

File-Users' Guide to Georgia Historic Resources Surveys

This file users' guide is a list of all known historic resources surveys that have been undertaken in Georgia, including the basic details and status of each survey. The surveys here have been organized by county, and then date. The dates given indicate the first year of the survey. Survey type indicates for what purpose a survey was undertaken, or how it was funded. Survey area notes the neighborhood, city, or general area where the survey was conducted.

The surveys fall into two major groups, those that were digitized (entered into Georgia's Natural, Archaeological and Historic Resources Geographic Information System, or GNAHRGIS) and those that can only be found in hard copy. Every survey undertaken since 2003 has been digitized, and some (but not all) undertaken between 2003 and 1988 have been digitized. Surveys that were completed in the mid-to-late 1970s to 1988 can only be found on hard copy.

Survey forms, reports, and maps (if applicable), are filed in the HPD's public research room. As HPD no longer accpts survey forms for new surveys, recent survey files generally only include the survey report and related maps. Maps can both be found with the survey files themselves, and in the map drawer next to the right of the research room entrance.
