units at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. It should be noted that the Subject will continue to operate with project-based Section 8 rental assistance on 154 of its 181 units, post renovations; thus, this analysis is hypothetical.

I. ABSORPTION AND STABILIZATION RATES

ABSORPTION AND STABILIZATION RATES

None of the comparables were able to provide absorption data. Further, none of the comparables were constructed within the past ten years. The table below illustrates absorption data obtained in pervious surveyes of LIHTC and market rate properties in the Atlanta area. All properties on the list below were constructed in 2009 or later.

ARSOPPTION

ABSORPTION									
Property Name	Rent	Tenancy	Year	Total Units	Absorption (units/month)				
The Kirkwood	Market	Family	2018	232	21				
Platform Apartments	Market	Family	2018	324	21

Adamsville Green	LIHTC	Senior	2010	90	45				
Average LIHTC					31				
Average Market					23				
Overall Average					27				

As illustrated above, we obtained data from 25 properties, located between 0.46 and 11.6 miles from the Subject. These properties reported absorption rates ranging from eight to 70 units per month, with an overall average of approximately 27 units per month. Per DCA guidelines, we have calculated absorption to a stabilized occupancy of 93 percent. Overall, if the Subject were to be hypothetically vacated we would expect the Subject to experience an absorption rate of 30 units per month. This equates to an absorption period of approximately six months. Kit should be noted that tenants will continue to reside at the Subject and remain income-qualified, post renovation. Further, 154 of the Subject's 181 units will continue to benefit from project-based Section 8 rental assistance. Thus, this analysis is hypothetical.

J. INTERVIEWS

Atlanta Housing Authority

We attempted to contact the Atlanta Housing Authority (AHA) who administers Section 8 Housing Choice Vouchers (HCV) in Atlanta but as of the date of this report our calls have not been returned. However, according to their website, the housing authority has temporarily closed their waitlist as of March 27, 2017. The 2019 payment standards for Fulton County are detailed in the table below. The Subject's proposed gross LIHTC rents are slightly above the payment standards for one- and two-bedroom units; however, it should be noted that 154 of the Subject's 181 units will continue to benefit from project-based Section 8 rental assistance, post renovation.

PAYMENT STANDARDS

Unit Type	Standard
Studio	\$880
One-Bedroom	\$902
Two-Bedroom	\$1,034
Three-Bedroom	\$1,331
Four-Bedroom	\$1,639
Five-Bedroom	\$1,884

Source: Georgia Department of Community Affairs, effective January 20189

Planning

We attempted to contact the Atlanta Planning Department regarding proposed, planned, and under construction multifamily developments in the PMA. However, as of the date of this report, our phone calls and emails have not been returned. As an alternative, we researched new construction listings provided by CoStar. The data provided by CoStar is illustrated in the table below.

ΡI	ANNED	DEVEL	OPMENT

I BANKED BETELOT MENT										
Property Name	Rent	Tenancy	Total	Competitive	LIHTC Allocation	Construction Status	Distance			
Property Name	Structure	Tellaticy	Units	Units	Year	Construction Status	to Subject

Summerhill Apartments Phase II	Market	Family	520	0	N/A	Proposed	0.7 miles			
Totals			2.176	0						

As illustrated above, nine projects comprising a total of 2,176 units have been identified in the development pipeline in the PMA. Seven of the nine projects are market rate developments and are not considered to be directly competitive with the Subject due to their market oriented rents and/or incomparable tenancy. Two proposed mixed income projects were identified; however, as of the effective date of this report, neither project has received a LIHTC allocation. Thus, these two projects are also considered non-competitive with the Subject due to their market oriented rents and lack of affordability funding. It should be noted that if either project were to receive a LIHTC allocation, any two- through five-bedroom family LIHTC units at 60 percent of AMI would be considered directly competitive with the Subject.

According to the Georgia Department of Community Affairs' Tax Credit Awards lists, there has been two properties selected for LIHTC funding in the PMA since 2015. The following table illustrates properties with recent LIHTC allocations in the PMA.

RECENT LIHTC ALLOCATIONS IN PMA

Property Name	Year	Rent	Tenancy	Total Units	Competitive	Distance
Property Name	Allocated	Structure	Tellaticy	Total Ullits	Units	to Subject
Adair Court	2016	LIHTC/Market	Senior	91	45	1.1 miles
Phoenix House	2015	LIHTC	Other	69	0	2.2 miles
				160	45	

Source: Georgia Department of Community Affairs, May 2019

- Adair Court- is a 195-unit mixed-income development that will target a senior tenancy and include oneand two-bedroom units. The development will offer 77 LIHTC units and 118 market rate units,
 including 45 one-bedroom units restricted at 60 percent of AMI that are expected to compete directly
 with the Subject. The remaining units are not considered competitive with the Subject due to different
 rent set asides and tenancy. We have deducted 45 units from our annual demand analysis. As of the
 effective date of this report, Adair Court is under construction and has not been included as a
 comparable property in this report.
- Phoenix House- is a 69-unit LIHTC development that will include one-, and four-bedroom units. The
 development's tenancy will be for the formerly homeless persons with disabilities, utilizing City of
 Atlanta's Coordinated Entry program for 19 units. We do not expect it to be competitive with the Subject
 based on its target tenancy. Therefore we have not deducted any units from our demand analysis and
 have excluded the project from our list of comparable properties.

According to a rent roll dated September 30, 2019, the Subject is 99.4 percent occupied with one vacant unit, and 100 percent leased. Additionally, of the Subject's 181 units, 154 will continue to benefit from a Section 8 rental subsidy, post renovation. Further, existing LIHTC and other affordable properties in the PMA maintain high occupancy rates, and six of the eight affordable comparables reported achieving the maximum allowable rents. Given this information, we do not believe that the renovation of the Subject utilizing tax credits will impact the existing LIHTC properties in the area that are in overall good condition and currently performing well. However, it is possible that the Subject will draw tenants from the older LIHTC, or public housing properties that suffer from deferred maintenance and those that are currently underperforming the market.

Economic Development

The following table illustrates the layoffs and closures of significance that have occurred or been announced since 2017 in Fulton County according to the Georgia Department of Labor.

Source: Georgia Department of Labor, May 2019

As illustrated in the above table, there have been 9,057 employees impacted by layoffs or closures since 2017 in the county. Overall, these layoffs are insignificant relative to the size of the local economy and the recent opportunities created through the reported business expansions.

We attempted to contact the Fulton County Development Authority to obtain information about recent business activity in Atlanta and Fulton County, however, as of the date of this report our calls have not been returned. According to Atlanta Journal-Constitution (AJC), Atlanta's major daily newspaper, Fulton County is planning to expand its airport at Charlie Brown Field. The cost of the expansion is currently unknown but the plans include a new administration office, a modernized aircraft rescue and firefighting command center, more hangar space, a restaurant and a center for economic development. AJC also announced UPS recently relocated a regional shipping hub which brought in 3,000 jobs to the county.

Additional interviews can be found in the comments section of the property profiles.

K. CONCLUSIONS AND RECOMMENDATIONS

CONCLUSIONS

Demographics

The PMA population is projected to increase at a similar rate to the nation and slower than the MSA through market entry and through 2023. The senior population is projected to increase at a faster rate than the general population, faster than the national senior growth rate and below the MSA, through market entry and 2023. The largest age cohorts in the PMA are between 25 to 39. Approximately 10.1 percent of the population is concentrated in age cohorts over 65, which indicates a limited number of senior residents. The number of total households is projected to increase at a similar rate to the nation and slower than the MSA through market entry and through 2023. The number of senior households is projected to increase at a faster rate than the number of total households, faster than the national senior growth rate and below the MSA, through market entry and 2023. The Subject will target senior households ranging from one to two persons, and family households ranging from two to eight persons; thus, the vast majority of renter households in the PMA will be eligible to reside at the Subject. The percentage of renter households in the PMA is estimated to be 67 percent as of 2018. The percentage of renter households in the PMA is expected to remain relatively stable through market entry and 2023. The majority of senior households in the PMA are renter-occupied, at 58.9 percent in 2018. This figure is also projected to remain relatively stable through market entry and 2023. Absent subsidy, the Subject will target senior households earning between \$17,940 and \$51,040, as well as family households earning between \$36, 926 and \$63,180. Approximately 20.8 percent of senior renter households in the PMA are earning incomes of \$20,000 to \$50,000 annually, and approximately 38.2 percent of total households are earning between \$20,000 and \$75,000 annually, which generally represents the Subject's target tenancy. For the projected market entry date of June 2021, these percentages are expected to remain generally similar, at 21.7 percent and 38.4 percent for the senior and family households, respectively. It should be noted that the Subject is currently operating as a stabilized property with project-based Section 8 rental assistance for 154 of its 181 units. The Subject will continue to operate with project-based Section 8 rental assistance on 154 of its 181 units, post renovations. As proposed, the Subject will target senior households earning between \$0 and \$51,040, and family households earning between \$0 and \$74,000. This income band comprises a significantly larger portion of renter households, with 90.0 percent of senior renter households in the PMA earning less than \$50,000 annually, and 92.3 percent of total households earning under \$75,000 annually. Overall, the increasing population in the PMA coupled with a high concentration of renter households earning qualifying incomes in the PMA indicates significant demand for affordable rental housing in the market.

Employment Trends

Covered employment has grown in each year since 2011, and surpassed 2008 levels in 2013. Employment in the PMA is concentrated in the accommodation/food services, healthcare/social assistance, and prof/scientific/tech services industries, which collectively comprise 34 percent of local employment. The large share of PMA employment in accommodation/food services is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods. The effects of the recession were more pronounced in the MSA, which suffered a 6.8 percent employment contraction, compared to only 4.8 percent across the overall nation. Employment in the MSA recovered and surpassed pre-recessionary levels in 2015, a year after the overall nation. As of August 2019, total employment in the MSA is at a post-recessionary record and increasing at an annualized rate of 0.9 percent, compared to 1.5 percent across the overall nation. Overall, the local economy appears to have fully recovered from the national recession and entered into an expansionary phase.

As the analysis illustrates, the Subject's overall capture rate is approximately 0.1 percent, absent subsidy. Assuming all vacant units are to be absorbed at each unique AMI level, The Subject's three-bedroom capture rates by AMI level range from 1.4 to 1.6 percent. The Subject's one-bedroom capture rate at 80 percent of AMI is approximately 1.2 percent. Therefore, we believe there is adequate demand for the Subject. The overall capture rate at the Subject, as well as all applicable AMI and bedroom-type capture rates, are well below the 2019 DCA Market Study capture rate threshold of 30 percent.

Absorption

None of the comparables were able to provide absorption data. Further, none of the comparables were constructed within the past ten years. The table below illustrates absorption data obtained in pervious surveyes of LIHTC and market rate properties in the Atlanta area. All properties on the list below were constructed in 2009 or later.

ABSORPTION

Property Name	Rent	Tenancy	Year	Total Units	Absorption (units/month)

Average LIHTC					31
Average Market					23
Overall Average					27

As illustrated above, we obtained data from 25 properties, located between 0.46 and 11.6 miles from the Subject. These properties reported absorption rates ranging from eight to 70 units per month, with an overall average of approximately 27 units per month. Per DCA guidelines, we have calculated absorption to a stabilized occupancy of 93 percent. Overall, if the Subject were to be hypothetically vacated we would expect the Subject to experience an absorption rate of 30 units per month. This equates to an absorption period of approximately six months. Kit should be noted that tenants will continue to reside at the Subject and remain income-qualified, post renovation. Further, 154 of the Subject's 181 units will continue to benefit from project-based Section 8 rental assistance. Thus, this analysis is hypothetical.

Vacancy Trends

The following table summarizes overall weighted vacancy trends at the surveyed properties.

OVERALL VACANCY

Property Name	Rent Structure	Tenancy	Total Units	Vacant Units	Vacancy Rate
Centennial Place Apartments*	LIHTC/ Market	Family	738	3	0.4%
Columbia Peoplestown	LIHTC/ Market	Family	99	2	2.0%
Columbia Senior Residences At Mechanicsville	LIHTC/ Market	Senior	154	4	2.6%
Mechanicsville Family	LIHTC/ Market	Family	174	3	1.7%
Park At Castleton*	LIHTC/ Market	Family	324	0	0.0%
The Square At Peoplestown	LIHTC	Family	94	1	1.1%
The Villages At Carver*	LIHTC/ Market	Family	666	13	2.0%
The Villages At Castleberry Hill*	LIHTC/ Market	Family	630	25	4.0%
Audubon Briarcliff*	Market	Family	227	16	7.0%
Brookside Park Apartments	Market	Family	201	10	5.0%
Eagles Run Apartments*	Market	Family	258	33	12.8%
Point At Westside*	Market	Family	267	0	0.0%
Total LIHTC			2,879	51	1.8%
Total Market Rate			953	59	6.2%
Overall Total			3,832	110	2.9%

^{*}Located outside of the PMA

The comparables reported vacancy rates ranging from zero to 12.8 percent, with an overall weighted average of 2.9 percent. The manager at Park at Castleton reported being fully occupied. The average vacancy rate reported by the affordable comparables was 1.8 percent, well below the 6.2 percent average reported by the market rate properties. The average LIHTC vacancy rate of 1.8 percent is considered exceptionally low, and indicative of supply constrained conditions. Additionally, six of the eight affordable comparables reported rents at the maximum allowable levels, and four reported waiting lists. All of the market rate properties reported vacancy rates of 12.8 percent or lower. It should be noted that the contact at Eagles Run Apartments indicated that vacancy was elevated due to recent evictions of delinquent accounts. Excluding this comparable, the market rate comparables reported a weighted average vacancy rate of approximately 3.7 percent. It should also be noted that Columbia Senior Residences at Mechanicsville, the only age-restricted comparable, and The Square at Peoplestown, the only fully restricted affordable comparable, reported vacancy rates of 2.6 and 1.1 percent, respectively. Given that the majority of the Subject's units are age-restricted to senior households and that the Subject will be fully restricted at the 40, 60, and 80 percent of AMI levels, post renovartion, we have place the most weight on these comparables.

As a newly renovated property, we have concluded to a stabilized vacancy rate of three percent for the Subject property under the restricted scenarios and five percent in the unrestricted scenario.

Strengths of the Subject

Strengths of the Subject will include its newly renovated units and proximity to local amenities, including public transit. The Subject site is located immediately adjacent to downtown Atlanta.

Conclusion

Based upon our market research, demographic calculations and analysis, we believe the Subject could achieve the maximum allowable LIHTC rents for all unit types, with the exception of three- and four-bedroom units at 80 percent of AMI, in the hypothetical event of a loss of Section 8 subsidies. Overall vacancy in the market is low at 2.8 percent. The average vacancy rate reported by the affordable comparables was 1.8 percent, below the 6.0 percent average reported by the market rate properties. Further, six of the eight LIHTC comparables reported achieving the maximum allowable rents and four of the eight LIHTC comparables reported waiting lists. The low vacancy rates, achievement of maximum rents, and waiting lists in the market indicate demand for additional rental housing in the Subject's PMA.

The Subject's achievable LIHTC rents are generally below the overall adjusted average, with the exception of one-, two-, and three-bedroom units at 60 percent of AMI. Overall, we believe the Subject's proposed rents, which are at the maximum allowable levels for units at 40 and 60 percent of AMI, are achievable in the hypothetical event of a loss of Section 8 subsidies. The Subject's proposed rents at 80 percent of AMI are based on current in-place rents and are below the maximum allowable LIHTC rents. We have concluded to achievable rents at the maximum allowable levels for the Subject's one- and two-bedroom units at 80 percent of AMI, and below the maximum allowable levels, but above the proposed rents, for three- and four-bedroom units at 80 percent of AMI. It should also be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

Six of the eight LIHTC comparables reported rents at the maximum allowable levels and four reported waiting lists. The average vacancy rate reported by the affordable comparables was 1.8 percent, below the 6.0 percent average reported by the market rate properties. The low vacancy rates and waiting lists reported among all of the LIHTC comparables indicate demand for additional affordable rental housing in the Subject's PMA. Based on the previous demand analysis, performance of the comparable properties, and conversations with local property managers, we believe there is continuing, pent-up demand for affordable rental housing in the local market. As such, we believe the Subject will help fill a void in the market for good quality affordable rental housing. It should be noted that the Subject is a rehabilitation of an existing stabilized property, and the Subject will not add any new units to the market; thus, this analysis is hypothetical. Overall, we believe the Subject would be able to achieve the maximum allowable LIHTC rents for all unit types at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. Additionally, we believe the Subject could achieve rents above the proposed rents provided by the client, at the maximum allowable levels for one- and two-bedroom units and slightly below the maximum allowable levels for three- and four-bedroom units, for units at 80 percent of AMI.

We have concluded to achievable LIHTC rents of \$598, \$474, \$579, and \$622 for the Subject's one-, two-, three-, and four-bedroom units at 40 percent of AMI, respectively. None of the comparables offer units at the 40 percent of AMI set aside, however these conclusions appear reasonable given the demonstrated demand for affordable housing at this income level and the relative lack of competition in the market. We have concluded to achievable LIHTC rents of \$897, \$833, \$993, \$1,084, and \$1,212 for the Subject's one-through five-bedroom units at 60 percent of AMI, respectively. Our conclusions are within the range of the comparables and appear reasonable. It should be noted that none of the LIHTC comparables offer five-bedroom units. The indicated rent advantage for the five-bedroom achievable LIHTC rents is within the range of the indicated rent advantages for the Subject's one-through four-bedroom units; thus, our achievable LIHTC rent conclusion for the Subject's five-bedroom units appears reasonable and market oriented. We believe the Subject's 80 percent of AMI units will need to offer a rent advantage to be competitive in the market and remain affordable for a larger pool of households below the 80 percent of AMI level. We have concluded to achievable LIHTC rents of \$1,196, 1,192, \$1,325, and \$1,500 for the Subject's one-, two-, three-, and four-bedroom units at 80 percent of AMI respectively. The concluded one- and two-bedroom rents are at the maximum allowable levels, and the three- and four-bedroom rents are below the maximum allowable levels. It should also be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

Overall, we believe the Subject could achieve the maximum allowable LIHTC rents at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. Our concluded achievable rents for the Subject's units at 80 percent of AMI are at the maximum allowable levels for one- and two-bedroom units, and below the maximum allowable levels for three- and four-bedroom units. Our concluded achievable LIHTC rents are generally below the overall adjusted average, with the exception of three-bedroom units at 60 percent of AMI, which are in line with the adjusted average. Due to the lack of four- and five-bedroom inventory, we have supplemented comparable LIHTC rents with adjusted comparable LIHTC rents, as applicable. Further, due to the lack of five-bedroom LIHTC comparables, only adjusted market rents, which include adjustments for

bedroom-type, have been utilized for the five-bedroom comparison. It should also be noted that out concluded achievable LIHTC rents offer a rent advantage ranging from nine to 64 percent relative to the achievable market rent conclusions for one-through four-bedroom units. Our five-bedroom achievable LIHTC rents at 60 percent of AMI offer a rent advantage of 32 percent relative to the achievable market rents, which is in line with the one- through four-bedroom units; thus, the five-bedroom achievable LIHTC rents appear reasonable. We believe that the Subject will maintain a vacancy rate of three percent or less as proposed. The capture rates for the Subject are considered low for all unit types. The existing LIHTC properties are reporting low vacancy rates; further, seven of the eight LIHTC comparables reported achieving the maximum allowable rents and four reported waiting lists. As a rehabilitation of an existing stabilized property, the Subject will not add any new units to the market. Based on these factors, we do not believe that the Subject will impact the performance of the existing LIHTC properties, if allocated. The low vacancy rates, presence of waiting lists, and percentage of income-qualified renters in the PMA indicate there is demand for affordable housing in the market that is currently unmet. Overall, based on the performance of the LIHTC comparables, we believe the Subject is feasible, absent subsidy, and that the Subject could achieve the maximum allowable LIHTC rents for units at 40 and 60 percent of AMI in the hypothetical event of a loss of Section 8 subsidies. It should be noted that the Subject will continue to operate with project-based Section 8 rental assistance on 154 of its 181 units, post renovations; thus, this analysis is hypothetical.

Recommendations

Overall, we believe the Subject would be able to achieve the maximum allowable LIHTC rents for all unit types, with the exception of three- and four-bedroom units at 80 percent of AMI, in the hypothetical event of a loss of Section 8 subsidies. It should be noted that 154 of the Subject's 181 units will continue to receive project-based Section 8 rental assistance, post renovations; thus, this analysis is hypothetical.

L. SIGNED STATEMENT REQUIREMENTS

I affirm that I (or one of the persons signing below) have made a physical inspection of the market area and the Subject property and that information has been used in the full study of the need and demand for the proposed units. The report was written according to DCA's market study requirements, the information included is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market. To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

ADDENDUM A

Assumptions and Limiting Conditions

ASSUMPTIONS AND LIMITING CONDITIONS

- 1. In the event that the client provided a legal description, building plans, title policy and/or survey, etc., the market analyst has relied extensively upon such data in the formulation of all analyses.
- 2. The legal description as supplied by the client is assumed to be correct and the author assumes no responsibility for legal matters, and renders no opinion of property title, which is assumed to be good and merchantable.
- All encumbrances, including mortgages, liens, leases, and servitudes, were disregarded in this valuation
 unless specified in the report. It was recognized, however, that the typical purchaser would likely take
 advantage of the best available financing, and the effects of such financing on property value were
 considered.
- 4. All information contained in the report, which others furnished, was assumed to be true, correct, and reliable. A reasonable effort was made to verify such information, but the author assumes no responsibility for its accuracy.
- 5. The report was made assuming responsible ownership and capable management of the property.
- 6. The sketches, photographs, and other exhibits in this report are solely for the purpose of assisting the reader in visualizing the property. The author made no property survey, and assumes no liability in connection with such matters. It was also assumed there is no property encroachment or trespass unless noted in the report.
- 7. The author of this report assumes no responsibility for hidden or unapparent conditions of the property, subsoil or structures, or the correction of any defects now existing or that may develop in the future. Equipment components were assumed in good working condition unless otherwise stated in this report.
- 8. It is assumed that there are no hidden or unapparent conditions for the property, subsoil, or structures, which would render it more or less valuable. No responsibility is assumed for such conditions or for engineering, which may be required to discover such factors.
- 9. The investigation made it reasonable to assume, for report purposes, that no insulation or other product banned by the Consumer Product Safety Commission has been introduced into the Subject premises. Visual inspection by the market analyst did not indicate the presence of any hazardous waste. It is suggested the client obtain a professional environmental hazard survey to further define the condition of the Subject soil if they deem necessary.
- 10. Any distribution of total property value between land and improvements applies only under the existing or specified program of property utilization. Separate valuations for land and buildings must not be used in conjunction with any other study or market study and are invalid if so used.
- 11. Possession of the report, or a copy thereof, does not carry with it the right of publication, nor may it be reproduced in whole or in part, in any manner, by any person, without the prior written consent of the author particularly as to value conclusions, the identity of the author or the firm with which he or she is connected. Neither all nor any part of the report, or copy thereof shall be disseminated to the general public by the use of advertising, public relations, news, sales, or other media for public communication without the prior written consent and approval of the market analyst. Nor shall the market analyst, firm, or professional organizations of which the market analyst is a member be identified without written consent of the market analyst.

- 12. Disclosure of the contents of this report is governed by the Bylaws and Regulations of the professional organization with which the market analyst is affiliated.
- 13. The author of this report is not required to give testimony or attendance in legal or other proceedings relative to this report or to the Subject property unless satisfactory additional arrangements are made prior to the need for such services.
- 14. The opinions contained in this report are those of the author and no responsibility is accepted by the author for the results of actions taken by others based on information contained herein.
- 15. Opinions of value contained herein are estimates. There is no guarantee, written or implied, that the Subject property will sell or lease for the indicated amounts.
- 16. All applicable zoning and use regulations and restrictions are assumed to have been complied with, unless nonconformity has been stated, defined, and considered in the market study report.
- 17. It is assumed that all required licenses, permits, covenants or other legislative or administrative authority from any local, state, or national governmental or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this report is based.
- 18. On all studies, Subject to satisfactory completion, repairs, or alterations, the report and conclusions are contingent upon completion of the improvements in a workmanlike manner and in a reasonable period of time.
- 19. All general codes, ordinances, regulations or statutes affecting the property have been and will be enforced and the property is not Subject to flood plain or utility restrictions or moratoriums, except as reported to the market analyst and contained in this report.
- 20. The party for whom this report is prepared has reported to the market analyst there are no original existing condition or development plans that would Subject this property to the regulations of the Securities and Exchange Commission or similar agencies on the state or local level.
- 21. Unless stated otherwise, no percolation tests have been performed on this property. In making the market study, it has been assumed the property is capable of passing such tests so as to be developable to its highest and best use.
- 22. No in-depth inspection was made of existing plumbing (including well and septic), electrical, or heating systems. The market analyst does not warrant the condition or adequacy of such systems.
- 23. No in-depth inspection of existing insulation was made. It is specifically assumed no Urea Formaldehyde Foam Insulation (UFFI), or any other product banned or discouraged by the Consumer Product Safety Commission has been introduced into the property. The market analyst reserves the right to review and/or modify this market study if said insulation exists on the Subject property.
- 24. Estimates presented in this report are assignable to parties to the development's financial structure.

Carr, Lawson, Cantrell, & Associates, Associate Appraiser, July 2007-October 2013

REAL ESTATE ASSIGNMENTS

A representative sample of due diligence, consulting or valuation assignments includes:

- Prepare market studies and appraisals throughout the U.S. for proposed and existing family and senior Low-Income Housing Tax Credit (LIHTC), market rate, HOME financed, USDA Rural Development, and HUD subsidized properties. Appraisal assignments involve determining the as is, as if complete, and as if complete and stabilized values.
- Conduct physical inspections of subject properties and comparables to determine condition and evaluate independent physical condition assessments.
- Performed valuations of a variety of commercial properties throughout the Southeast which included hotels, gas stations and convenience stores, churches, funeral homes, full service and fast-food restaurants, stand-alone retail, strip shopping centers, distribution warehouse and manufacturing facilities, cold storage facilities, residential and commercial zoned land, and residential subdivision lots. Intended uses included first mortgage, refinance, foreclosure/repossession (REO), and divorce.
- Employed discounted cash flow analysis (utilizing Argus or Excel) to value income producing properties and prepare or analyze cash flow forecasts.
- Reviewed and analyzed real estate leases, including identifying critical lease data such as commencement/expiration dates, various lease option types, rent and other income, repair and maintenance obligations, Common Area Maintenance (CAM), taxes, insurance, and other important lease clauses.

Numerous speaking engagements at Affordable Housing Conferences throughout the Country

Participated in several industry forums regarding the Military Housing Privatization Initiative

Authored "New Legislation Emphasizes Importance of Market Studies in Allocation Process," Affordable Housing Finance, March 2001

VI. Real Estate Assignments

A representative sample of Due Diligence, Consulting or Valuation Engagements includes:

- On a national basis, conduct market studies and appraisals for proposed Low-Income Housing Tax Credit properties. Analysis includes preliminary property screenings, market analysis, comparable rent surveys, demand analysis based on the number of income qualified renters in each market, supply analysis and operating expense analysis to determine appropriate cost estimates.
- On a national basis, conduct market studies and appraisals of proposed new construction and existing properties under the HUD Multifamily Accelerated Processing program. This includes projects under the 221(d)3, 221(d)4, 223(f), and 232 programs.
- Completed numerous FannieMae and FreddieMac appraisals of affordable and market rate multifamily properties for DUS Lenders.
- Managed and completed numerous Section 8 Rent Comparability Studies in accordance with HUD's Section 9 Renewal Policy and Chapter 9 for various property owners and local housing authorities.
- Designed and implemented rent reasonableness toolkit for Public Housing Agencies (PHA) in support of Housing Choice Voucher program. Rent reasonableness tool provides an estimated rent based on surveyed market conditions specific to the PHA.
- Developed a Flat Rent Model for the Trenton Housing Authority. Along with teaming partner, Quadel Consulting Corporation, completed a public housing rent comparability study to determine whether the flat rent structure for public housing units is reasonable in comparison to similar, market-rate units. THA also requested a flat rent schedule and system for updating its flat rents. According to 24 CFR 960.253, public housing authorities (PHAs) are required to establish flat rents, in order to provide residents a choice between paying a "flat" rent, or an "income-based" rent. The flat rent is based on the "market rent", defined as the rent charged for a comparable unit in the private, unassisted market at which a PHA could lease the public housing unit after preparation for occupancy. Based upon the data collected, the consultant will develop an appropriate flat rent schedule, complete with supporting documentation outlining the methodology for determining and applying the rents. We developed a system that THA can implement to update the flat rent schedule on an annual basis.

- As part of an Air Force Privatization Support Contractor team (PSC) to assist the Air Force in
 its privatization efforts. Participation has included developing and analyzing housing
 privatization concepts, preparing the Request for Proposal (RFP), soliciting industry interest
 and responses to housing privatization RFP, Evaluating RFP responses, and recommending
 the private sector entity to the Air Force whose proposal brings best value to the Air Force.
 Mr. Weinberg has participated on numerous initiatives and was the project manager for Shaw
 AFB and Lackland AFB Phase II.
- Conducted housing market analyses for the U.S. Army in preparation for the privatization of
 military housing. This is a teaming effort with Parsons Corporation. These analyses were done
 for the purpose of determining whether housing deficits or surpluses exist at specific
 installations. Assignment included local market analysis, consultation with installation
 housing personnel and local government agencies, rent surveys, housing data collection, and
 analysis, and the preparation of final reports.
- Developed a model for the Highland Company and the Department of the Navy to test feasibility of developing bachelor quarters using public-private partnerships. The model was developed to test various levels of government and private sector participation and contribution. The model was used in conjunction with the market analysis of two test sites to determine the versatility of the proposed development model. The analysis included an analysis of development costs associated with both MILCON and private sector standards as well as the potential market appeal of the MILSPECS to potential private sector occupants.

STATEMENT OF PROFESSIONAL QUALIFICATIONS

Garrett Rogerson

Education

University of Texas at Austin - Austin, Texas

• BS - Sport Management & Urban Geography

Experience

Analyst, Novogradac & Company LLP (December 2018- Present)
Junior Analyst, Novogradac & Company LLP (July 2017 – December 2018)

- Performs market studies for proposed new construction and existing affordable, market rate, and age-restricted multifamily developments. This includes property screenings, market and demographic analyses, comparable rent surveys, supply and demand analyses, determination of market rents, and other general market analysis.
- Conducts physical inspections of subject properties and comparable properties to determine condition and evaluate independent physical condition assessments.
- Analyze historic audited financial statements and proposed operating statements to determine property expense projections.
- Assist on appraisals using the cost approach, income capitalization approach, and sales comparison approach for multifamily developments. Additional appraisal assignments also include partnership valuations and HUD MAP reports.
- Prepare HUD Market-to-Market rent comparability studies for Section 8 multifamily developments.

Real Estate Assignments: The analyst has conducted research and completed assignments in the following states and U.S. Territories:

Alabama Missouri
Arizona New Jersey
Arkansas New York
California North Carolina

Colorado Ohio
