1. EXECUTIVE SUMMARY

Radiant Development Partners has retained Real Property Research Group, Inc. (RPRG) to conduct a comprehensive market feasibility analysis for Trinity Flats, a proposed multi-family rental community in Atlanta, Fulton County, Georgia. Trinity Flats will be newly constructed and financed in part with four percent Low Income Housing Tax Credits (LIHTC) allocated by the Georgia Department of Community Affairs (DCA). Trinity Flats will offer 218 LIHTC units targeting renter households earning at or below 50 percent, 60 percent, and 80 percent of the Area Median Income (AMI), adjusted for household size. Twenty LIHTC units will benefit from Project Based Vouchers (PBV) through the HOME First program managed by the Atlanta Housing Authority. The following report is based on DCA's 2023 market study requirements.

1. Project Description

- The subject site is on the southeastern corner of the intersection of Trinity Avenue SW and Central Avenue SW in Atlanta, Fulton County, Georgia.
- Trinity Flats will offer 48 efficiency units, 112 one-bedroom units, 50 two-bedroom units, and eight three-bedroom units, of which all will benefit from Low Income Housing Tax Credits and will target renter households earning up to 50 percent, 60 percent, and 80 percent of the Area Median Income (AMI); 20 LIHTC units at 50 percent AMI will benefit from Project Based Vouchers (PBV) with tenant-paid rents based on a percentage of income.
- Trinity Flats will offer units in a newly constructed high-rise building with parking provided at existing parking decks via an agreement with City of Atlanta.
- A detailed summary of the subject property, including the rent and unit configuration, is shown in the table below. The rents shown will include the cost of all utilities.

Туре	Bed	Bath	Income Target	Quantity	Size (sqft)*	Proposed Rent	Utility Allowance	Maximum Net LIHTC Rent	Gross Rent	Rent/Gross Sq. Foot
LIHTC/PBV	Studio	1	50% AMI	16	375	\$1,072	\$0	\$893	\$893	\$2.86
LIHTC/PBV	Efficiency	1	50% AMI	4	450	\$1,072	\$0	\$893	\$893	\$2.38
LIHTC	Efficiency	1	60% AMI	24	450	\$1,072	\$0	\$1,072	\$1,072	\$2.38

Rents include: all utillities *Weighted average Lesser of the proposed contract rent and maximum allowable LIHTC rent is analyzed

Source: Radiant Development Partners

 Trinity Flats will offer a range, refrigerator, garbage disposal, microwave, dishwasher, and washer and dryer connections. The units will also offer blinds, carpet and LVT flooring, central heating and air conditioning, ceiling fans, and a walk-in closet as standard. The proposed unit

features are acceptable and will be competitive with existing LIHTC communities in the market area.

• Trinity Flats' community amenity package will include an equipped computer center, community room, outdoor courtyard with sitting area, wellness center, elevators, fitness room, central laundry facility, on-site management, and arts and crafts room. The proposed amenity package will be competitive with surveyed rental communities in the Trinity Flats Market Area and will be generally comparable to those offered at the surveyed LIHTC communities except for a swimming pool which is acceptable given the affordable nature of the subject property and only seven of 13 LIHTC communities without PBRA offer this amenity. Additionally, the wellness center will be appealing and unique to the market. The proposed amenities are acceptable and will be well received in the market area by the target market of very low to moderate income renter households.

2. Site Description / Evaluation:

The subject site is a suitable location for affordable rental housing as it is compatible with surrounding land uses and has ample access to amenities, services, employers, and transportation arteries.

- The subject site is just north of Interstate 20 and west of Interstate 75/85 interchange. Trinity Flats is surrounded by a mixture of land uses including Atlanta City Hall, restaurants, municipal buildings, a church, parking decks, and apartments.
- The subject property is within one mile of two banks, a convenience store, pharmacy, grocery store, and retailer, many of which are walkable given sidewalks and crosswalks along all surrounding roads. The site is also convenient to transportation arteries, public transportation, and employment concentrations.
- Trinity Flats will have excellent drive-by visibility from Trinity Avenue SW, which is a heavily traveled connector street. Additional visibility will come from the moderately traveled Central Avenue SW, Washington Street SW, and Memorial Drive SW which border the site.
- The subject site is suitable for the proposed use of affordable rental housing. RPRG did not identify any negative land uses which were identified at the time of the site visit that would affect the subject property's viability in the marketplace.

3. Market Area Definition

- The Trinity Flats Market Area consists of census tracts in and around Downtown Atlanta including all or portions of the neighborhoods of Downtown, Five Points, Grant Park, and Inman Park (Map 4). The market area is roughly bisected by Interstate 20 from east to west and Interstate 75/85 from north to south providing good connectivity. The neighborhoods included in the Trinity Flats Market Area are those most comparable with the area immediately surrounding the subject site and households living throughout the Trinity Flats Market Area would consider Trinity Flats as an acceptable shelter location. This market area does not extend further north due to a transition into Midtown which is a separate and distinct submarket while it does not extend further in any other direction due to distance and transition to areas not comparable to the area surrounding the subject property.
- The boundaries of the Trinity Flats Market Area and their approximate distance from the subject site are North Avenue to the north (1.6 miles), Bill Kennedy Way SE/Atlanta BeltLine Eastside Trail to the east (1.9 miles), CSX Transportation Line to the south (1.6 miles), and Joseph E. Lowery Boulevard SW to the west (1.5 miles).

4. Community Demographic Data

- The Trinity Flats Market Area had significant population and household growth from 2010 to 2023 and growth is projected to accelerate over the next three years.
 - The Trinity Flats Market Area's population and household base each grew significantly between 2010 and 2023 with net growth of 20,457 people (38.1 percent) and 10,965 households (50.1 percent). The market area's average annual growth was 1,574 people (2.9 percent) and 843 households (3.9 percent).
 - The Trinity Flats Market Area is projected to add 1,837 people (2.5 percent) and 1,042 households (3.2 percent) annually from 2023 to 2026. Net growth over this three-year period will be 5,511 people (7.4 percent) and 3,126 households (9.5 percent).
 - The Trinity Flats Market Area is projected to contain 79,677 people and 35,956 households in 2026.
- The median age of the population in the Trinity Flats Market Area is significantly younger than Fulton County's population with median ages of 30 and 35 years, respectively. The Trinity Flats Market Area large proportions of Young Adults ages 20 to 34 (35.5 percent) and Adults age 35 to 61 years (29.9 percent). Children/Youth under 20 and Seniors ages 62 and older comprise 23.4 percent and 11.2 percent of the market area's population, respectively.
- Single-person households were the most common household type in the Trinity Flats Market Area at 52.6 percent. Multi-person households without children were the second-most common in the market area at 33.7 percent; households with children were the least common household type in the market area at 13.7 percent.
- The Trinity Flats Market Area's renter percentage of 71.7 percent in 2023 is significantly higher than Fulton County's 50.9 percent. Renter households accounted for 79.8 percent of net household growth in the Trinity Flats Market Area over the past 13 years, a trend that RPRG expects to continue. The Trinity Flats Market Area is expected to add 2,495 net renter households over the next three years and the renter percentage is expected to increase to 72.4 percent by 2026.
- Nearly 85 percent of renter households in the Trinity Flats Market Area had one or two people including 56.2 percent with one person. Roughly 12 percent of renter households had three or four people and 3.1 percent had five or more people.
- The 2023 median income in the Trinity Flats Market Area is \$71,420 per year, \$17,600 or 19.8 percent lower than the \$89,020 median in Fulton County. Roughly 23 percent of Trinity Flats Market Area households earn less than \$25,000, 15.4 percent earn \$25,000 to \$49,999, and 13.3 percent earn \$50,000 to \$74,999. Nearly half (48.1 percent) of Trinity Flats Market Area households earn upper incomes of at least \$75,000, including 19.9 percent earning \$150,000 or more.
- The 2023 median income of Trinity Flats Market Area is \$51,644 for renters and \$132,025 for owners. Approximately 30 percent of renter households earn less than \$25,000, 19.4 percent earn \$25,000 to \$49,999, and 15.5 percent earn \$50,000 to \$74,999. Roughly one-third (35.5 percent) of renter households earn \$75,000 or more including 11.1 percent earning \$150,000 or more.

5. Economic Data:

Fulton County's economy experienced significant economic growth over the past decade, consistently outperforming the national economy over much of this period. The county's At-Place Employment grew during nine of 10 years prior to the pandemic. The county has rebounded with an average overall and employed portion of the labor force larger through June 2023 than pre-pandemic totals in 2019 while the county has recovered all jobs lost during the pandemic.

 Fulton County's annual average unemployment rate steadily declined from 2012 to 2019 and reached 3.6 percent in 2019, comparable to the state rate (3.6 percent) and national rate (3.7

percent). Annual average unemployment rates increased sharply in all three areas in 2020 due to the COVID-19 pandemic with the county's 7.9 percent above the state's 6.5 percent but below the nation's 8.1 percent; however, all three areas' unemployment rates rebounded through June 2023 with unemployment rates of 3.5 percent in the county, 3.3 percent in Georgia, and 3.5 percent in the nation.

- Fulton County's At-Place Employment (jobs located in the county) grew by 28.2 percent from 2010 to 2019 with the net addition of 198,665 jobs since the previous recession-era. The county added jobs in nine of 10 years over this period including each year from 2013 to 2019; Fulton County added an annual average of 25,976 jobs over this period with more than 20,000 new jobs each year. The county lost 58,510 jobs in 2020 at the onset of the COVID-19 pandemic which was slightly higher on a percentage basis when compared to the nation (6.5 percent versus 6.1 percent). Fulton County recouped all these job losses with the net addition of 87,873 jobs in 2021 and 2022.
- Fulton County's largest economic sectors of Professional-Business, Trade-Transportation-Utilities, and Education-Health combined for 54.9 percent of all jobs in the county. Three other sectors, Government, Financial Activities, and Leisure-Hospitality contributed at least nine percent of the county's jobs.
- Nearly 80 percent of workers residing in the Trinity Flats Market Area worked in Fulton County while roughly one-fifth (19.5 percent) worked in another Georgia county. Approximately two percent of Trinity Flats Market Area workers are employed outside the state.
- RPRG identified many large economic expansions recently announced in Fulton County since January 2021. Since January 2022, RPRG identified 23 WARN notices with 3,887 jobs affected.

6. Affordability and Demand Analysis:

- Trinity Flats will contain 218 LIHTC units targeting households earning up to 50 percent, 60 percent, and 80 percent of the AMI with 20 units at 50 percent AMI benefitting from PBV. An affordability analysis was conducted both with and without accounting for PBV on the 20 efficiency units with PBV at 50 percent AMI; rents are set at maximum 50 percent AMI LIHTC rents.
- Without taking into account the PBV, affordability capture rates by floor plan range from 0.1 percent to 3.3 percent. By income level, renter capture rates are 2.2 percent for 50 percent AMI units, 2.1 percent for 60 percent AMI units, and 0.5 percent for 80 percent AMI units. The project's overall capture rate without accounting for the proposed PBV is 2.4 percent. Overall, 9,032 renter households will be income qualified for one or more of the proposed units.
- When accounting for the proposed PBV, affordability capture rates by floor plan range from 0.1 percent to 3.3 percent. By income level, renter capture rates are 0.8 percent for 50 percent AMI units, 2.1 percent for 60 percent AMI units, and 0.5 percent for 80 percent AMI units. The project's overall capture rate when accounting for the proposed PBV is 1.3 percent. Overall, 16,705 renter households will be income qualified for one or more of the proposed units.
- All renter affordability capture rates (with or without PBV) are within acceptable levels for an
 affordable rental community indicating that sufficient income-qualified renter households
 exist in the market area to support the 218 proposed units at Trinity Flats with or without the
 proposed PBV.
- Without accounting for the proposed PBV, the project's overall demand capture rate is a low
 6.3 percent. The demand capture rates by income level without accounting for the proposed
 PBV are 4.9 percent for 50 percent AMI units, 5.5 percent for 60 percent AMI units, and 1.1

percent for 80 percent AMI units. Capture rates by floor plan range from 2.4 percent to 5.4 percent.

- When accounting for the proposed PBV, the project's overall capture rate drops to 3.1 percent. The demand capture rates by income level when accounting for the proposed PBV are 1.7 percent for 50 percent AMI units, 5.5 percent for 60 percent AMI units, and 1.1 percent for 80 percent AMI units. Capture rates by floorplan range from 0.9 percent to 5.4 percent.
- All capture rates are well within DCA thresholds and indicate strong demand in the market area to support the proposed Trinity Flats (with or without the proposed PBV) and the comparable pipeline.

7. Competitive Rental Analysis

RPRG surveyed 36 general occupancy communities in the Trinity Flats Market Area including 20 market rate communities, 13 standard Low Income Housing Tax Credit (LIHTC) communities, and three deeply subsidized LIHTC communities.

- The Trinity Flats Market Area's rental market without PBRA is performing well with an aggregate stabilized vacancy rate of 4.1 percent among 7,959 combined units. The Victory at Summerhill is excluded from the stabilized vacancy rate due to undergoing initial lease-up. The 13 LIHTC communities without PBRA are also performing well with 117 vacancies among 3,055 combined units for an aggregate vacancy rate of 3.8 percent; seven of 13 LIHTC communities without PBRA reported vacancy rates of 3.1 percent or less with three communities fully occupied. The surveyed LIHTC communities with PBRA are all fully occupied.
- Among all surveyed rental communities without PBRA, net rents, unit sizes, and rents per square foot are as follows:
 - **Efficiency** effective rents average \$1,538 per month. The average efficiency unit size is 588 square feet resulting in a net rent per square foot of \$2.61.
 - One bedroom effective rents average \$1,504 per month. The average one bedroom unit size is 750 square feet resulting in a net rent per square foot of \$2.01.
 - **Two bedroom** effective rents average \$1,841 per month. The average two bedroom unit size is 1,103 square feet resulting in a net rent per square foot of \$1.67.
 - Three bedroom effective rents average \$1,719 per month. The average three bedroom unit size is 1,233 square feet resulting in a net rent per square foot of \$1.39.
- Among all surveyed LIHTC communities without PBRA, net rents, unit sizes, and rents per square foot are as follows:
 - Efficiency effective rent is \$1,200 per month. The efficiency unit size is 585 square feet resulting in a net rent per square foot of \$2.05.
 - One bedroom effective rents average \$1,028 per month. The average one bedroom unit size is 721 square feet resulting in a net rent per square foot of \$1.43.
 - **Two bedroom** effective rents average \$1,215 per month. The average two bedroom unit size is 1,021 square feet resulting in a net rent per square foot of \$1.19.
 - Three bedroom effective rents average \$1,339 per month. The average three bedroom unit size is 1,214 square feet resulting in a net rent per square foot of \$1.10.
- Based on our adjustment calculations, the estimated market rents for the units at Trinity Flats are \$1,693 for efficiency units, \$1,883 for one bedroom units, \$2,482 for two bedroom units, and \$2,669 for three bedroom units. Market rent advantages based on the proposed 50

percent and 60 percent AMI are significant and range from 57.9 percent to 116.2 percent. Market rent advantages based on the proposed 80 percent AMI rents are also significant and range from 18.4 percent to 35.0 percent. The project's overall market advantage is 76.03 percent. It should be noted, 20 units at 50 percent AMI will be deeply subsidized and rents will be based on income so rent advantages will be greater.

 RPRG identified eight comparable general occupancy LIHTC communities (Stanton Park, McAuley Park, East Medinah Village, Ashley at Scholars Landing II, The Simpson, The Avery, City Lights IV, and 360 Peachtree) as planned or under construction in the Trinity Flats Market Area. Two communities (one general occupancy and one age restricted) are undergoing rehabilitation. All comparable units have been accounted for in the LIHTC demand estimate and capture rate analysis with all capture rates well within acceptable levels.

8. Absorption/Stabilization Estimates

Station 496, the newest deeply subsidized LIHTC community in the market area, opened in May 2022 and fully leased-up its 123 units in August 2022 for an average monthly absorption of roughly 30 units. Station 464, a deeply subsidized LIHTC community, opened in October 2019 and was fully occupied in December 2019 for an average monthly absorption rate of roughly 32 units. Absorption estimates are based on a variety of factors in addition to the experience of comparable communities including:

- The Trinity Flats Market Area is projected to add 3,126 net households from 2023 to 2026 including 2,495 renter households (79.8 percent of net household growth).
- Without accounting for the proposed deep subsidies on 20 LIHTC units at 50 percent AMI, more than 9,000 renter households will be income-qualified for one or more units proposed at Trinity Flats in 2026. The number of income-qualified renter households significantly increases to 16,705 with the proposed PBV. All affordability renter capture rates are low with or without accounting for PBV.
- All DCA demand capture rates without the proposed PBV are low and well below DCA thresholds. The overall DCA demand capture rate without accounting for the proposed PBV is 6.3 percent. When accounting for the proposed PBV, the project's overall capture rate decreases to 3.1 percent.
- The Trinity Flats Market Area's rental market without PBRA is performing well with an aggregate stabilized vacancy rate of 4.1 percent among 7,959 combined units. The Victory at Summerhill is excluded from the stabilized vacancy rate due to undergoing initial lease-up. The 13 LIHTC communities without PBRA are also performing well with 117 vacancies among 3,055 combined units for an aggregate vacancy rate of 3.8 percent; seven of 13 LIHTC communities without PBRA reported vacancy rates of 3.1 percent or less with three communities fully occupied. The surveyed LIHTC communities with PBRA are all fully occupied.
- The newly constructed Trinity Flats will offer an attractive and affordable product that will be well received by the target market in the Trinity Flats Market Area.

Based on the factors noted above, we estimate Trinity Flats to lease-up at a rate of 30 units per month. At this rate, the subject property will reach a stabilized occupancy of at least 93 percent within six to seven months. RPRG believes that the subject property will be able to successfully reach and maintain a stabilized occupancy of at least 93 percent following its entrance into the rental market.

9. Interviews

Primary information gathered through field and phone interviews was used throughout the various sections of this report. The interviewees included rental community property managers and leasing agents. RPRG also reviewed the Georgia Department of Community Affairs' (DCA) lists of recent Low

Income Housing Tax Credit (LIHTC) allocation lists, reviewed local newspaper articles, and reviewed the City of Atlanta's building permit tracker.

10. Overall Conclusion / Recommendation

Based on an analysis of strong renter household growth projections, low affordability capture rates, low demand capture rates (with and without PBV), current rental market conditions, and socioeconomic and demographic characteristics of the Trinity Flats Market Area, RPRG believes that the subject property will be able to successfully reach and maintain a stabilized occupancy of at least 93 percent following its entrance into the rental market with or without the proposed PBV on 20 LIHTC units. The subject property will be competitively positioned with existing rental communities in the Trinity Flats Market Area and the units will be well received by the target market.

We recommend proceeding with the project as planned.

2. INTRODUCTION

A. Overview of Subject

The subject of this report is the Trinity Flats, a proposed affordable multi-family rental community in Atlanta, Fulton County, Georgia. Trinity Flats will be newly constructed and financed in part with four percent Low Income Housing Tax Credits (LIHTC) allocated by the Georgia Department of Community Affairs (DCA). Trinity Flats will offer 218 LIHTC units targeting renter households earning at or below 50 percent, 60 percent, and 80 percent of the Area Median Income (AMI), adjusted for household size. Twenty LIHTC units will benefit from Project Based Vouchers (PBV) through the HOME First program managed by the Atlanta Housing Authority.

B. Purpose of Report

The purpose of this market study is to perform a market feasibility analysis through an examination of the economic context, a demographic analysis of the defined market area, a competitive housing analysis, a derivation of demand, and an affordability analysis.

C. Format of Report

The report format is comprehensive and conforms to DCA's 2023 Market Study Manual and Qualified Allocation Plan (QAP). The market study also considered the National Council of Housing Market Analysts' (NCHMA) recommended Model Content Standards and Market Study Index.

D. Client, Intended User, and Intended Use

The Client is Radiant Development Partners (Developer). Along with the Client, the Intended Users are DCA, potential lenders, and investors.

E. Applicable Requirements

This market study is intended to conform to the requirements of the following:

- DCA's 2023 Market Study Manual and Qualified Allocation Plan (QAP).
- The National Council of Housing Market Analysts' (NCHMA) Recommended Model Content.

F. Scope of Work

To determine the appropriate scope of work for the assignment, we considered the intended use of the market study, the needs of the user, the complexity of the property, and other pertinent factors. Our concluded scope of work is described below:

- Please refer to Appendix 5 for a detailed list of DCA requirements as well as the corresponding pages of requirements within the report.
- Quincy Haisley (Analyst) conducted a site visit to the subject site, neighborhood, and market area on August 31, 2023.
- Primary information gathered through field and phone interviews was used throughout the
 various sections of this report. The interviewees included rental community property
 managers and leasing agents. RPRG also reviewed the Georgia Department of Community
 Affairs' (DCA) lists of recent Low Income Housing Tax Credit (LIHTC) allocation lists, reviewed
 local newspaper articles, and reviewed the City of Atlanta's building permit tracker.

 All pertinent information obtained was incorporated in the appropriate section(s) of this report.

G. Report Limitations

The conclusions reached in a market assessment are inherently subjective and should not be relied upon as a determinative predictor of results that will actually occur in the marketplace. There can be no assurance that the estimates made or assumptions employed in preparing this report will in fact be realized or that other methods or assumptions might not be appropriate. The conclusions expressed in this report are as of the date of this report, and an analysis conducted as of another date may require different conclusions. The actual results achieved will depend on a variety of factors, including the performance of management, the impact of changes in general and local economic conditions, and the absence of material changes in the regulatory or competitive environment. Reference is made to the statement of Underlying Assumptions and Limiting Conditions contained in Appendix I of this report.

H. Other Pertinent Remarks

None.

3. PROJECT DESCRIPTION

A. Project Overview

Trinity Flats will offer 218 newly constructed Low Income Housing Tax Credits (LIHTC) rental units targeting renter households earning up to 50 percent, 60 percent, and 80 percent of the Area Median Income (AMI), adjusted for household size, in Atlanta, Fulton County, Georgia. Twenty LIHTC units at 50 percent AMI will benefit from Project Based Vouchers (PBV) through the HOME First program. The physical address of the subject property is 104 Trinity Avenue SW, Atlanta, Georgia 30303. Trinity Flats will include 48 studio/efficiency units, 112 one-bedroom units, 50 two-bedroom units, and eight three-bedroom units.

B. Project Type and Target Market

Trinity Flats will target very low to moderate income renter households. The targeted tenancy of the development is family. The proposed unit mix includes 48 studio/efficiency units (22.0 percent), 112 one-bedroom units (51.4 percent), 50 two-bedroom units (22.9 percent), and eight three-bedroom units (3.7 percent). The proposed unit mix of primarily studio/efficiency, one bedroom, and two bedroom units will attract singles, couples, roommates, and potentially some small families with children. The eight three-bedroom units will appeal to households desiring additional space, including larger households with children.

C. Building Types and Placement

Trinity Flats will include one ground-story level retail within the 10-story high-rise mixed-use building at the northwest corner of Trinity Avenue SW and Central Avenue SW (Figure 1). The residential building will be adjacent Central Avenue SW, Trinity Avenue SW, and Trinity United Methodist Church. An exterior gathering area will be located in the central portion of the site. The site will be accessible via three pedestrian entrances on the northwest, northeast, and eastern portions of the site along Central Avenue SW and Trinity Avenue SW. A parking deck to the south of the subject site will provide access to site; parking will be provided at existing parking decks via a parking agreement with the City of Atlanta.

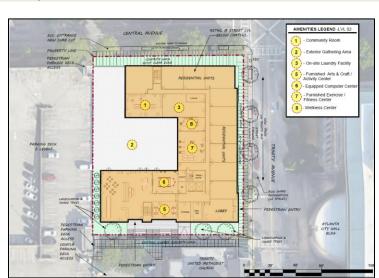

Figure 1 Site Plan, Trinity Flats

Source: Radiant Development Partners

D. Detailed Project Description

1. Project Description

Trinity Flats will offer 48 studio/efficiency units (16 studio and 32 efficiency), 112 one-bedroom units, 50 two-bedroom units, and eight three-bedroom units, of which all will benefit from Low Income Housing Tax Credits and will target renter households earning up to 50 percent, 60 percent, and 80 percent of the Area Median Income (AMI); 20 LIHTC units at 50 percent AMI will benefit from Project Based Vouchers (PBV) with tenant-paid rents based on a percentage of income. The 48 studio/efficiency units will be grouped as efficiency units throughout the rest of the report for the purposes of this analysis.

- Studio/efficiency units will have one bathroom and a weighted average of 425 square feet.
- One bedroom units will have one bathroom and 600 square feet.
- Two bedroom units will have two bathrooms and 850 square feet.
- Three bedroom units will have two bathrooms and 1,100 square feet. (Table 1).
- Tenants residing in 20 studio/efficiency units at 50 percent AMI will benefit from PBVs and will pay a percentage of the rent; minimum income limits and tenant-paid rents will not apply.
 We utilized the lesser of the proposed contract rent and maximum allowable LIHTC rent (most that could be charged without PBV) for these units in this analysis.
- The subject's physical address is 104 Trinity Avenue SW, Atlanta, Georgia 30303.
- Trinity Flats will offer units in a newly constructed high-rise building with parking provided at existing parking decks via an agreement with City of Atlanta.
- Trinity Flats' rents will include the cost of all utilities.
- Proposed unit features and community amenities are detailed in Table 2.

2. Other Proposed Uses

None.

3. Proposed Timing of Development

Trinity Flats is expected to begin construction in December 2024 with construction completion in September 2026. For the purposes of this report, the property's placed-in-service year is 2026.

4. SITE EVALUATION

A. Site Analysis

1. Site Location

The subject site is on the southeastern corner of the intersection of Trinity Avenue SW and Central Avenue SW in Atlanta, Fulton County, Georgia (Map 1). The site is just north of the Interstate 20 and 75/85 interchange. The subject property's physical address is 104 Trinity Avenue SW, Atlanta, GA 30303.

Map 1 Site Location, Trinity Flats

2. Existing and Proposed Uses

The subject site is undeveloped including no existing structures (Figure 2); Trinity Flats will offer 218 affordable general occupancy units in a high-rise building.

Figure 2 Views of Subject Site

Site facing south from Trinity Avenue SW

Site facing southeast from Trinity Avenue SW

Site facing east from Central Avenue SW

Site facing east from Central Avenue SW

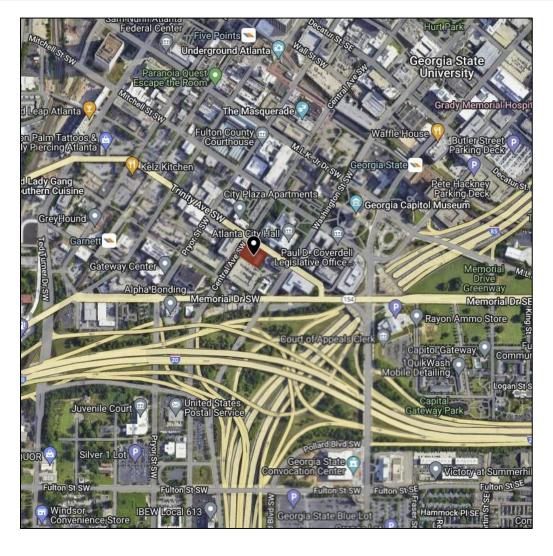

Site facing south from Trinity Avenue SW

3. General Description of Land Uses Surrounding the Subject Site

The subject site is just north of Interstate 20 and west of the Interstate 75/85 interchange and is surrounded by a mixture of land uses including Atlanta City Hall, restaurants, municipal buildings, a church, parking decks, and apartments (Figure 3). Commercial uses including restaurants, convenience stores, and offices surround the subject site. Single-family detached and attached homes are common to the south across Interstate 20 within roughly one mile of the site. Significant multifamily rental development is within one-half mile east of the subject site including Columbia Tower, Columbia Senior Residences at MLK Village, Link Apartments Canvas, Broadstone 2Thirty Apartments, Platform Grant Park Apartments, and Mattress Factory Lofts. Downtown Atlanta is less than one-half mile north of the subject site.

Figure 3 Satellite Image of Subject Site and Surrounding Land Uses

4. Land Uses Surrounding the Subject Site

The land uses surrounding the subject site are as follows (Figure 4):

- North: Atlanta City Hall, City Plaza Apartments, and American Deli
- East: Trinity United Methodist Church and Municipal Buildings
- South: Government Center Parking Deck, OG Smoke and Grocery, and Progressive Hope House
- West: Atlanta Public Schools Office, Subway, and Parking Garage

Figure 4 Views of Surrounding Land Uses

Trinity United Methodist Church to the east

Atlanta Public Schools Office to the west

Atlanta City Hall to the north

City Plaza Apartments to the north

Progressive Hope House to the south

B. Neighborhood Analysis

1. General Description of Neighborhood

The subject site is in the established South Downtown neighborhood, which is just south of downtown Atlanta, west of Interstate 75/85, and north of Interstate 20. The urban setting comprises primarily of commercial and municipal uses with several residential uses (multi-family communities) in the immediate area. Single-family detached homes, multi-family communities, and commercial uses are along Memorial Drive SE to the east. Memorial Drive SE is a major commercial thoroughfare in the area; Trinity Avenue operates as a connector street providing access to government buildings. Multi-family communities and single-family homes are common within two miles of the site, primarily to the east and south with downtown Atlanta primarily comprising high-rise apartments and condominiums to the north and west as well as office buildings. The Interstate 20 and 75/85 interchange is within one-half mile east of the subject site providing direct access to the region.

2. Neighborhood Planning Activities

RPRG identified three residential developments as recently completed or under construction within 1.5 miles of the subject site including Broadstone 2Thirty Apartments (market rate), McAuley Park Apartments (mixed income), and Summerhill by Hedgewood Townhomes. The townhomes at Summerhill by Hedgewood are priced in the \$700,000s to \$800,000s. Publix Super Market at Summerhill was recently completed in summer 2023 along Hank Aaron Drive SE less than one mile southeast of the site; however, is undergoing improvements while remaining open after a recent parking deck collapse in early September 2023.

The City of Atlanta divides neighborhoods into Neighborhood Planning Units (NPUs), which are citizen advisory councils. The NPU councils make recommendations to the Mayor and City on zoning, land use, and other planning-related activities. The subject site is located in NPU-M and the Downtown neighborhood. The City of Atlanta conducted a master plan for Downtown Atlanta in 2018. The master plan outlined six vision goals, with input from citizens, including: maintain focus on quality of life issues to humanize Downtown; uncover, celebrate, and preserve Downtown's heritage to ensure that new growth does not overwrite history; grow Downtown neighborhoods tailored to meet the needs of residents; reinforce Downtown's roles as the entrepreneurial and economic center of the region; restore the forest in the center of the city to improve air and water quality, create shade, and add beauty Downtown; and offer real choice in transportation to reduce traffic congestion and reliance on automobiles and create space for increased activity.

3. Public Safety

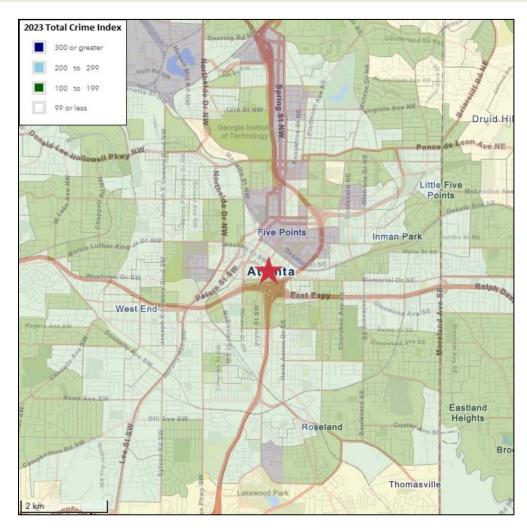

CrimeRisk is a census tract level index that measures the relative risk of crime compared to a national average. AGS analyzes known socio-economic indicators for local jurisdictions that report crime statistics to the FBI under the Uniform Crime Reports (UCR) program. An index of 100 reflects a total crime risk on par with the national average, with values below 100 reflecting below average risk and values above 100 reflecting above average risk. Based on detailed modeling of these relationships, CrimeRisk provides a detailed view of the risk of total crime as well as specific crime types at the census tract level. In accordance with the reporting procedures used in the UCR reports, aggregate indexes have been prepared for personal and property crimes separately as well as a total index. However, it must be recognized that these are un-weighted indexes, in that a murder is weighted no more heavily than purse snatching in this computation. The analysis provides a useful measure of the relative overall crime risk in an area but should be used in conjunction with other measures.

The 2023 CrimeRisk Index for the census tracts in the general vicinity of the subject site are color coded with the site's census tract being light blue, indicating a crime risk (200 to 299) above the national average (100) (Map 2). Most of the market area has an above average rime risk with the higher crime risks along the Interstate 75/85 corridor and downtown Atlanta. The subject's crime risk

is comparable to the locations of many surveyed communities. Based on this data and observations made during our site visit, RPRG does not believe crime, nor the perception of crime will negatively impact the subject property's viability.

Map 2 Crime Index

C. Site Visibility and Accessibility

1. Visibility

Trinity Flats will have excellent drive-by visibility from Trinity Avenue SW, which is a heavily traveled connector street. Additional visibility will come from the moderately traveled Central Avenue SW, Washington Street SW, and Memorial Drive SW which border the site. Trinity Flats will have excellent visibility for an affordable rental community.

2. Vehicular Access

Trinity Flats will be accessible via a parking garage to the south of the subject site; Trinity Flats will have a parking agreement with the City of Atlanta for residents to use parking decks in downtown Atlanta. RPRG does not anticipate problems with site accessibility.

3. Availability of Public Transit and Inter-Regional Transit

The Metropolitan Atlanta Rapid Transit Authority (MARTA) is the major provider of mass transit in the Metro Atlanta area. MARTA provides both fixed-route bus service and a heavy rail system traveling primarily throughout Fulton and DeKalb Counties, inside and outside of the Atlanta city limits. Trinity Flats is adjacent to a MARTA bus stop along Central Avenue SW to the west on Route 42. Two MARTA rail stations (Georgia State and Garnett) are less than one mile from the site. Most major employment nodes, including downtown Atlanta, Sandy Springs, and Hartsfield-Jackson International Airport, can be reached from one of these public transportation options.

The subject site is convenient to many major thoroughfares including Interstate 75/85, Interstate 20, U.S. Highway 41 (Northside Drive NW), and Memorial Drive within one mile. Hartsfield-Jackson International Airport is roughly 10 miles to the south.

4. Pedestrian Access

The subject site has convenient pedestrian access with sidewalks available along all adjacent streets. A variety of nearby commercial uses (a convenience store, restaurant, pharmacy, grocery store, and two banks), community amenities (public park, public library, and post office), and bus stops are within walking distance of the subject site.

5. Accessibility Improvements Under Construction and Planned

Roadway Improvements Under Construction and Planned

RPRG reviewed information from local stakeholders to assess whether any capital improvement projects affecting road, transit, or pedestrian access to the subject site are currently underway or likely to commence within the next few years. Observations made during the site visit contributed to the process. RPRG did not identify any significant roadway projects as planned that would affect the subject site.

Transit and Other Improvements Under Construction and/or Planned

None.

D. Residential Support Network

1. Key Facilities and Services near the Subject Site

The appeal of any given community is often based in part on its proximity to those facilities and services required daily. Key facilities and services and their distances from the subject site are listed in Table 3 and their locations are plotted on Map 3.

Table 3 Key Facilities and Services

Map 3 Location of Key Facilities and Services

2. Essential Services

Health Care

Grady Memorial Hospital is less than one mile northeast of the subject site on Jesse Hill Jr. Drive SE. The hospital comprises 989 beds and is staffed by more than 334 physicians with roughly 5,000 healthcare professionals associated with the hospital. Grady Memorial Hospital is a Level I trauma center and offers 24-hour emergency services, heart and vascular care, cancer care, burn care, orthopedic care, neurology services, and women's care, among others.

Smaller clinics and independent physicians are within 2.5 miles of the subject site. The closest of these clinics is Medici Urgent Care and Wellness Center along John Wesley Dobbs Avenue NE to the southeast of the subject site.

Education

The subject site is in the Atlanta Public Schools district which has an enrollment of roughly 55,000 students. School age children residing at the subject property would attend Dunbar Elementary School (1.2 miles), King Middle School (1.1 miles), and Maynard Jackson Jr. High School (2.0 miles).

The Atlanta Metro area is home to many colleges, universities, and vocational schools offering a wide variety of degree programs and educational opportunities. Notable institutions of higher education in or near downtown Atlanta within roughly six miles north of the site include The Georgia Institute of Technology, Georgia State University, Emory University, Morris Brown College, Morehouse College, Atlanta Metropolitan State College, Bauder College, and the Savannah College of Art and Design.

3. Commercial Goods and Services

Convenience Goods

The term "convenience goods" refers to inexpensive, nondurable items that households purchase on a frequent basis and for which they generally do not comparison shop. Examples of convenience goods are groceries, fast food, health and beauty aids, household cleaning products, newspapers, and gasoline.

Two banks (Unity National Bank and Truist), a convenience store (BP), pharmacy (Walgreens), grocery store (Publix), and retailer (Family Dollar) are within one mile of the site.

Shoppers Goods

The term "shoppers goods" refers to larger ticket merchandise that households purchase on an infrequent basis and for which they usually comparison shop.

Family Dollar is within one mile south of the site along Ralph David Abernathy Boulevard and Target is 3.4 miles to the east on Caroline Street NE. The closest mall is the Mall at Peachtree Center which is 1.8 miles north of the site in downtown Atlanta offering over 60 specialty shops and six restaurants. Additional regional shopping areas in and around downtown Atlanta include Phipps Plaza, Lenox Square Mall, Atlantic Station, and Lenox Marketplace.

4. Location of Low-Income Housing

A list and map of existing low-income housing in the Trinity Flats Market Area are provided in the Existing Low-Income Rental Housing section of this report, starting on page 73.

E. Site Conclusion

Trinity Flats is in an established neighborhood near commercial, residential, and municipal land uses. Major traffic arteries, neighborhood amenities, and employment are convenient to the site; many neighborhood amenities are walkable from the site while the largest concentration of employment in the region is just north of the site in downtown. Surrounding land uses are compatible with multifamily rental housing. Quincy Haisley (Analyst) conducted a site visit to the site, neighborhood, and market area on August 31, 2023. RPRG did not identify negative attributes that would impact the ability of Trinity Flats to successfully lease its units. The subject site is acceptable for the proposed affordable multi-family rental community.

5. MARKET AREA

A. Introduction

The primary market area for Trinity Flats is defined as the geographic area from which future residents of the community would primarily be drawn and in which competitive rental housing alternatives are located. In defining the market area, RPRG sought to accommodate the joint interests of conservatively estimating housing demand and reflecting the realities and dynamics of the local rental housing marketplace.

B. Delineation of Market Area

The Trinity Flats Market Area consists of census tracts in and around Downtown Atlanta including all or portions of the neighborhoods of Downtown, Five Points, Grant Park, and Inman Park (Map 4). The market area is roughly bisected by Interstate 20 from east to west and Interstate 75/85 from north to south providing good connectivity. The neighborhoods included in the Trinity Flats Market Area are those most comparable with the area immediately surrounding the subject site and households living throughout the Trinity Flats Market Area would consider Trinity Flats as an acceptable shelter location. This market area does not extend further north due to a transition into Midtown which is a separate and distinct submarket while it does not extend further in any other direction due to distance and transition to areas not comparable to the area surrounding the subject property.

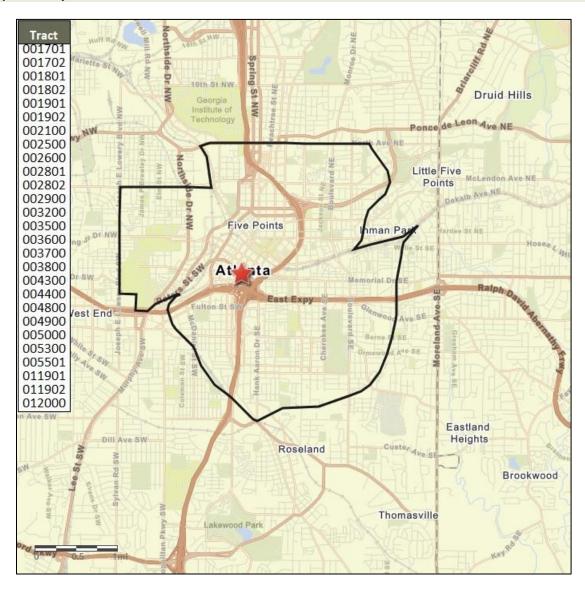

The boundaries of the Trinity Flats Market Area and their approximate distance from the subject site are:

iles)
iles)
iles)
iles)

The Trinity Flats Market Area is compared to Fulton County, which is presented as a secondary market area for demographic purposes. Demand estimates are based only on the Trinity Flats Market Area.

RP RG

Map 4 Trinity Flats Market Area

6. COMMUNITY DEMOGRAPHIC DATA

A. Introduction and Methodology

RPRG analyzed recent trends in population and households in the Trinity Flats Market Area and Fulton County using U.S. Census data and data from Esri, a national data vendor which prepares small area estimates and projections of population and households. Building permit trends collected from the HUD State of the Cities Data Systems (SOCDS) database were also considered. All demographic data is based on historic Census data and the most recent local area projections available for the Trinity Flats Market Area and Fulton County. We have evaluated projections in context with recent trends, available economic data, current market conditions, and any potential remaining impact of the COVID-19 pandemic. Demographic data is presented for 2010, 2023, and 2026 per DCA's 2023 Market Study Guide.

B. Trends in Population and Households

1. Recent Past Trends

The Trinity Flats Market Area's population and household base each grew significantly between 2010 and 2023 with net growth of 20,457 people (38.1 percent) and 10,965 households (50.1 percent) (Table 4). The market area's average annual growth was 1,574 people (2.9 percent) and 843 households (3.9 percent). Total household and population counts in 2023 in the market area are 74,166 people and 32,830 households. Fulton County grew slower on a percentage basis with the net addition of 178,426 people (19.4 percent) and 89,869 households (23.9 percent) during this period.

2. Projected Trends

Based on Census data, RPRG projects growth in the Trinity Flats Market Area will accelerate on a nominal basis with annual growth of 1,837 people (2.5 percent) and 1,042 households (3.2 percent) from 2023 to 2026. Net growth over this three-year period will be 5,511 people (7.4 percent) and 3,126 households (9.5 percent) (Table 4). The Trinity Flats Market Area is projected to contain 79,677 people and 35,956 households in 2026.

Fulton County is projected to add 49,664 people (4.5 percent) and 25,204 households (5.4 percent) over the next three years for average annual growth rates of 1.5 percent for population and 1.8 percent for households which is significantly slower on a percentage basis when compared to the market area.

The average household size in the market area of 1.76 persons per household in 2023 is projected to decrease to 1.73 persons in 2026 (Table 5).

3. Building Permit Trends

Residential permit activity in Fulton County increased from 1,954 units in 2011 to an annual average of 10,162 permitted units from 2016 to 2018 before slowing to an annual average of 5,285 permitted units from 2019 to 2021 (Table 6). The number of permitted units spiked from 5,170 permitted units in 2021 to 14,577 permitted units in 2022, the highest annual total since 2011. Fulton County authorized an annual average of 7,697 new housing units from 2011 to 2022.

Large structures with five or more units accounted for 61.1 percent of units permitted in Fulton County since 2011 while single-unit structures accounted for 38.7 percent. Few permitted units (211 units) in the county were in multi-family structures with two to four units. Approximately two-thirds (65.0 percent) of permitted units in the county from 2011 to 2018 were in multi-family structures with five or more units while permitted units in single-units structures outnumbered permitted units in

structures with 5+ units from 2019 to 2021. Permitted units in structures with 5+ units (10,579 units) outnumbered single unit permitted units (3,952 units)

C. Demographic Characteristics

1. Age Distribution and Household Type

The population in the Trinity Flats Market Area is significantly younger than Fulton County's population with median ages of 30 and 35 years, respectively. The Trinity Flats Market Area has large proportions of Young Adults ages 20 to 34 (35.5 percent) and Adults age 35 to 61 years (29.9 percent) (Table 7). Children/Youth under 20 and Seniors ages 62 and older comprise 23.4 percent and 11.2 percent of the market area's population, respectively. Fulton County has a significantly larger proportion of proportion of Adults ages 35 and older when compared to the market area (52.2 percent versus 41.1 percent). Fulton County has a significantly smaller proportion of Young Adults age 20 to 34 when compared to the Trinity Flats Market Area due to the market area's proximity to local colleges, universities, and downtown (23.4 percent versus 35.5 percent).

Single-person households were the most common household type in the Trinity Flats Market Area at 52.6 percent as of the 2020 Census. Roughly one-third (33.7 percent) of market area households were multi-person households without children while households with children comprised 13.7 percent of market area households (Table 8). Fulton County had a more even distribution with multi-person households without children the most common (39.9 percent) followed by single-person households (36.2 percent). Households with children were the least common household type in the county at 23.9 percent.

2. Household Trends by Tenure

a. Recent Past Trends

The number of renter households in the Trinity Flats Market Area increased significantly from 14,771 in 2010 to 23,524 in 2023, representing a net increase of 8,753 renter households or 59.3 percent; the Trinity Flats Market Area added 673 renter households per year over the past 13 years.

Figure 5 Trinity Flats Market Area Households by Tenure 2010 to 2023

The Trinity Flats Market Area's renter percentage of 71.7 percent in 2023 is significantly higher than Fulton County's 50.9 percent (Figure 5). The Trinity Flats Market Area's annual average renter household growth over the past 13 years was 673 renter households (3.6 percent) compared to owner household growth of 170 owner households (2.1 percent), increasing the renter percentage from

Source: U.S. Census of Population and Housing,2010,2020;RPRG, Inc.

67.6 percent in 2010 71.7 percent in 2023. Renter households accounted for 70.4 percent of net household growth in Fulton County from 2010 to 2023.

b. Projected Households Tenure Trends

Based on our research including an analysis of demographic and multi-family trends, RPRG projects renter households will account for 79.8 percent net household growth from 2023 to 2026 which is equal to the trend over the past 13 years (Table 10). This results in annual growth of 832 renter households, which is significantly higher than annual renter growth of 673 households from 2010 to 2023 due to faster overall household growth, for net growth of 2,495 renter households from 2023 to 2026.

Table 10 Households by Tenure, 2023-2026

3. Renter Household Characteristics

Over three-fifths (61.1 percent) of renter householders in the Trinity Flats Market Area are working age adults ages 25 to 54 years and 12.9 percent are under the age of 25. Roughly 11 percent of householders are older adults age 55 to 64 and 14.9 percent are age 65+ (Table 11). Fulton County has a significantly lower proportion of renter households under 35 when compared to the Trinity Flats Market Area (39.9 percent versus 45.0 percent).

Nearly 85 percent of renter households in the Trinity Flats Market Area had one or two people including 56.2 percent with one person, the most common household size. Roughly 12 percent of renter households had three or four people and 3.1 percent had five or more people (Table 12). Fulton County had a larger proportion of larger renter households with three or more people when compared to the Trinity Flats Market Area (26.6 percent versus 15.3 percent).

4. Income Characteristics

The Trinity Flats Market Area's 2023 median income of \$71,420 is \$17,600, or 19.8 percent lower than the \$89,020 median in Fulton County (Table 13). Roughly 23 percent of Trinity Flats Market Area households earn less than \$25,000, 15.4 percent earn \$25,000 to \$49,999, and 13.3 percent earn \$50,000 to \$74,999. Nearly half (48.1 percent) of Trinity Flats Market Area households earn upper incomes of at least \$75,000, including 19.9 percent earning \$150,000 or more. Fulton County has significantly higher percentage of households earning incomes of \$75,000 or more when compared to the Trinity Flats Market Area (57.3 percent versus 48.1 percent).

Based on the U.S. Census Bureau's American Community Survey (ACS) data, the breakdown of tenure, and household estimates, RPRG estimates that the median income of the Trinity Flats Market Area households by tenure is \$51,644 for renters and \$132,025 for owners (Table 14). Approximately 30 percent of renter households earn less than \$25,000, 19.4 percent earn \$25,000 to \$49,999, and 15.5 percent earn \$50,000 to \$74,999. Roughly one-third (35.5 percent) of renter households earn \$75,000 or more including 11.1 percent earning \$150,000 or more.

7. EMPLOYMENT TREND

A. Introduction

This section of the report focuses primarily on economic trends and conditions in Fulton County, Georgia, the county in which the subject site is located. Economic trends in Georgia and the nation are also discussed for comparison purposes. This section presents the latest economic data available at the local and national levels.

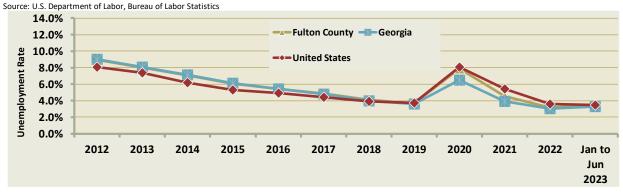

B. Labor Force, Resident Employment, and Unemployment

1. Trends in Annual Average Labor Force and Unemployment Data

Fulton County added 52,375 net workers (10.3 percent) from 2012 to 2019 while the employed portion of the labor force increased at a faster pace with the net addition of 77,559 employed workers (16.7 percent) over this period (Table 16). The county lost 1,253 workers (0.2 percent) and 25,046 employed workers (4.6 percent) in 2020 due to the COVID-19 pandemic before rebounding to all-time annual highs in 2022 with net growth of 15,370 workers and 41,331 employed workers in 2021 and 2022. The number of unemployed workers decreased by 55.2 percent from 45,640 to 20,456 unemployed workers in 2019 before increasing to 44,249 unemployed workers in 2020 due to the pandemic. Following a significant rebound in the number of employed workers from 2020 to 2022, the number of unemployed workers decreased by 58.7 percent to 18,288 unemployed workers in 2022. The overall labor force and unemployed workers increased through June 2023; however, monthly data reflects seasonality.

Table 16 Annual Average Labor Force and Unemployment Rates

Annual Average												Jan to Jun
Unemployment	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
Labor Force	509,382	507,565	508,619	508,815	531,124	554,157	556,130	561,757	560,504	569,596	575,874	584,411
Employment	463,742	466,867	472,618	477,884	502,170	527,208	533,436	541,301	516,255	543,672	557,586	564,217
Unemployment	45,640	40,698	36,001	30,931	28,954	26,949	22,694	20,456	44,249	25,924	18,288	20,194
Unemployment												
Fulton County	9.0%	8.0%	7.1%	6.1%	5.5%	4.9%	4.1%	3.6%	7.9%	4.6%	3.2%	3.5%
Georgia	9.0%	8.1%	7.1%	6.1%	5.4%	4.8%	4.0%	3.6%	6.5%	3.9%	3.0%	3.3%
United States	8.1%	7.4%	6.2%	5.3%	4.9%	4.4%	3.9%	3.7%	8.1%	5.4%	3.6%	3.5%

Fulton County's annual average unemployment rate steadily declined from 2012 to 2019 and reached 3.6 percent in 2019, comparable to the state rate (3.6 percent) and national rate (3.7 percent). Annual average unemployment rates increased sharply in all three areas in 2020 due to the COVID-19 pandemic with the county's 7.9 percent above the state's 6.5 percent but below the nation's 8.1 percent. The county's unemployment rate recovered significantly to 3.2 percent in 2022 compared to 3.0 percent in Georgia and 3.6 percent in the nation. Unemployment rates in the county and state

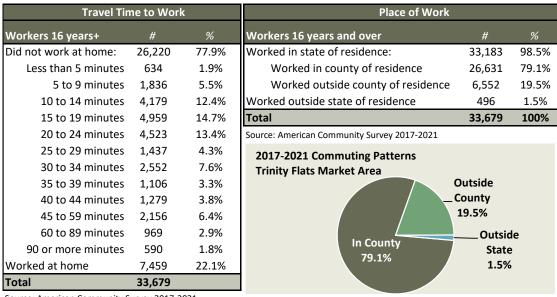

increased slightly to 3.5 percent and 3.3 percent, respectively, through June 2023 while the nation's unemployment rate decreased slightly to 3.5 percent (Table 16).

C. Commutation Patterns

According to 2017-2021 American Community Survey (ACS) data, over half (56.6 percent) of workers residing in the Trinity Flats Market Area commuted less than 20 minutes or worked from home, 28.6 percent commuted 20 to 39 minutes, and 14.9 percent commuted at least 40 minutes including 4.7 percent commuting at least 60 minutes (Table 17).

Nearly 80 percent of workers residing in the Trinity Flats Market Area worked in Fulton County while roughly one-fifth (19.5 percent) worked in another Georgia county. Approximately two percent of Trinity Flats Market Area workers are employed outside the state. The large proportion of short and moderate commute times and high percentage of workers employed in Fulton County reflects the market area's relative proximity/accessibility to employment concentrations in the Atlanta Metro Area including in downtown Atlanta and Midtown. The significant percentage of workers employed outside the county illustrates the market area's convenient access to several major thoroughfares (Interstates 20 and 75/85) which connect to Metro Atlanta counties including Cobb, Clayton, Douglas, and DeKalb.

Table 17 Commutation Data, Trinity Flats Market Area

Source: American Community Survey 2017-2021

D. At-Place Employment

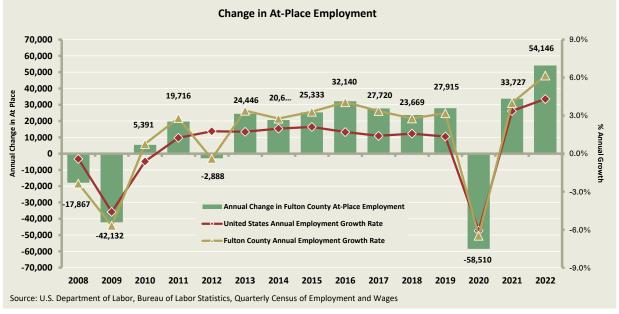

1. Trends in Total At-Place Employment

Fulton County's At-Place Employment (jobs located in the county) grew by 28.2 percent from 2010 to 2019 with the net addition of 198,665 jobs since the previous recession-era. The county added jobs in nine of 10 years over this period including each year from 2013 to 2019; Fulton County added an annual average of 25,976 jobs over this period with more than 20,000 new jobs each year. The county lost 58,510 jobs in 2020 at the onset of the COVID-19 pandemic which was slightly higher on a percentage basis when compared to the nation (6.5 percent versus 6.1 percent); however, Fulton County recouped all these job losses with the net addition of 87,873 jobs in 2021 and 2022 (Figure 6).

Figure 6 At-Place Employment, Fulton County

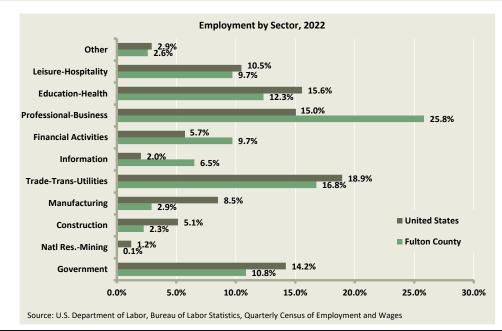

2. At-Place Employment by Industry Sector

Fulton County has a balanced economy with six sectors each accounting for 9.7 to 25.8 percent of the county's jobs in 2022 (Figure 7); the largest sectors in the county in descending order are Professional-Business (25.8 percent), Trade-Transportation-Utilities (16.8 percent), Education-Health (12.3 percent), Government (10.8 percent), Financial Activities (9.7 percent), and Leisure-Hospitality (9.7 percent). Fulton County has a much higher percentage of jobs in the Professional-Business sector compared to jobs nationally (25.8 percent versus 14.9 percent) while the Financial Activities and Information sectors are also larger in the county on a percentage basis. Conversely, the county has significantly lower percentages of jobs in the Government, Manufacturing, Education-Health, Construction, and Trade-Transportation-Utilities sectors when compared to the nation.

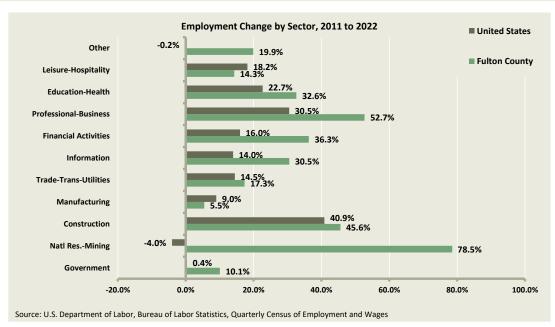

Figure 7 Total Employment by Sector, Fulton County 2022

Sector	Other	Leisure- Hospitality	Education- Health	sional-	Financial Activities		Trans-	Manufac turing		Natl. Res. Mining	Govern- ment	Total Employ- ment
Jobs	28,374	90,605	114,940	240,734	90,605	60,817	156,344	27,225	21,085	491	101,150	932,370

All employment sectors added jobs in Fulton County from 2011 to 2022 with six sectors growing by roughly 30 percent or more including two of the county's three largest sectors (Professional-Business and Education-Health) (Figure 8). The largest percentage growth was 78.5 percent in the Natural Resources-Mining sector while the county's largest sector (Professional-Business) grew by 52.7 percent. The county's third largest sector (Education-Health) grew by 32.6 percent and other notable gains were 36.3 percent in the Financial Activities sector and 30.5 percent in the Information sector.

Figure 8 Employment Change by Sector, 2011-2022

3. Major Employers

The listing of major employers in metro Atlanta reflects the diversity within its economy. The largest employers in metro Atlanta are in the Trade-Transportation-Utilities sector (eight businesses), including Delta Air Lines, the region's largest employer (Table 18). Several other sectors are well represented, including Education-Health (seven businesses) and Financial Activities (two businesses). Many of Atlanta's major employers are within close commuting distance of the subject site, including businesses located in downtown Atlanta within roughly three miles north of the site and Delta Air Lines near Hartsfield-Jackson Atlanta International Airport approximately 10 miles south of the site (Map 5).

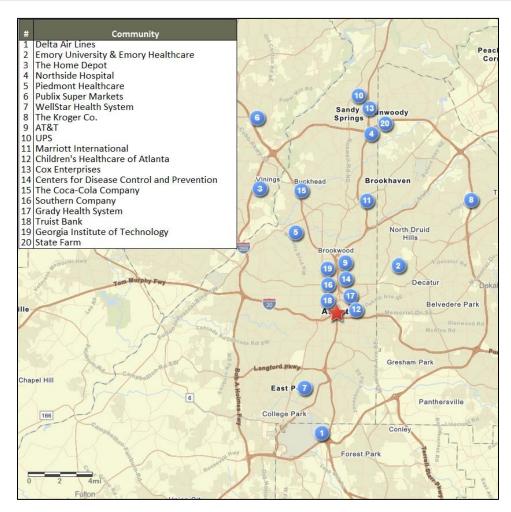

Table 18 Major Employers, Atlanta Metro Area

Rank	Name	Sector	Employment

Map 5 Major Employers, Atlanta Metro Area

4. Recent Economic Expansions and Contractions

Several large job expansions have been announced since January 2021 in Fulton County:

- **SK Battery America**, a lithium-ion battery manufacturer, announced in January 2023 plans to open a regional IT hub facility in Roswell. The \$19 million investment will create 200 high-tech jobs within the new few years.
- Anduril Industries, a military technology manufacturer, announced in July 2022 plans to invest \$60 million in a new manufacturing and research facility. The investment will create more than 180 jobs by 2025. The new facility will be located at 1435 Hills Place NW in Atlanta.
- McKinsey & Company announced plans in July 2022 to add more than 700 jobs at its West Midtown location by 2025.
- Cisco, the Fortune 100 Company, announced plans in October 2021 to invest up to \$41 million to open a Talent and Collaboration Center in Midtown Atlanta. With the investment, it is expected that up to 700 jobs will be created. The center is expected to open in summer 2022. We did not identify any update on the proposal since the announcement in late 2021.
- Visa, the large FinTech company, announced plans to increase their footprint in Atlanta in September 2021. The company shared the plan to hire approximately 1,000 new employees over the next few years as well as expand into a 123,000 square foot office at 1200 Peachtree Street. The new office is expected to open by 2024.

- Intuitive Surgical, a robotic surgery systems company, announced plans in August 2021 to expand its Peachtree Corners campus. The \$500 million investment will expand the campus to 750,000 square feet of operational space, training facilities, and administrative offices. Completion is expected in 2024 and will bring an additional 1,200 jobs to the 180 people currently employed at the campus.
- ASOS, an online fashion and beauty retailer, announced in July 2021 plans to invest more
 than \$100 million to expand its e-commerce fulfillment operations in Fulton County.
 Currently, more than 1,000 people are employed at the fulfillment center. With the new
 expansion, it is expected that it will bring several high-paying engineering and software
 development jobs.
- Kainos, a digital technology company, announced an investment of \$1.2 million to open a sales and information technology hub. The hub will be located in Buckhead and is expected to create 137 jobs.

In contrast, the Worker Adjustment and Retraining Notification (WARN) Act helps ensure advance notice of qualified plant closings and mass layoffs. Since January 2022, RPRG identified 23 WARN notices with 3,887 jobs affected.

E. Conclusions on Local Economics

Fulton County has experienced significant economic growth over the past decade, consistently outperforming the national economy over much of this period. The county's At-Place Employment grew during nine of 10 years prior to the pandemic. Fulton County's unemployment rate has tracked comparably to the state and nation over the past decade. Like all areas of the nation, Fulton County's economy was negatively impacted by the COVID-19 pandemic with increased unemployment and job losses; however, the county has rebounded with an average overall and employed portion of the labor force larger through June 2023 than pre-pandemic totals in 2019 while the county has more than recovered all jobs lost during the pandemic. Fulton County's economy is projected to continue growing following the pandemic which is expected to continue to fuel demand for housing.

8. AFFORDABILITY & DEMAND ANALYSIS

A. Affordability Analysis

1. Methodology

The Affordability Analysis tests the percentage of income-qualified households in the market area that the subject community must capture to achieve full occupancy.

The first component of the Affordability Analysis involves looking at the total household income distribution and renter household income distribution among Trinity Flats Market Area households for the target year of 2026. RPRG calculated the income distribution for both total households and renter households based on the relationship between owner and renter household incomes by income cohort from the 2017-2021 American Community Survey along with estimates and projected income growth by Esri (Table 19).

A housing unit is typically said to be affordable to households that would be expending a certain percentage of their annual income or less on the expenses related to living in that unit. In the case of rental units, these expenses are generally of two types – monthly contract rents paid to landlords and payment of utility bills for which the tenant is responsible. The sum of the contract rent and utility bills is referred to as a household's 'gross rent burden.' For the Affordability Analysis, RPRG employs a 35 percent gross rent burden. This rent burden only applies for tenants who do not receive PBV. As 20 proposed LIHTC units at the subject property will have PBV through the HOME First program and minimum income limits will not apply, the affordability analysis has been conducted without this additional subsidy. The lesser of the proposed contract rent and maximum allowable LIHTC rent (the most that could be charged without PBV) was utilized for this analysis. We also performed an affordability analysis with the proposed PBV.

HUD has computed a 2023 median household income of \$102,100 for the Atlanta-Sandy Springs-Roswell MSA. Based on that median income, adjusted for household size, the maximum income limit and minimum income requirements are computed for each floor plan (Table 20). The minimum income limits are calculated assuming up to 35 percent of income is spent on total housing cost (rent plus utilities). The maximum allowable incomes for LIHTC units are based on an average of 1.5 persons per bedroom rounded up to the nearest whole number for all floor plans per DCA requirements. Maximum gross rents, however, are based on the federal regulation of 1.5 persons per bedroom for all floor plans. The Affordability Analysis assumes all proposed LIHTC units with PBV are considered standard LIHTC units; however, minimum income limits will not apply for the 20 LIHTC units with PBV. As such, we also conducted an Affordability Analysis with the proposed PBV on 20 of 218 LIHTC units.

2. Affordability Analysis

The steps below look at the affordability of the proposed units at the subject property without the proposed PBV (Table 21):

- Looking at the efficiency units at 50 percent AMI (top left panel), the overall shelter cost at the proposed rent would be \$893 (\$893 net rent plus a utility allowance of \$0 as all utilities are included in the rent).
- By applying a 35 percent rent burden to this gross rent, we determined that a 50 percent AMI
 efficiency unit would be affordable to households earning at least \$30,617 per year. A
 projected 18,346 renter households in the Trinity Flats Market Area will earn at least this
 amount in 2026.
- The maximum income limit for an efficiency unit at 50 percent AMI is \$35,750 based on a maximum household size of one person. A projected 17,425 renter households will have incomes above this maximum in 2026.
- Subtracting the 17,425 renter households with incomes above the maximum income limit from the 18,346 renter households that could afford to rent this unit, RPRG computes that a projected 921 renter households in the Trinity Flats Market Area will be within the target income segment for the efficiency units at 50 percent AMI.
- The renter capture rate for the 20 efficiency units at 50 percent AMI is 2.2 percent.
- Using the same methodology, we determined the band of qualified households for the remaining floor plan types, AMI levels, and the project overall. The remaining capture rates by floorplan range from 0.1 percent to 3.3 percent.
- By income level, renter capture rates are 2.2 percent for 50 percent AMI units, 2.1 percent for 60 percent AMI units, and 0.5 percent AMI units for 80 percent AMI units. The project's overall capture rate is 2.4 percent.
- Removal of the minimum income limit when accounting for the proposed PBV on 20 efficiency units at 50 percent AMI increases the number of income-qualified renter households to 16,705 and drops the overall capture rate to 1.3 percent (Table 22).

3. Conclusions of Affordability

All renter affordability capture rates (with or without PBV) are within acceptable levels for an affordable rental community indicating that sufficient income-qualified renter households exist in the market area to support the 218 proposed units at Trinity Flats with or without the proposed PBV.

B. Demand Estimates and Capture Rates

1. Methodology

DCA's demand methodology for general occupancy communities consists of three components:

- The first component of demand is household growth. This number is the number of incomequalified renter households projected to move into the Trinity Flats Market Area between the base year (2023) and the placed-in-service year of 2026.
- The next component of demand is income-qualified renter households living in substandard households. "Substandard" is defined as having more than 1.01 persons per room and/or lacking complete plumbing facilities. According to ACS data, the percentage of renter households in the primary market area that are "substandard" is 2.9 percent (see Table 15 on page 39). This substandard percentage is applied to current household numbers.
- The third component of demand is cost burdened renters, which is defined as those renter households paying more than 35 percent of household income for housing costs. According to ACS data, 39.8 percent of Trinity Flats Market Area renter households are categorized as cost burdened (see Table 15 on page 39).

DCA demand estimates are shown both without the proposed PBV (Table 23, Table 24) and with the proposed PBV.

The data assumptions used in the calculation of these demand estimates are detailed at the bottom of Table 23 and Table 25. Income qualification percentages for demand estimates are derived by using the Affordability Analysis detailed in Table 21 (without accounting for PBV) and Table 22 (with PBV).

2. Demand Analysis

According to DCA's demand methodology, all comparable units recently funded by DCA, proposed for funding for a bond allocation from DCA, or any comparable units at communities undergoing lease-up are to be subtracted from the demand estimates to arrive at net demand. The 60 percent and 80 percent AMI units under construction at McAuley Park, 60 percent and 80 percent AMI units under construction at Stanton Park, 50 percent, 60 percent, and 80 percent AMI units under construction at East Medinah Village, 60 percent AMI units planned at Ashley at Scholars Landing II, 60 percent and 80 percent AMI units planned at The Simpson, 60 percent and 80 percent AMI units planned at The Avery, and the 60 percent and 80 percent AMI units planned at 360 Peachtree are subtracted from demand estimates with and without accounting for PBV.

We have calculated demand without PBV and rents at the lesser of the proposed contract rent and maximum allowable LIHTC rent levels to test market conditions. The project's overall demand capture rate without accounting for the proposed PBV is a low 6.3 percent (Table 23). The demand capture rates by income level without accounting for the proposed PBV are 4.9 percent for 50 percent AMI units, 5.5 percent for 60 percent AMI units, and 1.1 percent for 80 percent AMI units. Capture rates by floor plan range from 2.4 percent to 5.4 percent (Table 24).

When accounting for the proposed PBV, the project's overall capture rate drops to 3.1 percent (Table 25). The demand capture rates by income level when accounting for the proposed PBV are 1.7 percent for 50 percent AMI units, 5.5 percent for 60 percent AMI units, and 1.1 percent for 80 percent AMI units. Capture rates by floorplan range from 0.9 percent to 5.4 percent (Table 26).

3. DCA Demand Conclusions

All capture rates are well within DCA thresholds and indicate strong demand in the market area to support the proposed Trinity Flats (with or without the proposed PBV) and the comparable pipeline.

9. COMPETITIVE RENTAL ANALYSIS

A. Introduction and Sources of Information

This section presents data and analyses pertaining to the supply of rental housing in the Trinity Flats Market Area. We pursued several avenues of research to identify multi-family rental projects that are in the planning stages or under construction in the Trinity Flats Market Area. We reviewed the Georgia Department of Community Affairs' (DCA) lists of recent Low Income Housing Tax Credit (LIHTC) allocation lists, reviewed local newspaper articles, and reviewed the City of Atlanta's building permit tracker. The rental survey was conducted in August 2023.

B. Overview of Market Area Housing Stock

The renter occupied housing stock in both the Trinity Flats Market Area and Fulton County are primarily contained in multi-family buildings. Roughly 65 percent of renter occupied units in the Trinity Flats Market Area are in multi-family structures with 20 or more units compared to 39.7 percent in Fulton County. Roughly 87 percent of renter occupied units in the market area are in multi-family structures with five or more units while single-family detached homes comprise 5.5 percent of the market area's rental stock compared to 18.3 percent in Fulton County. Mobile home renter occupied units are more common in Fulton County at 0.7 percent compared to 0.1 percent in the Trinity Flats Market Area (Table 27). Single-family detached homes comprise roughly two-fifths (38.6 percent) of owner occupied units in the Trinity Flats Market Area and three-quarters (75.4 percent) of owner occupied units in Fulton County.

Source: American Community Survey 2017-2021

The renter occupied housing stock in the Trinity Flats Market Area has a median year built of 2000 compared to 1991 in Fulton County. Roughly half (51.6 percent) of market area renter occupied units have been built since 2000 including 19.5 percent built since 2010 (Table 28). Approximately 28 percent of renter occupied units in the market area were built prior to 1980 including 10.9 percent built prior to 1950. The median year built of owner occupied units in the market area (1993) is older when compared to the renter occupied median of 2000; 29.7 percent of owner occupied units were built prior to 1940 and 42.7 percent have been built since 2000.

According to 2017-2021 ACS data, the median value among owner occupied housing units in the Trinity Flats Market Area was \$350,428, which is \$5,303 or 1.5 percent higher than the Fulton County median of \$345,125 (Table 29). ACS estimates home values based upon values from homeowners'

assessments of the values of their homes. This data is traditionally a less accurate and reliable indicator of home prices in an area than actual sales data but offers insight of relative housing values among two or more areas.

Table 29 Value of Owner Occupied Housing Stock

C. Survey of General Occupancy Rental Communities

1. Introduction to the Rental Housing Survey

As part of this analysis, RPRG surveyed 36 general occupancy communities in the Trinity Flats Market Area including 20 market rate communities, 13 standard Low Income Housing Tax Credit (LIHTC) communities, and three deeply subsidized LIHTC communities. Ashley Auburn Pointe and Auburn Glenn are mixed-income communities with market rate and LIHTC units, including LIHTC units with PBRA, while Mechanicsville Crossing and Mechanicsville Station are mixed-income communities but were only able to provide market rate rents. Three deeply subsidized LIHTC communities (Stanton Oaks, Station 464, and Station 496) have PBRA on all units. All surveyed LIHTC communities are comparable to the subject property given the proposed LIHTC units (with and without PBV). We identified many newer upscale market rate communities in the market area, but we excluded these

communities from our survey due to their upscale products and rents at or near the top of the market. We were unable to survey three LIHTC communities (City Views at Rosa Burney Park, Square at Peoplestown, and Thrive at Sweet Auburn) following repeated attempts to contact management. Agerestricted communities were excluded from this analysis given a difference in age targeting. Profile sheets with detailed information, including photographs, are attached as Appendix 6.

2. Location

Two of three deeply subsidized LIHTC communities (Station 464 and Station 496) are roughly two miles northeast of the subject site along Boulevard NE while one LIHTC and 10 market rate communities are within roughly three miles northeast of the site, primarily in the Old Fourth Ward neighborhood. Two LIHTC and six market rate communities are within two miles east of the site near Interstate 20 (Map 6). One LIHTC, one market rate, and one deeply subsidized community are within 1.7 miles south of the site in the Grant Park and Summerhill neighborhoods. Three market rate and nine LIHTC communities are west of the site, primarily along Northside Drive SW and Interstate 20. The site is in a generally comparable location to all surveyed communities with a similar urban location and generally comparable access to area amenities and major thoroughfares in the region.

Map 6 Surveyed Rental Communities, Trinity Flats Market Area

3. Age of Communities

The average year built across all surveyed communities without PBRA is 2007 with a placed-in-service range of 1987 to 2021 (Table 30). Market rate communities have an average year built of 2007 with a placed-in-service range of 1987 to 2021. LIHTC communities without PBRA have a placed-in-service range of 1993 to 2020 with an average year built of 2005 while the three deeply subsidized LIHTC communities were built or rehabbed since 2016 (Table 31).

4. Structure Type

Twenty-two of 36 surveyed communities offer units in mid-rise buildings with interior hallways, elevators, and secured building entrances (Table 30). Eleven surveyed communities offer garden apartments including seven communities which also offer townhome units. Three surveyed communities are adaptive reuses. Of the surveyed LIHTC communities, seven communities offer units in mid-rise buildings, one community is an adaptive reuse, and eight surveyed LIHTC communities offer garden apartments with five communities also offering townhomes (Table 31).

5. Size of Communities

The surveyed communities without PBRA range in size from 65 to 738 units and average 250 units. The 13 LIHTC communities without PBRA range in size from 65 to 738 units and average 235 units, slightly smaller than the overall market average of 250 units (Table 30). Among the deeply subsidized LIHTC communities, community sizes range from 43 to 123 units and average of 87 units, significantly smaller than the overall market average (Table 31).

(*) LIHTC/Deeply Subsidized Community

6. Vacancy Rates

The Trinity Flats Market Area's rental market without PBRA is performing well with an aggregate stabilized vacancy rate of 4.1 percent among 7,959 combined units. The Victory at Summerhill is excluded from the stabilized vacancy rate due to undergoing initial lease-up. The 13 LIHTC communities without PBRA are also performing well with 117 vacancies among 3,055 combined units for an aggregate vacancy rate of 3.8 percent; seven of 13 LIHTC communities without PBRA reported vacancy rates of 3.1 percent or less with three communities fully occupied (Table 30). The surveyed LIHTC communities with PBRA are all fully occupied (Table 31).

7. Rent Concessions

Six market rate communities reported rental incentives ranging from \$250 off first month's rent to six weeks free (Table 30). One mixed-income LIHTC community (Centennial Place) utilized daily pricing for market rate units.

8. Absorption History

Station 496, the newest deeply subsidized LIHTC community in the market area, opened in May 2022 and fully leased its 123 units in August 2022 for an average monthly absorption of roughly 30 units. Station 464, a deeply subsidized LIHTC community, opened in October 2019 and was fully occupied in December 2019 for an average monthly absorption rate of roughly 32 units.

D. Analysis of Rental Pricing and Product

1. Payment of Utility Costs

Among the 20 surveyed market rate communities, only two communities include utilities in rent; Camden Fourth Ward and Northside Plaza include trash removal in the rent. Among surveyed LIHTC communities, eight of 16 communities offer trash removal in the rent while Magnolia Park, Stanton Oaks, Station 464, and Station 496 also include water and sewer in the rent (Table 32). Trinity Flats will include all utilities in the rent.

2. Unit Features

All surveyed communities offer a dishwasher and 25 of 36 surveyed communities offer a microwave. Twenty-seven of 36 surveyed communities offer ceiling fans while 29 of 36 surveyed communities offer a patio/balcony. Thirty-four of 36 surveyed communities offer washer and dryer connections including 14 communities offering in-unit washers and dryers (Table 32). All LIHTC communities offer a dishwasher, nine offer a microwave, and 10 offer ceiling fans. Thirteen surveyed LIHTC communities offer washer and dryer connections including five communities which offer in-unit washers and dryers. Twelve of 16 LIHTC communities offer a patio/balcony. Trinity Flats will offer a range,

refrigerator, garbage disposal, microwave, dishwasher, and washer and dryer connections. The units will also offer blinds, carpet and LVT flooring, central heating and air conditioning, ceiling fans, and a walk-in closet as standard. The proposed unit features are acceptable and will be competitive with existing LIHTC communities in the market area.

3. Parking

Eighteen of 36 surveyed communities (with and without PBRA) offer structured parking and 18

communities offer surface parking as the standard option. Several communities charge a one-time upfront fee of \$100 to \$200 for parking and select communities charge between \$20 to \$35 per month for structured parking or paid surface parking (Table 33).

Table 33 Parking Fees, Surveyed Rental Communities

Garages Paid Surface Community Structured Camden Vantage \$35 City View \$25 Link \$25 Skyline ATL \$20 \$20 The Prato at Midtown Source: Phone Survey, RPRG, Inc. \$20 \$26

August 2023

4. Community Amenities

The surveyed rental stock offers generally extensive community amenities. The most common amenities are a fitness center (36 communities), community room (30 business/computer communities), communities), and outdoor swimming pool (24 communities). Nineteen communities offer gated entry while 12 communities offer a playground; three surveyed communities offer tennis courts (Table 34). Trinity Flats' community amenity package will include an equipped computer center, community room, outdoor courtvard with sitting area, wellness center, elevators, fitness room, central laundry facility, management, and arts and crafts room. The proposed amenity package will be competitive with surveyed rental communities in the Trinity Flats Market Area and will be generally comparable to those offered at the surveyed LIHTC communities except for a swimming pool which is acceptable given the affordable nature of the subject property and only seven of 13 LIHTC communities without PBRA offer this amenity. Additionally, the wellness center will be appealing and unique to the market. The proposed amenities are acceptable and will be well received in the market area by the target market of very low to moderate income renter households.

(^) LIHTC/Deeply Subsidized

5. Distribution of Units by Bedroom Type

All 36 surveyed communities offer two bedroom units while 35 communities also offer one bedroom units. Fourteen communities offer three bedroom units while nine communities offer efficiency units (Table 35). Unit distributions were available for 21 of 33 surveyed communities without PBRA, containing 73.7 percent of surveyed units. Two bedroom units were the most common among these units at 43.6 percent while one bedroom units account for 43.2 percent. Efficiency units account for 6.6 percent of the surveyed rental stock while three bedroom units account for 6.6 percent.

6. Effective Rents

Rents presented in Table 32 are net or effective rents, as opposed to street or advertised rents. The net rents reflect adjustments to street rents to equalize the impact of utility policies across complexes. Specifically, net rents represent the hypothetical situations where rents include all utilities.

Among all surveyed rental communities without PBRA, net rents, unit sizes, and rents per square foot are as follows:

- **Efficiency** effective rents average \$1,538 per month. The average efficiency unit size is 588 square feet resulting in a net rent per square foot of \$2.61.
- **One bedroom** effective rents average \$1,504 per month. The average one bedroom unit size is 750 square feet resulting in a net rent per square foot of \$2.01.
- **Two bedroom** effective rents average \$1,841 per month. The average two bedroom unit size is 1,103 square feet resulting in a net rent per square foot of \$1.67.
- **Three bedroom** effective rents average \$1,719 per month. The average three bedroom unit size is 1,233 square feet resulting in a net rent per square foot of \$1.39.

Among all surveyed LIHTC communities without PBRA, net rents, unit sizes, and rents per square foot are as follows:

- **Efficiency** effective rent is \$1,200 per month. The efficiency unit size is 585 square feet resulting in a net rent per square foot of \$2.05.
- **One bedroom** effective rents average \$1,028 per month. The average one bedroom unit size is 721 square feet resulting in a net rent per square foot of \$1.43.
- **Two bedroom** effective rents average \$1,215 per month. The average two bedroom unit size is 1,021 square feet resulting in a net rent per square foot of \$1.19.
- **Three bedroom** effective rents average \$1,339 per month. The average three bedroom unit size is 1,214 square feet resulting in a net rent per square foot of \$1.10.

(1) Rent is adjusted to include all utilities and Incentives

(*) LIHTC Source: Phone Survey, RPRG, Inc. August 2023

7. Scattered Site Rentals

Given the proposed income restrictions on all units including PBV on 20 of 218 units, scattered site rentals are not expected to be a significant source of competition for the proposed units at Trinity Flats.

8. Estimate of Market Rent

To better understand how the proposed rents compare with the rental market, rents of the most comparable communities are adjusted for a variety of factors including curb appeal, square footage, utilities, and amenities. We utilized three market rate communities offering at least one and two

bedroom units in this analysis and adjustments made are broken down into four classifications. These classifications and an explanation of the adjustments made follows:

Table 36 Estimate of Market Rent Adjustments

- Rents Charged current rents charged, adjusted for utilities and incentives, if applicable.
- Design, Location, Condition adjustments made in this section include:
 - Building Design An adjustment was made, if necessary, to reflect the attractiveness of the proposed product relative to the comparable communities above and beyond what is applied for year built and/or condition.
 - Year Built/Rehabbed We applied a value of \$0.75 for each year newer a property is relative to a comparable.
 - Condition and Neighborhood We rated these features on a scale of 1 to 5 with 5 being the most desirable. An adjustment of \$20 per variance was applied for condition. Likewise, the neighborhood or location adjustment was \$20 per variance.

Rent Adjustments Summary							
B. Design, Location, Condition							
Structure / Stories							
Year Built / Condition	\$0.75						
Quality/Street Appeal	\$20.00						
Building Type	\$25.00						
Upscale Finishes	\$50.00						
Location	\$20.00						
C. Unit Equipment / Amenities							
Number of Bedrooms	\$75.00						
Number of Bathrooms	\$30.00						
Unit Interior Square Feet	\$0.25						
Balcony / Patio / Porch	\$5.00						
AC Type:	\$5.00						
Range / Refrigerator	\$25.00						
Microwave / Dishwasher	\$5.00						
Washer / Dryer: In Unit	\$25.00						
Washer / Dryer: Hook-ups	\$5.00						
D. Site Equipment / Amenities							
Community Room	\$10.00						
Pool	\$15.00						
Recreation Areas	\$5.00						
Fitness Center	\$10.00						

- > Square Footage Differences between comparables and the subject property are accounted for by an adjustment of \$0.25 per foot.
- ➤ Upscale Finishes We utilized an adjustment of \$50 to account for upscale finishes including stainless appliances and granite/quartz countertops at all properties utilized in this analysis.
- Unit Amenities Adjustments were made for amenities included or excluded at the subject property. The exact value of each specific value is somewhat subjective as particular amenities are more attractive to certain renters and less important to others. Adjustment values were between \$5 and \$25 for each amenity. We utilize adjustments of \$75 per bedroom and \$30 per bathroom where applicable.
- Site Amenities Adjustments were made in the same manner as with the unit amenities. Adjustment values were between \$10 and \$15 for each amenity.

Based on our adjustment calculations, the estimated market rents for the units at Trinity Flats are \$1,693 for efficiency units (Table 37), \$1,883 for one bedroom units (Table 38), \$2,482 for two bedroom units (Table 39), and \$2,669 for three bedroom units (Table 40). Market rent advantages based on the proposed 50 percent and 60 percent AMI are significant and range from 57.9 percent to 116.2 percent. Market rent advantages based on the proposed 80 percent AMI rents are also significant and range from 18.4 percent to 35.0 percent (Table 41). The project's overall market advantage is 76.03 percent. It should be noted, 20 units at 50 percent AMI will be deeply subsidized and rents will be based on income so rent advantages will be greater.

E. Affordable Multi-Family Rental Pipeline

We pursued several avenues of research to identify residential rental projects that are actively being planned or that are currently under construction within the Trinity Flats Market Area. We obtained pipeline information through review of the Georgia Department of Community Affairs' recent Low Income Housing Tax Credit (LIHTC) allocation lists, local newspaper articles, and the City of Atlanta's building permit tracker.

Many of the multi-family rental pipeline communities are upscale market rate rental communities that will be priced at or near the top of the market and not comparable to the subject property given a difference in income targeting. Based on our research, RPRG has identified nine near term pipeline general occupancy affordable communities and one age-restricted affordable community in the Trinity Flats Market Area.

Near Term

• Stanton Park: A 56-unit LIHTC community is under construction at 1056 Hank Aaron Drive SW in Atlanta. The development received four percent LIHTC allocations in 2020 and is currently undergoing pre-leasing. Management stated Stanton Park is expected to be completed in October 2023. The unit mix comprises one bedroom and two bedroom units targeting renter households earning up to 30 percent, 60 percent, and 80 percent AMI (Table 42).

Table 42 Pipeline Unit Mix, Stanton Park

Unit Mix Summary	1 BR	2 BR	Total
30% AMI	10	0	10
60% AMI	18	16	34
80% AMI	8	4	12
Total Units	36	20	56

• McAuley Park: A 171-unit mixed income community is under construction at 375 Gartrell Street SE in Atlanta. The development received four percent LIHTC allocations in 2020. Lease-

up is expected to begin in spring 2024 and the expected unit mix comprises efficiency, one bedroom, and two bedroom units targeting renter households earning up to 30 percent, 60 percent, and 80 percent AMI. The development will also offer market rate units (Table 43).

Table 43 Pipeline Unit Mix, McAuley Park

Unit Mix Summary	Efficiency	1 BR	2 BR	Total
30% AMI/PBRA	30	0	0	30
60% AMI	0	65	21	86
80% AMI	0	8	37	45
Market Rate	10	0	0	10
Total Units	40	73	58	171

• East Medinah Village: A 250-unit LIHTC community is under construction at 1090 Hank Aaron Drive SW in Atlanta. The development received four percent LIHTC allocations in 2020 and is currently under construction. East Medinah Village is expected to be completed in summer 2024. The unit mix comprises efficiency, one bedroom, and two bedroom units targeting renter households earning up to 50 percent, 60 percent, and 80 percent AMI (Table 44).

Table 44 Pipeline Unit Mix, East Medinah Village

Unit Mix Summary	Efficiency	1 BR	2 BR	Total
50% AMI	15	33	34	82
60% AMI	26	57	58	141
80% AMI	5	11	11	27
Total Units	46	101	103	250

• Ashley at Scholars Landing II: A 212-unit mixed-income community is undergoing site clearing at 668 Atlanta Student Movement Boulevard in Atlanta. The development received nine percent LIHTC allocations in 2020. The unit mix comprises efficiency, one bedroom, two bedroom, three bedroom, and four bedroom units targeting renter households earning up to 60 percent AMI (Table 45). The community will also offer market rate units.

Table 45 Pipeline Unit Mix, Ashley at Scholars Landing II

Unit Mix Summary	Efficiency	1 BR	2 BR	3 BR	4 BR	Total
60% AMI/PBRA	0	20	43	25	2	90
60% AMI	0	8	12	4	0	24
Market Rate	10	8	57	23	0	98
Total Units	10	36	112	52	2	212

• The Simpson: A 139-unit LIHTC community is planned for 810 Joseph E. Boone Boulevard in Atlanta. The development received four percent LIHTC allocations in 2020. The unit mix comprises one bedroom, two bedroom, and three bedroom units targeting renter households earning up to 30 percent, 60 percent, and 80 percent AMI (Table 46).

Table 46 Pipeline Unit Mix, The Simpson

Unit Mix Summary	1 BR	2 BR	3 BR	Total
30% AMI	7	19	8	34
60% AMI	8	35	15	58
80% AMI	8	28	11	47
Total Units	23	82	34	139

• The Avery: A 129-unit general occupancy LIHTC community is planned for Pryor Street SW in Atlanta. The development received nine percent LIHTC allocations in 2018. The Avery will offer one bedroom, two bedroom, and three bedroom units targeting renter households earning up to 60 percent and 80 percent AMI (Table 47).

Table 47 Pipeline Unit Mix, The Avery

Unit Mix Summary	1 BR	2 BR	3 BR	Total
60% AMI	38	55	10	103
80% AMI	9	14	3	26
Total Units	47	69	13	129

- City Lights IV: The fourth phase of the City Lights development is planned for just south of the intersection of North Avenue NE and Boulevard NE, north of Boulevard Place NE, and west of Arnold Street NE in Atlanta. The development received a four percent LIHTC allocation in 2020 and will offer six efficiency units, 35 one bedroom units, 44 two bedroom units, and three three-bedroom units targeting renter households earning at or below 60 percent AMI with PBRA on all units.
- Peachtree: A 170-unit general occupancy mixed-income community is planned for 360 Peachtree Street NE in Atlanta. The development received four percent LIHTC allocations in 2022. The unit mix will offer efficiency, one bedroom, two bedroom, and three bedroom units targeting renter households earning up to 30 percent, 60 percent, and 80 percent AMI. The community will also offer market rate units (Table 48).

Table 48 Pipeline Unit Mix, 360 Peachtree

Unit Mix Summary	Efficiency	1 BR	2 BR	3 BR	Total
30% AMI	0	8	35	8	51
60% AMI	5	29	5	1	40
80% AMI	7	31	16	0	54
Market Rate	3	12	9	1	25
Total Units	15	80	65	10	170

- **GE Tower:** A 201-unit general occupancy community is undergoing rehabilitation. GE Tower received four percent LIHTC allocations in 2022 but does not represent an expansion of the market area's housing stock.
- Cosby Spear: A 282-unit age-restricted community is undergoing rehabilitation. Cosby Spear received four percent LIHTC allocations in 2022; however, the community does not represent an expansion of the market area's housing stock and is not comparable due to a difference in age-targeting.

F. Housing Authority Data

The Atlanta Housing Authority serves more than 23,000 families throughout the city of Atlanta. The housing authority owns nine public housing-assisted residential properties, including seven senior high-rise communities and two small family communities. The waitlist for the Atlanta Housing Authority's Housing Choice Voucher Program is currently closed. The authority manages approximately 11,100 Housing Choice Vouchers.

G. Existing Low-Income Rental Housing

RPRG identified 65 subsidized/income restricted rental communities in the Trinity Flats Market Area including 11 general occupancy LIHTC communities, two age restricted LIHTC communities, three general occupancy public housing communities, one age restricted public housing community, one general occupancy Section 8 community, five age restricted Section 8 communities, 31 general occupancy subsidized LIHTC communities, and 11 age restricted subsidized LIHTC communities (Table 49). Sixteen general occupancy subsidized communities were surveyed for the rental survey. Additionally, RPRG identified eight LIHTC communities as planned or under construction in the market area. The location of these communities relative to the subject site is shown in Map 8.

Map 8 Subsidized Rental Communities, Trinity Flats Market Area

H. Impact of Abandoned, Vacant, or Foreclosed Homes

Based on field observations, limited abandoned/vacant single and multi-family homes exist in the Trinity Flats Market Area. We attempted to obtain recent foreclosure data from several sources including RealtyTrac; however, data was not available. The lack of foreclosure data likely reflects restrictions on foreclosures due to the COVID-19 pandemic. As evidenced by the well performing rental market and strong renter household growth, foreclosures or vacant homes will not negatively impact the performance of the subject property.

10. FINDINGS AND CONCLUSIONS

A. Key Findings

Based on the preceding review of the subject project and demographic and competitive housing trends in the Trinity Flats Market Area, RPRG offers the following key findings:

1. Site and Neighborhood Analysis

The subject site is a suitable location for affordable rental housing as it is compatible with surrounding land uses and has ample access to amenities, services, employers, and transportation arteries.

- The subject site is just north of Interstate 20 and west of Interstate 75/85 interchange. Trinity
 Flats is surrounded by a mixture of land uses including Atlanta City Hall, restaurants, municipal
 buildings, a church, parking decks, and apartments.
- The subject property is within one mile of two banks, a convenience store, pharmacy, grocery store, and retailer, many of which are walkable given sidewalks and crosswalks along all surrounding roads. The site is also convenient to transportation arteries, public transportation, and employment concentrations.
- Trinity Flats will have excellent drive-by visibility from Trinity Avenue SW, which is a heavily traveled connector street. Additional visibility will come from the moderately traveled Central Avenue SW, Washington Street SW, and Memorial Drive SW which border the site.
- The subject site is suitable for the proposed use of affordable rental housing. RPRG did not identify any negative land uses which were identified at the time of the site visit that would affect the subject property's viability in the marketplace.

2. Economic Context

Fulton County's economy experienced significant economic growth over the past decade, consistently outperforming the national economy over much of this period. The county's At-Place Employment grew during nine of 10 years prior to the pandemic. The county has rebounded with an average overall and employed portion of the labor force larger through June 2023 than pre-pandemic totals in 2019 while the county has recovered all jobs lost during the pandemic.

- Fulton County's annual average unemployment rate steadily declined from 2012 to 2019 and reached 3.6 percent in 2019, comparable to the state rate (3.6 percent) and national rate (3.7 percent). Annual average unemployment rates increased sharply in all three areas in 2020 due to the COVID-19 pandemic with the county's 7.9 percent above the state's 6.5 percent but below the nation's 8.1 percent; however, all three areas' unemployment rates rebounded through June 2023 with unemployment rates of 3.5 percent in the county, 3.3 percent in Georgia, and 3.5 percent in the nation.
- Fulton County's At-Place Employment (jobs located in the county) grew by 28.2 percent from 2010 to 2019 with the net addition of 198,665 jobs since the previous recession-era. The county added jobs in nine of 10 years over this period including each year from 2013 to 2019; Fulton County added an annual average of 25,976 jobs over this period with more than 20,000 new jobs each year. The county lost 58,510 jobs in 2020 at the onset of the COVID-19 pandemic which was slightly higher on a percentage basis when compared to the nation (6.5 percent versus 6.1 percent). Fulton County recouped all these job losses with the net addition of 87,873 jobs in 2021 and 2022.
- Fulton County's largest economic sectors of Professional-Business, Trade-Transportation-Utilities, and Education-Health combined for 54.9 percent of all jobs in the county. Three other sectors, Government, Financial Activities, and Leisure-Hospitality contributed at least nine percent of the county's jobs.

- Nearly 80 percent of workers residing in the Trinity Flats Market Area worked in Fulton County while roughly one-fifth (19.5 percent) worked in another Georgia county. Approximately two percent of Trinity Flats Market Area workers are employed outside the state.
- RPRG identified many large economic expansions recently announced in Fulton County since January 2021. Since January 2022, RPRG identified 23 WARN notices with 3,887 jobs affected.

3. Population and Household Trends

The Trinity Flats Market Area had significant population and household growth from 2010 to 2023 and growth is projected to accelerate over the next three years.

- The Trinity Flats Market Area's population and household base each grew significantly between 2010 and 2023 with net growth of 20,457 people (38.1 percent) and 10,965 households (50.1 percent). The market area's average annual growth was 1,574 people (2.9 percent) and 843 households (3.9 percent).
- The Trinity Flats Market Area is projected to add 1,837 people (2.5 percent) and 1,042 households (3.2 percent) annually from 2023 to 2026. Net growth over this three-year period will be 5,511 people (7.4 percent) and 3,126 households (9.5 percent).
- The Trinity Flats Market Area is projected to contain 79,677 people and 35,956 households in 2026.

4. Demographic Analysis

The population and household base of the Trinity Flats Market Area is younger, less affluent, and more likely to rent when compared to Fulton County.

- The median age of the population in the Trinity Flats Market Area is significantly younger than Fulton County's population with median ages of 30 and 35 years, respectively. The Trinity Flats Market Area large proportions of Young Adults ages 20 to 34 (35.5 percent) and Adults age 35 to 61 years (29.9 percent). Children/Youth under 20 and Seniors ages 62 and older comprise 23.4 percent and 11.2 percent of the market area's population, respectively.
- Single-person households were the most common household type in the Trinity Flats Market Area at 52.6 percent. Multi-person households without children were the second-most common in the market area at 33.7 percent; households with children were the least common household type in the market area at 13.7 percent.
- The Trinity Flats Market Area's renter percentage of 71.7 percent in 2023 is significantly higher than Fulton County's 50.9 percent. Renter households accounted for 79.8 percent of net household growth in the Trinity Flats Market Area over the past 13 years, a trend that RPRG expects to continue. The Trinity Flats Market Area is expected to add 2,495 net renter households over the next three years and the renter percentage is expected to increase to 72.4 percent by 2026.
- Nearly 85 percent of renter households in the Trinity Flats Market Area had one or two people including 56.2 percent with one person. Roughly 12 percent of renter households had three or four people and 3.1 percent had five or more people.
- The 2023 median income in the Trinity Flats Market Area is \$71,420 per year, \$17,600 or 19.8 percent lower than the \$89,020 median in Fulton County. Roughly 23 percent of Trinity Flats Market Area households earn less than \$25,000, 15.4 percent earn \$25,000 to \$49,999, and 13.3 percent earn \$50,000 to \$74,999. Nearly half (48.1 percent) of Trinity Flats Market Area households earn upper incomes of at least \$75,000, including 19.9 percent earning \$150,000 or more.
- The 2023 median income of Trinity Flats Market Area is \$51,644 for renters and \$132,025 for owners. Approximately 30 percent of renter households earn less than \$25,000, 19.4 percent

earn \$25,000 to \$49,999, and 15.5 percent earn \$50,000 to \$74,999. Roughly one-third (35.5 percent) of renter households earn \$75,000 or more including 11.1 percent earning \$150,000 or more.

5. Competitive Housing Analysis

RPRG surveyed 36 general occupancy communities in the Trinity Flats Market Area including 20 market rate communities, 13 standard Low Income Housing Tax Credit (LIHTC) communities, and three deeply subsidized LIHTC communities.

- The Trinity Flats Market Area's rental market without PBRA is performing well with an aggregate stabilized vacancy rate of 4.1 percent among 7,959 combined units. The Victory at Summerhill is excluded from the stabilized vacancy rate due to undergoing initial lease-up. The 13 LIHTC communities without PBRA are also performing well with 117 vacancies among 3,055 combined units for an aggregate vacancy rate of 3.8 percent; seven of 13 LIHTC communities without PBRA reported vacancy rates of 3.1 percent or less with three communities fully occupied. The surveyed communities with PBRA are all fully occupied.
- Among all surveyed rental communities without PBRA, net rents, unit sizes, and rents per square foot are as follows:
 - Efficiency effective rents average \$1,538 per month. The average efficiency unit size is 588 square feet resulting in a net rent per square foot of \$2.61.
 - One bedroom effective rents average \$1,504 per month. The average one bedroom unit size is 750 square feet resulting in a net rent per square foot of \$2.01.
 - Two bedroom effective rents average \$1,841 per month. The average two bedroom unit size is 1,103 square feet resulting in a net rent per square foot of \$1.67.
 - Three bedroom effective rents average \$1,719 per month. The average three bedroom unit size is 1,233 square feet resulting in a net rent per square foot of \$1.39.
- Among all surveyed LIHTC communities without PBRA, net rents, unit sizes, and rents per square foot are as follows:
 - Efficiency effective rent is \$1,200 per month. The efficiency unit size is 585 square feet resulting in a net rent per square foot of \$2.05.
 - One bedroom effective rents average \$1,028 per month. The average one bedroom unit size is 721 square feet resulting in a net rent per square foot of \$1.43.
 - Two bedroom effective rents average \$1,215 per month. The average two bedroom unit size is 1,021 square feet resulting in a net rent per square foot of \$1.19.
 - Three bedroom effective rents average \$1,339 per month. The average three bedroom unit size is 1,214 square feet resulting in a net rent per square foot of \$1.10.
- Based on our adjustment calculations, the estimated market rents for the units at Trinity Flats are \$1,693 for efficiency units, \$1,883 for one bedroom units, \$2,482 for two bedroom units, and \$2,669 for three bedroom units. Market rent advantages based on the proposed 50 percent and 60 percent AMI are significant and range from 57.9 percent to 116.2 percent. Market rent advantages based on the proposed 80 percent AMI rents are also significant and range from 18.4 percent to 35.0 percent. The project's overall market advantage is 76.03 percent. It should be noted, 20 units at 50 percent AMI will be deeply subsidized and rents will be based on income so rent advantages will be greater.
- RPRG identified eight comparable general occupancy LIHTC communities (Stanton Park, McAuley Park, East Medinah Village, Ashley at Scholars Landing II, The Simpson, The Avery, City Lights IV, and 360 Peachtree) as planned or under construction in the Trinity Flats Market Area. Two communities (one general occupancy and one age restricted) are undergoing

rehabilitation. All comparable units have been accounted for in the LIHTC demand estimate and capture rate analysis with all capture rates well within acceptable levels.

B. Product Evaluation

Considered in the context of the competitive environment, the relative position of Trinity Flats is as follows:

- **Site:** The subject site is acceptable for a rental housing development targeting very low to moderate income renter households. Surrounding land uses are compatible with multi-family development and are appropriate for an affordable rental community. The site is convenient to major thoroughfares, employment concentrations, and neighborhood amenities including public transit, two banks, recreation, medical facilities, a pharmacy, recreation, a pharmacy, convenience store, general retailer, and several restaurants within one mile. The site is generally comparable to the location of all surveyed communities given similar access to neighborhood amenities, employment, and major traffic arteries.
- Unit Distribution: Trinity Flats 48 efficiency units (22.0 percent), 112 one-bedroom units (51.4 percent), 50 two-bedroom units (22.9 percent), and eight three-bedroom units (3.7 percent). One, two, and three-bedroom units are all common in the market area with 16 of 36 surveyed communities offering all three floor plans including 15 of 16 surveyed LIHTC communities (with and without PBRA). Nine surveyed communities offer efficiency units. Roughly 74 percent of the subject's units will be one and two bedroom units, which is just slightly below the market average of 86.8 percent. The Affordability Analysis indicates sufficient incomequalified renter households will reside in the market area for the proposed unit mix and rents. The proposed unit mix is acceptable and will be well received by the market of very low to moderate income renter households.
- Unit Size: The proposed weighted average unit sizes at Trinity Flats are 425 square feet for
 efficiency units, 600 square feet for one bedroom units, 850 square feet for two bedroom
 units, 1,100 square feet for three bedroom units. All proposed unit sizes are significantly
 smaller compared to market averages (roughly 150 to 250 square feet smaller); however, are
 considered acceptable considering the downtown location, high-rise building, and proposed
 affordable rents.
- Unit Features: Trinity Flats will offer a range, refrigerator, garbage disposal, microwave, dishwasher, and washer and dryer connections. The units will also offer blinds, carpet and LVT flooring, central heating and air conditioning, ceiling fans, and a walk-in closet as standard. The proposed unit features are acceptable and will be competitive with existing LIHTC communities in the market area.
- Community Amenities: Trinity Flats' community amenity package will include an equipped computer center, community room, outdoor courtyard with sitting area, wellness center, elevators, fitness room, central laundry facility, on-site management, and arts and crafts room. The proposed amenity package will be competitive with surveyed rental communities in the Trinity Flats Market Area and will be generally comparable to those offered at the surveyed LIHTC communities except for a swimming pool which is acceptable given the affordable nature of the subject property and only seven of 13 LIHTC communities without PBRA offer this amenity. Additionally, the wellness center will be appealing and unique to the market. The proposed amenities are acceptable and will be well received in the market area by the target market of very low to moderate income renter households.
- Marketability: The subject property will offer an attractive product with competitive units
 features and community amenities. The proposed construction of the subject property will
 meet the needs of its intended target market of very low to moderate income renter
 households.

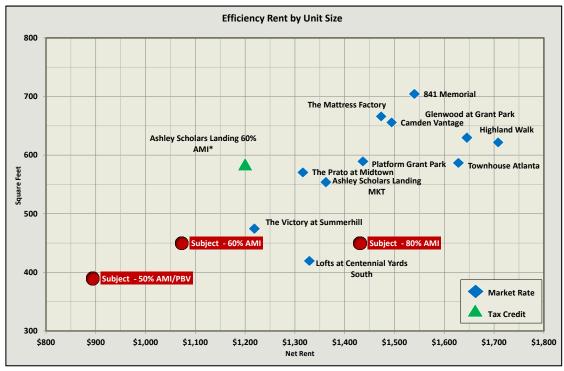

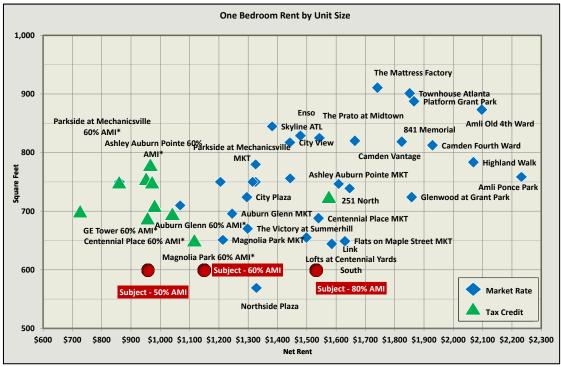

C. Price Position

The proposed 50 percent, 50 percent AMI AMI/PBV (lesser of proposed contract rent and maximum LIHTC rent), and 60 percent AMI rents will be within the range of existing LIHTC rents in the market area (Figure 9). The proposed 80 percent AMI rents are comparable to market rate rents at mixed-income LIHTC communities and well below the top of the market. The Affordability Analysis illustrates significant income-qualified renter households will exist in the market area for the proposed rents and all proposed rents have significant market rent advantages including the proposed 80 percent AMI rents. All proposed rents are acceptable and will be competitive in the market area.

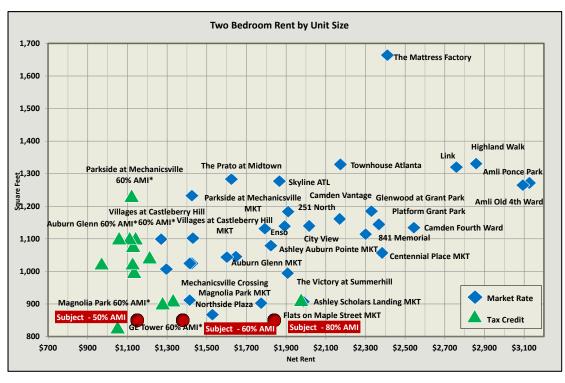

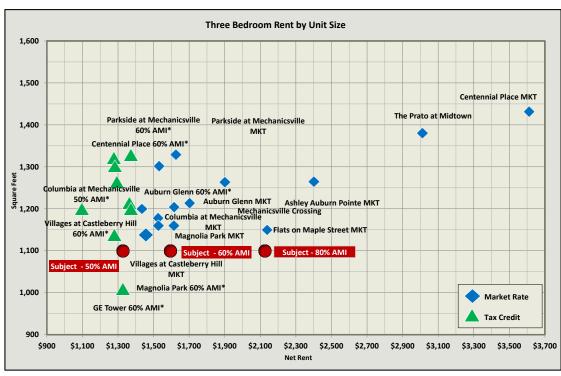

Figure 9 Price Position, Trinity Flats

11. ABSORPTION AND STABILIZATION RATES

A. Absorption Estimate

Station 496, the newest deeply subsidized LIHTC community in the market area, opened in May 2022 and fully leased-up its 123 units in August 2022 for an average monthly absorption of roughly 30 units. Station 464, a deeply subsidized LIHTC community, opened in October 2019 and was fully occupied in December 2019 for an average monthly absorption rate of roughly 32 units. Absorption estimates are based on a variety of factors in addition to the experience of comparable communities including:

- The Trinity Flats Market Area is projected to add 3,126 net households from 2023 to 2026 including 2,495 renter households (79.8 percent of net household growth).
- Without accounting for the proposed deep subsidies on 20 LIHTC units at 50 percent AMI, more than 9,000 renter households will be income-qualified for one or more units proposed at Trinity Flats in 2026. The number of income-qualified renter households significantly increases to 16,705 with the proposed PBV. All affordability renter capture rates are low with or without accounting for PBV.
- All DCA demand capture rates without the proposed PBV are low and well below DCA thresholds. The overall DCA demand capture rate without accounting for the proposed PBV is 6.3 percent. When accounting for the proposed PBV, the project's overall capture rate decreases to 3.1 percent.
- The Trinity Flats Market Area's rental market without PBRA is performing well with an aggregate stabilized vacancy rate of 4.1 percent among 7,959 combined units. The Victory at Summerhill is excluded from the stabilized vacancy rate due to undergoing initial lease-up. The 13 LIHTC communities without PBRA are also performing well with 117 vacancies among 3,055 combined units for an aggregate vacancy rate of 3.8 percent; seven of 13 LIHTC communities without PBRA reported vacancy rates of 3.1 percent or less with three communities fully occupied. The surveyed LIHTC communities with PBRA are all fully occupied.
- The newly constructed Trinity Flats will offer an attractive and affordable product that will be well received by the target market in the Trinity Flats Market Area.

Based on the factors noted above, we estimate Trinity Flats to lease-up at a rate of 30 units per month. At this rate, the subject property will reach a stabilized occupancy of at least 93 percent within six to seven months. RPRG believes that the subject property will be able to successfully reach and maintain a stabilized occupancy of at least 93 percent following its entrance into the rental market.

B. Impact on Existing and Pipeline Rental Market

Given the projected household growth and well performing affordable rental market, we do not expect Trinity Flats to have a negative impact on existing rental communities in the Trinity Flats Market Area including those with tax credits.

12. INTERVIEWS

Primary information gathered through field and phone interviews was used throughout the various sections of this report. The interviewees included rental community property managers and leasing agents. RPRG also reviewed the Georgia Department of Community Affairs' (DCA) lists of recent Low Income Housing Tax Credit (LIHTC) allocation lists, reviewed local newspaper articles, and reviewed the City of Atlanta's building permit tracker.

Estimated market rent

Based on an analysis of strong renter household growth projections, low affordability capture rates, low demand capture rates (with and without PBV), current rental market conditions, and socioeconomic and demographic characteristics of the Trinity Flats Market Area, RPRG believes that the subject property will be able to successfully reach and maintain a stabilized occupancy of at least 93 percent following its entrance into the rental market with or without the proposed PBV on 20 LIHTC units. The subject property will be competitively positioned with existing rental communities in the Trinity Flats Market Area and the units will be well received by the target market.

We recommend proceeding with the project as planned.

APPENDIX 1 UNDERLYING ASSUMPTIONS AND LIMITING CONDITIONS

In conducting the analysis, we will make the following assumptions, except as otherwise noted in our report:

- 1. There are no zoning, building, safety, environmental or other federal, state or local laws, regulations or codes which would prohibit or impair the development, marketing or operation of the subject project in the manner contemplated in our report, and the subject project will be developed, marketed and operated in compliance with all applicable laws, regulations and codes.
- 2. No material changes will occur in (a) any federal, state or local law, regulation or code (including, without limitation, the Internal Revenue Code) affecting the subject project, or (b) any federal, state or local grant, financing or other program which is to be utilized in connection with the subject project.
- 3. The local, national and international economies will not deteriorate, and there will be no significant changes in interest rates or in rates of inflation or deflation.
- 4. The subject project will be served by adequate transportation, utilities and governmental facilities.
- 5. The subject project will not be subjected to any war, energy crisis, embargo, strike, earthquake, flood, fire or other casualty or act of God.
- 6. The subject project will be on the market at the time and with the product anticipated in our report, and at the price position specified in our report.
- 7. The subject project will be developed, marketed and operated in a highly professional manner.
- 8. No projects will be developed which will be in competition with the subject project, except as set forth in our report.
- 9. There are neither existing judgments nor any pending or threatened litigation, which could hinder the development, marketing or operation of the subject project.

The analysis will be subject to the following limiting conditions, except as otherwise noted in our report:

- 1. The analysis contained in this report necessarily incorporates numerous estimates and assumptions with respect to property performance, general and local business and economic conditions, the absence of material changes in the competitive environment and other matters. Some estimates or assumptions, however, inevitably will not materialize, and unanticipated events and circumstances may occur; therefore, actual results achieved during the period covered by our analysis will vary from our estimates and the variations may be material.
- 2. Our absorption estimates are based on the assumption that the product recommendations set forth in our report will be followed without material deviation.
- 3. All estimates of future dollar amounts are based on the current value of the dollar, without any allowance for inflation or deflation.
- 4. We have no responsibility for considerations requiring expertise in other fields. Such considerations include, but are not limited to, legal matters, environmental matters, architectural matters, geologic considerations, such as soils and seismic stability, and civil, mechanical, electrical, structural and other engineering matters.
- 5. Information, estimates and opinions contained in or referred to in our report, which we have obtained from sources outside of this office, are assumed to be reliable and have not been independently verified.
- 6. The conclusions and recommendations in our report are subject to these Underlying Assumptions and Limiting Conditions and to any additional assumptions or conditions set forth in the body of our report.

APPENDIX 2 ANALYST CERTIFICATIONS

I affirm that I have made a physical inspection of the market area and the subject property and that information has been used in the full study of the need and demand for the proposed units. The report was written according to DCA's market study requirements, the information included is accurate and the report can be relied upon by DCA as a true assessment of the low-income housing rental market.

To the best of my knowledge, the market can support the project as shown in the study. I understand that any misrepresentation of this statement may result in the denial of further participation in DCA's rental housing programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded.

DCA may rely on the representation made in the market study. The document is assignable to other lenders.

APPENDIX 4 ANALYST RESUMES

TAD SCEPANIAK Managing Principal

Tad Scepaniak assumed the role of Real Property Research Group's Managing Principal in November 2017 following more than 15 years with the firm. Tad has extensive experience conducting market feasibility studies on a wide range of residential and mixed-use developments for developers, lenders, and government entities. Tad directs the firm's research and production of feasibility studies including large-scale housing assessments to detailed reports for a specific project on a specific site. He has extensive experience analyzing affordable rental communities developed under the Low Income Housing Tax Credit (LIHTC) program and market-rate apartments developed under the HUD 221(d)(4) program and conventional financing. Tad is the key contact for research contracts many state housing finance agencies, including several that commission market studies for LIHTC applications.

Tad served as Chair of the National Council of Housing Market Analysts (NCHMA) and previously served as Vice Chair and Co-Chair of Standards Committee. He has taken a lead role in the development of the organization's Standard Definitions and Recommended Market Study Content, and he has authored and co-authored white papers on market areas, derivation of market rents, and selection of comparable properties. Tad is also a founding member of the Atlanta chapter of the Lambda Alpha Land Economics Society.

Areas of Concentration:

- Low Income Tax Credit Rental Housing: Mr. Scepaniak has worked extensively with the Low Income Tax Credit program throughout the United States, with special emphasis on the Southeast and Mid-Atlantic regions.
- <u>Senior Housing:</u> Mr. Scepaniak has conducted feasibility analysis for a variety of senior oriented rental housing. The majority of this work has been under the Low Income Tax Credit program; however, his experience includes assisted living facilities and market rate senior rental communities.
- Market Rate Rental Housing: Mr. Scepaniak has conducted various projects for developers of market rate rental housing. The studies produced for these developers are generally used to determine the rental housing needs of a specific submarket and to obtain financing.
- <u>Public Housing Authority Consultation</u>: Tad has worked with Housing Authorities throughout the
 United States to document trends rental and for sale housing market trends to better understand
 redevelopment opportunities. He has completed studies examining development opportunities
 for housing authorities through the Choice Neighborhood Initiative or other programs in Florida,
 Georgia, North Carolina, South Carolina, Texas, and Tennessee.

Education:

Bachelor of Science - Marketing; Berry College - Rome, Georgia

BRETT WELBORN Senior Analyst

Brett Welborn entered the field of Real Estate Market Research in 2008, joining Real Property Research Group's (RPRG) Atlanta office as a Research Associate upon college graduation. Since 2014, Brett has served as Analyst for RPRG, conducting market studies for affordable and market rate communities, and is a team lead in RPRG's Roswell office.

Areas of Concentration:

- <u>Low Income Housing Tax Credits</u>: Brett has worked extensively with the Low-Income Housing Tax Credit program, evaluating general occupancy, senior oriented, and special needs developments for State allocating agencies, lenders, and developers. His work with the LIHTC program has spanned a wide range of project types, including newly constructed communities, adaptive reuses, and rehabilitations.
- Market Rate Rental Housing: Brett has analyzed various projects for lenders and developers of market rate rental housing including those compliant with HUD MAP guidelines under the FHA 221(d)(4) program. The market rate studies produced are often used to determine the rental housing needs of a specific submarket and to obtain financing.

Education:

Bachelor of Business Administration - Real Estate; University of Georgia, Athens, GA

QUINCY HAISLEY Analyst

Quincy Haisley joined RPRG in June 2021 after completion of her master's degree at the Georgia Institute of Technology. Prior to joining RPRG, Quincy earned a bachelor's degree in Geography with an emphasis in Urban and Regional Planning from Brigham Young University. At the Georgia Institute of Technology, she received her master's degree in City and Regional Planning, specializing in Housing and Community Development. Throughout her academic career, she interned with local governments, an affordable housing consulting firm, and an urban planning non-profit.

At RPRG, Quincy focuses on rental market studies.

Education:

Master of City and Regional Planning – Housing and Community Development; Georgia Institute of Technology

Bachelor of Science – Geography – Urban and Regional Planning; Brigham Young University

APPENDIX 5 DCA CHECKLIST

B. Executive Summary

_	Dua	inst Decembration.		
a.		ject Description:		
	İ.	Brief description of the project location including address and/or position	De == (=)	c
		relative to the closest cross-street	• . ,	6
	ii.	Construction and Occupancy Types	Page(s)	6
	iii.	Unit mix, including bedrooms, bathrooms, square footage, Income targeting,	D (1)	^
		rents, and utility allowance	Page(s)	6
	iv.	Any additional subsidies available, including project based rental assistance	D (1)	^
		(PBRA)	Page(s)	6
	٧.	Brief description of proposed amenities and how they compare with existing	5 ()	•
	0	properties	Page(s)	6
b.		Description/Evaluation:	5 ()	_
	i.	A brief description of physical features of the site and adjacent parcels	Page(s)	7
	ii.	A brief overview of the neighborhood land composition (residential,		
		commercial, industrial, agricultural)	• , ,	_
	iii.	A discussion of site access and visibility		7
	iv.	Any significant positive or negative aspects of the subject site	Page(s)	7
	٧.	A brief summary of the site's proximity to neighborhood services including		
		shopping, medical care, employment concentrations, public transportation, etc	Page(s)	7
	vi.	A brief discussion of public safety, including comments on local perceptions,		
		maps, or statistics of crime in the area	Page(s)	7
	vii.	An overall conclusion of the site's appropriateness for the proposed		
		development	Page(s)	7
C.	Maı	ket Area Definition:		
	i.	A brief definition of the primary market area (PMA) including boundaries and		
		their approximate distance from the subject property	Page(s)	7
d.	Cor	nmunity Demographic Data:		
	i.	Current and projected household and population counts for the PMA	Page(s)	7
	ii.	Household tenure including any trends in rental rates.	Page(s)	7
	iii.	Household income level.	Page(s)	7
	iv.	Impact of foreclosed, abandoned / vacant, single and multi-family homes, and		
		commercial properties in the PMA of the proposed development	Page(s)	7
e.	Ecc	nomic Data:		
	i.	Trends in employment for the county and/or region		8
	ii.	Employment by sector for the primary market area.	Page(s)	8
	iii.	Unemployment trends for the county and/or region for the past five years	Page(s)	8
	iv.	Brief discussion of recent or planned employment contractions or expansions	Page(s)	8
	٧.	Overall conclusion regarding the stability of the county's economic environment	Page(s)	8
f.	Pro	ject Specific Affordability and Demand Analysis:		
	i.	Number of renter households income qualified for the proposed development		
		given retention of current tenants (rehab only), the proposed unit mix, income		
		targeting, and rents. For senior projects, this should be age and income		
		qualified renter households.	Page(s)	8
	ii.	Overall estimate of demand based on DCA's demand methodology	Page(s)	8
	iii.	Capture rates for the proposed development including the overall project, all		
		LIHTC units (excluding any PBRA or market rate units), by AMI, by bedroom		
		type, and a conclusion regarding the achievability of these capture rates	Page(s)	8

	g.	Competitive Rental Analysis		
	•	i. An analysis of the competitive properties in the PMA	Page(s)	9
		ii. Number of properties	Page(s)	9
		iii. Rent bands for each bedroom type proposed	• , ,	9
		iv. Average market rents.	• , ,	9
	h.	Absorption/Stabilization Estimate:		·
	•••	i. An estimate of the number of units expected to be leased at the subject		
		property, on average, per month	Page(s)	10
		ii. Number of months required for the project to stabilize at 93% occupancy	• ,	10
			Page(s)	10
		iii. Estimate of stabilization occupancy and number of months to achieve that	D (.)	40
		occupancy rate	Page(s)	10
	İ.	Interviews		
	j.	Overall Conclusion:		
		i. Overall conclusion regarding potential for success of the proposed		
		development	Page(s)	11
	k.	Summary Table	Page(s)	7
C.	Pro	ject Description		
	a.	Project address and location	Pana(s)	17
	b.	Construction type.	• , ,	17
		••	• , ,	
	C.	Occupancy Type.		17 N/A
	d.	Special population target (if applicable).	• , ,	N/A
