Re: Application Market Study for Roswell Redevelopment Phase I, located in Roswell, Fulton County, Georgia

Dear Mr. Clack:

At your request, Novogradac Consulting LLP performed a study of the multifamily rental market in the Roswell, Fulton County, Georgia area relative to the above-referenced Low-Income Housing Tax Credit (LIHTC) project.

The purpose of this market study is to assess the viability of the proposed 95-unit family LIHTC project. It will be a newly constructed affordable LIHTC project, with 95 revenue generating units, restricted to households earning 30, 60, and 80 percent of the Area Median Income (AMI) or less. Additionally, all units will operate with project-based rental assistance where tenants will contribute 30 percent of income toward rent. The Subject's units will be developed as part of the rental assistance demonstration (RAD) program, and they will replace the same number of project-based units that are currently located on the site. The following report provides support for the findings of the study and outlines the sources of information and the methodologies used to arrive at these conclusions.

The scope of this report meets the requirements of Georgia Department of Community Affairs (DCA), including the following:

- Inspecting the site of the proposed Subject and the general location.
- Analyzing appropriateness of the proposed unit mix, rent levels, available amenities and site.
- Estimating market rent, absorption and stabilized occupancy level for the market area.
- Investigating the health and conditions of the multifamily market.
- Calculating income bands, given the proposed Subject rents.
- Estimating the number of income eligible households.
- Reviewing relevant public records and contacting appropriate public agencies.
- Analyzing the economic and social conditions in the market area in relation to the proposed project.
- Establishing the Subject Primary and Secondary Market Area(s) if applicable.
- Surveying competing projects, Low-Income Housing Tax Credit (LIHTC) and market rate.

Novogradac Consulting LLP adheres to the market study guidelines promulgated by the National Council of Housing Market Analysts (NCHMA).

This report contains, to the fullest extent possible and practical, explanations of the data, reasoning, and analyses that were used to develop the opinions contained herein. The report also includes a thorough analysis of the scope of the study, regional and local demographic and economic studies, and market analyses including conclusions. The depth of discussion contained in the report is specific to the needs of the client.

Information included in this report is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market. This report is completed in accordance with DCA market study guidelines. We inform the reader that other users of this document may underwrite the LIHTC rents to a different standard than contained in this report.

The Stated Purpose of this assignment is for tax credit application. You agree not to use the Report other than for the Stated Purpose, and you agree to indemnify us for any claims, damages or losses that we may incur as the result of your use of the Report for other than the Stated Purpose. Without limiting the general applicability of this paragraph, under no circumstances may the Report be used in advertisements, solicitations and/or any form of securities offering.

In the wake of the COVID-19 pandemic, there has been significant turmoil and uncertainty. Governments across the globe are taking dramatic efforts to reduce the strain on health care systems. These efforts result in extensive impacts on economic activity. However, governments are also implementing significant economic stimulus packages to help with this economic disruption.

- Clients and market participants throughout the country report April 2021 collections that are better than expected for all types of multifamily properties. According to a report from the National Multifamily Housing Council, April 2021 rent collections were up by 1.9 percentage points year-over-year from April 2020. Note that the apartments in this sample are market rate apartments in multifamily buildings and do not include affordable units. Through April 6, 2021, 79.8 percent of households made full or partial rent payments for April, according to the National Multifamily Housing Council. Although one-in-five renters did not pay their rent in the first week of the month, the majority of these missed payments are made up with late payments by the end of the month. A significant change in the market is not yet discernible and we continue to be relatively optimistic about the market's ability to weather the current economic storm.
- Based upon various conversations with market participants and published articles and webinars, many believe that multifamily real estate will be impacted, but significantly less so than other sectors.
 Further, the impact is expected be shorter lived. Many view multifamily as a safer haven during this period of uncertainty. The comparable properties reported an average vacancy rate of 3.8 percent. The Subject is proposed construction with anticipated market entry in November 2023.
- Novogradac maintains a proprietary database of operating results from our surveys of affordable and market rate properties. The database was implemented in 2005 and contains over 100,000 individual properties. The national occupancy rate for two-bedroom, 60 percent LIHTC properties dipped slightly during the Great Recession, but began a rebound after 2009. In 2008, the occupancy rate was 96.3 percent and it dropped less than one percentage point during the slowdown, to 95.4 percent in 2009 before beginning a gradual increase that slowed between 2016 and 2018, but continued through 2019. While this recession will undoubtedly be different than the last, this performance supports the points made above and illustrates the resilience in the affordable housing sector. Further, the majority of the comparables utilized in this report reported stable rents and occupancy rates.
- As of April 2021 the state of Georgia has restrictions in place to combat COVID-19 cases. These restrictions include capacity limits on indoor and outdoor gatherings, mask mandates, on-site alcohol curfews, and increased enforcement of guidelines in retail businesses. While the full impact to the housing market remains unclear, based upon market data there is no discernible change to capitalization rates. Further, we believe any impact to value that occurs going forward is likely to be negligible and relatively short term and that the stimulus packages will be sufficient to minimize the economic impacts on the broader economy and the housing market. We assume that additional

- measures will be taken to control the spread of the virus and some extension/expansion of unemployment benefits to continue to help stabilize the economy.
- Based upon discussions with market participants, collections have been strong due to increases in unemployment payments and the CARES stimulus plan. The stimulus package included monetary assistance to the nation's hospitals, provided direct pay to individuals, expanded unemployment benefits, and provided money for states and businesses impacted by the pandemic. However the provisions from the CARES Act expired on July 31, 2020. An additional \$900 billion stimulus package was passed in late December 2020, with a further \$1.9 trillion stimulus passed in March 2021. These packages resulted in additional one-time payments to households, with payments phasing out for higher income levels, in addition to extended unemployment benefits and industry-specific financial support. The March 2021 package also included additional nutritional assistance, assistance with COBRA premiums and child tax credits.
- The rollout of vaccinations for COVID-19 began in December 2020. We believe that the delivery of vaccinations will further advance mitigation of the adverse impacts of the COVID-19 pandemic.

The authors of this report certify that we are not part of the development team, owner of the Subject property. general contractor, nor are we affiliated with any member of the development team engaged in the development of the Subject property or the development's partners or intended partners. Please do not hesitate to contact us if there are any questions regarding the report or if Novogradac Consulting LLP can be of further assistance. It has been our pleasure to assist you with this project.

Respectfully submitted, Novogradac Consulting LLP

EXECUTIVE SUMMARY

1. Project Description

Roswell Redevelopment will be a newly constructed family property located at 151 Oak Street in Roswell, Fulton County, Georgia, consisting of two three-story lowrise residential buildings and one four-story midrise residential building in addition to one community building. The Subject addresses are located adjacent to one another. The Subject's units will be developed as part of the rental assistance demonstration (RAD) program, and they will replace the same number of project-based units that are currently located on the site.

The following table illustrates the proposed unit mix.

PROPOSED RENTS

| 11 - 21 T | Unit Size | Number | Asking | Utility | Gross | 2020 LIHTC Maximum | HUD Fair | | |
|---|-----------|----------|------------|------------------|--------------------------|----------------------|--------------|--|--|

| | | 95 | | | | | | | |

Notes (1) Source of Utility Allowance provided by the Developer.

All of the Subject's units at the 30, 60, and 80 percent of AMI level will operate with a project-based subsidy. Tenants in these units will pay 30 percent of their income towards rent. The proposed rents for the Subject's units are significantly below the maximum allowable rents. The Subject's amenity packages are considered to be comparable to the existing housing supply in the market. The Subject's largest weakness is its lack of proposed in-unit washers and dryers or washer/dryer hookups, which are prevalent in the market.

2. Site Description/Evaluation

The Subject site is located on the south side of Oak Street and the north side of Grove Way. The Subject site is currently improved with existing project-based Section 8 multifamily buildings in fair condition that will be demolished to allow for construction of the Subject. Land uses to the north of the Subject consist of single-family homes in average to excellent condition, in addition to various civic uses including Roswell City Hall, Roswell Public Library and the Roswell Police Department. Land uses to the east of the Subject consist of Veranda at Groveway, an age-restricted Section 8 property that was excluded from our analysis, in addition to Waller Park and the Roswell Water Treatment Plant. We contacted management at Veranda at Groveway, a subsidized senior property located adjacent to the Subject, who reported full occupancy and no detrimental impact from proximity to the water treatment plant. Based on observations during the course of inspection we do not consider the water treatment plant to be a detrimental influence on multifamily uses. Land uses to the south of the Subject consist of the Chattahoochee River National Recreation Area. Land uses to the west of the Subject consist of various intuitional and commercial uses, including the Pleasant Hill Community Center. Based on our inspection of the neighborhood, retail appeared to be 90 to 95 percent occupied. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 61 out of 100. The Subject site is

considered a desirable building site for rental housing. The Subject site is located in a mixed-use neighborhood. The uses surrounding the Subject are in average to excellent condition. The site has good proximity to locational amenities, which are within 5.1 miles of the Subject site, with the majority located within 3.7 miles of the Subject site.

3. Market Area Definition

The PMA is defined by Hardscrabble Road, Rucker Road and Old Milton Parkway to the north, Haynes Bridge Road and Nesbit Ferry Road to the east, Dunwoody Club Drive and Abernathy Road NW to the south, and the Fulton-Cobb County Line to the west. This area includes the city of Roswell as well as portions of Sandy Springs and Alpharetta. The distances from the Subject to the farthest boundaries of the PMA in each direction are listed as follows:

North: 4.1 miles East: 5.1 miles South: 6.2 miles West: 2.5 miles

The PMA is defined based on interviews with the local housing authority, property managers at comparable properties, and the Subject's property manager. Many property managers indicated that a portion of their tenants come from out of state, generally relocating to the area for work. Of those residents coming from within Georgia most are coming from the cities located in northern Fulton County. While we do believe the Subject will experience leakage from outside the PMA boundaries, per the 2021 market study guidelines, we do not account for leakage in our demand analysis found later in this report. The farthest PMA boundary from the Subject is approximately 6.2 miles.

4. Community Demographic Data

The population in the PMA and the MSA increased from 2000 to 2020, though the rate of growth slowed from 2010 to 2020. The rate of population and household growth is projected to continue slowing through 2023. The current population of the PMA is 150,724 and is expected to be 159,325 in 2025. The current number of households in the PMA is 63,503 and is expected to be 65,835 in 2025. Renter households are concentrated in the lowest income cohorts, with 52.0 percent of renters in the PMA earning less than \$60,000 annually. The Subject will target households earning between \$0 and \$71,520 (\$15,943 and \$71,520 absent subsidy); therefore, the Subject should be well-positioned to service this market. Overall, while population growth has been modest, the concentration of renter households at the lowest income cohorts indicates significant demand for affordable rental housing in the market.

According to *RealtyTrac* statistics, one in every 11,396 housing units nationwide was in some stage of foreclosure as of March 2021, the most recent available data. The city of Roswell is experiencing a foreclosure rate of one in every 20,650 homes, while Fulton County is experiencing foreclosure rate of one in every 8,600 homes and Georgia experienced one foreclosure in every 11,330 housing units. Overall, Roswell is experiencing a lower foreclosure rate to the nation, state and county, indicating a healthy housing market. The Subject's neighborhood does not have a significant amount of abandoned or vacant structures that would impact the marketability of the Subject.

5. Economic Data

Employment in the PMA is concentrated in the professional/scientific/technical services, healthcare/social assistance, and retail trade industries, which collectively comprise 38.4 percent of local employment. The large share of PMA employment in retail trade is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods.

For the 12-month period ending in March 2021 total employment in the MSA decreased 1.5 percent, which compares to a 3.0 percent decrease in the nation as a whole for the same period of analysis. In 2021 year-to-date, the MSA has exhibited an increase in employment of 3.5 percent, which compares to a national increase of 1.1 percent. The unemployment rate in the MSA was 4.1 percent as of March 2021, which compares to a national unemployment rate of 6.2 for the nation. Based on the performance of the MSA economy during the COVID-19 pandemic, including the nascent recovery in 2021 year-to-date, we believe that the MSA will likely recover from the pandemic-induced recession at a rate faster than the nation. However, we caution that the timing of the full recovery remain uncertain as of the date of this report. Though with continued deployment of vaccinations, we believe that the recovery will continue in 2021. Overall, we believe that the strong employment growth in the MSA through the pandemic indicated growing demand for housing in the area, including affordable rental units.

6. Affordability and Demand Analysis

The following table illustrates the demand and capture rates for the Subject's proposed units.

CAPTURE RATE ANALYSIS CHART

| Hait Tone | Minimum | Maximum | Units | Total | Cummbu | Net | Capture | Proposed |
|-------------------------------|----------|----------|----------|--------|--------|--------|---------|----------|
| Unit Type | Income | Income | Proposed | Demand | Supply | Demand | Rate | Rents |
| 1BR @30% (As Proposed) | \$0 | \$19,860 | 10 | 818 | 0 | 818 | 1.2% | \$608 |
| 1BR @30% (Absent Subsidy) | \$15,943 | \$19,860 | 10 | 423 | 0 | 423 | 2.4% | \$608 |
| 1BR @60% (As Proposed) | \$0 | \$34,740 | 35 | 2,231 | 0 | 2,231 | 1.6% | \$608 |
| 1BR @60% (Absent Subsidy) | \$31,886 | \$34,740 | 35 | 1,154 | 0 | 1,154 | 3.0% | \$608 |

| 1BR Overall (Absent Subsidy) | \$15,943 | \$46,320 | 49 | 2,753 | 0 | 2,753 | 1.8% | - |
| 2BR @30% (As Proposed) | \$0 | \$22,350 | 6 | 673 | 0 | 673 | 0.9% | \$707 |
| 2BR @30% (Absent Subsidy) | \$19,131 | \$22,350 | 6 | 348 | 0 | 348 | 1.7% | \$707 |
| 2BR @60% (As Proposed) | \$0 | \$44,700 | 18 | 1,837 | 0 | 1,837 | 1.0% | \$707 |
| 2BR @60% (Absent Subsidy) | \$38,297 | \$44,700 | 18 | 950 | 0 | 950 | 1.9% | \$707 |
| 2BR @80% (As Proposed) | \$0 | \$59,600 | 5 | 2,592 | 0 | 2,592 | 0.2% | \$707 |
| 2BR @80% (Absent Subsidy) | \$51,086 | \$59,600 | 5 | 1,210 | 0 | 1,210 | 0.4% | \$707 |
| 2BR Overall (As Proposed) | \$0 | \$59,600 | 29 | 2,592 | 0 | 2,592 | 1.1% | - |
| 2BR Overall (Absent Subsidy) | \$19,131 | \$59,600 | 29 | 2,267 | 0 | 2,267 | 1.3% | - |
| 3BR @30% (As Proposed) | \$0 | \$26,820 | 4 | 227 | 0 | 227 | 1.8% | \$855 |
| 3BR @30% (Absent Subsidy) | \$18,686 | \$26,820 | 4 | 117 | 0 | 117 | 3.4% | \$855 |
| 3BR @60% (As Proposed) | \$0 | \$53,640 | 12 | 619 | 0 | 619 | 1.9% | \$855 |
| 3BR @60% (Absent Subsidy) | \$44,229 | \$53,640 | 12 | 320 | 0 | 320 | 3.7% | \$855 |
| 3BR @80% (As Proposed) | \$0 | \$71,520 | 1 | 874 | 0 | 874 | 0.1% | \$855 |
| 3BR @80% (Absent Subsidy) | \$59,006 | \$71,520 | 1 | 408 | 0 | 408 | 0.2% | \$855 |
| 3BR Overall (As Proposed) | \$0 | \$71,520 | 17 | 874 | 0 | 874 | 1.9% | \$855 |
| 3BR Overall (Absent Subsidy) | \$18,686 | \$71,520 | 17 | 764 | 0 | 764 | 2.2% | \$855 |
| @30% Overall (As Proposed) | \$0 | \$26,820 | 20 | 1,718 | 0 | 1,718 | 1.2% | - |
| @30% Overall (Absent Subsidy) | \$15,943 | \$26,820 | 20 | 888 | 0 | 888 | 2.3% | - |
| @60% Overall (As Proposed) | \$0 | \$53,640 | 65 | 4,686 | 0 | 4,686 | 1.4% | - |
| @60% Overall (Absent Subsidy) | \$31,886 | \$53,640 | 65 | 2,424 | 0 | 2,424 | 2.7% | - |
| @80% Overall (As Proposed) | \$0 | \$71,520 | 10 | 6,614 | 0 | 6,614 | 0.2% | - |
| @80% Overall (Absent Subsidy) | \$42,549 | \$71,520 | 10 | 3,087 | 0 | 3,087 | 0.3% | - |
| Overall (As Proposed) | \$0 | \$71,520 | 95 | 7,051 | 0 | 7,051 | 1.3% | - |
| Overall (Absent Subsidy) | \$15,943 | \$71,520 | 95 | 6,166 | 0 | 6,166 | 1.5% | - |

We believe these calculated capture rates are reasonable, particularly as these calculations do not consider demand from outside the PMA or standard rental household turnover.

7. Competitive Rental Analysis

Comparable properties are examined on the basis of physical characteristics, i.e. building type, age/quality, level of common amenities, absorption, as well as similarity in rent structure. We attempted to compare the Subject to complexes from the competing market to provide a broader picture of the health and available supply in the market. Our competitive survey includes nine "true" comparable properties containing 3,591 units.

The availability of LIHTC data is considered fair; there are two LIHTC properties in the PMA. The remaining two LIHTC properties are located outside of the PMA. The four LIHTC properties target the general population and offer similar unit types in comparison to the proposed Subject. The comparable LIHTC properties are all located between 1.5 and 9.3 miles of the proposed Subject.

The availability of market rate data is considered good. We include five conventional properties in our analysis of the competitive market. All of the market rate properties are located in the PMA, between 0.5 and 3.2 miles from the Subject site. These comparables were built or renovated between 2007 and 2018. There are a limited number of new construction market rate properties in the area, with four of the five market rate properties consisting of older vintage properties that have been subsequently renovated. Overall, we believe the market rate properties used in our analysis are the most comparable.

Based on the quality of the surveyed comparable properties and the anticipated quality of the Subject, we conclude that the Subject's proposed LIHTC rental rates are below the achievable market rates for the Subject's area. The table below illustrates the comparison of the market rents.

Rent Subject Pro Surveyed Surveyed Surveyed **Achievable** Subject Rent **Unit Type** Advantage Level Forma Rent Min Max Average **Market Rent** 1BR / 1BA @30% (PBRA) \$608 \$1,055 \$1,770 \$1,426 \$1,500 59% 1BR / 1BA @60% (PBRA) \$608 \$1,055 \$1,770 \$1,426 \$1,500 59% 1BR / 1BA @80% (PBRA) \$608 \$1,055 \$1,770 \$1,426 \$1,500 59% \$707 2BR / 1BA @30% (PBRA) \$1,351 \$2,360 \$1,662 \$1,675 58% 2BR / 1BA @60% (PBRA) \$707 \$1,351 \$2,360 \$1,662 \$1,675 58% 2BR / 1BA @80% (PBRA) \$707 \$1,351 \$2,360 \$1,662 \$1,675 58% 3BR / 2BA @30% (PBRA) \$855 \$1,495 \$2,133 \$1,861 \$1,875 54% 3BR / 2BA \$1,495 \$2,133 @60% (PBRA) \$855 \$1,861 \$1,875 54% 3BR / 2BA @80% (PBRA) \$855 \$1,495 \$2,133 \$1,861 \$1,875 54%

SUBJECT COMPARISON TO MARKET RENTS

Roswell City Walk is the most proximate and comparable unrestricted market rate property to the Subject as proposed. Roswell City Walk is located 0.5 miles north of the Subject in a neighborhood considered generally similar. Roswell City Walk was originally constructed in 2015 and will exhibit similar condition to the Subject upon completion. Roswell City Walk has a current vacancy rate of 6.6 percent which is considered slightly elevated. The property offers larger unit sizes, and generally superior in-unit and common area amenities relative to the Subject. As such, we believe that the Subject could achieve rents below Roswell City Walk if it were hypothetically unrestricted.

Overall, we believe that the Subject can achieve rents below those currently achieved at Roswell City Walk and similar to above the remaining unrestricted market rate comparables. Thus, we concluded to market rents of

\$1,500 and **\$1,675**, and **\$1,875** for the Subject's one, two and three-bedroom units, respectively. Thus, the Subject's proposed rents will offer a significant rent advantage ranging from 54 to 59 percent below achievable market rents.

8. Absorption/Stabilization Estimate

Information regarding the absorption periods of four properties in Fulton County are illustrated in the following table. Due to the age of the comparable properties none were able to report recent absorption data.

ABSORPTION

| Property Name | City | Rent | Rent Tenancy | | Total | Absorption |
|-----------------------|---------|--------|--------------|------|-------|---------------|
| Floperty Name | City | Kelit | Terrancy | Year | Units | (units/month) |
| Aspire Westside | Atlanta | LIHTC | Family | 2020 | 167 | 10 |
| Entra West End | Atlanta | Market | Family | 2019 | 187 | 20 |
| Solstice Morningside | Atlanta | Market | Family | 2019 | 239 | 16 |
| Platform Apartments | Atlanta | Market | Family | 2018 | 324 | 17 |
| Average | | | | | | 16 |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed tax credit property. As seen in the previous table, the reported absorption ranged from 10 to 20 units per month, with an overall average of 16 units per month. Of note, the absorption pace at Aspire Westside was adversely impacted by the onset of the COVID-19 pandemic. As the Subject will enter the market following the most severe impacts of the pandemic we placed less weight on this comparable. We also considered the lack of recent pipeline supply in the PMA, and the Subject's proposed affordable rent levels. We believe the Subject would experience an absorption pace of 15 units per month, similar to the recently opened comparable LIHTC properties. This indicates an absorption period of five to six months to reach 93 percent occupancy and our concluded stabilized occupancy of 95 percent.

9. Interviews

Interviews with local property managers are included in the profiles in the Existing Competitive Rental Analysis portion of this report.

10.0verall Conclusion

Based upon our market research, demographic calculations and analysis, we believe there is adequate demand for the Subject property as proposed. The LIHTC comparables are experiencing a weighted average vacancy rate of 3.0 percent, which is considered moderate. While the Subject will offer generally inferior inunit and common area amenities, in addition to smaller unit sizes, it will also exhibit generally superior condition to the comparable properties. Given the Subject's anticipated superior condition relative to the competition and the demand for affordable housing evidenced by waiting lists and low vacancy at several LIHTC comparable properties, we believe that the Subject is feasible as proposed. We believe that it will fill a void in the market and will perform well.

PROJECT DESCRIPTION

1. Project Address and The Subject is located at 151 Oak Street in Roswell, Fulton County, Development Location: Georgia 30075. The Subject site is currently improved with existing

multifamily structures in fair condition that will be demolished in

order to accommodate construction of the Subject.

2. Construction Type: The Subject will consist of two three-story lowrise residential buildings

and one four-story midrise residential building in addition to one

community building. The Subject will be new construction.

3. Occupancy Type: Families, with a senior preference (not a hard set-aside) for one

structure.

4. Special Population Target: None.

5. Number of Units by Bedroom See

Type and AMI Level:

See following property profile.

6. Unit Size, Number of Bedrooms

Comments

The Subject is the proposed redevelopment of an existing rent-assisted Public Housing property in Roswell, Georgia. The utility allowances are \$80 for one-bedroom units, \$90 for two-bedroom units, and \$115 for three-bedroom units.

10. Scope of Renovations: The Subject will be new construction.

11. Placed in Service Date: Construction on the Subject is expected to begin in November 2022

and be completed in November 2023.

Conclusion: The Subject will be an excellent-quality lowrise and midrise-style

apartment complex, comparable to most of the inventory in the area. As new construction, the Subject will not suffer from deferred maintenance, functional obsolescence, or physical deterioration.

1. Date of Site Visit and Name of Jay Cole visited the site on April 29, 2021. **Inspector:**

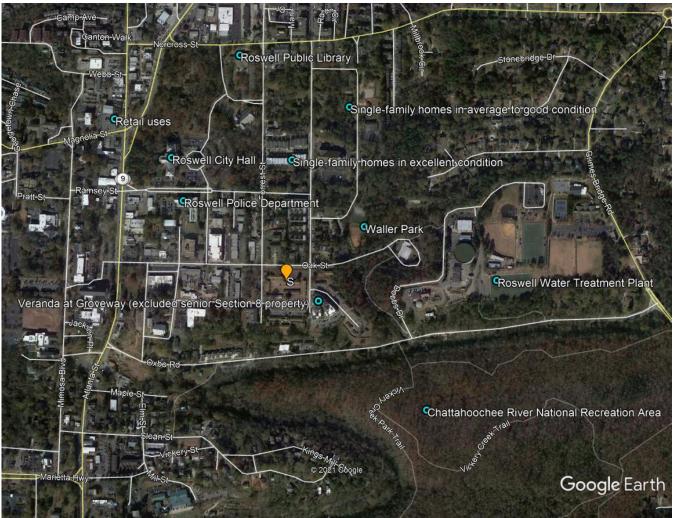

2. Physical Features of the Site: The following illustrates the physical features of the site.

Frontage: The Subject site has frontage along Oak Street and Grove Way.

Visibility/Views: The Subject will be located on Oak Street and Grove Way. Visibility and views from the site will be good and initially will include a senior

multifamily property, Verandas at Groveway, single-family homes in average to good condition, and commercial and institutional uses.

Surrounding Uses: The following map illustrates the surrounding land uses.

Source: Google Earth, May 2021.

The Subject site is located on the south side of Oak Street and the north side of Grove Way. The Subject site is currently improved with existing project-based Section 8 multifamily buildings in fair condition that will be demolished to allow for construction of the Subject. Land

uses to the north of the Subject consist of single-family homes in average to excellent condition, in addition to various civic uses including Roswell City Hall, Roswell Public Library and the Roswell Police Department. Land uses to the east of the Subject consist of Veranda at Groveway, an age-restricted Section 8 property that was excluded from our analysis, in addition to Waller Park and the Roswell Water Treatment Plant. We contacted management at Veranda at Groveway, a subsidized senior property located adjacent to the Subject, who reported full occupancy and no detrimental impact from proximity to the water treatment plant. Based on observations during the course of inspection we do not consider the water treatment plant to be a detrimental influence on multifamily uses. Land uses to the south of the Subject consist of the Chattahoochee River National Recreation Area. Land uses to the west of the Subject consist of various intuitional and commercial uses, including the Pleasant Hill Community Center. Based on our inspection of the neighborhood. retail appeared to be 90 to 95 percent occupied. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 61 out of 100. The Subject site is considered a desirable building site for rental housing. The Subject site is located in a mixed-use neighborhood. The uses surrounding the Subject are in average to excellent condition. The site has good proximity to locational amenities, which are within 5.1 miles of the Subject site, with the majority located within 3.7 miles of the Subject site.

Positive/Negative Attributes of Site:

The Subject's proximity to retail and other locational amenities as well as its surrounding uses, which are in good condition, are considered positive attributes. The Subject is located within close proximity to central Roswell, including various civic uses such as the public library and police department. Further, the site is in close proximity to downtown Sandy Springs and Perimeter Center, both of which are larger suburban Atlanta employment centers. The Subject is also located to the west of the Roswell Water Treatment Plant. We contacted management at Veranda at Groveway, a subsidized senior property located adjacent to the Subject, who reported full occupancy and no detrimental impact from proximity to the water treatment plant. Based on observations during the course of inspection we do not consider the water treatment plant to be a detrimental influence on multifamily uses.

3. Physical Proximity to Locational Amenities:

The Subject is located within 5.1 miles of all locational amenities. Additionally, it is within 3.7 miles of Wellstar North Fulton Hospital, which is a larger employer in northern Fulton County.

4. Pictures of Site and Adjacent Uses:

The following are pictures of the Subject site and adjacent uses.

| 13 | North Springs MARTA Station | 5.1 miles |

6. Description of Land Uses

The Subject site is located on the south side of Oak Street and the north side of Grove Way. The Subject site is currently improved with existing project-based Section 8 multifamily buildings in fair condition that will be demolished to allow for construction of the Subject. Land uses to the north of the Subject consist of single-family homes in average to excellent condition, in addition to various civic uses including Roswell City Hall, Roswell Public Library and the Roswell Police Department. Land uses to the east of the Subject consist of Veranda at Groveway, an age-restricted Section 8 property that was excluded from our analysis, in addition to Waller Park and the Roswell Water Treatment Plant. We contacted management at Veranda at Groveway, a subsidized senior property located adjacent to the Subject, who reported full occupancy and no detrimental impact from proximity to the water treatment plant. Based on observations during the course of inspection we do not consider the water treatment plant to be a detrimental influence on multifamily uses. Land uses to the south of the Subject consist of the Chattahoochee River National Recreation Area. Land uses to the west of the Subject consist of various intuitional and commercial uses, including the Pleasant Hill Community Center. Based on our inspection of the neighborhood, retail appeared to be 90 to 95 percent occupied. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 61 out of 100. The Subject site is considered a desirable building site for rental housing. The Subject site is located in a mixed-use neighborhood. The uses surrounding the Subject are in average to excellent condition. The site has good proximity to locational amenities, which are within 5.1 miles of the Subject site, with the majority located within 3.7 miles of the Subject site. The Subject is located within close proximity to central Roswell, including various civic uses such as the public library and police department. Further, the site is in close proximity to downtown Sandy Springs and Perimeter Center, both of which are larger suburban Atlanta employment centers.

7. Crime:

The following table illustrates crime statistics in the Subject's PMA compared to the MSA.

2020 CRIME INDICES

| | РМА | Atlanta-Sandy Springs- Alpharetta, GA MSA |
|---------------------|-----|--|
| Total Crime* | 79 | 134 |
| Personal Crime* | 52 | 124 |
| Murder | 49 | 149 |
| Rape | 47 | 86 |
| Robbery | 61 | 154 |
| Assault | 49 | 113 |
| Property Crime* | 82 | 136 |
| Burglary | 85 | 144 |
| Larceny | 83 | 129 |
| Motor Vehicle Theft | 75 | 169 |

Source: Esri Demographics 2020, Novogradac Consulting LLP, May 2021

The total crime indices in the PMA are below that of the MSA and the nation. The Subject will offer limited access with an intercom system as security features. Five of the comparable properties offer security features, while the remaining property lack security features. Given the security features offered by the comparables we believe the proposed features will be market-oriented.

8. Existing Assisted Rental Housing Property Map:

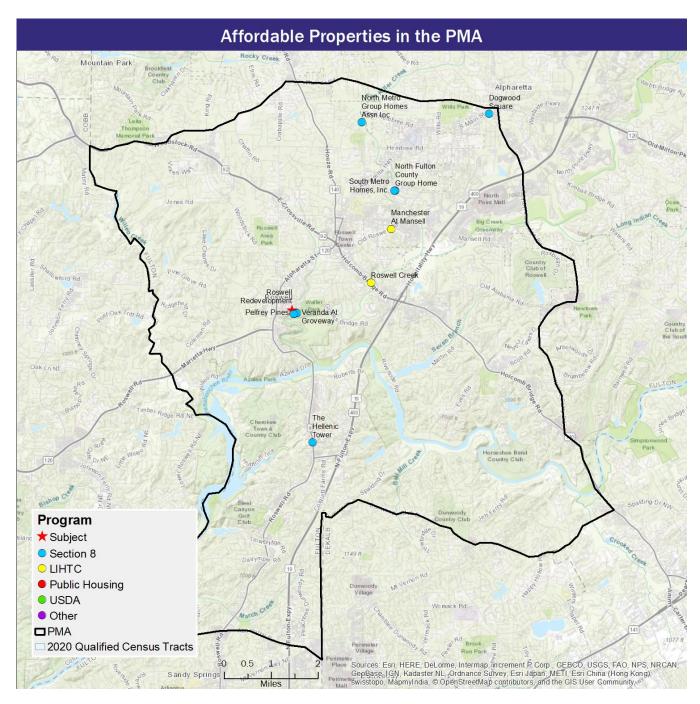

The following map and list identifies all assisted rental housing properties in the PMA.

AFFORDABLE PROPERTIES IN THE PMA

| Property Name | Program | Location | Tenancy | # of Units | Distance from Subject | Map Color |
|-----------------------------------|-----------|------------|---------|---------------|--------------------------|--------------|
| Roswell Redevelopment | LIHTC | Roswell | Family | 95 | - | Star |
| Manchester At Mansell | LIHTC | Roswell | Family | 468 | 2.3 miles | |
| Roswell Creek | LIHTC | Roswell | Family | 508 | 1.5 miles | |
| Veranda At Groveway | Section 8 | Roswell | Senior | 102 | 0.1 miles | |
| Dogwood Square | Section 8 | Alpharetta | Family | 100 | 5.6 miles | |
| North Fulton County Group Home | Section 8 | Roswell | Family | 10 | 4.3 miles | |
| North Metro Group Homes Assn Inc. | Section 8 | Roswell | Family | 5 | 4.1 miles | |
| Pelfrey Pines | Section 8 | Roswell | Family | 95 | 0.1 miles | |
| South Metro Homes, Inc. | Section 8 | Roswell | Family | 15 | 4.2 miles | |
| The Hellenic Tower | Section 8 | Atlanta | Family | 125 | 3.3 miles | |

^{*}Unweighted aggregations

- 9. Road, Infrastructure or Proposed Improvements:
- We did not witness any road, infrastructure or proposed improvements during our field work.
- 10. Access, Ingress-Egress and Visibility of Site:
- The Subject site can be accessed from Oak Street and Grove Way. The Subject site has good visibility.

11. Conclusion:

The Subject site is located on the south side of Oak Street and the north side of Grove Way. The Subject site is currently improved with existing project-based Section 8 multifamily buildings in fair condition

that will be demolished to allow for construction of the Subject, Land uses to the north of the Subject consist of single-family homes in average to excellent condition, in addition to various civic uses including Roswell City Hall, Roswell Public Library and the Roswell Police Department. Land uses to the east of the Subject consist of Veranda at Groveway, an age-restricted Section 8 property that was excluded from our analysis, in addition to Waller Park and the Roswell Water Treatment Plant. We contacted management at Veranda at Groveway, a subsidized senior property located adjacent to the Subject, who reported full occupancy and no detrimental impact from proximity to the water treatment plant. Based on observations during the course of inspection we do not consider the water treatment plant to be a detrimental influence on multifamily uses. Land uses to the south of the Subject consist of the Chattahoochee River National Recreation Area. Land uses to the west of the Subject consist of various intuitional and commercial uses, including the Pleasant Hill Community Center. Based on our inspection of the neighborhood, retail appeared to be 90 to 95 percent occupied. The Subject site is considered "Somewhat Walkable" by Walkscore with a rating of 61 out of 100. The Subject site is considered a desirable building site for rental housing. The Subject site is located in a mixed-use neighborhood. The uses surrounding the Subject are in average to excellent condition. The site has good proximity to locational amenities, which are within 5.1 miles of the Subject site, with the majority located within 3.7 miles of the Subject site. The Subject is located within close proximity to central Roswell, including various civic uses such as the public library and police department. Further, the site is in close proximity to downtown Sandy Springs and Perimeter Center, both of which are larger suburban Atlanta employment centers. The total crime indices in the PMA are below that of the MSA and the nation. Overall, we believe that the Subject's location is a good location for multifamily development.

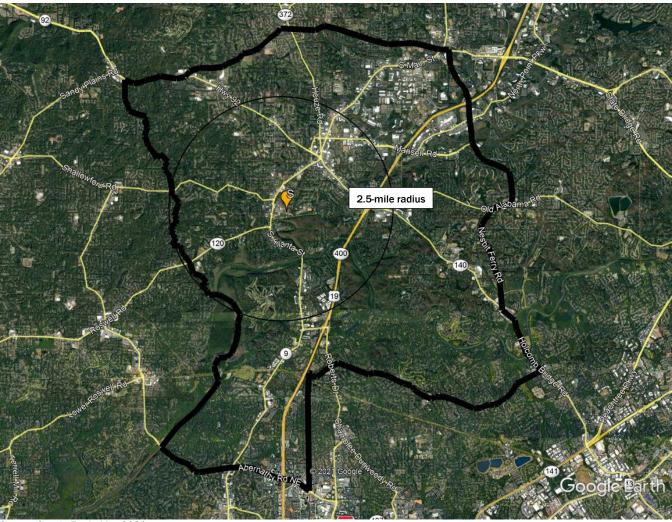

PRIMARY MARKET AREA

For the purpose of this study, it is necessary to define the market area, or the area from which potential tenants for the project are likely to be drawn. In some areas, residents are very much "neighborhood oriented" and are generally very reluctant to move from the area where they have grown up. In other areas, residents are much more mobile and will relocate to a completely new area, especially if there is an attraction such as affordable housing at below market rents.

Primary Market Area Map

Source: Google Earth, May 2021

The following sections will provide an analysis of the demographic characteristics within the market area. Data such as population, households and growth patterns will be studied, to determine if the Primary Market Area (PMA) and the MSA are areas of growth or contraction.

The PMA is defined by Hardscrabble Road, Rucker Road and Old Milton Parkway to the north, Haynes Bridge Road and Nesbit Ferry Road to the east, Dunwoody Club Drive and Abernathy Road NW to the south, and the Fulton-Cobb County Line to the west. This area includes the city of Roswell as well as portions of Sandy Springs and Alpharetta. The distances from the Subject to the farthest boundaries of the PMA in each direction are listed as follows:

North: 4.1 miles East: 5.1 miles South: 6.2 miles West: 2.5 miles

The PMA is defined based on interviews with the local housing authority, property managers at comparable properties, and the Subject's property manager. Many property managers indicated that a portion of their tenants come from out of state, generally relocating to the area for work. Of those residents coming from within Georgia most are coming from the cities located in northern Fulton County. While we do believe the Subject will experience leakage from outside the PMA boundaries, per the 2021 market study guidelines, we do not account for leakage in our demand analysis found later in this report. The farthest PMA boundary from the Subject is approximately 6.2 miles. The SMA is defined as the Atlanta-Sandy Springs-Roswell, GA Metropolitan Statistical Area (MSA), which consists of 30 counties in northwest Georgia and encompasses 8,726 square miles.

F. COMMUNITY DEMOGRAPHIC DATA

COMMUNITY DEMOGRAPHIC DATA

The following sections will provide an analysis of the demographic characteristics within the market area. Data such as population, households and growth patterns will be studied to determine if the Primary Market Area (PMA) and the Atlanta-Sandy Springs-Alpharetta, GA MSA are areas of growth or contraction. The discussions will also describe typical household size and will provide a picture of the health of the community and the economy. The following demographic tables are specific to the populations of the PMA and the Atlanta-Sandy Springs-Alpharetta, GA MSA. Construction on the Subject is anticipated to be completed in November 2023, which will be used as the estimated market entry time in this section of the report according to DCA guidelines.

1. Population Trends

The following tables illustrate Total Population and Population by Age Group within the population in the MSA, the PMA and nationally from 2000 through 2025.

Total Population

The following table illustrates the total population within the PMA, SMA and nation from 2000 through 2025.

POPULATION

| | 10102111011 | | | | | | | | | |
|--------------------------------------|-------------|---------------|-----------|------------------------------|-------------|---------------|--|--|--|--|
| Year | ı | PMA | | andy Springs- tta, GA MSA | USA | | | | | |
| | Number | Annual Change | Number | Annual Change | Number | Annual Change | | | | |
| 2000 | 119,646 | - | 4,240,804 | - | 280,304,282 | - | | | | |
| 2010 | 135,488 | 1.3% | 5,286,728 | 2.5% | 308,745,538 | 1.0% | | | | |
| 2020 | 150,724 | 1.1% | 6,049,686 | 1.4% | 333,793,107 | 0.8% | | | | |
| Projected Mkt Entry November 2023 | 156,458 | 1.1% | 6,342,267 | 1.5% | 341,945,224 | 0.7% | | | | |
| 2025 | 159,325 | 1.1% | 6,488,557 | 1.5% | 346,021,282 | 0.7% | | | | |

Source: Esri Demographics 2020, Novogradac Consulting LLP, May 2021

As seen in the previous table, the rate of growth in the PMA has historically trailed the MSA while surpassing the nation from 2000 through 2020. Over the next five years, the population growth in the PMA and MSA are projected to increase at a 1.1 and 1.5 percent annual rate, respectively, which surpasses the national projections. Overall, we believe that population growth in the PMA and MSA is a positive indication of demand for the Subject's proposed multifamily units.

Total Population by Age Group

The following table illustrates the total population within the PMA and MSA and nation from 2000 to 2025.

POPULATION BY AGE GROUP

| | PMA | | | | | | | | | |
|------------|---------|------------------|---------------|--------------------------------------|---------|--|--|--|--|--|

As seen in the previous table, households trends in the PMA and MSA largely mirror those of the overall population, with the PMA trailing the MSA, but leading national growth rates. These trends are projected to continue over the next five years. The average household size in the PMA is smaller than the national average at 2.36 persons in 2020. Over the next five years, the average household size is projected to remain relatively similar.

Households by Tenure

The table below depicts household growth by tenure from 2000 through 2025.

TENURE PATTERNS PMA

| Year | Owner-Occupied Units | Percentage Owner-Occupied | Renter-Occupied Units | Percentage Renter-Occupied |
|--------------------------------------|-------------------------|------------------------------|--------------------------|-------------------------------|
| 2000 | 28,503 | 58.6% | 20,136 | 41.4% |
| 2020 | 33,876 | 53.3% | 29,627 | 46.7% |
| Projected Mkt Entry November 2023 | 34,893 | 53.0% | 30,942 | 47.0% |
| 2025 | 35,402 | 52.8% | 31,599 | 47.2% |

Source: Esri Demographics 2020, Novogradac Consulting LLP, May 2021

As the table illustrates, households within the PMA reside in predominately owner-occupied residences. Nationally, approximately two-thirds of the population resides in owner-occupied housing units, and one-third resides in renter-occupied housing units. Therefore, there is a larger percentage of renters in the PMA than the nation. This percentage is projected to increase slightly over the next five years.

Household Income

The following table depicts renter household income in the PMA in 2020, market entry, and 2025.

RENTER HOUSEHOLD INCOME DISTRIBUTION - PMA

The Subject will target tenants earning between \$0 and \$71,520 (\$15,943 and \$71,520 absent subsidy). As the table above depicts, approximately 52.0 percent of renter households in the PMA are earning incomes between \$0 and \$59,999, which is comparable to the 61.7 percent of renter households in the MSA in 2020. For the projected market entry date of June 2022, these percentages are projected to slightly decrease to 47.8 percent and 57.7 percent for the MSA and PMA, respectively.

Renter Households by Number of Persons in the Household

The following table illustrates household size for all households in 2020, market entry and 2025. To determine the number of renter households by number of persons per household, the total number of households is adjusted by the percentage of renter households.

RENTER HOUSEHOLDS BY NUMBER OF PERSONS - PMA

| | | | Projected Mkt | Entry November | | |
|------------------|--------|------------|---------------|----------------|--------|------------|
| Household Size | 2 | 020 | 2 | 023 | 2 | 025 |

Source: HISTA Data / Ribbon Demographics 2020, Novogradac Consulting LLP, May 2021

The majority of renter households in the PMA are one to three-person households.

Conclusion

The population in the PMA and the MSA increased from 2000 to 2020, though the rate of growth slowed from 2010 to 2020. The rate of population and household growth is projected to continue slowing through 2023. The current population of the PMA is 150,724 and is expected to be 159,325 in 2025. The current number of households in the PMA is 63,503 and is expected to be 65,835 in 2025. Renter households are concentrated in the lowest income cohorts, with 52.0 percent of renters in the PMA earning less than \$60,000

annually. The Subject will target households earning between \$0 and \$71,520 (\$15,943 and \$71,520 absent subsidy); therefore, the Subject should be well-positioned to service this market. Overall, while population growth has been modest, the concentration of renter households at the lowest income cohorts indicates significant demand for affordable rental housing in the market.

Employment Trends

The PMA and Fulton County are economically reliant on the professional/scientific/technical services, healthcare/social assistance, and retail trade industries. healthcare, telecommunications, postal services, and professional services industries among others. Overall, we believe that the industry diversity among the major employers in northern Fulton County provides stability to the local economy, as well as employment opportunities across various skill types. Employment levels decreased in the PMA and Fulton County in 2020 due to the impacts of the COVID-19 pandemic, which adversely impacted the majority of employment markets nationally.

1. Covered Employment

The following table illustrates the total jobs (also known as "covered employment") in Fulton County. Note that the data below is the most recent data available.

As illustrated in the table above, Fulton County experienced a weakening economy during the Great Recession of the late 2000's. Employment growth quickly rebounded and Fulton County exhibited employment growth from 2011 through 2019. Due to the onset of the COVID-19 pandemic in early 2020 the county exhibited decreasing overall employment in 2020.

2. Total Jobs by Industry

The following table illustrates the total jobs by employment sectors within Fulton County as of May 2021.

TOTAL JOBS BY INDUSTRY

Fulton County, GA - Q4 2019

Source: Esri Demographics 2020, Novogradac Consulting LLP, May 2021

Employment in the PMA is concentrated in the professional/scientific/technical services, healthcare/social assistance, and retail trade industries, which collectively comprise 38.4 percent of local employment. The large share of PMA employment in retail trade is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods. Relative to the overall nation, the **PMA** features comparatively greater employment finance/insurance, professional/scientific/technical services. and administrative/support/waste management services industries. Conversely, the PMA is underrepresented in the healthcare/social assistance, manufacturing, and educational services industries.

3. Major Employers

The table below shows the largest employers in northern Fulton County, Georgia. Of note, a comprehensive list for the county as a whole was not available; therefore, we relied upon the summary from the Greater North Fulton Chamber of Commerce. The city of Roswell falls within northern Fulton County.

Source: Georgia Department of Labor, May 2021

As illustrated in the previous table, there have been 18,462 employees in the area impacted by layoffs or closures since 2020. Of note, a number of these layoffs are anticipated to be temporary in nature due to the impacts of the COVID-19 pandemic, which resulted in specific industry shutdowns that disproportionately impacted industries such as the accommodation/food services and retail trade industries. The Georgia Department of Labor does not currently track layoffs by permanent versus temporary status.

We contacted Select Fulton County, which oversees economic development efforts within the county, in order to obtain information on recently announced expansions and new employment additions in Fulton County. We were directed to the organizations website for recently announced expansions and relocations to the area. These are detailed in the following table.

EXPANSIONS / NEW ADDITIONS (2020 - 2021 YTD)

Fulton County, GA

| Company | Industry | Employees Affected |
|-------------------------------|-----------------------------|--------------------|
| GCP Applied Technologies Inc. | Manufacturing | 80 |
| ServiceMaster Brands | Professional Services | 200 |
| PAC Worldwide | Manufacturing | 400 |
| Papa John's | Accommodation/Food Services | 200 |
| Minute Maid | Food Products | 275 |
| Chicken Salad Chick | Accommodation/Food Services | 37 |
| Google | Technology | 185 |
| Invesco | Financial Services | 500 |
| Total | | 1,877 |

Source: Select Fulton County, May 2021

As illustrated, there are several additions in a variety of industries including manufacturing, professional services, accommodation/food services, and food products, among others. Between 2020 and 2021 year-to-date, there were a total of 1,877 jobs created, which helps to counteract the 18,462 layoffs in the county during the same period.

4. Employment and Unemployment Trends

The following table details employment and unemployment trends for the MSA from 2005 to March 2021.

Source: U.S. Bureau of Labor Statistics, May 2021

As seen in the previous table, total employment in the MSA increased from 2010 through 2019. Total employment in the MSA decreased in 2020 due to the onset of the COVID-19 pandemic. For the 12-month period ending in March 2021 total employment in the MSA decreased 1.5 percent, which compares to a 3.0 percent decrease in the nation as a whole for the same period of analysis. In 2021 year-to-date, the MSA has exhibited an increase in employment of 3.5 percent, which compares to a national increase of 1.1 percent.

The unemployment rate in the MSA was 4.1 percent as of March 2021, which compares to a national unemployment rate of 6.2 for the nation. Based on the performance of the MSA economy during the COVID-19 pandemic, including the nascent recovery in 2021 year-to-date, we believe that the MSA will likely recover from the pandemic-induced recession at a rate faster than the nation. However, we caution that the timing of the full recovery remain uncertain as of the date of this report. Though with continued deployment of vaccinations, we believe that the recovery will continue in 2021. Overall, we believe that the strong employment growth in the MSA through the pandemic indicated growing demand for housing in the area, including affordable rental units.

6. Conclusion

Employment in the PMA is concentrated in the professional/scientific/technical services, healthcare/social assistance, and retail trade industries, which collectively comprise 38.4 percent of local employment. The large share of PMA employment in retail trade is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods.

For the 12-month period ending in March 2021 total employment in the MSA decreased 1.5 percent, which compares to a 3.0 percent decrease in the nation as a whole for the same period of analysis. In 2021 year-to-date, the MSA has exhibited an increase in employment of 3.5 percent, which compares to a national increase of 1.1 percent. The unemployment rate in the MSA was 4.1 percent as of March 2021, which compares to a national unemployment rate of 6.2 for the nation. Based on the performance of the MSA economy during the COVID-19 pandemic, including the nascent recovery in 2021 year-to-date, we believe that the MSA will likely recover from the pandemic-induced recession at a rate faster than the nation. However, we caution that the timing of the full recovery remain uncertain as of the date of this report. Though with continued deployment of vaccinations, we believe that the recovery will continue in 2021. Overall, we believe that the strong employment growth in the MSA through the pandemic indicated growing demand for housing in the area, including affordable rental units.

H. PROJECT-SPECIFIC AFFORDABILITY AND DEMAND ANALYSIS

The following demand analysis evaluates the potential amount of qualified households, which the Subject would have a fair chance at capturing. The structure of the analysis is based on the guidelines provided by DCA.

1. Income Restrictions

LIHTC rents are based upon a percentage of the Area Median Gross Income ("AMI"), adjusted for household size and utilities. The Georgia Department of Community Affairs ("DCA") will estimate the relevant income levels, with annual updates. The rents are calculated assuming that the maximum net rent a household will pay is 35 percent of its household income at the appropriate AMI level.

According to DCA, household size is assumed to be 1.5 persons per bedroom for LIHTC rent calculation purposes. For example, the maximum rent for a four-person household in a two-bedroom unit is based on an assumed household size of three persons (1.5 per bedroom). For income determination purposes, the maximum income is assumed to be 1.5 persons per bedroom rounded up to the nearest whole number. For example, maximum income for a one-bedroom unit is based on an assumed household size of two persons (1.5 persons per bedroom, rounded up). However, very few senior households have more than two persons. Therefore, we assume a maximum household size of two persons in our analysis.

To assess the likely number of tenants in the market area eligible to live in the Subject, we use Census information as provided by ESRI Information Systems, to estimate the number of potential tenants who would qualify to occupy the Subject as a LIHTC project.

The maximum income levels are based upon information obtained from the Rent and Income Limits Guidelines Table as accessed from the DCA website.

2. Affordability

As discussed above, the maximum income is set by DCA while the minimum is based upon the minimum income needed to support affordability. This is based upon a standard of 35 percent. Lower and moderate-income families typically spend greater than 30 percent of their income on housing. These expenditure amounts can range higher than 50 percent depending upon market area. However, the 30 to 40 percent range is generally considered a reasonable range of affordability. DCA guidelines utilize 35 percent for families and 40 percent for seniors. We will use these guidelines to set the minimum income levels for the demand analysis. We conducted a demand analysis for the Subject assuming both a subsidy and absent a subsidy. In the absent subsidy scenario, the minimum income limit was based on the pro forma rents for the Subject's subsidized units.

3. Demand

The demand for the Subject will be derived from three sources: new households, existing households and elderly homeowners likely to convert to rentership. These calculations are illustrated in the following tables.

Demand from New Households

The number of new households entering the market is the first level of demand calculated. We utilized 2023, the anticipated date of market entry, as the base year for the analysis. Therefore, 2020 household population estimates are inflated to 2023 by interpolation of the difference between 2020 estimates and 2025 projections. This change in households is considered the gross potential demand for the Subject property. This number is adjusted for income eligibility and renter tenure. This is calculated as an annual demand number. In other words, this calculates the anticipated new households in 2023. This number takes the overall growth from 2020 to 2023 and applies it to its respective income cohorts by percentage. This number does not reflect lower income households losing population, as this may be a result of simple dollar value inflation.

Demand from Existing Households

Demand for existing households is estimated by summing two sources of potential tenants. The first source is tenants who are rent overburdened. These are households who are paying over 35 percent for family households and 40 percent for senior households of their income in housing costs. This data is interpolated using ACS data based on appropriate income levels.

The second source is households living in substandard housing. We will utilize this data to determine the number of current residents that are income eligible, renter tenure, overburdened and/or living in substandard housing and likely to consider the Subject. In general, we will utilize this data to determine the number of current residents that are income eligible, renter tenure, overburdened and/or living in substandard housing and likely to consider the Subject.

Demand from Elderly Homeowners likely to Convert to Rentership

An additional source of demand is also seniors likely to move from their own homes into rental housing. This source is only appropriate when evaluating senior properties and is determined by interviews with property managers in the PMA. It should be noted that per DCA guidelines, we lower demand from seniors who convert to homeownership to be at or below 2.0 percent of total demand.

3d. Other

Per the 2021 GA DCA Qualified Allocation Plan (QAP) and Market Study Manual, GA DCA does not consider demand from outside the Primary Market Area (PMA), including the Secondary Market Area (SMA). Therefore, we do not account for leakage from outside the PMA boundaries in our demand analysis.

DCA does not consider household turnover to be a source of market demand. Therefore, we do not account for household turnover in our demand analysis.

We calculated all of our capture rates based on household size. DCA guidelines indicate that properties with over 20 percent of their proposed units in three and four-bedroom units need to be adjusted to considered larger household sizes. Our capture rates incorporate household size adjustments for all of the Subject's units.

Net Demand

The following pages will outline the overall demand components added together less the supply of competitive developments awarded and/or constructed or placed in service from 2018 to the present.

Additions to Supply

Additions to supply will lower the number of potential qualified households. Pursuant to our understanding of DCA guidelines, we deduct the following units from the demand analysis.

- Comparable/competitive LIHTC and bond units (vacant or occupied) that were funded, are under construction, or are in properties that have not yet reached stabilized occupancy
- Comparable/competitive conventional or market rate units that are proposed, are under construction, or are in properties that have not yet reached stabilized occupancy. As the following discussion will demonstrate, competitive market rate units are those with rent levels that are comparable to the proposed rents at the Subject.

Per GA DCA guidelines, competitive units are defined as those units that are of similar size and configuration and provide alternative housing to a similar tenant population, at rent levels comparative to those proposed for the Subject development.

Based upon our review of recent LIHTC allocations and a review of a CoStar new construction listing, there are no multifamily developments currently proposed or under construction in the PMA. Therefore, we deduct no units from the demand analysis.

The following table illustrates the total number of units removed based on existing properties as well as new properties to the market area that have been allocated or are not yet stabilized. Note that this table may illustrate non-competitive units and competitive properties that are not deducted from our demand analysis. As noted, there are no units in the pipeline and no units are included in the following table.

| ADDII | IONS | 10 3 | SUPF | 'LY |
|-------|------|------|------|-----|
| | | | | |

| 1BR | | | | 0 |
| 2BR | | | | 0 |
| 3BR | | | | 0 |
| 4BR | | | | 0 |
| 5BR | | | | 0 |
| Total | 0 | 0 | 0 | 0 |

Rehab Developments and PBRA

For any properties that are rehab developments, the capture rates will be based on those units that are vacant, or whose tenants will be rent burdened or over income as listed on the Tenant Relocation Spreadsheet.

Units that are subsidized with PBRA or whose rents are more than 20 percent lower than the rent for other units of the same bedroom size in the same AMI band and comprise less than 10 percent of total units in the same AMI band will not be used in determining project demand. In addition, any units, if priced 30 percent lower than the average market rent for the bedroom type in any income segment, will be assumed to be

leasable in the market and deducted from the total number of units in the project for determining capture rates.

Capture Rates

The above calculations and derived capture rates are illustrated in the following tables. Note that the demographic data used in the following tables, including tenure patterns, household size and income distribution through the projected market entry date of 2023 are illustrated in the previous section of this report.

CAPTURE RATE ANALYSIS CHART

Our demand analysis is used to determine a base of demand for the Subject as a tax credit property. Several factors affect the indicated capture rates and are discussed following.

- The number of households in the PMA is expected to increase 1.1 percent between 2020 and 2023.
- This demand analysis does not measure the PMA's or Subject's ability to attract additional or latent demand into the market from elsewhere by offering an affordable option. We believe this to be moderate and therefore the demand analysis is somewhat conservative in its conclusions because this demand is not included.

The following table illustrates demand and net demand for the Subject's units. Note that these capture rates are not based on appropriate bedroom types, as calculated previously.

DEMAND AND NET DEMAND

| | | | | | | | | | | | | |

As the analysis illustrates, the Subject's 30 percent AMI capture rates range from 0.9 to 1.8 percent, with an overall capture rate of 1.2 percent. Absent subsidy, the Subject's 30 percent AMI capture rates range from 1.7 to 3.7 percent, with an overall capture rate of 2.3 percent.

The Subject's 60 percent AMI capture rates range from 1.0 to 1.9 percent, with an overall capture rate of 1.4 percent. Absent subsidy, the Subject's 60 percent AMI capture rates range from 1.9 to 3.7 percent, with an overall capture rate of 2.7 percent. The Subject's 80 percent AMI capture rates range from 0.1 to 0.2 percent, with an overall capture rate of 0.2 percent. Absent subsidy, the Subject's 80 percent AMI capture rates range from 0.2 to 0.4 percent, with an overall capture rate of 0.3 percent. Therefore, we believe there is adequate demand for the Subject. All capture rates are within Georgia DCA thresholds.

I. COMPETITIVE RENTAL ENVIRONMENT

Survey of Comparable Projects

Comparable properties are examined on the basis of physical characteristics, i.e. building type, age/quality, level of common amenities, absorption, as well as similarity in rent structure. We attempted to compare the Subject to complexes from the competing market to provide a broader picture of the health and available supply in the market. Our competitive survey includes nine "true" comparable properties containing 3,591 units.

The availability of LIHTC data is considered fair; there are two LIHTC properties in the PMA. The remaining two LIHTC properties are located outside of the PMA. The four LIHTC properties target the general population and offer similar unit types in comparison to the proposed Subject. The comparable LIHTC properties are all located between 1.5 and 9.3 miles of the proposed Subject.

The availability of market rate data is considered good. We include five conventional properties in our analysis of the competitive market. All of the market rate properties are located in the PMA, between 0.5 and 3.2 miles from the Subject site. These comparables were built or renovated between 2007 and 2018. There are a limited number of new construction market rate properties in the area, with four of the five market rate properties consisting of older vintage properties that have been subsequently renovated. Overall, we believe the market rate properties used in our analysis are the most comparable.

A detailed matrix describing the individual competitive properties as well as the proposed Subject is provided on the following pages. A map illustrating the location of the Subject in relation to comparable properties is also provided on the following pages. The properties are further profiled in the following write-ups. The property descriptions include information on vacancy, turnover, absorption, age, competition, and the general health of the rental market, when available.

Excluded Properties

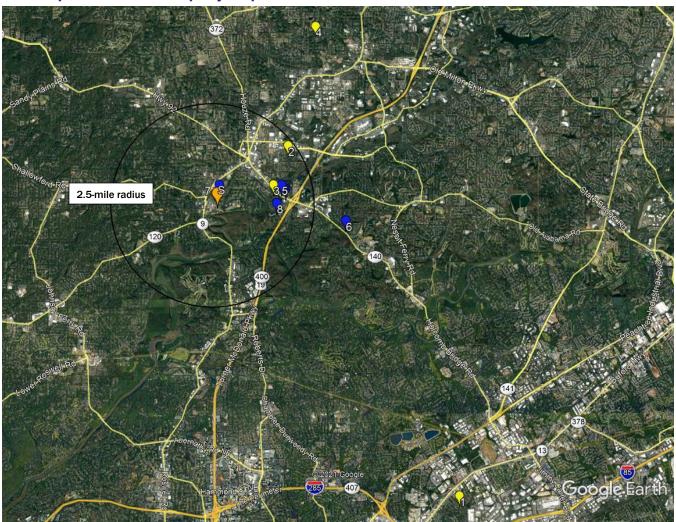

The following table illustrates properties within the PMA that are excluded from our analysis along with their reason for exclusion.

EXCLUDED PROPERTIES

| Property Name | Program | Location | Tenancy | # of Units | Reason for Exclusion |
|-----------------------------------|-----------|------------|---------|---------------|-------------------------|
| Roswell Redevelopment | LIHTC | Roswell | Family | 95 | - |
| Veranda At Groveway | Section 8 | Roswell | Senior | 102 | Subsidized |
| Dogwood Square | Section 8 | Alpharetta | Family | 100 | Subsidized |
| North Fulton County Group Home | Section 8 | Roswell | Family | 10 | Subsidized |
| North Metro Group Homes Assn Inc. | Section 8 | Roswell | Family | 5 | Subsidized |
| Pelfrey Pines | Section 8 | Roswell | Family | 95 | Subsidized |
| South Metro Homes, Inc. | Section 8 | Roswell | Family | 15 | Subsidized |
| The Hellenic Tower | Section 8 | Atlanta | Family | 125 | Subsidized |

Comments

The contact stated that the property does not maintain a waiting list and instead operates on a first come, first served basis. She stated the property has done well in 2020 and 2021 year-to-date and no major impact from COVID-19 was reported except for a small decline in rent collection. The rents for LIHTC units were increased to 2021 maximum allowable levels in late April 2021.

Comments

Management reported that the market rate units had some elevated turnover and collection loss during the spring and summer months in 2020; however, that the pandemic impact on the property has since subsided. The rents are currently set at the 2021 maximum allowable levels for the property's LIHTC units.

Comments

Management reported that rents are currently set slightly below maximum allowable levels. They were unable to comment on whether higher rents were achievable or if there were any plans to increase rents to the recently released 2021 rent and income limits. The property reportedly had minimal impact from the COVID-19 pandemic, with the majority of tenants now current on rent.

Comments

The manager reported that renovations commenced in 2018 and they are nearing completion. The noted rents in the grids reflect rents for renovated units. Rents have increased approximately \$100 to \$200 post-renovation depending on the particular unit type. The renovations consist of upgraded kitchens with new cabinetry, counters and appliances, upgraded bathrooms, along with new flooring and paint throughout units. The pandemic has reportedly had a minimal impact on leasing and collections in recent months.

Comments

Management was unable to provide a detailed unit mix for the property. The contact reported that rental demand has remained strong over the past 12 months as households relocate to the area for work. The pandemic did not had a significant impact on the property as most tenants are either professionals that could work remotely or are retired. The contact opined that there is ample demand for rental units in Roswell since there have been few built in the area recently.

Comments

Management reported that the COVID-19 pandemic had a greater impact on the property in 2020 with higher turnover and some collection loss (estimated at less than five percent). However, the property has had minimal impact from the pandemic in 2021 year-to-date. The contact opined that there is strong demand for newer multifamily units in northern Fulton County.

Comments

Management reported that the pandemic has not had a significant impact on property operations with most tenants current on rent. The contact opined that due to limited new construction that there is strong demand for rental units in the area. The contact was unable to provide a detailed unit breakdown for the property.

2. Housing Choice Vouchers

We spoke with Chenita Jones, the Housing Choice Voucher Supervisor for the Housing Authority of Fulton County. The city of Roswell falls under the jurisdiction of the Housing Authority of Fulton County. Ms. Jones reported that the organization oversees 1,400 vouchers, all of which are currently allocated. The waiting list is currently closed, with no imminent plans to reopen the list to new households. At present, the waiting list is approximately two years in length. The following table illustrates voucher usage at the comparables.

| TFΝΔ | NTS | WITH | VΩI | ICH | FRS |
|------|-----|------|-----|------|-----|
| | | **** | VUL | JULI | |

| Property Name | Rent Structure | Housing Choice Voucher Tenants |
|-----------------------------|----------------|--------------------------------|
| Longwood Vista Apartments* | LIHTC/ Market | 7% |
| Manchester At Mansell | LIHTC/ Market | 0% |
| Roswell Creek | LIHTC/ Market | N/A |
| Saddle Creek Apartments* | LIHTC | 12% |
| Crossings At Holcomb Bridge | Market | 0% |
| Park 83 By Cortland | Market | 0% |
| Roswell City Walk | Market | 0% |
| Roswell Village | Market | 0% |
| Wood Creek | Market | 0% |

^{*}Located outside of the PMA

Housing Choice Voucher usage in this market ranges from zero to 12 percent, with one comparable not reporting voucher usage data. The majority of LIHTC properties report a low reliance on tenants with vouchers. We believe the Subject would maintain a voucher usage of 10 percent or less if its units were to operate without the proposed project-based rental assistance.

3. Phased Developments

The developer of the Subject plans to eventually construct future phases of the overall Roswell Redevelopment. However, specific developments plans for future phases have not been finalized as of the date of this report.

Lease Up History

Information regarding the absorption periods of four properties in Fulton County are illustrated in the following table. Due to the age of the comparable properties none were able to report recent absorption data.

ABSORPTION

| Property Name | City | Rent | Tenancy | Year | Total Units | Absorption (units/month) |
|----------------------|---------|--------|---------|------|----------------|-----------------------------|
| Aspire Westside | Atlanta | LIHTC | Family | 2020 | 167 | 10 |
| Entra West End | Atlanta | Market | Family | 2019 | 187 | 20 |
| Solstice Morningside | Atlanta | Market | Family | 2019 | 239 | 16 |
| Platform Apartments | Atlanta | Market | Family | 2018 | 324 | 17 |
| Average | | | | | | 16 |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed tax credit property. As seen in the previous table, the reported absorption ranged from 10 to 20 units per month, with an overall average of 16 units per month. Of note, the absorption pace at Aspire Westside was adversely impacted by the onset of the COVID-19 pandemic. As the Subject will enter the market following the most severe impacts of the pandemic we placed less weight on this comparable. We also considered the lack of recent pipeline supply in the PMA, and the Subject's proposed affordable rent levels. We believe the Subject would experience an absorption pace of 15 units per month, similar to the recently opened comparable LIHTC

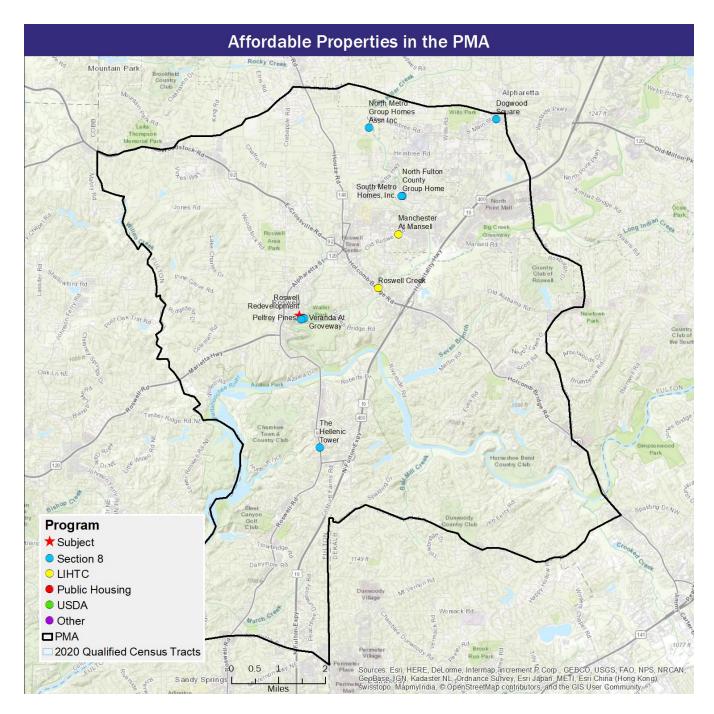

properties. This indicates an absorption period of five to six months to reach 93 percent occupancy and our concluded stabilized occupancy of 95 percent.

4. Competitive Project Map

| | | | | | | | | | | |

The Subject will offer generally inferior in-unit and common area amenities in comparison to the LIHTC and market rate comparable properties. The Subject will lack washer/dryer hookups, balconies/patios, ceiling fans, coat closets and walk-in-closets, which the majority of comparables offer. It will also lack an exercise facility and swimming pool, which the majority of comparables offer. However, we believe the Subject will be received by the market, but we have accounted for the Subject's amenities in our determination of achievable rents.

6. Comparable Tenancy

The Subject will target families. All of the comparable properties also target families.

Vacancy

The following table illustrates the vacancy rates in the market.

OVERALL VACANCY

| | • • = · · · · · · · · · · · · · · · · · | | | | | | | | |
|-----------------------------|---|-------------|--------------|--------------|--|--|--|--|--|
| Property Name | Rent Structure | Total Units | Vacant Units | Vacancy Rate | | | | | |
| Longwood Vista Apartments* | LIHTC/ Market | 276 | 0 | 0.0% | | | | | |
| Manchester At Mansell | LIHTC/ Market | 468 | 20 | 4.3% | | | | | |
| Roswell Creek | LIHTC/ Market | 508 | 20 | 3.9% | | | | | |
| Saddle Creek Apartments* | LIHTC | 99 | 0 | 0.0% | | | | | |
| Crossings At Holcomb Bridge | Market | 268 | 9 | 3.4% | | | | | |
| Park 83 By Cortland | Market | 644 | 18 | 2.8% | | | | | |
| Roswell City Walk | Market | 320 | 21 | 6.6% | | | | | |
| Roswell Village | Market | 668 | 33 | 4.9% | | | | | |
| Wood Creek | Market | 340 | 15 | 4.4% | | | | | |
| Total LIHTC | | 1,351 | 40 | 3.0% | | | | | |
| Total Market Rate | | 2,240 | 96 | 4.3% | | | | | |
| Overall Total | | 3,591 | 136 | 3.8% | | | | | |

^{*}Located outside of the PMA

Overall vacancy in the market is moderate at 3.8 percent. Total LIHTC vacancy is lower, at 3.0 percent, with all LIHTC properties reporting vacancy rates of less than 4.3 percent. Further, the two LIHTC properties reporting vacancies also offer market rate units, with the majority of vacancies being market rate units at these properties. As such, we believe this indicates strong demand for affordable units in the market.

The vacancy rates among the market rate comparable properties range from zero to 6.6 percent, averaging 4.3 percent, which is considered moderate. Management at Roswell City Walk, the market rate property reporting the highest vacancy rate, could not specify a cause for somewhat elevated vacancy at the property. However, this property has the highest rents among the comparable set and we believe this may impact vacancy at the property. Though we do not believe that any locational factors adversely impact this property. The low to moderate vacancy rates among the other market rate comparable properties indicates that there is demand for rental housing in the Subject's PMA. As a newly constructed property we anticipate that the Subject would perform with a vacancy rate of five percent or less. We believe that there is sufficient demand for additional affordable housing in the market. We do not believe that the Subject will impact the performance of the existing LIHTC properties if allocated.

7. Properties Under Construction and Proposed

There are no current proposed or under construction multifamily developments within the PMA.

8. Rental Advantage

The following table illustrates the Subject's similarity to the comparable properties. We inform the reader that other users of this document may underwrite the LIHTC rents to a different standard than contained in this report.

SIMILARITY MATRIX

^{*}Inferior=-10, slightly inferior=-5, similar=0, slightly superior=5, superior=10.

The rental rates at the LIHTC properties are compared to the Subject's proposed 60 percent AMI rents in the following table.

LIHTC RENT COMPARISON @30%

| | County | 1BR | 2BR | 3BR | Rents at Max? |
|--------------------------------|--------|-------|-------|-------|---------------|
| Roswell Redevelopment (PBRA) * | Fulton | \$608 | \$707 | \$855 | N/Ap |
| LIHTC Maximum Rent (Net) | Fulton | \$385 | \$468 | \$530 | |

^{*} Rents reflects proposed contract rents

Of note, none of the comparable properties reported offering units at the 30 percent of AMI level. Based on the significant discount to market rents and higher LIHTC rents, we believe that absent subsidy the maximum allowable rents are achievable for these units.

LIHTC RENT COMPARISON @60%

| Property Name | County | 1BR | 2BR | 3BR | Rents at Max? |
|--------------------------------|----------|---------|---------|---------|---------------|
| Roswell Redevelopment (PBRA) * | Fulton | \$616 | \$686 | \$835 | N/Ap |
| LIHTC Maximum Rent (Net) | Fulton | \$850 | \$1,027 | \$1,175 | |
| Longwood Vista Apartments | Gwinnett | \$989 | \$1,202 | \$1,391 | Yes |
| Manchester At Mansell | Fulton | \$1,061 | \$1,286 | \$1,498 | Yes |
| Roswell Creek | Fulton | \$1,045 | \$1,274 | \$1,487 | Yes |
| Saddle Creek Apartments | Fulton | \$837 | \$1,001 | \$1,084 | No |
| Average | | \$983 | \$1,191 | \$1,365 | |

^{*} Rents reflects proposed contract rents

As seen in the previous table, three of the four LIHTC properties reported rents at either the 2020 or 2021 maximum allowable levels. Management at Saddle Creek Apartments reported rents below maximum allowable levels. Management at the property was unable to provide an estimate of when rents would next be increased, or whether higher rents are feasible at present. The Subject pro forma rents are well below maximum allowable levels, and well below the range of current achieved LIHTC rents at the comparable properties. As such, we believe that this indicates upward potential for the Subject's proposed rents. The Subject will offer the smallest units in the market and a generally inferior in-unit and common area amenities package relative to the comparables. However, the Subject will offer superior condition relative to these properties, which are generally in average to good condition. Based on the limited vacancy at the LIHTC properties and the presence of some waiting lists, we believe that higher rents are achievable for the Subject's LIHTC units. These rents would also offer a significant advantage to current unrestricted market rents.

None of the comparable properties reported offering units at the 80 percent of AMI level. As such, we have compared these rents to those currently achieved at the unrestricted market rate comparables. Based on the income banding for these units we believe that there will be some competitive overlap with market rate units. The following table details this comparison.

| LIHTC | RFNT | COMP | ARISC | N | @80% |
|-------|------|------|--------------|---|-------------|
| | | | | | |

| Property Name | 1BR | 2BR | 3BR |
|--|---|---------|---------|

| Noswell village | \$1,431 | \$1,579 | - |
| | - | \$1,794 | - |
| | \$1,055 | \$1,360 | \$1,495 |
| Wood Creek | \$1,090 | \$1,390 | - |
| | \$1,165 | - | - |
| Average | \$1,426 | \$1,662 | \$1,861 |
| * Ponte reflecte proposed contract rents | | | |

^{*} Rents reflects proposed contract rents

As seen in the previous table, the average market rents among the comparables are similar to above the maximum allowable rents at the 80 percent of AMI level. Further, the overall market rent average is well above the LIHTC maximum allowable levels. Therefore, we believe that absent subsidy the Subject could achieve maximum allowable rents at the 80 percent of AMI level.

Achievable Market Rents

Based on the quality of the surveyed comparable properties and the anticipated quality of the Subject, we conclude that the Subject's proposed LIHTC rental rates are below the achievable market rates for the Subject's area. The table below illustrates the comparison of the market rents.

SUBJECT COMPARISON TO MARKET RENTS

| Unit Type | Rent Level | Subject Pro Forma Rent | Surveyed Min | Surveyed Max | Surveyed Average | Achievable Market Rent | Subject Rent Advantage |
|-----------|---------------|---------------------------|-----------------|-----------------|---------------------|---------------------------|---------------------------|

Roswell City Walk is the most proximate and comparable unrestricted market rate property to the Subject as proposed. Roswell City Walk is located 0.5 miles north of the Subject in a neighborhood considered generally similar. Roswell City Walk was originally constructed in 2015 and will exhibit similar condition to the Subject upon completion. Roswell City Walk has a current vacancy rate of 6.6 percent which is considered slightly elevated. The property offers larger unit sizes, and generally superior in-unit and common area amenities relative to the Subject. As such, we believe that the Subject could achieve rents below Roswell City Walk if it were hypothetically unrestricted.

Overall, we believe that the Subject can achieve rents below those currently achieved at Roswell City Walk and similar to above the remaining unrestricted market rate comparables. Thus, we concluded to market rents of \$1,500 and \$1,675, and \$1,875 for the Subject's one, two and three-bedroom units, respectively. Thus, the Subject's proposed rents will offer a significant rent advantage ranging from 54 to 59 percent below achievable market rents.

9. Rental Trends in the PMA

The table below depicts household growth by tenure from 2000 through 2025.

TENURE PATTERNS PMA

| TENORE I ATTENNO I MA | | | | | | | | |
|--------------------------------------|----------------|----------------|-----------------|-----------------|--|--|--|--|
| Vaar | Owner-Occupied | Percentage | Renter-Occupied | Percentage | | | | |
| Year | Units | Owner-Occupied | Units | Renter-Occupied | | | | |
| 2000 | 28,503 | 58.6% | 20,136 | 41.4% | | | | |
| 2020 | 33,876 | 53.3% | 29,627 | 46.7% | | | | |
| Projected Mkt Entry November 2023 | 34,893 | 53.0% | 30,942 | 47.0% | | | | |
| 2025 | 35,402 | 52.8% | 31,599 | 47.2% | | | | |

Source: Esri Demographics 2020, Novogradac Consulting LLP, May 2021

As the table illustrates, households within the PMA reside in predominately owner-occupied residences. Nationally, approximately two-thirds of the population resides in owner-occupied housing units, and one-third resides in renter-occupied housing units. Therefore, there is a larger percentage of renters in the PMA than the nation. This percentage is projected to increase slightly over the next five years.

Historical Vacancy

The following table details historical vacancy levels for the properties included as comparables.

HISTORICAL VACANCY

| Comparable Property | Rent Structure | Total Units | 4QTR 2012 | 4QTR 2017 | 4QTR 2018 | 1QTR 2019 | 4QTR 2020 | 2QTR 2021 |
|-----------------------------|----------------|----------------|--------------|--------------|--------------|--------------|--------------|--------------|
| Longwood Vista Apartments | LIHTC/ Market | 276 | - | 0.0% | 0.0% | - | 0.0% | 0.0% |
| Manchester At Mansell | LIHTC/ Market | 468 | 5.6% | - | - | - | - | 4.3% |
| Roswell Creek | LIHTC/ Market | 508 | - | - | - | - | - | 3.9% |
| Saddle Creek Apartments | LIHTC | 99 | 2.0% | - | - | 2.0% | - | 0.0% |
| Crossings At Holcomb Bridge | Market | 268 | - | - | - | - | - | 3.4% |
| Park 83 By Cortland | Market | 644 | - | - | - | - | - | 2.8% |
| Roswell City Walk | Market | 320 | - | - | - | - | - | 6.6% |
| Roswell Village | Market | 668 | - | - | - | - | - | 4.9% |
| Wood Creek | Market | 340 | - | - | - | - | - | 4.4% |

As seen in the previous table, there is limited historical vacancy data available for the market. However, at all prior points of interview the comparable properties reported generally limited vacancy. Overall, we believe that the current performance of the LIHTC comparable properties, as well as their historically low to moderate vacancy rates, indicate demand for affordable rental housing in the Subject's market.

Change in Rental Rates

The following table illustrates rental rate increases as reported by the comparable properties.

| REN | JT | GR | O | W | TΗ |
|-----|------------|---------------------|---|----|----|
| 11 | . . | \sim 1 $^{\circ}$ | v | ** | |

| Property Name | Rent Structure | Rent Growth |
|-----------------------------|----------------|------------------------------|
| Longwood Vista Apartments* | LIHTC/ Market | Increased to 2020 max |
| Manchester At Mansell | LIHTC/ Market | Increased up to 4.1 percent |
| Roswell Creek | LIHTC/ Market | Increased to max |
| Saddle Creek Apartments* | LIHTC | None |
| Crossings At Holcomb Bridge | Market | Increased 3.1 to 4.2 percent |
| Park 83 By Cortland | Market | LRO System |
| Roswell City Walk | Market | LRO System |
| Roswell Village | Market | LRO System |
| Wood Creek | Market | Increased up to 2.0 percent |

^{*}Located outside of the PMA

The LIHTC properties report growth of up to 4.1 percent, or increasing to the 2020 or 2021 maximum allowable rents in the past year. The market rate properties reported in some instances rent growth. However, a number of these properties operate with a lease rent optimization (LRO) systems, where rents fluctuate daily based on demand. We anticipate that the Subject will be able to achieve moderate rent growth in the future as a LIHTC property.

10. Impact of Foreclosed, Abandoned and Vacant Structures

According to *RealtyTrac* statistics, one in every 11,396 housing units nationwide was in some stage of foreclosure as of March 2021, the most recent available data. The city of Roswell is experiencing a foreclosure rate of one in every 20,650 homes, while Fulton County is experiencing foreclosure rate of one in every 8,600 homes and Georgia experienced one foreclosure in every 11,330 housing units. Overall, Roswell is experiencing a lower foreclosure rate to the nation, state and county, indicating a healthy housing market. The

Subject's neighborhood does not have a significant amount of abandoned or vacant structures that would impact the marketability of the Subject.

11. LIHTC Competition – DCA Funded Properties within the PMA

Capture rates for the Subject are considered low for all bedroom types and AMI levels. If allocated, the Subject will be generally superior to the existing LIHTC housing stock. The average LIHTC vacancy rate is healthy at 3.0 percent. Of the four LIHTC properties, only two report any vacancies, with both of these properties reporting vacancy of 4.3 percent or less. There have been no properties recently allocated credits in the PMA. We do not believe that the addition of the Subject to the market will impact the existing LIHTC properties that are in average to good condition and currently performing well.

12. Effect of Subject on Other Affordable Units in Market

There are no proposed LIHTC developments in the PMA. The existing LIHTC supply reported limited vacancy. Similarly, the rent-assisted properties in the PMA reported low vacancy and some presence of waiting lists. For these reasons we do not anticipate that the Subject will have an adverse impact on existing LIHTC or subsidized housing supply in the PMA.

Conclusions

Based upon our market research, demographic calculations and analysis, we believe there is adequate demand for the Subject property as proposed. The LIHTC comparables are experiencing a weighted average vacancy rate of 3.0 percent, which is considered moderate. While the Subject will offer generally inferior inunit and common area amenities, in addition to smaller unit sizes, it will also exhibit generally superior condition to the comparable properties. Given the Subject's anticipated superior condition relative to the competition and the demand for affordable housing evidenced by waiting lists and low vacancy at several LIHTC comparable properties, we believe that the Subject is feasible as proposed. We believe that it will fill a void in the market and will perform well.

J. ABSORPTION AND STABILIZATION RATES

ABSORPTION AND STABILIZATION RATES

Information regarding the absorption periods of four properties in Fulton County are illustrated in the following table. Due to the age of the comparable properties none were able to report recent absorption data.

ABSORPTION

| Property Name | City Rent Tenancy Year | | Tenancy | Voor | Total | Absorption |
|-----------------------|------------------------|--------|---------|-------|---------------|------------|
| r topetty Name | | | Tear | Units | (units/month) | |
| Aspire Westside | Atlanta | LIHTC | Family | 2020 | 167 | 10 |
| Entra West End | Atlanta | Market | Family | 2019 | 187 | 20 |
| Solstice Morningside | Atlanta | Market | Family | 2019 | 239 | 16 |
| Platform Apartments | Atlanta | Market | Family | 2018 | 324 | 17 |
| Average | | | | | | 16 |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed tax credit property. As seen in the previous table, the reported absorption ranged from 10 to 20 units per month, with an overall average of 16 units per month. Of note, the absorption pace at Aspire Westside was adversely impacted by the onset of the COVID-19 pandemic. As the Subject will enter the market following the most severe impacts of the pandemic we placed less weight on this comparable. We also considered the lack of recent pipeline supply in the PMA, and the Subject's proposed affordable rent levels. We believe the Subject would experience an absorption pace of 15 units per month, similar to the recently opened comparable LIHTC properties. This indicates an absorption period of five to six months to reach 93 percent occupancy and our concluded stabilized occupancy of 95 percent.

Housing Authority of Fulton County

We spoke with Chenita Jones, the Housing Choice Voucher Supervisor for the Housing Authority of Fulton County. The city of Roswell falls under the jurisdiction of the Housing Authority of Fulton County. Ms. Jones reported that the organization oversees 1,400 vouchers, all of which are currently allocated. The waiting list is currently closed, with no imminent plans to reopen the list to new households. At present, the waiting list is approximately two years in length. The payment standards for the Subject's zip code (30075) are listed in the following table.

PAYMENT STANDARDS

| Unit Type | Payment Standard | | | | | |
|---------------|------------------|--|--|--|--|--|
| Studio | \$1,170 | | | | | |
| One-Bedroom | \$1,190 | | | | | |
| Two-Bedroom | \$1,360 | | | | | |
| Three-Bedroom | \$1,710 | | | | | |
| Four-Bedroom | \$2,090 | | | | | |
| Five-Bedroom | \$2,404 | | | | | |

Source: Housing Authority of Fulton County, effective January 2021

The Subject's proposed rents are set below the current payment standards. Therefore, if tenants were to use Housing Choice Vouchers they would not need to pay out of pocket for rent.

Planning

We contacted Jackie Deibel, Planning and Zoning Director for the City of Roswell. Ms. Deibel reported that there are no multifamily development in the city currently proposed or under construction apart from the Subject.

Based upon our review of recent LIHTC allocations and a review of a CoStar new construction listing, there are no multifamily developments currently proposed or under construction in the PMA. Therefore, we deduct no units from the demand analysis.

Select Fulton County

We contacted Select Fulton County, which oversees economic development efforts within the county, in order to obtain information on recently announced expansions and new employment additions in Fulton County. We were directed to the organizations website for recently announced expansions and relocations to the area. These are detailed in the following table.

EXPANSIONS / NEW ADDITIONS (2020 - 2021 YTD)

Fulton County, GA

| Company | Industry | Employees Affected |
|-------------------------------|-----------------------------|--------------------|
| GCP Applied Technologies Inc. | Manufacturing | 80 |
| ServiceMaster Brands | Professional Services | 200 |
| PAC Worldwide | Manufacturing | 400 |
| Papa John's | Accommodation/Food Services | 200 |
| Minute Maid | Food Products | 275 |
| Chicken Salad Chick | Accommodation/Food Services | 37 |
| Google | Technology | 185 |
| Invesco | Financial Services | 500 |
| Total | | 1,877 |

Source: Select Fulton County, May 2021

As illustrated, there are several additions in a variety of industries including manufacturing, professional services, accommodation/food services, and food products, among others. Between 2020 and 2021 year-to-date, there were a total of 1,877 jobs created, which helps to counteract the 18,462 layoffs in the county during the same period.

Additional interviews can be found in the comments section of the property profiles.

L. CONCLUSIONS AND RECOMMENDATIONS

CONCLUSIONS

Demographics

The population in the PMA and the MSA increased from 2000 to 2020, though the rate of growth slowed from 2010 to 2020. The rate of population and household growth is projected to continue slowing through 2023. The current population of the PMA is 150,724 and is expected to be 159,325 in 2025. The current number of households in the PMA is 63,503 and is expected to be 65,835 in 2025. Renter households are concentrated in the lowest income cohorts, with 52.0 percent of renters in the PMA earning less than \$60,000 annually. The Subject will target households earning between \$0 and \$71,520 (\$15,943 and \$71,520 absent subsidy); therefore, the Subject should be well-positioned to service this market. Overall, while population growth has been modest, the concentration of renter households at the lowest income cohorts indicates significant demand for affordable rental housing in the market.

Employment Trends

Employment in the PMA is concentrated in the professional/scientific/technical services, healthcare/social assistance, and retail trade industries, which collectively comprise 38.4 percent of local employment. The large share of PMA employment in retail trade is notable as this industry is historically volatile, and prone to contraction during economic downturns. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods.

For the 12-month period ending in March 2021 total employment in the MSA decreased 1.5 percent, which compares to a 3.0 percent decrease in the nation as a whole for the same period of analysis. In 2021 year-to-date, the MSA has exhibited an increase in employment of 3.5 percent, which compares to a national increase of 1.1 percent. The unemployment rate in the MSA was 4.1 percent as of March 2021, which compares to a national unemployment rate of 6.2 for the nation. Based on the performance of the MSA economy during the COVID-19 pandemic, including the nascent recovery in 2021 year-to-date, we believe that the MSA will likely recover from the pandemic-induced recession at a rate faster than the nation. However, we caution that the timing of the full recovery remain uncertain as of the date of this report. Though with continued deployment of vaccinations, we believe that the recovery will continue in 2021. Overall, we believe that the strong employment growth in the MSA through the pandemic indicated growing demand for housing in the area, including affordable rental units.

Capture Rates

The following table illustrates the demand and capture rates for the Subject's proposed units.

CAPTURE RATE ANALYSIS CHART

| CAPTURE RATE ANALYSIS CHART | | | | | | | | | | |
|-------------------------------|----------|----------|----------|--------|--------|--------|---------|----------|--|--|
| Unit Type | Minimum | Maximum | Units | Total | Sunnk | Net | Capture | Proposed | | |
| Offic Type | Income | Income | Proposed | Demand | Supply | Demand | Rate | Rents | | |
| 1BR @30% (As Proposed) | \$0 | \$19,860 | 10 | 818 | 0 | 818 | 1.2% | \$608 | | |

| 2BR Overall (As Proposed) | \$0 | \$59,600 | 29 | 2,592 | 0 | 2,592 | 1.1% | - | | |
| 2BR Overall (Absent Subsidy) | \$19,131 | \$59,600 | 29 | 2,267 | 0 | 2,267 | 1.3% | - | | |
| 3BR @30% (As Proposed) | \$0 | \$26,820 | 4 | 227 | 0 | 227 | 1.8% | \$855 | | |
| 3BR @30% (Absent Subsidy) | \$18,686 | \$26,820 | 4 | 117 | 0 | 117 | 3.4% | \$855 | | |
| 3BR @60% (As Proposed) | \$0 | \$53,640 | 12 | 619 | 0 | 619 | 1.9% | \$855 | | |
| 3BR @60% (Absent Subsidy) | \$44,229 | \$53,640 | 12 | 320 | 0 | 320 | 3.7% | \$855 | | |
| 3BR @80% (As Proposed) | \$0 | \$71,520 | 1 | 874 | 0 | 874 | 0.1% | \$855 | | |
| 3BR @80% (Absent Subsidy) | \$59,006 | \$71,520 | 1 | 408 | 0 | 408 | 0.2% | \$855 | | |
| 3BR Overall (As Proposed) | \$0 | \$71,520 | 17 | 874 | 0 | 874 | 1.9% | \$855 | | |
| 3BR Overall (Absent Subsidy) | \$18,686 | \$71,520 | 17 | 764 | 0 | 764 | 2.2% | \$855 | | |
| @30% Overall (As Proposed) | \$0 | \$26,820 | 20 | 1,718 | 0 | 1,718 | 1.2% | - | | |
| @30% Overall (Absent Subsidy) | \$15,943 | \$26,820 | 20 | 888 | 0 | 888 | 2.3% | - | | |
| @60% Overall (As Proposed) | \$0 | \$53,640 | 65 | 4,686 | 0 | 4,686 | 1.4% | - | | |
| @60% Overall (Absent Subsidy) | \$31,886 | \$53,640 | 65 | 2,424 | 0 | 2,424 | 2.7% | - | | |
| @80% Overall (As Proposed) | \$0 | \$71,520 | 10 | 6,614 | 0 | 6,614 | 0.2% | - | | |
| @80% Overall (Absent Subsidy) | \$42,549 | \$71,520 | 10 | 3,087 | 0 | 3,087 | 0.3% | - | | |
| Overall (As Proposed) | \$0 | \$71,520 | 95 | 7,051 | 0 | 7,051 | 1.3% | - | | |
| Overall (Absent Subsidy) | \$15,943 | \$71,520 | 95 | 6,166 | 0 | 6,166 | 1.5% | - | | |
| - | | | | | | | | | | |

We believe these calculated capture rates are reasonable, particularly as these calculations do not consider demand from outside the PMA or standard rental household turnover.

Absorption

Information regarding the absorption periods of four properties in Fulton County are illustrated in the following table. Due to the age of the comparable properties none were able to report recent absorption data.

ABSORPTION

| Property Name | City | Rent | Tenancy | Year | Total Units | Absorption (units/month) |
|----------------------|---------|--------|---------|------|----------------|--------------------------|
| Aspire Westside | Atlanta | LIHTC | Family | 2020 | 167 | 10 |
| Entra West End | Atlanta | Market | Family | 2019 | 187 | 20 |
| Solstice Morningside | Atlanta | Market | Family | 2019 | 239 | 16 |
| Platform Apartments | Atlanta | Market | Family | 2018 | 324 | 17 |
| Average | | | | | | 16 |

Per DCA guidelines, we calculate the absorption to 93 percent occupancy. The Subject is a proposed tax credit property. As seen in the previous table, the reported absorption ranged from 10 to 20 units per month, with an overall average of 16 units per month. We also considered the lack of recent pipeline supply in the PMA, and the Subject's proposed affordable rent levels. The Subject would likely experience an absorption pace of 15 units per month for an absorption period of approximately five to six months.

Vacancy Trends

The following table illustrates the vacancy rates in the market.

OVERALL VACANCY

| Property Name | Rent Structure | Total Units | Vacant Units | Vacancy Rate | | |
|-----------------------------|-------------------|------------------|--------------|--------------|--|--|
| Longwood Vista Apartments* | LIHTC/ Market | IHTC/ Market 276 | | 0.0% | | |
| Manchester At Mansell | LIHTC/ Market 468 | | 20 | 4.3% | | |
| Roswell Creek | LIHTC/ Market | 508 | 20 | 3.9% | | |
| Saddle Creek Apartments* | LIHTC 99 | | 0 | 0.0% | | |
| Crossings At Holcomb Bridge | Market 268 | | 9 | 3.4% | | |
| Park 83 By Cortland | Market 644 18 | | 18 | 2.8% | | |
| Roswell City Walk | Market | 320 | 21 | 6.6% | | |
| Roswell Village | Market | 668 | 33 | 4.9% | | |
| Wood Creek | Market | 340 | 15 | 4.4% | | |
| Total LIHTC | | 1,351 | 40 | 3.0% | | |
| Total Market Rate | | 2,240 | 96 | 4.3% | | |
| Overall Total | | 3,591 | 136 | 3.8% | | |

^{*}Located outside of the PMA

Overall vacancy in the market is moderate at 3.8 percent. Total LIHTC vacancy is lower, at 3.0 percent, with all LIHTC properties reporting vacancy rates of less than 4.3 percent. Further, the two LIHTC properties reporting vacancies also offer market rate units, with the majority of vacancies being market rate units at these properties. As such, we believe this indicates strong demand for affordable units in the market.

The vacancy rates among the market rate comparable properties range from zero to 6.6 percent, averaging 4.3 percent, which is considered moderate. Management at Roswell City Walk, the market rate property reporting the highest vacancy rate, could not specify a cause for somewhat elevated vacancy at the property. However, this property has the highest rents among the comparable set and we believe this may impact vacancy at the property. Though we do not believe that any locational factors adversely impact this property. The low to moderate vacancy rates among the other market rate comparable properties indicates that there

is demand for rental housing in the Subject's PMA. As a newly constructed property we anticipate that the Subject would perform with a vacancy rate of five percent or less. We believe that there is sufficient demand for additional affordable housing in the market. We do not believe that the Subject will impact the performance of the existing LIHTC properties if allocated.

Strengths of the Subject

Strengths of the Subject will include its location in Roswell and its anticipated excellent condition upon completion. As the demand analysis found later in this report will indicate, there is adequate demand for the Subject based on our calculations for the 60 percent AMI units

Conclusion

Based upon our market research, demographic calculations and analysis, we believe there is adequate demand for the Subject property as proposed. The LIHTC comparables are experiencing a weighted average vacancy rate of 3.0 percent, which is considered moderate. While the Subject will offer generally inferior inunit and common area amenities, in addition to smaller unit sizes, it will also exhibit generally superior condition to the comparable properties. Given the Subject's anticipated superior condition relative to the competition and the demand for affordable housing evidenced by waiting lists and low vacancy at several LIHTC comparable properties, we believe that the Subject is feasible as proposed. We believe that it will fill a void in the market and will perform well.

Recommendations

We recommend the Subject as proposed.

M. SIGNED STATEMENT REQUIREMENTS

I affirm that I (or one of the persons signing below) made a physical inspection of the market area and the Subject property and that information has been used in the full study of the need and demand for the proposed units. The report is written according to DCA's market study requirements, the information included is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

DCA may rely on the representation made in the market study. The document is assignable to other lenders.

ADDENDUM A

Assumptions and Limiting Conditions

ASSUMPTIONS AND LIMITING CONDITIONS

- 1. In the event that the client provided a legal description, building plans, title policy and/or survey, etc., the market analyst has relied extensively upon such data in the formulation of all analyses.
- 2. The legal description as supplied by the client is assumed to be correct and the author assumes no responsibility for legal matters, and renders no opinion of property title, which is assumed to be good and merchantable.
- All encumbrances, including mortgages, liens, leases, and servitudes, were disregarded in this valuation
 unless specified in the report. It was recognized, however, that the typical purchaser would likely take
 advantage of the best available financing, and the effects of such financing on property value were
 considered.
- 4. All information contained in the report, which others furnished, was assumed to be true, correct, and reliable. A reasonable effort was made to verify such information, but the author assumes no responsibility for its accuracy.
- 5. The report was made assuming responsible ownership and capable management of the property.
- 6. The sketches, photographs, and other exhibits in this report are solely for the purpose of assisting the reader in visualizing the property. The author made no property survey, and assumes no liability in connection with such matters. It was also assumed there is no property encroachment or trespass unless noted in the report.
- 7. The author of this report assumes no responsibility for hidden or unapparent conditions of the property, subsoil or structures, or the correction of any defects now existing or that may develop in the future. Equipment components were assumed in good working condition unless otherwise stated in this report.
- 8. It is assumed that there are no hidden or unapparent conditions for the property, subsoil, or structures, which would render it more or less valuable. No responsibility is assumed for such conditions or for engineering, which may be required to discover such factors.
- 9. The investigation made it reasonable to assume, for report purposes, that no insulation or other product banned by the Consumer Product Safety Commission has been introduced into the Subject premises. Visual inspection by the market analyst did not indicate the presence of any hazardous waste. It is suggested the client obtain a professional environmental hazard survey to further define the condition of the Subject soil if they deem necessary.
- 10. Any distribution of total property value between land and improvements applies only under the existing or specified program of property utilization. Separate valuations for land and buildings must not be used in conjunction with any other study or market study and are invalid if so used.
- 11. Possession of the report, or a copy thereof, does not carry with it the right of publication, nor may it be reproduced in whole or in part, in any manner, by any person, without the prior written consent of the author particularly as to value conclusions, the identity of the author or the firm with which he or she is connected. Neither all nor any part of the report, or copy thereof shall be disseminated to the general public by the use of advertising, public relations, news, sales, or other media for public communication without the prior written consent and approval of the market analyst. Nor shall the market analyst, firm, or professional organizations of which the market analyst is a member be identified without written consent of the market analyst.

- 12. Disclosure of the contents of this report is governed by the Bylaws and Regulations of the professional organization with which the market analyst is affiliated.
- 13. The author of this report is not required to give testimony or attendance in legal or other proceedings relative to this report or to the Subject property unless satisfactory additional arrangements are made prior to the need for such services.
- 14. The opinions contained in this report are those of the author and no responsibility is accepted by the author for the results of actions taken by others based on information contained herein.
- 15. Opinions of value contained herein are estimates. There is no guarantee, written or implied, that the Subject property will sell or lease for the indicated amounts.
- 16. All applicable zoning and use regulations and restrictions are assumed to have been complied with, unless nonconformity has been stated, defined, and considered in the market study report.
- 17. It is assumed that all required licenses, permits, covenants or other legislative or administrative authority from any local, state, or national governmental or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this report is based.
- 18. On all studies, Subject to satisfactory completion, repairs, or alterations, the report and conclusions are contingent upon completion of the improvements in a workmanlike manner and in a reasonable period of time.
- 19. All general codes, ordinances, regulations or statutes affecting the property have been and will be enforced and the property is not Subject to flood plain or utility restrictions or moratoriums, except as reported to the market analyst and contained in this report.
- 20. The party for whom this report is prepared has reported to the market analyst there are no original existing condition or development plans that would Subject this property to the regulations of the Securities and Exchange Commission or similar agencies on the state or local level.
- 21. Unless stated otherwise, no percolation tests have been performed on this property. In making the market study, it has been assumed the property is capable of passing such tests so as to be developable to its highest and best use.
- 22. No in-depth inspection was made of existing plumbing (including well and septic), electrical, or heating systems. The market analyst does not warrant the condition or adequacy of such systems.
- 23. No in-depth inspection of existing insulation was made. It is specifically assumed no Urea Formaldehyde Foam Insulation (UFFI), or any other product banned or discouraged by the Consumer Product Safety Commission has been introduced into the property. The market analyst reserves the right to review and/or modify this market study if said insulation exists on the Subject property.
- 24. Estimates presented in this report are assignable to parties to the development's financial structure.

III. Professional Experience

Partner, Novogradac & Company LLP
Vice President/Owner, Capital Realty Advisors, Inc.
Vice President - Acquisitions, The Community Partners Development Group, LLC
Commercial Loan Officer/Work-Out Specialist, First Federal Savings Bank of Western MD
Manager - Real Estate Valuation Services, Ernst & Young LLP
Senior Associate, Joseph J. Blake and Associates, Inc.
Senior Appraiser, Chevy Chase, F.S.B.
Senior Consultant, Pannell Kerr Forster

IV. Professional Training

Have presented at and attended various industry conferences regarding the HTC, RETC, NMTC and LIHTC and various market analysis and valuation issues.

Obtained the MAI designation in 1998, maintaining continuing education requirements since. Registered as completing additional professional development programs administered by the Appraisal Institute in the following topic areas:

- 1) Valuation of the Components of a Business Enterprise
- 2) Valuation of Sustainable Buildings: Commercial
- 3) Valuation of Sustainable Buildings: Residential

V. Real Estate Assignments – Examples

In general, have managed and conducted numerous market analyses and appraisals for all types of commercial real estate since 1988.

- Performed numerous appraisals for the US Army Corps of Engineers US Geological Survey and the GSA. Property types included Office, Hotel, Residential, Land, Gymnasium, warehouse space, border patrol office. Properties located in varied locations such as the Washington, DC area, Yuma, AZ, Moscow, ID, Blaine, WA, Lakewood, CO, Seattle, WA
- Performed appraisals of commercial properties such as hotels, retail strip centers, grocery stores, shopping centers etc for properties in various locations throughout Pennsylvania, New Jersey, Maryland, New York for Holiday, Fenoglio, Fowler, LP and Three Rivers Bank.
- Have managed and conducted numerous market and feasibility studies for affordable housing. Properties are generally Section 42 Low Income Housing Tax Credit Properties. Local housing authorities, developers, syndicators and lenders have used these studies to assist in the financial underwriting and design of LIHTC properties. Analysis typically includes; unit mix determination, demand projections, rental rate analysis, competitive property surveying and overall market analysis. An area of special concentration has been the category of Senior Independent living properties. Work has been national in scope.
- Provided appraisal and market studies for a large portfolio of properties located throughout the United States. The reports provided included a variety of property types including vacant land, office buildings, multifamily rental properties, gas stations, hotels, retail buildings, industrial and warehouse space, country clubs and golf courses, etc. The portfolio included more than 150 assets and the work was performed for the SBA through Metec Asset Management LLP.
- Have managed and conducted numerous appraisals of affordable housing (primarily LIHTC developments). Appraisal assignments typically involved determining the as is, as if complete and the as if complete and stabilized values. Additionally, encumbered

(LIHTC) and unencumbered values were typically derived. The three traditional approaches to value are developed with special methodologies included to value tax credit equity, below market financing and Pilot agreements.

- Performed numerous appraisals in 17 states of proposed new construction and existing properties under the HUD Multifamily Accelerated Processing program. These appraisals meet the requirements outlined in HUD Handbook 4465.1 and Chapter 7 of the HUD MAP Guide.
- Performed numerous market study/appraisals assignments for USDA RD properties in several states in conjunction with acquisition rehabilitation redevelopments. Documents are used by states, FannieMae, USDA and the developer in the underwriting process. Market studies are compliant to State, FannieMae and USDA requirements. Appraisals are compliant to FannieMae and USDA HB-1-3560 Chapter 7 and Attachments.
- Completed numerous FannieMae appraisals of affordable and market rate multi-family properties for Fannie DUS Lenders. Currently have ongoing assignment relationships with several DUS Lenders.
- In accordance with HUD's Section 8 Renewal Policy and Chapter 9, Mr. Kincer has completed numerous Rent Comparability Studies for various property owners and local housing authorities. The properties were typically undergoing recertification under HUD's Mark to Market Program.
- Completed Fair Market Value analyses for solar panel installations, wind turbine installations, and other renewable energy assets in connection with financing and structuring analyses performed by various clients. The clients include lenders, investors, and developers. The reports are used by clients and their advisors to evaluate certain tax consequences applicable to ownership. Additionally, the reports have been used in the ITC funding process and in connection with the application for the federal grant identified as Section 1603 American Recovery & Reinvestment Act of 2009.

VI. Real Estate Assignments

A representative sample of Asset Management, Due Diligence, and Valuation Engagements includes:

- Performed a variety of asset management services for a lender including monitoring and reporting property performance on a monthly basis. Data points monitored include economic vacancy, levels of concessions, income and expense levels, NOI and status of capital projects. Data used to determine these effects on the project's ability to meet its incomedependent obligations.
- Performed asset management services for lenders and syndicators on underperforming
 assets to identify significant issues facing the property and recommend solutions. Scope of
 work included analysis of deferred maintenance and property condition, security issues,
 signage, marketing strategy, condition of units upon turnover and staffing plan. Performed a
 physical inspection of the assets, to include interior and exterior of property and assessed
 how the property compares to competition. Analyzed operating expense results.
- Prepared market studies for proposed Low-Income Housing Tax Credit, market rate, HOME financed, USDA Rural Development, and HUD subsidized properties, on a national basis. Analysis includes property screenings, market analysis, comparable rent surveys, demand analysis based on the number of income qualified renters in each market, supply analysis, and operating expenses analysis. Property types include proposed multifamily, senior independent living, large family, and acquisition with rehabilitation. Completed market studies in all states.
- Assisted in appraisals of proposed new construction, rehabilitation, and existing Low-Income Housing Tax Credit properties, USDA Rural Development, and market rate multifamily developments. Analysis includes property screenings, valuation analysis, rent comparability studies, expense comparability analysis, determination of market rents, and general market analysis.
- Assisted in appraisal work for retail and commercial properties in various parts of the country for various lenders. The client utilized the study for underwriting purposes.
- Conducted market studies and appraisals for projects under the HUD Multifamily Accelerated Processing program.
- Prepared Rent Comparability Studies for expiring Section 8 contracts for subsidized properties located throughout the United States. Engagements included site visits to the subject property, interviewing and inspecting potentially comparable properties, and the analyses of collected data including adjustments to comparable data to determine appropriate adjusted market rents using HUD form 92273.
- Performed all aspects of data collection and data mining for web-based rent reasonableness systems for use by local housing authorities.
- Completed numerous reasonableness opinions related to Revenue Procedure 2014-12.
 Transactions analyzed include projects involving the use of Historic Tax Credits, New Markets
 Tax Credits and Investment Tax Credits. Fees and arrangements tested for reasonableness
 include developer fees, construction management fees, property management fees, asset
 management fees, various leasing-related payments and overall master lease terms.
