SECTION A

EXECUTIVE SUMMARY

1. Project Description:

• Brief description of project location including address and/or position relative to the closest cross-street.

- The proposed LIHTC/Market Rate apartment site is located off Union Road, .9 miles southwest of Downtown Hahira and .5 miles south of access to the I-75 exit 29 interchange.
- Construction and occupancy types.
- The proposed new construction development project design comprises two 2-story and one 3-story residential buildings. The development design provides for 112-parking spaces. The development will include a separate building to be used as a clubhouse/community room, central laundry, and a manager's office.
 The proposed Occupancy Type is for the General Population and is not age restricted.
- Unit mix including bedrooms, bathrooms, square footage, income targeting rents, utility allowance.

| PROPOSED PROJECT PARAMETERS | | | | | |
|-----------------------------|------------|--------------------------|-------------------------|--|--|
| Bedroom Mix | # of Units | Unit Size (Heated sf) | Unit Size (Gross sf) | | |
| 1BR/1b | 8 | 821 | 921 | | |
| 2BR/2b | 38 | 1060 | 1162 | | |
| 3BR/2b | 10 | 1243 | 1350 | | |
| Total | 56 | | | | |

<u>Project Mix</u>

Project Rents:

The proposed development will target approximately 27% of the units at 50% or below of area median income (AMI), approximately 62% of the units at 60% AMI and approximately 11% of the units at Market. Net rent includes trash removal.

| PROPOSED PROJECT RENTS @ 50% AMI | | | | |
|----------------------------------|------------|----------|-----------------------|------------|
| Bedroom Mix | # of Units | Net Rent | Utility Allowance* | Gross Rent |
| 1BR/1b | 2 | \$435 | \$97 | \$532 |
| 2BR/2b | 10 | \$530 | \$124 | \$654 |
| 3BR/2b | 3 | \$610 | \$154 | \$764 |

| PROPOSED PROJECT RENTS @ 60% AMI | | | | |
|----------------------------------|------------|----------|-----------------------|------------|
| Bedroom Mix | # of Units | Net Rent | Utility Allowance* | Gross Rent |
| 1BR/1b | 5 | \$555 | \$97 | \$652 |
| 2BR/2b | 24 | \$660 | \$124 | \$784 |
| 2BR/2b | 6 | \$745 | \$154 | \$899 |

*Based upon GA-DCA South Region Utility Allowances.

| PROPOSED PROJECT RENTS @ Market | | | | |
|---------------------------------|------------|----------|-----------------------|------------|
| Bedroom Mix | # of Units | Net Rent | Utility Allowance* | Gross Rent |
| 1BR/1b | 1 | \$700 | \$97 | \$797 |
| 2BR/2b | 4 | \$800 | \$124 | \$924 |
| 3BR/2b | 1 | \$900 | \$154 | \$1054 |

*Estimates used for establishing the lower income band at Market.

• Any additional subsidies available including project based rental assistance (PBRA).

• The proposed LIHTC/Market Rate development will not include any PBRA or other subsidies. The proposed LIHTC development will accept deep subsidy Section 8 vouchers.

• Brief description of proposed amenities and how they compare to existing properties.

• Overall, the subject will be competitive to very competitive with all of the existing program assisted and market rate apartment properties in the market regarding the unit and the development amenity package. The proposed project will have a comprehensive range of modern unit and project amenities appropriate for the general population. The amenity package will enhance the competitive position of the project compared to others in the PMA. <u>Note</u>: See list of Unit and Development Amenities on page 18.

2. Site Description/Evaluation:

- A brief description of physical features of the site and adjacent parcels. In addition, a brief overview of the neighborhood land composition (residential, commercial, industrial, agricultural).
- The approximately 7.518-acre, rectangular shaped tract is mostly densely wooded and relatively flat. At present, no physical structures are located on the tract. The buildable area of the site is not located within a 100year flood plain.
- The overall character of the neighborhood in the vicinity of the site can be defined predominantly as a mixture of residential and vacant land use.
- Directly north of the site is vacant land. Directly east of the site is a mixture of single-family use and the Webb Miller Park. Directly west of the site is Interstate 75. Directly south of the site is vacant land.
- A discussion of site access and visibility.
- Access to the site is available off Union Road. Union Road is a primary (north-south) connector in Hahira that links the site with GA 122 and eventually I-75 to the north. Union Road is a light to medium density traveled road, with a speed limit of 45 miles per hour in the immediate vicinity of the site. Also, the location of the site off Union Road does not present problems of egress and ingress to the site.
- The site offers very good accessibility and linkages to area services and facilities. The areas surrounding the site appeared to be void of negative externalities, including noxious odors, close proximity to high tension power lines, cemeteries, rail lines and junk yards.
- Any significant positive or negative aspects of the subject site.
- Overall, the field research revealed the following strengths and weaknesses of the subject in relation to subject marketability.

| SITE/SUBJECT ATTRIBUTES: | | |
|---|------------|--|
| STRENGTHS | WEAKNESSES | |
| Good accessibility to services, trade, and health care facilities | | |
| Good linkages to area road system | | |
| Nearby road speed and noise are acceptable | | |
| Surrounding land uses are acceptable | | |

- A brief summary of the site's proximity to neighborhood services including shopping, medical care, employment concentrations, public transportation, etc.
- Ready access is available from the site to major retail trade and service areas, employment opportunities, local health care providers, and area churches. All major facilities in the city can be accessed within a 5 minute drive. At the time of the market study, no significant infrastructure development was in progress within the immediate vicinity of the site.
- A brief discussion of public safety, including comments on local perceptions, maps, or statistics of crime in the area.
- Between 2016 and 2017 the number of violent crimes (homicide, rape, robbery and assault) in Lowndes County decreased by 63%, primarily due to the decrease in reported assaults.
- An overall conclusion of the site's appropriateness for the proposed development.
- The site location is considered to be very marketable. In the opinion of the analyst, the proposed site location offers attributes that will greatly enhance the rent-up process of the proposed LIHTC/Market Rate development.

3. *Market Area Definition*:

- A brief definition of the primary market area including boundaries of the market area and their approximate distance from the subject property.
- The Primary Market Area (PMA) for the proposed multifamily development consists of the following 2020 census tracts in Lowndes and Brooks Counties:

Lowndes County: CT's 101.01, 101.02, 101.03, 102.01, 102.03, 102.04, 103.01 and 103.02

Brooks County: CT 9603.01 and 9603.02

| Direction | Boundary | Distance from Subject Site |
|-----------|------------------------------------|-------------------------------|
| North | Cook, Colquitt and Lanier Counties | 2 miles |
| East | Lanier County & US 221 | 15 miles |
| South | City of Valdosta and Quitman PMA | 12 miles |
| West | remainder of Brooks County | 12 miles |

The PMA is bounded as follows:

4. Community Demographic Data:

- Current and projected household and population counts for the primary market area. For senior reports, data should be presented for both overall and senior households and populations/households.
- Gains in both population and households are forecasted for the PMA over the next two years, (2022-2024). In 2022 the total population count was 46,876 with a projected increase to 47,787 in 2024, representing an average annual increase of +0.97%.
- The total household count in the PMA was 16,990 in 2022, with a projected increase to 17,363 in 2024. This represents an increase of +1.07% per year.
- Households by tenure including any trends in rental rates.
- The 2022 to 2024 tenure trend revealed an increase in both owner-occupied and renter-occupied households in the PMA. The tenure trend (on a percentage basis) favors owner-occupied households.
- Based upon recent past rental trends a reasonable two year rent increase forecast by bedroom type would be 7% to 10% per year within the subject PMA.
- A reasonable two year forecast for occupancy rates in the PMA apartment market would be around 98% to 99%.
- Households by income level.
- It is projected that in 2024 approximately **19**% of the renter-occupied households in the PMA will be in the subject's 50% AMI LIHTC target income group of \$18,240 to \$34,250.
- It is projected that in 2024 approximately **24%** of the renter-occupied households in the PMA will be in the subject's 60% AMI LIHTC target income group of \$22,355 to \$41,100.
- It is projected that in 2024 approximately **34.5**% of the renter-occupied households in the PMA will be in the subject's Market Rate target income group of \$41,000 to \$100,000.

• Impact of foreclosed, abandoned and vacant, single and multi-family homes, and commercial properties in the PMA of the proposed development should be discussed.

- The number of foreclosures dropped dramatically nationwide during 2020, and remains very low in Hahira and the Union Station site area of Lowndes County. According to data from ATTOM Data Solutions (parent company of <u>www.realtytrac.com</u>), during 2021 there were 151,153 foreclosures nationwide, down 29% compared to 2020, down 95% from a peak of nearly 2.9 million in 2010. However, there was an uptick in foreclosures in January 2022, with 23,204 filings.
- Data for Zip Code 31632 (which includes Hahira, the site and the immediate surrounding area) show only 3 properties in foreclosure.
- In the site neighborhood and the surrounding area the relationship between the local area foreclosure market and existing LIHTC supply is not crystal clear. However, at the time of the survey, the existing LIHTC properties located within the PMA were 100% occupied, and all maintained a waiting list. In addition, given the somewhat small number of foreclosures in this PMA, it can be assumed that foreclosures have little effect on demand and occupancy in LIHTC properties.
- <u>Note</u>: Recent anecdotal news information points to the fact that the majority of the foreclosed problem that remains is concentrated in metro markets more so than in suburban, semi-urban and rural markets. Based upon available data at the time of the survey, the site area does not appear to be one of the housing markets that have been placed in jeopardy due to the recent and still on-going foreclosures phenomenon.

- 5. Economic Data:
 - Trends in employment for the county and/or region. Employment should be based on the number of jobs in the county (i.e., covered employment).
 - Covered (at place) employment in Lowndes County increased in two out of three years between 2017 and 2020. Covered employment decreased significantly in 2020. The 2021 trend in covered employment over the last three quarters suggests an overall increase in covered employment for Lowndes County in 2021.
 - Employment by sector for the county and/or region.
 - The top four employment sectors are manufacturing, trade, government and service. The 2022 forecast is for the healthcare sector to increase and the manufacturing sector to stabilize.
 - Unemployment trends for the county and/or region for the past 5 years.
 - The rate of employment loss between 2008 and 2010 was significant at -10.52%, representing a net decrease of -5,423 workers. The rate of employment gain between 2011 and 2018 was significant at approximately +0.95% per year. The 2019 to 2020 rate of loss was very significant at -2.68%, represented by a decrease of -1,336 workers. The 2020 to 2021 rate of gain was very significant at +2.33%, represented by an increase of +1,132 workers.
 - A brief discussion of any recent or planned major employment contractions or expansions.
 - The Valdosta-Lowndes Development Authority (VLCDA) is the lead economic development agency for all of Lowndes County. Despite the pandemic in 2020, there were 13 new and existing industry expansions in Valdosta-Lowndes County, representing \$31 million in capital investments and 215 jobs. By September 2021, the VLCDA had successfully completed a further six industry projects, representing \$92 million in capital investments and approximately 200 jobs.
 - Recent economic development news for Lowndes County of significance includes the following:
 - In January 2021, Governor Brian P. Kemp announced that Correct Craft, a leader in building tournament inboard, freshwater fishing, utility and recreational boats, will invest more than \$1.7 million in operating a manufacturing facility in Valdosta, delivering 90 jobs to Lowndes County. Correct Craft's Valdosta facility will produce wakeboarding and wake surfing boats under its Supreme Boats brand.

- In April 2021, Governor Brian P. Kemp announced that Bimbo QSR, a subsidiary of Mexican multinational company Grupo Bimbo, will invest more than \$25 million in opening a food processing facility in Valdosta, delivering 74 jobs to Lowndes County.
- In April 2021, the Valdosta-Lowndes Count Development Authority announced that Colonial Bag Company Inc., will expand their manufacturing and warehouse/distribution facility in Lake Park. This expansion represents a \$1 million investment and creation of 10 additional jobs.
- In May 2020, the VLCDA Board of Directors voted and approved the development agreement that benefits the growth of Bates Precast Concrete, Inc. The company will invest around \$5 million to build a new office and production building as well as increase their storage area to support production capacity and new product lines located in the Lake Park Industrial Park. An undisclosed number of new jobs will be created by the expansion.
- A review of the WARN lists for 2020, 2021, and YTD 2022 revealed no announcements of closures or layoffs for Hahira or Lowndes County in 2021 or thus far in 2022. In 2020, 2 businesses in Valdosta announced closures due to COVID-19, with loss of 70 jobs.
- An overall conclusion regarding the stability of the county's overall economic environment. This conclusion should include an opinion if the current economic environment will negatively impact the demand for additional or renovated rental housing.
- By the end of the 1st Quarter of 2020, the effects of the COVID-19 pandemic were evident in the economy of the entire USA, with increased unemployment, temporary business closures and permanent closures in many areas of the country. The economy continued to decline during most of 2020, with recovery beginning in early 2021 and increasing on a month to month basis till year end.
- At present, based upon an examination of recent monthly increases in employment in Lowndes County the forecast for continued job growth into 2022 is strong. However, attention has to be paid to the present negative inflationary environment which could lead to an over tighten economic environment induced by the Federal Reserve's increase in interest rates. Depending on the amount of tightening and the rate of tightening this in turn could either lead the US economy into a "soft landing" in late 2023 or sometime in 2024 or a worst case scenario of a recession during the same period.
- The proposed subject property net rents at 50% and 60% AMI and at Market are very marketable, and competitive with the area apartment market competitive environment.

6. Project-Specific Affordability and Demand Analysis:

- Number of renter households income qualified for the proposed development given retention of current tenants (rehab only), the proposed unit mix, income targeting, and rents (age qualified renter households for senior projects).
- Based on current estimates and projections, in 2024 some 1,387 renter households or roughly 26% of all renter households will be income eligible for the subject at the proposed LIHTC rent levels.
- Overall estimate of demand based on DCA's demand methodology.
- The demand estimate for the LIHTC segment of the proposed development is 875. The demand estimate for the Market Rate segment of the proposed development is 248. The total demand estimate for the proposed LIHTC/Market Rate development taking into consideration like-kind competitive supply introduced into the market since 2020 is 875 for the LIHTC segment and 248 for the Market Rate segment.

| Proposed Project Capture Rate All Units | 5.0% |
|---|------|
| Proposed Project Capture Rate Market Rate Units | 2.4% |
| Proposed Project Capture Rate LIHTC Units | 5.7% |
| Proposed Project Capture Rate LIHTC Units @ 50% AMI | 3.4% |
| Proposed Project Capture Rate LIHTC Units @ 60% AMI | 8.0% |
| Proposed Project Capture Rate 1BR Units | 2.4% |
| Proposed Project Capture Rate 2BR Units | 6.8% |
| Proposed Project Capture Rate 3BR Units | 4.4% |

• Capture Rates including: LIHTC & Market Rate

• A conclusion regarding the achievability of the above Capture Rates.

• The above capture rates are well below the GA-DCA thresholds. They are considered to be a reliable quantitative indicator of market support for the proposed subject development.

7. Competitive Rental Analysis:

- An analysis of the competitive properties in the PMA.
- At the time of the survey, the overall estimated vacancy rate of the surveyed LIHTC apartment properties was 0%.
- At the time of the survey, the vacancy rate of the one LIHTC elderly property in Hahira was 0%. The property currently maintains a waiting list with 30-applicants.
- At the time of the survey, the three LIHTC family properties in the PMA were 100% occupied and all maintained waiting lists ranging in size between 30 to 300+ applicants.
- The bedroom mix of the surveyed LIHTC family properties is 13.5% 1BR, 56% 2BR and 30.5% 3BR.
- At the time of the survey, the overall estimated vacancy rate of the surveyed market rate apartment properties was 1.4%.
- Number of properties.
- Four LIHTC properties, representing 264 units, were surveyed in the subject's competitive environment.
- Eight market rate properties representing 1,617 units were surveyed in the subject's competitive environment.

| Bedroom type | Rent Band (Subject) | Rent Band (Market Rate) |
|--------------|---------------------|-------------------------|
| 1BR/1b | \$435-\$700 | \$625 - \$1100 |
| 2BR/1b | Na | Na |
| 2BR/2b | \$530-\$800 | \$944 - \$1290 |
| 3BR/2b | \$610-\$900 | \$795 - \$1290 |

• Rent bands for each bedroom type proposed.

• Average Market rents.

| Bedroom type | Average Market Rent |
|--------------|----------------------------|
| 1BR/1b | \$922 (Adjusted = \$875) |
| 2BR/1b | Na |
| 2BR/2b | \$1074 (Adjusted = \$985) |
| 3BR/2b | \$1102 (Adjusted = \$1035) |

8. Absorption/Stabilization Estimate:

- An estimate of the number of units to be leased at the subject property, on average.
- The forecasted rent-up scenario exhibits an average of 14-units being leased per month.

| AMI Target Group | Number of units Expected to be Leased* | |
|------------------|--|--|
| 50% AMI | 15 | |
| 60% AMI | 35 | |
| Market | 6 | |

• Number of units expected to be leased by AMI Targeting.

* at the end of the 4-month absorption period

• Number of months required for the project to reach stabilization of 93% occupancy.

- A 93% occupancy rate is forecasted to occur within 4months of the placed in service date. Stabilized occupancy, subsequent to initial lease-up is expected to be 93% or higher up to but no later than a three month period beyond the absorption period.
- The absorption rate should coincide with other key conclusions. For example, insufficient demand or unachievable rents should be reflected in the absorption rate.
- A reconciliation of the proposed LIHTC/Market Rate net rents by bedroom type with current average market rate net rents by bedroom type are supportive of the forecasted absorption and stabilization periods.

9. Overall Conclusion:

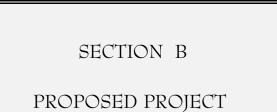

- A narrative detailing the key conclusions of the report including the analyst's opinion regarding the potential for success of the proposed development.
- Based upon the analysis and the conclusions of each of the report sections, it is recommended that the proposed application **proceed forward based on market findings**, as **presently configured**.
- Total population and household growth within the PMA is exhibited with annual growth rates approximating +0.97% per year for population growth and +1.07% for household growth over the forecast period.
- Over the last year the Hahira / Lowndes County economy has (1) improved significantly and (2) exhibited trends of continuing growth.
- In the area of unit size by bedroom type, the subject will offer very competitive unit sizes, by floor plan, in comparison with the existing market rate properties.
- The 1BR net rent advantage at 50% AMI is approximately 50%. At 60% AMI the 1BR net rent advantage is approximately 37%. At Market the 1BR net rent advantage is approximately 20%.
- The 2BR net rent advantage at 60% AMI is approximately 46%. At 60% AMI the 2BR net rent advantage is approximately 33%. At Market the 2BR net rent advantage is approximately 19%.
- The 3BR net rent advantage at 50% AMI is approximately 41%. At 60% AMI the 2BR net rent advantage is approximately 28%. At Market the 3BR net rent advantage is approximately 13%.
- The overall project rent advantage for the proposed LIHTC/Market Rate family development is estimated at 26%.
- The subject will offer 1BR, 2BR and 3BR units. Based upon market findings and capture rate analysis, the proposed bedroom mix is considered to be appropriate. All household sizes will be targeted, from single person households to large family households.
- The proposed LIHTC/Market Rate family development will not negatively impact the existing supply of LIHTC properties located within the Union Station PMA in the short or long term. At the time of the survey, the overall vacancy rate of the surveyed LIHTC apartment properties was 0%. In addition, all of the surveyed LIHTC managers stated that the introduction of the proposed subject development into the Hahira market would not negatively impact their respective properties.

MARKET STUDY FOLLOWS

DESCRIPTION

he proposed LIHTC/Market Rate multi-family development will target the general population in Hahira and Lowndes County, Georgia. The site is located off Union Road, outside the city limits, approximately 0.5 miles south of the I-75 exit 29 interchange.

Scope of Work

The market study assignment was to ascertain market demand for a proposed new construction multi-family LIHTC/Market Rate development to be known as the **Union Station Apartments**, for BFB General Partners, LLC, under the following scenario::

Project Description:

| | PROPOSED PROJECT PARAMETERS | | | | | | |
|-------------|-----------------------------|--------------------------|-------------------------|--|--|--|--|
| Bedroom Mix | # of Units | Unit Size (Heated sf) | Unit Size (Gross sf) | | | | |
| 1BR/1b | 8 | 821 | 921 | | | | |
| 2BR/2b | 38 | 1060 | 1162 | | | | |
| 3BR/2b | 10 | 1243 | 1350 | | | | |
| Total | 56 | | | | | | |

The proposed new construction development project design comprises two 2-story and one 3-story residential buildings. The development design provides for 112-parking spaces. The development will include a separate building to be used as a clubhouse/community room, central laundry, and a manager's office.

The proposed Occupancy Type is for the General Population.

<u>Project Rents</u>:

The proposed new construction development will not have any project based rental assistance, nor private rental assistance. The proposed development will target approximately 27% of the units at 50% or below of area median income (AMI), approximately 62% of the units at 60% AMI and approximately 11% of the units at Market. Net rent includes trash removal.

| PROPOSED PROJECT RENTS @ 50% AMI | | | | | |
|----------------------------------|------------|----------|-----------------------|------------|--|
| Bedroom Mix | # of Units | Net Rent | Utility Allowance* | Gross Rent | |
| 1BR/1b | 2 | \$435 | \$97 | \$532 | |
| 2BR/2b | 10 | \$531 | \$124 | \$654 | |
| 3BR/2b | 3 | \$610 | \$154 | \$764 | |

*Based upon GA-DCA South Region Utility Allowances.

| PROPOSED PROJECT RENTS @ 60% AMI | | | | | |
|----------------------------------|------------|----------|-----------------------|------------|--|
| Bedroom Mix | # of Units | Net Rent | Utility Allowance* | Gross Rent | |
| 1BR/1b | 5 | \$555 | \$97 | \$652 | |
| 2BR/2b | 24 | \$660 | \$124 | \$784 | |
| 3BR/2b | 6 | \$745 | \$154 | \$899 | |

*Based upon GA-DCA South Region Utility Allowances.

| PROPOSED PROJECT RENTS @ Market | | | | | |
|---------------------------------|------------|----------|-----------------------|------------|--|
| Bedroom Mix | # of Units | Net Rent | Utility Allowance* | Gross Rent | |

| 2BR/2b | 4 | \$800 | \$124 | \$924 | |
| 3BR/2b | 1 | \$900 | \$154 | \$1054 | |

*Estimates used for establishing the lower income band at Market.

Project Amenity Package

The proposed development will include the following amenity package:

Unit Amenities

| | range microwave central air smoke alarms carpet ceiling fans cable ready | energy star refrigerator energy star dishwasher high speed internet access washer/dryer hook-ups window coverings patio/balcony w/storage closet stove top fire suppression system |
|--|--|--|
|--|--|--|

Development Amenities

| - | manager's office | - community buil | ding w/community |
|---|------------------|------------------|------------------|
| - | laundry facility | room & kitchen | |
| | | | |

- equipped fitness room equipped computer center w/WIFI
- covered gathering area

The projected first year that Union Station will be placed in service as a new construction property in mid to late 2024. <u>Note</u>: The 2022 GA QAP states that "owners of projects receiving credits in the 2022 round must place all buildings in the project in service by December 31, 2024".

The architectural firm for the proposed development is McKean & Associates. At the time of the market study, the floor plans and elevations had not been completed. However, the conceptual site plan submitted to the market analyst was reviewed.

Utility allowances are based upon estimates for the Georgia South Region, Low Rise Apartment. Effective date: January 1, 2022.

SITE EVALUATION

he field visit for the site and surrounding market area was conducted on April 25, 2022. The site inspector was Mr. Jerry M. Koontz (of the firm Koontz & Salinger).

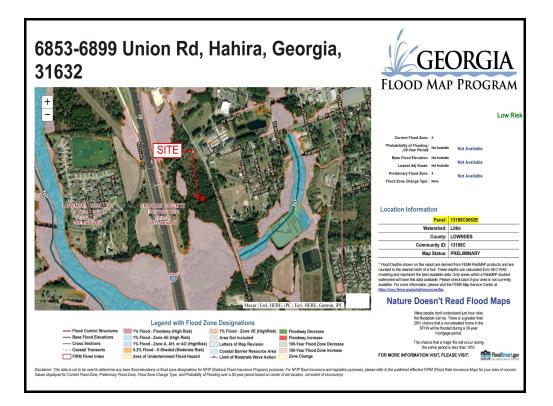

The site is located in Census Tract 102.2 and Zip Code 31632.

 $\underline{\text{Note}}$: The site is not located within a Qualified Census Tract (QCT).

Street and highway accessibility are very good relative to the site. Ready access is available from the site to major retail trade and service areas, employment opportunities, local health care providers, and area churches. All major facilities in the City of Hahira can be accessed within a 5 minute drive. At the time of the market study, no significant infrastructure development was in progress within the immediate vicinity of the site.

Site Characteristics

The approximately 7.518-acre, rectangular shaped tract is mostly densely wooded and relatively flat. At present, no physical structures are located on the tract. The buildable area of the site is not located within a 100-year flood plain. <u>Source</u>: https://map.georgiafirm.com/, Map Number 1302700175C, Effective Date: September 2, 2009. All public utility services are available to the tract and excess capacity exists. However, these assessments are subject to both environmental and engineering studies.

At the time of the market study the site was zoned PD (Planned Development), which allows multi-family development. The surrounding land use and zoning around the site are detailed below:

| Direction | Existing Land Use | Zoning |
|-----------|---|-----------|
| North | Vacant | C-H & R-P |
| East | Single-Family & the Webb Miller Park | R-10 |
| South | Vacant | C-H & R-P |
| West | Interstate 75 | С-Н |

Crime & Perceptions of Crime

The overall setting of the site is considered to be one that is very acceptable for residential development and commercial development within the present neighborhood setting. The site and the immediate surrounding area is not considered to be one that comprises a "high crime" neighborhood. While the number of crimes county-wide may appear high, most occur in the urbanized area of Valdosta, with relatively few in other parts of the County.

Overall, between 2016 and 2017 the number of violent crimes (homicide, rape, robbery and assault) in Lowndes County decreased by 63%, primarily due to the decrease in reported assaults. The overall number of violent crimes remained extremely low, with assaults representing 70% of the total. Property crimes increased by 12.4% in Lowndes County between 2016 and 2017. The overall rate of increase was 11.1%.

| Lowndes County | | | | | |
|----------------------|-------|-------|--------|--|--|
| Type of Offence | 2016 | 2017 | Change | | |
| Homicide | 6 | 10 | 4 | | |
| Rape | 20 | 26 | 6 | | |
| Robbery | 80 | 55 | -25 | | |
| Assault | 214 | 209 | - 5 | | |

Neighborhood Description / Characteristics

The overall character of the neighborhood in the immediate vicinity of the site can be defined predominantly as a mixture of residential and vacant land use.

Directly north of the site is vacant land.

Directly east of the site is a mixture of single-family use the Webb Miller Park.

Directly west of the site is Interstate 75.

Directly south of the site is vacant land.

The pictures on the following pages are of the site and surrounding land uses within the immediate vicinity of the site.

east to west.

(1) Site off Union Road, (2) Site right, off Union Road, north to south.

south to north.

(3) Site left, off Union Rd, (4) Diagonal view of site off Union Rd, SE to NW.

(11) Post Office, .9 miles (12) Downtown Hahira, .9 miles from site.

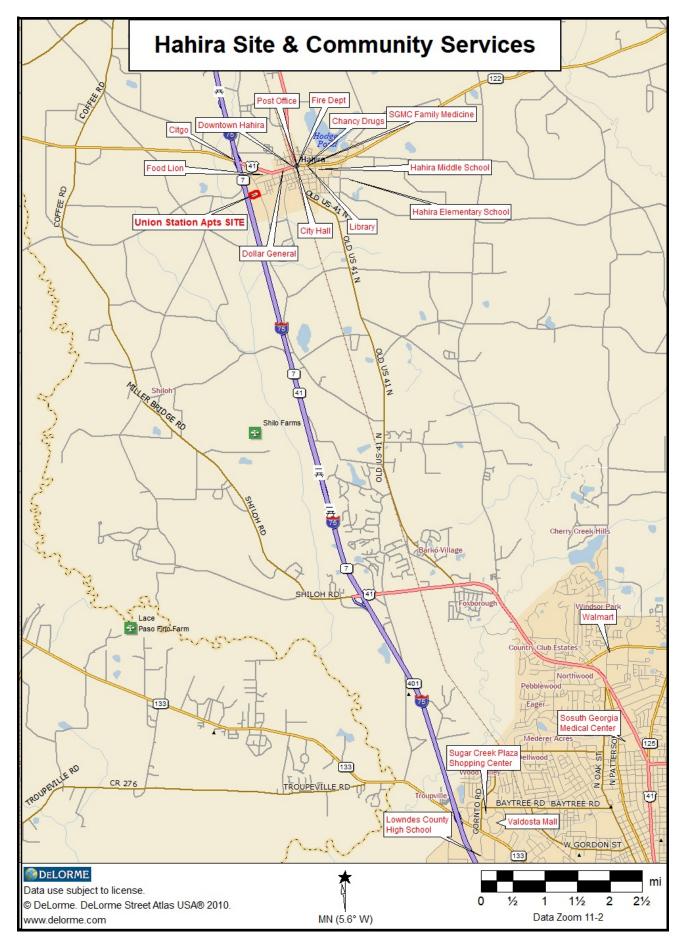

Access to Services

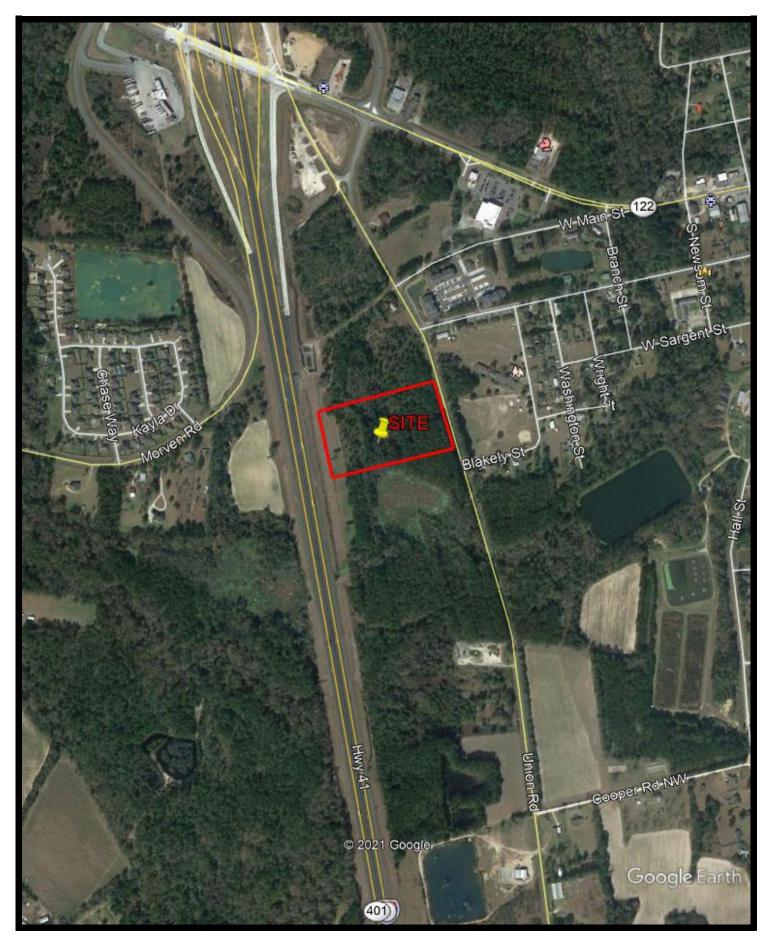

The subject is accessible to major employers, shopping, healthcare services, retail and social services, recreational areas, and the local and regional highway system. (See Site and Facilities Map, next page.)

Distances from the site to community services are exhibited below:

| Points of Interest | Distance from Subject |
|---------------------------------------|--------------------------|
| Food Lion | 0.4 |
| Interstate 75 | 0.5 |
| US 41 | 0.5 |
| I-75 Service Node | 0.5 |
| Citgo Gas/Convenience | 0.7 |
| Dollar General | 0.7 |
| Fire Department | 0.9 |
| Downtown Hahira | 0.9 |
| City Hall/Police | 0.9 |
| Post Office | 0.9 |
| Chancey Drug Store | 1.1 |
| SGMC Family Medicine | 1.1 |
| Library | 1.1 |
| Hahira Middle School | 1.4 |
| Hahira Elementary School | 2.0 |
| Sugar Creek Plaza (SC) Valdosta | 12.2 |
| Lowndes County High School (Valdosta) | 12.4 |
| Valdosta Mall | 12.5 |
| Walmart Supercenter (Valdosta) | 12.7 |
| South GA Medical Center (Valdosta) | 13.7 |

Note: Distance from subject is in tenths of miles and are approximated.

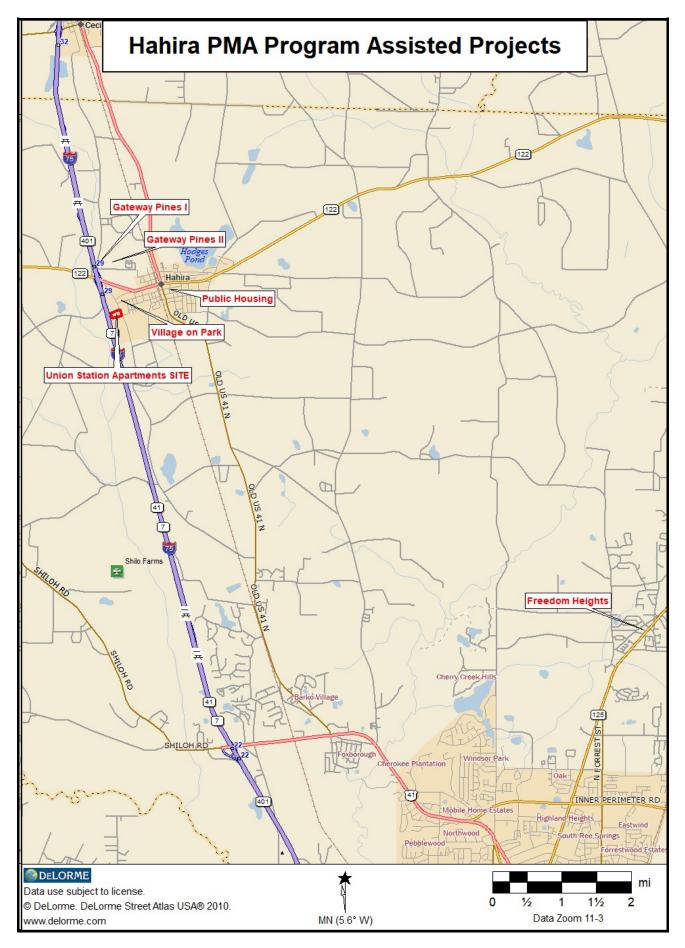

Program Assisted Apartments in Union Station PMA

At present, there are four program assisted apartment properties located within the Union Station PMA, in addition to the Hahira Housing Authority. A map (on the next page) exhibits the program assisted properties located within Hahira in relation to the site.

| Project Name | Program Type | Number of Units | Distance from Site (in miles) |
|--------------------------|-----------------|--------------------|-------------------------------------|
| Village on Park | LIHTC-FM | 64 | 0.2 |
| Gateway Pines I | LIHTC-FM | 52 | 0.8 |
| Gateway Pines II | LIHTC-EL | 56 | 0.9 |
| Hahira Housing Authority | Public Housing | 16 | 0.9 |
| Freedom Heights | LIHTC/Market-FM | 88 | 11.5 |

Distance in tenths of miles

SUMMARY

The field visit for the site and surrounding market area was conducted on April 25, 2022. The site inspector was Mr. Jerry M. Koontz (of the firm Koontz & Salinger).

The overall character of the neighborhood within the immediate vicinity of the site can be defined predominantly as a mixture of residential and vacant land use. Given the current area land use development and the fact that the proposed site is only about 1 mile southwest of Downtown Hahira, the proposed development is considered to be consistent with the existing land uses within one mile of the proposed site. The site is located in the western portion of Hahira, just outside the city limits in Lowndes County. At the time of the market study, the site was zoned PD (Planned Development), which allows multi-family development.

Access to the site is available off Union Road. Union Road is a primary (north-south) connector in Hahira that links the site with GA 122 and I-75 to the north. Union Road is a light to medium density traveled road, with a speed limit of 45 miles per hour in the immediate vicinity of the site. Also, the location of the site off Union Road does not present problems of egress and ingress to the site.

The site offers good accessibility and linkages to area services and facilities. The areas surrounding the site appeared to be void of negative externalities including noxious odors, close proximity to cemeteries, high tension power lines, rail lines, and junk yards.

The site in relation to the subject and the surrounding roads is agreeable to signage, in particular to passing traffic along Union Road.

Overall, the field research revealed the following strengths and weaknesses of the subject in relation to subject marketability. In the opinion of the analyst, the site of the subject is considered appropriate as a LIHTC/Market Rate multi-family development.

| SITE/SUBJECT ATTRIBUTES: | | |
|--|------------|--|
| STRENGTHS | WEAKNESSES | |
| Good accessibility to services, trade, and health care | | |
| Good linkages to area road system | | |
| Nearby road speed and noise are acceptable | | |
| Surrounding land uses are acceptable | | |

SECTION D

MARKET AREA DESCRIPTION

he definition of a market area for any real estate use is generally limited to the geographic area from which consumers will consider the available alternatives to be relatively equal. This process implicitly and explicitly considers the location and

proximity and **scale** of competitive options. Frequently, both a **primary** and a **secondary area** are **geographically defined**. This is an area where consumers will have the greatest propensity to choose a specific product at a specific location, and a secondary area from which consumers are less likely to choose the product but the area will still generate significant demand.

The field research process was used in order to establish the geographic delineation of the Primary Market Area (PMA). The process included the recording of spatial activities and timedistance boundary analysis. These were used to determine the relationship of the location of the site and specific subject property to other potential alternative geographic choices. The field research process was then reconciled with demographic data by geography as well as local interviews with key respondents regarding market specific input relating to market area delineation.

Primary Market Area

Based upon field research in Hahira and a 2 to 15 mile area, along with an assessment of the competitive environment, transportation and employment patterns, the site location and physical, natural and political barriers - the Primary Market Area (PMA) for the proposed multi-family development consists of the following 2020 census tracts in Lowndes and Brooks Counties:

Lowndes County: CT's 101.01, 101.02, 101.03, 102.01, 102.03, 102.04, 103.01 and 103.02

Brooks County: CT 9603.01 and 9603.02

The PMA is bounded as follows:

| Direction | Boundary | Distance from Subject Site |
|-----------|------------------------------------|-------------------------------|
| North | Cook, Colquitt and Lanier Counties | 2 miles |
| East | Lanier County & US 221 | 15 miles |
| South | City of Valdosta and Quitman PMA | 12 miles |
| West | remainder of Brooks County | 12 miles |

Hahira is located in the extreme northern portion of Lowndes County. Approximately 7.5% of the PMA population is located within the City of Hahira. Morven, with a 2020 population of 506 is the only other incorporated place in the PMA. Moody Air Force Base is located in the eastern portion of the PMA. The majority of the population in the eastern portion of the PMA resides west of GA 125.

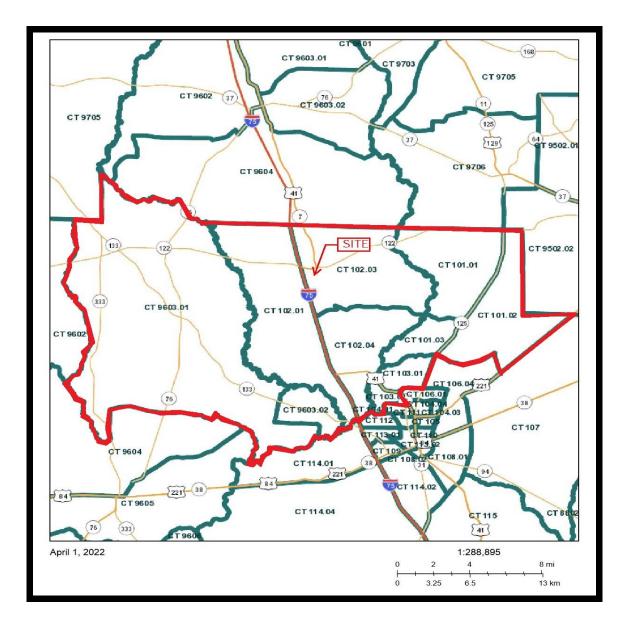

Hahira is a minor trade area for the northern portion of the PMA. Valdosta, located about 12 miles south of Hahira comprises the regional trade area from much of the extreme south-central portion of Georgia regarding employment opportunities, finance, retail, and wholesale trade, entertainment and health care services.

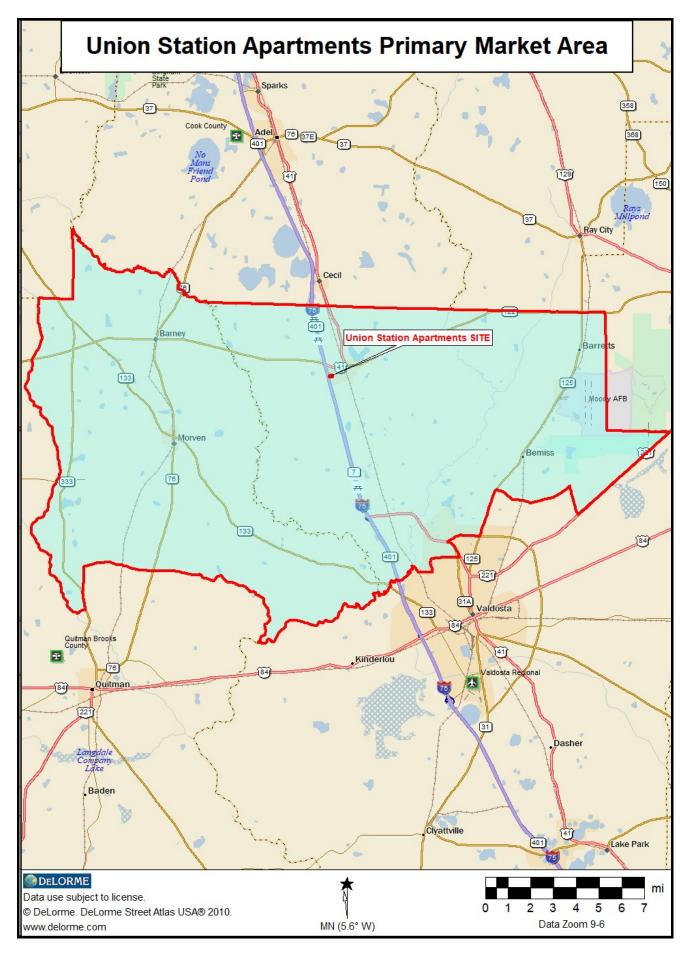

Transportation access to the site and PMA is excellent. The major east/west transportation corridor in the PMA is State Road 122. The major north/south transportation corridors in the PMA are US Highway 41, I-75 and GA 125 and 133.

In addition, managers and/or management companies of the existing program assisted properties located within the market were asked to comment on where the majority of the existing tenants previously resided. The managers and management company of the Gateway Pines I (LIHTC-FM) and Gateway Pines II (LIHTC-EL) Apartments both located in Hahira provided the most insight.

Secondary Market Area

The Secondary Market Area (SMA) consists of that area beyond the PMA, principally from out of market, as well as from out of state. <u>Note</u>: The demand methodology <u>excluded</u> any potential demand from a SMA, as stipulated within the 2022 GA-DCA market study guidelines.

SECTION E

COMMUNITY DEMOGRAPHIC DATA

ables 1 through 8 exhibit indicators of trends in total population and household growth, for Hahira, the Union Station PMA, and Lowndes County.

Population Trends

Table 1 exhibits the change in <u>total</u> population in Hahira, the Union Station PMA and Lowndes County between 2010 and 2027. The year 2024 is estimated to be the first year of availability for occupancy of the subject property. The year 2022 has been established as the base year for the purpose of estimating new household growth demand by age and tenure. The year 2027 reflects a five-year forecast of population from the base year of 2022.

Total Population

The PMA exhibited significant total population gains between 2010 and 2020, at approximately +1.41% per year. Population gains over the next two years (2022-2024) are forecasted for the PMA at a comparable and still significant rate of gain, represented by a rate of change approximating +0.97% per year. Population gains within the PMA are a function of both organic growth and net in-migration. Net in-migration includes population coming to the PMA for (1) employment opportunities, and (2) new residents choosing the Hahira area as a "bedroom community" location and commuting to nearby Valdosta to work.

The projected change in population for Hahira is subject to local annexation policy and in-migration of rural county and surrounding county residents into Hahira. However, recent indicators, including the 2019 US Census estimates and 2020 US Census (at the place level) suggest that the population trend of the mid to late 2000's in Hahira has continued at a similar rate of gain. Approximately 7.5% of the PMA population is located within the City of Hahira.

Projection Methodology

The estimates and projections for households, tenure, households by size and households by income group for 2022 and 2024 are based on the most current HISTA data set; population estimates and projections are based on the most recent Nielsen Claritas projections at the City, County and PMA level. A straight-line trend analysis was performed to derive data for the required dates (2022 and 2024). The Nielsen Claritas projections use an average from the US Census Bureau's 2011-2015 American Community Survey 5-year sample data to derive a 2015 "base year" estimate.

- Sources: (1) 2010 and 2020 US Census.
 - (2) US Census 2019 population estimate.
 - (3) American Community Survey.
 - (4) Nielsen Claritas Projections (2022 & 2027).
 - (5) HISTA Data, Ribbon Demographics.

Note: At present, only 2020 census based re-districting data is available at the incorporated place and county level for the State of Georgia, i.e., total population, population by race and population by group quarters. Population by age data, households by age, tenure and income data is not presently available at any geographic level. Table 1, exhibits the change in <u>total</u> population in Hahira, the Union Station PMA, and Lowndes County between 2010 and 2027.

| Table 1 | | | | | | | |

* 2024 - Estimated first year of occupancy.

<u>Calculations</u> - Koontz and Salinger. May, 2022.

Between 2010 and 2020, Union Station PMA population increased at an annual rate of around +1.41%. Between 2022 and 2024 the Union Station PMA population is forecasted to increase at an annual rate of gain of approximately +0.97%. The majority of the gains are forecasted to occur in the southern portion of the PMA along the I-75 and US 41 transportation corridors. The figure below presents a graphic display of the numeric change in total population in the PMA between 2010 and 2026.

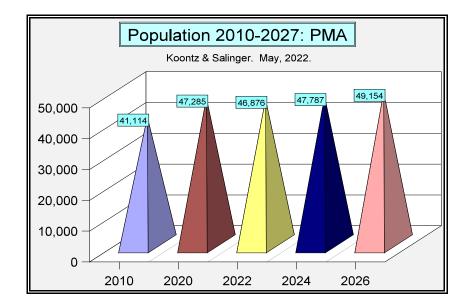

Table 2 exhibits the change in population by age group in the Union Station PMA between 2010 and 2024. The most significant increase exhibited between 2022 and 2024 within the Union Station PMA was in the 65-74 age group, representing an increase of almost 7.5% over the two year period. The 75+ age group is forecasted to increase by 186 persons, or by over +7%.

Koontz and Salinger. May, 2022.

HOUSEHOLD TRENDS & CHARACTERISTICS

Table 3 exhibits the change in total households in the Union Station PMA between 2010 and 2027. The significant increase in household formations in the PMA has continued over a 10 year period and reflects the recent population trends and near term forecasts.

The ratio of persons per household is projected to stabilize at around 2.65 between 2022 and 2024 within the Union Station PMA. The reduction in the rate of decline is based upon (1) the number of retirement age population owing to an increase in the longevity of the aging process for the senior population, and (2) allowing for adjustments owing to divorce and the dynamics of roommate scenarios.

The projection of household formations in the PMA between 2022 and 2024 exhibited a significant increase of 367 households or by +1.07% per year. The rate and size of the annual increase is considered to be very supportive of additional new construction LIHTC apartment development, that targets the very low, low and moderate income household population.

The group quarters population for population within the PMA in the 2010 census was 2,143 versus 1,741 in the 2020 census.

| | Hou | sehold Formati | le 3 ons: 2010 to 2 ation PMA | 2027 | |

Calculations: Koontz & Salinger. May, 2022.

Table 4 exhibits households in the Union Station PMA by owneroccupied and renter-occupied tenure. The 2010 to 2027 projected trend supports a very minor change in the tenure ratio favoring owneroccupied households on a percentage basis.

Overall, significant net numerical gains are forecasted for both owner-occupied and renter-occupied households within the PMA. Between 2022 and 2024, the increase in renter-occupied households remains very positive, at +1.01% per year.

HOUSEHOLD INCOME TRENDS & CHARACTERISTICS

One of the first discriminating factors in residential analysis is income eligibility and affordability. This is particularly of importance when analyzing the need and demand for program assisted multi-family housing.

A professional market study must distinguish between gross demand and effective demand. Effective demand is represented by those households that can both qualify for and afford to rent the proposed multi-family development. In order to quantify this effective demand, the income distribution of the PMA households must be analyzed.

Establishing the income factors to identify which households are eligible for a specific housing product requires the definition of the limits of the target income range. The lower limit of the eligible range is generally determined by affordability, i.e., the proposed gross rents, average minimum social security payments, and/or the availability of deep subsidy rental assistance (RA) for USDA-RD, PHA and HUD Section 8 developments.

The estimate of the upper income limit is based on the most recent set of HUD MTSP income limits for five person households (the maximum household size for a 3BR unit, for the purpose of establishing income limits) in Lowndes County, Georgia at 50% and 60% of the area median income (AMI).

For market-rate projects or components of mixed income projects, the entire range is estimated using typical expenditure patterns. While a household may spend as little for rent as required to occupy an acceptable unit, households tend to move into more expensive housing with better features as their incomes increase. In a typical analysis, the market-rate limits are set at an expenditure pattern of 25% to 35% of household income.

Tables 5A and 5B exhibit renter-occupied households, by income group, in the Union Station PMA using data from the 2011-2015 American Community Survey for the base year, forecasted to 2022 and 2024.

The projection methodology is based upon Nielsen Claritas forecasts for households by tenure, by age and by income group for the years 2022 and 2027, with a base year data set based upon the 2011 to 2015 American Community Survey. The control for this data set was not the 2010 Census, but instead the 2011 to 2015 American Community Survey. The data set was interpolated to fit the required forecast years of 2022 and 2024. Tables 5A and 5B exhibit renter-occupied households, by income in the Union Station PMA in the 2011-2015 American Community Survey, and forecasted 2022 and 2024.

Koontz and Salinger. May, 2022

Table 6B indicates that in 2024 approximately 95% of the renteroccupied households in the Union Station PMA contain 1 to 5 persons (the target group by household size).

A moderate increase in renter households by size is exhibited by 1 person households between 2022 and 2024. <u>Note</u>: Modest to moderate changes are exhibited by 2 through 5+ person per households. One person households are typically attracted to both 1 and 2 bedroom rental units and 2 and 3 person households are typically attracted to 2 bedroom units, and to a lesser degree three bedroom units. It is estimated that between 15% and 20% of the renter households in the PMA fit the bedroom profile for a 3BR unit.

SECTION F

ECONOMIC & EMPLOYMENT TRENDS

Analysis of the economic base and the labor and job formation base of the local labor market area is critical to the potential demand for residential growth in any market. The economic trends reflect the ability of the area to create and sustain growth, and job formation is typically the primary motivation for positive net in-

migration. Employment trends reflect the economic health of the market, as well as the potential for sustained growth. Changes in family households reflect a fairly direct relationship with employment growth, and the employment data reflect the vitality and stability of the area for growth and development in general.

Tables 7 through 13 exhibit labor force trends by (1) civilian labor force employment, (2) covered employment, (3) changes in covered employment by sector, and (4) changes in average annual weekly wages, for Lowndes County. Also exhibited are the major employers for the immediate labor market area. A summary analysis is provided at the end of this section.

Table 10 exhibits the annual change in covered employment in Lowndes County between 2008 and the 3rd Quarter in 2021. Covered employment data differs from civilian labor force data in that it is based on at-place employment within a specific geography. In addition, the data set consists of most full and part-time, private and government wage and salary workers.

<u>Sources</u>: Georgia Department of Labor, Workforce Information Analysis, 2008 and 2021. Koontz and Salinger. May, 2022. Data from the 2015-2019 American Community Survey (ACS) indicates that some 83.6% of the employed workforce living in the Union Station PMA also works in their county of residence. Roughly 14% of the employed PMA residents have jobs in another county in Georgia; the balance (2.4%) commute to other states.

The PMA provides jobs for a number of residents of surrounding counties. The following table indicates the number of in-commuters based on 2019 data from the Census Bureau. As noted, the majority of jobs are held by residents of Lowndes County, Brooks County and Cook County.

Among residents of the PMA who work in other counties, most commute to Thomas County and Fulton County, as shown in the table below. Some intra-county commuting among residents of Lowndes County and Brooks County portions of the PMA also occurs.

SUMMARY

The economic situation for Lowndes County is statistically represented by employment activity, both in workers and jobs. As represented in Tables 7-13, Lowndes County experienced employment losses between 2008 and 2010. Like much of the state and nation, very significant employment losses were exhibited in 2010. Modest to significant gains were exhibited between 2015 and 2019. Owing to the COVID 19 pandemic the 2020 annual average employment for Lowndes County was significantly less than that exhibited in 2019. Significant employment gains were exhibited in 2021.

As represented in Figure 1 (and Table 8), the rate of employment loss between 2008 and 2010 was significant at -10.52%, representing a net decrease of -5,423 workers. The rate of employment gain between 2011 and 2018 was significant at approximately +0.95% per year. The 2019 to 2020 rate of loss was very significant at -2.68%, represented by a decrease of -1,336 workers. The 2020 to 2021 rate of gain was very significant at +2.33%, represented by an increase of +1,132 workers.

Covered (at place) employment in Lowndes County increased in two out of three years between 2017 and 2020. Covered employment decreased significantly in 2020. The 2021 trend in covered employment over the last three quarters suggests an overall increase in covered employment for Lowndes County in 2021.

Recent Economic Development Activity

By the end of the 1st Quarter of 2020, the effects of the COVID-19 pandemic were evident in the economy of the entire USA, with increased unemployment, temporary business closures and permanent closures in many areas of the country. The economy continued to decline during most of 2020, with recovery beginning in early 2021 and increasing on a month to month basis till year end.

Local Economy - Relative to Subject & Impact on Housing Demand

The Valdosta-Lowndes Development Authority (VLCDA) is the lead economic development agency for all of Lowndes County. Despite the pandemic in 2020, there were 13 new and existing industry expansions in Valdosta-Lowndes County, representing \$31 million in capital investments and 215 jobs. By September 2021, the VLCDA had successfully completed a further six industry projects, representing \$92 million in capital investments and approximately 200 jobs.

Recent economic development news for Lowndes County of significance includes the following:

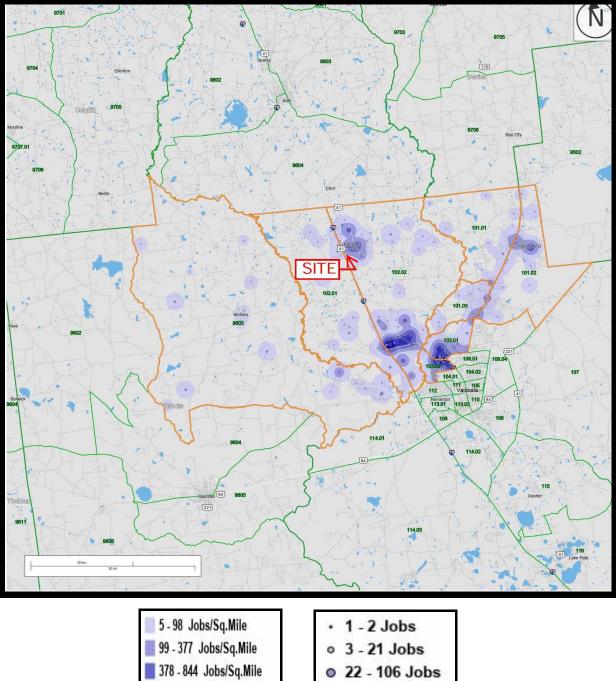

- In January 2021, Governor Brian P. Kemp announced that Correct Craft, a leader in building tournament inboard, freshwater fishing, utility and recreational boats, will invest more than \$1.7 million in operating a manufacturing facility in Valdosta, delivering 90 jobs to Lowndes County. Correct Craft's Valdosta facility will produce wakeboarding and wake surfing boats under its Supreme Boats brand.
- In April 2021, Governor Brian P. Kemp announced that Bimbo QSR, a subsidiary of Mexican multinational company Grupo Bimbo, will invest more than \$25 million in opening a food processing facility in Valdosta, delivering 74 jobs to Lowndes County.
- In April 2021, the Valdosta-Lowndes Count Development Authority announced that Colonial Bag Company Inc., will expand their manufacturing and warehouse/distribution facility in Lake Park. This expansion represents a \$1 million investment and creation of 10 additional jobs.
- In May 2020, the VLCDA Board of Directors voted and approved the development agreement that benefits the growth of Bates Precast Concrete, Inc. The company will invest around \$5 million to build a new office and production building as well as increase their storage area to support production capacity and new product lines located in the Lake Park Industrial Park. An undisclosed number of new jobs will be created by the expansion.

Other economic development in neighboring Cook County which could benefit the Hahira area includes the following:

- In mid-2000, Renewable Biomass Group announced that they will construct a \$95-million wood pellet facility in Hahira, initially creating 60 new jobs. Plans call for the plant to be fully operational in 2021.
- In June 2020, BASF Corporation announced plans for a \$70 million expansion of its Sparks facility, including a new formulation unit, a lab expansion and climate-controlled warehouses, bringing its total assets there to \$200 million. Hiring for 30 new positions, including lab techs, production and warehouse operators, and supervisory and administrative staff, was slated to begin in first quarter of 2021, with plans to be fully operational by August 2021.

A review of the WARN lists for 2020, 2021, and YTD 2022 revealed no announcements of closures or layoffs for Hahira or Lowndes County in 2021 or thus far in 2022. In 2020, 2 businesses in Valdosta announced closures due to COVID-19, with loss of 70 jobs.

A map of the major employment nodes within the Union Station PMA is exhibited on the next page. The majority of jobs are concentrated in Hahira, the major transportation corridors, including I-75 and US 41, and the area on the north side of Valdosta. Another concentration is within the northeastern part of Lowndes County within the Moody AFB area and along GA 125.

SECTION G

PROJECT-SPECIFIC DEMAND ANALYSIS

his analysis examines the area market demand in terms of a specified GA-DCA demand methodology. This incorporates several sources of income eligible demand, including demand from new renter household growth and demand from existing renter households

already in the Union Station PMA market. In addition, given the amount of substandard housing that still exists in the PMA market, the potential demand from substandard housing will be examined.

This methodology develops an effective market demand comprising eligible demand segments based on household characteristics and typical demand sources. It evaluates the required penetration of this effective demand pool. The section also includes estimates of reasonable absorption of the proposed units. The demand analysis is premised upon the estimated year that the subject will be placed in service in 2024.

In this section, the effective project size is 56-units. Throughout the demand forecast process, income qualification is based on the distribution estimates derived in Tables 6 and 7 from the previous section of the report.

Subsequent to the derivation of the annual demand estimate, the project is considered in the context of the current market conditions. This assesses the size of the proposed project compared to the existing population, including factors of tenure and income qualification. This indicates the proportion of the occupied housing stock that the project would represent and gives an indication of the scale of the proposed complex in the market. This does not represent potential demand, but can provide indicators of the validity of the demand estimates and the expected capture rates.

The demand analysis will address the impact on demand from existing and proposed like kind competitive supply, in this case discriminated by income.

Finally, the potential impact of the proposed project on the housing market supply is evaluated, particularly the impact on other like-kind assisted family apartment projects in the market area.

Income Threshold Parameters

This market study focused upon the following target population regarding income parameters:

- (1) Occupied by households at 60 percent or below of area median income, as Income Average for the total project.
- (2) Projects must meet the person per unit imputed income requirements of the Low Income Housing Tax Credit, as amended in 1990. Thus, for purposes of estimating rents, developers should assume no more than the following: (a) For efficiencies, 1 Person; (b) For units with one or more separate bedrooms, 1.5 persons for each separate bedroom.
- (3) The proposed development be available to Section 8 voucher holders.
- (4) The 2021 HUD Income Guidelines were used.
- (5) Around 9% of the units will be set aside as market rate with no income restrictions.
- <u>Analyst Note</u>: The subject will comprise 56 one, two and three-bedroom LIHTC units. The expected occupancy of people per unit is:

1BR - 1 and 2 persons 2BR - 2, 3 and 4 persons 3BR - 3, 4, 5 and 6 persons

<u>Analyst Note</u>: As long as the unit in demand is income qualified there is no minimum number of people per unit.

The proposed development will target approximately 27% of the units at 50% or below of area median income (AMI), approximately 62% of the units at 60% AMI and approximately 11% of the units at Market.

LIHTC Segment

The lower portion of the LIHTC target income ranges is set by the proposed subject 1BR rents at 50% and 60% AMI.

It is estimated that households at the subject will spend between 30% and 45% of income for gross housing expenses, including utilities and maintenance. Recent Consumer Expenditure Surveys (including the most recent) indicate that the average cost paid by renter households is around 36% of gross income. Given the subject property's intended target group it is estimated that the target LIHTC income group will spend between 25% and 50% of income on rent. GA-DCA has set the estimate for non elderly applications at 35%.

The proposed 1BR net rent at 50% AMI is \$435. The estimated utility cost is \$97. The proposed 1BR gross rent at 50% AMI is \$532. Based on the proposed gross rents the lower income limit at 50% AMI was established at \$18,240.

The proposed 1BR net rent at 60% AMI is \$555. The estimated utility cost is \$97. The proposed 1BR gross rent at 60% AMI is \$652. Based on the proposed gross rent the lower income limit at 60% AMI was established at \$22,355.

The maximum income limit at 50% and 60% AMI for 1 to 5 person households in Lowndes County, GA follows:

| | 50% AMI | 60% AMI |
|--------------------------|----------------------|----------------------|
| 1 Person - | \$22,200 | \$26,640 |
| 2 Person - | \$25,350 | \$30,420 |
| 3 Person - 4 Person - | \$28,550 \$31,700 | \$34,260 \$38,040 |
| 5 Person - | | \$41,100 |

<u>Sources</u>: FY 2020 MTSP Income Limits, HUD.gov Novogradac's Rent and Income Limit Calculator

Note: The proposed subject site in Hahira is eligible for the National Non-Metropolitan Median Income Limits.

LIHTC Target Income Ranges

The overall income range for the targeting of income eligible households at 50% AMI is \$18,240 to \$34,250.

The overall income range for the targeting of income eligible households at 60% AMI is \$22,355 to \$41,100.

Market Rate Segment

In this analysis, the market-rate limits are set at an expenditure pattern of 25% to 45% of household income, with an estimated expenditure (for the Hahira market) of gross rent to income set at 25%.

The estimated 1BR gross rent is \$797. The 1BR lower income limit based on a rent to income ratio of 25% is established at \$38,255, adjusted to \$41,000, to eliminate overlap with the 60% AMI target income range.

Technically there is no upper income limit for conventional apartment developments. Sometimes, an arbitrary limit can be placed upon a proposed development, taking into consideration, project design, intended targeted use, site location and the proposed unit and development amenity package. After examining the overall subject development project parameters, the upper income limit was capped at \$100,000.

SUMMARY

Target Income Range - Subject Property - by Income Targeting Scenario

50% AMI

The subject will position 15-units at 50% of AMI.

The overall **Target Income Range** for the proposed subject property targeting households at 50% AMI is \$18,240 to \$34,250.

It is projected that in 2024, approximately **19%** of the renter households in the PMA will be in the subject property 50% AMI LIHTC target income group.

60% AMI

The subject will position 35-units at 60% of AMI.

The overall **Target Income Range** for the proposed subject property targeting households at 60% AMI is \$22,355 to \$41,100.

It is projected that in 2024, approximately **24%** of the renter households in the PMA will be in the subject property 60% AMI LIHTC target income group.

Adjustments

In order to adjust for income overlap between the targeted income segments, the following adjustment was made. The 50% and 60% income segment estimates were reduced in order to adjust for overlap with each other, but only moderately at 60% given fact that only 15-units will target renters at 50% AMI.

Renter-Occupied

| 50% | AMI | 11.5% |
|-----|-----|-------|
| 60% | AMI | 16.5% |

Market Rate

The overall **Target Income Range** for non-income restricted Market Rate units at the proposed is \$41,000 to \$100,000, after adjusting for overlap with the 60% of AMI group.

It is projected that in 2024, approximately **34.5%** of the renteroccupied households in the PMA will be in the subject property Market Rate target income group of \$41,000 to \$100,000.

Effective Demand Pool

In this methodology, there are three basic sources of demand for an apartment project to acquire potential tenants:

- * net household formation (normal growth),
- * existing renters who are living in substandard housing, and
- * existing renters who choose to move to another unit, typically based on affordability (rent overburdened) and project location and features.

A key adjustment is made to the basic model, in this case for like-kind competitive units under construction or in the "pipeline" for development.

New Household Growth

For the PMA, forecast housing demand through household formation totals 367 households over the 2022 to 2024 forecast period. By definition, were this to be growth it would equal demand for new housing units. This demand would further be qualified by tenure and income range to determine how many would belong to the subject target income group. During the 2022 to 2024 forecast period it is calculated that 105 or approximately 27% of the new households formations would be renters.

Based on 2024 income forecasts, 11 new renter households fall into the 50% AMI target income segment of the proposed subject property, 16 at 60% of AMI and 34 at Market.

Demand from Existing Renters that are In Substandard Housing

The most current and reliable data from the US Census regarding substandard housing is the 2016-2020 American Community Survey. By definition, substandard housing in this market study is from Tables B25015 and B25016 in the 2016-2020 American Community Survey 5-Year Estimates - Tenure by Age of Householder by Occupants Per Room and Tenure by Plumbing Facilities, respectively.

Based upon 2016-2020 American Community Survey data, 160 renteroccupied households were estimated to be residing in substandard housing within the PMA.

The forecast for 2022 and 2024 for over crowding data and lacking complete plumbing data was to keep the current ACS estimate constant at 160 renter occupied households residing in substandard housing in the PMA.

Based on 2024 income forecasts, 18 substandard renter households fall into the target income segment of the proposed subject property at 50% AMI and 26 at 60% AMI. <u>Note</u>: This segment of the demand methodology is considered to be <u>not applicable</u> at Market.

Demand from Existing Renters that are Rent Overburdened

An additional source of demand for rental units is derived from renter households desiring to move to improve their living conditions, to accommodate different space requirements, because of changes in financial circumstances or affordability. For this portion of the estimate, rent overburdened households are included in the demand analysis. Note: This segment of the demand analysis excluded the estimate of demand by substandard housing as defined in the previous segment of the demand analysis.

By definition, rent overburdened are those households paying greater than 30% of income to gross rent*. The 2016-2020 ACS indicates that within Lowndes County around 50% of all households are rent or cost overburdened. Based upon findings in the 2016-2020 American Community Survey approximately 91.5% of the Union Station PMA non age discriminated renter households with incomes between \$10,000 and \$19,999 are rent overburdened versus 74% in the \$20,000 to \$34,999 income range and 12.5% in the \$35,000 and over income range.

*<u>Note</u>: HUD considers a rent over burdened household at 30% of income to rent.

It is estimated that 74% of the renters with incomes in the 50% AMI target income segment of \$18,240 to \$34,250 are rent overburdened. It is estimated that 50% of the renters with incomes in the 60% AMI target income segment of \$21,355 to \$41,100 are rent overburdened. It is estimated that 1.5% of the renters with incomes in the Market Rate target income segment of \$41,000 to \$100,000 are rent overburdened.

In the PMA it is estimated that 408 renter households are rent overburdened and fall into the 50% AMI target income segment of the subject property. In the PMA it is estimated that 396 renter households are rent overburdened and fall into the 60% AMI target income segment of the subject property. In the PMA it is estimated that 214 renter households are rent overburdened and fall into the Market Rate target income segment of the subject property.

Total Effective Tenant Pool

The potential demand from these sources (within the PMA) total 437 households/units for the subject apartment development at 50% AMI. The potential demand from these sources (within the PMA) total 438 households/units for the subject apartment development at 60% AMI. The potential demand from these sources (within the PMA) total 248 households/units for the subject apartment development at Market. These estimates comprise the total income qualified demand pool from which the tenants at the proposed project will be drawn from the Union Station PMA.

Naturally, not every household in this effective demand pool will choose to enter the market for a new unit; this is the gross effective demand.

These estimates of demand will still need to be adjusted for the introduction of new like-kind LIHTC supply into the PMA that is either (1) currently in the rent-up process, (2) under construction, and/or (3) in the pipeline for development (if any).

Upcoming Direct Competition

When necessary an additional adjustment is made to the total demand estimate to take into consideration the (1) direct competitive supply under construction and/or (2) in the pipeline for development. At present, there are no apartments under construction and none in the permitted pipeline for development within Hahira that solely target the elderly and/or general population. <u>Source</u>: Mr. Jonathan Sumner, Hahira City Manager, (229) 794-2330. (Contact Date: 4/5/2022)

A review of the 2020 and 2021 list of awards for both LIHTC & Bond applications made by the Georgia Department of Community Affairs revealed that no awards were made in the Union Station PMA for LIHTC elderly or family new construction development.

No adjustments were made within the demand methodology in order to take into consideration new like-kind LIHTC supply.

The segmented, effective demand pool for the PMA is summarized in Tables 14A and 14B on the following pages.

Table 14A: LIHTC Family

Capture Rate Analysis

LIHTC Segment

After adjusting for new like kind supply, the total Number of LIHTC Households Income Qualified = 875 For the subject 50 LIHTC units, this equates to an overall LIHTC Capture Rate of 5.7%.

| Required Capture Rate | 3.4% | 8.0% |
|---|-------------------|-------------------|
| Number of Units in Subject Development Number of Income Qualified Households | 15 437 | 35 438 |
| • <u>Capture Rate</u> (50 unit subject, by AMI) | 50% <u>AMI</u> | 60% <u>AMI</u> |

Market Rate Segment

After adjusting for new like kind supply, the total number of Market Rate Income Qualified Households = 248. For the subject 6 Market Rate units this equates to an overall Market Capture Rate of 2.4%.

| • <u>Capture Rate @ Market</u> | Market |
|---|----------|
| Number of Units in Subject Development Number of Income Qualified Households | 6 248 |
| Required Capture Rate | 2.4% |

• Total Demand by Bedroom Mix

It is estimated that approximately 30% of the target group fits the profile for a 1BR unit, 50% for a 2BR unit, and 20% of the target group is estimated to fit a 3BR unit profile. <u>Source</u>: Table 6 and Survey of the Competitive Environment.

* At present, there are no LIHTC like kind competitive supply under construction or in the pipeline for development within the PMA.

Total Demand by Bedroom Type (at 50% AMI)

1BR - 131 2BR - 219 3BR - 87 Total - 437

| | | Units | Capture | | |

• Penetration Rate:

The NCHMA definition for Penetration Rate is "The percentage of age and income qualified renter households in the Primary Market Area that all existing and proposed properties, to be completed within six months of the subject, and which are competitively priced to the subject that must be captured to achieve the Stabilized Level of Occupancy."

The above capture rate analysis and findings already take into consideration like-kind upcoming and pipeline development. In fact, the final step of the Koontz & Salinger demand and capture rate methodologies incorporates penetration rate analysis.

Overall Impact to the Rental Market

In the opinion of the market analyst, the proposed new construction LIHTC/Market Rate development will not negatively impact the existing supply of program assisted LIHTC properties located within or near the Union Station PMA in the short or long term. At the time of the survey, the overall estimated vacancy rate of the surveyed LIHTC apartment properties was 0%.

The three LIHTC family developments in the Union Station PMA all had waiting lists ranging in size between 30 to 300+ applicants.

Some relocation of tenants in the existing LIHTC properties could occur. This is considered to be normal when a new property is introduced within a competitive environment, resulting in very short term negative impact.

SECTION H

COMPETITIVE ENVIRONMENT & SUPPLY ANALYSIS

This section of the report evaluates the general rental housing market conditions in the PMA and the adjacent competitive environment, for both program assisted properties and market rate properties.

Part I of the survey focused upon the existing LIHTC program

assisted properties within the PMA. Part II consisted of a sample survey of conventional apartment properties in the competitive environment. The analysis includes individual summaries and pictures of properties as well as an overall summary rent reconciliation analysis.

The Hahira apartment market is representative of a semi-urban apartment market, greatly influenced by a much larger and nearby rural hinterland in three directions and the large Valdosta apartment market to the south. Hahira has several small market rate apartment properties. Four LIHTC properties are located within the Union Station PMA as well as the local Hahira Housing Authority. Other rental properties within the PMA area include duplexes, single-family homes, and single-wide and double-wide trailers.

Owing to the location of I-75 and US 41, Hahira is within close proximity in terms of travel time to the large Valdosta employment and apartment markets. Valdosta is approximately 12 miles south with downtown being closer to 15 miles south. The travel time is around 10 to 15 minutes.

Part I - Survey of the LIHTC Apartment Market

Four LIHTC properties, representing 264 units, were surveyed in the subject's PMA. Three properties are located in Hahira and one in the southern portion of the PMA. Several key findings in the local LIHTC apartment market include:

* At the time of the survey, the overall estimated vacancy rate of the surveyed LIHTC apartment properties was 0%.

* At the time of the survey, the vacancy rate of the one LIHTC elderly property in Hahira was 0%. The property currently maintains a waiting list with 30-applicants.

* The bedroom mix of the surveyed LIHTC elderly property is 28.5% 1BR 71.5% 2BR.

* At the time of the survey, the three LIHTC family properties in the PMA were 100% occupied and all maintained a waiting list ranging in size between 30 to 300+ applicants.

* The bedroom mix of the surveyed LIHTC family properties is 13.5% 1BR, 56% 2BR and 30.5% 3BR.

Part II - Sample Survey of Market Rate Apartments

Eight market rate properties, representing 1,617 units, were surveyed in detail in the subject's competitive environment. Several key findings in the local conventional apartment market include:

* At the time of the survey, the overall estimated vacancy rate of the surveyed market rate apartment properties was 1.4%.

* At the time of the survey, 6 of the 8 market rate properties had a waiting list ranging in size between 3 to 32 applicants.

* At present, several of the surveyed market rate properties are offering a rent concession in the form of a small discount in rent to military personnel.

* Security deposits range between \$150 to \$300, or equaled 1 months rent.

* Fifty percent of the surveyed apartment properties exclude all utilities from the net rent. 37.5% percent include water, sewer and trash removal and 12.5% only include trash removal.

* The bedroom mix of the surveyed apartment properties is 21% 1BR, 54% 2BR and 25% 3BR.

* A survey of the conventional apartment market exhibited the following average, median and range of net rents by bedroom type in the area competitive environment:

| Market Rate Competitive Environment - Net Rents | | | | | |
|---|---------|--------|--------------|--|--|
| BR/Rent | Average | Median | Range | | |
| 1BR/1b | \$922 | \$905 | \$625-\$1100 | | |
| 2BR/1b | \$960 | \$970 | \$625-\$1240 | | |
| 2BR/2b | \$1074 | \$1055 | \$944-\$1290 | | |
| 3BR/2b | \$1102 | \$1079 | \$795-\$1290 | | |

Source: Koontz & Salinger. May, 2022

* A survey of the conventional apartment market exhibited the following average, median and range of unit sizes by bedroom type in the area competitive environment:

| Market Rate Competitive Environment - Unit Size | | | | | |
|---|---------|--------|-----------|--|--|
| BR/Size | Average | Median | Range | | |
| 1BR/1b | 770 | 809 | 500-1126 | | |
| 2BR/1b | 961 | 960 | 900-1044 | | |
| 2BR/2b | 1210 | 1200 | 1044-1430 | | |
| 3BR/2b | 1376 | 1380 | 1230-1758 | | |

Source: Koontz & Salinger. May, 2022

* In the area of unit size by bedroom type, the subject will offer very competitive unit sizes by floor plan in comparison with the existing market rate properties.

Most Comparable Property

* The most comparable surveyed market rate properties to the subject in terms of rent reconciliation/advantage analysis are:

| Comparable Market Rate Properties: By BR Type | | | | |
|---|-----------------|---------------------|--|--|
| 1BR | 2BR | 3BR | | |
| 41 South | 41 South | 41 South | | |
| Northwind Northwind | | Northwind | | |
| Prosper Azalea City Prosper Azalea City | | Prosper Azalea City | | |
| Staten Crossing | Staten Crossing | Staten Crossing | | |
| The Links | The Links | The Links | | |

* The most direct like-kind comparable surveyed properties in terms of age and income targeting are the three LIHTC family properties located in Union Station PMA.

* In terms of market rents and subject rent advantage, the most comparable properties comprise a compilation of surveyed market rate properties located in the Union Station PMA, and nearby Adel and Valdosta.

Section 8 Vouchers

The Section 8 voucher program for Lowndes County is managed by the Georgia Department of Community Affairs, Atlanta Office. At the time of the survey, the Georgia DCA Office stated that 595 vouchers held by households were under contract within Lowndes County, of which 66 were elderly households and 529 non elderly. In addition, it was reported that presently there were 1,999 applicants on the Southern Region waiting list which includes Lowndes County. The waiting list is presently closed. <u>Source</u>: Ms. Mary E. de la Vaux, Special Assistant, GA-DCA, Mary.delaVaux@dca.ga.gov, April 11, 2022.

Housing Voids

At the time of the survey, the existing LIHTC elderly property in the PMA (Gateway Pines II) was 100% occupied, and had 30-applicants on the waiting list. In addition, at the time of the survey, the three LIHTC-family properties located in the PMA were also 100% occupied and all three maintained a very sizable waiting list.

Given the overwhelming demand for professionally managed LIHTC apartment units in the PMA the market is clearly indicating that a continuing housing void is evident where the supply of LIHTC housing is not sufficient to accommodate current and forecasted demand.

The 2022 Fair Market Rents for Lowndes County, GA are as follows:

Efficiency = \$ 639 1 BR Unit = \$ 643 2 BR Unit = \$ 833 3 BR Unit = \$1159 4 BR Unit = \$1376

*Fair Market Rents are gross rents (include utility costs)

Source: www.huduser.gov

Note: The proposed subject property LIHTC gross rents at 50% AMI are set below the maximum Fair Market Rents. Thus, the subject property LIHTC 1BR, 2BR and 3BR units at 50% AMI will be readily marketable to Section 8 voucher holders in Lowndes County.

Change in Average Rents

Between the Spring of 2021 and the Spring of 2022, the Hahira competitive environment conventional apartment market exhibited the following change in average net rents by bedroom type:

| | 2021 | 2022 | Annual <u>% Change</u> * |
|--------|--------|--------|-----------------------------|
| 1BR/1b | \$847 | \$922 | + 8.8% |
| 2BR/1b | \$819 | \$960 | +17.0% |
| 2BR/2b | \$959 | \$1074 | +12.0% |
| 3BR/2b | \$1029 | \$1102 | + 7.1% |

*approximated

A reasonable two year rent increase forecast by bedroom type would be 7% to 10% per year.

Multi-Family Occupancy Rate Trends

Between 2021 and 2022, the PMA apartment market exhibited the following change in occupancy rates:

| Average | Average |
|---------|---------|
| 2021 | 2022 |
| | |

Occupancy Rate 99.9% 98.6%

A reasonable two year forecast for occupancy rates in the PMA apartment market would be around 98% to 99%.

Foreclosure Status

The number of foreclosures dropped dramatically nationwide during 2020, and remains very low in Hahira and the Union Station site area of Lowndes County. According to data from ATTOM Data Solutions (parent company of <u>www.realtytrac.com</u>), during 2021 there were 151,153 foreclosures nationwide, down 29% compared to 2020, down 95% from a peak of nearly 2.9 million in 2010. However, there was an uptick in foreclosures in January 2022, with 23,204 filings.

Data for Zip Code 31632 (which includes Hahira, the site and the immediate surrounding area) show only 3 properties in foreclosure.

In the site neighborhood and the surrounding area the relationship between the local area foreclosure market and existing LIHTC supply is not crystal clear. However, at the time of the survey, the existing LIHTC properties located within the PMA were 100% occupied, and all maintained a waiting list. In addition, given the somewhat small number of foreclosures in this PMA, it can be assumed that foreclosures have little effect on demand and occupancy in LIHTC properties.

Note: Recent anecdotal news information points to the fact that the majority of the foreclosed problem that remains is concentrated in metro markets more so than in suburban, semi-urban and rural markets. Based upon available data at the time of the survey, the site area does not appear to be one of the housing markets that have been placed in jeopardy due to the recent and still on-going foreclosures phenomenon.

Table 15 exhibits building permit data for Lowndes County between 2010 and January 2022. As shown in the table, between 2010 and January 2022, 10,005 permits were issued in the County, of which 1,231 or approximately 12.5% were multi-family units.

SECTION I

ABSORPTION & STABILIZATION RATES

Freedom Heights 88-units

Given the strength of the demand estimated in Table 15, the most likely/best case scenario for 93% to 100% rent-up is estimated to be within 4 months (at 14-units per month on average).

The rent-up period is based on six LIHTC-family developments located within Adel, Hahira and Valdosta:

3-months to attain 95% occupancy

<u>Adel</u>

| Bear Creek Village 56-units | 2-months to attain 100% occupancy |
|---|--|
| <u>Hahira</u> | |
| Gateway Pines 56-units | 1-month to attain 100% occupancy |
| Valdosta | |
| Ashton Park 88-units Heron Lakes I 88-units Heron Lakes II 64-units | 3-months to attain 95% occupancy 6-months to attain 95% occupancy 4-months to attain 95% occupancy |

Note: In addition, the absorption of the project is contingent upon an attractive product, a competitive amenity package, competitive rents and professional management.

Stabilized occupancy, subsequent to initial lease-up is expected to be 93% or higher up to but no later than a three month period, beyond the absorption period.

NCHMA Definitions

Absorption Period: The period of time necessary for a newly constructed or renovated property to achieve the Stabilized Level of occupancy. The Absorption Period begins when the first certificate of occupancy is issued and ends when the last unit to reach the Stabilized Level of Occupancy has a signed lease. This assumes a typical pre-marketing period, prior to the issuance of the certificate of occupancy, of about three to six months. The month that leasing is assumed to begin should accompany all absorption estimates.

Absorption Rate: The average number of units rented each month during the Absorption Period.

Stabilized Level of Occupancy: The underwritten or actual number of occupied units that a property is expected to maintain after the initial rent-up period, expressed as a percentage of the total units.

INTERVIEWS

he following are observations and comments relating to the subject property. They were obtained via a survey of local contacts interviewed during the course of the market study research process.

In most instances the project parameters of the proposed development were presented to the

"key contact", in particular: the proposed site location, project size, bedroom mix, income targeting and net rents. The following observations/comments were made:

(1) - Ms Mary E. de la Vaux, Special Assistant, GA-DCA, Atlanta Office Section 8 Coordinator, made available the number of Section 8 Housing Choice Vouchers being used within Hahira and Lowndes County. At the time of the survey, the Georgia State Office stated that 595 vouchers held by households were under contract within Lowndes County, of which 66 were elderly households and 529 non elderly. In addition, it was reported that presently there are 1,999 applicants on the Southern Region waiting list which includes Lowndes County. The waiting list is presently closed. Source: Mary.delaVaux@dca.ga.gov, April 11, 2022.

(2) - Mr. Jonathan Sumner, Hahira City Manager stated that no ongoing, nor planned infrastructure development or improvements are in process within the immediate vicinity of the subject site. He did state that the short connector to the site from GA 122 currently is unnamed and in the near future the naming of the connector will have to be addressed by the city. In addition, he reported on the status of current and upcoming permitted multi-family rental development within Hahira. <u>Contact Number</u>: (229) 794-2330.

(3) - Ms. B.J. Conley, Manager, of the Gateway Pines I (LIHTC-Family) and Gateway Pines II (LIHTC-Elderly) apartments was interviewed. She stated that no negative impact is expected should the proposed development be built in Hahira. At the time of the survey, Gateway Pines I was 100% occupied and had 30-applicants on the waiting list and Gateway Pines II was 100% occupied and had 30-applicants on the waiting list. Both properties were reported to have rented-up very quickly. *Contact Number: (229) 794-1125.*

(4) - Ms Greta of IDP Properties reported on the status of Freedom Heights a LIHTC-Family development located in the southern portion of the PMA. It was stated that no negative impact is expected upon Freedom Heights should the proposed development be built in Hahira. At the time of the survey, Freedom Heights was 100% occupied and had a large waiting list with over 300-applicants. <u>Contact Number: (229) 219-6760</u>.

(5) - Ms. Betty, Manager of the Village on Park (LIHTC-Family) apartments was interviewed. She stated that no negative impact is expected should the proposed development be built in Hahira. At the time of the survey, Village on Park was 100% occupied and had a large waiting list with over 100-applicants. *Contact Number: (229) 229-4010*.

SECTION K

CONCLUSIONS & RECOMMENDATION

A sproposed in Section B of this study, it is of the opinion of the analyst, based on the findings in the market study that the Union Station Apartments (a proposed LIHTC/Market Rate property) targeting the general population should proceed forward with the development process.

Detailed Support of Recommendation

1. Project Size - The income qualified target group is large enough to absorb the proposed LIHTC/Market Rate development of 56-units. The Capture Rates for the total project, by bedroom type and by Income Segment are considered to be acceptable.

2. The current program assisted apartment market is <u>not</u> representative of a soft market. At the time of the survey, the overall estimated vacancy rate of the surveyed LIHTC apartment properties in the Union Station PMA was 0%. The current market rate apartment market is not representative of a soft market. At the time of the survey, the overall estimated vacancy rate of the surveyed market rate apartment properties located within the competitive environment was 1.4%.

3. The proposed complex amenity package is considered to be very competitive within the PMA apartment market for affordable properties. It will be competitive with older program assisted properties and older Class B market rate properties.

4. Bedroom Mix - Bedroom Mix - The subject will offer 1BR, 2BR, and 3BR units. Based upon market findings and capture rate analysis, the proposed bedroom mix is considered to be appropriate. All household sizes will be targeted, from single person households to large family households.

5. Assessment of rents - The proposed LIHTC and Market Rate net rents by bedroom type will be very competitive within the PMA apartment market at 50% and 60% AMI and at Market. Market rent advantage is greater than 25% in all AMI segments, and by bedroom type. The table on page 100 exhibits the rent reconciliation of the proposed LIHTC segment of the development, by bedroom type, and income targeting, with comparable properties within the competitive environment.

6. Under the assumption that the proposed development will be (1) built as described within this market study, (2) will be subject to professional management, and (3) will be subject to an extensive marketing and pre-leasing program, the subject is forecasted to be 93% to 100% absorbed within 4-months. 7. Stabilized occupancy, subsequent to initial lease-up, is forecasted to be 93% or higher.

8. The site location is considered to be very marketable.

9. The proposed new construction LIHTC elderly development will not negatively impact the existing supply of program assisted LIHTC properties located within or near the Union Station PMA in the short or long term. At the time of the survey, the overall vacancy rate of the LIHTC apartment properties located within the Union Station PMA was 0%.

The three LIHTC family developments in the Union Station PMA all had waiting lists ranging in size between 30 to 300+ applicants.

10. No modifications to the proposed project development parameters as currently configured are recommended.

The table below exhibits the findings of the Rent Reconciliation Process between the proposed subject net rent, by bedroom type, and by income targeting with the current comparable Market Rate competitive environment. A detailed examination of the Rent Reconciliation Process, which includes the process for defining Market Rent Advantage, is provided within the preceding pages.

Market Rent Advantage

The rent reconciliation process exhibits positive subject property rent advantage by bedroom type at 50% and 60% AMI and at Market.

Percent Advantage:

| | 50% AMI | <u>60% AMI</u> | Market |
|---------|---------|----------------|--------|
| 1BR/1b: | 50% | 37% | 20% |
| 2BR/2b: | 46% | 33% | 19% |
| 3BR/2b: | 41% | 28% | 13% |

Overall: 26%

| Rent Reconciliation | | | | | | | | | |
|----------------------------|---------|--------|--------|-----|--|--|--|--|--|
| | | | | | | | | | |
| 50% AMI | 1BR 2BR | | 3br | 4BR | | | | | |
| Proposed subject net rents | \$435 | \$530 | \$610 | | | | | | |
| Estimated Market net rents | \$875 | \$985 | \$1035 | | | | | | |
| Rent Advantage (\$) | +\$440 | +\$455 | +\$425 | | | | | | |
| Rent Advantage (%) | 50% | 46% | 41% | | | | | | |
| | | | | | | | | | |
| 60% AMI | 1BR | 2BR | 3BR | 4BR | | | | | |
| Proposed subject net rents | \$555 | \$660 | \$745 | | | | | | |
| Estimated Market net rents | \$875 | \$985 | \$1035 | | | | | | |
| Rent Advantage (\$) | +\$320 | +\$325 | +\$290 | | | | | | |
| Rent Advantage (%) | 37% | 33% | 28% | | | | | | |
| | | | | | | | | | |
| Market | 1BR | 2BR | 3BR | 4BR | | | | | |
| Proposed subject net rents | \$700 | \$800 | \$900 | | | | | | |
| Estimated Market net rents | \$875 | \$985 | \$1035 | | | | | | |
| Rent Advantage (\$) | +\$175 | +\$185 | +\$135 | | | | | | |
| Rent Advantage (%) | 20% | 19% | 13% | | | | | | |
| | | | | | | | | | |

Source: Koontz & Salinger. May, 2022

Recommendation

As proposed in Section B of this study (Project Description), it is of the opinion of the analyst, based upon the findings in the market study, that the Union Station Apartments (a proposed LIHTC/Market Rate new construction development) proceed forward with the development process.

Negative Impact

In the opinion of the market analyst, the proposed new construction LIHTC/Market Rate development will not negatively impact the existing supply of program assisted LIHTC properties located within or near the Union Station PMA in the short or long term. At the time of the survey, the overall vacancy rate of the LIHTC apartment properties located within the Union Station PMA was 0%.

The three LIHTC family developments in the Union Station PMA all had waiting lists ranging in size between 30 to 300+ applicants.

Some relocation of tenants in the area LIHTC properties could occur. This is considered to be normal when a new property is introduced within a competitive environment, resulting in very short term negative impact.

Achievable Restricted (LIHTC) Rent

The proposed gross rents, by bedroom type at 50% and 60% AMI and at Market are considered to be very competitively positioned within the market. In addition, they are appropriately positioned in order to attract income qualified Section 8 Housing Choice Voucher holders within Hahira and Lowndes and Brooks Counties for the proposed subject units.

It is recommended that the proposed subject LIHTC net rents at 50% and 60% AMI remain unchanged, neither increased nor decreased. The proposed LIHTC elderly development, and proposed subject net rents are in line with the other LIHTC and program assisted developments operating in the market without PBRA, deep subsidy USDA rental assistance (RA), or attached Section 8 vouchers, when taking into consideration differences in income restrictions, unit size and amenity package.

Both the Koontz & Salinger and HUD based rent reconciliation process suggest that the proposed subject net rents could be positioned at a higher level and still attain a rent advantage position greater than 30%. However, it is recommended that the proposed net rents remain unchanged. In addition, the subject's gross rents are already closely positioned to be under or within close proximity to the Fair Market Rents for Lowndes County, while at the same time operating within a competitive environment.

The proposed project design, amenity package, location and net rents are very well positioned to be attractive to the local Section 8 voucher market. Increasing the gross rents at 50% and 60% AMI to a level beyond the FMR's, even if rent advantage can be achieved, and maintained, is not recommended.

<u>Mitigating Risks</u>

The subject development is very well positioned to be successful in the market place, in particular, when taking into consideration the current rent advantage positioning. It will offer a product that will be very competitive regarding project design, amenity package and professional management. The major unknown mitigating risk to the development process will be the status of the local economy between 2022 and 2023.

Economic conditions in 2020 were forced into an extended period of uncertainty owing to the COVID-19 worldwide pandemic. The 2^{nd} quarter of 2020 witnessed a severe national economic downturn in terms of job losses and business closings. The 3^{rd} quarter and 4^{th} quarters of 2020 exhibited signs of a recovering economy with the nationwide economy eventually coming out of recession and exhibiting stronger growth. The rate of economic growth in 2021 and 2022 will be subject to (1) the implementation and acceptance of several vaccines on a nationwide basis in addition to COVID-19 testing on a consistent basis, (2) successful development of new anti-viral medicines and (3) most importantly, the development and implementation of vaccines or boosters that can combat COVID-19 variants on a world-wide basis.

Also, it is possible that the absorption rate could be extended by a few months if the rent-up process for the proposed subject development begins sometime between the Thanksgiving and Christmas holiday season, including the beginning of January.

Rent Reconciliation Process

Six market rate properties in the Union Station competitive environment were selected as comparables to the subject. The methodology attempts to quantify a number of subject variables regarding the features and characteristics of a target property in comparison to the same variables of comparable properties.

The comparables were selected based upon the availability of data, general location within the market area, target market, unit and building types, rehabilitation and condition status, and age and general attractiveness of the developments. The rent adjustments used in this analysis are based upon a variety of sources, including data and opinions provided by local apartment managers, LIHTC developers, other real estate professionals, and utility allowances used within the subject market. It is emphasized, however, that ultimately the values employed in the adjustments reflect the subjective opinions of the market analyst.

One or more of the comparable properties may more closely reflect the expected conditions at the subject, and may be given greater weight in the adjustment calculation, while others may be significantly different from the proposed subject development.

Several procedures and non adjustment assumptions were utilized within the rent reconciliation process. Among them were:

- consideration was made to ensure that no duplication of characteristics/adjustments inadvertently took place,
- the comparable properties were chosen based on the following sequence of adjustment: location, age of property, physical condition and amenity package,
- no adjustment was made for the floor/level of the unit in the building,
- no "time adjustment" was made; all of the comparable properties were surveyed in March and April 2021,
- no "distance or neighborhood adjustment" was made; owing to the fact that comparisons are being made between all properties located within the Hahira competitive environment,
- no "management adjustment" was made; all of the comparable properties, as well as the subject are (or will be) professionally managed,
- no specific adjustment was made for project design; none of the properties stood out as being particularly unique regarding design or project layout, however, the floor level does incorporate some project design factors,

- an adjustment was made for the age of the property; some of the comparables were built in the 1980's; this adjustment was made on a conservative basis in order to take into consideration the adjustment for condition of the property,
- no adjustment was made Number of Rooms this adjustment was taken into consideration in the adjustment for - Square Feet Area (i.e., unit size),
- no adjustment is made for differences in the type of air conditioning used in comparing the subject to the comparable properties; all either had wall sleeve a/c or central a/c; an adjustment would have been made if any of the comps did not offer a/c or only offered window a/c,
- no adjustments were made for range/oven or refrigerator; the subject and all of the comparable properties provide these appliances (in the rent),
- an adjustment was made for storage,
- adjustments were made for Services (i.e., utilities included in the net rent, and trash removal). Neither the subject nor the comparable properties include heat, hot water, and/or electric within the net rent. The subject includes trash removal in the net rent. Most of the comparable properties exclude cold water, sewer, and trash removal within the net rent.

ADJUSTMENT ANALYSIS

Several adjustments were made regarding comparable property parameters. The dollar value adjustment factors are based on survey findings and reasonable cost estimates. An explanation is provided for each adjustment made in the Estimate of Market Rent by Comparison.

Adjustments:

- Concessions: None of the 6 surveyed properties offers a rent concession.
- Structure/Floors: A \$10 net adjustment is made for 2 and 3 story walk-up structures versus the subject.
- Year Built: Some of the comparable properties were built in the 1980's, and will differ considerably from the subject (after new construction) regarding age. The age adjustment factor utilized is a \$1.00 adjustment per year differential between the subject and the comparable property.
- Square Feet (SF) Area: An adjustment was made for unit size; the overall estimated for unit size by bedroom type was \$.05. The adjustment factor allows for differences in amenity package and age of property.

- Number of Baths: An adjustment was made for the proposed 2BR/1b units owing to the fact that some of the comparable properties offered 2BR/1.5b or 2BR/2b units. The adjustment is \$15 for a ½ bath and \$30 for a full bath.
- Balcony/Terrace/Patio: The subject will offer a traditional patio/balcony, with an attached storage closet. The adjustment process resulted in a \$5 value for the balcony/patio, and a \$5 value for the storage closet.
- Disposal: An adjustment is made for a disposal based on a cost estimate. It is estimated that the unit and installation cost of a garbage disposal is \$225; it is estimated that the unit will have a life expectancy of 4 years; thus the monthly dollar value is \$5.
- Dishwasher: An adjustment is made for a dishwasher based on a cost estimate. It is estimated that the unit and installation cost of a dishwasher is \$750; it is estimated that the unit will have a life expectancy of 10 years; thus the monthly dollar value is \$5.
- Washer/Dryer (w/d): The subject will offer a central laundry (CL), as well as w/d hook-ups. If the comparable property provides a central laundry or w/d hook-ups no adjustment is made. If the comparable property does not offer hook-up or a central laundry the adjustment factor is \$40. The assumption is that at a minimum a household will need to set aside \$10 a week to do laundry. If the comparable included a washer and dryer in the rent the adjustment factor is also \$40.
- Carpet/Drapes/Blinds: The adjustment for carpet, pad and installation is based on a cost estimate. It is assumed that the life of the carpet and pad is 3 to 5 years and the cost is \$10 to \$15 per square yard. The adjustment for drapes / miniblinds is based on a cost estimate. It is assumed that most of the properties have between 2 and 8 openings with the typical number of 4. The unit and installation cost of miniblinds is \$25 per opening. It is estimated that the unit will have a life expectancy of 2 years. Thus, the monthly dollar value is \$4.15, rounded to \$4. <u>Note</u>: The subject and the comparable properties offer carpet and blinds.
- Pool/Recreation Area: The subject offers recreation space in the form of a community garden, but not a swimming pool, or a tennis court. The estimate for a pool and tennis court is based on an examination of the market rate comps. Factoring out for location, condition, non similar amenities suggested a dollar value of \$5 for a playground, \$15 for a tennis court and \$25 for a pool.
- Water: The subject excludes cold water and sewer in the net rent. Most of the comparable properties exclude water and sewer in the net rent. <u>Note</u>: The source for the utility estimates by bedroom type is based upon the Georgia Department of Community Affairs Utility Allowances - South Region; Low Rise Apartment (effective 1/1/2022). See Appendix.

- Storage: The dollar value for storage is estimated to be \$5.
- Computer Room: The dollar value for a computer room (with internet service) is estimated to be \$5.
- Fitness Room: The dollar value for an equipped fitness room is estimated to be \$5.
- Clubhouse: The dollar value for a clubhouse and/or community room is estimated to be \$5.
- Location: Based on adjustments made for other amenities and variables in the data set analysis a comparable property with a marginally better location was assigned a value of \$10; a better location versus the subject was assigned a value of \$15; a superior location was assigned a value of \$25. Note: None of the comparable properties are inferior to the subject regarding location.
- Condition: Based on adjustments made for other amenities and variables in the data set analysis, the condition and curb appeal of a comparable property that is marginally better than the subject was assigned a value of \$5; a significantly better condition was assigned a value of \$10; and a superior condition / curb appeal was assigned a value of \$15. If the comparable property is inferior to the subject regarding condition / curb appeal the assigned value is \$10. Note: Given the new construction (quality) of the subject, the overall condition of the subject is classified as being significantly better.
- Trash: The subject includes trash removal in the net rent. Most of the comparable properties exclude trash removal in the net rent. If required, the adjustment was based upon the Georgia Department of Community Affairs Utility Allowances -South Region; Low Rise Apartment (effective 1/1/2022). See Appendix.

Adjustment Factor Key:

Floor Level - \$10 SF - .05 per sf Patio/balcony - \$5 Storage - \$5 Computer Rm, Fitness Rm, Clubhouse - \$5 (each) Disposal - \$5 Dishwasher - \$5 Carpet - \$5 Mini-blinds - \$5 W/D hook-ups or Central Laundry - \$40 Pool - \$25 Tennis Court - \$15 Playground - \$5 (Na for elderly) Craft/Game Room - \$5 Full bath - \$30; ½ bath - \$15 Location - Superior - \$25; Better - \$15; Marginally Better - \$10 Condition - Superior - \$15; Better - \$10; Marginally Better - \$5; Inferior - minus \$10* Water & Sewer - 1BR - \$41; 2BR - \$52; 3BR - \$64 (Source: GA-DCA South Region, 1/1/2022) Trash Removal - \$15 (Source: GA-DCA South Region, 1/1/2022) Age - \$1.00 per year (differential) Note: If difference is around 10 years, a choice is provided for no valuation adjustment.*

*Could be included with the year built (age) adjustment, thus in most cases will not be double counted/adjusted. Also, the value of condition is somewhat included within the Age adjustment. Thus, the value adjustment applied to Condition is conservative.

SECTION L & M

IDENTITY OF INTEREST & REPRESENTATION STATEMENT

I affirm that I have made a physical inspection of the market area and the subject property area and that information has been used in the full study of need and demand for the proposed units. The report was written according to DCA's market study requirements, the information included is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

DCA may rely upon the representation made in the market study. The document is assignable to other lenders.

CERTIFICATION

Koontz and Salinger P.O. Box 37523 Raleigh, North Carolina 27627

NCHMA Market Study Index

Members of the National Council of Housing Market Analysts provide the following checklist referencing various components necessary to conduct a comprehensive market study for rental housing. By completing the following checklist, the NCHMA Analyst certifies that he or she has performed all necessary work to support the conclusions included within the comprehensive market study. Similar to the Model Content Standards, General Requirements are detailed first, followed by requirements required for specific project types. Components reported in the market study are indicated by a page number.
