# **Section B – Executive Summary**

This report evaluates the market feasibility of the Peaks of Douglas rental community to be developed utilizing financing from the Low-Income Housing Tax Credit (LIHTC) program in Douglasville, Georgia. Based on the findings contained in this report, we believe a market exists for the subject development, assuming it is developed and operated as detailed in this report.

### 1. Project Description:

The subject project involves the new construction of the 56-unit Peaks of Douglas rental community at 4947 Stewart Mill Road in Douglasville, Georgia. The project will target senior households ages 55 and older earning up to 40%, 50%, 60% and 80% of Area Median Household Income (AMHI) under the Low-Income Housing Tax Credit (LIHTC) program. None of the units within the subject development will receive project-based rental assistance. The proposed project is expected to be complete by June 2025. Additional details of the subject development are summarized as follows:

|       | Proposed Unit Configuration |       |        |        |      |           |               |         |                  |  |  |  |  |
|-------|-----------------------------|-------|--------|--------|------|-----------|---------------|---------|------------------|--|--|--|--|
|       |                             |       |        |        |      |           | Program Rents |         |                  |  |  |  |  |
| Total | Bedroom                     |       | ~ -    | Square | %    | Collected | Utility       | Gross   | Max. Allowable   |  |  |  |  |
| Units | Туре                        | Baths | Style  | Feet   | AMHI | Rent      | Allowance     | Rent    | LIHTC Gross Rent |  |  |  |  |
| 1     | One-Br.                     | 1.0   | Garden | 708    | 40%  | \$595     | \$110         | \$705   | \$723            |  |  |  |  |

#### 2. Site Description/Evaluation:

The proposed subject site is located at 4947 Stewart Mill Road in the southern portion of Douglasville, Georgia. Surrounding land uses are primarily residential with some scattered commercial/office space development also within proximity. Wooded land also comprises a portion of the subject property and surrounding areas which provides a natural buffer to other surrounding land uses. Existing surrounding residential development was observed to be in good overall condition and is expected to have a positive impact on the subject's overall marketability. The site is clearly visible and easily accessible given its location along Stewart Mill Road and its proximity to other arterial roadways and major highways, including Interstate 20 which is accessible less than 1.0 mile north of the site. Most basic area services are also available within 0.3 miles of the site. Overall, the subject site location is considered conducive to affordable age-restricted rental product such as that proposed.

#### 3. Market Area Definition:

The Douglasville Site PMA includes the incorporated areas, or portions, of Douglasville, Lithia Springs and outlying unincorporated areas of Douglas County. The boundaries of the Douglasville Site PMA generally follow the Douglas County line and U.S. Highway 278 to the north; Thornton Road to the east; the Douglas County line, Bear Creek, Fouts Mill Road, Pumpkintown Road, Kings Highway, Dorsett Shoals Road and State Route 5 to the south; and Mobley Creek, Pool Road, Johnson Road, Post Road, Mason Creek Road, Mann Road, Cedar Mountain Road and Brittain Road to the west. The boundaries of the Douglasville Site PMA are generally within approximately 8.0 miles of the subject site. A map illustrating these boundaries is included on page E-2 of this report.

#### 4. Community Demographic Data:

The Douglasville Site PMA is projected to experience population and household growth between 2023 and 2025, a trend which has been ongoing since 2010 and is expected to result in increased housing demand. Household growth is expected to occur among several age cohorts, with households aged 65 and older projected to increase by 324 households during this time. The subject's target age cohort (age 55 and older) is projected to comprise nearly 40.0% of the overall household base within the Douglasville Site PMA in 2025. Further, more than 3,500 senior households aged 55 and older are projected to be renters in 2025, with more than half (55.2%) of these renter households projected to earn less than \$50,000. Based on the preceding factors and additional demographic data contained within this report, a good base of potential support for affordable age-restricted rental product exists within the Douglasville Site PMA.

Also note that based on 2017-2021 American Community Survey (ACS) data, 45.6% of the vacant housing units in the Site PMA are classified as "Other Vacant," which encompasses foreclosed, dilapidated and/or abandoned housing. Based on information obtained from RealtyTrac.com, there are currently 80 foreclosed properties available within Douglasville. Further, our survey of the Douglasville Site PMA revealed that the established conventional rental properties identified and surveyed are operating at strong occupancy levels. Based on the preceding analysis, it is our opinion that foreclosed/abandoned homes will not have any tangible impact on the subject's marketability. This is especially true when considering the limited availability of LIHTC product in the Douglasville market.

#### 5. Economic Data:

Similar to most markets throughout the country, Douglas County experienced an economic downturn in 2020 as a result of the pandemic. The rate of employment decline reported for the county in 2020 exceeded that reported for the state of Georgia while the unemployment rate spiked by nearly four full percentage points to a rate of 7.4% during the same time. Since, however, the county economy has recovered, adding nearly 6,300 new jobs to the county employment base while the unemployment rate declined by nearly four full percentage points through February of 2023. The employment base reported for the county is currently at its highest level for any given year over the past decade and the unemployment rate is lower than pre-pandemic levels. Based on the preceding factors, we expect the Douglas County economy will remain strong and continue to improve for the foreseeable future, particularly when considering the various economic development projects ongoing/ planned for the area. Additional economic data is included in *Section G* of this report.

## 6. Project-Specific Affordability and Demand Analysis:

|                             | Percent Of Median Household Income |             |             |             |          |  |  |  |
|-----------------------------|------------------------------------|-------------|-------------|-------------|----------|--|--|--|
| Demand Component            | 40%<br>AMHI                        | 50%<br>AMHI | 60%<br>AMHI | 80%<br>AMHI | Overall  |  |  |  |
| Net Demand                  | 128                                | 231         | 187         | 486         | 499      |  |  |  |
| Proposed Units / Net Demand | 7 / 128                            | 11 / 231    | 32 / 187    | 6 / 486     | 56 / 499 |  |  |  |
| Capture Rate                | 5.5%                               | 4.8%        | 17.1%       | 1.2%        | 11.2%    |  |  |  |

The following is a summary of our demand calculations:

\*Adjusted to represent no more than 2% of total demand per GDCA guidelines.

Per GDCA guidelines, capture rates below 30.0% for projects in the Metro Pool, such as the subject project located in Douglasville (Douglas County), are considered acceptable. Thus, the proposed project's overall capture rate of 11.2% is acceptable. This is particularly true when considering the strong occupancy rates and waiting lists maintained among the existing comparable age-restricted LIHTC properties in the market and surrounding region. Based on the preceding factors, the subject's capture rates by AMHI level are also considered acceptable, ranging from 1.2% to 17.1%.

It is important to reiterate, however, that while capture rate levels for the subject project are acceptable, there are two planned age-restricted LIHTC properties in the Douglasville Site PMA. While these properties are considered/included in our demand calculations which demonstrate a sufficient base of support for both the subject project and these additional planned properties, the addition of these properties prior to the opening of the subject project is likely to have a slowing impact on the absorption potential for the subject property.

Applying the shares of demand detailed in *Section H* to the income-qualified households and existing competitive supply yields demand and capture rates for the proposed units by bedroom type and AMHI level as follows:

| Bedroom Size<br>(Share Of Demand) | Target<br>% of<br>AMHI | Subject<br>Units | Total<br>Demand* | Supply** | Net<br>Demand | Capture<br>Rate |
|-----------------------------------|------------------------|------------------|------------------|----------|---------------|-----------------|
| One-Bedroom (50%)                 | 40%                    | 4                | 77               | 10       | 67            | 6.0%            |
| One-Bedroom (50%)                 | 50%                    | 7                | 116              | 0        | 116           | 6.0%            |
| One-Bedroom (50%)                 | 60%                    | 16               | 158              | 58       | 100           | 16.0%           |
| One-Bedroom (50%)                 | 80%                    | 3                | 251              | 6        | 245           | 1.2%            |
| One-Bedroom                       | Total                  | 30               | 602              | 74       | 528           | 5.7%            |
|                                   |                        | -                | -                | -        |               |                 |
| Two-Bedroom (50%)                 | 40%                    | 3                | 77               | 16       | 61            | 4.9%            |
| Two-Bedroom (50%)                 | 50%                    | 4                | 115              | 0        | 115           | 3.5%            |
| Two-Bedroom (50%)                 | 60%                    | 16               | 157              | 70       | 87            | 18.4%           |
| Two-Bedroom (50%)                 | 80%                    | 3                | 251              | 10       | 241           | 1.2%            |
| Two-Bedroom                       | Total                  | 26               | 600              | 96       | 504           | 5.2%            |

\*Includes overlap between the targeted income levels at the subject site.

\*\*Directly comparable units built and/or funded in the project market over the projection period.

The capture rates by bedroom type and targeted income level range from 1.2% to 18.4%. These capture rates are below GDCA's capture rate thresholds and are considered achievable. This indicates that a sufficient base of age- and income-appropriate renter household support exists in the Douglasville Site PMA for each of the unit types proposed for the subject development.

Detailed demand calculations are provided in Section H of this report.

## 7. Competitive Rental Analysis

#### Tax Credit

The proposed subject property will offer one- and two-bedroom units restricted to seniors aged 55 and older earning up to 40%, 50%, 60%, and 80% of Area Median Household Income (AMHI) under the Low-Income Housing Tax Credit (LIHTC) program. Within the Douglasville Site PMA, we identified and surveyed one existing age-restricted property and two general-occupancy properties which offer non-subsidized Tax Credit units similar to those proposed for the subject site in terms of bedroom type and/or targeted income (AMHI) level. We recognize the subject property will not be directly competitive with general-occupancy product in this market. However, when considering the limited supply of age-restricted LIHTC product in the area, non-subsidized general-occupancy LIHTC properties will offer a good additional base of comparison for the subject property.

In addition to the properties surveyed within the Douglasville Site PMA, we also identified and surveyed one additional age-restricted LIHTC property located on the periphery of the northeast Douglasville Site PMA boundary. Thus, this property was also selected and included in this analysis.

The four comparable LIHTC properties and the proposed subject development are summarized as follows. Information regarding property address and phone number, contact name, date of contact and utility responsibility is included in *Addendum B*, *Comparable Property Profiles*.

OCC. - Occupancy; HH - Households

\*Tax Credit units only; \*\*Units under construction

The four LIHTC projects have a combined occupancy rate of 100.0% and three of the four maintain waiting lists for their next available units. Notably, the two age-restricted LIHTC properties surveyed maintain waiting lists which range from 102 to 250-households. This demonstrates significant pent-up demand for additional age-restricted LIHTC product in the Douglasville area. The subject property will help to alleviate a portion of this pent-up demand.

Also note that the newest LIHTC property surveyed, Reserve at Douglasville, opened in March of 2023 and is currently 100.0% occupied. This property did, however, conduct a preleasing period which commenced in February of 2023. While it is unknown when this property first reached 100.0% occupancy, it was no more than three months after preleasing began, based on the date of our survey. Considering a three-month absorption period, this property experienced an average absorption rate of approximately 41 units per month. This is considered a very rapid absorption rate and further demonstrates the strength of the LIHTC market within the Douglasville area.

The gross rents for the comparable projects and the proposed rents at the subject site, as well as their unit mixes and vacancies by bedroom are listed in the following table:

|                   |                              | Gross Rent/Percent of AMHI<br>(Number of Units/Vacancies) |                    |                        |         |  |  |

\*Units under construction

^Age-restricted

The subject's proposed gross Tax Credit rents are within the range of those reported for similar unit types offered among the comparable properties. Most notably, the subject rents are positioned lower than those reported for the newest property located in the Douglasville Site PMA (Reserve at Douglasville) as well as those reported for one of the age-restricted properties (Heritage at Walton Reserve) surveyed. Therefore, the subject rents are considered marketable within the Douglasville area.

It is also of note that the subject property will offer the only units targeting households earning up to 40% and 80% of AMHI among the comparable properties. The inclusion of such units is expected to create a competitive advantage for the property.

#### Comparable/Competitive Tax Credit Summary

The four comparable LIHTC properties surveyed within the area are all 100.0% occupied and three of the four maintain waiting lists for their next available units. Notably, the two age-restricted properties surveyed maintain waiting lists ranging from 102 to 250-households for their next available units. The subject property will help to alleviate a portion of this pent-up demand. The property is also considered competitive and marketable in terms of price point (gross rent), overall design, and amenities offered.

An in-depth comparable analysis is included in *Section I* of this report.

#### Achievable Market Rent

Based on Rent Comparability Grids included in *Section I*, the achievable market rents determined for the subject project are summarized as follows:

| Bedroom<br>Type | %<br>AMHI | Proposed<br>Collected Rent | Achievable<br>Market Rent | Market Rent<br>Advantage |
|-----------------|-----------|----------------------------|---------------------------|--------------------------|
| One-Bedroom     | 40%       | \$595                      | \$1,370                   | 56.6%                    |
| One-Bedroom     | 50%       | \$725                      | \$1,370                   | 47.1%                    |
| One-Bedroom     | 60%       | \$875                      | \$1,370                   | 36.1%                    |
| One-Bedroom     | 80%       | \$950                      | \$1,370                   | 30.7%                    |
| Two-Bedroom     | 40%       | \$695                      | \$1,600                   | 56.6%                    |
| Two-Bedroom     | 50%       | \$875 - \$900              | \$1,600                   | 43.8% - 45.3%            |
| Two-Bedroom     | 60%       | \$1,050                    | \$1,600                   | 34.4%                    |
| Two-Bedroom     | 80%       | \$1,150                    | \$1,600                   | 28.1%                    |

Typically, Tax Credit rents for units targeting households earning up to 60% of AMHI are set at least 10% below achievable market rents to ensure that the project will represent a sufficient value and have a good flow of tenants. While units targeting higher income levels, such as the subject units at 80% of AMHI, typically do not need to represent a 10% market rent advantage to be perceived a sufficient value, it is often recommended that rents for such units represent around a 5% market rent advantage. Regardless, the subject rents represent market rent advantages ranging from 28.1% to 56.6%, including the units targeting households earning up to 80% of AMHI. Thus, the subject property is expected to be perceived a very good value within the Douglasville market.

# 8. Absorption/Stabilization Estimates

Based on our analysis, it is our opinion that the 56 proposed units for the subject site will reach a stabilized occupancy of at least 93.0% within approximately four months of opening. This absorption period is based on an average monthly absorption rate of approximately 13 units per month.

#### 9. Overall Conclusion:

Based on the preceding factors, the subject property is considered marketable and supportable within the Douglasville Site PMA. We have no recommendations to the subject project at this time.

# Section C - Project Description

| Project Name:      | Peaks of Douglas   |
|--------------------|--|
| Location:          | 4947 Stewart Mill Road, Douglasville, Georgia 30135 (Douglas County) |
| Census Tract:      | 805.09   |
| Target Market:     | Senior Age 55+   |
| Construction Type: | New Construction   |
| Funding Source:    | LIHTC  |

The subject project involves the new construction of the 56-unit Peaks of Douglas rental community at 4947 Stewart Mill Road in Douglasville, Georgia. The project will target senior households ages 55 and older earning up to 40%, 50%, 60% and 80% of Area Median Household Income (AMHI) under the Low-Income Housing Tax Credit (LIHTC) program. None of the units within the subject development will receive project-based rental assistance. The proposed project is expected to be complete by June 2025. Additional details of the subject development are summarized as follows:

|       | Proposed Unit Configuration |        |        |        |      |               |           |         |                  |  |

## FLOOR AND SITE PLAN REVIEW:

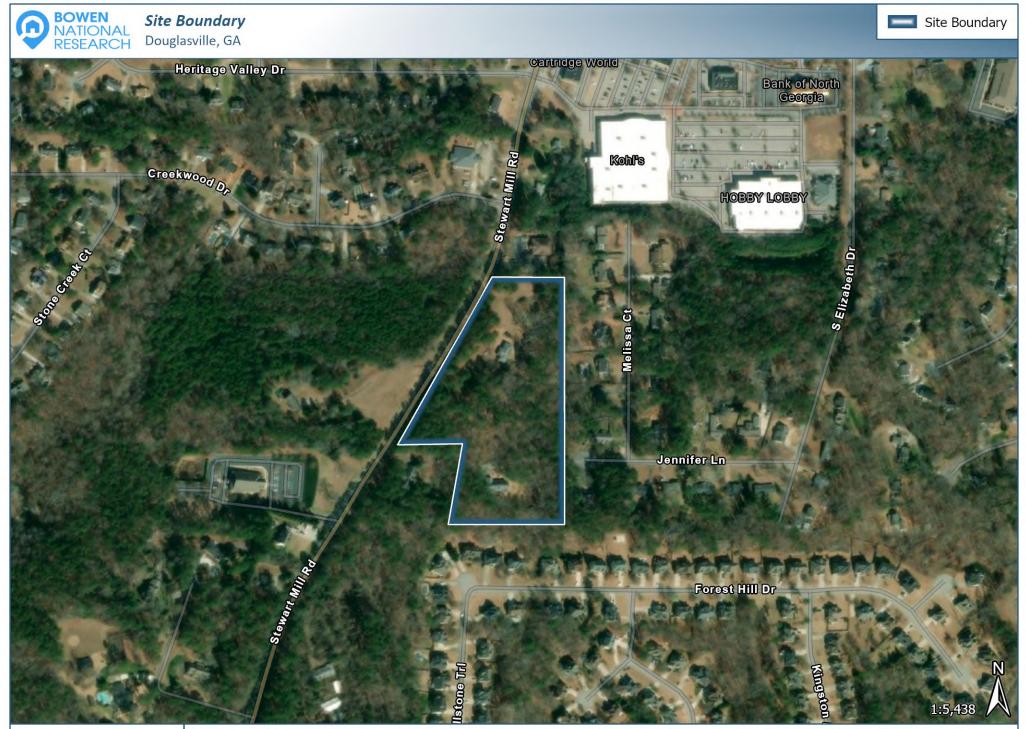

Floor and site plans were not provided for the subject project for review at the time this report was prepared. Information provided at the time of this analysis, however, indicates that the subject property will include one- and two-bedroom garden-style units located within a mix of one- and three-story buildings. The three-story building will have elevator-access. The subject units will range in size from 708 to 996 square feet, with the two-bedroom units including two (2.0) bathrooms and the one-bedroom units offering one (1.0) bathroom. Each unit will come well-equipped in terms of unit amenities and will feature a full kitchen appliance package and dedicated laundry area with washer/dryer appliances.

In addition to the subject's residential units, the property will feature an array of community amenities integrated throughout the property. These will include but not be limited to a community space, on-site management office, fitness center, and community garden which will further enhance marketability of the subject project. The subject property appears to be marketable in terms of overall design. Nonetheless, an in-depth comparable/competitive analysis is included in Section I to better determine the competitive position and overall marketability of the subject project within the Douglasville market.

A state map, an area map and a site neighborhood map are on the following pages.

# Section D – Site Evaluation

# 1. LOCATION

The subject site is located at 4947 Stewart Mill Road and comprised of partially wooded and undeveloped land as well as two single-family homes in the southeastern portion of Douglasville, Georgia. Situated in the northern portion of Douglas County, Douglasville is approximately 21.0 miles west of Atlanta, Georgia. Andrew Lundell, an employee of Bowen National Research, inspected the site and area apartments during the week of April 9th, 2023.

# 2. SURROUNDING LAND USES

The subject site is within primarily residential area of Douglasville, Georgia. Surrounding land uses include single-family and multifamily residential buildings, wooded land, a church, and various area businesses. Adjacent land uses are detailed as follows:

| North - | Directly north of the site are the Park Orthodontics offices. Continuing<br>north are single-family homes in good condition, a shopping center<br>which contains a Hobby Lobby, Kohl's, and Target, in addition to<br>numerous other smaller shopping and dining establishments. Areas<br>beyond are comprised of additional commercial/retail development |
|---------|--|
|         | which extends towards Interstate 20.   |
| East -  | East/southeast of the site are single-family homes in good condition.  |
|         | Continuing east are additional single-family homes in good condition,  |
|         | a golf course, and wooded/undeveloped land.  |
| South - | South of the site are single-family homes in good condition which  |
|         | extend south for a considerable distance along with wooded/  |
|         | undeveloped land.  |
| West -  | The western site boundary is defined by Stewart Mill Road, a two-lane  |
|         | vehicular roadway with moderate traffic. Continuing west is wooded   |
|         | land, Grace Presbyterian Church, and numerous single-family homes  |
|         | which are generally in good condition.   |

Overall, the subject property is expected to fit well with the surrounding residential land uses which are generally well-maintained and expected to have a positive impact on the overall marketability of the subject property.

# 3. VISIBILITY AND ACCESS

The subject property maintains considerable frontage along Stewart Mill Road which borders the site to the west and will provide good passerby traffic to the property. While the subject site is currently partially wooded and it is expected that some wooded portions of the property will remain, we also expect the subject buildings to be at least partially visible from Stewart Mill Road. We also anticipate proper site signage being provided and visible at/near the ingress point(s) for the property.

Site plans depicting specific ingress/egress points for the property were not available/ provided for review at the time of this analysis. However, it is anticipated that the property will derive vehicular access from Stewart Mill Road, a two-lane roadway that provides direct access to/from Chapel Hill Road north of the site. Notably, Chapel Hill Road provides direct access to/from Interstate 20, which is accessible less than one mile north of the site. Additionally, a Connect Douglas bus stop is located 0.3 miles north of the site, which provides area residents with access to the greater Douglas County area.

Based on the preceding factors, both visibility and access are considered good and expected to have a positive impact on the subject's overall marketability.

# 4. <u>SITE PHOTOGRAPHS</u>

The proposed site is located within an established area of Douglasville and is subsequently within 2.0 miles of most essential community services. Of note, many services are located around the Douglasville Pavilion and Arbor Place shopping centers, which are anchored by Target, Hobby Lobby, Aldi, and Kohl's. The area provides numerous dining and shopping options for area residents. Also of note, a Connect Douglas bus stop is conveniently located 0.3 miles north of the site, which will provide residents with additional transportation options to nearby areas of Douglas County.

Public safety services are provided by the Douglas County Fire Department and the Douglasville Police Department, both of which operate stations within approximately 3.0 miles of the site. An urgent care facility is located 0.5 miles from the site, and a full-service hospital is also available 1.6 miles from the site.

Maps illustrating the location of community services are on the following pages.

## 6. CRIME ISSUES

The primary source for Crime Risk data is the FBI Uniform Crime Report (UCR). The FBI collects data from each of roughly 16,000 separate law enforcement jurisdictions across the country and compiles this data into the UCR. The most recent update showed an overall coverage rate of 95% of all jurisdictions nationwide with a coverage rate of 97% of all jurisdictions in metropolitan areas.

Applied Geographic Solutions uses the UCR at the jurisdictional level to model each of the seven crime types at other levels of geography. Risk indexes are standardized based on the national average. A Risk Index value of 100 for a particular risk indicates that, for the area, the relative probability of the risk is consistent with the average probability of that risk across the United States.

It should be noted that aggregate indexes for total crime, personal crime and property crime are not weighted, and murder is no more significant statistically in these indexes than petty theft. Thus, caution should be exercised when using them.

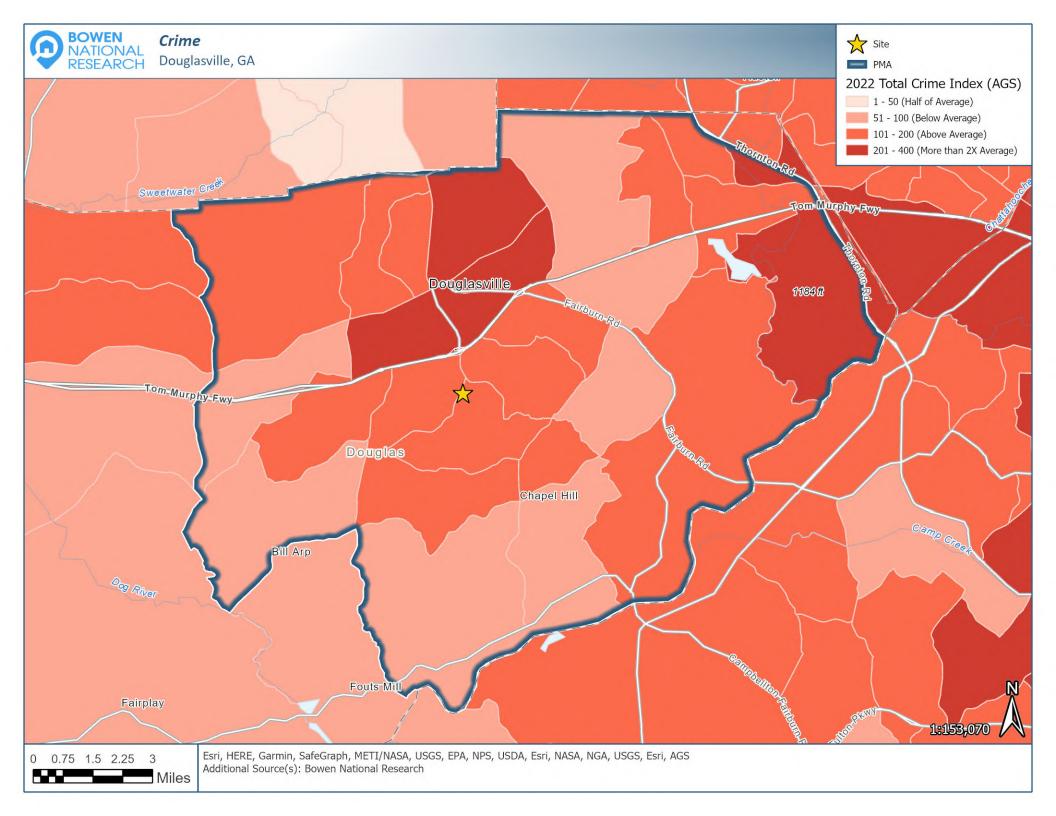

Total crime risk for the Site PMA is 152, with an overall personal crime index of 116 and a property crime index of 158. Total crime risk for Douglas County is 142, with personal and property crime indices of 107 and 148, respectively.

|                      | Crime | Crime Risk Index |  |  |  |
|----------------------|-------|------------------|--|--|--|
|                      | PMA   | Douglas County   |  |  |  |
| Total Crime Index    | 152   | 142              |  |  |  |
| Personal Crime Index | 116   | 107              |  |  |  |
| Murder               | 156   | 140              |  |  |  |
| Rape                 | 96    | 95               |  |  |  |
| Robbery              | 110   | 100              |  |  |  |
| Assault              | 120   | 111              |  |  |  |
| Property Crime Index | 158   | 148              |  |  |  |
| Burglary             | 126   | 120              |  |  |  |
| Larceny              | 170   | 159              |  |  |  |
| Motor Vehicle Theft  | 125   | 120              |  |  |  |

Source: Applied Geographic Solutions, FBI, ESRI

The crime risk index reported for the Site PMA (152) is very similar to that reported for Douglas County (142). Both are slightly above the national average of 100 but are considered relatively low for an established and densely populated area such as the Douglasville market. Further, the generally strong occupancy rates reported among the surveyed properties within the Douglasville Site PMA demonstrate that crime is not a factor which adversely impacts marketability and occupancy rates of area rental properties.

A map illustrating crime risk is on the following page.

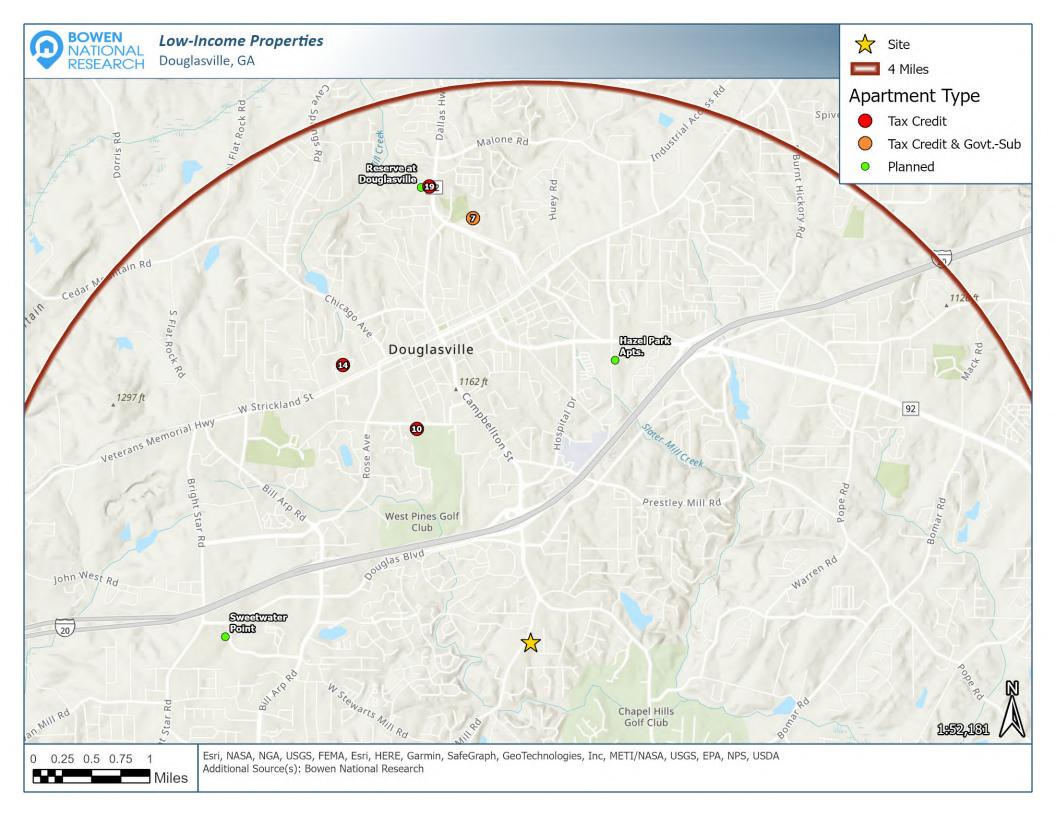

# 7. OVERALL SITE EVALUATION

The proposed subject site is located at 4947 Stewart Mill Road in the southern portion of Douglasville, Georgia. Surrounding land uses are primarily residential with some scattered commercial/office space development also within proximity. Wooded land also comprises a portion of the subject property and surrounding areas which provides a natural buffer to other surrounding land uses. Existing surrounding residential development was observed to be in good overall condition and is expected to have a positive impact on the subject's overall marketability. The site is clearly visible and easily accessible given its location along Stewart Mill Road and its proximity to other arterial roadways and major highways, including Interstate 20 which is accessible less than 1.0 mile north of the site. Most basic area services are also available within 0.3 miles of the site. Overall, the subject site location is considered conducive to affordable age-restricted rental product such as that proposed.

# 8. MAP OF LOW-INCOME RENTAL HOUSING

A map illustrating the location of low-income rental housing (4% and 9% Tax Credit Properties, Tax Exempt Bond Projects, Rural Development Properties, HUD Section 8 and Public Housing, etc.) identified/surveyed in the Site PMA is included on the following page.

# Section E – Market Area

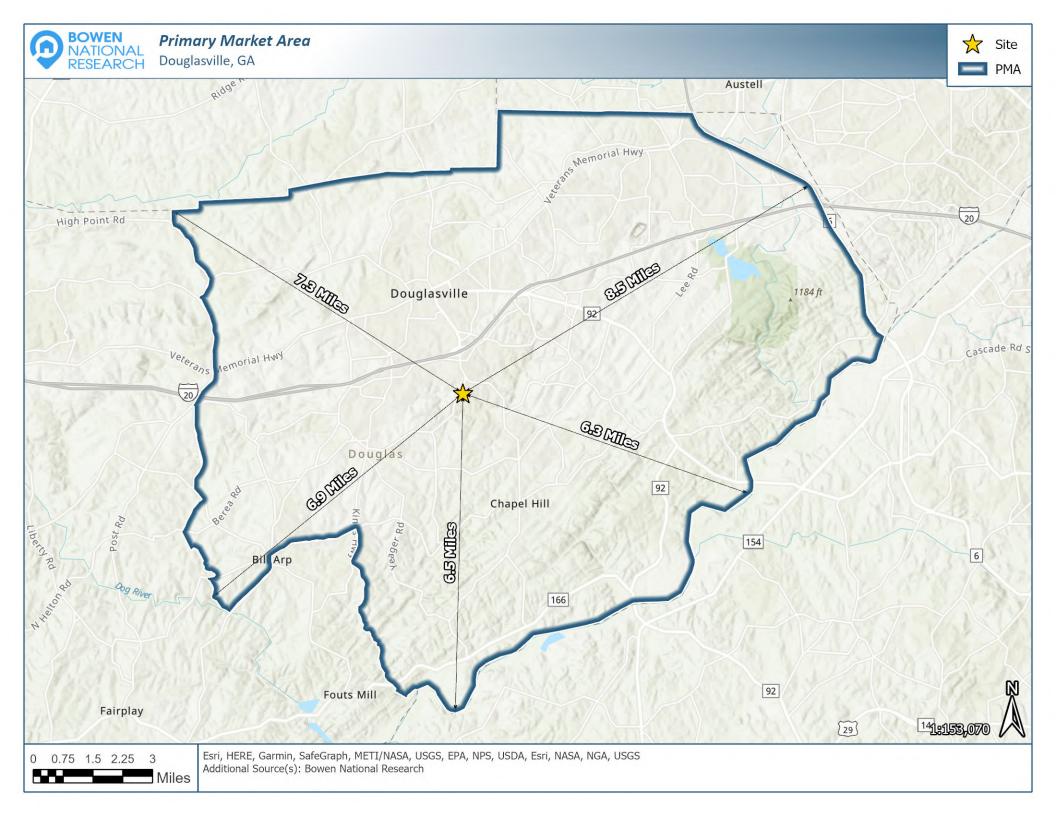

The Site Primary Market Area (PMA) is the geographical area from which comparable properties and potential renters are expected to be drawn from. It is also the geographic area expected to generate the most demographic support for the subject development. The Douglasville Site PMA was determined through interviews with area leasing agents and the personal observations of our analysts. The personal observations of our analysts include physical and/or socioeconomic differences in the market and a demographic analysis of the area households and population.

The Douglasville Site PMA includes the incorporated areas, or portions, of Douglasville, Lithia Springs and outlying unincorporated areas of Douglas County. The boundaries of the Douglasville Site PMA generally follow the Douglas County line and U.S. Highway 278 to the north; Thornton Road to the east; the Douglas County line, Bear Creek, Fouts Mill Road, Pumpkintown Road, Kings Highway, Dorsett Shoals Road and State Route 5 to the south; and Mobley Creek, Pool Road, Johnson Road, Post Road, Mason Creek Road, Mann Road, Cedar Mountain Road and Brittain Road to the west. The boundaries of the Douglasville Site PMA are generally within approximately 8.0 miles of the subject site.

Sandra Starr is the Property Manager for Highland Park Senior Village, a Tax Credit apartment community located in Douglasville. Starr confirmed the boundaries of the PMA, indicating that she receives most of her support from the Douglasville and Lithia Springs areas. Additionally, Starr stated that Highland Park Senior Village experiences very low tenant turnover, and that area residents typically want to stay within the PMA areas. In Starr's opinion, any new affordable developments, particularly those that target senior populations, would easily reach stabilized occupancy from the areas comprised within the Douglasville Site PMA.

While we recognize the subject property will undoubtedly receive some support from areas located outside the boundaries of the Douglasville Site PMA, this potential base of support is expected to be nominal. The majority of support for the property is anticipated to originate from within the Douglasville Site PMA boundaries. We have not considered a secondary market area as part of this analysis.

A map delineating the boundaries of the Site PMA is included on the following page.

# Section F – Community Demographic Data

The following demographic data relates to the Site PMA. It is important to note that not all estimates/projections quoted in this section agree because of the variety of sources and rounding methods used. In most cases, the differences in the estimates/projections do not vary more than 1.0%.

## 1. POPULATION TRENDS

The Site PMA population bases for 2010, 2020, 2023 (estimated), and 2025 (projected) are summarized as follows:

|                   |          | Year     |             |             |  |  |  |  |  |
|-------------------|----------|----------|-------------|-------------|--|--|--|--|--|
|                   | 2010     | 2020     | 2023        | 2025        |  |  |  |  |  |
|                   | (Census) | (Census) | (Estimated) | (Projected) |  |  |  |  |  |
| Population        | 108,602  | 117,509  | 119,552     | 120,729     |  |  |  |  |  |
| Population Change | -        | 8,907    | 2,043       | 1,177       |  |  |  |  |  |
| Percent Change    | -        | 8.2%     | 1.7%        | 1.0%        |  |  |  |  |  |

Source: 2010 & 2020 Census; ESRI; Bowen National Research

The Douglasville Site PMA population base increased by 8,907 between 2010 and 2020. This represents an 8.2% increase over the 2010 population, or an annual rate of 0.8%. Between 2020 and 2023, the population increased by 2,043, or 1.7%. It is projected that the population will increase by 1,177, or 1.0%, between 2023 and 2025.

The Site PMA population bases by age are summarized as follows:

| Population | 2010 (0 | 2010 (Census) 2023 (Estimated) 2025 (Projected) |         | ojected) | Change 2 | 023-2025 |        |         |
|------------|---------|---|---------|----------|----------|----------|--------|---------|
| by Age     | Number  | Percent   | Number  | Percent  | Number   | Percent  | Number | Percent |
| 19 & Under | 33,830  | 31.2%   | 32,061  | 26.8%    | 32,344   | 26.8%    | 282    | 0.9%    |
| 20 to 24   | 6,333   | 5.8%  | 7,224   | 6.0%     | 6,978    | 5.8%     | -246   | -3.4%   |
| 25 to 34   | 14,562  | 13.4%   | 18,298  | 15.3%    | 18,695   | 15.5%    | 396    | 2.2%    |
| 35 to 44   | 17,983  | 16.6%   | 16,340  | 13.7%    | 16,779   | 13.9%    | 440    | 2.7%    |
| 45 to 54   | 15,817  | 14.6%   | 16,277  | 13.6%    | 15,800   | 13.1%    | -477   | -2.9%   |
| 55 to 64   | 10,919  | 10.1%   | 14,109  | 11.8%    | 14,071   | 11.7%    | -38    | -0.3%   |
| 65 to 74   | 5,834   | 5.4%  | 9,796   | 8.2%     | 10,077   | 8.3%     | 282    | 2.9%    |
| 75 & Older | 3,324   | 3.1%  | 5,446   | 4.6%     | 5,985    | 5.0%     | 538    | 9.9%    |
| Total      | 108,602 | 100.0%  | 119,552 | 100.0%   | 120,729  | 100.0%   | 1,177  | 1.0%    |

Source: Bowen National Research, ESRI, Census

As detailed throughout this report, the subject property will be restricted to seniors aged 55 and older, an age group which comprises nearly 25% of the population within the Douglasville Site PMA.

|                 | Year           |  |         |         |         |         |  |  |  |
|-----------------|----------------|--|---------|---------|---------|---------|--|--|--|
|                 | <b>2010</b> (C | 2010 (Census) 2023 (Estimate) 2025 (Projected) |         |         |         |         |  |  |  |
| Population Type | Number Percent |  | Number  | Percent | Number  | Percent |  |  |  |
| Elderly (62+)   | 12,434         | 11.4%  | 19,475  | 16.3%   | 20,283  | 16.8%   |  |  |  |
| Non-Elderly     | 96,168         | 88.6%  | 100,077 | 83.7%   | 100,446 | 83.2%   |  |  |  |
| Total           | 108,602        | 100.0%   | 119,552 | 100.0%  | 120,729 | 100.0%  |  |  |  |

The non-elderly and elderly (age 62 and older) populations are distributed as follows:

Source: American Community Survey (2017-2021); ESRI; Bowen National Research

The elderly population is projected to increase by 808, or 4.1%, between 2023 and 2025. This will likely increase the demand for senior-oriented housing.

# 2. HOUSEHOLD TRENDS

Household trends within the Douglasville Site PMA are summarized as follows:

|                        | Year             |                  |                     |                     |  |  |  |  |
|------------------------|------------------|------------------|---------------------|---------------------|--|--|--|--|
|                        | 2010<br>(Census) | 2020<br>(Census) | 2023<br>(Estimated) | 2025<br>(Projected) |  |  |  |  |
| Households             | 38,203           | 41,547           | 42,302              | 42,740              |  |  |  |  |
| Household Change       | -                | 3,344            | 755                 | 438                 |  |  |  |  |
| Percent Change         | -                | 8.8%             | 1.8%                | 1.0%                |  |  |  |  |
| Average Household Size | 2.8              | 2.81             | 2.81                | 2.80                |  |  |  |  |

Source: Bowen National Research, ESRI, Census

Within the Douglasville Site PMA, households increased by 3,344 (8.8%) between 2010 and 2020. Between 2020 and 2023, households increased by 755 or 1.8%. By 2025, there will be 42,740 households, an increase of 438 households, or 1.0% over 2023 levels. This is an increase of approximately 219 households annually over the next two years.

The Site PMA household bases by age are summarized as follows:

| Households | 2010 (0 | Census) | 2023 (Estimated) |         | 2025 (Projected) |         | Change 2023-2025 |         |
|------------|---------|---------|------------------|---------|------------------|---------|------------------|---------|
| by Age     | Number  | Percent | Number           | Percent | Number           | Percent | Number           | Percent |
| Under 25   | 1,193   | 3.1%    | 1,116            | 2.6%    | 1,103            | 2.6%    | -13              | -1.2%   |
| 25 to 34   | 6,443   | 16.9%   | 7,620            | 18.0%   | 7,785            | 18.2%   | 165              | 2.2%    |
| 35 to 44   | 9,886   | 25.9%   | 8,549            | 20.2%   | 8,742            | 20.5%   | 193              | 2.3%    |
| 45 to 54   | 8,894   | 23.3%   | 8,684            | 20.5%   | 8,401            | 19.7%   | -282             | -3.3%   |
| 55 to 64   | 6,245   | 16.3%   | 7,610            | 18.0%   | 7,569            | 17.7%   | -41              | -0.5%   |
| 65 to 74   | 3,539   | 9.3%    | 5,574            | 13.2%   | 5,705            | 13.3%   | 131              | 2.4%    |

Source: Bowen National Research, ESRI, Census

Household growth is projected to occur among several age cohorts between 2023 and 2025, though the greatest growth is projected to occur among seniors aged 75 and older. Further, households aged 55 and older are projected to comprise more than 39.0% of the overall household base in 2025.

Households by tenure in 2010 (census), 2023 (estimated), and 2025 (projected) are distributed as follows:

|                 | 2010 (Census) |         | 2023 (Est | timated) | 2025 (Projected) |         |
|-----------------|---------------|---------|-----------|----------|------------------|---------|
| Tenure          | Number        | Percent | Number    | Percent  | Number           | Percent |
| Owner-Occupied  | 26,201        | 68.6%   | 27,789    | 65.7%    | 28,248           | 66.1%   |
| Renter-Occupied | 12,002        | 31.4%   | 14,513    | 34.3%    | 14,492           | 33.9%   |
| Total           | 38,203        | 100%    | 42,302    | 100.0%   | 42,740           | 100.0%  |

Source: Bowen National Research, ESRI, Census

In 2023, homeowners occupied 65.7% of all occupied housing units, while the remaining 34.3% were occupied by renters.

Households by tenure for those age 55 and older in 2023 (estimated) and 2025 (projected) are distributed as follows:

|                 | 2023 (Estimated) |         | 2025 (Projected) |         |  |
|-----------------|------------------|---------|------------------|---------|--|
| Tenure (55+)    | Number           | Percent | Number           | Percent |  |
| Owner-Occupied  | 12,880           | 78.9%   | 13,204           | 79.0%   |  |
| Renter-Occupied | 3,454            | 21.1%   | 3,505            | 21.0%   |  |
| Total           | 16,334           | 100.0%  | 16,709           | 100.0%  |  |

Source: Bowen National Research, ESRI, Census

In 2023, homeowners occupied 78.9% of all senior occupied housing units, while the remaining 21.1% were occupied by renters. The share of renters is relatively low but is not uncommon of a suburban area such as the Douglasville Site PMA.

Households by tenure are distributed as follows for those under age 62 and age 62 and older:

| Distribution  | 2023 (Es | timated) | 2025 (Projected) |         |  |
|---|----------|----------|------------------|---------|--|
| of Households   | Number   | Percent  | Number           | Percent |  |

The one- and two-bedroom units proposed for the subject project are expected to primarily house up to two-person senior households. Notably, more than threequarters (78.2%) of all senior renter households are comprised of one or two persons. As such, the subject project will be able to accommodate most senior renter households in this market, based on household size.

The distribution of households by income within the Douglasville Site PMA is summarized as follows:

| Household Income      | 2010 (C | Census) | 2023 (Es | timated) | 2025 (Projected) |          |  |

### **Demographic Summary**

The Douglasville Site PMA is projected to experience population and household growth between 2023 and 2025, a trend which has been ongoing since 2010 and is expected to result in increased housing demand. Household growth is expected to occur among several age cohorts, with households aged 65 and older projected to increase by 324 households during this time. The subject's target age cohort (age 55 and older) is projected to comprise nearly 40.0% of the overall household base within the Douglasville Site PMA in 2025. Further, more than 3,500 senior households aged 55 and older are projected to be renters in 2025, with more than half (55.2%) of these renter households projected to earn less than \$50,000. Based on the preceding factors and additional demographic data contained within this report, a good base of potential support for affordable age-restricted rental product exists within the Douglasville Site PMA.

# Section G – Employment Trend

## 1. LABOR FORCE PROFILE

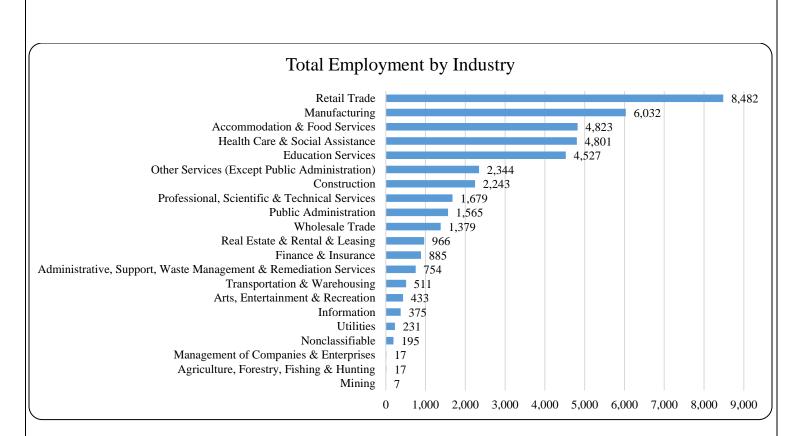

The labor force within the Douglasville Site PMA is based primarily in five sectors. Retail Trade (which comprises 20.1%), Manufacturing, Accommodation & Food Services, Health Care & Social Assistance, and Education Services comprise nearly 67.8% of the Site PMA labor force. Employment in the Douglasville Site PMA, as of 2022, was distributed as follows:

| NAICS Group  | Establishments | Percent | Employees | Percent | E.P.E. |
|--|----------------|---------|-----------|---------|--------|
| Agriculture, Forestry, Fishing & Hunting                         | 6              | 0.2%    | 17        | 0.0%    | 3      |
| Mining   | 1              | 0.0%    | 7         | 0.0%    | 7      |
| Utilities  | 4              | 0.1%    | 231       | 0.5%    | 58     |
| Construction   | 286            | 7.8%    | 2,243     | 5.3%    | 8      |
| Manufacturing  | 107            | 2.9%    | 6,032     | 14.3%   | 56     |
| Wholesale Trade  | 121            | 3.3%    | 1,379     | 3.3%    | 11     |
| Retail Trade   | 599            | 16.3%   | 8,482     | 20.1%   | 14     |
| Transportation & Warehousing                                     | 75             | 2.0%    | 511       | 1.2%    | 7      |
| Information  | 53             | 1.4%    | 375       | 0.9%    | 7      |

MSA - Atlanta-Sandy Springs-Alpharetta, GA Metro Area

Most typical wages within the MSA are higher than the state of Georgia's typical wages. It is important to reiterate, however, that since the subject property will be restricted to seniors aged 55 and older, many tenants are likely to be retired and/or living on a fixed-income. Therefore, typical area wages are likely to have less of an impact on the subject property as compared to a traditional general-occupancy property.

## 2. MAJOR EMPLOYERS

The ten largest employers within the Douglas County area are summarized in the following table (please note that the specific number of employees for each employer was not available):

| Employer Name                      | Business Type                     |
|------------------------------------|-----------------------------------|
| Amazon.Com Services, Inc.          | Distribution                      |
| Gordon Food Service, Inc.          | Food Manufacturing & Distribution |
| J B Hunt Transport                 | Shipping & Freight Solutions      |
| McMaster-Carr Supply Company       | Manufacturing Material Production |
| Medline Industries, Inc.           | Healthcare Product Manufacturing  |
| Publix Super Markets, Inc.         | Retail                            |
| Silver Line Building Products, LLC | Building Supplies Manufacturing   |
| Stitch Fix, Inc.                   | Personal Style Service            |
| Walmart                            | Retail                            |
| Wellstar Health System, Inc.       | Hospital                          |

## WARN (layoff notices):

WARN Notices of large-scale layoffs/closures were reviewed on April 20, 2023, and according to the Technical College System of Georgia, there have been no WARN notices reported for Douglas County.

## 3. EMPLOYMENT TRENDS

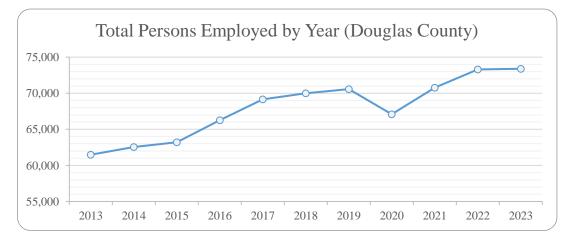

The following tables were generated from the U.S. Department of Labor, Bureau of Labor Statistics and reflect employment trends of the county in which the site is located.

The following illustrates the total employment base for Douglas County, the state of Georgia, and the United States. Total employment reflects the number of employed persons who live within the county.

|      | Total Employment |         |               |        |               |         |  |
|------|------------------|---------|---------------|--------|---------------|---------|--|

Source: Bureau of Labor Statistics

\*Through February 2023; \*\*Through March 2023

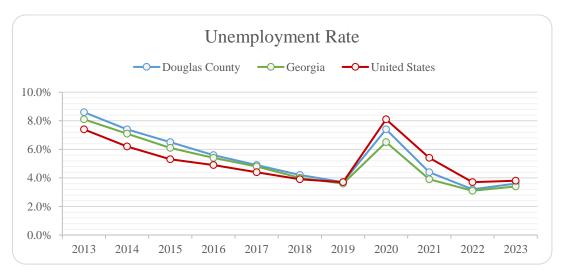

As the preceding illustrates, the Douglas County employment base declined by nearly 5.0% in 2020 as a direct result of the pandemic during this time. The rate of decline (4.9%) reported for the county in 2020 was slightly higher than that reported for the state of Georgia (4.2%) but lower than the national average (6.2%). Since 2020, the county employment base has increased by 6,298, or 9.4%, through February of 2023. The employment base reported through February of 2023 (73,390) for the county is the largest reported for any given year over the past decade.

Unemployment rates for Douglas County, the state of Georgia, and the United States are illustrated as follows:

|      | Unemployment Rate |         |               |  |  |  |
|------|-------------------|---------|---------------|--|--|--|
| Year | Douglas County    | Georgia | United States |  |  |  |
| 2013 | 8.6%              | 8.1%    | 7.4%          |  |  |  |
| 2014 | 7.4%              | 7.1%    | 6.2%          |  |  |  |
| 2015 | 6.5%              | 6.1%    | 5.3%          |  |  |  |
| 2016 | 5.6%              | 5.4%    | 4.9%          |  |  |  |
| 2017 | 4.9%              | 4.8%    | 4.4%          |  |  |  |
| 2018 | 4.2%              | 4.0%    | 3.9%          |  |  |  |
| 2019 | 3.7%              | 3.6%    | 3.7%          |  |  |  |
| 2020 | 7.4%              | 6.5%    | 8.1%          |  |  |  |
| 2021 | 4.4%              | 3.9%    | 5.4%          |  |  |  |
| 2022 | 3.2%              | 3.1%    | 3.7%          |  |  |  |
| 2023 | 3.6%*             | 3.4%*   | 3.8%**        |  |  |  |

Source: Department of Labor, Bureau of Labor Statistics

\*Through February 2023; \*\*Through March 2023

The annual unemployment rate within Douglas County spiked by nearly four full percentage points to a rate of 7.4% in 2020 as a result of the pandemic. This rate was higher than that reported for the state of Georgia (6.5%) during this time. However, since 2020, the county unemployment rate has declined to a rate of 3.6% through February of 2023, which is very similar to the statewide average (3.4%) and slightly lower than the national average (3.8%). The current unemployment rate for the county is also lower than pre-pandemic levels.

In-place employment reflects the total number of jobs within the county regardless of the employee's county of residence. The following illustrates the total in-place employment base for Douglas County.

|       | In-Place Employment Douglas County |        |                |  |  |  |  |
|-------|------------------------------------|--------|----------------|--|--|--|--|
| Year  | Employment                         | Change | Percent Change |  |  |  |  |
| 2012  | 36,659                             | -      | -              |  |  |  |  |
| 2013  | 37,793                             | 1,134  | 3.1%           |  |  |  |  |
| 2014  | 38,913                             | 1,120  | 3.0%           |  |  |  |  |
| 2015  | 39,841                             | 928    | 2.4%           |  |  |  |  |
| 2016  | 41,519                             | 1,678  | 4.2%           |  |  |  |  |
| 2017  | 42,120                             | 601    | 1.4%           |  |  |  |  |
| 2018  | 44,414                             | 2,294  | 5.4%           |  |  |  |  |
| 2019  | 45,715                             | 1,301  | 2.9%           |  |  |  |  |
| 2020  | 42,090                             | -3,625 | -7.9%          |  |  |  |  |
| 2021  | 43,867                             | 1,777  | 4.2%           |  |  |  |  |
| 2022* | 47,299                             | 3,432  | 7.8%           |  |  |  |  |

Source: Department of Labor, Bureau of Labor Statistics

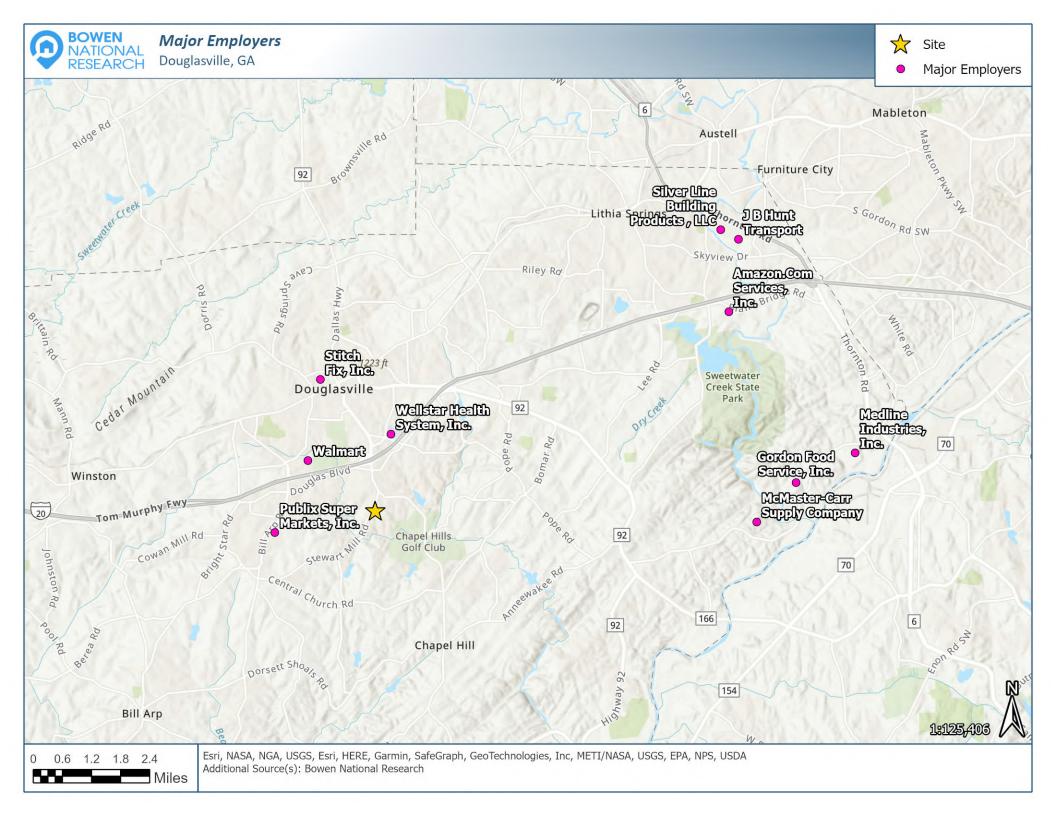

\*Through September

Data for 2021, the most recent year that year-end figures are available, indicates inplace employment in Douglas County to be 62.0% of the total Douglas County employment. This means that Douglas County has more employed persons leaving the county for daytime employment than those who work in the county. This is not uncommon, however, of a market which is within proximity of a large metropolitan area such as Douglas County's location relative to the Atlanta metro area.

## 4. ECONOMIC FORECAST

Similar to most markets throughout the country, Douglas County experienced an economic downturn in 2020 as a result of the pandemic. The rate of employment decline reported for the county in 2020 exceeded that reported for the state of Georgia while the unemployment rate spiked by nearly four full percentage points to a rate of 7.4% during the same time. Since, however, the county economy has recovered, adding nearly 6,300 new jobs to the county employment base while the unemployment rate declined by nearly four full percentage points through February of 2023. The employment base reported for the county is currently at its highest level for any given year over the past decade and the unemployment rate is lower than prepandemic levels. Based on the preceding factors, we expect the Douglas County economy will remain strong and continue to improve for the foreseeable future, particularly when considering the various economic development projects ongoing/ planned for the area.

A map illustrating notable employment centers is on the following page.

# Section H – Affordability & Demand Analysis

## 1. DETERMINATION OF INCOME ELIGIBILITY

The number of income-eligible households necessary to support the project from the Site PMA is an important consideration in evaluating the proposed project's potential.

Under the Low-Income Housing Tax Credit (LIHTC) program, household eligibility is based on household income not exceeding the targeted percentage of Area Median Household Income (AMHI), depending upon household size.

The subject site is within the Atlanta-Sandy Springs-Roswell, GA HUD Metro FMR Area, which has a median four-person household income of \$96,400 for 2022. The subject property will be restricted to senior (age 55 and older) households with incomes of up to 40%, 50%, 60%, and 80% of AMHI. The following table summarizes the maximum allowable income by household size and targeted AMHI level.

|                | Targeted AMHI<br>Maximum Allowable Income |          |          |          |  |  |
|----------------|---|----------|----------|----------|--|--|
| Household Size | 40% 50% 60% 80%                           |          |          |          |  |  |
| One-Person     | \$27,000                                  | \$33,750 | \$40,500 | \$54,000 |  |  |
| Two-Person     | \$30,880                                  | \$38,600 | \$46,320 | \$61,760 |  |  |

### a. Maximum Income Limits

The largest proposed units (two-bedroom) at the subject site are expected to house up to two-person senior households. As such, the maximum allowable income at the subject site is **\$61,760**.

## b. Minimum Income Requirements

Leasing industry standards typically require households to have rent-to- income ratios of 27% to 40%. Pursuant to GDCA market study guidelines, the maximum rent-to-income ratio permitted for family projects is 35%, while older person (age 55 and older) and elderly (age 62 and older) projects should utilize a 40% rent-to-income ratio.

The proposed LIHTC units will have a lowest gross rent of \$704. Over a 12month period, the minimum annual household expenditure (rent plus tenant-paid utilities) at the subject site is \$8,448. Applying a 40% rent-to-income ratio to the minimum annual household expenditure yields a minimum annual household income requirement for the Tax Credit units of **\$21,120**.

### c. Income-Appropriate Range

Based on the preceding analyses, the income-appropriate range required for living at the proposed project with units built to serve households at 40%, 50%, 60%, and 80% of AMHI is as follows:

|                                     | Income Range |          |  |
|-------------------------------------|--------------|----------|--|
| Unit Type                           | Minimum      | Maximum  |  |
| Tax Credit (Limited to 40% Of AMHI) | \$21,120     | \$30,880 |  |
| Tax Credit (Limited to 50% Of AMHI) | \$25,020     | \$38,600 |  |
| Tax Credit (Limited to 60% Of AMHI) | \$29,520     | \$46,320 |  |
| Tax Credit (Limited to 80% Of AMHI) | \$31,770     | \$61,760 |  |
| Overall                             | \$21,120     | \$61,760 |  |

## 2. METHODOLOGY

### **Demand**

The following are the demand components as outlined by the Georgia Department of Community Affairs (GDCA):

- a. Demand from New Household: New units required in the market area due to projected household growth from migration into the market and growth from existing households in the market should be determined. This should be determined using current renter household data and projecting forward to the anticipated placed in service date of the project using a growth rate established from a reputable source such as ESRI or the State Data Center. This household projection must be limited to the target population, age and income group and the demand for each income group targeted (i.e. 50% of median income) must be shown separately. In instances where a significant number (more than 20%) of proposed units comprise three- and four-bedroom units, please refine the analysis by factoring in the number of large households (generally 5+ persons). A demand analysis that does not account for this may overestimate demand. Note that our calculations have been reduced to only include <u>renter-qualified</u> households
- **b. Demand from Existing Households:** The second source of demand should be projected from:
  - Rent overburdened households, if any, within the age group, income groups and tenure (renters) targeted for the proposed development. In order to achieve consistency in methodology, all analysts should assume that the rent overburdened analysis includes households paying greater than 35% (Family), or greater than 40% (Senior) of their incomes toward gross rent.

Based on Table B25074 of the American Community Survey (ACS) 2017-2021 5-year estimates, approximately 37.5% of renter households within the Site PMA are rent overburdened. These households have been included in our demand analysis.

• Households living in substandard housing (i.e. units that lack complete plumbing or that are overcrowded). Households in substandard housing should be determined based on the age, the income bands, and the tenure that apply. The analyst should use his/her own knowledge of the market area and project to determine whether households from substandard housing would be a realistic source of demand. The analyst is encouraged to be conservative in his/her estimate of demand from both rent overburdened households and from those living in substandard housing.

Based on Table B25016 of the American Community Survey (ACS) 2017-2021 5-year estimates, 4.2% of all renter households in the market were living in substandard housing that lacked complete indoor plumbing or in overcrowded (1.5+ persons per room) households.

- Elderly Homeowners likely to convert to renters: GDCA recognizes that this type of turnover is increasingly becoming a factor in the demand for elderly Tax Credit housing. This segment should not account for more than 2% of total demand. Due to the difficulty of extrapolating elderly (age 62 and older) owner households from elderly renter households, analyst may use the total figure for elderly households in the appropriate income band to derive this demand figure. Data from interviews with property managers of active projects regarding renters who have come from homeownership should be used to refine the analysis. A narrative of the steps taken to arrive at this demand figure must be included and any figure that accounts for more than 2% of total demand must be based on actual market conditions, as documented in the study.
- **c. Other:** GDCA does not consider household turnover to be a source of market demand. However, if an analyst firmly believes that demand exists that is not captured by the above methods, he/she may use other indicators to estimate demand if they are fully justified (e.g. an analysis of an under built market in the base year). Any such additional indicators should be calculated separately from the demand analysis above. Such additions should be well documented by the analyst with documentation included in the Market Study.

### Net Demand

The overall demand components illustrated above are added together and the competitive supply of competitive vacant and/or units constructed in the past two years (2021/2022) is subtracted to calculate Net Demand. Vacancies in projects placed in service prior to 2021 which have not reached stabilized occupancy (i.e. at least 90% occupied) must also be considered as part of supply. **GDCA requires analysts to include ALL projects that have been funded, are proposed for funding and/or received a bond allocation from GDCA, in the demand analysis, along with ALL conventional rental properties existing or planned in the market as outlined above. Competitive units are defined as those units that are of similar size and configuration and provide alternative housing to a similar tenant population, at rent levels comparative to those proposed for the subject development.** 

To determine the Net Supply number for each bedroom and income category, the analyst will prepare a Competitive Analysis Chart that will provide a unit breakdown of the competitive properties and list each unit type. All properties determined to be competitive with the proposed development will be included in the Supply Analysis to be used in determining Net Supply in the Primary Market Area. In cases where the analyst believes the projects are not competitive with the subject units, the analyst will include a detailed description for each property and unit type explaining why the units were excluded from the market supply calculation. (e.g., the property is on the periphery of the market area, is a market-rate property; or otherwise only partially compares to the proposed subject).

Within the Douglasville Site PMA, we identified and surveyed one existing nonsubsidized age-restricted LIHTC property. This property is currently operating at a stabilized occupancy level of 100.0% and was built in 2000. There are, however, two additional age-restricted LIHTC properties which were recently allocated Tax Credits and are currently planned for the market. These properties have been considered as directly comparable/competitive supply units in our demand estimates and are summarized as follows:

|             |                              |                   |                       | Units At Targeted AMHI |     |     |
|-------------|------------------------------|-------------------|-----------------------|------------------------|-----|-----|
| Map<br>I.D. | Project Name<br>(Population) | Year<br>Allocated | Number Of<br>Bedrooms | 40%                    | 60% | 80% |
|             | Sweetwater Point             |                   | One                   | -                      | 39* | -   |
| Р           | (Senior 55+)                 | 2022              | Two                   | -                      | 41  | -   |
|             | Hazel Park                   |                   | One                   | 10                     | 19  | 6   |
| Р           | (Senior 55+)                 | 2021              | Two                   | 16                     | 29  | 10  |

\*Excludes 16 units which will operate with project-based subsidy P - Planned

The directly comparable/competitive units to be offered within these properties have been considered in our demand estimates.

|  | Percent Of Median Household Income |                      |                      |                        |                        |  |

| Capture Rate   | 5.5%                               | 4.8%                 | 17.1%                | 1.2%                   | 11.2%                  |  |

### The following is a summary of our demand calculations:

\*Adjusted to represent no more than 2% of total demand per GDCA guidelines.

Per GDCA guidelines, capture rates below 30.0% for projects in the Metro Pool, such as the subject project located in Douglasville (Douglas County), are considered acceptable. Thus, the proposed project's overall capture rate of 11.2% is acceptable. This is particularly true when considering the strong occupancy rates and waiting lists maintained among the existing comparable age-restricted LIHTC properties in the market and surrounding region. Based on the preceding factors, the subject's capture rates by AMHI level are also considered acceptable, ranging from 1.2% to 17.1%.

It is important to reiterate, however, that while capture rate levels for the subject project are acceptable, there are two planned age-restricted LIHTC properties in the Douglasville Site PMA. While these properties are considered/included in our demand calculations which demonstrate a sufficient base of support for both the subject project and these additional planned properties, the addition of these properties prior to the opening of the subject project is likely to have a slowing impact on the absorption potential for the subject property.

Based on the distribution of households by household size, our survey of conventional apartments and the distribution of bedroom types in balanced markets, the estimated shares of demand by bedroom type for age-restricted product in the Site PMA are distributed as follows.

| Estimated Demand By Bedroom |         |  |  |  |  |
|-----------------------------|---------|--|--|--|--|
| Bedroom Type                | Percent |  |  |  |  |
| One-Bedroom                 | 50%     |  |  |  |  |
| Two-Bedroom                 | 50%     |  |  |  |  |
| Total                       | 100.0%  |  |  |  |  |

Applying these shares to the income-qualified households and existing competitive supply yields demand and capture rates for the proposed units by bedroom type and AMHI level as follows:

| Bedroom Size<br>(Share Of Demand) | Target<br>% of<br>AMHI | Subject<br>Units | Total<br>Demand* | Supply** | Net<br>Demand | Capture<br>Rate | Achievable<br>Market<br>Rent | Market Rents<br>Band<br>Min-Max | Proposed<br>Subject<br>Rents |
|-----------------------------------|------------------------|------------------|------------------|----------|---------------|-----------------|------------------------------|---------------------------------|------------------------------|
| One-Bedroom (50%)                 | 40%                    | 4                | 77               | 10       | 67            | 6.0%            | \$1,370                      | \$1,250-\$1,411                 | \$595                        |

\*Includes overlap between the targeted income levels at the subject site.

\*\*Directly comparable units built and/or funded in the project market over the projection period.

Achievable Market Rent as determined in Section I.

The capture rates by bedroom type and targeted income level range from 1.2% to 18.4%. These capture rates are below GDCA's capture rate thresholds and are considered achievable. This indicates that a sufficient base of age- and income-appropriate renter household support exists in the Douglasville Site PMA for each of the unit types proposed for the subject development.

# Section I – Competitive Rental Analysis

## 1. OVERVIEW OF RENTAL HOUSING

The distributions of the area housing stock within the Douglasville Site PMA in 2010 and 2023, are summarized in the following table:

|                 | 2010 (C        | ensus) | 2023 (Estimated) |         |  |
|-----------------|----------------|--------|------------------|---------|--|
| Housing Status  | Number Percent |        | Number           | Percent |  |
| Total-Occupied  | 38,203         | 90.2%  | 42,302           | 94.5%   |  |
| Owner-Occupied  | 26,201         | 68.6%  | 27,789           | 65.7%   |  |
| Renter-Occupied | 12,002         | 31.4%  | 14,513           | 34.3%   |  |
| Vacant          | 4,170          | 9.8%   | 2,463            | 5.5%    |  |
| Total           | 42,373         | 100.0% | 44,765           | 100.0%  |  |

Source: 2010 Census, ESRI, Bowen National Research

Of the 44,765 total housing units in the market, 5.5% were vacant. In 2023, it was estimated that homeowners occupied 65.7% of all occupied housing units, while the remaining 34.3% were occupied by renters.

### Conventional Rentals

We identified and personally surveyed 25 conventional rental housing projects containing a total of 5,359 units within the Site PMA. This survey was conducted to establish the overall strength of the rental market and to identify those properties most comparable to the subject site. These rentals have a combined occupancy rate of 93.0%, a stable rate for rental housing. Each rental housing segment surveyed is summarized in the following table.

|                                  | Projects | Total | Vacant | Occupancy |
|----------------------------------|----------|-------|--------|-----------|
| Project Type                     | Surveyed | Units | Units  | Rate      |
| Market-Rate                      | 21       | 4,969 | 376    | 92.4%     |
| Tax Credit                       | 3        | 302   | 0      | 100.0%    |
| Tax Credit/Government-Subsidized | 1        | 88    | 0      | 100.0%    |
| Total                            | 25       | 5,359 | 376    | 93.0%     |

Notably, both affordable rental housing segments surveyed report overall occupancy rates of 100.0%. This is a clear indication that product similar to that proposed for the subject site is in strong demand within the Douglasville Site PMA.

Also note that while the market-rate segment reports a slightly less than stable overall occupancy rate of 92.4%, nearly half (43.1%) of the vacant units reported within this segment are concentrated at one property (Emblem Riverside Phase I). This aforementioned property opened in October of 2022 and is still within its initial lease-up period. When excluding this property, the remaining established market-rate properties surveyed have a combined occupancy rate of 95.4%, a good rate for market-rate product.

|                |       |       | Market-Rate          |         |          |                      |
|----------------|-------|-------|----------------------|---------|----------|----------------------|

| Three-Bedroom  | 2.0   | 61    | 20.2%                | 0       | 0.0%     | \$1,673              |
| Total Tax Cred | lit   | 302   | 100.0%               | 0       | 0.0%     | -                    |

The following table summarizes the breakdown of market-rate and non-subsidized Tax Credit units surveyed within the Site PMA.

The market-rate units are 92.4% occupied and the non-subsidized Tax Credit units are 100.0% occupied. A variety of unit types is offered between both the market-rate and non-subsidized Tax Credit properties surveyed. The various unit types and 100.0% occupancy rate are good indications that non-subsidized Tax Credit product is in strong demand among households of various sizes within the Douglasville area. Also note the median gross Tax Credit rents reported in the preceding table as they are positioned well below the median gross rents for similar unrestricted market-rate units surveyed in the Douglasville area. These lower rents, along with the 100.0% occupancy rate, are clear indications of the value non-subsidized Tax Credit product represents in this market.

We rated each property surveyed on a scale of "A" through "F". All properties were rated based on quality and overall appearance (i.e. aesthetic appeal, building appearance, landscaping and grounds appearance). Following is a distribution by quality rating, units and vacancies.

|                | Market-Rate                                      |              |              |  |  |  |  |  |  |
|----------------|--|--------------|--------------|--|--|--|--|--|--|
| Quality Rating | Quality Rating Projects Total Units Vacancy Rate |              |              |  |  |  |  |  |  |

| A-             | 6  | 1,761        | 10.8%        |  |  |  |  |  |  |
| B+             | 1  | 298          | 3.7%         |  |  |  |  |  |  |
| В              | 6  | 1,188        | 4.0%         |  |  |  |  |  |  |
|                | Non-Subsidize                                    | d Tax Credit |              |  |  |  |  |  |  |
| Quality Rating | Projects   | Total Units  | Vacancy Rate |  |  |  |  |  |  |
| B+             | 1  | 124          | 0.0%         |  |  |  |  |  |  |
| В              | 2  | 178          | 0.0%         |  |  |  |  |  |  |

The non-subsidized Tax Credit properties surveyed are generally of good overall quality/condition. The subject property is expected to be of similar, if not superior, overall quality/condition compared to existing Tax Credit product which will contribute to its marketability and rent potential within this market.

### 2. <u>SUMMARY OF ASSISTED PROJECTS</u>

A total of four federally subsidized and/or Tax Credit apartment developments were surveyed in the Douglasville Site PMA. These projects were surveyed in April 2023 and are summarized as follows:

|             |                  |                |                          |                | s Rent<br>Mix) |              |              |              |              |
|-------------|------------------|----------------|--------------------------|----------------|----------------|--------------|--------------|--------------|--------------|
| Map<br>I.D. | Project Name     | Туре           | Year Built/<br>Renovated | Total<br>Units | Occup.         | One-Br.      | Two-Br.      | Three-Br.    | Four-Br.     |

|             |                  |                | Total                    | 390            | 100.0%         |              |              |              |              |

Note : Contact names and method of contact, as well as amenities and other features are listed in the field survey

OCCUP. - Occupancy TAX - Tax Credit

SEC - Section

RD - Rural Development

\*Units under construction

As the preceding illustrates, all four affordable properties surveyed are 100.0% occupied. Further, three of these properties maintain waiting lists which range from 102 to 200-households for their next available units. This is a clear indication of significant pent-up demand for affordable rental product within the Douglasville Site PMA.

**Tax Credit Property Disclosure:** In addition to the four Tax Credit properties surveyed, we are also aware of one additional Tax Credit property within the Douglasville Site PMA. Despite multiple attempts, both in-person and via telephone, we were unable to survey this property (Douglasville Proper Apartments). Based on our research, this property is located at 8424 Chicago Avenue in Douglasville and was built in 1995. The property offers a total of 100 units comprised of one-, two-, and three-bedroom units targeting general-occupancy (family) households earning up to 50%, 51%, and 54% of Area Median Household Income (AMHI). At the time of our last survey in April of 2022, this property was 100.0% occupied and maintained a waiting list of more than two years for its next available unit. Considering the target population and income levels, this property is not expected to be directly competitive with the age-restricted subject property. Regardless, as it was unable to be surveyed, this property was excluded from our analysis.

### Housing Choice Voucher Holders

The following table identifies the LIHTC properties that accept Housing Choice Vouchers as well as the approximate number and share of units occupied by residents utilizing Housing Choice Vouchers:

| Map  |                              | Total      | Number of | Share of |
|------|------------------------------|------------|-----------|----------|
| I.D. | Project Name                 | Units      | Vouchers  | Vouchers |
| 10   | Highland Park Senior Village | 50         | 1         | 2.0%     |
| 14   | Millcreek Place              | 128        | NA        | -        |
| 19   | Reserve at Douglasville      | 124 + 164* | 4         | 3.2%     |
|      | Total                        | 174        | 5         | 2.9%     |

\*Units under construction (not included in total)

NA - Number not available (units not included in total)

There are a total of approximately five (5) voucher holders residing at the comparable properties for which this information was available. This comprises just 2.9% of the 174 total non-subsidized LIHTC units offered among these properties. This is a low share of voucher support and a good indication that non-subsidized LIHTC product in this market does not rely heavily, if at all, on support from voucher holders.

Despite multiple attempts, we were unable to receive a response from local housing authority representatives regarding the current status of the Housing Choice Voucher program and/or payment standards within their jurisdiction. Nonetheless, if the rents do not exceed the payment standards established by the local/regional housing authority, households with Housing Choice Vouchers may be willing to reside at a LIHTC project. However, as local payment standards were unavailable at this time, we have evaluated the subject gross rents against Fair Market Rent (FMR) levels for the area as payment standards are typically set within approximately 90% to 110% of FMR levels. The subject rents and area FMR levels are summarized in the following table:

| Bedroom<br>Type | Fair Market Rent<br>(FMR) | Proposed Tax Credit<br>Gross Rents (AMHI)  |
|-----------------|---------------------------|--|
| One-Bedroom     | \$1,131                   | \$704-\$705 (40%)<br>\$834-\$835 (50%)<br>\$984-\$985 (60%)<br>\$1,059-\$1,060 (80%)         |
| Two-Bedroom     | \$1,289                   | \$834-\$835 (40%)<br>\$1,014-\$1,040 (50%)<br>\$1,189-\$1,190 (60%)<br>\$1,289-\$1,290 (80%) |

As the preceding table illustrates, the proposed gross rents are positioned below or very similar to area FMR levels. As such, those who hold Housing Choice Vouchers will likely respond to the subject project, though this base of potential support is likely to be nominal based on trends experienced among existing LIHTC properties in this market.

### 3. PLANNED MULTIFAMILY DEVELOPMENT

Despite multiple attempts to contact local planning and building officials, a response was not received. However, from online research and the observations of our analyst while in the field, it was determined there are numerous rental projects currently in the development pipeline within the Site PMA. The known details of these projects are summarized in the following table:

| Project Name & Address   | Туре                                     | Units      | Developer  | Status/Details   |
|--|--|------------|--|--|
| Reserve at Douglasville  |  |            |  | <b>Under construction:</b> Allocated in 2020; Broke ground February 2021; 16 buildings; One-, two- and three-bedroom units; Select three-bedroom units will be townhome-style; All units restricted to 60% of the area median household income (AMHI); Unit sizes range from 735 to 1,386 square feet;   |
| 7755 Dallas Highway  |  | 206        | MVAH   | First units occupied in February 2023; Rents upon opening ranging from \$985   |

As indicated in the preceding table, two of the projects currently in the development pipeline are expected to be age-restricted properties operating under the Tax Credit guidelines. These properties are expected to be competitive with the subject property and therefore have been considered as part of our demand estimates included in Section H.

## **Building Permit Data**

The following tables illustrate single-family and multifamily building permits issued within the city of Douglasville and Douglas County for the most recent ten-year period available.

| Housing Unit Building Permits for Douglasville, GA:   |    |    |    |    |     |     |     |     |     |       |

Source: SOCDS Building Permits Database at http://socds.huduser.org/permits/index.html

The majority of multifamily building permits issued within Douglas County since 2012 have been issued within the city of Douglasville, with more than 1,200 such permits issued within the city between 2020 and 2021. This is a good indication of an expanding multifamily market within the Douglasville area.

## 4. <u>SURVEY OF COMPARABLE/COMPETITIVE PROPERTIES</u>

### Tax Credit Units

The proposed subject property will offer one- and two-bedroom units restricted to seniors aged 55 and older earning up to 40%, 50%, 60%, and 80% of Area Median Household Income (AMHI) under the Low-Income Housing Tax Credit (LIHTC) program. Within the Douglasville Site PMA, we identified and surveyed one existing age-restricted property and two general-occupancy properties which offer non-subsidized Tax Credit units similar to those proposed for the subject site in terms of bedroom type and/or targeted income (AMHI) level. We recognize the subject property will not be directly competitive with general-occupancy product in this market. However, when considering the limited supply of age-restricted LIHTC product in the area, non-subsidized general-occupancy LIHTC properties will offer a good additional base of comparison for the subject property.

In addition to the properties surveyed within the Douglasville Site PMA, we also identified and surveyed one additional age-restricted LIHTC property located on the periphery of the northeast Douglasville Site PMA boundary. Thus, this property was also selected and included in this analysis.

The four comparable LIHTC properties and the proposed subject development are summarized as follows. Information regarding property address and phone number, contact name, date of contact and utility responsibility is included in *Addendum B*, *Comparable Property Profiles*.

Map ID 901 is located outside the Site PMA

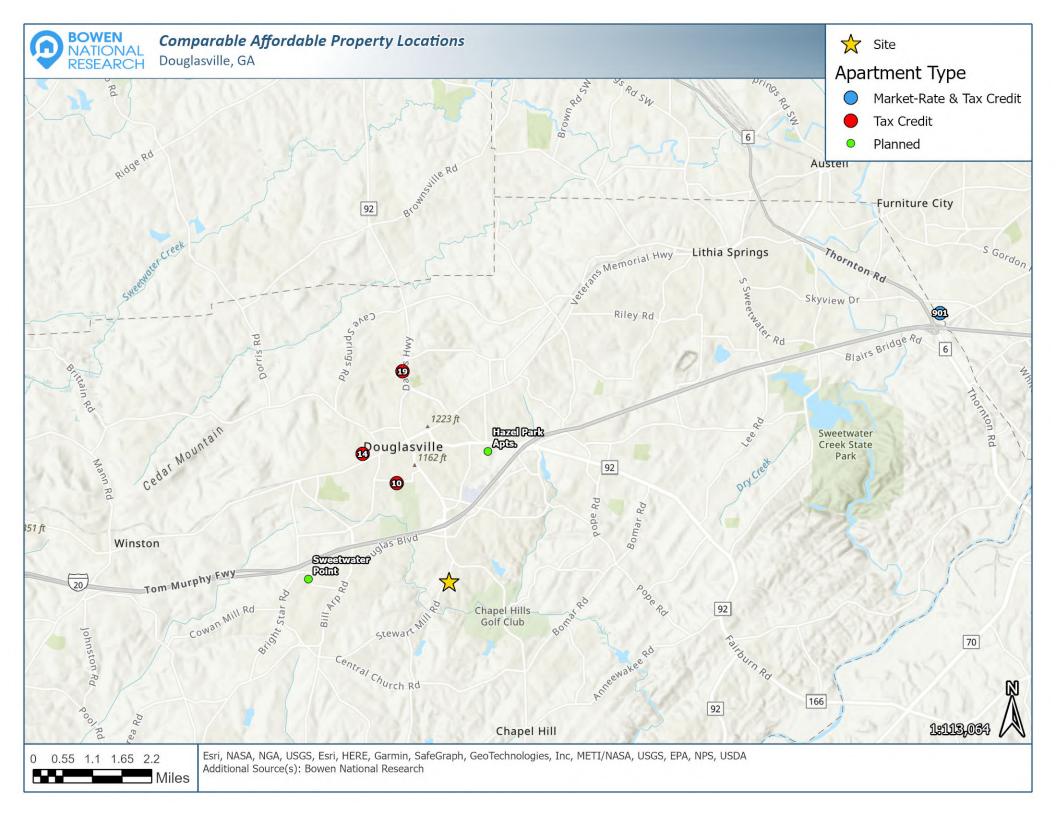

OCC. - Occupancy; HH - Households

\*Tax Credit units only; \*\*Units under construction

The four LIHTC projects have a combined occupancy rate of 100.0% and three of the four maintain waiting lists for their next available units. Notably, the two age-restricted LIHTC properties surveyed maintain waiting lists which range from 102 to 250-households. This demonstrates significant pent-up demand for additional age-restricted LIHTC product in the Douglasville area. The subject property will help to alleviate a portion of this pent-up demand.

Also note that the newest LIHTC property surveyed, Reserve at Douglasville, opened in March of 2023 and is currently 100.0% occupied. This property did, however, conduct a preleasing period which commenced in February of 2023. While it is unknown when this property first reached 100.0% occupancy, it was no more than three months after preleasing began, based on the date of our survey. Considering a three-month absorption period, this property experienced an average absorption rate of approximately 41 units per month. This is considered a very rapid absorption rate and further demonstrates the strength of the LIHTC market within the Douglasville area.

The map on the following page illustrates the location of the comparable Tax Credit properties relative to the proposed site location.

The gross rents for the comparable projects and the proposed rents at the subject site, as well as their unit mixes and vacancies by bedroom are listed in the following table:

Map ID 901 is located outside the Site PMA

\*Units under construction

^Age-restricted

The subject's proposed gross Tax Credit rents are within the range of those reported for similar unit types offered among the comparable properties. Most notably, the subject rents are positioned lower than those reported for the newest property located in the Douglasville Site PMA (Reserve at Douglasville) as well as those reported for one of the age-restricted properties (Heritage at Walton Reserve) surveyed. Therefore, the subject rents are considered marketable within the Douglasville area.

It is also of note that the subject property will offer the only units targeting households earning up to 40% and 80% of AMHI among the comparable properties. The inclusion of such units is expected to create a competitive advantage for the property.

The unit sizes (square footage) and number of bathrooms included in each of the different LIHTC unit types offered in the market and region are compared with the subject development in the following tables.

|             |                              | Square Footage |             |               |  |  |  |  |

\* Proposed Site(s): Peaks of Douglas

\*\* Details in Project Description and/or Comparable Property Profile Report

The amenity package proposed for the subject property is comprehensive and is expected to have a positive impact on the subject's marketability and rent potential within the Douglasville area. Notably, the subject property will offer a full kitchen appliance package and washer/dryer appliances with all units. Further, a community room, on-site management office, and fitness center will be offered as key community amenities. Overall, the subject property does not appear to lack any key amenities that would adversely impact its marketability as a LIHTC property within the Douglasville market.

#### Comparable/Competitive Tax Credit Summary

The four comparable LIHTC properties surveyed within the area are all 100.0% occupied and three of the four maintain waiting lists for their next available units. Notably, the two age-restricted properties surveyed maintain waiting lists ranging from 102 to 250-households for their next available units. The subject property will help to alleviate a portion of this pent-up demand. The property is also considered competitive and marketable in terms of price point (gross rent), overall design, and amenities offered.

### Competitive Housing Impact

The anticipated occupancy rates of the existing comparable Tax Credit developments surveyed in the Site PMA during the first year of occupancy at the subject project are illustrated below:

| Map<br>I.D. | Project                      | Current<br>Occupancy Rate | Anticipated Occupancy<br>Rate Through 2025 |
|-------------|------------------------------|---------------------------|--|
| 10^         | Highland Park Senior Village | 100.0%                    | 95.0%+                                     |
| 14          | Millcreek Place              | 100.0%                    | 95.0%+                                     |
| 19          | Reserve at Douglasville      | 100.0%                    | 95.0%+                                     |

^Age-restricted

As detailed throughout this report and again in the preceding table, the existing nonsubsidized LIHTC properties surveyed within the Douglasville Site PMA are all 100.0% occupied. Further, two of these three properties maintain waiting lists for their next available units. Considering the performance of these properties and our demand estimates included in *Section H*, we do not anticipate the development of the subject property will have any adverse impact on future occupancy rates at these existing properties. This is particularly true when considering that two of the three comparable properties surveyed in the Douglasville Site PMA are generaloccupancy, whereas the subject property will be restricted to seniors aged 55 and older. In fact, it is anticipated the subject property will help to alleviate a portion of the pent-up demand for additional age-restricted LIHTC product in this market. However, it is also important to reiterate that there are two additional age-restricted LIHTC properties in the development pipeline within the Douglasville Site PMA. The addition of these properties prior to the opening of the subject property may have a slowing impact on the subject's absorption potential within the market. This has been considered in our absorption projections later in this analysis.

One-page profiles of the Comparable/Competitive Tax Credit properties are included in Addendum B of this report.

## Achievable Market Rent/Market Rent Advantage Analysis

We identified five market-rate properties within the Douglasville Site PMA that we consider comparable to the proposed subject development. These selected properties are used to derive market rent for a project with characteristics similar to the proposed subject development and the subject property's market advantage. It is important to note that, for the purpose of this analysis, we only select market-rate properties. Market-rate properties are used to determine rents that can be achieved in the open market for the proposed subject units without maximum income and rent restrictions.

The basis for the selection of these projects includes, but is not limited to, the following factors:

- Surrounding neighborhood characteristics
- Target market (seniors, families, disabled, etc.)
- Unit types offered (garden or townhouse, bedroom types, etc.)
- Building type (single-story, midrise, high-rise, etc.)
- Unit and project amenities offered
- Age and appearance of property

Since it is unlikely that any two properties are identical, we adjust the collected rent (the actual rent paid by tenants) of the selected properties according to whether or not they compare favorably with the subject development. Rents of projects that have additional or better features than the subject site are adjusted negatively, while projects with inferior or fewer features are adjusted positively. For example, if the proposed subject project does not have a washer or dryer and a selected property does, then we lower the collected rent of the selected property by the estimated value of a washer and dryer to derive an *achievable market rent* for a project similar to the proposed project.

The rent adjustments used in this analysis are based on various sources, including known charges for additional features within the Site PMA, estimates made by area property managers and realtors, quoted rental rates from furniture rental companies and Bowen National Research's prior experience in markets nationwide.

It is important to note that one or more of the selected properties may be more similar to the subject property than others. These properties are given more weight in terms of reaching the final achievable market rent determination. While monetary adjustments are made for various unit and project features, the final market rent determination is based upon the judgments of our market analysts.

The proposed subject development and the five selected properties include the following:

Occ. – Occupancy

The five selected market-rate projects have a combined total of 1,468 units with an overall occupancy rate of 98.4%. None of the comparable properties has an occupancy rate below 96.3%. These occupancy rates demonstrate that the selected properties have been well-received within the Douglasville market and will serve as accurate benchmarks with which to compare the subject property.

The Rent Comparability Grids on the following pages show the collected rents for each of the selected properties and illustrate the adjustments made (as needed) for various features and location or neighborhood characteristics, as well as quality differences that exist among the selected properties and the proposed subject development. A map of the comparable market-rate developments in relation to the subject site precedes the Rent Comparability Grids.

Once all adjustments to collected rents were made, the adjusted rents for each comparable were used to derive an achievable market rent for each bedroom type. Each property was considered and weighed based upon its proximity to the subject site and its amenities and unit layout compared to the subject site.

Based on the preceding Rent Comparability Grids, it was determined that the presentday achievable market rents for units similar to the proposed subject development are summarized as follows:

| Bedroom<br>Type | %<br>AMHI | Proposed<br>Collected Rent | Achievable<br>Market Rent | Market Rent<br>Advantage |
|-----------------|-----------|----------------------------|---------------------------|--------------------------|
| One-Bedroom     | 40%       | \$595                      | \$1,370                   | 56.6%                    |
| One-Bedroom     | 50%       | \$725                      | \$1,370                   | 47.1%                    |
| One-Bedroom     | 60%       | \$875                      | \$1,370                   | 36.1%                    |
| One-Bedroom     | 80%       | \$950                      | \$1,370                   | 30.7%                    |
| Two-Bedroom     | 40%       | \$695                      | \$1,600                   | 56.6%                    |
| Two-Bedroom     | 50%       | \$875 - \$900              | \$1,600                   | 43.8% - 45.3%            |
| Two-Bedroom     | 60%       | \$1,050                    | \$1,600                   | 34.4%                    |
| Two-Bedroom     | 80%       | \$1,150                    | \$1,600                   | 28.1%                    |

Typically, Tax Credit rents for units targeting households earning up to 60% of AMHI are set at least 10% below achievable market rents to ensure that the project will represent a sufficient value and have a good flow of tenants. While units targeting higher income levels, such as the subject units at 80% of AMHI, typically do not need to represent a 10% market rent advantage to be perceived a sufficient value, it is often recommended that rents for such units represent around a 5% market rent advantage. Regardless, the subject rents represent market rent advantages ranging from 28.1% to 56.6%, including the units targeting households earning up to 80% of AMHI. Thus, the subject property is expected to be perceived a very good value within the Douglasville market.

#### Rent Adjustment Explanations (Rent Comparability Grid)

None of the selected properties offer the same amenities as the subject property. As a result, we have made adjustments to the collected rents to reflect the differences between the subject property and the selected properties. The following are explanations (preceded by the line reference number on the comparability grid table) for each rent adjustment made to each selected property.

1. Rents for each property are reported as collected rents. These are the actual rents paid by tenants and do not consider utilities paid by tenants. The rents reported are typical and do not consider rent concessions or special promotions. When multiple rent levels were offered, we included an average rent.

- 7. The subject property is anticipated to be complete in 2025. The selected properties were originally built between 2001 and 2003 but have all been renovated between 2016 and 2020. The selected properties have been adjusted by \$1 per year of effective age difference to reflect the age of these properties.
- 8. It is anticipated that the subject project will have an excellent overall quality/condition upon completion, similar to several of the selected market-rate properties. We have made adjustments for those properties that we consider to be of inferior quality compared to the subject development.
- 13. The adjustment for differences in square footage is based upon the average rent per square foot among the comparable properties. Since consumers do not value extra square footage on a dollar for dollar basis, we have used 25% of the average for this adjustment.
- 14.-23. The proposed subject project will offer a unit amenity package which is relatively similar to those offered among the selected properties. We have made, however, adjustments for features lacking at the selected properties, and in some cases, we have made adjustments for features the subject property does not offer.
- 24.-32. The proposed project offers a project amenities package which is generally inferior to those offered among the selected market-rate properties. We have made monetary adjustments to reflect the difference between the proposed project and the selected properties' project amenities.
- 33.-39. We have made adjustments to reflect the differences in utility responsibility at each selected property, as needed. The utility adjustments were based on the local housing authority's utility cost estimates.

#### 5. <u>SINGLE-FAMILY HOME IMPACT</u>

According to ESRI, the median home value in the Site PMA was \$191,875. At an estimated interest rate of 5.9% and a 30-year term (and 95% LTV), the monthly mortgage for a \$191,875 home is \$1,350, including estimated taxes and insurance.

| Buy Versus Rent Analysis                   |           |  |  |  |  |
|--|-----------|--|--|--|--|
| Median Home Price – ESRI                   | \$191,875 |  |  |  |  |
| Mortgaged Value = 95% Of Median Home Price | \$182,281 |  |  |  |  |
| Interest Rate – Bankrate.Com               | 5.89%     |  |  |  |  |
| Term                                       | 30        |  |  |  |  |
| Monthly Principal & Interest               | \$1,080   |  |  |  |  |
| Estimated Taxes And Insurance*             | \$270     |  |  |  |  |
| Estimated Monthly Mortgage Payment:        | \$1,350   |  |  |  |  |

\* Estimated at 25% of principal and interest.

In comparison, the collected rents for the subject property range from \$595 to \$1,150 per month. While it is possible that some potential tenants of the subject property could afford a typical monthly mortgage in this market, it is important to understand that the subject property will be restricted to seniors age 55 and older, an age group which is generally less active in the for-sale market. As such, we do not anticipate significant, if any, competitive impact on or from the homebuyer market.

# Section J – Absorption & Stabilization Rates

For the purposes of this analysis, we assume the absorption period at the site begins as soon as the first units are available for occupancy. Since all demand calculations in this report follow GDCA guidelines that assume a 2025 completion date for the subject project, we also assume that initial units at the site will be available for rent sometime in 2025.

Considering the facts contained in the market study and comparing them with other projects with similar characteristics in other markets, we are able to establish absorption projections for the subject development. Our absorption projections take into consideration the high occupancy rates and waiting lists maintained among the existing comparable LIHTC properties in the market. The subject's competitive position among existing comparable product surveyed, has also been considered in our absorption projections, as have the subject's capture rate and market rent advantage.

Lastly, we have also considered the fact that two additional age-restricted LIHTC properties are planned for the market and expected to come online prior to the opening of the subject property. While it is our opinion the Douglasville Site PMA is deep enough to support both these planned properties and the subject project, the addition of these properties will meet a portion of the unmet demand for additional age-restricted LIHTC product prior to the opening of the subject property. This is expected to have a slowing impact on the overall absorption potential for the subject property.

Based on our analysis, it is our opinion that the 56 proposed units for the subject site will reach a stabilized occupancy of at least 93.0% within approximately four months of opening. This absorption period is based on an average monthly absorption rate of approximately 13 units per month.

These absorption projections assume a June 2025 opening date. A different opening date may impact the absorption potential (positively or negatively) for the subject project. Further, these absorption projections assume the project will be built and operated as outlined in this report. Changes to the project's rents, amenities, floor plans, location or other features may invalidate our findings. Finally, we assume the developer and/or management will aggressively market the project a few months in advance of its opening and continue to monitor market conditions during the project's initial lease-up period.

# **Section K – Interviews**

The following are summaries of interviews conducted with various local sources regarding the need for affordable housing within the Douglasville Site PMA:

- Sandra Starr is the Property Manager for Highland Park Senior Village, a Tax Credit apartment community located in Douglasville, Georgia. Starr stated that there is a significant need for more affordable housing in the Douglasville area, specifically for seniors who are over the age of 55. Her property (Highland Park Senior Village) is restricted to residents who are 62 and older, and Starr explained that she has to turn away applications due to applicants not meeting the age requirement. Starr's property is currently 100.0% occupied and maintains a waiting list of 102-households for their next available unit.
- Reba (last name not provided), is a representative of Heritage at Walton Reserve, an age-restricted Tax Credit property located on the periphery of the Douglasville Site PMA. According to Reba, her property is currently 100.0% occupied, which is typical. Further, an extensive waiting list of approximately 250-households is maintained for her next available unit. These are clear indications of a significant level of pent-up demand for additional affordable age-restricted rental product in the Douglasville and surrounding areas.

# **Section L – Conclusions & Recommendations**

Based on the findings of our market study, it is our opinion that a market exists for the 64 units proposed for the subject site, assuming it is developed as detailed in this report. Changes in the project's site, rent, amenities or opening date may alter these findings.

The subject site location is considered conducive to affordable age-restricted rental product and the proposed development will fit well with other residential development within the immediate site area.

Four existing comparable LIHTC properties were surveyed in the Douglasville Site PMA and immediately surrounding area (one located just northeast of the Site PMA). All four of these properties are 100.0% occupied and three maintain waiting lists for their next available units. Notably, two of the four properties included as part of our comparable analysis are age-restricted, similar to the proposed subject property. These two properties both maintain waiting lists which range from 102 to 250-households. The 56 units proposed for the subject property will alleviate just a portion of this pent-up demand. Further, the subject property will offer units at 40% and 80% of AMHI (in addition to units at 50% and 60% AMHI) which are expected to create a competitive advantage for the property and help fill a void in the local rental market as these unit types are not currently offered among the comparable LIHTC properties surveyed. The property will also be very competitive in terms of price (gross rent) and overall design.

In addition to being competitively positioned, our demand estimates also indicate that a sufficient base of potential age- and income-appropriate household support exists within the Douglasville Site PMA for the subject property. Specifically, the subject project has an overall capture rate of 11.2% and capture rates by targeted AMHI level do not exceed 17.1%. All capture rates for the subject property are below GDCA thresholds.

Based on the preceding factors, the subject property is considered marketable and supportable within the Douglasville Site PMA. We have no recommendations to the subject project at this time.

It is important to reiterate, however, that while all metrics are positive for the subject project within this report, there are two planned age-restricted LIHTC properties for the Douglasville Site PMA. While these properties are considered/included in our demand calculations which demonstrate a sufficient base of support for both the subject project and these additional planned properties, the addition of these developments prior to the opening of the subject project is likely to have a slowing impact on the absorption potential for the subject property. This has been considered in our analysis and our absorption projections.

# Section M - Signed Statement Requirements

I affirm that I have made a physical inspection of the market area and the subject property and that information has been used in the full study regarding the need and demand for the proposed units. The report was written according to GDCA's market study requirements, the information included is accurate and the report can be relied upon by GDCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in GDCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

GDCA may rely on the representation made in the market study. The document is assignable to other lenders.

# Addendum C - Market Study Representation

The Georgia Department of Community Affairs (GDCA) may rely on the representation made in the market study and that the market study is assignable to other lenders that are parties to the GDCA loan transaction.

# **Addendum D - Qualifications**

#### **The Company**

Bowen National Research employs an expert staff to ensure that each market study is of the utmost quality. Each staff member has hands-on experience evaluating sites and comparable properties, analyzing market characteristics and trends, and providing realistic recommendations and conclusions. The Bowen National Research staff has the expertise to provide the answers for your development.

#### **Company Leadership**

**Patrick Bowen** is the President of Bowen National Research. He has prepared and supervised thousands of market feasibility studies for all types of real estate products, including affordable family and senior housing, multifamily market-rate housing and student housing, since 1996. He has also prepared various studies for submittal as part of HUD 221(d)(3) & (4), HUD 202 developments and applications for housing for Native Americans. He has also conducted studies and provided advice to city, county and state development entities as it relates to residential development, including affordable and market rate housing, for both rental and for-sale housing. Mr. Bowen has worked closely with many state and federal housing agencies to assist them with their market study guidelines. Mr. Bowen has his bachelor's degree in legal administration (with emphasis on business and law) from the University of West Florida.

**Desireé Johnson** is the Director of Operations for Bowen National Research. Ms. Johnson is responsible for all client relations, the procurement of work contracts, and the overall supervision and day-to-day operations of the company. She has been involved in the real estate market research industry since 2006. Ms. Johnson has an Associate of Applied Science in Office Administration from Columbus State Community College.

#### Market Analysts

**Craig Rupert**, Market Analyst, has conducted more than 1,000 market feasibility studies throughout the United States since 2010, within both urban and rural markets as well as on various tribal reservations. Mr. Rupert has prepared market studies for numerous types of housing including market-rate, Tax Credit, and various government-subsidized rental product, for-sale product, senior living (assisted living, nursing care, etc.), as well as market studies for retail/commercial space. Market studies prepared by Mr. Rupert have been used for submittal as part of state finance agency Tax Credit and HUD 221 (d)(4) applications, as well as various other financing applications submitted to local, regional, and national-level lenders/financial institutions. Mr. Rupert has a bachelor's degree in Hospitality Management from Youngstown State University.

**Jack Wiseman**, Market Analyst, has conducted extensive market research in over 200 markets throughout the United States since 2007. He provides thorough evaluation of site attributes, area competitors, market trends, economic characteristics and a wide range of issues impacting the viability of real estate development. He has evaluated market conditions for a variety of real estate alternatives, including affordable and market-rate apartments, retail and office establishments, student housing, and a variety of senior residential alternatives. Mr. Wiseman has a Bachelor of Arts degree in Economics from Miami University.

**Jeff Peters**, Market Analyst, has conducted on-site inspection and analysis for rental properties throughout the country since 2014. He is familiar with multiple types of rental housing programs, the day-to-day interaction with property managers and leasing agents and the collection of pertinent property details. Mr. Peters graduated from The Ohio State University with a Bachelor of Arts in Economics.

**Christopher T. Bunch,** Market Analyst has over ten years of professional experience in real estate, including five years of experience in the real estate market research field. Mr. Bunch is responsible for preparing market feasibility studies for a variety of clients. Mr. Bunch earned a bachelor's degree in Geography with a concentration in Urban and Regional Planning from Ohio University in Athens, Ohio.

**Lisa Goff**, Market Analyst, has conducted site-specific analyses in both rural and urban markets throughout the country. She is also experienced in the day-to-day operation and financing of Low-Income Housing Tax Credit and subsidized properties, which gives her a unique understanding of the impact of housing development on current market conditions.

**Tanja Hairston,** Market Analyst, has extensive property management experience in both the Midwest and northeastern United States. She has assisted low-income, veterans and homeless persons in securing affordable and permanent housing, administered HUD recertifications and reviewed Housing Choice Voucher applications. In addition, she has cultivated relationships with realtors, property managers and brokers. Ms. Hairston holds a Bachelor of Arts degree in Sociology from South Carolina State University.

**Jonathan Kabat**, Market Analyst, has surveyed both urban and rural markets throughout the country. He is trained to understand the nuances of various rental housing programs and their construction and is experienced in the collection of rental housing data from leasing agents, property managers, and other housing experts within the market. Mr. Kabat graduated from The Ohio State University with a Bachelor of Art in History and a minor in Geography.

Andrew Lundell, Market Analyst, has an experienced background in customer service and financial analysis. He has evaluated the rental market in cities throughout the United States and is able to provide detailed site-specific analysis. Mr. Lundell has a Bachelor of Arts in Criminal Justice from Ohio University. **Sidney McCrary,** Market Analyst, is experienced in the on-site analysis of residential and commercial properties. He has the ability to analyze a site's location in relation to community services, competitive properties and the ease of access and visibility. Mr. McCrary has a Bachelor of Science in Business Administration from Ohio Dominican University.

**Gregory Piduch**, Market Analyst, has conducted site-specific analyses in both metro and rural areas throughout the country. He is familiar with multiple types of rental housing programs, the day-to-day interaction with property managers and leasing agents and the collection of pertinent property details. Mr. Piduch holds a Bachelor of Arts in Communication and Rhetoric from the University of Albany, State University of New York and a Master of Professional Studies in Sports Industry Management from Georgetown University.

**Nathan Stelts,** Market Analyst, is experienced in the assessment of housing operating under various programs throughout the country, as well as other development alternatives. He is also experienced in evaluating projects in the development pipeline and economic trends. Mr. Stelts has a Bachelor of Science in Business Administration from Bowling Green State University.

#### **Research Staff**

Bowen National Research employs a staff of in-house researchers who are experienced in the surveying and evaluation of all rental and for-sale housing types, as well as in conducting interviews and surveys with city officials, economic development offices, chambers of commerce, housing authorities and residents.

**June Davis**, Office Manager of Bowen National Research, has been in the market feasibility research industry since 1988. Ms. Davis has overseen production on over 20,000 market studies for projects throughout the United States.

**Stephanie Viren** is the Research and Travel Coordinator at Bowen National Research. Ms. Viren focuses on collecting detailed data concerning housing conditions in various markets throughout the United States. Ms. Viren has extensive interviewing skills and experience and also possesses the expertise necessary to conduct surveys of diverse pools of respondents regarding population and housing trends, housing marketability, economic development and other socioeconomic issues relative to the housing industry. Ms. Viren's professional specialty is condominium and senior housing research. Ms. Viren earned a Bachelor of Arts in Business Administration from Heidelberg University.

**Kelly Wiseman**, Research Specialist Director, has significant experience in the evaluation and surveying of housing projects operating under a variety of programs. In addition, she has conducted numerous interviews with experts throughout the country, including economic development, planning, housing authorities and other stakeholders.

# Addendum E – Market Analyst Certification Checklist

This market study has been prepared by Bowen National Research, a member in good standing of the National Council of Housing Market Analysts (NCHMA). This study has been prepared in conformance with the standards adopted by NCHMA for the market analysts' industry. These standards include the *Standard Definitions of Key Terms Used in Market Studies for Housing Projects*, and *Model Content Standards for the Content of Market Studies for Housing Projects*. These Standards are designed to enhance the quality of market studies and to make them easier to prepare, understand, and use by market analysts and by the end users. These Standards are voluntary only, and no legal responsibility regarding their use is assumed by the National Council of Housing Market Analysts.

Bowen National Research is duly qualified and experienced in providing market analysis for housing. The company's principals participate in the National Council of Housing Market Analysts (NCHMA) educational and information sharing programs to maintain the highest professional standards and state-of-the-art knowledge. Bowen National Research is an independent market analyst. No principal or employee of Bowen National Research has any financial interest whatsoever in the development for which this analysis has been undertaken.

# Market Study Index

#### A. INTRODUCTION

Members of the National Council of Housing Market Analysts provide a checklist referencing all components of their market study. This checklist is intended to assist readers on the location content of issues relevant to the evaluation and analysis of market studies.

#### B. DESCRIPTION AND PROCEDURE FOR COMPLETING

The following components have been addressed in this market study. The section number of each component is noted below. Each component is fully discussed in that section. In cases where the item is not relevant, the author has indicated 'N/A' or not applicable. Where a conflict with or variation from client standards or client requirements exists, the author has indicated a 'VAR' (variation) with a comment explaining the conflict.

# Addendum F – Methodologies, Disclaimers & Sources

#### 1. PURPOSE

The purpose of this report is to evaluate the market feasibility of a proposed Low-Income Housing Tax Credit (LIHTC) project to be developed in Douglasville, Georgia by Peaks of Douglas Development, LLC.

This market feasibility analysis complies with the requirements established by the Georgia Department of Community Affairs (GDCA) and conforms to the standards adopted by the National Council of Housing Market Analysts (NCHMA). These standards include the accepted definitions of key terms used in market studies for affordable housing projects, and model content standards for the content of market studies for affordable housing projects. These standards are designed to enhance the quality of market studies and to make them easier to prepare, understand and use by market analysts and end users.

#### 2. <u>METHODOLOGIES</u>

Methodologies used by Bowen National Research include the following:

• The Primary Market Area (PMA) generated for the subject project is identified. The PMA is generally described as the smallest geographic area from which most of the support for the subject project originates. PMAs are not defined by a radius. The use of a radius is an ineffective approach because it does not consider mobility patterns, changes in the socioeconomic or demographic character of neighborhoods or physical landmarks that might impede development.

PMAs are established using a variety of factors, including, but not limited to:

- A detailed demographic and socioeconomic evaluation
- Interviews with area planners, realtors and other individuals who are familiar with area growth patterns
- A drive-time analysis for the site
- Personal observations of the field analyst
- A field survey of modern apartment developments is conducted. The intent of the field survey is twofold. First, the field survey is used to measure the overall strength of the apartment market. This is accomplished by an evaluation of unit mix, vacancies, rent levels and overall quality of product. The second purpose of the field survey is to establish those projects that are most likely directly comparable to the subject property. The information in this survey was collected through a variety of methods, including phone surveys, in-person visits, email and fax. The contact person for each property is listed in *Addendum A: Field Survey of Conventional Rentals*.

- Two types of directly comparable properties are identified through the field survey. They include other Section 42 LIHTC developments and market-rate developments that offer unit and project amenities similar to those of the subject development. An in-depth evaluation of these two property types provides an indication of the potential of the subject development.
- Economic and demographic characteristics of the area are evaluated. An economic evaluation includes an assessment of area employment composition, income growth (particularly among the target market), building statistics and area growth perceptions. The demographic evaluation uses the most recently issued Census information, as well as projections that determine what the characteristics of the market will be when the project opens and after it achieves a stabilized occupancy.
- Area building statistics and interviews with officials familiar with area development provide identification of the properties that might be planned or proposed for the area that will have an impact on the marketability of the subject development. Planned and proposed projects are always in different stages of development. As a result, it is important to establish the likelihood of construction, the timing of the project and its impact on the market and the subject development.
- An analysis of the subject project's market capture of income-appropriate renter households within the PMA is conducted. This analysis follows GDCA's methodology for calculating potential demand. The resulting capture rates are compared with acceptable market capture rates for similar types of projects to determine whether the subject development's capture rate is achievable.
- Achievable market rent for the subject development is determined. Using a Rent Comparability Grid, the features of the subject development are compared item by item to the most comparable properties in the market. Adjustments are made for each feature that differs from that of the subject development. These adjustments are then included with the collected rent resulting in an achievable market rent for a unit comparable to the subject unit. This analysis is done for each bedroom type offered at the site.

Please note that non-numbered items in this report are not required by GDCA; they have been included, however, based on Bowen National Research's opinion that it is necessary to consider these details to effectively address the continued market feasibility of the subject project.

#### 3. <u>REPORT LIMITATIONS</u>

The intent of this report is to collect and analyze significant levels of data to forecast the market success of the subject property within an agreed to time period. Bowen National Research relies on a variety of sources of data to generate this report. These data sources are not always verifiable; however, Bowen National Research makes a significant effort to assure accuracy. While this is not always possible, we believe our effort provides an acceptable standard margin of error. Bowen National Research is not responsible for errors or omissions in the data provided by other sources.

The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and are our personal, unbiased professional analyses, opinions and conclusions. We have no present or prospective interest in the property that is the subject of this report and we have no personal interest or bias with respect to the parties involved. Our compensation is not contingent on an action or event (such as the approval of a loan) resulting from the analyses, opinions or conclusions in, or the use of, this study.

Any reproduction or duplication of this report without the expressed approval of Bowen National Research is strictly prohibited.

#### 4. SOURCES

Bowen National Research uses various sources to gather and confirm data used in each analysis. These sources, which are cited throughout this report, include the following:

- The 2010 and 2020 Census on Housing
- American Community Survey
- ESRI
- Area Chamber of Commerce
- Georgia Department of Community Affairs (GDCA)
- U.S. Department of Labor
- U.S. Department of Commerce
- Management for each property included in the survey
- Local planning and building officials
- Local housing authority representatives
