Policies are adopted to provide ongoing guidance and direction to local officials. They provide a basis for making decisions in implementing the comprehensive plan, including achieving the Community Vision and appropriately addressing the Community Issues and Opportunities. The following policies should be modified to address the community’s particular situation.

**Development Patterns**

- Our decisions on new development will contribute to, not take away from, our community’s character and sense of place.
- We encourage development that is sensitive to the historic context, sense of place, and overall setting of the community.
- We want development whose design, landscaping, lighting, signage, and scale add value to our community.
- Our community will use land efficiently to avoid the costs and problems associated with urban sprawl.
- We will preserve the rural character of our community and provide the opportunity for agricultural and forestry activities to remain a vital part of the community.
- Our gateways and corridors will create a "sense of place" for our community.
- We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.
- We are committed to creating walkable, safe, and attractive neighborhoods throughout the community, where people have easy access to schools, parks, and necessary services (grocery store, drug store) without having to travel by car.
- Creation of recreational facilities and set-aside of greenspace are important to our community.
- We are committed to providing pleasant, accessible public gathering places and parks throughout the community.
- We are committed to redeveloping and enhancing existing commercial and industrial areas within our community in preference to new development in Greenfield (previously undeveloped) areas of the community.
- We support appropriate residential and non-residential in-fill development and redevelopment in ways that complement surrounding areas.
- We encourage mixed-use developments that are human-scale and less auto-oriented.
- We support increases in residential density in areas where community design standards, environmental constraints and available infrastructure capacities can satisfactorily accommodate the increased density.
- We support new land uses that contribute to protecting the environment and preserving meaningful open space.
- We support new land uses that enhance housing options in our community.
- We will encourage development of a rational network of commercial nodes (villages, or activity centers) to meet the service needs of citizens while avoiding unattractive and inefficient strip development along major roadways.
- We are open to land planning and development concepts that may be new to our area but have been tried successfully in other places.
Georgia Department of Community Affairs
Supplemental Planning Recommendations

- We will make decisions that encourage walking, biking, car-pooling, and other alternative transportation choices.
- We will target transportation improvements to support desired development patterns for the community (recognizing that ready availability of transportation creates demand for land development in adjacent areas).
- Our new and reconstructed roadways will be appropriately designed, using context sensitive design considerations, to enhance community aesthetics and to minimize environmental impacts.
- Our new and reconstructed roadways will be designed to accommodate multiple functions, including pedestrian facilities, parking, bicycle routes, public transit (if applicable) as well as local vehicular circulation.
- We will promote connectivity of our road network (such as fostering a grid network of streets, multiple connections between subdivisions).
- We support creation of a community-wide pedestrian/bike path network.
- We will encourage new development that supports and ties in well with existing and planned public transit options in the community.
- We will ensure (through traffic calming and other design considerations) that excessive vehicular traffic will not harm the peaceful nature of our residential neighborhoods.

Resource Conservation
- The protection and conservation of our community’s resources will play an important role in the decision-making process when making decisions about future growth and development.
- We will minimize inefficient land consumption and encourage more compact urban development in order to preserve green open space and natural resource areas.
- We will encourage new development to locate in suitable locations in order to protect natural resources, environmentally sensitive areas, or valuable historic, archaeological or cultural resources from encroachment.
- We will factor potential impacts on air and water quality in making decisions on new developments and transportation improvements.
- Infrastructure networks will be developed to steer new development away from sensitive natural resource areas.
- We will promote the protection and maintenance of trees and green open space in all new development.
- We will promote low impact development that preserves the natural topography and existing vegetation of development sites.
- We will work to redirect development pressure away from agricultural areas in order to conserve farmland to protect and preserve this important component of our community.
- We will ensure safe and adequate supplies of water through protection of ground and surface water sources.
- We will promote enhanced solid waste reduction and recycling initiatives.

Community Facilities and Infrastructure
- Our community will make efficient use of existing infrastructure and public facilities in order to minimize the need for costly new/expanded facilities and services.
- We will protect existing infrastructure investments (i.e., already paid for) by encouraging infill redevelopment, and compact development patterns.
Georgia Department of Community Affairs  
Supplemental Planning Recommendations

- We will ensure that new development does not cause a decline in existing levels of service for the community’s residents and employers.
- We will limit development within our community to areas that can be reasonably served by public infrastructure.
- We will ensure that capital improvements needed to accommodate future development are provided concurrent with new development.
- We will coordinate provision of public facilities and services with land use planning to promote more compact urban development.
- The community will use sequential, phased extension of utilities and services to encourage rational expansion of development to areas immediately contiguous to already developed areas of the community.
- Our community will use planned infrastructure expansion to support development in areas identified (in the comprehensive plan) as suitable for such development.
- The community will seek ways for new growth to pay for itself (in terms of public investment in infrastructure and services to support the development) to the maximum extent possible.
- We will invest in parks and open space to enhance the quality of life for our citizens.
- We will work with the local school board to encourage school location decisions that support the community’s overall growth and development plans.

Social and Economic Development

- We will support programs for retention, expansion and creation of businesses that are a good fit for our community’s economy in terms of job skill requirements and linkages to existing businesses.
- We will target reinvestment to declining, existing neighborhoods, vacant or underutilized sites or buildings in preference to new economic development projects in Greenfield (previously undeveloped) areas of our community.
- We will seek to balance the supply of housing and employment in our community and consider their location in relation to each other.
- We will take into account access to housing and impacts on transportation when considering economic development projects.
- We will take into account impacts on infrastructure and natural resources in our decision making on economic development projects.
- We will consider the employment needs and skill levels of our existing population in making decisions on proposed economic development projects.
- We will carefully consider costs as well as benefits in making decisions on proposed economic development projects.
- We will eliminate substandard or dilapidated housing in our community.
- We will stimulate infill housing development in existing neighborhoods.
- We will create affordable housing opportunities to ensure that all those who work in the community have a viable option to live in the community.
- We will encourage development of housing opportunities that enable residents to live close to their places of employment.
- We will accommodate our diverse population by encouraging a compatible mixture of housing types, densities and costs in each neighborhood.
- We will encourage housing policies, choices and patterns that move people upward on the housing ladder from dependence to independence (home-ownership).
Supplemental Planning Recommendations

- We will increase opportunities for low-to-moderate income families to move into affordable owner-occupied housing.
- We support dispersion of assisted housing throughout the community in order to diversify neighborhoods and eliminate pockets of poverty.

**Governmental Relations**
- We will seek opportunities to share services and facilities with neighboring jurisdictions when mutually beneficial.
- We will work jointly with neighboring jurisdictions on developing solutions for shared regional issues (such as growth management, watershed protection).
- We will pursue joint processes for collaborative planning and decision-making with neighboring jurisdictions.
- We will consult other public entities in our area when making decisions that are likely to impact them.
- We will provide input to other public entities in our area when they are making decisions that are likely to have an impact on our community or our plans for future development.
- We will engage in cooperative planning between the local government and local school board in regard to the appropriate location and use of schools as community facilities.
