Need and Demand Analysis For

Union City Senior Apartments Red Oak Road Union City, Georgia 30291

Prepared For

Mr. Dennis Richards National Church Residences 260 Peachtree Street, Suite 1203 Union City, Georgia 30303

Effective Date

March 12, 2021

Date of Report

May 19, 2021

May 19, 2021

Mr. Dennis Richards National Church Residences 260 Peachtree Street, Suite 1203 Union City, Georgia 30303

Dear Mr. Richards:

Following is a market study which was completed for Union City Senior Apartments, according to the guidelines set forth by the Georgia Department of Community Affairs as authorized by The Office of Affordable Housing. The subject is a proposed Low Income Housing Tax Credit senior development that will be located along Red Oak Road, in Union City, Georgia. The subject will consist of one four-story elevator building with brick and concrete exteriors. The property will offer a total of 80 one-bedroom units designated as housing for older persons ages 55 years and older. Project amenities will include a meeting room, exercise facility, business center, laundry facility, on-site management and on-site maintenance. Each unit will contain a refrigerator, range/oven, washer/dryer hook-ups, carpet and vinyl floor coverings, blinds, walk-in closet, coat closet and pull cords (select). The complex will also open lot parking at no additional cost to residents. The total site size is approximately 8.00 acres, or 348,480 square feet. Of the total 8.00 acres, approximately 4.48 acres will be allocated for the subject. The remaining 3.52 acres will be later developed as a Phase II and III of the proposed subject.

The purpose of the following market study is to determine if the community has a need for the proposed subject units. To do so, the analyst utilized data from the U.S. Census Bureau; Ribbon Demographics, 2021 Data; and various other demographic resources. Community information and opinion was also utilized. This information was collected during a field survey conducted by Todd Douglas Poer while visiting the site. The intended users of the report are the Georgia Department of Community Affairs and National Church Residences.

I certify that there is not now, nor will there, be an identity of interest between or among the applicant, contractor, architect, engineer, attorney, interim lender, subcontractors, material suppliers, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to the Georgia Department of Community Affairs and written consent to such identity of interest by the Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

The site was inspected on March 12, 2021, by Todd Douglas Poer, Market Analyst. An attempt was made to survey 100 percent of all housing in the area. The comparables were confirmed on March 12, 2021. Therefore, the effective date of this analysis is March 12, 2021. The document is assignable to other lenders that are parties to the DCA loan transaction.

CERTIFICATION

This is to certify that a field visit was made by the market analyst or one of his associates and information was obtained from publications of Federal, State and Local agencies. Interviews were held with apartment owners or managers, local officials and others as appropriate who may be knowledgeable of the housing market in Union City.

In accordance with the Georgia Department of Community Affairs, I hereby certify that the information provided in this Market Study was written according to the Georgia Department of Community Affairs' market study requirements and is truthful and accurate to the best of my knowledge and belief. The estimates of demand for family housing made by this report are based on the assumption of a free market situation, unencumbered by local mores, affirmative fair housing marketing or prejudice toward the site location.

This is to affirm that I will receive no fees which are contingent upon approval of the project by the Georgia Department of Community Affairs, before or after the fact, and that I will have no interest in the housing project.

Samuel J. Self

Samuel T. Gill Market Analyst May 19, 2021

IDENTITY OF INTEREST

I understand and agree that the Georgia Department of Community Affairs will consider an identity of interest to exist between the loan applicant as the party of the first part and general contractors, architects, engineers, attorneys, interim lenders, subcontractors, material suppliers or equipment lessors as parties of the second part under any of the following conditions:

1. When there is any financial interest of the party of the first part in the party of the second part;

2. When one or more of the officers, directors, stockholders or partners of the party of the first part is also an officer, director, stockholder or partner of the party of the second part;

3. When any officer, director, stockholder or partner of the party of the first part has any financial interest whatsoever in the party of the second part;

4. When the party of the second part advances any funds to the party of the first part other than an interim lender advancing funds to enable the applicant to pay for construction and other authorized and legally eligible expenses during the construction period;

5. When the party of the second part provides and pays on behalf of the party of the first part the cost of any legal services, architectural services or interim financing other than those of the survey, general superintendent or engineer employed by a general contractor in connection with obligations under the construction contract;

6. When the party of the second part takes stock or any interest in the party of the first part as part of the consideration to be paid them; and

7. When there exists or comes into being any side deals, agreements, contracts or undertakings entered into thereby altering, amending or canceling any of the required closing documents or approval conditions as approved by the Georgia Department of Community Affairs.

I certify that there is not now, nor will there be, an identity of interest between or among the applicant, contractor, architect, interim lender, subcontractors, material supplies, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to the Georgia Department of Community Affairs and written consent to such identity of interest by the Georgia Department of Community Affairs. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

There is no identity of interest between the loan applicant and the Market Analyst or Gill Group.

INTRODUCTION AND SCOPE OF WORK

The Scope of Work Rule requires us to gather and analyze information about those assignment elements that are necessary to properly identify the problem to be solved. According to the Standards Rule 1-2, identification of the problem to be solved requires us to identify the following assignment elements.

- Client and any other intended users: The client for this need and demand analysis assignment is National Church Residences, and the developer is National Church Residences. The intended users of the report are National Church Residences and the Georgia Department of Community Affairs. No other users are intended.
- Intended use of the analyst's opinions and conclusions: The intended use of this Need and Demand Analysis is to apply for Low Income Housing Tax Credits through the Georgia Department of Community Affairs.
- Effective date of the analyst's opinions and conclusions: The effective date of the rental estimate is March 12, 2021.
- Subject of the assignment and its relevant characteristics: The subject property is a proposed 80-unit apartment complex to be known as Union City Senior Apartments. Union City Senior Apartments will be located along Red Oak Road, in Union City, Georgia. The physical address had yet to be assigned.
- Assignment conditions: Assignment conditions include assumptions, extraordinary assumptions, hypothetical conditions, supplemental standards, jurisdictional exceptions and other conditions that affect the scope of work. The following assumptions are used in this need and demand analysis assignment:
- An environmental audit was not provided. I am not qualified to complete an environmental audit. The stated opinion of rental rates, penetration rate, demand and capture rates is predicated on the assumption that no hazardous substances or conditions materially affect the subject property.
- The Americans with Disabilities Act ADA) became effective January 26, 1992. No specific compliance survey or analysis of the identified property has been made to determine whether it is in conformity with the various detailed requirements of the ADA. It is possible that a compliance survey of the property together with a detailed analysis of the requirements of the ADA could reveal that the property will not comply with one or more of the requirements of the Act. If so, this fact could have an adverse impact upon the value of the property. Since there is no direct evidence relating to this issue, it is assumed that no substantial immediate outlays will be mandated by governing authorities to meet ADA requirements.
- The building improvements meet all governing codes, unless otherwise noted in this report.

An *extraordinary assumption*¹ is defined as:

An assignment-specific assumption as of the effective date regarding uncertain information used in an analysis, which, if found to be false, could alter the appraiser's opinions or conclusions. Uncertain information might include physical, legal or economic characteristics of the subject property; or conditions external to the property, such as market conditions or trends; or the integrity of data used in an analysis.

An extraordinary assumption may be used in an assignment only if:

- It is required to properly develop credible opinions and conclusions;
- The analyst has a reasonable basis for the extraordinary assumption;
- Use of the extraordinary assumption results in a credible analysis; and
- The analyst complies with the disclosure requirements set forth in USPAP for extraordinary assumptions.²

The following extraordinary assumptions are used in this need and demand analysis consultation assignment: This need and demand analysis was written under the extraordinary assumption that the property will be constructed as proposed. This need and demand analysis was written under the extraordinary assumption that there is no long-term economic impact on the market area due to COVID-19.

A *hypothetical condition*³ is defined as:

A condition, directly related to a specific assignment, which is contrary to what is known by the appraiser to exist on the effective date of the assignment results but is used for the purpose of analysis. Hypothetical conditions are contrary to known facts about physical, legal or economic characteristics of the subject property; or about conditions external to the property, such as market condition or trends; or about the integrity of data used in an analysis.

A hypothetical condition may be used in an assignment only if:

- Use of the hypothetical condition is clearly required for legal purposes, for purposes of reasonable analysis, or for purposes of comparison;
- Use of the hypothetical condition results in a credible analysis; and
- The analyst complies with the disclosure requirements set forth in USPAP for hypothetical conditions.⁴

The following hypothetical conditions are used in this need and demand analysis consultation assignment: The market rents in the need and demand analysis were determined under the hypothetical condition that the subject will be unrestricted or conventional and not subject to any rent restrictions.

¹ Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 4

² Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 14

³ Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 4

⁴ Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 14

This Need and Demand Analysis was completed in accordance with the requirements set forth in Georgia Department of Community Affairs' 2021 Market Study Requirements.

Samuel T. Gill, a Market Analyst employed by Gill Group, Inc., oversaw and supervised all data collection and analysis. The following actions were taken to complete this Need and Demand Analysis.

- On March 12, 2021, Todd Douglas Poer, a Market Analyst, conducted an inspection of the subject property to determine the property's physical and functional characteristics. Todd Douglas Poer interviewed developer, Dennis Richards to determine the proposed unit types, sizes, rental rates, amenities and services to be offered at the development.
- The purpose of this Need and Demand Analysis is to determine if the community has a need for the subject units. To do so, the analyst utilized data from the U.S. Census Bureau, Nielsen Claritas and Ribbon Demographics and various other demographic resources. Community information and opinion was also utilized. The research retrieved data from several of the following: internet sites, local newspapers and rental publications, town records, owners and managers of local apartment properties, local real estate brokers, fellow analysts and the analyst's office files.
- During the week of March 12, 2021, to March 16, 2021, Todd Douglas Poer inspected the exterior of each comparable property used in the analysis. Due to the COVID-19 pandemic, Gill Group was unable to inspect any interior common areas or model units. However, detailed information was taken from interviews with the property managers and their various websites. Interior photographs on the internet were viewed, where available. Unit size, amenities, utilities provided and services provided were verified through the property contacts as well as internet websites.
- During the site inspections or in separate phone interviews, Todd Douglas Poer, Samuel T. Gill, or one of their associates, talked with the managers of the comparable properties to confirm all data and to collect additional information about each comparable including size, age, amenities, occupancy rates and general market information. The property manager provided floor plans or other information describing the size of comparable units after it was explained that the interior size was needed.
- Samuel T. Gill, the primary market analyst, completed the data and adjustments columns of the Rent Comparability Grids and determined the final estimate of rents. After completing the Rent Comparability Grids, Samuel T. Gill derived an estimated market rent and an estimated achievable rent for each unit type. Samuel T. Gill also completed the demand, penetration rate and capture rate conclusions through analysis of all aspects of the subject, market area and demographic data available to the analyst.

EXECUTIVE SUMMARY

Executive Summary

It is the opinion of the analyst that a market does exist for the proposed construction of the 80-unit development designed as Housing for Older Persons. The proposed senior development will be viable within the market area. The report was prepared assuming that the project will be constructed as detailed in this report.

Project Description

The subject, Union City Senior Apartments, is a proposed 80-unit development that will be designed as housing for older persons ages 55 years and older. The subject site is located along Red Oak Road, in Union City, Fulton County, Georgia, 30291. Red Oak Road connects to Lester Road, which then connects to Jonesboro Road, a major thoroughfare in the city.

The proposed development will consist of one four-story elevator building. The property will contain 80 one-bedroom/one-bath units with 650 square feet for a total of 52,000 square feet, resulting in a total net rentable area is 52,000 square feet. The following chart lists the proposed unit mix:

| Unit Type | # of Units | Square Footage | Total Square Footage |
|-----------|------------|----------------|----------------------|
| 1/1 | 80 | 650 | 52,000 |
| | 80 | | 52,000 |

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

| | MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES | | | | | | | | |
|-----------|--|--------|--------|---------|-------|-----------|----------|--|--|
| Unit Type | # of Units | Avg. | % of | Maximum | Gross | Utility | Net Rent | | |
| | | Square | Median | LIHTC | Rent | Allowance | | | |
| | | Feet | Income | Rent | | | | | |
| 1/1 | 16 | 650 | 50% | \$775 | \$775 | N/A | \$775 | | |
| 1/1 | 64 | 650 | 60% | \$930 | \$930 | N/A | \$930 | | |

Each unit will contain a refrigerator, range/oven, washer/dryer hook-ups, carpet and vinyl floor coverings, blinds, walk-in closet, coat closet and pull cords (select). Project amenities will include a meeting room, exercise facility, business center, laundry facility, on-site management and on-site maintenance. The complex will also open lot parking at no additional cost to residents. The subject's proposed unit mix and amenities will be competitive with most surveyed comparables.

The subject's unit mix of one-bedroom units will be suitable in the market. The subject's proposed sizes are within the comparable range. In addition, the comparables within the market area maintain stabilized occupancy rates.

The subject's proposed rents are below the achievable unrestricted market rents determined on the rent grids. Furthermore, the proposed rents are in line with the maximum allowable LIHTC rents. In addition, the subject will be a new construction development and will be in good condition. Therefore, the proposed rents were considered achievable.

Site Description/Evaluation

The subject site is located along Red Oak Road, and contains approximately 8.00 acres, or 348,480 square feet. Of the total 8.00 acres, approximately 4.48 acres will be allocated for the subject. The remaining 3.52 acres will be later developed as a Phase II and III of the proposed subject. The subject property is currently zoned PUD, Planned Unit Development. The subject will be a legal, conforming use. Red Oak Road connects to Lester Road, which then connects to Jonesboro Road, a major thoroughfare in the city. Therefore, it is the opinion of the analyst that there is good visibility/access to the site.

The subject neighborhood is comprised primarily of single-family residences and is 85 percent built up. Approximately 40 percent of the land use is made up of single-family residences. About 30 percent is

Gill Group | Promises Kept. Deadlines Met. Page | 12

comprised of commercial properties. Another 15 percent of the land use is made up of multifamily dwellings. The remaining 15 percent is vacant land. The area is mostly suburban. Hickory Lane Townhomes, single-family residences and vacant land are located north of the site. Commercial properties, single-family residences and vacant land are located south of the site. Two- to four-family dwellings, Christian City Children's Village and vacant land are located east of the subject. Two- to four-family dwellings, vacant land, commercial properties and single-family residences are located west of the subject.

The site is located near a major thoroughfare which provides it with good visibility and access. The subject is located in close proximity to most major services. There are multiple banks, grocery stores, pharmacies, restaurants, salons, parks, convenience stores and schools within two miles of the site. In addition, department stores and library are located within two miles of the subject.

According to AreaVibes, approximately 506 per 100,000 residents are victims of a violent crime annually, and approximately 3,527 per 100,000 residents are victims of a property crime each year. The crime rate for Union City is 48.4 percent higher than for the state. However, the total number of crimes in the city has decreased six percent within the past year, according to AreaVibes. There is a 1 in 198 chance of being the victim of a violent crime and a 1 in 29 chance of being the victim of a property crime. Therefore, there are no major adverse influences or hazards observed or known by the appraiser in the immediate surrounding area.

Market Area Definition

The market area for the subject consists of the following census tracts: 0105.07, 0105.08, 0105.10, 0105.11, 0105.12, 0105.13, 0105.14, 0105.15 and 0105.16. The market area has the following boundaries: North – Cedar Grove Road, McClure Road, State Highway 92, South Fulton Parkway, Deep Creek, Thompson Road, Derrick Road, Koweta Road, South Wexford Road, Stonewall Tell Road, Scarborough Road Southwest, Ben Hill Road, Will Lee Road and U.S. Highway 29; South – Fayette County; East – Old National Highway, Godby Road and Clayton County; and West – Johnson Road, Gullatt Road, U.S. Highway 29, Hobgood Road, Rivertown Road and Short Road. The northern boundary is approximately 7.2 miles from the subject. The western boundary is approximately 9.1 miles from the subject.

Community Demographic Data

In 2000, this geographic market area contained an estimated population of 47,483. By 2010, population in this market area had decreased by 66.8 percent to 79,188. In 2021, the population in this market area had increased by 28.3 percent to 101,591. It is projected that between 2021 and 2023, population in the market area will increase 3.2 percent to 104,826. It is projected that between 2023 and 2026, population in the market area will increase 4.8 percent to 109,678.

In 2010, this geographic market area contained an estimated housing for older persons person ages 55 years and older population of 13,316. By 2021, this population increased 59.3 percent to 21,213. It is estimated that the market area will increase to 25,599, or by 20.7 percent, by 2026 in the same age group.

Between 2000 and 2010, the market area gained 1,203 households per year. The market area gained an additional 759 households between 2010 and 2021 and an additional 604 households per year between 2021 and 2023. The market area is projected to continue to gain households through 2026.

In 2021, this geographic market area contained 10,018 households ages 55 years and older. Of the total 10,018 senior households, 4,094, or 40.9 percent, are renter households. The market area is expected to gain an additional 5,028 households ages 55 years and older through 2026. Of the total 5,028 senior households to be gained, 696, or 31.8 percent, are renter households. This equates to a gain of 139 older persons ages 55 years households per year.

Gill Group | Promises Kept. Deadlines Met.

Of the surveyed comparables, one-bedroom units typically range from \$480 to \$1,251 per month. These rental rates have remained similar within the past few years.

According to **www.realtytrac.com**, there are currently eight properties for sale that are in some stage of foreclosure within the subject's zip code. In March 2021, the number of properties that received a foreclosure filing in zip code 30291 was similar to the previous month and 57.1 percent lower than the same time last year. The zip code's foreclosure rate is less than 0.01 percent, and the City of Union City's foreclosure rate is also less than 0.01 percent. Both are similar to the state's foreclosure rate which is also less than 0.01 percent. Therefore, it appears that the foreclosure rate in the area is declining. There are no known properties within the vicinity of the property that have been foreclosed upon. In addition, there are no known negative factors impacting the occupancy of the subject within the market area.

Economic Data

The economy of the market area is based on transportation, communication and utilities; educational, health and social services; and entertainment and recreation sectors. Each of these categories has experienced reasonable growth within the past few years.

Employment in Fulton County has been increasing an average of 1.2 percent per year since 2005. Employment in the State of Georgia has been increasing an average of 0.6 percent per year since 2005. These fluctuations are similar to the unemployment rates for Fulton County and the State of Georgia.

An ongoing worldwide pandemic called COVID-19 is wreaking havoc on the economy of much of the United States. The first case of COVID-19 was diagnosed in the United States on January 21, 2020, in the State of Washington. Since that date, COVID-19 spread rapidly throughout the U.S. On March 19, 2020, the government advised against gatherings of more than 10 people. Additionally, state and local authorities have made the decision to prohibit large-scale gatherings. Also, many cities and most states have imposed lockdown measures of different scope and severity in order to attempt to contain the number of people infected. These lockdown measures have placed limits on where people can travel, work and shop away from their homes. These measures have had a significant impact on the economic conditions in cities and counties throughout the country.

Georgia's Governor Brian Kemp issued a "stay at home" order on April 2, 2020. The order applies to all Georgia residents and visitors and was effective until April 30, 2020. On April 24th, the governor announced that businesses such as gyms, fitness centers, bowling alleys, body art studios, barbers, cosmetologists, hair designers, nail care artists, estheticians and their schools and massage therapists could begin reopening. The businesses are all held to specific restriction including adherence to the minimal basic operations, social distancing and regular sanitation.

According to the Fulton County Economic Development Department, employment in the healthcare industry continued to grow dramatically, outpacing overall employment growth in the region. Since 2014, the industry has added over 40,000 jobs, expanding employment by 19 percent. This growth was led by the General Medical and Surgical Hospitals and Offices of Physicians (Except Mental Health Specialists) sectors, which both added over 14,000 jobs. The Home Health Care Services grew rapidly over this period as well, expanding employment by 19 percent, or over 2,000 jobs. Between 2014 and 2019, the Information Technology industry added over 8,000 jobs, expanding employment by 10 percent. The Transportation and Logistics industry has expanded employment over the past five years, adding over 26,000 jobs since 2014, expanding employment by 20 percent. Over the next five years, the Metro Atlanta Region is projected to add over 61,000 jobs. Additional new and expanding business include, but are not limited to, the following:

- A new ALDI is coming to the City of Union City and is expected to be complete by 2022.
- Microsoft announced it will select Fulton County for the company's \$850 expansion that includes a new data center.

- Boston Consulting Group, a management consulting firm, announced it will invest \$18 million into expanding the company's Atlanta Business Service Center, adding an additional 331 jobs for the area.
- Kainos, a global digital technology company will invest \$1.2 million in opening a North America sales and IT hub in Fulton County, creating 137 new jobs.
- Better Up Foods will invest up to \$34 million to expand its current product offering, creating 162 new jobs.

There have been seven W.A.R.N. notices in the market area since 2019. is estimated that approximately 79 percent of the W.A.R.N. notices were issued after the onset of the COVID-19 pandemic.

| W.A.R.N. NOTICES | | | | | | | |

Project-Specific Affordability and Demand Analysis – Renter Households

The following table uses a 40 percent lease rent-to-income to determine the minimum target income required for each LIHTC unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists the number of households within the required target income for each unit type.

| INCOME-ELIGIBLE 55+ RENTER HOUSEHOLDS | | | | | | | | | |
|---|-------|----------|----------|-------|-----|--|--|--|--|
| Gross Rent Lower Range Upper Range % Income Income-Eligible Qualified Households | | | | | | | | | |
| All Unit Types (All) | \$775 | \$23,250 | \$41,400 | 18.5% | 756 | | | | |
| All Unit Types (50%) | \$775 | \$23,250 | \$33,100 | 12.6% | 514 | | | | |
| All Unit Types (60%) | \$930 | \$27,900 | \$39,720 | 9.3% | 381 | | | | |

The following chart indicates the net demand and the capture rates:

| AMI | Unit Type | # Units Proposed | Total Demand | Supply | Net Demand | Capture Rate | Avg. Market Rent | Market Rents Band | Proposed Rent |
|----------------------|-----------|---------------------|-----------------|--------|------------|--------------|---------------------|----------------------|---------------|
| 50% AMI | 1 BR | 16 | 687 | 0 | 687 | 2.3% | \$1,130 | N/A | \$775 |

The subject is a proposed LIHTC senior property that is applying for tax credits at 50 and 60 percent of the area median income. The capture rate analysis indicated that the subject would need to capture 8.1 percent of all older person ages 55 years and older households in the market area. The capture rate is acceptable. In addition, there is a large amount of pent-up demand in the market area as indicated by the lengthy waiting lists and high occupancy rates of the affordable developments surveyed. Furthermore, the subject's proposed rents are below the unrestricted achievable market rent and the determined average market rents. Therefore, it is believed the subject will be a great asset to the area and will be viable in the market area.

Competitive Rental Analysis

There was a total of 17 confirmed apartment complexes in the market area. There were 48 vacant units at the time of the survey out of 3,193 surveyed, for an overall vacancy rate of 1.5 percent. Of the surveyed restricted comparables, only one restricted development is designated for housing for older persons and will compete directly with the subject's units. Woodbridge at Parkway Village is a Section 8 and LIHTC development designed for older persons ages 62 years and older. The complex is 99 percent occupied and maintains a one-year waiting list. The proeprty offers 92 one-bedroom units and 58 two-bedroom units. Therefore, the complex's 92 one-bedroom units will directly compete with the proposed subject. The subject's proposed amenities and unit sizes will be similar to the restricted comparables surveyed. Therefore, it is believed the proposed subject will be competitive within the market area.

There are five family developments in the market area that were considered comparable with the subject; however, will not directly compete. However, due to the lack of senior developments in the market area, the family developments were utilized within the report for comparison purposes. Of the total six restricted comparables, one-bedroom rents range from \$480 to \$1,100 per month. The average market rent for the one-bedroom units in the restricted developments is \$857; however, the majority of the properties are of older construction. The subject's proposed rents are slightly higher the determined average market rent; however, its proposed rents are within this competitive range. In addition, the proposed proeprty will be superior in condition once construction is complete. Therefore, the subject's proposed rental rate will be competitive with the restricted developments in the market area.

Absorption/Stabilization Estimate

After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed subject property will satisfy a portion of the demand for senior units within the market. Based on information concerning the vacancy rates and amount of time it takes to fill vacancies, if the subject were unoccupied, it is estimated that a 95 percent occupancy level can be achieved in five to six months. Interviews with apartment managers substantiate the absorption rate. It is believed that the proposed development will absorb 14 to 16 units per month; therefore, it would reach a stable occupancy level within six months.

Overall Conclusion

The subject is a proposed LIHTC senior development that will be designated as housing for older persons ages 55 years and older set at 50 and 60 percent of the area median income. The majority of the market area's developments maintain stabilized occupancy, and the majority of the affordable developments maintain lengthy waiting lists. The subject will be newly constructed; therefore, it will be superior in condition to the majority of the market area's housing stock. There also appears to a shortage of affordable housing in the market designated for housing for older persons. Therefore, it is believed that the proposed subject will be a great asset to the area and will be a viable development.

PROJECT DESCRIPTION

| | Project Description |
|----------------------------|--|
| Project Name: Location: | Union City Senior Apartments Red Oak Road Union City, Fulton County, Georgia 30291 |
| Project Type: | Housing For Older Persons 55+ |
| Construction Type: | New Construction |

The proposed development will consist of one four-story elevator building. The property will contain 80 one-bedroom/one-bath units with 650 square feet for a total of 52,000 square feet, resulting in a total net rentable area is 52,000 square feet. A copy of the plan was not available at the time of writing this report.

| Unit Type | # of Units | Square Footage | Total Square Footage |
|-----------|------------|----------------|----------------------|
| 1/1 | 80 | 650 | 52,000 |
| | 80 | | 52,000 |

Project Design

The proposed development will consist of one four-story elevator building. The property will contain 80 one-bedroom/one-bath units with 650 square feet for a total of 52,000 square feet, resulting in a total net rentable area is 52,000 square feet. The building will be of wood frame construction with concrete slab foundations with brick and concrete exterior and asphalt shingle roofing.

Unit Features, Project Amenities and Services

Each unit will contain a refrigerator, range/oven, washer/dryer hook-ups, carpet and vinyl floor coverings, blinds, walk-in closet, coat closet and pull cords (select). Project amenities will include a meeting room, exercise facility, business center, laundry facility, on-site management and on-site maintenance. The complex will also open lot parking at no additional cost to residents. The total site size is approximately 8.00 acres, or 348,480 square feet. Of the total 8.00 acres, approximately 4.48 acres will be allocated for the subject. The remaining 3.52 acres will be later developed as a Phase II and III of the proposed subject.

Parking

The complex will also open lot parking at no additional cost to residents.

Utilities The following table describes the project's proposed utility combination. UTILITY SCHEDULE Utility Who Pays Type Central Electric Landlord Heat Air Conditioning Central Electric Landlord Hot Water Electric Landlord Cookina Electric Landlord Other Electric Electric Landlord Cold Water/Sewer N/A Landlord Trash Collection N/A Landlord

Unit Mix, Size and Rent Structure

The following chart lists the subject's proposed unit distribution by unit type, size, income restriction and rent structure.

| MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES | | | | | | | | |
|--|------------|--------|--------|---------|-------|-----------|----------|--|
| Unit Type | # of Units | Avg. | % of | Maximum | Gross | Utility | Net Rent | |
| | | Square | Median | LIHTC | Rent | Allowance | | |
| | | Feet | Income | Rent | | | | |
| 1/1 | 16 | 650 | 50% | \$775 | \$775 | N/A | \$775 | |
| 1/1 | 64 | 650 | 60% | \$930 | \$930 | N/A | \$930 | |

Income Averaging

The developer has not elected to use the income averaging option.

Eligibility

Older persons ages 55 years and older households who have between one and two persons and annual incomes between \$23,250 and \$33,100 for the proposed one-bedroom units set at 50 percent of the area median income; and Older persons ages 55 years and older households who have between one and two persons annual incomes between \$27,900 and \$41,400 are potential tenants for the proposed one-bedroom units at 60 percent of the area median income.

| LIHTC INCOME LIMITS | | | | | | | | |
|----------------------|----------|----------|--|--|--|--|--|--|
| Person in Households | 50% | 60% | | | | | | |
| 1 | \$28,950 | \$34,740 | | | | | | |
| 2 | \$33,100 | \$39,720 | | | | | | |
| 3 | \$37,250 | \$44,700 | | | | | | |
| 4 | \$41,350 | \$49,620 | | | | | | |
| 5 | \$44,700 | \$53,640 | | | | | | |
| 6 | \$48,000 | \$57,600 | | | | | | |
| | | | | | | | | |

Source: HUD

Current Occupancy Levels

The subject is proposed.

New Construction

The property is a proposed new construction development that will be completed in 2023.

SITE EVALUATION

Site Evaluation

Date of Inspection

March 12, 2021

Site Inspector

Todd Douglas Poer

Project Location

The subject is located along Red Oak Road, which connects to Lester Road. Lester Road then connects to Jonesboro Road, a major thoroughfare in the city. Therefore, it is the opinion of the analyst that there is good visibility/access to the site. Due to the subject's location on a secondary road, it is the opinion of the analyst that there is analyst that there is good visibility/access to the site.

Site Characteristics

The subject neighborhood is comprised primarily of single-family residences and is 85 percent built up. Approximately 40 percent of the land use is made up of single-family residences. About 30 percent is comprised of commercial properties. Another 15 percent of the land use is made up of multifamily dwellings. The remaining 15 percent is vacant land. The area is mostly suburban.

Zoning

The subject property is currently zoned PUD, Planned Unit Development. The subject will be a legal, conforming use. Since there are no obvious conflicts between the proposed subject property and the zoning district, there will be no negative impact on the market value by the zoning classification.

Surrounding Land Uses

Hickory Lane Townhomes, single-family residences and vacant land are located north of the site. Commercial properties, single-family residences and vacant land are located south of the site. Two- to four-family dwellings, Christian City Children's Village and vacant land are located east of the subject. Two- to four-family dwellings, vacant land, commercial properties and single-family residences are located west of the subject.

Developments

Existing market-rate developments within the market area include Legacy Ridge, Evergreen Terrace, Champions Glen Apartments, Hidden Lakes Apartments, Villas at Autumn Hills, Oakley Woods Apartments, Oakley Shoals, Premier Club Apartments, Morgan Trace Apartments, Evergreen Commons and The Woods at Shannon Lake. Once construction is complete, the subject will contain 80 onebedroom units designated for older persons ages 55 years and older. Therefore, these properties will not directly compete with the subject. However, the comparables contain a similar unit type and are similar in unit and project amenities, the properties were deemed warranted for comparison purposes.

Of the surveyed restricted comparables, only one restricted development is designated for housing for older persons and will compete directly with the subject's units. Woodbridge at Parkway Village is a Section 8 and LIHTC development designed for older persons ages 62 years and older. The complex is 99 percent occupied and maintains a one-year waiting list. The proeprty offers 92 one-bedroom units and 58 two-bedroom units. Therefore, the complex's 92 one-bedroom units will directly compete with the proposed subject. The subject's proposed amenities and unit sizes will be similar to the restricted comparables surveyed. Therefore, it is believed the proposed subject will be competitive within the market area.

Arcadia at Parkway Village is a LIHTC family development that offers 292 one-, two- and three-bedroom units at 60 percent of the area median income. The complex is 100 percent occupied and maintains a sixmonth to one-year waiting list. As the property is desingated for families, it will not directly compete with

Gill Group | Promises Kept. Deadlines Met. Page | 22

the proposed subject. However, as the complex contains a similar unit type and has a similar rent restriction, it was determined appropriate to utilized for comparison purposes.

The Park at Netherley is a LIHTC family development that offers 295 one-, two- and three-bedroom units at 60 percent of the area median income. The complex is 97 percent occupied and maintains a waiting list with over 50 applicants. As the property is desingated for families, it will not directly compete with the proposed subject. However, as the complex contains a similar unit type and has a similar rent restriction, it was determined appropriate to utilized for comparison purposes.

Orchard Springs is a LIHTC family development that offers 220 one-, two- and three-bedroom units at 50 and 60 percent of the area median income. The complex is 100 percent occupied and maintains a waiting list with approximately 62 applicants. As the property is desingated for families, it will not directly compete with the proposed subject. However, as the complex contains a similar unit type and has a similar rent restriction, it was determined appropriate to utilized for comparison purposes.

Maplewood Apartments is a LIHTC family development that offers 110 two- and three-bedroom units at 60 percent of the area median income. The complex is 100 percent occupied and maintains a six- to eight-month waiting list. As the property is desingated for families, it will not directly compete with the proposed subject. However, as the complex contains a similar unit type and has a similar rent restriction, it was determined appropriate to utilized for comparison purposes.

Pine Grove Apartments is a Rural Development family development that offers 31 one- and two-bedroom units. The complex is 100 percent occupied and maintains a waiting list with approximately 30 applicants. As the property is desingated for families, it will not directly compete with the proposed subject. However, as the complex contains a similar unit type, it was determined appropriate to utilized for comparison purposes.

Regional and Area Data

Schools

According to AreaVibes, the subject is served by the Fulton County School District. There are currently two public schools and one private schools in the City of Union City. Using the proficiency score average, the average test scores for the city is 17.0 percent. Approximately 82.6 percent of people in the city have completed high school.

Transportation

Major highways in Fulton County include Interstates 20, 85, 285 and 675; U.S. Highways 23, 29, 78 and 278; and State Highways 8, 10, 12, 13, 14, 42, 124, 141, 154, 155, 212, 236, 260 and 410. MARTA's Transport provides commuter rail, bus and para-transit services throughout Fulton and DeKalb counties. Commuter rail services are also provided by Amtrak. Interstate and intrastate bus transportation is provided by Greyhound. The nearest international airport is the Hartsfield-Jackson International Airport, in Atlanta, approximately 7.7 miles from Union City.

Health Services

Piedmont Fayette Hospital is located in the City of Fayetteville and service residents of Union City. Additional healthcare facilities in or near Union City include the following: Liberty Medical Center, Summit Urgent Care, UC Urgent Care, Southside Medical Care, Rophe Adult and Pediatric Medicine, New Beginnings Medical Center, Personal Touch Medical Center, National Orthodontics, 19th Street Dental, South Fulton Dental Care, Walmart Vison & Glasses and Jackson Eye.

Parks and Recreational Opportunities

Union City offers many different types of recreational opportunities including several ball fields, the Etris-Darnell Community Center, The Gathering Community Place Community Center, Ronald Bridges Park, The Nature Trail, Senior Leisure Services and the City of Union Karate Class. The City holds several special events for residents of the city throughout the year.

> Gill Group | *Promises Kept. Deadlines Met.* Page | 23

Crime

According to AreaVibes, approximately 506 per 100,000 residents are victims of a violent crime annually, and approximately 3,527 per 100,000 residents are victims of a property crime each year. The crime rate for Union City is 48.4 percent higher than for the state. The total number of crimes in the city has decreased six percent within the past year, according to AreaVibes. There is a 1 in 198 chance of being the victim of a violent crime and a 1 in 29 chance of being the victim of a property crime. The life cycle is generally in the stability stage. Therefore, there are no major adverse influences or hazards observed or known by the appraiser in the immediate surrounding area.

Visibility/Access

The subject site is located along Red Oak Road. Red Oak Road connects to Lester Road, which then connects to Jonesboro Road, a major thoroughfare in the city. Therefore, it is the opinion of the analyst that there is good visibility/access to the site.

Planned Road & Infrastructure Improvements

At the time of the physical inspection, there were no planned road or infrastructure improvements in the area surrounding the subject property.

Environmental

A copy of a Phase I Environmental Site Assessment was not provided to the analyst with this assignment. No environmental hazards were observed on the site on the date of the inspection.

Community and Site Strengths and Weaknesses

Strengths – The site is located near one major thoroughfare which provides it with good visibility and access. The site is located near several major services. The proposed development to be designated as housing for older persons ages 55 years and older will provide affordable housing to senior residents in the area.

Weaknesses – The site has no apparent weaknesses.

MARKET AREA

Delineation of Primary Market Area

Following is a list of considerations used when determining the market area:

- Population and Households Counts: The number of households in a market area is directly proportionate to its geographic size within an individual market. Total householders residing in a market area can greatly influence demand calculations.
- General Demographics: The socio-economic composition of a market area including income, household size and tenure can be largely influenced by the erroneous inclusion or exclusions of non-comparable areas.
- Demand: Too large of a market may result in overstating demand for an existing development. Conversely, too conservative of a market area may discount the demand for new product, especially if a lack of quality housing currently exists.
- Supply Analysis: While a larger market area generally includes higher household totals, it likewise may include a higher number of directly comparable units. If using demand methodologies that net out recently constructed and comparable rental units from the demand estimate, the increase in the number of comparable units can outweigh the increase in demand.
- Competitive Stock: The existing rental stock surveyed for a market study is dependent on the number of rental properties in a given market and therefore the boundaries of a primary market area. If existing developments are going to be used as "comparables", they should be located in the primary market area, if possible.
- Attainable Rents: If the market area includes non-comparable areas, the analysis may use comparables projects that suggest that a project can achieve rents that are significantly higher or lower than the rents its micro-location will support.
- Location of Competitive Properties: A primary consideration in defining a market area is identifying those locations that offer alternative opportunities to a potential renter for a subject site. The managers of existing comparable properties near the site are excellent sources in determining those competitive locations.
- Accessibility: Available transportation linkages including both traffic arteries and mass transit options can influence the size of the market. Mass transit can have a significant impact on projects addressing very low income households for which transportation options may be limited.
- Natural Boundaries: Natural boundaries including rivers and mountains can restrict the movership within a market due to a lack of accessibility.
- Housing Project Characteristics: The availability of a unique structure type such as a high rise may alter the typical draw of a potential project.
- Market Perceptions: Whether grounded in reality or not, market perceptions can be a significant determinant of market area boundaries. Social stigmas often exist within submarkets, with residents from one side of a submarket not moving to a nearby neighborhood, regardless of housing opportunities. The construction of a new, attractive rental community may not necessarily relieve this perception.
- Commuting Patterns: The time spent commuting and employment destination could often reveal distinct patterns. High percentages of workers with long commutes or working in neighboring counties are often indicators of a lack of affordable housing options near employment centers.
- Target Market: Proposed developments targeting a special needs population such as older persons generally draw from a larger geographic region. Given the smaller pool of qualified householders, the location and quantity of comparable stock is of additional importance. An acceptable market area for a family oriented rental community will often be too conservative for a rental community targeting senior rental householders.
- Jurisdictional Boundaries: Differences in the quality and services provided by school districts, municipalities, or counties often influence consumer location choices.
- Local Agency Service Boundaries: The geographic areas covered by local agencies, such as housing authorities, senior citizen centers, community-based organizations, or churches can be a strong indicator of market area boundaries, especially when the project has a community-based sponsor or cosponsor.

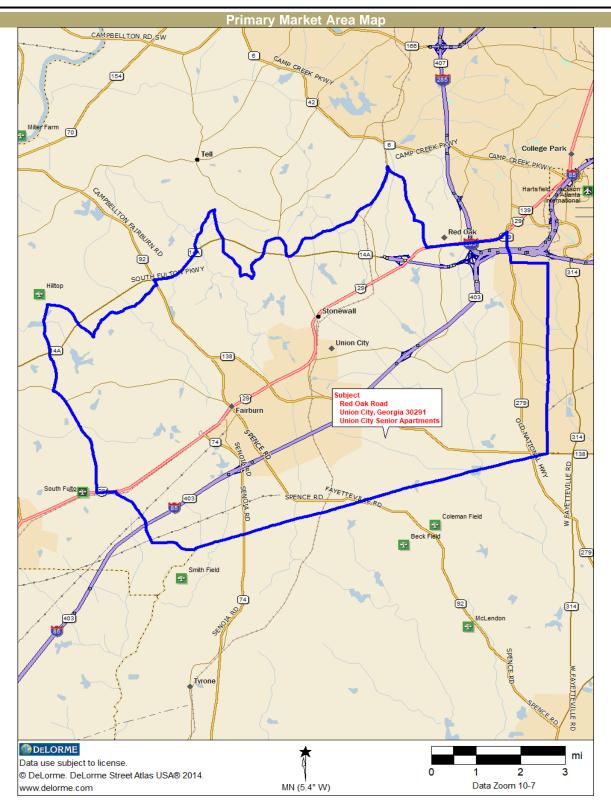

• Non-Geographic Factors: Employees who might be expected to reside in a development as a result of planned or existing job opportunities and special needs households who are served by a multi-jurisdictional agency that covers communities that are clearly distinct market areas.

Our determination of the market area is based on the boundaries between governmental units. In such a method, county, division or city boundaries become the boundaries of the market area. The market area for the subject consists of the following census tracts: 0105.07, 0105.08, 0105.10, 0105.11, 0105.12, 0105.13, 0105.14, 0105.15 and 0105.16. The market area has the following boundaries: North – Cedar Grove Road, McClure Road, State Highway 92, South Fulton Parkway, Deep Creek, Thompson Road, Derrick Road, Koweta Road, South Wexford Road, Stonewall Tell Road, Scarborough Road Southwest, Ben Hill Road, Will Lee Road and U.S. Highway 29; South – Fayette County; East – Old National Highway, Godby Road and Clayton County; and West – Johnson Road, Gullatt Road, U.S. Highway 29, Hobgood Road, Rivertown Road and Short Road. The northern boundary is approximately 7.2 miles from the subject. The western boundary is approximately 9.1 miles from the subject, and the southern boundary is approximately 1.7 miles from the subject. The eastern boundary is approximately 4.6 miles from the subject.

It is believed the proposed development would draw housing for older persons residents from the southwestern portion of Fulton as would allow residents to be in closer proximity to all needed services and public transit. Furthermore, as the subject will be designated for older persons ages 55 years and older, it is the proposed property will draw from a larger area than a family property as senior residents are more likely to relocated further distances for affordable housing that is designated for their population. In addition, there appears to a lack of available affordable senior rental housing within the market area, and all surveyed affordable housing maintain lengthy waiting lists. Therefore, the proposed development will help fill a portion of the senior rental void and pent-up demand. It is estimated the market area will gain 134 older persons renter households ages 55 years and older in the market area through 2026, which indicates a need for additional senior housing gin the market area. Furthermore, approximately 20.9 percent of the total population and 26.6 of all households within the market area are ages 55 years and older. After considering all factors, the selected market area was deemed the most likely area from which the proposed development will draw residents.

COMMUNITY DEMOGRAPHIC DATA

Community Demographic Data

Population Trends

The subject will be located in the City of Union City, Georgia. The market area for the subject consists of the following census tracts: 0105.07, 0105.08, 0105.10, 0105.11, 0105.12, 0105.13, 0105.14, 0105.15 and 0105.16. The market area has the following boundaries: North – Cedar Grove Road, McClure Road, State Highway 92, South Fulton Parkway, Deep Creek, Thompson Road, Derrick Road, Koweta Road, South Wexford Road, Stonewall Tell Road, Scarborough Road Southwest, Ben Hill Road, Will Lee Road and U.S. Highway 29; South – Fayette County; East – Old National Highway, Godby Road and Clayton County; and West – Johnson Road, Gullatt Road, U.S. Highway 29, Hobgood Road, Rivertown Road and Short Road. The northern boundary is approximately 7.2 miles from the subject. The western boundary is approximately 9.1 miles from the subject, and the southern boundary is approximately 1.7 miles from the subject. The eastern boundary is approximately 4.6 miles from the subject.

In 2000, this geographic market area contained an estimated population of 47,483. By 2010, population in this market area had decreased by 66.8 percent to 79,188. In 2021, the population in this market area had increased by 28.3 percent to 101,591. It is projected that between 2021 and 2023, population in the market area will increase 3.2 percent to 104,826. It is projected that between 2023 and 2026, population in the market area will increase 4.8 percent to 109,678. Population estimates and projections are based on the most recent data from Ribbon Demographics; 2021 Data. The data was produced prior to the COVID-19 pandemic. At this time, there is no estimated changes due to the virus. However, the long-term economic impact on any region is unknown at this time. The short-term economic impact has been relatively minor. However, it is possible the population growth could be impacted by the COVID-19 if there are long-term economic impacts in the area.

Population by Gender

The ratio of men to women in population will influence the project's design and marketing strategy. This is especially true of the older adult population. Nationally, seven of every ten persons aged 85 and older are women. Differences in mortality rates and life expectancy ages result in this unbalanced relationship. Regional differences do occur, however, based on an area's attractiveness for retirement living.

In 2010, senior women in the primary market area outnumbered men by 2,608, or 32.8 percent. By 2021, senior women in the primary market area outnumbered men by 4,251, or 33.4 percent. The ration is expected to slightly increase to 33.5 percent by 2023. By 2026, it is projected that senior women in the primary market area will outnumber men by 5,151, or 33.5 percent. In summary, the male/female gender ratios indicate a good potential target market between both halves of the populace.

Household Type and Relationship

The following two tables show the households by type and relationship and group quarters population by type for persons 65 and older. The 2010 older adult population according to household type and relationship, and it includes the population estimates for institutionalized and non-family households. The institutionalized and non-family totals are expected to increase as the older adult population increases.

As the population shifts from "In Family Households" to "In Non-Family Households," an increased demand for housing for older persons housing will result. The prevalence of family living alone is projected to increase, also, resulting in the move to "In Non-Family Households" in the service area.

Household Trends

The demand for additional housing in a market area is a function of population growth, household formations, and also a replacement of units lost through demolition and extreme obsolescence. In the case of housing for the housing for older persons, the demand for rental housing is sometimes caused by the inability of the housing for older persons to properly maintain their present ownership housing. Also, within the overall demand are segments of the market asking for more or less expense (related to income) and for ownership or rental.

Some of the demand has been, or will be, satisfied by units which have been built, or will be, by the time the project is renting. The difference between demand and supply, the residual, is the total market of which the project's market will be a share.

The "tenure" of existing housing will be examined first as a guide to the future proportion of ownership and rentals, and then characteristics of the housing stock will be noted.

The most important analysis is that of demand, supply and residual demand which follows. Its product is the number of rental units which will be demanded.

Tenure

The percentage of renters in Fulton County in 2021 is 46.4 percent, and the percentage for Union City is 41.7 percent. The percentage of renters in the primary market area in 2021 is 36.2 percent. According to the U.S. Census Bureau, the national rental percentage is 36.1 percent. Household estimates and projections are based on the most recent data from Ribbon Demographics; 2021 Data. The data was produced prior to the COVID-19 pandemic. At this time, there is no estimated changes due to the virus. However, the long-term economic impact on any region is unknown at this time. The short-term economic impact has been relatively minor. However, it is possible the household growth could be impacted by the COVID-19 if there are long-term economic impacts in the area.

Source: U.S. Census Bureau and Ribbon Demographics; 2021 Data

In 2021, this geographic market area contained 10,018 households ages 55 years and older. Of the total 10,018 senior households, 4,094, or 40.9 percent, are renter households. The market area is expected to gain an additional 5,028 households ages 55 years and older through 2026. Of the total 5,028 senior households to be gained, 696, or 31.8 percent, are renter households. This equates to a gain of 139 older persons ages 55 years households per year.

EMPLOYMENT TREND

Employment Trends

The economy of the market area is based on transportation, communication and utilities; educational, health and social services; and entertainment and recreation sectors. Each of these categories has experienced reasonable growth within the past few years.

Employment in Fulton County has been increasing an average of 1.2 percent per year since 2005. Employment in the State of Georgia has been increasing an average of 0.6 percent per year since 2005. These fluctuations are similar to the unemployment rates for Fulton County and the State of Georgia.

Future Employment Trends

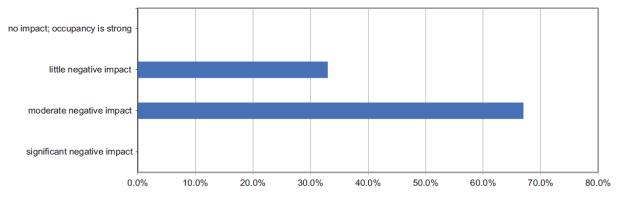

An ongoing worldwide pandemic called COVID-19 is wreaking havoc on the economy of much of the United States. The first case of COVID-19 was diagnosed in the United States on January 21, 2020, in the State of Washington. Since that date, COVID-19 spread rapidly throughout the U.S. The CDC warned that widespread transmission of the disease could force a large number of people to seek hospitalization, overloading the healthcare system. Therefore, on March 19, 2020, the government advised against gatherings of more than 10 people. Additionally, state and local authorities have made the decision to prohibit large-scale gatherings.

Also, many cities and most states have imposed lockdown measures of different scope and severity in order to attempt to contain the number of people infected. These lockdown measures have placed limits on where people can travel, work and shop away from their homes. These measures have had a significant impact on the economic conditions in cities and counties throughout the country. In March 2020, the U.S. Congress passed a \$2 trillion COVID-19 aid package in an attempt to ease the economic impact of the coronavirus pandemic. The bill includes funds for large corporations, loans for small businesses, assistance to state and local governments and direct payments to qualified individual citizens. The amount of the payment per citizen depends on various factors such as annual income and number of children. The aid package also includes a supplemental package to combat the outbreak itself, with funds for hospitals, FEMA's disaster relief fund and vaccines, therapeutics and other medical needs. While the federal and state governments have attempted to mitigate the economic impact by lowering interest rates, providing financial relief and paid sick leave for workers quarantined, providing small business loans to businesses affected by the pandemic, deferring tax payments without penalty and temporarily suspending all government foreclosures and evictions, the result of the pandemic is likely to be a recession and potentially a depression if conditions do not improve quickly.

According to the *April 2020 PwC Investor Sentiment Update*, between 60 and 70 percent of surveyed investors active in the apartment sector believe the U.S. economy is already in a recession. More than 80 percent of those same investors believe apartment fundamentals are already seeing a negative impact due to COVID-19. The remaining investors believe negative impact will be seen within three months. Overall, the majority of the surveyed investors believe apartment occupancy will see moderate negative impact due to the pandemic.

As unemployment rises and move-ins likely taper off, what will be the impact on apartment occupancy in the near term?

Source: Survey conducted by PwC March 27, 2020 through April 2, 2020; percentages reflect investor participants' sentiment

Georgia's Governor Brian Kemp issued a "stay at home" order on April 2, 2020. The order applies to all Georgia residents and visitors and was effective until April 30, 2020. On April 24th, the governor announced that businesses such as gyms, fitness centers, bowling alleys, body art studios, barbers, cosmetologists, hair designers, nail care artists, estheticians and their schools and massage therapists could begin reopening. The businesses are all held to specific restriction including adherence to the minimal basic operations, social distancing and regular sanitation.

According to the Fulton County Economic Development Department, employment in the healthcare industry continued to grow dramatically, outpacing overall employment growth in the region. Since 2014, the industry has added over 40,000 jobs, expanding employment by 19 percent. This growth was led by the General Medical and Surgical Hospitals and Offices of Physicians (Except Mental Health Specialists) sectors, which both added over 14,000 jobs. The Home Health Care Services grew rapidly over this period as well, expanding employment by 19 percent, or over 2,000 jobs. Between 2014 and 2019, the Information Technology industry added over 8,000 jobs, expanding employment by 10 percent. The Transportation and Logistics industry has expanded employment over the past five years, adding over 26,000 jobs since 2014, expanding employment by 20 percent. Over the next five years, the Metro Atlanta Region is projected to add over 61,000 jobs. Additional new and expanding business include, but are not limited to, the following:

- A new ALDI is coming to the City of Union City and is expected to be complete by 2022.
- Microsoft announced it will select Fulton County for the company's \$850 expansion that includes a new data center.
- Boston Consulting Group, a management consulting firm, announced it will invest \$18 million into expanding the company's Atlanta Business Service Center, adding an additional 331 jobs for the area.
- Kainos, a global digital technology company will invest \$1.2 million in opening a North America sales and IT hub in Fulton County, creating 137 new jobs.
- Better Up Foods will invest up to \$34 million to expand its current product offering, creating 162 new jobs.

Gill Group | Promises Kept. Deadlines Met.

The long-term impact of the pandemic is not yet known. However, the temporary impact is already visible for many areas, with mass layoffs of non-essential workers. The following table shows the W.A.R.N. notices issued for the market area. W.A.R.N. notices require employers with 100 or more employees to provide at least 60 calendar days advance written notice of plant closings and mass layoffs affecting 50 or more employees at a single site of employment. Exceptions to giving notice may be allowed in an economic crisis which is considered to be an unforeseen business circumstance.

There have been seven W.A.R.N. notices in the market area since 2019. is estimated that approximately 79 percent of the W.A.R.N. notices were issued after the onset of the COVID-19 pandemic.

Employment Outside the County

For residents employed in the market area, the travel time to work from the site will be less than 30 minutes. For the majority of those employed in other parts of the county, the travel time would be within 45 minutes. According to the chart below, 15.7 percent in the market area have a travel time of less than 15 minutes; 37.6 percent have a travel time of 15 to 29 minutes; and 46.7 percent have a travel time of over 30 minutes. This relatively low travel time indicates that the subject site is in an area in close proximity to employment centers.

| ESTIMATED TRAVEL TIME TO WORK FOR MARKET AREA RESIDENTS | | | | | | | |

PROJECT-SPECIFIC AFFORDABILITY & DEMAND ANALYSIS

Income Restrictions

Senior renters within the target incomes between \$23,250 and \$41,400, or 18.5 percent, qualify for the proposed units that will be designated as Housing For Older Persons. Target incomes for the different unit types are derived by the analyst. For the low end of the range, the lowest gross rent charged in an income limit (i.e. 50% AMI) for a unit is divided by 40 percent. The resulting number is then multiplied by 12 to derive an annual income (\$775 / 40% = \$1,937.50 x 12 = \$23,250). This process is based on the premise that a senior tenant should not pay more than 40 percent of his annual income on rent.

For the high end of the range, the analyst consults the income limits set by the state housing authority. For example, if the largest unit in an income limit (i.e. 60% AMI) is a two-bedroom unit, the analyst multiplies this number by 1.5 (this is due to the Low Income Housing Tax Credit (LIHTC) program being based on the premise that 1.5 persons per bedroom will occupy rental units) to find how many people could reside in that unit. The analyst then consults the state income limits to set the high end of the range (2 bedroom x 1.5 = 3 people/unit; therefore, the 60% 3-person maximum income would be used). However, as the proposed subject will be desingated as housing for older persons ages 55 years and older, a maximum of two-persons is utilized.

Sources of Demand

The potential tenants for the proposed development that will be designated as housing for older persons ages 55 years and older include senior households who now live within the market area. It will appeal to potential senior tenants who have adequate incomes to pay the proposed rents and find the development more attractive in terms of price, unit features and project amenities than other available rental units. The market area is gaining approximately 139 older persons ages 55 years and older households per year.

Required Unit Mix

The LIHTC program is based on the premise that 1.5 persons per bedroom will occupy rental units. We expect that five percent of one-person households ages 55 years and older households will occupy efficiency units. We expect that 90 percent of one-person households ages 55 years and older and 90 percent of two-persons households ages 55 years and older, 10 percent of two-person households ages 55 years and older, 10 percent of two-person households ages 55 years and older and 90 percent of three-person households ages 55 years and older will occupy two-bedroom units. We expect that 10 percent of three-person households ages 55 years and older will occupy two-bedroom units. We expect that 10 percent of three-person households ages 55 years and older, 90 percent of four-person households ages 55 years and older and 90 percent of households ages 55 years and older ages 55 years and older and 90 percent of households ages 55 years and older ages 55 years and older and 90 percent of three-person households ages 55 years and older will occupy two-bedroom units. We expect that 10 percent of three-person households ages 55 years and older older ages 55 years and older and 90 percent of percent of households ages 55 years and older ages 55 years and older and 90 percent of households ages 55 years and older ages 55 years and older and 90 percent of households ages 55 years and older and 90 percent of households ages 55 years and older and 90 percent of households ages 55 years and older and 90 percent of households ages 55 years and older and 90 percent of households ages 55 years and older and 90 percent of households ages 55 years and older with five or more persons will occupy three-bedroom units. We expect 10 percent of four-person households ages 55 years and older and 10 percent of households ages 55 years and older with five or more persons will occupy units with four or more bedrooms.

The following tables illustrate the ratio of units required by each household size. These occupancy patterns suggest that for households ages 55 years and older, efficiency units should account for 2.7 of the renter housing demand; one-bedroom units should account for 70.3 percent; two-bedroom units should account for 17.1 percent; three-bedroom units should account for 9.0 percent; and four-bedroom units should account for 0.9 percent.

Affordability

The following table uses a 40 percent lease rent-to-income to determine the minimum target income required for each LIHTC unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists the number of households within the required target income for each unit type.

| INCOME-ELIGIBLE 55+ RENTER HOUSEHOLDS | | | | | | | | |
|---|-------|----------|----------|-------|-----|--|--|--|
| Gross Rent Lower Range Upper Range % Income Income-Eligible Qualified Households | | | | | | | | |
| All Unit Types (All) | \$775 | \$23,250 | \$41,400 | 18.5% | 756 | | | |
| All Unit Types (50%) | \$775 | \$23,250 | \$33,100 | 12.6% | 514 | | | |
| All Unit Types (60%) | \$930 | \$27,900 | \$39,720 | 9.3% | 381 | | | |

Penetration Rate

There are no vacant senior units that will directly compete with the proposed subject. There are no planned or under construction developments in the market area that will compete with the subject. The subject is a proposed development that will contain 80 units designated as Housing For Older Persons ages 55 years and older. If all these units attain full occupancy, they will have an aggregate penetration rate of 10.6 percent.

| REQUIRED PENETRATION RATE | | | | | | |
|-----------------------------------|-------|--|--|--|--|--|
| Income Eligible Renter Households | 756 | | | | | |
| Existing Vacant LIHTC Units | 0 | | | | | |
| LIHTC Units Planned | 0 | | | | | |
| Proposed Units in Subject | 80 | | | | | |
| Total Inventory | 80 | | | | | |
| Penetration Rate | 10.6% | | | | | |

Projects Under Construction

According to the City of Union City, there are currently no senior developments under construction in the market area.

Planned Projects

According to the City of Union City, there are no planned senior developments in the market area that will directly compete with the subject.

New & Pipeline Units

There are currently no new developments in the market area.

Demand

The following are the demand sources as indicated in the Market Study Manual released by the Georgia Department of Community Affairs:

a. **Demand from New Household**: New units required in the market area due to projected household growth from migration into the market and growth from existing households in the market should be determined. This should be forecasted using current renter household data and projecting forward to the anticipated placed in service date of the project using a growth rate established from a reputable source such as Claritas or State Data Center or the U.S. Census/American Community Survey (ACS). This household projection must be limited to the target population, age and income group and the demand for each income group targeted (i.e. 60% of median income) must be shown separately.

The market area indicates a total increase of 5,028 older persons ages 55 years and older households in the market area from 2021 to 2026 as shown on the Households by Tenure table on Page 53. The total growth between 2021 and 2026 was then divided by 5 to determine the

Gill Group | Promises Kept. Deadlines Met. Page | 70

yearly projected growth (5,028/5 = 1,006). The older persons ages 55 years and older household growth between 2021 and 2026 (1,006) was then multiplied by two as the property will be placed in service 2023 (1,006 * 2 = 2,012). The result is then multiplied by the percent income-qualified (18.5%), and then multiplied by the older persons ages 55 years and older percent in the market area that plan to rent (40.9%) as shown on Page 53. The result is determined to be the new households for all units.

b. **Demand from Existing Households**: The second source of demand is projected from:

Rent over-burdened households, if any, within the age group, income groups and tenure (renters) targeted for the proposed development. In order to achieve consistency in methodology, all analysts should assume that the rent-overburdened analysis includes households paying greater than 35% (Family), or greater than 40% (Senior) of their income toward gross rent; and households in substandard housing should be determined based on age, income bands and tenure that apply. The analyst should use their own knowledge of the market area and project to determine if households from substandard housing would be a realistic source of demand. The analyst is encouraged to be conservative in his/her estimate of demand from both households that are rent-overburdened or living in substandard housing.

The table on Page 55 indicates there are 540 total substandard older persons households in the primary market area. The number of substandard households is multiplied by the percent income qualified as shown on Page 57. The result was determined to be the demand from housing for older persons substandard housing.

The table on Page 55 indicates the number of rent overburdened households within each income sector. The number of rent overburdened households was multiplied by the appropriate percent income qualified within each income sector for the total proposed tax credit units. The result was determined to be the demand for rent overburdened housing for older persons households.

c. **Elderly Homeowners likely to convert to rentership**: DCA recognizes that this type of turnover is increasingly becoming a factor in the demand for Elderly tax credit housing. This segment should not account for more than 2% of total demand. Due to the difficulty of extrapolating Housing For Older Persons (55 and over) owner households from elderly renter households, analyst may use the total figure for elderly households in the appropriate income band in order to derive this demand figure. Data from interviews with property managers of active projects regarding renters who have come from homeownership should be used to refine the analysis.

There was insufficient data to determine the percentage of elderly homeowners likely to convert. Therefore, this category was not included in the analysis.

Net Demand, Capture Rate and Stabilization Calculations

The overall demand components were added together to determine total demand. Any vacant competitive units in the current supply or any units constructed in the past two years must be subtracted from the demand to determine a net demand. Comparable units (vacant or occupied) funded, under construction, or placed in service in 2020 and 2021 must be subtracted to calculate net demand, There were no new, planned or under construction senior development in the market area. Therefore, no additional units need to be considered.

The following table contains the summary demand estimates in the primary market area for all units.

| REQUIRED DEMAND - ALL UNITS | | | | | | | |
|--|--------------|--------------------|--------------------|--|--|--|--|
| | All Units | All Units (50%) | All Units (60%) | | | | |

Capture Rate Analysis Chart

| I he follow | he following chart indicates the net demand and the capture rates: | | | | | | | | | |
|----------------------|--|---------------------|-----------------|--------|------------|--------------|---------------------|----------------------|---------------|--|
| AMI | Unit Type | # Units Proposed | Total Demand | Supply | Net Demand | Capture Rate | Avg. Market Rent | Market Rents Band | Proposed Rent | |
| 50% AMI | 1 BR | 16 | 687 | 0 | 687 | 2.3% | \$1,130 | N/A | \$775 | |
| 60% AMI | 1 BR | 64 | 605 | 0 | 605 | 10.6% | \$1,130 | N/A | \$930 | |
| TOTAL for | 50% AMI | 16 | 687 | 0 | 687 | 2.3% | \$1,130 | N/A | \$775 | |
| Project | 60% AMI | 64 | 605 | 0 | 605 | 10.6% | \$1,130 | N/A | \$930 | |
| TOTAL for Project | 1/1 | 80 | 992 | 0 | 992 | 8.1% | \$1,130 | N/A | \$775-\$930 | |

The subject is a proposed LIHTC senior property that is applying for tax credits at 50 and 60 percent of the area median income. The capture rate analysis indicated that the subject would need to capture 8.1 percent of all older person ages 55 years and older households in the market area. The capture rate is acceptable. In addition, there is a large amount of pent-up demand in the market area as indicated by the lengthy waiting lists and high occupancy rates of the affordable developments surveyed. Furthermore, the subject's proposed rents are below the unrestricted achievable market rent and the determined average market rents. Therefore, it is believed the subject will be a great asset to the area and will be viable in the market area.

Overall Vacancy

There was a total of 17 confirmed apartment complexes in the market area. There were 48 vacant units at the time of the survey out of 3,193 surveyed, for an overall vacancy rate of 1.5 percent. Of the surveyed restricted comparables, only one restricted development is designated for Housing For Older Persons and will compete directly with the subject's units. Woodbridge at Parkway Village is a Section 8 and LIHTC development designed for Older Persons ages 62 years and older. The complex is 99 percent occupied and maintains a one-year waiting list. The proeprty offers 92 one-bedroom units and 58 two-bedroom units. Therefore, the complex's 92 one-bedroom units will directly compete with the proposed subject. The subject's proposed amenities and unit sizes will be similar to the restricted comparables surveyed. Therefore, it is believed the proposed subject will be competitive within the market area.

Additional Developments

Additional developments located in the market area were considered; however, some comparables were not utilized either due to being unverifiable or non-competitive with the subject property. The following table shows the comparables that were not included in this analysis as they were deemed unverifiable after numerous attempts to contact were proven unsuccessful.

Evaluation of the Proposed Development

Location

The subject site is in a residential neighborhood. Its location provides it with average access and visibility. The properties surrounding the site are in average to good condition. The site's access to major arterials, medical facilities and grocery stores is comparable to that of its competitors. Its overall location is comparable to its competitors because the size of the city confers the same locational attributes to all projects.

Project Design

The proposed development will consist of one four-story elevator building. The property will contain 80 one-bedroom/one-bath units with 650 square feet for a total of 52,000 square feet, resulting in a total net rentable area is 52,000 square feet. The building will be of wood frame construction with concrete slab foundations with brick and concrete exterior and asphalt shingle roofing.

Project Amenities

Project amenities will include a meeting room, exercise facility, business center, laundry facility, on-site management and on-site maintenance. These amenities will be competitive with surveyed properties in the market area.

Unit Amenities

Each unit will contain a refrigerator, range/oven, washer/dryer hook-ups, carpet and vinyl floor coverings, blinds, walk-in closet, coat closet and pull cords (select). These amenities will be competitive with surveyed properties in the market area.

Tenant Services

According to the developer, the property will not offer any tenant services.

Parking

The complex will also open lot parking at no additional cost to residents. This arrangement is comparable to other developments in the market area.

Unit Mix

The subject's unit mix of one-bedroom senior units will be suitable in a market area.

Utilities

Heating and cooling will be central electric. Cooking and hot water will also electric. All utilities will be provided by the landlord. This arrangement is superior to most apartment units in the market area.

Unit Size The average size of the units in the surveyed developments 728 square feet for one-bedroom units. The subject's proposed unit size will be within the range of the surveyed comparables. Therefore, the subject's proposed unit sizes will not have a negative impact on the marketability of the proposed units.

Source: Gill Group Field Survey

Vacancy Rates/Rental Trends

There was a total of 17 confirmed apartment complexes in the market area. There were 48 vacant units at the time of the survey out of 3,193 surveyed, for an overall vacancy rate of 1.5 percent. The subject's proposed amenities and unit sizes will be similar to the restricted comparables surveyed. Therefore, it is believed the proposed subject will be competitive within the market area.

There are five family developments in the market area that were considered comparable with the subject; however, will not directly compete. However, due to the lack of senior developments in the market area, the family developments were utilized within the report for comparison purposes. Of the total six restricted comparables, one-bedroom rents range from \$480 to \$1,100 per month. The average market rent for the one-bedroom units in the restricted developments is \$857; however, the majority of the properties are of older construction. The subject's proposed rents are slightly higher the determined average market rent; however, its proposed rents are within this competitive range. In addition, the proposed proeprty will be superior in condition once construction is complete. Therefore, the subject's proposed rental rate will be competitive with the restricted developments in the market area.

Existing market-rate developments within the market area include Legacy Ridge, Evergreen Terrace, Champions Glen Apartments, Hidden Lakes Apartments, Villas at Autumn Hills, Oakley Woods Apartments, Oakley Shoals, Premier Club Apartments, Morgan Trace Apartments, Evergreen Commons and The Woods at Shannon Lake. Once construction is complete, the subject will contain 80 one-bedroom units designated for older persons ages 55 years and older. Therefore, these properties will not directly compete with the subject. However, the comparables contain a similar unit type and are similar in unit and project amenities, the properties were deemed warranted for comparison purposes.

Of the surveyed restricted comparables, only one restricted development is designated for housing for older persons and will compete directly with the subject's units. Woodbridge at Parkway Village is a Section 8 and LIHTC development designed for older persons ages 62 years and older. The complex is 99 percent occupied and maintains a one-year waiting list. The proeprty offers 92 one-bedroom units and 58 two-bedroom units. Therefore, the complex's 92 one-bedroom units will directly compete with the proposed subject. The subject's proposed amenities and unit sizes will be similar to the restricted comparables surveyed. Therefore, it is believed the proposed subject will be competitive within the market area.

Gill Group | Promises Kept. Deadlines Met. Page | 116

Arcadia at Parkway Village is a LIHTC family development that offers 292 one-, two- and three-bedroom units at 60 percent of the area median income. The complex is 100 percent occupied and maintains a sixmonth to one-year waiting list. As the property is desingated for families, it will not directly compete with the proposed subject. However, as the complex contains a similar unit type and has a similar rent restriction, it was determined appropriate to utilized for comparison purposes.

The proposed subject will be a LIHTC development designated as housing for older persons ages 55 years and older. The complex will offer 80 one-bedroom units at 50 and 60 percent of the area median income. All of the market area's developments maintain stabilized occupancy and all affordable developments maintain lengthy waiting lists. Therefore, there is a larger amount of pent-up demand. The subject is a proposed new construction development; therefore, it will be superior in condition to the majority of the market area's housing stock. In addition, there also appears to a shortage of affordable housing designated for older persons ages 55 years and older. Based on the information verified and included within this analysis, it appears that the occupancy rates in the area will remain stable and rental rates will increase slightly within the next two years.

Summary of Developments Strength and Weaknesses

Strengths – The development will be located near one major thoroughfare which will provide it with good visibility and access. Also, the subject will be in close proximity to all needed services and public transit. In addition, the subject will be a LIHTC development designated as housing for older persons ages 55 years and older. As indicated by the lengthy waiting lists of the comparables developments, it appears that there is a shortage of affordable housing for older persons.

Weaknesses – The development has no apparent weaknesses.

Explanation of Adjustments and Market Rent Conclusions – As Complete Union City Senior Apartments Primary Unit Types –One-Bedroom Units (650 SF)

Please note: Minor adjustments in the \$5 to \$10 range are based on the appraiser's evaluation of the overall market as well as typical responses indicated by existing tenants. In addition, this is standard industry practice when there is insufficient market data present to support adjustments. It is also considered an acceptable practice by HUD as indicated in the Section 8 Renewal Guide Chapter 9-12 (C) (3) which states: "For minor adjustments (generally in the \$5 to \$10 range), the appraiser may state his/her subjective evaluation of why the observed differences would affect rent."

A rent comparability grid was prepared for the primary unit type with 650 square feet. Comparable apartments used include the following: Legacy Ridge (Comparable 1), Evergreen Terrace (Comparable 2), Champions Glen Apartments (Comparable 3), Hidden Lakes Apartments (Comparable 4) and Villas at Autumn Hills (Comparable 5).

Structure/Stories – The subject will be located in a four-story elevator building. Comparables 1, 2, 3 and 4 are located in two-, three- or four-story walk-up buildings. Comparable 5 is located in two-story townhome buildings. No complex in the market area shows a rent difference based on this particular item. No adjustment was needed.

Project Occupancy – The subject is proposed. The occupancy rates of the comparables range from 97 to 100 percent. No adjustment was needed.

Concessions – The subject will not offer concessions. None of the comparables are currently offering concessions. No adjustment was needed.

Year Built/Year Renovated – The subject is a proposed new construction senior development. Once construction is complete, the subject will be in good condition. Comparables 1 and 2 were constructed in 2008 and have updated units as part of the typical turnover process. Furthermore, both properties appear to have been well-maintained. Therefore, Comparables 1 and 2 were deemed to be in good condition. Comparable 3 was constructed in 1989 and was substaintially renovated in 2015. The complex's renovation consisted of a complete "gut" of interiors, all new appliances, flooring, drywall, electrical, plumbing, fixtures, hardware and lighting. In addition, the complex made repairs or replaced the exteriors, roofing, parking lot and windows. The property appears well maintained and does not show any signs of abnormal "wear and tear". Therefore, Comparable 3 was deemed to be in good condition. Comparable 4 was constructed in 1985 and had a minor renovation in 2012 that consisted of the replacement of flooring and painting. Therefore, Comparable 4 was deemed to be in average condition. Comparable 5 was constructed in 1986 and appears well maintained and show signs of typical depreciation. Therefore, Comparable 4 was deemed to be in average condition.

The following table illustrates the descriptions of the ratings levels considered in the condition/street appeal analysis.

| Condition | Description |
|-----------|---|
| Excellent | Desirable curb appeal, luxury or high end amenities and finishes, no deferred maintenance |
| Good | Well maintained or recently renovated property, limited deferred maintenance |
| Average | Some original finishes and amenities, Only minor upgrades needed |
| Fair | In need of repair, obvious deferred maintenance |
| Poor | Substantial need of major repairs or significant deferred maintenance |

The following analysis details the method used to calculate appropriate adjustments for condition/street appeal.

| Rating Level | 1 BR | Average | | | |
|----------------------------------|--|---|--|--|--|
| Average | \$1,019 | \$1,019 | | | |
| Average | \$1,019 | \$1,019 | | | |
| Average Rent (Average Condition) | | | | | |
| Good | \$1,083 | \$1,083 | | | |
| Good | \$1,151 | \$1,151 | | | |
| Good | \$1,199 | \$1,199 | | | |
| dition) | \$1,144 | \$1,144 | | | |

| | Average Average Indition) Good Good Good dition) | Average \$1,019 Average \$1,019 ndition) \$1,019 Good \$1,083 Good \$1,151 Good \$1,199 dition) \$1,144 | | | |

The average ending rents of the comparables were compared at each rating level. Average rent differences between fair and average and between average and good were determined, and the differences were utilized as the adjustments for condition/street appeal. As previously indicated, the subject is a proposed construction development. Once construction is complete, the property will be in good condition. Comparables 1, 2 and 3 were considered good in condition and were not adjusted. Comparables 4 and 5 were rated in average condition and were, therefore, adjusted upward \$125 as indicated in the previous analysis.

SF Area - The subject and the comparables vary in square footage. Typically, all other variables being equal, a larger unit is more desirable than a smaller unit. However, the value of the additional square footage is mitigated to some degree by the similarity in perceived unit function. There is a diminishing return of value for additional square footage as each additional square foot does not necessarily equal additional functionality. Additionally, the units at the subject are measured as part of the scope of this assignment. However, the contacts at the comparables are often unwilling to allow interior inspections of the units. Therefore, it is necessary to rely on published unit sizes or verbal confirmation of unit sizes from the property contacts. As such, it is impossible to verify the accuracy of this data. In addition, the subject unit sizes are paint-to-paint measurements, while the contacts often report the "marketing" unit size which is sometimes the gross exterior square footage. Therefore, the unit sizes at the comparables are not always a direct comparison to the unit sizes at the subject. For the purpose of this report, a range of comparable rents per square foot was derived. To determine this adjustment, each comparable's dollar per square foot rental rate was determined for each bedroom type. From these results, a median dollar per square foot rental rate is determined. The median dollar per square foot was then multiplied by 25 percent for each comparable to derive an adjusted dollar per square foot rental rate. The 25 percent was used to account for the diminished return of the larger unit sizes and the potential differences in reported unit sizes of the comparables versus the subject. Next, the difference in square footage between the subject and each comparable is determined. The difference is multiplied by the determined adjusted dollar per square foot rate to arrive at the adjustment for each comparable. The selected dollar per square foot for the one-bedroom comparison is \$0.34. The result was rounded to the nearest \$5. No adjustments were made to comparables within 25 square feet of the subject because there is no difference in perceived unit function with 25 square feet. The adjustments are reflected on the HUD-Form 92273-S8, which is attached.

of Bedrooms – The subject will offer one-bedroom units. All comparables are similar. No adjustments were needed.

of Baths – The subject will offer one bath in the proposed units. All comparables are similar. No adjustments were needed.

Balcony/Patio – The subject will not contain these features. Comparable 2 is similar. Comparables 1, 3, 4 and 5 contain these features on the units and were each adjusted downward \$5 per month. Although there is little market data available concerning units with these features versus those without these features, the added amenity is an enhancement to the unit. Therefore, the nominal adjustment was deemed reasonable.

Parking – The subject will offer open lot parking at no additional cost to residents. All comparables contain parking lots with no additional fee. No adjustment is needed.

AC: Central/Wall – The subject will contain central air conditioning, as do all comparables. No adjustments were needed.

Range/Refrigerator – The subject will contain both amenities. All comparables are similar. No adjustments were needed.

Garbage Disposal – The subject will not contain a garbage disposal in the units. All of the comparables contain garbage disposals. However, since there is no market data concerning units with this feature, no adjustment was given.

Microwave/Dishwasher – The subject will not contain either a microwave or dishwasher in the units. All comparables contain a dishwasher in each unit and were each adjusted downward \$10 per month. Dishwashers are an expensive feature and are likely to factor into a tenant's decision on which unit to lease. Although there is little market data available concerning units with this feature versus those without this feature, the added amenity is an enhancement to the unit. Therefore, an adjustment of \$10 was considered appropriate for dishwashers.

Washer/Dryer – The subject will contain washer/dryer hook-ups in each unit. Comparables 2, 3, 4 and 5 are similar. Comparable 1 offers a laundry facility and was adjusted upward \$5 per month. Although there is little market data available concerning units with these features versus those without these features, the added amenity is an enhancement to the property

Carpet – The subject will contain carpet and vinyl floor covering. All comparables contain carpet floor coverings. Therefore, no adjustments were needed.

Drapes – The subject will contain window coverings. All comparables are similar. No adjustment was needed.

Pool/Recreation Areas - The subject will contain an exercise room. Comparable 1 offers a swimming pool, exercise room, picnic area, playground, dog park, media room, soccer field, sundeck and walking trail. Comparable 2 contains swimming pool, exercise room, picnic area, playground, tennis court, dog park, putting green, bowling alley and sundeck. Comparable 3 contains a swimming pool, tennis court and sundeck. Comparable 4 offers an exercise room, picnic area, playground and tennis court. Comparable 5 offers a swimming pool and picnic area. Although there is little market data available concerning units with these features, the added amenities are an enhancement. Swimming pools are typically considered a more desirable feature than other recreation features. Therefore, a \$10 adjustment was determined for swimming pool, and a \$5 adjustment per feature was determined for each additional recreation area. Based on these amounts, the subject's recreation areas are worth \$5 total (\$5 per recreation area x 1 recreation area = \$5). Comparable 1 has a recreational value of \$50 per month (Swimming Pool - \$10 + Exercise Room - \$5 + Picnic Area - \$5 + Playground - \$5 + Dog Park - \$5 + Media Room - \$5 + Soccer Field - \$5 + Sundeck - \$5 + Walking Trail - \$5 = \$50). Comparable 2 has a recreational value of \$50 per month (Swimming Pool - \$10 + Exercise Room - \$5 + Picnic Area - \$5 + Playground - \$5 + Tennis Court - \$5 + Dog Park - \$5 + Putting Green - \$5 + Sundeck - \$5 + Bowling Alley - \$5 = \$50). Comparable 3 has a recreational value of \$20 per month (Swimming Pool - \$10 + Tennis Court - \$5 + Sundeck - \$5 = \$20). Comparable 4 has a recreational value of \$20 (Exercise Room - \$5 + Picnic Area - \$5 + Playground - \$5 + Tennis Court - \$5 = \$20). Comparable 5 has a recreational value of 15 (Swimming Pool - 10 + Picnic Area - 5 = 15).

Heat – The subject will have this utility provided. None of the comparables have this utility provided and were each adjusted upward \$19 per month based upon the Utility Allowance for Tenant-Furnished Utilities and Other Services for Fulton County.

Cooling – The subject will have this utility provided. None of the comparables have this utility provided and were each adjusted upward \$5 per month based upon the Utility Allowance for Tenant-Furnished Utilities and Other Services for Fulton County.

Cooking – The subject will have this utility provided. None of the comparables have this utility provided and were each adjusted upward \$15 per month based upon the Utility Allowance for Tenant-Furnished Utilities and Other Services for Fulton County.

Electricity – The subject will have this utility provided. None of the comparables have this utility provided and were each adjusted upward \$59 per month based upon the Utility Allowance for Tenant-Furnished Utilities and Other Services for Fulton County.

Hot Water – The subject will have this utility provided. None of the comparables have this utility provided and were each adjusted upward \$31 per month based upon the Utility Allowance for Tenant-Furnished Utilities and Other Services for Fulton County.

Cold Water/Sewer – The subject will provide cold water and sewer. All comparables are similar. No adjustment was needed.

Trash – The subject will provide this utility. All comparables are similar. No adjustment was needed.

Extra Storage – The subject will not contain extra storage. None of the comparables contain storage. No adjustments were needed.

Location – The subject's neighborhood is rated average, with easy access to all services available within the city limits. In order to determine if adjustments were needed for differences in location between the subject and the comparables, several factors were compared. Those factors include livability, amenities available, cost of living, crime factors, employment factors, housing factors, schools in the area, population, median rent level, median home value and median income levels. The comparison between the subject and comparables is shown in the following table:

| | Location Characteristics | | | | | | | | | |
|----------------------|--------------------------|--------------|-----------|--|--|--|--|--|--|--|
| | Union City | College Park | Fairburn | | | | | | | |
| Livability | 55 | 52 | 64 | | | | | | | |
| Amenities | С | А | В | | | | | | | |
| Cost of Living | В | С | С | | | | | | | |
| Crime | F | F | F | | | | | | | |
| Employment | F | F | D | | | | | | | |
| Housing | С | F | В | | | | | | | |
| Schools | F | F | F | | | | | | | |
| Population | 20,560 | 14,434 | 13,860 | | | | | | | |
| Median Rent | \$858 | \$778 | \$1,045 | | | | | | | |
| Median Housing Value | \$79,900 | \$155,500 | \$119,600 | | | | | | | |
| Median Income | \$35,229 | \$28,191 | \$40,954 | | | | | | | |

Source: AreaVibes and Ribbon Demographics, 2021 Data

The data shown in the table was verified through **www.areavibes.com**. Each category was given a rating of 1 to 5, with 1 being the worst and 5 being the best. The ratings for each category were added together for each comparable, and the total sum was compared to the combined sum for the subject and a percent difference from the subject was determined. The results are shown in the following table:

| | Location Wei | ghting Table | |
|----------------------|--------------|--------------|----------|
| | Union City | College Park | Fairburn |
| Livability | 3 | 3 | 4 |
| Amenities | 3 | 5 | 4 |
| Cost of Living | 4 | 3 | 3 |
| Crime | 1 | 1 | 1 |
| Employment | 1 | 1 | 2 |
| Housing | 3 | 1 | 4 |
| Schools | 1 | 1 | 1 |
| Population | 2 | 2 | 2 |
| Median Rent | 4 | 3 | 5 |
| Median Housing Value | 2 | 3 | 3 |
| Median Income | 2 | 2 | 3 |
| Total | 29 | 28 | 35 |

After considering all factors, the analyst determined that College Park and Union City are overall similar, and that the City of Fairburn is superior to the City of Union City. As a result, Comparable 2 was adjusted downward two percent of the unadjusted base rent, or \$20 per month. The remaining comparables were deemed similar and were not adjusted.

Security – The subject will not contain security features. Comparables 2, 3 and 5 are similar. Comparables 1 and 4 contain a limited access gate and were each adjusted downward \$10 per month. No complex in the market area shows a rent differential based on security features. However, security features are an enhancement to an apartment complex, particularly security that limits access to the building or grounds. Therefore, the adjustment was determined reasonable.

Clubhouse/Meeting Room – The subject will contain a meeting room. All comparables contain a clubhouse. No adjustments were needed.

Special Features – The subject will not contain special features. Comparables 1, 2, 3 and 4 are similar. Comparable 5 contains vaulted ceilings and a fireplace in the units. Vaulted ceilings contribute to the appeal of the units and are considered an enhancement. No complex in the market area shows a rent differential based on this particular item; however, a nominal adjustment was considered appropriate. Therefore, a \$5 adjustment was selected for vaulted ceilings. Fireplaces are enhancements to the units, and tenants would expect to pay a premium fee if this amenity was included in the units. No complex in the market area shows a rent differential based on this particular item; however, an adjustment was considered appropriate. Therefore, a \$10 adjustment was selected for fireplaces. Consequently, Comparable 5 was adjusted downward \$15 per month.

Business Center/Neighborhood Network – The subject will contain a business center. Comparables 1, 2 and 4 are similar. Comparables 3 and 5 do not contain any of these features and were adjusted upward \$5 per month. No complex in the market area shows a rent differential based on these particular items; however, the added amenities are an enhancement. Apartments with these features can command a higher rent in the market area. Therefore, the adjustment was determined appropriate.

Conclusion of Market Rents – As Complete

The adjusted rents range from \$1,083 to \$1,199 for the one-bedroom comparison. All comparables were given consideration. The appraiser concluded the market rent for the units at the subject as follows:

650 SF One-Bedroom Units - \$1,130

The developer is proposing the affordable rents as follows:

| MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES | | | | | | | | | | |
|--|------------|----------------|----------------|------------------|---------------|----------------------|----------|--|--|--|
| Unit Type | # of Units | Avg. Square | % of Median | Maximum LIHTC | Gross Rent | Utility Allowance | Net Rent | | | |
| | | Feet | Income | Rent | | | | | | |
| 1/1 | 16 | 650 | 50% | \$775 | \$775 | N/A | \$775 | | | |
| 1/1 | 64 | 650 | 60% | \$930 | \$930 | N/A | \$930 | | | |

The subject's proposed rents are below the achievable unrestricted market rents determined on the rent grids. Furthermore, the proposed rents are in line with the maximum allowable LIHTC rents. In addition, the subject will be newly constructed and will be in good condition. Due to the lack of newer conventional properties in the market area, it was necessary to utilize older construction developments in the rent analysis. Therefore, the proposed rents were considered achievable.

Average Rents for Competing Properties and Rent Advantage

There are 11 market developments in the market area that were considered comparable with the proposed subject. Of these 11 comparables, one-bedroom rents range from \$775 to \$1,251. The average market rent for one-bedroom units in these developments is \$964. The subject's proposed rents are slightly higher determined average market rent; however, its proposed rents are within this competitive range.

| Unit Type | % of AMI | Proposed Rent | Market Rent | \$ Rent Advantage | % Rent Advantage |
|-----------|----------|----------------------|-------------|-------------------|------------------|
| 1/1 | 50% | \$775 | \$1,130 | \$355 | 31.4% |
| 1/1 | 60% | \$930 | \$1,130 | \$200 | 17.7% |

The subject's one-bedroom rent advantage for units at 50% AMI is 31.4 percent (\$1,130 - \$775 = \$355/ \$1,130 = 31.4%).

The subject's one-bedroom rent advantage for units at 60% AMI is 17.7 percent (\$1,130 - \$930 = \$200/ \$1,130 = 17.7%).

Housing Profile

Market Area Overview

The majority of the housing stock was built in the 1980s. The market-rate complexes were built between 1971 and 2008. The restricted apartment complexes were built between 1985 and 2010. The market area's rental units have high occupancy rates.

Housing Inventory

From 2005 through February 2021, permit-issuing jurisdictions in Page County authorized the construction of 3,002 new single-family and multifamily dwelling units. Multifamily units comprise 7.4 percent of the total construction activity.

| BUILDING PERMITS ISSUED | | | | | | | | | | |
|-------------------------|---------------|-------------|-------|--|--|--|--|--|--|--|
| YEAR | SINGLE-FAMILY | MULTIFAMILY | TOTAL | | | | | | | |
| 2005 | 480 | 0 | 480 | | | | | | | |

Projects Under Construction

According to the City of Union City and Page County, there are currently no multifamily projects under construction in the market area that would directly compete with the subject. In addition, according to the Georgia Department of Community Affairs website, there are no recent projects in the market area awarded tax credits.

Planned Projects

According to the City of Union City, there are currently no multifamily planned projects in the market area that would directly compete with the subject. In addition, according to the Georgia Department of Community Affairs website, there are no recent projects in the market area awarded tax credits.

Age of Rental Units Rental housing construction in the market area peaked in the 1970s.

| AGE OF RENTAL UNITS | | | | | | | | |
|---------------------|--------|---------|--|--|--|--|--|--|
| YEAR BUILT | NUMBER | PERCENT | | | | | | |
| 2005 or later | 1,228 | 12.6% | | | | | | |
| 2000-2004 | 1,762 | 18.0% | | | | | | |
| 1990-1999 | 1,063 | 10.9% | | | | | | |
| 1980-1989 | 1,621 | 16.6% | | | | | | |
| 1970-1979 | 2,258 | 23.1% | | | | | | |
| 1960-1969 | 805 | 8.2% | | | | | | |

Unit Condition

The market area's rental housing stock is in varying condition. Overall, the market-rate developments are of average age and are well maintained.

Bedroom Distribution

In 2010, 2.0 percent of the market area's rental units were efficiency units, 19.1 percent were onebedroom units, 32.4 percent were two-bedroom units, 32.0 percent were three-bedroom units and 12.4 percent were four-bedroom units. Dwellings with five or more bedrooms accounted for 2.0 percent of the market area's rental housing.

| BEDROOMS IN OCCUPIED RENTAL UNITS | | | | | | | |
|-----------------------------------|--------|---------|--|--|--|--|--|
| ТҮРЕ | NUMBER | PERCENT | | | | | |
| No Bedrooms | 192 | 2.0% | | | | | |
| One-Bedrooms | 1,871 | 19.1% | | | | | |

Rental Vacancy Rates

According to the U.S. Census Bureau, the national vacancy rates in the fourth quarter 2020 were 6.5 percent for rental housing and 1.0 percent for homeowner housing. The rental vacancy rate of 6.5 percent was not statistically different from the rate in the fourth quarter 2019 (6.4 percent) and not statistically different from the rate in the third quarter 2020 (6.4 percent). The homeowner vacancy rate of 1.0 percent was 0.4 percentage points lower than the rate in the fourth quarter 2019 (1.4 percent) and not statistically different from the rate in the third quarter 2020 (0.9 percent).

The fourth quarter 2020 rental vacancy rate principal cities (7.0 percent) was virtually the same as the rate outside Metropolitan Statistical Areas (7.0 percent). The rental vacancy rate in the suburbs (5.6 percent) was 1.4 percentage points lower than the rate outside MSAs (7.0 percent) and the rate in principal cities (7.0 percent). The rental vacancy rates in the suburbs, inside principal cities, and outside MSAs were not statistically different from fourth quarter 2019.

The fourth quarter 2020 rental vacancy rate was lowest in the West (4.7 percent), followed by the Northeast (5.7 percent). Rates were higher in the Midwest (7.8 percent) and South (7.4 percent), but not significantly different from each other. The rental vacancy rate in the South was lower than the fourth quarter 2019 rate, while the rental vacancy rates for the Northeast, Midwest, and West were not statistically different from the fourth quarter 2019 rates.

| RESIDENTIAL VACANCY RATES | | | | | | | | |

Lease Terms and Concessions

The typical lease term is 12 months. The subject will not offer any concessions. None of the comparables were currenlty offering any concessions.

Turnover Rates

An estimated turnover rate of 31.9 percent was deemed reasonable for the market area. This was based on the Institute of Real Estate Management (IREM) and comparables in the market area. The table below shows the turnover rates of the comparables verified:

| TURNOVER RATES | | | | | |
|-------------------------------|---------------|--|--|--|--|
| | Avg. Annual | | | | |
| Property Name | Turnover Rate | | | | |
| Evergreen Terrace | 27.0% | | | | |
| Hidden Lakes Apartments | 37.0% | | | | |
| Villas at Autumn Hills | 39.0% | | | | |
| Oakley Woods Apartments | 25.0% | | | | |
| Evergreen Commons | 38.0% | | | | |
| Woodbridge at Parkway Village | 30.0% | | | | |
| Orchard Springs | 27.0% | | | | |
| Average Annual Turnover | 31.9% | | | | |

Likely Impact of Proposed Development on Rental Occupancy Rates

The proposed subject will be a LIHTC development designated as housing for older persons ages 55 years and older. The complex will offer 80 one-bedroom units at 50 and 60 percent of the area median income. All of the market area's developments maintain stabilized occupancy and all affordable developments maintain lengthy waiting lists. Therefore, there is a larger amount of pent-up demand. The subject is a proposed new construction development; therefore, it will be superior in condition to the majority of the market area's housing stock. In addition, there also appears to a shortage of affordable housing designated for older persons ages 55 years and older. Based on the information verified and included within this analysis, it appears that the occupancy rates in the area will remain stable and rental rates will increase slightly within the next two years. Therefore, the rehabilitation of the development will not negatively impact on the vacancy rate or rental rates in the market area.

Foreclosure/Abandoned/Vacant Housing

According to **www.realtytrac.com**, there are currently eight properties for sale that are in some stage of foreclosure within the subject's zip code. In March 2021, the number of properties that received a foreclosure filing in zip code 30291 was similar to the previous month and 57.1 percent lower than the same time last year. The zip code's foreclosure rate is less than 0.01 percent, and the City of Union City's foreclosure rate is also less than 0.01 percent. Both are similar to the state's foreclosure rate which is also less than 0.01 percent. Therefore, it appears that the foreclosure rate in the area is declining. There are no known properties within the vicinity of the property that have been foreclosed upon. In addition, there are no known negative factors impacting the occupancy of the subject within the market area.

Primary Housing Voids

There are no significant housing voids in the market area. There is sufficient demand for the proposed housing in the market area as can be seen in the demand portion of this report.

ABSORPTION & STABILIZATION RATES

Absorption Rates

The proposed subject will be a LIHTC development designated as housing for older persons ages 55 years and older. The complex will offer 80 one-bedroom units at 50 and 60 percent of the area median income. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed subject property will satisfy a portion of the demand for senior units within the market. Based on information concerning the vacancy rates and amount of time it takes to fill vacancies, if the subject were unoccupied, it is estimated that a 95 percent occupancy level can be achieved in five to six months. Interviews with apartment managers substantiate the absorption rate. It is believed that the proposed development will absorb 14 to 16 units per month; therefore, it would reach a stable occupancy level within six months.

INTERVIEWS

Local Interviews

Housing Interview

According to Tracy D. Jones, Vice President of the Atlanta Housing Authority, the authority has 20,301 total vouchers which is a combination of Housing Choice (tenant-based) and Home-Flex (project-based) vouchers. Approximately 4,500 vouchers have not been allocated; however, are planned in the coming fiscal years. The authority has 24,400 applicants on the waiting list; however, the waiting list is currently closed and will not re-open for at least five years. Approximately 60 households leave the HCVP per month due to program terminations, voluntary relinquishment or deceased tenants. Ms. Jones indicated there is high demand for one- and two-bedroom units in the city. The telephone number for Tracy D. Jones with the Atlanta Housing Authority is 404-817-7445.

Fulton County Economic Development Department

According to the Fulton County Economic Development Department, employment in the healthcare industry continued to grow dramatically, outpacing overall employment growth in the region. Since 2014, the industry has added over 40,000 jobs, expanding employment by 19 percent. This growth was led by the General Medical and Surgical Hospitals and Offices of Physicians (Except Mental Health Specialists) sectors, which both added over 14,000 jobs. The Home Health Care Services grew rapidly over this period as well, expanding employment by 19 percent, or over 2,000 jobs. Between 2014 and 2019, the Information Technology industry added over 8,000 jobs, expanding employment by 10 percent. The Transportation and Logistics industry has expanded employment over the past five years, adding over 26,000 jobs since 2014, expanding employment by 20 percent. Over the next five years, the Metro Atlanta Region is projected to add over 61,000 jobs. Additional new and expanding business include, but are not limited to, the following:

- A new ALDI is coming to the City of Union City and is expected to be complete by 2022.
- Microsoft announced it will select Fulton County for the company's \$850 expansion that includes a new data center.
- Boston Consulting Group, a management consulting firm, announced it will invest \$18 million into expanding the company's Atlanta Business Service Center, adding an additional 331 jobs for the area.
- Kainos, a global digital technology company will invest \$1.2 million in opening a North America sales and IT hub in Fulton County, creating 137 new jobs.
- Better Up Foods will invest up to \$34 million to expand its current product offering, creating 162 new jobs.

The phone number for the Fulton County Economic Development Department is 404-612-4000.

Community Development Department

According to Ellis Still, the subject site is zoned PUD, Planned Unit Development District. She stated that the proposed development would be of a legal and conforming use. She stated there is no limit to the number of building permits that can be issued annually. Ms. Still noted that the land to the north and of the subject site is also zoned PUD, Planned Unit Development Department, the land to the west is zoned RM, Residential Multifamily District, and to the south the land is zoned O-I, Office-Institutional District. Ms. Still also reported there has been one recent development recently approved. Buffington Road Phase II will be a market-rate development containing a total of 156 units. She further stated there have been no recent affordable developments constructed. The phone number for the Community Development Department is 404-620-9700.

CONCLUSIONS AND RECOMMENDATIONS

Project Evaluation

It is the opinion of the analyst that the proposed improvements, the proposed unit mix of one-bedroom units, the proposed unit size, the proposed unit/project amenities and services will be well suited for the primary market area.

Site Evaluation

The subject site is located along Red Oak Road, and contains approximately 8.00 acres, or 348,480 square feet. Of the total 8.00 acres, approximately 4.48 acres will be allocated for the subject. The remaining 3.52 acres will be later developed as a Phase II and III of the proposed subject. The subject property is currently zoned PUD, Planned Unit Development. The subject will be a legal, conforming use. Red Oak Road connects to Lester Road, which then connects to Jonesboro Road, a major thoroughfare in the city. Therefore, it is the opinion of the analyst that there is good visibility/access to the site.

Economic and Demographic Profile

The following describes the demographic and economic profile of the primary market area and the surrounding area:

In 2000, this geographic market area contained an estimated population of 47,483. By 2010, population in this market area had decreased by 66.8 percent to 79,188. In 2021, the population in this market area had increased by 28.3 percent to 101,591. It is projected that between 2021 and 2023, population in the market area will increase 3.2 percent to 104,826. It is projected that between 2023 and 2026, population in the market area will increase 4.8 percent to 109,678.

In 2010, this geographic market area contained an estimated housing for older persons person ages 55 years and older population of 13,316. By 2021, this population increased 59.3 percent to 21,213. It is estimated that the market area will increase to 25,599, or by 20.7 percent, by 2026 in the same age group.

Between 2000 and 2010, the market area gained 1,203 households per year. The market area gained an additional 759 households between 2010 and 2021 and an additional 604 households per year between 2021 and 2023. The market area is projected to continue to gain households through 2026.

In 2021, this geographic market area contained 10,018 households ages 55 years and older. Of the total 10,018 senior households, 4,094, or 40.9 percent, are renter households. The market area is expected to gain an additional 5,028 households ages 55 years and older through 2026. Of the total 5,028 senior households to be gained, 696, or 31.8 percent, are renter households. This equates to a gain of 139 older persons ages 55 years households per year.

Of the surveyed comparables, one-bedroom units typically range from \$480 to \$1,251 per month. These rental rates have remained similar within the past few years.

The economy of the market area is based on transportation, communication and utilities; educational, health and social services; and entertainment and recreation sectors. Each of these categories has experienced reasonable growth within the past few years.

Employment in Fulton County has been increasing an average of 1.2 percent per year since 2005. Employment in the State of Georgia has been increasing an average of 0.6 percent per year since 2005. These fluctuations are similar to the unemployment rates for Fulton County and the State of Georgia.

An ongoing worldwide pandemic called COVID-19 is wreaking havoc on the economy of much of the United States. The first case of COVID-19 was diagnosed in the United States on January 21, 2020, in the State of Washington. Since that date, COVID-19 spread rapidly throughout the U.S. On March 19, 2020, the government advised against gatherings of more than 10 people. Additionally, state and local authorities have made the decision to prohibit large-scale gatherings. Also, many cities and most states

Gill Group | *Promises Kept. Deadlines Met.* Page | 134

have imposed lockdown measures of different scope and severity in order to attempt to contain the number of people infected. These lockdown measures have placed limits on where people can travel, work and shop away from their homes. These measures have had a significant impact on the economic conditions in cities and counties throughout the country.

Georgia's Governor Brian Kemp issued a "stay at home" order on April 2, 2020. The order applies to all Georgia residents and visitors and was effective until April 30, 2020. On April 24th, the governor announced that businesses such as gyms, fitness centers, bowling alleys, body art studios, barbers, cosmetologists, hair designers, nail care artists, estheticians and their schools and massage therapists could begin reopening. The businesses are all held to specific restriction including adherence to the minimal basic operations, social distancing and regular sanitation.

According to the Fulton County Economic Development Department, employment in the healthcare industry continued to grow dramatically, outpacing overall employment growth in the region. Since 2014, the industry has added over 40,000 jobs, expanding employment by 19 percent. This growth was led by the General Medical and Surgical Hospitals and Offices of Physicians (Except Mental Health Specialists) sectors, which both added over 14,000 jobs. The Home Health Care Services grew rapidly over this period as well, expanding employment by 19 percent, or over 2,000 jobs. Between 2014 and 2019, the Information Technology industry added over 8,000 jobs, expanding employment by 10 percent. The Transportation and Logistics industry has expanded employment over the past five years, adding over 26,000 jobs since 2014, expanding employment by 20 percent. Over the next five years, the Metro Atlanta Region is projected to add over 61,000 jobs. Additional new and expanding business include, but are not limited to, the following:

- A new ALDI is coming to the City of Union City and is expected to be complete by 2022.
- Microsoft announced it will select Fulton County for the company's \$850 expansion that includes a new data center.
- Boston Consulting Group, a management consulting firm, announced it will invest \$18 million into expanding the company's Atlanta Business Service Center, adding an additional 331 jobs for the area.
- Kainos, a global digital technology company will invest \$1.2 million in opening a North America sales and IT hub in Fulton County, creating 137 new jobs.
- Better Up Foods will invest up to \$34 million to expand its current product offering, creating 162 new jobs.

There have been seven W.A.R.N. notices in the market area since 2019. is estimated that approximately 79 percent of the W.A.R.N. notices were issued after the onset of the COVID-19 pandemic.

| W.A.R.N. NOTICES | | | | | | | |
|---|------------|----------------|-------------|--|--|--|--|

Source: Georgia Department of Labor

Currently, the effects of COVID-19 appear to be minor as expansion projects are still-ongoing or are still proposed. Therefore, it is anticipated that the economic growth within the city will remain stable. Therefore, there are no anticipated changes in the economic growth of the market area.

Existing Housing

There was a total of 17 confirmed apartment complexes in the market area. There were 48 vacant units at the time of the survey out of 3,193 surveyed, for an overall vacancy rate of 1.5 percent. Of the surveyed restricted comparables, only one restricted development is designated for housing for older persons and will compete directly with the subject's units. Woodbridge at Parkway Village is a Section 8 and LIHTC development designed for older persons ages 62 years and older. The complex is 99 percent occupied and maintains a one-year waiting list. The proeprty offers 92 one-bedroom units and 58 two-bedroom units. Therefore, the complex's 92 one-bedroom units will directly compete with the proposed subject. The subject's proposed amenities and unit sizes will be similar to the restricted comparables surveyed. Therefore, it is believed the proposed subject will be competitive within the market area.

There are five family developments in the market area that were considered comparable with the subject; however, will not directly compete. However, due to the lack of senior developments in the market area, the family developments were utilized within the report for comparison purposes. Of the total six restricted comparables, one-bedroom rents range from \$480 to \$1,100 per month. The average market rent for the one-bedroom units in the restricted developments is \$857; however, the majority of the properties are of older construction. The subject's proposed rents are slightly higher the determined average market rent; however, its proposed rents are within this competitive range. In addition, the proposed proeprty will be superior in condition once construction is complete. Therefore, the subject's proposed rental rate will be competitive with the restricted developments in the market area.

Adjusted Market Rental Rates

The subject's proposed rents are below the achievable unrestricted market rents determined on the rent grids. Furthermore, the proposed rents are in line with the maximum allowable LIHTC rents. In addition, the subject will be newly constructed and will be in good condition. Due to the lack of newer conventional properties in the market area, it was necessary to utilize older construction developments in the rent analysis. Therefore, the proposed rents were considered achievable.

Average Rents for Competing Properties and Rent Advantage

There are 11 market developments in the market area that were considered comparable with the proposed subject. Of these 11 comparables, one-bedroom rents range from \$775 to \$1,251. The average market rent for one-bedroom units in these developments is \$964. The subject's proposed rents are slightly higher determined average market rent; however, its proposed rents are within this competitive range.

| | Unit Type | % of AMI | Proposed Rent | Market Rent | \$ Rent Advantage | % Rent Advantage |
|---|-----------|----------|----------------------|-------------|-------------------|------------------|
| 1 | /1 | 50% | \$775 | \$1,130 | \$355 | 31.4% |
| 1 | /1 | 60% | \$930 | \$1,130 | \$200 | 17.7% |

The subject's one-bedroom rent advantage for units at 50% AMI is 31.4 percent (\$1,130 - \$775 = \$355/ \$1,130 = 31.4%).

The subject's one-bedroom rent advantage for units at 60% AMI is 17.7 percent (\$1,130 - \$930 = \$200/ \$1,130 = 17.7%).

Project-Specific Affordability and Demand Analysis

The following table uses a 40 percent lease rent-to-income to determine the minimum target income required for each LIHTC unit and the tax credit income limits to determine the upper range of eligibility for each LIHTC unit. The following table lists the number of households within the required target income for each unit type.

| INCOME-ELIGIBLE 55+ RENTER HOUSEHOLDS | | | | | | | | |
|---|-------|----------|----------|-------|-----|--|--|--|
| Gross Rent Lower Range Upper Range % Income Income-Elig Qualified Househol | | | | | | | | |
| All Unit Types (All) | \$775 | \$23,250 | \$41,400 | 18.5% | 756 | | | |
| All Unit Types (50%) | \$775 | \$23,250 | \$33,100 | 12.6% | 514 | | | |
| All Unit Types (60%) | \$930 | \$27,900 | \$39,720 | 9.3% | 381 | | | |

The following chart indicates the net demand and the capture rates:

| AMI | Unit Type | # Units Proposed | Total Demand | Supply | Net Demand | Capture Rate | Avg. Market Rent | Market Rents Band | Proposed Rent |
|----------------------|-----------|---------------------|-----------------|--------|------------|--------------|---------------------|----------------------|---------------|
| 50% AMI | 1 BR | 16 | 687 | 0 | 687 | 2.3% | \$1,130 | N/A | \$775 |
| 60% AMI | 1 BR | 64 | 605 | 0 | 605 | 10.6% | \$1,130 | N/A | \$930 |
| TOTAL for | 50% AMI | 16 | 687 | 0 | 687 | 2.3% | \$1,130 | N/A | \$775 |
| Project | 60% AMI | 64 | 605 | 0 | 605 | 10.6% | \$1,130 | N/A | \$930 |
| TOTAL for Project | 1/1 | 80 | 992 | 0 | 992 | 8.1% | \$1,130 | N/A | \$775-\$930 |

The subject is a proposed LIHTC senior property that is applying for tax credits at 50 and 60 percent of the area median income. The capture rate analysis indicated that the subject would need to capture 8.1 percent of all older person ages 55 years and older households in the market area. The capture rate is acceptable. In addition, there is a large amount of pent-up demand in the market area as indicated by the lengthy waiting lists and high occupancy rates of the affordable developments surveyed. Furthermore, the subject's proposed rents are below the unrestricted achievable market rent and the determined average market rents. Therefore, it is believed the subject will be a great asset to the area and will be viable in the market area.

Absorption Rates

After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed subject property will satisfy a portion of the demand for senior units within the market. Based on information concerning the vacancy rates and amount of time it takes to fill vacancies, if the subject were unoccupied, it is estimated that a 95 percent occupancy level can be achieved in five to six months. Interviews with apartment managers substantiate the absorption rate. It is believed that the proposed development will absorb 14 to 16 units per month; therefore, it would reach a stable occupancy level within six months.

Conclusion

The subject is a proposed LIHTC senior development that will be designated as housing for older persons ages 55 years and older set at 50 and 60 percent of the area median income. The majority of the market area's developments maintain stabilized occupancy, and the majority of the affordable developments maintain lengthy waiting lists. The subject will be newly constructed; therefore, it will be superior in condition to the majority of the market area's housing stock. There also appears to a shortage of affordable housing in the market designated for housing for older persons. Therefore, it is believed that the proposed subject will be a great asset to the area and will be a viable development.

Data Sources

Information used in the market study was obtained from various sources including; the U.S. Census Bureau; Ribbon Demographics, 2021 Data; U.S. Bureau of Labor Statistics; interviews with local town and government officials; and interview with local property owners or managers.

SIGNED STATEMENT REQUIREMENTS

I affirm that I have made a physical inspection of the market area and the subject property and that information has been used in the full study of the need and demand for the rehabilitated units. The report was written according to DCA's market study requirements, the information included is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

DCA may rely on the representation made in the market study provided. The document is assignable to other lenders that are parties to the DCA loan transaction.

ADDENDUM B – MARKET STUDY TERMINOLOGY

Absorption Period

The period of time necessary for a newly constructed or renovated property to achieve the Stabilized Level of Occupancy. The Absorption Period begins when the first certificate of occupancy is issued and ends when the last unit to reach the Stabilized Level of Occupancy has a signed lease. Assumes a typical pre-marketing period, prior to the issuance of the certificate of occupancy, of about three to six months. The month that leasing is assumed to begin should accompany all absorption estimates.

Absorption Rate

The average number of units rented each month during the Absorption Period.

Acceptable Rent Burden

The rent-to-income ratio used to qualify tenants for both income restricted and non-income restricted units. The Acceptable Rent Burden varies depending on the requirements of funding sources, government funding sources, target markets, and local conditions.

Affordable Housing

Housing where the tenant household pays no more than 30 percent of its annual income on Gross Rent.

Amenity

Tangible or intangible benefits offered to a tenant at no fee, typically on-site recreational facilities or planned programs, services and activities.

Annual Demand

The total estimated demand present in the market in any one year for the type of units proposed.

Area Median Income (AMI)

One-hundred percent of the gross median household income for a specific metropolitan statistical area, county or non-metropolitan area established annually by HUD.

Assisted Housing

Housing where the monthly costs to the tenants are subsidized by federal, state or other programs.

Attached Housing

Two or more dwelling units connected with party walls (e.g. townhouses or flats).

Basic Rent

The minimum monthly rent that tenants who do not have rental assistance pay to lease units developed through the USDA-RD Section 515 Program, the HUD Section 236 Program and HUD Section 223 (d)(3) Below Market Interest Rate Program. The Basic Rent is calculated on the rent as the amount of rent required to operate the property, maintain debt service on a subsidized mortgage with a below-market interest rate, and provide a return on equity to the developer in accordance with the regulatory documents governing the property.

Below Market Interest Rate Program (BMIR)

Program targeted to renters with income not exceeding 80 percent of area median income by limiting rents based on HUD's BMIR Program requirements and through the provision of an interest reduction contract to subsidize the market interest rate to a below-market rate. Interest rates are typically subsidized to effective rates of one percent or three percent.

Capture Rate

The percentage of age, size, and income qualified renter households in the Primary Market Area that the property must capture to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. The Capture Rate is calculated by dividing the total number of units at the property by the total number of age, size and income qualified renter households in the Primary Market Area. See Penetration Rate for rate for entire market area.

Census Tract

A small, relatively permanent statistical subdivision delineated by a local committee of census data users for the purpose of presenting data. Census tract boundaries normally follow visible features but may follow governmental unit boundaries and other non-visible features; they always nest within counties. They are designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions at the time of establishment. Census tracts average about 4,000 inhabitants.

Central Business District (CBD)

The center of commercial activity within a town or city; usually the largest and oldest concentration of such activity.

Community Development Corporation (CDC)

Entrepreneurial institution combining public and private resources to aid in the development of socioeconomically disadvantaged areas.

Comparable Property

A property that is representative of the rental housing choices of the subject's Primary Market Area and that is similar in construction, size, amenities, or age. These Comparables and Competitives are generally used to derive market rent.

Competitive Property

A property that is comparable to the subject and that competes at nearly the same rent levels and tenant profile, such as age, family or income.

Concession

Discount given to a prospective tenant to induce the tenant to sign a lease. Concessions typically are in the form of reduced rent or free rent for a specified lease term or for free amenities which are normally charged separately (i.e. washer/dryer, parking).

Condominium

A form of joint ownership and control of property in which specified volumes of space (for example, apartments) are owned individually while the common elements of the property (for example, outside walls) are owned jointly.

Contract Rent

- 1. The actual monthly rent payable by the tenant, including any rent subsidy paid on behalf of the tenants, to the owner, inclusive of all terms of the lease (HUD & RD).
- 2. The monthly rent agreed to between a tenant and a landlord (Census).

Demand

The total number of households in a defined market area that would potentially move into proposed new or renovated housing units. These households must be of the appropriate age, income, tenure and size for a specific proposed development. Components of demand vary and can include household growth; turnover, those living in substandard conditions, rent over-burdened households, and demolished housing units. Demand is project specific.

Difficult Development Area (DDA)

An area designated by HUD as an area that has high construction, land, and utility costs relative to the Area Median Gross Income. A project located in a DDA and utilizing the Low Income Housing Tax Credit may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Detached Housing

A freestanding dwelling unit, typically single-family, situated on its own lot.

Effective Rents

Contract Rent less concessions.

Elderly or Senior Housing

Housing where (1) all the units in the property are restricted for occupancy by persons 62 years of age or older or (2) at least 80 percent of the units in each building are restricted for occupancy by households where at least one household member is 55 years of age or older and the housing is designed with amenities and facilities designed to meet the needs of senior citizens.

Extremely Low Income

Person or household with income below 30 percent of Area Median Income adjusted for household size.

Fair Market Rent (FMR)

The estimates established by HUD of the Gross Rents (Contract Rent plus Tenant Paid Utilities) needed to obtain modest rental units in acceptable condition in a specific county or metropolitan statistical area. HUD generally sets FMR so that 40 percent of the rental units have rents below the FMR. In rental markets with a shortage of lower priced rental units HUD may approve the use of Fair Market Rents that are as high as the 50th percentile of rents.

Garden Apartments

Apartments in low-rise buildings (typically two to four stories) that feature low density, ample open-space around the buildings, and on-site parking.

Gross Rent

The monthly housing cost to a tenant which equals the Contract Rent provided for in the lease plus the estimated cost of all Tenant Paid Utilities.

High-rise

A residential building having more than ten stories.

Household

One or more people who occupy a housing unit as their usual place of residence.

Household Trends

Changes in the number of households for a particular area over a specific period of time, which is a function of new household formations (e.g. at marriage or separation) and in average household size.

Housing Unit

House, apartment, mobile home, or group of rooms used as a separate living quarters by a single household.

Housing Choice Voucher (Section 8 Program)

Federal rent subsidy program under Section 8 of the U.S. Housing Act which issues rent vouchers to eligible households to use in the housing of their choice. The voucher payment subsidizes the difference between the Gross Rent and the tenant's contribution of 30 percent of adjusted income (or 10 percent of gross income, whichever is greater). In cases where 30 percent of the tenants' income is less than the utility allowance, the tenant will receive an assistance payment. In other cases, the tenant is responsible for paying his share of the rent each month.

Housing Finance Agency (HFA)

State or local agencies responsible for financing housing and administering Assisted Housing programs.

HUD Section 8 Program

Federal program that provides project based rental assistance. Under the program HUD contracts directly with the owner for the payment of the difference between the Contract Rent and a specified percentage of tenants adjusted income.

HUD Section 202 Program

Federal program, which provides direct capital assistance (i.e. grant) and operating or rental assistance to finance housing designed for occupancy by elderly households who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization. Units receive HUD project based rental assistance that enables tenants to occupy units at rents based on 30 percent of tenant income.

HUD Section 811 Program

Federal program, which provides direct capital assistance and operating or rental assistance to finance housing designed for occupancy by persons with disabilities who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization.

HUD Section 236 Program

Federal program which provides interest reduction payments for loans which finance housing targeted to households with income not exceeding 80 percent of area median income who pay rent equal to the greater of Basic Rent of 30 percent of their adjusted income. All rents are capped at a HUD approved market rent.

Income Band

The range of incomes of households that can pay a specific rent but do not have more income than is allowed by the Income Limits of a particular housing program. The minimum household income typically is based on a defined Acceptable Rent Burden percentage and the maximum typically is pre-defined by specific programmatic requirements or by general market parameters.

Income Limits

Maximum household income by county or Metropolitan Statistical Area, adjusted for household size and expressed as a percentage of the Area Median Income for the purpose of establishing an upper limit for eligibility for a specific housing program. Income Limits for federal, state and local rental housing programs typically are established at 30, 50, 60 or 80 percent of AMI. HUD publishes Income Limits each year for 30 percent median, Very Low Income (50%), and Low-Income (80%), for households with 1 through 8 people.

Infrastructure

Services and facilities including roads, highways, water, sewerage, emergency services, parks and recreation, etc. Infrastructure includes both public and private facilities.

Low Income

Person or household with gross household income below 80 percent of Area Median Income adjusted for household size.

Low Income Housing Tax Credit

A program to generate equity for investment in affordable rental housing authorized pursuant to Section 42 of the Internal Revenue Code, as amended. The program requires that a certain percentage of units built by restricted for occupancy to households earning 60 percent of less of Area Median Income, and that the rents on these units be restricted accordingly.

Low Rise Building

A building with one to three stories.

Market Advantage

The difference, expressed as a percentage, between the estimated market rent for an apartment property without income restrictions and the lesser of (a) the owner's proposed rents or (b) the maximum rents permitted by the financing program for the same apartment property.

Market Analysis

A study of real estate market conditions for a specific type of property.

Market Area or Primary Market Area

A geographic area from which a property is expected to draw the majority of its residents.

Market Demand

The total number of households in a defined market area that would potentially move into new or renovated housing units. Market demand is not project specific and refers to the universe of tenure appropriate households, independent of income. The components of market demand are similar to those used in determining demand.

Market Rent

The rent that an apartment, without rent or income restrictions or rent subsidies, would command in the open market considering its location, features, amenities. Market rent should be adjusted for concessions and owner paid utilities included in the rent.

Market Study

A comprehensive review of the housing market in a defined market area. A market study can be used to determine the demand for specific proposed development or to examine the overall condition of an area's housing market. Project specific market studies are often used by developers, syndicators, and government entities to determine the appropriateness of a proposed development, whereas market specific market studies are used to determine what housing needs, if any, exist within a specific geography. At a minimum, market studies include a review of location, economic conditions, demographics, and existing and proposed housing stock.

Marketability

The manner in which the subject fits into the market; the relative desirability of a property (for sale or lease) in comparison with similar or competing properties in the area.

Market Vacancy Rate – Physical

Average number of apartment units in any market which are unoccupied divided by the total number of apartment units in the same Market Area, excluding units in properties which are in the lease-up stage.

Market Vacancy Rate – Economic

Percentage of rent loss due to concessions and vacancies.

Metropolitan Statistical Area (MSA)

A geographic entity defined by the federal Office of Management and Budget, for use by federal statistical agencies, based on the concept of a core area with a large population nucleus, plus adjacent communities having a high degree of economic and social integration with that core. Qualification of an MSA requires the presence of a city with 50,000 or more inhabitants, or the presence of an Urbanized Area (UA) and a total population of at least 100,000 (75,000 in New England). The county or counties containing the largest city and surrounding densely settled territory are central counties of the MSA. Additional outlying counties qualify to be included in the MSA by meeting certain other criteria of metropolitan character, such as a specified minimum population density or percentage of the population that is urban.

Mid-rise

A building with four to ten stories.

Mixed Income Property

An apartment property containing (1) both income restricted and unrestricted units or (2) units restricted at two or more Income Limits (i.e. Low Income Tax Credit property with income limits of 30, 50 and 60 percent).

Mobility

The ease with which people move from one location to another.

Moderate Income

Person or household with gross household income between 80 and 120 percent of Area Median Income adjusted for household size.

Move-up Demand

An estimate of how many consumers are able and willing to relocate to more expensive or desirable units, such as tenants who move up from Class C properties to Class B; and Class B tenants that move up to Class A properties; and tenants that move from Class C and B properties to a new superior Low Income Tax Credit property.

Multifamily

Structures that contain more than two or more housing units.

Neighborhood

An area of a city or town with common demographic and economic features that distinguish it from adjoining areas.

Net Rent (also referred to as Contract or Lease Rent)

Gross Rent less Tenant Paid Utilities.

Penetration Rate

The percentage of age and income qualified renter households in the Primary Market Area that live in all existing and proposed properties, to be completed within six months of the subject, and which are competitively priced to the subject that must be captured to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. See Capture Rate for property specific rate.

Pent-up Demand

A market in which there is a scarcity of supply and vacancy rates are very low.

Population Trends

Changes in population levels for a particular area over a specific period of time – which is a function of the levels of births, deaths, and net migration.

Primary Market Area

See Market Area

Programmatic Rents

The proposed rents for a Tax Credit or other income restricted property relative to comparable market rate properties and rents being achieved at another Low Income Housing Tax Credit or other income restricted properties in the market. Can be no greater than maximum rents permitted by the Low Income Housing Tax Credit or other program regulations.

Project Based Rent Assistance

Rental assistance from a federal, state or local program that is allocated to the property or a specific number of units in the property and is available to each income eligible tenant of the property or an assisted unit.

Public Housing or Low Income Conventional Public Housing

HUD program administered by local (or regional) Housing Authorities which serves Low- and Very-Low Income Households with rent based on the same formula used for HUD Section 8 assistance.

Qualified Census Tract (QCT)

Any census tract (or equivalent geographic area defined by the Bureau of the Census) in which at least 50 percent of households have an income less than 60 percent of Area Median Income or where the poverty rate is at least 25 percent. A project located in a QCT and receiving Low Income Housing Tax Credits may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

Rural Development (RD) Market Rent

A monthly rent that can be charged for an apartment under a specific USDA-RD housing program, that reflects the agency's estimate of the rent required to operate the property, maintain debt service on an un-subsidized mortgage and provide an adequate return to the property owner. This rent is the maximum rent that a tenant can pay at an RD property.

Rural Development (RD) Program

Federal program which provides low interest loans to finance housing which serves low- and moderateincome persons in rural areas who pay 30 percent of their adjusted income on rent or the basic rent, whichever is the higher (but not exceeding the market rent). The Program may include property based rental assistance and interest reduction contracts to write down the interest on the loan to as low as one percent.

Redevelopment

The redesign or rehabilitation of existing properties.

Rent Burden

Gross rent divided by gross monthly household income.

Rent Burdened Households

Households with Rent Burden above the level determined by the lender, investor, or public program to be an acceptable rent-to-income ratio.

Restricted Rent

The rent charged under the restrictions of a specific housing program or subsidy.

Saturation

The point at which there is no longer demand to support additional units.

Secondary Market Area

The portion of a market area that supplies additional support to an apartment property beyond that provided by the Primary Market Area.

Single-Family Housing

A dwelling unit, either attached or detached, designed for use by one household and with direct access to a street. It does not share heating facilities or other essential building facilities with any other dwelling.

Special Needs Population

Specific market niche that is typically not catered to in a conventional apartment property. This population should exhibit certain criteria, which can be well defined, in order, for example, to assess the need and demand from this source. Examples of special needs populations include substance abusers, visually impaired person or persons with mobility limitations.

Stabilized Level of Occupancy

The underwritten or actual number of occupied units that a property is expected to maintain after the initial rent-up period, expressed as a percentage of the total units.

State Date Center (SDC)

A state agency or university facility identified by the governor of each state to participate in the Census Bureau's cooperative network for the dissemination of the census data.

Subsidy

Monthly income received by a tenant or by an owner on behalf of a tenant to pay the difference between the apartment's Contract Rent and the amount paid by the tenant toward rent.

Substandard Conditions

Housing conditions that are conventionally considered unacceptable which may be defined in terms of lacking plumbing facilities, one or more major systems not functioning properly, or overcrowded conditions.

Target Income Band

The Income Band from which the subject property will draw tenants.

Target Population

Market niche a development will appeal or cater to. State agencies often use Target Population to refer to various income set asides, elderly v. family, etc.

Tenant

One who rents real property from another.

Tenant Paid Utilities

The cost of utilities necessary for the habitation of a dwelling unit, which are paid by the tenant. Tenant Paid Utilities do not include costs for telephone or cable service.

Tenure

The distinction between owner-occupied and renter-occupied housing units.

Townhouse (or Row House)

Single-family attached residence separated from another by party walls, usually on a narrow lot offering small front and back-yards; also called a row house.

Turnover

- 1. An estimate of the number of housing units in a Market Area as a percentage of total housing units in the Market Area that will likely change occupants in any one year. See Vacancy Period.
- 2. **Turnover Period** The percent of occupants in a given apartment complex that move in one year.

Unmet Housing Need

New units required in the Market Area to accommodate household growth, homeless households, and housing in substandard conditions.

Unrestricted Rents

The recommended rents for the market rate units at a Mixed-Income Property.

Vacancy Period

The amount of time that an apartment remains vacant and available for rent.

Vacancy Rate – Economic

Maximum potential revenue less actual rent revenue divided by maximum potential rent revenue.

Vacancy Rate – Physical

The number of total habitable units that are vacant divided by the total number of units in the property.

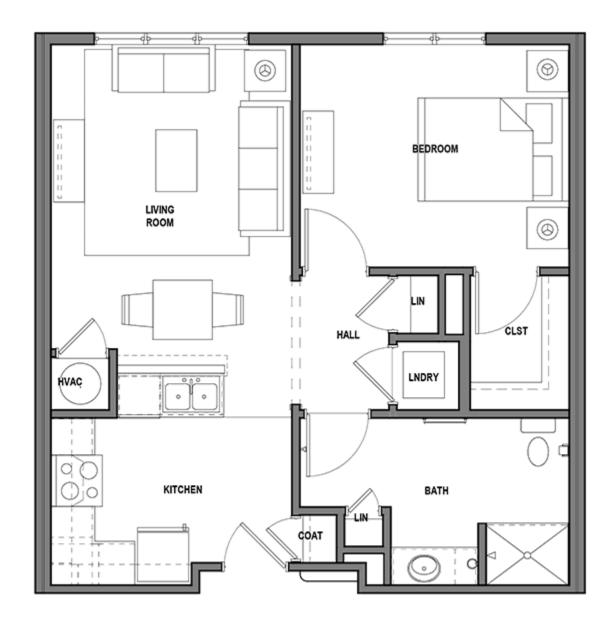

Very Low Income

Person or household whose gross household income does not exceed 50 percent of Area Median Income adjusted for household size.

Zoning

Classification and regulation of land by local governments according to use categories (zones); often also includes density designations.
